BADGER-SKINS (עֹרֹת תְּחָשִׁים, *'órôth tĕchâshîm*; תָּחָשׁ, *tachash* [Ezek. xvi. 10]; BAF. δέρματα ὑακίνθινα in Ex. xxv. 5, in Ex. xxxv. 7; ὑάκινθος; Aq. and Sym. ἰάνθινα in Ezek. xvi. 10; *pelles ianthinae, ianthinus*). The Hebrew *tachash*, which the A. V. renders *badger* [R. V. text "seal," marg. *porpoise*], occurs in connexion with *'ôr*, *'órôth* ("skin," "skins"), in Ex. xxv. 5, xxvi. 14, xxxv. 7, 23, xxxvi. 19; Num. iv. 6, 8, 11, 12, 14, 25. In Ezek. xvi. 10 *tachash* occurs without *'órôth*, and is mentioned as the substance out of which women's shoes were made; in the former passages the *tachash skins* are named in relation to the Tabernacle, ark, &c., and appear to have formed the exterior covering of these sacred articles. There is much obscurity as to the meaning of the word *tachash* (see many opinions collected by Rödiger in Ges. *Thes.* s. v.), although, as we shall see, there is reasonable ground for believing it to mean some of the marine mammalia, as the dugongs and seals found in the Red Sea, the skins of which are much used by the Arabs. The ancient Versions seem nearly all agreed that it denotes not an animal, but a colour, either black or sky-blue; and amongst critics who adopt this interpretation are Bochart (*Hieroz.* ii. 387), Rosenmüller (*Schol. ad V. T.*, Ex. xxv. 5; Ezek. xvi. 10), Bynaeus (*de Calceis Hebraeorum*, lib. i. ch. 3), Scheuchzer (*Phys. Sacr.* in Ex. xxv. 5), Parkhurst (*Heb. Lex.* s. v.), who observes that "an outermost covering for the Tabernacle of azure or sky-blue was very proper to represent the sky or azure boundary of the system." Some Versions, as the German of Luther and the A. V., led apparently by the Chaldee,[b] and perhaps by a certain similarity of sound between the words *tachash*, *taxus*, *dachs*,

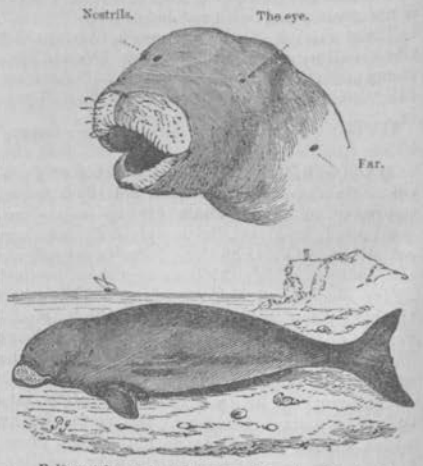
[a] In 1 Macc. ix. 57, his return seems to be referred to the death of Alcimus.

[b] סַמְנוֹנָא. "*taxus*, sic dictus quia gaudet et superbit in coloribus multis" (Buxtorf, *Lex. Rab.* s. v.).

have supposed that the badger (*Meles taxus*) is denoted. The badger (*Meles taxus*) of naturalists is found in the hilly parts of Palestine, concealing itself in burrows; and though a nocturnal and very shy animal, it must be rather common, as not only have I three times procured it myself, but we frequently found traces of it, and often saw the skins exposed for sale in saddlers' shops. The Palestine species is identical with the English, but there is no reason to think that it could be sufficiently common in the Sinaitic Peninsula, if it exist there at all, to have provided an outer covering for the Tabernacle. Others, as Gesner and Harenberg (in *Musaeo Brem.* ii. 312), have thought that the jackal, known by the Greek name θώς and the Arabic *Shaghul*, is intended. Hasaeus (in *Dissert. Philolog. Sylloge*, diss. ix. § 17), Büsching (in his preface to the Epitome of Scheuchzer's *Physica Sacra*), Sebald Rau (*Comment. de iis quae ex Arab. in usum Tabernac. fuerunt repetita*, Traj. ad Rhen. 1753, ch. ii.), and Dr. Geddes (*Crit. Rem.* Ex. xxv. 5), are in favour of *tachash* representing some kind of seal or other marine mammalian. Gesenius understands some "kind of seal or badger, or other similar creature." Fried. Delitzsch (*Prolegg. eines neuen Hebr.-Aram. Wörterbuchs z. A. T.*, p. 77, &c.) identifies the *tachash* with the Assyr. *taḫšu*, the sheep with whose skin the Assyrians lined their boats (Herod. i. 194). Of modern writers, Col. H. Smith (*Encyc. Bib. Lit.*, art. *Badger*), with much plausibility, conjectures that *tachash* refers to some ruminant of the Aigocerine or Damaline groups, as these animals are known to the natives under the names of *pacasse*, *thacasse* (varieties, he says, of the word *tachash*), and have a deep grey, or slaty (*hysginus*) coloured skin. Dr. Robinson on this subject (*Bib. Res.* i. 171) writes, "The Superior of the convent at Sinai procured for me a pair of the sandals usually worn by the Bedouin of the peninsula, made of the thick skin of a fish which is caught in the Red Sea. The Arabs round the convent called it *Turs*, but could give no further account of it than that it is a large fish, and is eaten. It is a species of Halicore, named by Ehrenberg[b] (*Symb. Phys.* ii.) *Halicore hemprichei*. The skin is clumsy and coarse, and might answer very well for the external covering of a Tabernacle which was constructed at Sinai, but would seem hardly a fitting material for the ornamental sandals belonging to the costly attire of high-born dames in Palestine, described by the prophet Ezekiel."

It is difficult to understand why the ancient Versions have interpreted the word *tachash* to mean a colour (an explanation which has, as Gesenius remarks, no ground either in the etymology or in the cognate languages), unless it be that they understood by the word something capable of taking a blue tint, and that thus the *tachash* became synonymous with that tint. Whatever is the substance indicated by *tachash*, it is evident from Ex. xxxv. 23, that it was some material in frequent use among the Israelites during the Exodus, and the construction of the sentences where the name occurs (for the word *'ôrôth*, "skins," is always, with one exception, repeated with *tachash*), seems to imply that the skin of some animal, and not a colour, is denoted by it. The fact of the Arabs of Sinai giving the name *tucash*, تخس, identical with the Hebrew, to the various species of dugongs and seals of the Red Sea, and also using their hides as leather, while they distinguish the dolphin as *delfin*, seems to point pretty clearly to the dugong skin as the one intended in the Pentateuch (see Dillmann[2] on Exod. xxv. 5). But as *tachash* probably included the seal, there is no difficulty in supposing that Jewish ladies made their slippers of sealskin. This would obviate the objection suggested by Robinson.

The dugongs are a singular group of marine herbivorous mammalia, having affinities with the *Cetacea*, or whale tribe, with the seals, and in some respects with the *Pachydermata*, or thick-skinned quadrupeds. They are found off the shores of the Indian Ocean from Australia to the Cape; frequenting the mouths of rivers; and are easily caught, as they never leave the shallow water, where they graze on seaweed. They are ordinarily from twelve to twenty feet in length, but sometimes considerably exceed these measurements. The species from the coral beds of the Red Sea, described by Rüppell (*Mus. Senck.* i. 95–114) as *Halicore tabernaculi*



Halicore tabernaculi, with enlarged drawing of the head.

(Pl. vi.), is probably identical with Ehrenberg's species, *Halicore hemprichii*. Pliny (*H. N.* ii. 55) says that seal-skins were used as coverings for tents. [W. H.] [H. B. T.]

BAG is the rendering of several words in the Old and New Testaments. 1. חֲרִיטִים; θύλακος; *saccus*: the "bags" in which Naaman bound up the two talents of silver for Gehazi (2 K. v. 23), probably so called, according to Gesenius, from their long, cone-like shape. The word only occurs besides in Is. iii. 22 (A. V. "crisping-pins"), and there denotes the reticules [R. V "satchels"] carried by the Hebrew ladies. 2. כִּיס; μάρσιπος, μαρσύπιον; *sacculus*, *saccellus*: a bag for carrying weights (Deut. xxv. 13; Prov. xvi. 11;

[b] According to Ehrenberg, the Arabs on the coast call this animal *Naka* and *Lottum*. Arabian naturalists applied the term *enzan alma*, "man of the sea," to this creature.

Mic. vi. 11) also used as a purse (Prov. i. 14; Is. xlvi. 6). 8. כְּלִי; *κάδιον*; *pera:* translated "bag" in 1 Sam. xvii. 40, 49, is a word of most general meaning, and is generally rendered "vessel" or "instrument." In Gen. xlii. 25 it is the "sack" [R. V. "vessel"] in which Jacob's sons carried the corn which they brought from Egypt, and in 1 Sam. ix. 7, xxi. 5, it denotes a bag or wallet for carrying food (A. V. and R. V. "vessel"; cp. Jud. x. 5, xiii. 10, 15). The shepherd's "bag" which David had seems to have been worn by him as necessary to his calling, and was probably, from a comparison of Zech. xi. 15, 16 (A. V. and R. V. "instruments"), used for the purpose of carrying the lambs which were unable to walk or were lost, and contained materials for healing such as were sick and binding up those that were broken (cp. Ezek. xxxiv. 4, 16). 4. צְרוֹר; *ἔνδεσμος, δεσμός*; *sacculus:* properly a "bundle" (Gen. xlii. 35; 1 Sam. xxv. 29), appears to have been used by travellers for carrying money during a long journey (Prov. vii. 20; Hag. i. 6; cp. Luke xii. 33; Tob. ix. 5). In such "bundles" the priests bound up the money which was contributed for the restoration of the Temple under Jehoiada (2 K. xii. 10, Heb. *v.* 11; וַיִּצְרוּ, A. V. "put up in bags," so R. V in text; in marg. *bound up*, omitting "in bags"). The "bag" (*γλωσσόκομον*; *loculi*) which Judas carried was probably a small box or chest (John xii. 6, xiii. 29). The Greek word is the same as that used in the LXX. for "chest" in 2 Ch. xxiv. 8, 10, 11, and originally signified a box used by musicians for carrying the mouthpieces of their instruments (see Liddell and Scott *Lex.*[5] s. v.). [W. A. W.] [F.]

BA'GO (B. Βαναί, A. Βαγό; Vulg. omits), 1 Esd. viii. 40; head of one of the families who went up with Ezra from Babylon in the reign of king Artaxerxes; called Bagoi in 1 Esd. v. 14, and Bigvai in Ezra viii. 14. [W. A. W.] [F.]

BAGO'AS (Βαγώας; *Bugoas, Vagao*), Judith xii. 11. The name is said to be equivalent to eunuch in Persian (Plin. *H. N.* xiii. 4, 9. Cp. Burmann *ad* Ovid, *Am.* ii. 21), and may be related to Bigvai (see Ball in *Speaker's Comm.* on Judith xii. 11). [B. F. W.] [F.]

BA'GOI (A. Βαγοί, B. Βοσαί; *Zoroar*), 1 Esd. v. 14; called Bago in 1 Esd. viii. 40. His descendants went back to Jerusalem with Zerubbabel after the Captivity. [BIGVAI.] [F.]

BAHARU'MITE, THE. [BAHURIM.]

BAHU'RIM (בַּחוּרִים and בְּחוּרִים; A. Βαουρείμ [usually]; B. in 2 Sam. iii. 16, Βαρακεί; in xvi. 5, Βουρείμ; in xix. 16, Βαουρείμ; in xvii. 18, Βαορείμ; in 1 K. ii. 8, B. Βααθουρείμ, A. Βαθ-; Jos. Βαχουρῆς and Βαουρίν; *Bahurim*), a village, the slight notices remaining of which connect it almost exclusively with the flight of David. It was apparently on, or close to, the road leading from the Jordan valley up to Jerusalem. Shimei the son of Gera resided here (2 Sam. xvii. 18; 1 K. ii. 8); and from the village, when David, having left the "top of the mount" behind him, was making his way down the eastern slopes of Olivet into the Jordan valley below, Shimei issued forth, and running along (Joseph. *διατρέχων*) on the side or "rib" of the hill over against the king's party, flung his stones, dust, and foul abuse (xvi. 5), with a virulence which is to this day exhibited in the East towards fallen greatness however eminent it may previously have been. Here in the court of a house was the well in which Jonathan and Ahimaaz eluded their pursuers (xvii. 18). In his account of the occurrence, Josephus (*Ant.* vii. 9, § 7) distinctly states that Bahurim lay off the main road (*παῖδες ἐκτραπεντες τῆς ὁδοῦ*), which agrees well with the account of Shimei's behaviour. Here Phaltiel, the husband of Michal, bade farewell to his wife when on her return to king David at Hebron (2 Sam. iii. 16). Bahurim must have been very near the south boundary of Benjamin, but it is not mentioned in the lists in Joshua, nor is any explanation given of its being Benjamite, as from Shimei's residing there we may conclude it was. Dr. Barclay conjectures that the place lay where some ruins still exist close to a *Wâdy Rûâbeh*, which runs in a straight course for 3 miles from Olivet directly towards Jordan, offering the nearest though not the best route (Barclay, pp. 563–4). Tobler (*Topog.* ii. 763) identifies it with *Um Râsrâs*, more correctly *Kh. el Murussus*, on the right of the road from Jerusalem to Jericho; Antoninus (*Itin.* xvi.) describes it as being "not far from Jerusalem," and if he followed the Roman road from Jericho it must have been near *El 'Aisâwiyeh*.

AZMAVETH "the Barhumite" (הַבַּרְחֻמִי; B. Βαραιαμείτης, A. Βαρωμείτης; *de Beromi*; 2 Sam. xxiii. 31), or "the Baharumite" (הַבַּחֲרוּמִי; B$^{c.a}$ *ὁ* Βεερμείν, א* Βεερβείν, A. Βαρσαμί; *Bauramites;* 1 Ch. xi. 33), one of the heroes of David's guard, is the only native of Bahurim that we hear of except Shimei. [G.] [W.]

BA'JITH (הַבַּיִת, with the definite article, "the house;" R. V. "Bayith" [marg. *the temple*]), referring not to a place of this name, but to the "temple" of the false gods of Moab, perhaps distinct from the "high places" in the same sentence (Is. xv. 2, and cp. xvi. 12). This temple is not improbably the house of high places mentioned by Mesha (Beth-Bamoth) on the Moabite Stone (*Records of the Past*, N. S. ii. 203) and near Dibon (Sayce, *Fresh Light from the Ancient Monuments*, p. 81). LXX. *ἀνπεῖσθε ἐφ' ἑαυτούς*; *Ascendit domus.* [G.] [W.]

BAKBAK'KAR (בַּקְבַּקַּר); A. Βακβακάρ, B. Βακάρ; *Bacbacar*), a Levite, apparently a descendant of Asaph (1 Ch. ix. 15). [W. A. W.]

BAK'BUK (בַּקְבּוּק = *emptying* or *devastation* [see Ges. *Thes.* s. v.]: in Ezra, B. Βακκούκ, A. Βακβούκ; in Neh., B. Βακβού, A. -ούκ, א. Νεκούβ: *Bacbuc*). "Children of Bakbuk" were among the Nethinim who returned from captivity with Zerubbabel (Ezra ii. 51, Neh. vii. 53). In 1 Esd. v. 31 the corresponding name is ACUB. [W. A. W.] [F.]

BAKBUKI'AH (בַּקְבֻקְיָה, MV.[11] = *devastation from Jah*, B א*A. omit this name; *Becbecia*). 1. A Levite in time of Nehemiah (Neh. xi. 17; א$^{c.a\ mg\ sup}$ Βακβακιάς; xii. 9, א$^{c.a\ mg}$ Βακβαιάς). 2. A Levite porter, apparently a different person from the preceding (Neh. xii. 25; א$^{c.a\ mg\ sup}$ Βακβακιάς). [W. A. W.] [F.]

BAKING. [BREAD.]

BA'LAAM (בִּלְעָם, *i.e.* Bil'am; Βαλαάμ; Joseph. Βάλαμος; *Balaam*), "the soothsayer" (הַקֹּסֵם, Josh. xiii. 22), a man endowed with the gift of prophecy, introduced in Numbers (xxii. 1) as the son of Beor. He belonged to the Midianites, and perhaps as the prophet of his people possessed the same kind of authority that Moses did among the Israelites. At any rate he is mentioned in conjunction with the five kings of Midian, apparently as a person of the same rank (Num. xxxi. 8; cp. xxxi. 16). He seems to have lived at Pethor [the Pi-it-ru of the Monolith Inscription of Salmanaser II., B.C. 860–24; cp. Craig in *Hebraica*, iii. p. 213; Peiser in Schrader's *Keilinschriftliche Bibliothek*, i. p. 163], which is said in Deut. xxiii. 4 to have been a city of Mesopotamia (אֲרַם נַהֲרַיִם). He himself speaks of being "brought from Aram out of the mountains of the East" (Num. xxiii. 7). The reading, therefore, בְּנֵי עַמּוֹן, instead of בְּנֵי עַמּוֹ (Num. xxii. 5; cp. *Speaker's Comm.* and Dillmann[2] in loco), found in some MSS., and adopted by the Samaritan, Syriac, and Vulgate Versions, need not be preferred, as the Ammonites do not appear to have ever extended so far as the Euphrates, which is probably the river alluded to in this place. The name Balaam is of uncertain derivation; according to Stade (*Lehrb. d. Heb. Gr.* § 293), from בָּלַע and the ending ām. The affinity of the name with that of Bela, the son of Beor, mentioned Gen. xxxvi. 32 as the first king of Edom, has often been noticed (cp. Delitzsch [1887] and Dillmann[5] on Gen. *l. c.*). Balaam is called in 2 Pet. ii. 15 "the son of Bosor" [R. V. "Beor"]: this Lightfoot (*Works*, vii. 80) thought a Chaldaism for Beor; but it is far more probably a dialectic pronunciation of Beor (see *Speaker's Comm.* l. c.).

Balaam is one of those instances which meet us in Scripture of persons dwelling among heathens but possessing a certain knowledge of the one true God. He was endowed with a greater than ordinary knowledge of God: he was possessed of high gifts of intellect and genius: he had the intuition of truth, and could see into the life of things,—in short, he was a poet and a prophet. Moreover, he confessed that all these superior advantages were not his own but derived from God, and were His gift. And thus, doubtless, he had won for himself among his contemporaries far and wide a high reputation for wisdom and sanctity. It was believed that he whom he blessed was blessed, and he whom he cursed was cursed. Elated, however, by his fame and his spiritual elevation, he had begun to conceive that these gifts *were* his own, and that they might be used to the furtherance of his own ends. He could make merchandise of them, and might acquire riches and honour by means of them. A custom existed among many nations of antiquity of devoting enemies to destruction before entering upon a war with them. At this time the Israelites were marching forwards to the occupation of Palestine: they were now encamped in the plains of Moab, on the east of Jordan by Jericho. Balak, the king of Moab, having witnessed the discomfiture of his neighbours, the Amorites, by this people, entered into a league with the Midianites against them, and despatched messengers to Balaam with the rewards of *divination* in their hands. We see from this, therefore, that Balaam was in the habit of using his wisdom as a trade, and of mingling with it devices of his own by which he imposed upon others and perhaps partially deceived himself. When the elders of Moab and Midian told him their message, he seems to have had some misgivings as to the lawfulness of their request, for he invited them to tarry the night with him that he might learn how the Lord would regard it. These misgivings were confirmed by God's express prohibition of his journey. Balaam reported the answer, and the messengers of Balak returned. The king of Moab, however, not deterred by this failure, sent again more and more honourable princes to Balaam, with the promise that he should be promoted to very great honour upon complying with his request. The prophet again refused, but notwithstanding invited the embassy to tarry the night with him that he might know what the Lord would say unto him further. God gave him the permission he desired, subject to certain conditions (xxii. 20); while he was warned at the same time that his actions must be overruled by the Divine Will. Balaam, ignoring the conditions, proceeded on his journey with the messengers of Balak. But God's anger was kindled at this manifestation of determined self-will, and the Angel of the Lord stood in the way for an adversary against him. The words of the Psalmist, "Be ye not like to horse and mule which have no understanding, whose mouths must be held with bit and bridle, lest they fall upon thee," had they been familiar to Balaam, would have come home to him with most tremendous force; for never have they received a more forcible illustration than the comparison of Balaam's conduct to his Maker with his treatment of his ass affords us. The wisdom with which the tractable brute was allowed to "speak with man's voice," and "forbid" the intractable "madness of the prophet," is palpable and conspicuous. He was taught, moreover, that even she had a spiritual perception to which he, though a prophet, was a stranger; and when his eyes were opened to behold the Angel of the Lord, "he bowed down his head and fell flat on his face." It is hardly necessary to suppose, as some do, among whom are Hengstenberg and Leibnitz (see also the comments in the Amer. ed. of this work), that the event here referred to happened only in a trance or vision, though such an opinion might seem to be supported by the fact that the translators of the A. V. render the word נֹפֵל in xxiv. 4, 16, "falling *into a trance*," whereas no other idea than that of simply falling down [R. V.] is conveyed by it. St. Peter refers to it as a real historical event: "the dumb ass, speaking with man's voice, forbad the madness of the prophet" (2 Pet. ii. 16). We are not told *how* these things happened, but that they *did* happen. [For other opinions upon this episode see *Speaker's Comm.* add. note on Num. xxii. 5; Riehm, *HWB.* s. n., Herzog, *RE.*[2] s. n.]

It pleased God thus to interfere on behalf of His elect people, and to bring forth from the genius of a self-willed prophet, who thought

that his talents were his own, four strains of poetry bearing upon the destiny of the Jewish nation and the Church at large, which are not surpassed throughout the Mosaic records. It is evident that Balaam, although acquainted with God, was desirous of throwing an air of mystery round his wisdom, from the instructions he gave Balak to offer a bullock and a ram on the seven altars he everywhere prepared for him; but he seems to have thought also that these sacrifices would be of some avail to change the mind of the Almighty, because he pleads the merit of them (xxiii. 4), and after experiencing their impotency to effect such an object, "he went no more," we are told, "to seek for enchantments" (xxiv. 1). His religion, therefore, was probably such as would be the natural result of a general acquaintance with God not confirmed by any covenant. He knew Him as the fountain of wisdom: how to worship Him he could merely guess from the customs in vogue at the time. Sacrifices had been used by the patriarchs; to what extent they were efficient could only be surmised. There is an allusion to Balaam in the Prophet Micah (vi. 5), where Bishop Butler thinks that a conversation is preserved which occurred between him and the king of Moab upon this occasion. But such an opinion is hardly tenable, if we bear in mind that Balak is nowhere represented as consulting Balaam upon the acceptable mode of worshipping God, and that the directions found in Micah are of quite an opposite character to those which were given by the son of Beor upon the high places of Baal. The Prophet is recounting "the righteousness of the Lord" in delivering His people out of the hand of Moab under Balak, and at the mention of his name the history of Balaam comes back upon his mind, and he is led to make those noble reflections upon it which occur in the following verses. "The doctrine of Balaam" is spoken of in Rev. ii. 14, where an allusion has been supposed to Νικόλαος, the founder of the sect of the Nicolaitans, mentioned in *v.* 15, these two names being probably similar in signification (see *Speaker's Comm.* in loco). Though the utterance of Balaam was overruled so that he could not curse the children of Israel, he nevertheless suggested to the Moabites the expedient of seducing them to commit fornication. The effect of this is recorded in Num. xxv. A battle was afterwards fought against the Midianites, in which Balaam sided with them and was slain by the sword of the people whom he had endeavoured to curse (Num. xxxi. 8).

The literature (foreign) on this history is somewhat extensive (cp. Dillmann[2] on Num. xxii. p. 140; Herzog, *RE.*[2] s. n.). Its historical credibility, denied by (*e.g.*) Meyer and Stade, is amply attested by (*e.g.*) Volck (in Herzog) and Edersheim, *Bible Hist.* ii. pp. 11–32. Cp. also Bishop Butler's *Sermons*, serm. vii.; Ewald, *Gesch. des Volkes Israel*, ii. 277. The interesting and curious Rabbinic opinions concerning Balaam are collected in Hamburger's *RE.*[2] s. n. [S. L.]

BA'LAC (ὁ Βαλάκ; *Balac*), Rev. ii. 14. [BALAK.]

BAL'ADAN. [MERODACH-BALADAN.]

BA'LAH (בָּלָה; B. Βωλά, A. Βελβωλά; *Bala*), Josh. xix. 3. [BAAL, *Geogr.* No. 2, *b*.]

BA'LAK (בָּלָק; Βαλάκ; *Balac*), son of Zippor, king of the Moabites, at the time when the children of Israel were bringing their journeyings in the wilderness to a close. According to Gesenius (*Thes.*) the name signifies *inanis vacuus* (cp. Is. xxiv. 1); in MV.[11] the meaning *emptier*, desolator, is adopted. Balak, himself probably of Midianitish origin (Targ. See *Speaker's Comm.* on Num. xxii. 2), entered into a league with Midian and hired Balaam to curse the Israelites; but his designs were frustrated in the manner recorded in Num. xxii.–xxiv. He is mentioned again in Josh. xxv. 9; Judg. xi. 26; Mic. vi. 5; and in Rev. ii. 14 as the pupil and instrument of Balaam, the type of those who would lead Christians to a neglect of the decrees of the Apostles at Jerusalem (Acts xv. 22). [BALAAM.] [S. L.]

BAL'AMO. [BAAL, *Geogr.* No. 6.]

BALANCE. Two Hebrew words are thus translated in the A. V. and R. V.

1. מֹאזְנַיִם, *môzĕnaim* (LXX. ζυγόν, Vulg. *statera*), the dual form of which points to the double scales, like Lat. *bilanx*. The balance in this form was known at a very early period. It is found on the Egyptian monuments as early as the time of Joseph, and we find allusions to its use in the story of the purchase of the cave of Machpelah (Gen. xxiii. 16) by Abraham. Before coinage was introduced it was of necessity employed in all transactions in which the valuable metals were the mediums of exchange (Gen. xliii. 21; Ex. xxii. 17; 1 K. xx. 39; Esth. iii. 9; Is. xlvi. 6; Jer. xxxii. 10, &c.). The weights which were used were at first probably stones, and from this the word "stone" continued to denote any weight whatever, though its material was in later times lead (Lev. xix. 36; Deut. xxv. 13, 15; Prov. xi. 1, xx. 10, 23; Zech. v. 8). These weights were carried in a bag (Deut. xxv. 13; Prov. xvi. 11) suspended from the girdle (Chardin, *Voy.* iii. 422), and were very early made the vehicles of fraud. The habit of carrying two sets of weights is denounced in Deut. xxv. 13 and Prov. xx. 10, and the necessity of observing strict honesty in the matter is insisted upon in several precepts of the Law (Lev. xix. 36; Deut. xxv. 13). But the custom lived on, and remained in full force to the days of Micah (vi. 11), and even to those of Zechariah, who appears (ch. v.) to pronounce a judgment against fraud of a similar kind. The earliest weight to which reference is made is the קְשִׂיטָה, *kĕsîṭâh* (Gen. xxxiii. 19; Josh. xxiv. 32; Job xlii. 11), which in the margin of the A. V. is in two passages rendered "lambs," while in the text of both A. V. and R. V. it is "piece of money (or 'silver')." It may have derived its name from being in the shape of a lamb. We know that weights in the form of bulls, lions, and antelopes were in use among the ancient Egyptians and Assyrians. [MONEY.] By means of the balance the Hebrews appear to have been able to weigh with considerable delicacy; and for this purpose they had weights of extreme minuteness, which are called metaphorically "the small dust of the balance" (Is. xl. 15). The "little grain" (ῥοπή) of the balance in Wisd. xi. 22 is the small weight which causes the scale to turn. In

this passage, as in 2 Macc. ix. 8, the Greek word πλάστιγξ, rendered "balance," was originally applied to the scale-pan alone.

2. קָנֶה, *káneh* (ζυγόν: *statera*), rendered "balance" by A. V. and R. V. in Is. xlvi. 6, is the word generally used for a measuring-rod, like the Greek κανών, and, like it too, denotes the tongue or beam of a balance. פֶּלֶס, *peles*, rendered by A. V. "weight," by R. V. "balance" (Prov. xvi. 11, LXX. ῥοπή) and "scales" (Is. xl. 12, A. V. and R. V.; LXX. σταθμός), is said by Kimchi (on Is. xxvi. 7) to be properly the *beam* of the balance. In his Lexicon he says it is the part in which the tongue moves, and which the weigher holds in his hand. Gesenius (*Thes.* s. v.) supposed it was a steelyard, but there is no evidence that this instrument was known to the Hebrews. Of the material of which the balance was made we have no information.

Sir G. Wilkinson describes the Egyptian balance as follows (see the illustration under MONEY):—"The beam passed through a ring suspended from a horizontal rod, immediately above and parallel to it; and when equally balanced, the ring, which was large enough to allow the beam to play freely, showed when the scales were equally poised, and had the additional effect of preventing the beam tilting when the goods were taken out of one, and the weights suffered to remain in the other. To the lower part of this ring a small plummet was fixed, and this being touched by the hand, and found to hang freely, indicated, without the necessity of looking at the beam, that the weight was just" (*Anc. Egypt.* ii. pp. 148, 152 [1878]).

The expression in Dan. v. 27, "thou art weighed in the balances, and art found wanting," has been supposed to be illustrated by the modern custom of weighing the Great Mogul on his birthday in the presence of his chief grandees. The ceremony is described in a passage from Sir Thomas Roe's *Voyage in India*, quoted in Taylor's Calmet, *Frag.* 186: "The scales in which he was thus weighed were plated with gold, and the beam on which they hung by great chains was made likewise of that most precious metal. The king, sitting in one of them, was weighed first against silver coin, which immediately after was distributed among the poor; then was he weighed against gold; after that against jewels (as they say); but I observed (being there present with my lord ambassador) that he was weighed against three several things, laid in silken bags, on the contrary scale. . . . By his weight (of which his physicians yearly keep an exact account) they presume to guess of the present state of his body: of which they speak flatteringly, however they think it to be." It appears, however, from a consideration of the other metaphorical expressions in the same passage of Daniel, that the weighing in balances is simply a figure, and may or may not have reference to such a custom as that above described. See other examples of the same figure of speech among Orientals in Roberts' *Oriental Illustrations*, p. 502. [W. A. W.]

BALA'SAMUS (T.^r Βαλσαμος, B. om.; *Balsamus*), in 1 Esd. ix. 43 The corresponding name in the list in Neh. viii. 4 is MAASEIAH. [F.]

BALDNESS (קָרְחָה; φαλάκρωσις, φαλάκρωμα; and in Lev. xiii. 43, φαλάντωμα). There are two kinds of baldness, viz. artificial and natural. The latter seems to have been uncommon, since it exposed people to public derision, and is perpetually alluded to as a mark of squalor and misery (2 K. ii. 23; cp. Is. iii. 24, R. V. "instead of well-set hair, baldness; . . . branding instead of beauty." Is. xv. 2; Jer. xlvii. 5; Ezek. vii. 18, &c.). For this reason it seems to have been included under the λειχὴν and ψωρὰ (Lev. xxi. 20, LXX.) which were disqualifications for priesthood. A man bald on the back of the head is called קָרַח, φαλακρός, LXX. Lev. xiii. 40; and if forehead-bald, the word used to describe him is גִּבַּח, ἀναφαλαντίας, LXX. Lev. xiii. 41 (*recalvaster*. See Gesen. *s. vv.*). In Lev. xiii. 29 sq., very careful directions are given to distinguish Bohak, "a plague upon the head and beard" (which probably is the Mentagra of Pliny, and a sort of leprosy), from mere natural baldness which is pronounced to be clean, *v.* 40 (Jahn, *Arch. Bibl.* § 189). But this shows that even natural baldness subjected men to an unpleasant suspicion. It was a defect with which the Israelites were by no means familiar, since Αἰγυπτίους ἂν τις ἐλαχίστους ἴδοιτο φαλακροὺς πάντων ἀνθρώπων, says Herodotus (iii. 12); an immunity which he attributes to their constant shaving. They adopted this practice for purposes of cleanliness, and generally wore wigs, some of which have been found in the ruins of Thebes. Contrary to the general practice of the East, they only let the hair grow as a sign of mourning (Herod. ii. 36), and shaved themselves on all joyous occasions: hence in Gen. xli. 44 we have an undesigned coincidence. The same custom obtains in China, and among the modern Egyptians, who shave off all the hair except the shoosheh, a tuft on the forehead and crown of the head (Wilkinson, *Anc. Egypt.* ii. 328 [1878]; Lane, *Mod. Egypt.* i. ch. 1).

Baldness was despised both among Greeks and Romans. In *Il.* ii. 219, it is one of the defects of Thersites; Aristophanes (who was probably bald himself, *Pax* 767, *Eq.* 550) takes pride in not joining in the ridicule against it (οὐδ' ἔσκωψεν τοὺς φαλακρούς, *Nub.* 540). Caesar was said "calvitii deformitatem iniquissime ferre," and he generally endeavoured to conceal it (Suet. *Caes.* 45; cp. *Dom.* 18).

Artificial baldness marked the conclusion of a Nazarite's vow (Acts xviii. 18; Num. vi. 9), and was a sign of mourning ("quasi calvitio luctus levaretur," Cic. *Tusc. Disp.* iii. 26). It is often alluded to in Scripture, as in Mic. i. 16, Amos viii. 10, Jer xlvii. 5, &c.; and in Deut. xiv. 1, the reason for its being forbidden to the Israelites is their being "a holy and peculiar people" (cp. Lev. xix. 27, and Jer. ix. 26, marg.). The practices alluded to in the latter passages were adopted by heathen nations (*e. g.* the Arabs, &c.) in honour of various gods. Hence the expression τροχοκουράδες. The Abantes (ὄπιθες κομοῶντες), and other half-civilised tribes, shaved off the forelocks, to avoid the danger of being seized by them in battle. See also Herod. i. 82, ii. 36. [F. W. F.]

BALM (צְרִי, *tzŏrî*; צֳרִי, *tzĕrî*; ῥητίνη;

* עָרָה, in Arab. "to flow, as blood from a wound."

resina; R. V. margin, "mastick") occurs in Gen. xxxvii. 25, as one of the substances which the Ishmaelites were bringing from Gilead to take into Egypt; in Gen. xliii. 11, as one of the presents which Jacob sent to Joseph; in Jer. viii. 22, xlvi. 11, li. 8, where it appears that the balm of Gilead had a medicinal value; in Ezek. xxvii. 17 (A. V. margin, "rosin"), as an article of commerce imported by Judah into Tyre.

The A. V. and R. V. have rendered by the word "spices" the Hebrew בָּשָׂם, *bâsâm*, from which our English balsam or balm is derived, identical with the Arabic بشام (*basham*), or بلسان (*balasan*), a tropical gum or resin, which can never have been indigenous in Gilead.

Many attempts have been made to identify the *tzori* by different writers, not one of which, however, can be considered conclusive. The Syriac Version in Jer. viii. 22, and the Samaritan in Gen. xxxvii. 25, suppose *cera*, "wax," to be meant; others, as the Arabic Version in the passages cited in Genesis, conjecture *theriaca*, a medicinal compound of great supposed virtue in serpent bites. Of the same opinion is Castellus (*Lex. Hept.* s. v. צרי). Luther and the Swedish Version have "salve," "ointment," in the passages in Jeremiah; but in Ezek. xxvii. 17, they read "mastick," where, as also in Jer. viii. 22, Coverdale's Bible (A.D. 1535) reads "tryacle." The Jewish Rabbis, Junius, Tremellius, Diodati, &c., have "balm" or "balsam," as the A. V.

Commentators, often without any knowledge either of botany or of the geographical distribution of plants, have made many suggestions as to the identification of *tzori*. But three claimants only seem to demand consideration. (1.) *Pistachia lentiscus*, or Mastick, advocated by Celsius (*Hierob.* ii. 180). (2.) *Balanites aegyptiaca*, the Zukkum tree, suggested by Rosenmüller (*Bibl. Bot.* p. 169) and Robinson (*Bibl. Res.* ii. 291). (3.) *Balsamodendron gileadense*, known as the true Balsam of Gilead tree, a near ally of *Balsamodendron myrrha*, the myrrh tree, and of *B. opobalsamum*, referred to by Strabo (xvi. 778, 8vo ed.), Diodorus Siculus (ii. 132), and Josephus (*Ant.* viii. 6, § 7), is suggested also by Rosenmüller (*Schol. in Gen.* xxxvii. 25). All three yield products much valued in the East; gum mastick is obtained from the Lentisk bush: a valuable healing unguent is expressed from the berry of the Zukkum; and a highly-prized resinous exudation from the Balsamodendron. It seems difficult to limit the name of *tzori* to any one of these, to the exclusion of the others, and probably the term was used for any resin, gum, or unguent which had a medicinal value.

The *Pistachia lentiscus*, or Mastick, has been advocated by Celsius, partly because its Arabic name, ضرو, *ḍeri*, resembles the Hebrew word. The Arabic writers attribute great medicinal virtues to its resin (Dioscor. i. 51, 52, 90, 91; Plin. xxiv. 7; Avicenna, Arab. edit. pp. 204 and 207, with many others given by Celsius). It is an extremely common shrub in all the hill-country and plains of Palestine, except the Jordan valley, and is especially abundant in the woods of Gilead. It is found also in all the Mediterranean countries and the Greek islands. It belongs to the Terebinth family, rarely reaches the height of twenty feet, has winged smooth leaves of a pale colour, and inconspicuous flowers. It yields a balsamic sap, which is obtained by making incisions in the stems from which the sap flows, the gum mastic of commerce. It burns green, with a delicious fragrance, and is known by the Algerian soldiers as "*brûle-capote.*"

The *Balanites aegyptiaca*, the Zukkum of the Arabs, the product of which is now sold as Balm of Gilead, is a native of Egypt and Nubia, but also indigenous in the whole of the Jordan valley and round the Dead Sea, though never beyond the depression of that tropical islet. It is a truly desert-loving plant, and found in hot plains as far as India. It belongs to the family *Simarubaceae*, and is a spiny, naked-looking small tree, with leaves growing in pairs, about the size and shape of those of the box-tree, very pale green, and with tufts of minute white blossoms. The ripe fruit is of the size and shape of a large filbert or olive, of a greyish green colour, turning yellow when it has fallen. The Arabs pound and boil the fruit, skimming off the oil, which is sold in large quantities to pilgrims and others, and is used both internally and for external application as a remedy. I have found it excellent for allaying the irritation of scratches and wounds, and for relieving any tendency to inflammation; but it has no perfume. See Maundrell, *Journey*, p. 86.

Balsamodendron gileadense is so named somewhat unfortunately, as it is not found at present anywhere in Palestine, and could never have thriven in Gilead.

Josephus (*Ant.* viii. 6, § 7) mentions a current opinion among the Jews, that the queen of Sheba first introduced the balsam into Judaea, having made Solomon a present of a root. If this be so—but perhaps it was merely a tradition—the *tzori* cannot be restricted to represent the produce of this tree, as the word occurs in Genesis, and the plant was known to the patriarchs as growing in the hilly districts of Gilead.

Hasselquist has given a description of the true balsam tree of Mecca. He says that the exudation from the plant "is of a yellow colour, and pellucid. It has a most fragrant smell, which is resinous, balsamic, and very agreeable. It is very tenacious or glutinous, sticking to the fingers, and may be drawn into long threads. I have seen it at a Turkish surgeon's, who had it immediately from Mecca, described it, and was informed of its virtues; which are, first, that it is the best stomachic they know, if taken to three grains, to strengthen a weak stomach; secondly, that it is a most excellent and capital remedy for curing wounds, for if a few drops are applied to the fresh wound, it cures it in a very short time" (*Travels*, p. 293).

The *Balsamodendron gileadense* must not be confounded with *Balsamodendron myrrha*. Both belong to the order *Amyridaceae*, of which about fifty species are known in tropical Asia, Africa, and America. It certainly was not indigenous in Palestine, and never could have grown in any part of the country, except in

the seething tropical valley of the Dead Sea. The tradition alluded to above as given by Josephus, of its introduction by Solomon, is probably correct; at all events it was cultivated there in the later Jewish period, and was considered peculiar to the plains of Jericho. Hence Cleopatra obtained plants for her gardens at Heliopolis, over which an Imperial guard was placed. So famous and precious a product was it considered, that it was twice carried in a triumphal procession through the streets of Rome—once by Pompey, after the first conquest of Judaea, B.C. 65, and again by Vespasian, when Titus exhibited the Balsam tree of Jericho along with the spoils of the Temple of Jerusalem after its final destruction. From that time we can find no trace of the precious tree, though the conquerors placed a guard over the plantations for a time. Probably they perished through subsequent neglect; for, though the Crusaders carefully cultivated the sugar-cane and the date-palm in these plains, and the Knights Templars derived a large revenue from them, we find no mention of the balsam. We carefully searched all the plain of Shittim, and the recesses of Engedi, Callirrhoë, and other nooks about the Dead Sea, in the hope that some survivors might still linger, but in vain. It is only within the last few years that the indefatigable researches of Sir G. Birdwood have brought to light the tree and its true habitat. It is a native of Yemen, is still cultivated about Mecca, and grows abundantly in the mountains of Yemen. It seems to have escaped the observation of Forskål. It is described as a tall, stiff-branched tree, evergreen, with scanty foliage of small oblong leaves, like those of the myrtle, and small white blossoms resembling the tufts of the acacia, with a reddish-black pulpy nut, containing a fragrant yellow seed. The balsam is obtained from the bark by incision, from the green nut, and also (of inferior quality) by bruising and boiling the young shoots.

The conclusion at which we are disposed to arrive is, that while in Genesis [see Delitzsch (1887) and Dillmann[3] on Gen. xxxvii. 25] the gum mastick or the Zukkum unguent is spoken of, the precious balm of Gilead of later times was undoubtedly the product of *Balsamodendron gileadense*. [SPICES; MASTICK.] Compare Winer, *Biblisch. Realwört.* s. v., for numerous references from ancient and modern writers on the subject of the balm or balsam tree; Hooker's *Kew Garden Misc.* i. 257; Riehm, *HWB.* s. n. "Mastik"; Löw, *Aram. Pflzn.* p. 58. [H. B. T.]

BALNU'US (B. Βαλνοῦς, A. Βαλνοῦος; *Bonnus*), 1 Esd. ix. 31. [BINNUI.] One of those who had taken "strange wives," and put them away. [W. A. W.]

BALTHA'SAR, Bar. i. 11, 12. [BELSHAZZAR.]

BA'MAH (בָּמָה, *a high place*). Though frequently occurring in the Bible to denote the elevated spots or erections on which the idolatrous rites were conducted [HIGH-PLACE], this word appears in its Hebrew form only in one passage (Ezek. xx. 29), where the word is played upon, and a punning etymology appears to be suggested: "What is [R. V. "meaneth"] the high-place (הַבָּמָה) whereunto ye hie (הַבָּאִים)? and the name of it is called Bamah (בָּמָה) unto this day" (LXX. τί ἐστιν ἀβαμὰ . . . καὶ ἐπεκάλεσαν τὸ ὄνομα αὐτοῦ Ἀβαμά). Ewald (*Propheten*, p. 286) pronounces this verse to be an extract from an older prophet than Ezekiel: Cornill (*Ezechiel* in loco) agrees with him; but he stipulates, on very questionable grounds, that, if the verse be Ezekelian, הבאים must be taken from a root הבא in order to give point to the paronomasia. To Orelli (Strack u. Zöckler's *Kgf. Komm.* in loco) the ה of הבאים is the article introduced to preserve the alliteration with הבמה. [G.] [F.]

BA'MOTH (בָּמוֹת; Βαμώθ; *Bamoth*).[a] A halting-place of the Israelites in the Amorite country on their march to Canaan (Num. xxi. 19). It was between Nahaliel and Pisgah, north of the Arnon. Eusebius (*OS.*[2] p. 246, 33) calls it "Bamoth, a city of the Amorite beyond Jordan on the Arnon, which the children of Israel took." Jerome (*OS.*[2] p. 136, 22) adds that it was in the territory of the Reubenites. The accuracy of the description "on the Arnon" is, however, questioned (Dillmann[3] in loco). Knobel identified it with "the high places of Baal" (Num. xxii. 41), or Bamoth Baal, and placed it on the modern Jebel Attârûs, the site being marked by stone heaps which were observed both by Seetzen (ii. 342) and Burckhardt (*Syria*, 370). [W.] [F.]

BA'MOTH-BAAL (בָּמוֹת־בַּעַל, *high places of Baal*; B. Βαμὼν Βαάλ; A. Βαμὼθ Βαάλ; *Bamothbaal*), a hill-sanctuary of Baal in the country of Moab (Josh. xiii. 17), which is probably mentioned in the Itinerary in Num. xxi. 19, under the shorter form of Bamoth, and again in the enumeration of the towns of Moab in Is. xv. 2. In this last passage Bamoth is translated in the A. V. and R. V. "the high places," as it is also in Num. xxii. 41, where the same locality is doubtless referred to.[a] It is possibly the Beth Bamoth rebuilt by king Mesha (*Recovery of Jerusalem*, p. 507); and is identified by Conder (*Heth and Moab*, p. 141) with the ridge south of the stream of *Wâdy Jedeid*, now called *el-Maslûbiyeh*. Near to Bamoth was another place bearing the name of the same divinity,—BAAL-MEON, or BETH-BAAL-MEON. [G.] [W.]

BAN (B. Βαενάν, A. Βάν; *Thubal*), the name (1 Esd. v. 37, a very corrupt passage; see *Speaker's Comm.* in loco) of the head of a family which could not show their descent from Israel. Its place is taken by the name TOBIAH in the parallel lists in Ezra and Nehemiah. [W. A. W.] [F]

BANAI'AS (Βαναίας; *Baneas*), 1 Esd. ix. 35. [BENAIAH.] One of those who put away his "strange" wife.

BA'NI (בָּנִי), the name of several men. **1.** A Gadite, one of David's mighty men (2 Sam.

[a] It will be observed that the A. V. has, in Num. xxiii. 3, rendered by "high place" a totally different word (שְׁפִי), which is devoid of the special meaning of "Bamoth." The R. V. reads here "a bare height."

xxiii. 36; B. υἱὸς Γαλααδδεί, A. υἱὸς Γαδί; *Bonni de Gadi*). **2.** A Levite of the line of Merari, and forefather to Ethan (1 Ch. vi. 46; B. Βανεί, A. Βααvί; *Boni*). **3.** A man of Judah of the line of Pharez (1 Ch. ix. 4; LXX. om.; *Bouni*). **4.** "Children of Bani" returned from Captivity with Zerubbabel (Ezra ii. 10; B. Βανού, A.-νί; *Bani:* Neh. x. 14; BN. Βανιάς (?), A. Βανί; *Bonni* (*v.* 15): Ezra x. 29 [N. Βανεί, B. Βανουεί, A. -εἰμ; *Bonni*], *v.* 34 [A. Βανεί, B. Ἀνεί; *Bani*]: 1 Esd. v. 12; BA. Βανεί; *Banica*). See Smend, *Die Listen d. BB. Esra u. Nehemia*, p. 14; BINNUI, MANI, and MAANI. **5.** An Israelite "of the sons of Bani" (Ezra x. 38; Βανουί [2 Esd.], *Bani*). [BANNUS.] **6.** A Levite (Neh. iii. 17; B. Βανεί, N. Βααvεί; *Benni*). **7.** A Levite (Neh. viii. 7 [B. Βαναιά, NA. -άς; *Bani*], ix. 4, *Bani*; LXX. transl. οἱ υἱοὶ Καδμιήλ: x. 13; A. Βανουαίαι, B. Βενιαμείν; *Bani*). [ANUS.] **8.** Another Levite (Neh. ix. 4; *Bani*; $\aleph^{c.a}$A. transl. υἱοὶ Χανενί). **9.** Another Levite, of the sons of Asaph (Neh. xi. 22; B. Βανεί, $\aleph^{c.a}$ Βονεί, A. Βανί; *Bani*). [W. A. W.] [F.]

BA'NID (B. Βανίας, A. Βανί; *Bania*), 1 Esd. viii. 36. One of those who went up with Ezra to Jerusalem. This represents a name which has apparently escaped from the present Hebrew text (see *Speaker's Comm.* in loco, and cp. Ezra viii. 10). [W. A. W.] [F.]

BANNAI'A (B. Σαβανναιοῦς, A. Βανναιοῦς; *Bannus*), 1 Esd. ix. 33. One of those who had taken a "strange" wife. The corresponding name in Ezra x. 33 is ZABAD. [W. A. W.]

BANNER. [ENSIGN.]

BAN'NUS (Βαννοῦς; *Baneas*), 1 Esd. ix. 34. [BANI, or BINNUI.] One of those who put away his "strange" wife. [W. A. W.]

BANQUETS. These, among the Hebrews, were not only a means of social enjoyment, but were a part of the observance of religious festivity; cp. Judg. vi. 13, "Wine which cheereth God and man." The oldest record of "a great feast" is that made by Abraham when Isaac was weaned, the words meaning "a great drinking" (Gen. xxi. 8, מִשְׁתֶּה גָּדוֹל); and nearly parallel in time (as some think) stand the festivities of Job's children, perhaps recurring at stated intervals, in which "drinking wine" is also prominent, and hence Job's dread on their account of excess leading to impiety. Yet drunkenness, until the later days of the monarchy, when the Prophets commonly rebuke it, is not in the O. T. a popular vice, and examples of vinous excess, excepting such unique cases as those of Noah and Lot, scarcely occur. Nabal, Elah, and Benhadad (the latter an extern instance) are perhaps the only ones (Job i. 4, 5, 13, 18; 1 Sam. xxv. 36; 1 K. xvi. 9, xx. 12). Such expression as "his heart was merry," said of Boaz at his harvest festival, need imply no such excess (Ruth iii. 7), and so of Ammon (2 Sam. xiii. 28). Under the Mosaic Law, at the three solemn Festivals, when all the males appeared before the Lord, the family also had its domestic feast, as appears from the place and the share in it to which "the widow, the fatherless, and the stranger" were legally entitled (Deut. xvi. 11). Probably, when the distance allowed, and no inconvenience hindered, both males and females went up (*e.g.* to Shiloh, 1 Sam. i. 9) together, to hold the festival. These domestic festivities were doubtless to a great extent retained, after laxity had set in as regards the special observance by the male sex (Neh. viii. 17). Sacrifices, both ordinary and extraordinary, as amongst heathen nations (Ex. xxxiv. 15; Judg. xvi. 23) included a banquet, and Eli's sons made this latter the prominent part. The two, thus united, marked strongly both domestic and civil life. It may even be said that some sacrificial recognition, if only in pouring the blood solemnly forth as before God, always attended the slaughter of an animal for food. The first-lings of cattle were to be sacrificed and eaten at the sanctuary if not too far from the residence (1 Sam. ix. 13; 2 Sam. vi. 19; Ex. xxii. 29, 30; Lev. xix. 5, 6; Deut. xii. 17, 20, 21, xv. 19–22). From the sacrificial banquet probably sprang the ἀγαπή; as the Lord's Supper, with which it for a while coalesced, was derived from the Passover. Besides religious celebrations, such events as the weaning the son and heir, a marriage, the separation or reunion of friends, and sheep-shearing were customarily attended by a banquet or revel (Gen. xxi. 8, xxix. 22, xxxi. 27, 54; 1 Sam. xxv. 2, 36; 2 Sam. xiii. 23). At a funeral, also, refreshment was taken in common by the mourners, and this might tend to become a scene of indulgence, but ordinarily abstemiousness seems on such occasions to have been the rule. The case of Archelaus, on the occasion of the first Herod's death, is not conclusive, but his inclination towards alien usages was doubtless shared by the Herodianizing Jews (Jer. xvi. 5–7; Ezek. xxiv. 17; Hos. ix. 4; Eccles. vii. 2; Joseph. *de B. J.* ii. 1). Birthday-banquets are only mentioned in the case of Pharaoh and Herod (Gen. xl. 20; Matt. xiv. 6). We know, however, from Herod. i. 133, that these were customary among the Persians. The entertainment to which Esther invited the king and Haman is called a "banquet of wine" (Esth. v. 6; vii. 2), and wine is the prominent feature in the banquet of Belshazzar. The presence of the women on this last occasion, although one of a public character, is in accordance with Babylonian manners (Dan. v. 1–4, *Speaker's Comm.* notes in loco; cp. Herod. i. 191; Xen. *Cyrop.* v. 2, 28; Rawlinson, *A. M.* iii. 21). "The banquet-house" was probably some hall of the palace. No details of it are given, save that the wall was faced with "plaister" or stucco, a mode of surface-finish which the existing ruins are said to show (Layard, *Nin. and Bab.* p. 295). The state banquets in Esth. i. 3 sq., as distinct from the private banquet of chs. v. and vii. referred to above, give us a standard of Persian manners; the queen holding separately her women's feast, a fact which enhances the arbitrary and unusual character of the king's requirement of her presence (i. 9, 10, 11). Of the apparently more popular entertainment in the palace garden under awnings, &c., we have a rather elaborate account; the chief features being divers coloured hangings, variegated pavements, marble columns, and gold and silver couches and vessels. These, however, although biblical, are not Judaean customs. The Jewish standard of luxury is

found in Is. v. 11, 12; Amos vi. 4–6. All these refer to drinking parties. In Esth. i. 7, 8 wine and wine vessels alone are prominent, and no mention of viands occurs, the abundance and "royal" quality of the wine being expressly noticed. We find also here a custom of com-

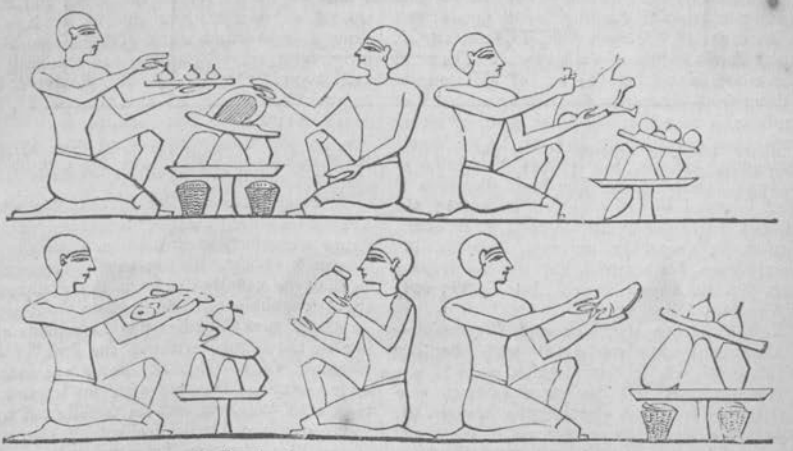
Assyrian drinking scene. (From Khorsabad.)

pulsory drinking superseded for the occasion, and therefore generally the rule. The officers of the royal household have also charge of the guests, each perhaps acting as symposiarch at his table. For the parallel customs in classical antiquity, see *Dict. of Gr. and Rom. Antiq.*, s. v.

An Egyptian party of guests, entertained with music and the dance. (From Thebes, now in the British Museum.)

SYMPOSIUM; and for the addiction of the later Persians to wine, Herodot. i. 133, Xen. *Cyrop.* viii. 8, § 12. A leading topic of prophetic rebuke is the abuse of festivals to an occasion of drunken revelry, and the growth of fashion in favour of drinking parties. Such was the

invitation typically given by Jeremiah to the Rechabites (Jer. xxxv. 5). The usual time of the banquet was the evening, and to begin early was a mark of excess (Is. v. 11; Eccles. x. 16). The slaughtering of the cattle, which was the preliminary of a banquet, occupied the earlier part of the same day (Prov. ix. 2; Is. xxii. 13; Matt. xxii. 4; cp. Jas. v. 5). The most essential materials of the banqueting-room, next to the viands and wine, which last was often drugged with spices (Prov. ix. 2; Cant. viii. 2), were perfumed ointments, garlands or loose flowers, white or brilliant robes; after these, exhibitions of music, singers and dancers, riddles, jesting and merriment (Is. xxviii. 1; Wisd. ii. 6 sq.; 2 Sam. xix. 35; Is. v. 12; Judg. xiv. 12; Neh. viii. 10; Eccles. ix. 8, x. 19; Matt. xxii. 11; Amos vi. 5, 6; Luke xv. 25). Seven days was a not uncommon duration of a festival, especially for a wedding, but sometimes fourteen (Tob. viii. 19; Gen. xxix. 27; Judg. xiv. 12); but if the bride were a widow, three days formed the limit (Buxtorf, *de Conviv. Hebr.*). The reminder sent to the guests (Luke xiv. 17) was, probably, only usual in princely banquets on a large scale, involving protracted preparation. "Whether the slaves who bade the guests had the office (as the *vocatores* or *invitatores* among the Romans) of pointing out the places at table and naming the strange dishes, must remain undecided" (Winer, s. v. *Gastmahl*). There seems no doubt that the Jews of the O. T. period used a common table for all the guests. In Joseph's Egyptian entertainment a ceremonial separation prevailed, but there is no reason for supposing a separate table for each, as is distinctly asserted in Tosephoth Tr. *Berach.* c. vi. to have been usual (Buxtorf, *l. c.*). The latter custom certainly was in use among the ancient Greeks and Germans (Hom. *Od.* xxii. 74; Tac. *Germ.* 22), and perhaps among the Egyptians (Wilkinson, *A. E.* ii. p. 44, ed. 1878). But a common table is the usage suggested by 1 Sam. xx. 25–29; and the common phrase "to sit at table with," or "eat at any one's table," shows the originality of that usage. The posture at table in early times was sitting (יָשַׁב, סָבַב, to



An Egyptian dinner-party. (Tomb near the Pyramids.)

sit *round*, 1 Sam. xvi. 11; xx. 5, 18), and the guests were ranged in order of dignity (Gen. xliii. 33; 1 Sam. ix. 22; Joseph. *Ant.* xv 2, § 4): thus "Abner sat by Saul's side" in 1 Sam. xx. 25. The words which imply the recumbent posture (ἀνακλίνειν, ἀναπίπτειν, or ἀνακεῖσθαι) belong to the N. T. The separation of the women's banquet was not a Jewish custom (Esth. i. 9). Portions or messes were sent from the entertainer to each guest at table, and a double or even five-fold share when peculiar distinction was intended, or a special part was reserved (Gen. xliii. 34; 1 Sam. ix. 23, 24). Portions were similarly sent to poorer friends direct from the banquet-table (Neh. viii. 10; Esth. ix. 19, 22). The kiss on receiving a guest was a point of friendly courtesy (Luke vii. 45). Perfumes and scented oils were offered for the head, beard, and garments. It was strictly enjoined by the Rabbis to wash both before and after eating, which they called the מים ראשונים and מים אחרונים; but washing the feet seems to have been limited to the case of a guest who was also a traveller. Allowance must, however, be made for the widely differing periods to which these notices of social customs belong.

In religious banquets the wine was mixed, by rabbinical regulation, with three parts of water, and four short forms of benediction were pronounced over it. At the Passover, four such cups were mixed, blessed, and passed round by the master of the Feast (ἀρχιτρίκλινος) It is probable that the character of this official varied with that of the entertainment; if it were of a religious character, his office would be quasi-priestly; if a revel, he would be the mere συμποσιάρχης or *arbiter bibendi*. See further details in Riehm, *HWB.*, and Herzog, *RE.*[2] s. n. *Gastmahl*. [H. H.]

BAN'UAS (Βάννος; *Bannis*), a name occurring in the lists of the Levites who returned from Captivity (1 Esd. v. 26). Banuas and Sudias answer to Hodaviah, or are a corruption of Bene-Hodaviah (*Speaker's Comm.* in loco) in the parallel lists of Ezra (ii. 40) and Nehemiah (x. 9, &c.). [W. A. W.] [F.]

BAPTISM (*βάπτισμα*).

VI. *Doctrine of Baptism in N. T.*, p. 347.
VII. *Administration*, p. 351.
VIII. *Literature*, p. 354.

I. *The Term.*—The verb *βαπτίζειν* occurs twice in LXX.: 2 K. v. 14, of Naaman dipping in Jordan, and Is. xxi. 4, metaphorically, *ἡ ἀνομία με βαπτίζει*. In the Apocrypha it is employed of bathing in a fountain (Judith xii. 7), and of washing after touching a corpse (Ecclus. xxxiv. 25). The usual word for "dip" in an ordinary sense is *βάπτειν*, both in LXX. (Ex. xii. 22; Lev. iv. 6, 17; Josh. iii. 15, &c.) and N. T. (Luke xvi. 24; John xiii. 26; Rev. xix. 13; Matt. xxvi. 23; Mark xiv. 20). The latter is never used of Baptism proper, which is always expressed by *βάπτισμα, βαπτίζειν*. These terms have an exact baptismal reference everywhere in N. T., except in Mark vii. 4, Luke xi. 38, concerning ceremonial washing before meals; and in Matt. xx. 22, 23, Mark x. 38, 39, Luke xii. 50, of our Lord's Baptism by His Passion. The word *βαπτισμός*, signifying the act of ablution, as distinct from *βάπτισμα*, the rite or condition of Baptism, is found in Mark vii. 4, 8, of ritual washing of utensils; in Heb. ix. 10, of Mosaic ablutions; and in the phrase "doctrine of baptisms," Heb. vi. 2. The verb *βαπτίζειν* is often followed by some phrase indicating the element or purpose of the Baptism, as *ἐν ὕδατι*, Mark i. 8; *ἐν πν. ἁγ. καὶ πυρί*, Luke iii. 16; *εἰς τὸ ὄνομα*, Matt. xxviii. 19; *ἐπὶ τῷ ὀνόματι Ἰησ. Χρ. εἰς ἄφεσιν ἁμαρτ.*, Acts ii. 38; *ὑπὲρ τῶν νεκρῶν*, 1 Cor. xv. 29.

II. *Old Testament Types and Prophecies.*—1. Circumcision is contrasted with Baptism in Col. ii. 11, 12, in terms which make it also a symbolic parallel. The correspondence consists in the fact that circumcision brought the male Israelite into covenant with God, and was a physical sign of the cutting off of sin. St. Augustine and some of the later Latin writers attributed to it a definite pardon of original sin. But there is no indication of this in Holy Scripture. Its lessons to the Jew were rather of a moral kind (Deut. x. 16, xxx. 6; Jer. iv. 4). Hence Calvin, with others, in order to depreciate Baptism, sought to establish an identity of effect between it and circumcision (*Inst.* IV. ch. xvi. 3, 4). The N. T on the contrary asserts that circumcision is completely superseded under the Gospel (Acts xv.; Rom. ii. 25–29, iv. 9–11; Gal. ii., v. 2–6, Col. iii. 11; Tit. i. 10). The unlikeness of the method of administering the "circumcision made without hands" may itself be an indication that its grace wholly surpasses that of its partial type under the Law.

2. The "divers washings" of the Old Covenant (Heb. ix. 10) in some respects afford a closer parallel. Ablution was required before certain approaches to God (Ex. xix. 10, 14, xxix. 4, xxx. 18–21; Num. viii. 7, 21), and after conditions symbolical of sin (Lev xiii.–xvi., Num. xix.). In some cases the water was mingled with blood (Lev. xiv. 4–7), in others the blood was used alone or as the prominent element (Ex. xii. 22, xxix.; Lev. xiv. 14, xvi. 14–19; Heb. ix. 19–23). The general teaching which underlay these rites was suggestive of cleansing by sprinkling with the blood of redemption and with water; and this gives them, as types, a specific reference to Baptism, although it may not always be their only or even chief fulfilment.

3. Prophecy more or less obscurely pointed on to Christian Baptism as the source of a spiritual purification which the ritual of the Law failed to effect. No doubt at the time this meaning was hidden, but when Baptism had been instituted it became obvious that the O. T. promises of cleansing by water were fulfilled in it. Thus the Fathers explain the words of Ezek. xxxvi. 25, 26, "Then will I sprinkle clean water upon you, and ye shall be clean," to be prophetic of Baptism. "See, beloved," says Hippolytus on Is. i. 16, 18, "how the prophet foretold the cleansing of Baptism" (*In Theoph.* 10). Cyril of Alexandria wrote of the "fountain for sin and for uncleanness," in Zech. xiii. 1, that it is "plainly holy Baptism." And Jerome, comparing it with Ezek. xlvii., sees the teaching "that we be all reborn in Christ, and in the waters of Baptism our sins be forgiven us." Among texts which some of the Fathers similarly interpret of Baptism are especially Pss. xxiii. 2, xxxii. 1, xxxvi. 9, xlii. 1, xlvi. 4, li. 7; Is. xxxv. 6, xliii. 19, 20, xliv. 3, xlviii. 21, lv. 1; Jer. ii. 13; Joel iii. 18; Zech. iii. 4.

4. O. T. history affords several types of Baptism, two of which have the express sanction of Holy Scripture.

St. Peter, after mentioning that those in the Ark "were saved by water," continues, "The like figure whereunto *even* Baptism doth also now save us" (1 Pet. iii. 20, 21). Commentators on the type usually dwell on the entrance into the Ark as the parallel to Baptism. "To neglect Baptism," says C. Leslie, "is to venture swimming in the Deluge without the Ark" (*Water Baptism*, viii.). But St. Peter connects the saving power of Baptism with the water rather than with the Ark, and he is followed by the framers of the English collect. "The waters of the Flood," writes Leighton, "drowned the ungodly ... and upon the same waters the Ark floating, preserved Noah. Thus the waters of Baptism are intended as a deluge to drown sin and to save the believer, who by faith is separated both from the world and from his sin; so it sinks, and he is saved." The Fathers sometimes extend the type as a "Baptism of the world," "whereby its former iniquity was purged away" (Tert. *De B.* viii.).

St. Paul says the Israelites "were all baptized unto Moses in the cloud and in the sea" (1 Cor. x 2). Since he is comparing the privileges of the two covenants there can be no question that the allusion is strictly to Baptism. The cloud is sometimes said to symbolise the Spirit, and the sea the water (John Dam. *De Fide Orth.* IV. ix.). But the analogy of the cloud is rather to be found in Confirmation, while the parallel of the sea is in Baptism proper, wherein the spiritual Israel passes out of slavery on to the way towards its Canaan, the sins which are its enemy being drowned in the waters. The Fathers are rich in passages which develop this imagery. Some add the thought that the water of Baptism is red, because consecrated by the Blood of

Christ. St. Jerome, among others, says that Micah "prophesies of the grace of Baptism" (*Ep.* lxix. *ad Oc.*), when he speaks of the Gospel deliverance as a "coming out of Egypt," and declares that God will "cast all their sins into the depths of the sea" (vii. 15, 19).

Other types dwelt upon in patristic literature are the Spirit moving on the waters (Gen. i. 2), the beginning of life from water (i. 20, 22), the river watering Paradise (ii. 10), Hagar's spring (xxi. 19), the wells of the Patriarchs (xxi., xxiv., xxix.), the waters of Marah (Ex. xv. 23–25), the water from the rock (xvii. 6), the passage of Jordan (Josh. iii.), the drenching of Elijah's sacrifice (1 K. xviii. 33–35), the passage of Elijah (2 K. ii. 8, 14), Naaman's cleansing (v. 14), and the swimming axe-head (vi. 6).

III. *The baptism of Proselytes* was a traditional development of the precepts of the Law. No instance is recorded in the Bible, and scholars are divided as to whether it was in use till a later date. But it is at least probable that it preceded the Gospel. If the Law demanded constant ablution, and the Pharisees developed the demand into the ritual cleansing of vessels, they were certainly likely to baptize a polluted Gentile before receiving him into the covenant.

The Rabbis traced the institution of Baptism to the injunction at Sinai, "Sanctify them to day and to morrow, and let them wash their clothes" (Ex. xix. 10). They maintained that the washing of garments always implied ablution of the body (*Gem. Bab.* Tit. Jeb.; Maim. *Mikvaoth*). Thus by glosses on Holy Scripture they reached the position that "Israel was admitted into the covenant by Circumcision, Baptism, and Sacrifice" (*Talmud*, Tract. Rep.; Maim. *Iss. Biah*, xiii.). Similarly no Gentile could become a proselyte without the same ordinances, even females requiring Baptism and Sacrifice (*Gem. Bab.* Tit. Cherith). The children of Israelites, both of Jews by birth and of proselytes, were held not to need a personal baptism, since they were born within the covenant, and this fact greatly reduces the similarity of rabbinical baptism to that of Christianity. The expression of the Rabbis that a proselyte was "like a child new born" (*Gem. Bab.* Tit. Jeb.), even if it existed so early, affords no parallel to the language of our Lord to Nicodemus. It only meant that the Gentile was taken out of his natural relationships into fellowship with a peculiar people. It suggested no idea to the Jew of spiritual regeneration. (PROSELYTES; Lightfoot, *Hor. Heb.*, on Matt. iii. and John iii.; Wall, Introd.; Gale's *Reply*, Lett. ix., x.)

IV. *St. John's baptism* stands by itself, intermediate between the rites of the Law and the Baptism of Christ. It was not, as some of the Schoolmen asserted, a form of purification belonging to the Old Covenant, nor, as others have said, a direct parallel to proselyte baptism. It was peculiar to his own mission, and was afterwards known as "John's baptism" (Acts xix. 3). From the Pharisees' question (John i. 25) it may be inferred that the Jews were prepared for a Baptism by the Messiah or His forerunner. To them St. John vouchsafed very little information, but to those who came to be themselves baptized he was more explicit: "I indeed baptize you with water unto repentance; but he that cometh after me ... shall baptize you with the Holy Ghost and with fire" (Matt. iii. 11). It is wonderful that any should in the face of these words have sought to establish even an approximate sameness between John's baptism and that of Christ. Yet Petilian connected them dangerously (Aug. *Cont. Pet.* II. xxxii., xxxiv., xxxvii.), and Peter Lombard so far confused them as to think that the baptism of John sufficed to those who looked beyond it, and believed in the Father, Son, and Holy Spirit (*Sent.* IV. ii.). Zwingli (*De vera et falsa Rel.*), Calvin (*Inst.* IV. ch. xv. 7) and most of the disciples of Luther, went further, and set the two Baptisms almost on an equality. The essential difference between them is proved not only by St. John's words, but by the fact that his disciples at Ephesus were baptized again by St. Paul. It is impossible to evade this proof by the untenable expedient of taking Acts xix. 5 as part of the narrative of St. Paul (Voss. *De B.* viii. 24). In refuting the views of the extreme Reformers some have fallen into the opposite tendency of disparaging John's baptism over much (Bellarm. *De B.* I. chs. xix.–xxiii.; Maldonat. *De Sac.* I. ch. ii. 3). It was "from heaven," by Divine commission (Matt. xxi. 25; John i. 33). It was characterised as a "baptism of repentance, for (*εἰς*) the remission of sins" (Mark i. 4). Cyril of Jerusalem, among others, believed that it conferred remission (*Cat.* iii. 7, xx. 6). Augustine mentions this view, but in common with most of the Fathers held that there could be no actual remission before the sacrifice of Christ (*De B.* V. x. 12; Tert. *De B.* xi.; Amb. *De Poen.* II. vi. 44; Jer. *Contra Lucif.* 7; Chrys. *In Matt.* Hom. x. 2, xii. 1; John Dam. *De Fide Orth.*, IV. ix.; Aquin. III. lxviii. 6). When St. John himself pointed to our Lord as "the Lamb of God which taketh away the sin of the world," the natural inference was that transference to Him was necessary for remission. It cannot even be supposed that the Baptist conveyed any gift of repentance. His baptism was one of repentance because it enlisted its recipients into a discipleship of repentance, of which the end was the remission of sins. But no sacramental grace was pledged to accompany it. It was preparatory to that of Christ. It does not follow that it was devoid of spiritual blessing.

It has been surmised from Acts xix. 4 that St. John baptized in the name of the Messiah about to come (Amb. *De Sp. S.* I. iii.; P. Lomb. IV. ii.; Lightfoot, *Hor. Heb.* Matt. iii.). If so, the Pharisees would scarcely have asked whether he were the Christ. It is a wilder conjecture that he used the Name of the Trinity (Voss. viii. 8). Bellarmin suggests that he employed no words (*De B.* I. ch. xx.). Clearly we know nothing except that he could not have used the Christian formula.

The significance of St. John's baptism was demonstrated when our Lord came to be Himself baptized with it. He declared its importance when He said, "Thus it becometh us to fulfil all righteousness" (Matt. iii. 15). How it fulfilled all righteousness is a matter for reverent speculation, towards which some suggestions have been made. It attested St. John's mission and baptism. It was fitting that the Son of Man should, in His humility, submit to that which His people were being called to accept. As figuring the future Baptism of the Church, Christ's Baptism by St. John was an

example "that the servants might know with what alacrity they should haste to the Baptism of the Lord, when He Himself disdained not to receive the baptism of a servant" (Aug. *In Joan.* t. v. 3). Yet more, He was baptized that He might "sanctify the element of water to the mystical washing away of sin." It is the recurring thought expressed by the Fathers and in the liturgies that in His own Baptism He transformed the external rite into a Sacrament. He came, says Ambrose, "not seeking to be cleansed, but to cleanse the water" (*Exp. Ev. sec. Luc.* ii. 83). "Not to receive forgiveness," says St. Cyril, "for He was sinless, but being sinless to grant Divine grace and dignity to the baptized" (*Cat.* iii. 11). "He received no cleanness, no virtue," says Bishop Andrewes, "but virtue He gave to Jordan, to the waters, to the Sacrament itself" (*Serm.* viii. *on Holy Ghost*). Thus viewed, the Baptism of Christ becomes the representative of His own Baptism of His people. Hence some of the Fathers ventured on a still deeper thought, that though He could need no Baptism for Himself, yet the nature of man which He had assumed needed to be baptized as a whole in Him, before the Baptism which He so consecrated was applied individually to each. (See Aquin. *Summa*, III. xxxix. 1.) "By the Baptism of Christ," says St. Augustine, "were we baptized, and not we only, but the whole world, and is baptized to the end" (*In Joan.* t. iv. 14). The Baptism of our Lord thus marks the transition from one Covenant to the other. "Acting with a view to both," says St. Chrysostom, "He brought the one to an end, but to the other He gave a beginning: having fulfilled the Jewish baptism, He at the same time opens also the doors of that of the Church" (*In Matt.* Hom. xii. 4).

V. *Preparation and Commission of the Ministry of Baptism.*—This was a gradual process.

1. The discourse to Nicodemus has been called the institution of Baptism as regards precept (De Burgo, *Pupilla Oculi*, II. i.). But it was not a public precept, and therefore not yet binding (Bernard, *Ep.* lxxvii.).

2. Quite at the beginning of the ministry, "came Jesus and His disciples into the land of Judaea, and there He tarried with them and baptized" (John iii. 22). The Evangelist adds that "Jesus Himself baptized not, but His disciples" (iv. 2). There are traditions that our Lord baptized His mother and St. Peter with His own hands (Euthym. *In Joan.* iii. 5), and that Peter baptized Andrew, James, and John, the last three the other Apostles, and Peter and John the seventy (Euodias *ap.* Niceph. II. iii.). But these traditions are not of much authority. When Christ's Baptism attracted more converts than John's, there arose a dispute on the merits of the two Baptisms, followed by a complaint to the Baptist (John iii. 26; iv. 1). Though John's answer indicated that his baptism was on the decline, he seems to have continued to administer it until his imprisonment. Whether his disciples were baptized again on passing over to Christ does not appear.

It is difficult to determine what was the exact character of the Baptism by the disciples. That it was not identical with John's is clear from the difference between the discipleship of John and that of Christ. There is some force in Leslie's remark that, if the Baptisms had been the same, John would have been the institutor and Christ his follower (*Water Baptism*, vi.). Tertullian and Chrysostom assume that Baptism by the disciples was no more than that of John (Tert. *De B.* xi.; Chrys. *In Joan.* Hom. xxix. 1). Yet Tertullian allows that our Lord's words to St. Peter, "He that is washed needeth not save to wash his feet, but is clean every whit: and ye are clean" (John xiii. 10), indicate that the Apostles must at some time or other have received the full benefits afterwards attributed to Baptism (*De B.* xii.; cp. Aug. *De Anima*, III. ch. ix.). The notice of the Baptism by the disciples in close sequence to the pointing out of our Lord as He Who would baptize with the Holy Ghost and with fire, and to the discourse with Nicodemus, naturally leave the impression that it was the true Baptism of Christ. It is objected to this view that "the Holy Ghost was not yet *given*" (John vii. 39). But this can only refer to the fulness of His coming, and need not touch the question of Baptism at all. Tertullian uses a weightier argument when he urges that Christian Baptism could not precede Christ's Passion and Resurrection, "because our death could not be destroyed but by the Passion of the Lord, nor life be restored without His Resurrection" (*De B.* xi.). This may be met by the parallel of the institution of the Eucharist, and by the absolutions given by our Lord before His death. Augustine believed that this preliminary Baptism really "cleansed." "The disciples supplied the ministry of the body, He afforded the aid of His majesty" (*In Joan.* t. xv. 3). Thomas Aquinas says that it received efficacy from the Passion beforehand as did the sacrifices of the Law, but in a greater degree because it had direct virtue from Christ Himself (III. ch. lxvi. 2). Some consider that the reconciliation subsequently attached to Christian Baptism was bestowed on the Apostles by the breath of our Lord after the Resurrection (Cyr. Hieros. *Cat.* xvii. 12; Amb. *In Ps.* cxviii.), or by their first Communion (Puller, *Grace of Confirmation*, p. 18). But it seems more simple to suppose that this early Baptism of Christ was the true Baptism of the Gospel, its full effects being latent until the consummation of the acts of redemption. This is the opinion of several among the Fathers and Schoolmen (Aug. *Ep.* cclxv., *De Div. Quaest.* lxii.; P. Lomb. IV. ch. iii.; Hugo S. Vict. *De Sac.* II. ch. vi. 4). Peter Lombard even conjectured that the disciples baptized in the Name of the Trinity, but this is improbable.

3. Mystical writers have always been ready to see a reference to Baptism wherever water is spoken of in connexion with our Lord. "As often as water alone is mentioned in the sacred Scriptures," says St. Cyprian, "Baptism is alluded to" (*Ep.* lxiii. 5). The most obvious of the symbolic types in the N. T. are the miracles wrought at the pools of Bethesda and Siloam. Others, like the walking of St. Peter on the water to Christ, are only adapted for allegorical meditation. The parallel of drinking so little suits the administration of Baptism that it may be questioned whether the living water of John iv. 10–14 can be strictly applied to it. At any rate such circumstances formed no part of the direct preparation for the ministry of

Baptism. There is, however, one typical event which stands on a different footing. The flow of blood and water from the side of Christ has received a sacramental interpretation in almost every liturgy and from almost every commentator of consideration. A few take it exclusively of Baptism, the blood and the water symbolising either the two Baptisms of martyrdom and of water (Tert. *De Pud.* xxii., *De B.* xvi.; Jer. *Ep.* lxix. 6; Cyr. Hieros. *Cat.* iii. 10), or the union of Baptism with the Passion (Aug. *Cont. Faust.* xii. 16; cp. Amb. *De Myst.* 20). The commoner and probably better application is to the two great Sacraments. Our Lord came, St. John says, "by water and blood" (1 John v. 6). From His body on the cross there flowed out, in something more than mere symbol, the life-giving stream of the Sacraments whereby He ever cometh anew to His people (see Pusey, *Doct. of Bapt.* pp. 293–301; Westcott, *St. John*, add. note on xix. 34).

4. The final commission to baptize was formally given to the Apostles after the Resurrection, in the words: "All power is given unto Me in heaven and in earth. Go ye [therefore], and make disciples of all the nations, baptizing them into the Name of the Father, and of the Son, and of the Holy Ghost: teaching them to observe all things whatsoever I commanded you: and, lo, I am with you alway, even unto the end of the world" (Matt. xxviii. 18–20, R. V.). The authority (ἐξουσία) which our blessed Lord had received as Man He committed to them: yet, by virtue of His abiding Presence with them, He could still throughout be the one Baptizer.

5. The descent of the Holy Ghost on the Day of Pentecost completed the institution. Before executing their commission the Apostles had to wait "for the promise of the Father;" "for," our Lord said, "John truly baptized with water; but ye shall be baptized with the Holy Ghost not many days hence" (Acts i. 4, 5). These words may be taken to mean that the full effects of whatever Baptism they had already received awaited their consummation through the advent of the Spirit, or that the Pentecostal outpouring by itself conveyed to the Apostles the whole baptismal gift. Either way they demonstrate that the Baptism of Christ was not entirely imparted till the Day of Pentecost. Then St. Peter was able to promulgate it as the condition of Christianity. The old Law had passed away, and grace and truth had come by Jesus Christ.

VI. *Doctrine of Baptism in N. T.*—Like all other great doctrines, its revelation was gradual. Prepared for by type and prophecy, by the introductory baptisms of St. John and the disciples, the full extent of its meaning is only developed by degrees in the Books of the N. T. The passages in the Gospels and Epistles which treat of it explicitly are sufficiently limited to be passed briefly in review.

1. The first thought is that of regeneration. Our Lord says, "Except a man be born again, he cannot see the kingdom of God," and He explained this birth to be "of water and [of] the Spirit," ἐξ ὕδατος καὶ Πνεύματος (John iii. 3, 5). The Fathers from Justin Martyr downwards, and every liturgy of Christendom, unhesitatingly apply the words to Baptism, without allusion to any alternative interpretation. In truth none is possible. Calvin, the first opponent of baptismal regeneration, was perhaps also the firs to dispute the application of the text to Baptism. He maintained that to be born of water and the Spirit meant in fact to be born only of the Spirit, acting upon the soul for its purification as water acts upon the body (*Inst.* iv. ch. xvi. 25). Somewhat similarly the schools of thought represented by such men as Zwingli, Grotius, Limborch, Socinus and Cartwright, have taught that the water stands as a mere figure of the Spirit's operation. This not only contradicts the unanimous opinion of the Church, but does violence to the language of Holy Scripture. No one intending to convey the idea that the "water" was figurative would mention it before "the Spirit," and connect the two as parallel elements of birth. The being "born of water and the Spirit" is plainly one operation, wrought by two distinct, yet inseparable, means.

Apart from opposition to the whole doctrine of Sacraments, the difficulty which some in modern times have felt in applying regeneration to Baptism has come partly from misusing the term. Since spirituality is the proper sequel to regeneration, people living spiritual lives have sometimes, even in early writings, been called regenerate, and the unspiritual unregenerate. But this is not the strict and accurate sense of the word. "Regeneration," says Bishop Bethell, "though it requires certain previous qualifications in those who are capable of possessing them, is entirely the work of Christ and the Holy Spirit: a spiritual change in which the principle of self-action implanted in man bears no part." It "is a single act of God's grace, conveyed over to us at a determinate time, and in a form specially appointed by Christ" (*Doct. of Reg.* pp. 25, 153). In its own sphere it is as real a birth as the natural birth is in the material order. Nowhere is a metaphorical birth, or a mere instrumental agency, spoken of as that *of* (ἐκ) which we are born. St. Peter says we are "born again *of* (ἐκ) incorruptible seed *by* (διὰ) the word of God" (1 Pet. i. 23); St. Paul, "I have begotten you *through* (διὰ) the Gospel" (1 Cor. iv. 15); St. James, "Of His own will begat He us *with* the word (λόγῳ) of truth" (i. 18). But we are born *of* (ἐκ) water and the Spirit as we are born *of* (ἐκ) God, and on our fleshly side *of* (ἐκ) the flesh (John i. 13; iii. 6).

This birth is ἄνωθεν. St. Chrysostom mentions that in his day there were already the two interpretations, "from above," and "anew." The use of the adverb elsewhere (John iii. 31, xix. 11, 23; cp. Jas. iii. 15, 17, and LXX.) is in favour of the first, which is adopted by most Greek commentators beginning with Origen, and by some Versions and later writers. The other is favoured by most recent critics, and has on its side very early tradition. Justin Martyr quotes the words as ἂν μὴ ἀναγεννηθῆτε (*Ap.* i. 61). It is not of importance which is adopted. When the context is regarded, it will be seen that either expression implies the other.

Our Lord forewarns men that this spiritual birth will baffle human calculation, even as the whole problem of the coming and going of the wind does. Yet more must it be beyond the reach of his understanding. St. Chrysostom, in a beautiful passage, points out how incapable we are of explaining material birth, or the growth of plants; and how, if these visible things

are beyond us, we must expect mysteries in those which are spiritual and invisible. We must, then, fall back upon faith in God's word. "That which called the things that were not into existence may well be trusted when it speaks of their nature. What then says it? That what is effected is a generation. If any ask, How? Stop his mouth with the declaration of God, which is the strongest and plainest proof" (*In Joan.* Hom. xxv. 1, 2).

2. The commission to the Church to baptize into the Name of the Trinity (Matt. xxviii. 19) was really another step in the development of regeneration. The "Name" cannot mean, as some would say, the faith, or obedience, or obligations, involved in the doctrine of the Trinity. The "Name" of God in Holy Scripture is an objective title for God Himself. Nor should a less force be given to *εἰς* than is expressed by "into" (cp. Rom. vi. 3; 1 Cor. xii. 13; Gal. iii. 27). It is true that it cannot strictly bear this meaning in the passage where St. Paul speaks of the Israelites as "baptized *εἰς* Moses" (1 Cor. x. 2), and the Syriac Version, Beza, Calvin, and others paraphrase it there as "by the hand of." But Chrysostom's explanation is no doubt correct, that the word is used there inexactly, in order "to bring the type near the truth," by using "the terms of the truth even in the type" (*In* 1 *Cor.* Hom. xxiii. 3). There is no reason for evading a rendering which gives the best, the simplest, and most natural sense. Birth is an introduction into a new sphere of life. That sphere, through regeneration, is the Blessed Trinity. "He committeth to His disciples," says Irenaeus, "the power of regeneration into God" (*Adv. Haeres.* III. xvii.). Even Stier says, "There is a translation into communion of life with the Father, Son, and Spirit in this dipping into the Name: the baptized become translated into the powers and nature of God" (*Words of Jesus*, on Matt. xxviii.). This is what man required. Sin had separated him from communion with God. By Baptism he is born again into the beginnings of that restored life. The commission, then, prescribes not merely the formula which the minister was to use, but the operation which was to be effected by the act of Baptism. Patristic comment fully supports this view of the text.

3. Our Lord affixed salvation to Baptism: "He that believeth and is baptized shall be saved" (Mark xvi. 16). The truth that regeneration is birth into God at once explains this declaration. If a man emerges through Baptism into union with God, he thereby obtains salvation; and this none the less because the new life is immature at first, and may decay or be strangled during its probation. The assertion is not altered by the absence of any mention of Baptism in the other section of the verse: "He that believeth not shall be damned." The reasons for the omission may be that the unbeliever would naturally remain unbaptized or would be baptized to no profit; that unbelief involves condemnation to the baptized; and that our Lord would not imply anything as to the condemnation of those who have never had the opportunity of Baptism. The best commentary on the passage is the story of the Philippian jailor. When he asked what he must do to be saved, he was told, "Believe on the Lord Jesus Christ, and thou shalt be saved." All turned on faith, yet what that required is shown when it is added that he "was baptized, he and all his, straightway" (Acts xvi. 30–33).

In Tit. iii. 5 regeneration and salvation are directly connected: "He saved us by the washing of regeneration (*διὰ λουτροῦ παλιγγενεσίας*), and renewing of the Holy Ghost." The "laver of regeneration" so distinctly points to Baptism that even Calvin would not dispute the allusion, and few have sought for any other interpretation. The passage teaches that Baptism conveys an objective grace which is "not by works of righteousness which we have done, but according to His mercy." It is a gift of God whereby we are saved through a new birth.

St. Peter states the same truth when he says, "Baptism doth now save us" (1 Pet. iii. 21). He draws a contrast between its efficacy to those who receive it with "a good conscience," and the insufficiency of the Mosaic purifications, which were only "the putting away of the filth of the flesh." The figure of Noah's salvation helps us to understand the sense in which Baptism can be said itself to save us. Noah's safety was contingent on his faithful abiding in the Ark, and ours on our fidelity to God in His Church.

4. Cleansing from sin is a requisite condition of communion with God, and therefore the full doctrine of regeneration necessitates that Baptism should also be the removal of sin. Remission of sin held a primary position in the ministry of the Apostles (Luke xxiv. 47; John xx. 23), and it was the first characteristic which they claimed for the laver of regeneration. On the Day of Pentecost St. Peter cried, "Repent, and be baptized every one of you in the Name of Jesus Christ for the remission of sins." So might they "save" themselves from "this untoward generation" (Acts ii. 38, 40). "Remission of sins" was the climax of his address to Cornelius and his party, and their Baptism followed immediately (x. 43, 48). The 53rd chapter of Isaiah, which led the eunuch to ask to be baptized when St. Philip had expounded its meaning (viii. 32–36), referred above all else to the forgiveness of sin. Ananias' exhortation to Saul was, "Arise, and be baptized, and wash away thy sins" (xxii. 16). The Epistles dwell equally on the cleansing virtue of Baptism. In the Epistle to the Hebrews the approach to the "holiest" in the New Covenant is contrasted with the approach to its type in the Old. That was through repeated sacrifices and with "divers washings" (*διαφόροις βαπτισμοῖς*, ix. 10); this through the one sacrifice, "having our hearts sprinkled from an evil conscience, and our bodies washed with pure water" (x. 22). The internal remission is here simultaneous with the external ablution. Scarce any dispute that the words refer to Baptism. To the Corinthians St. Paul writes, evidently of their Baptism, "Ye were washed, ye were sanctified, ye were justified" (1 Cor. vi. 11). To the Ephesians he makes its cleansing grace a reason for our Lord's redemptive work: "Christ also loved the Church and gave Himself for it; that He might sanctify and cleanse it with the washing of water by the word" (*τῷ λουτρῷ τοῦ ὕδατος ἐν ῥήματι*, v. 25, 26). Unsacramental critics scarcely contest the reference to Baptism. They are mainly content with wresting "the word" as far as possible

from its connexion with the laver, and with making it mean the word preached, so as to attribute the cleansing to teaching rather than to Baptism (Alford, in loco; cp. Calvin, *Inst.* IV. ch. xiv. 4). One must object to such a violent dislocation of the sentence, and to such an interpretation of *ῥῆμα*, which never is used in Holy Scripture, or could suitably be used, of revelation or of a sermon. The Greek Fathers, and most of the Latin, understood it in this place of the baptismal formula. This seems to be the sense of St. Augustine's oft-quoted passage: "The word cleanseth also in the water. Take away the word, and what is water but water? The word is added to the element, and it becomes a Sacrament" (*In Joan.* t. lxxx. 3).

Luther allowed that Baptism remits sin, but only in a modified sense. He did not allow that it took sins away. The yet more unorthodox school of Calvin was obliged by its tenets to minimise the sense of remission almost further (*Inst.* IV. ch. xv. 10, 11; *Antid.* Sess. vi.). Holy Scripture, however, draws no distinction between remission and taking away. Least of all could such a distinction find a place in regard to Baptism. A remission which did not remove the sin would be no veritable cleansing. The enemies of Israel were left behind drowned in the sea. No doubt the "infection of nature" may remain, but the sin itself that is remitted is actually taken away, and it is thus that the sinner becomes cleansed.

5. Immediately after speaking to the Ephesians of the cleansing of the Church by water, St. Paul proceeds to identify the Church with the Body of Christ (v. 28–32). The bride being one with the Bridegroom, Baptism into the Church is incorporation into Christ. "By one Spirit we are all baptized into one body," and that body is Christ (1 Cor. xii. 12, 13). "As many of you as have been baptized into Christ, have put on Christ . . . Ye are all one in Christ Jesus" (Gal. iii. 27, 28). The expression, to be "in Christ," is common with St. Paul. It were unnatural, as an habitual expression, unless it were to have its simple, natural meaning. "As we are *in* Adam," says Dr. Pusey, "not merely by the imputation of Adam's sin, but by an actual community of a corrupt nature . . . so, on the other hand, are we *in* Christ, not merely by the imputation of His righteousness, but by an actual, real, spiritual origin from Him, not physical, but still as real as our descent from Adam" (*Doct. of Bapt.* pp. 113–117). And this, St. Paul says, is accomplished by Baptism. He does not mention the means every time he alludes to the result; but, since he has distinctly stated that Baptism is the method whereby we are made members of Christ, every text in which he speaks of our being "in Christ" is a separate testimony to the effect of the Sacrament. And in this effect lies the whole kernel of baptismal doctrine. Membership in Christ, however inexplicable it may be in itself, explains how it is that Baptism brings remission of sin, the gift of salvation, and regeneration into God, for from Him flow all the medicines of the Passion, and in Him is to be found the link which binds man into union with God.

Baptism is "a death unto sin and a new birth unto righteousness," because incorporation into Christ makes us partakers in His Death and Resurrection. "Know ye not, that so many of us as were baptized into Jesus Christ were baptized into His Death? Therefore we are buried with (*συνετάφημεν*) Him by Baptism into death: that like as Christ was raised up from the dead by the glory of the Father, even so we also should walk in newness of life" (Rom. vi. 3, 4). "In Whom also ye are circumcised with the circumcision made without hands, in putting off the body of the sins of the flesh by the circumcision of Christ: buried with Him in Baptism, wherein also ye are risen with *Him* through the faith of the operation of God, Who hath raised Him from the dead" (Col. ii. 11, 12). The contexts show that the language is not simply figurative. "We are baptized," says Tertullian, "into the Passion of the Lord" (*De B.* xix.).. "As though co-interred with Him in that element of the world," writes St. Ambrose, of the baptismal water, "having died to sin, thou wert raised again to life eternal" (*De Myst.* 21). "When we are buried with Him in His baptism," says St. Hilary, "we must needs die as to the old man, because the regeneration of Baptism is the power of the Resurrection" (*De Trin.* ix. 9). Such passages do justice to the moral side of the Death and Resurrection. The grace of Baptism is not irresistible. As the Death of Christ was real, so, St. Chrysostom points out, must ours be to sin: "our part must be contributed" (*In Rom.* Hom. x.). To Simon Magus Baptism was the reverse of a blessing. But, because the life can be quenched, it is not the less truly imparted. In Baptism we are engrafted into Him Who says, "I am the life" (John xiv. 6). "God hath given to us eternal life, and this life is in His Son: he that hath the Son hath life" (1 John v. 11, 12). The first influx of that life is through Baptism. The faithful may say with St. Paul, because they are baptized, "I live; yet not I, but Christ liveth in me" (Gal. ii. 20). It is this which makes the responsibility of a Christian. Sin in the baptized is an attack upon the life of Christ within.

6. The relation of the baptized to Christ throws light upon the difficult text: "Else what shall they do which are baptized for the dead, if the dead rise not at all? Why are they then baptized for the dead?" (*Ἐπεὶ τί ποιήσουσιν οἱ βαπτιζόμενοι ὑπὲρ τῶν νεκρῶν, εἰ ὅλως νεκροὶ οὐκ ἐγείρονται; τί καὶ βαπτίζονται ὑπὲρ αὐτῶν;* 1 Cor. xv. 29.) The whole subject of the chapter is the resurrection of the dead. "In Christ shall all be made alive" (v. 22). We are "in Christ" by virtue of our Baptism. Therefore Baptism is not only for the spiritual resurrection of the soul, but also, like the other great Sacrament (John vi. 54), for the resurrection of the body. All persons are baptized with reference to the dead, who are baptized in the belief that Baptism will affect their own resurrection. We do not know the precise circumstances which were giving prominence to the doctrine. But the offence of Christianity was the preaching of "Jesus and the resurrection," and evidently it was for this that disciples were at the moment "in jeopardy every hour." St. Paul argues that the peril need not be incurred if the doctrine could be dropped. But that very doctrine, because it placed Christians in danger, was apparently impelling converts to

hasten to Baptism, lest they should be martyred ere they received that union with Christ which would be the pledge of their resurrection. Thus they were baptized "for the dead," that is, as St. Chrysostom says, for their bodies, that the "dead body may no longer remain dead," since by Baptism it acquires the power of resurrection (*In* 1 *Cor.* Hom. xxiii. 3, xl. 2). In the main this represents the general interpretation of antiquity, however variously and sometimes loosely expressed, and it is substantially accepted by many able modern commentators.

Another explanation is that the text refers to Baptism by proxy. The Cerinthians, Marcionites and others, occasionally baptized a living person on behalf of a dead one (Tert. *De Res. Carn.* xlviii.; *Adv. Marcion.* v. ch. x.; Chrys. *In* 1 *Cor.* Hom. xl.). It is said that St. Paul alludes to such a custom as a proof that the resurrection was believed in fact even where it was denied in word. There is no evidence that the practice existed so early: it probably originated in a misunderstanding of this very text. Moreover, to suppose that St. Paul could bring into evidence a custom which he must have denounced as superstitious and reprehensible, to say the least, does scant justice to the loftiness of his reasoning in this chapter. St. Ambrose (*ad loc.*) is quoted in favour of the view, but the work referred to is probably not his, and the comment is capable of another meaning. It is upheld by Anselm and Bede, but its chief supporters are among much later writers.

Numbers of other interpretations have been hazarded, but all do violence either to the language or the context. Such are those in which "the dead" are made to mean dead works, those dead in sin, a dead Saviour, or some notable worthies; those in which Baptism is taken for ablution after touching a corpse, for martyrdom, or for the tears of the living for souls in purgatory; and those in which the elastic word ὑπερ is juggled with so as to get such senses as "over the sepulchres of martyrs," "because of the examples of martyrs," "though so many martyrs have died," "to fill up the places of martyrs," "to complete the πλήρωμα," "as a simile of death and resurrection," "at the point of death," and a host of others. For lists of these views and their authorities, see Jacobi, in Kitto's *Dict. of Bib. Lit.* s. v. Baptism; Suicer's *Thesaurus*, s. v. βάπτισμα; Poole's *Synopsis*; Horsley, in *Newbery House Mag.*, Jan. and March 1890. But the names quoted for each interpretation must be received with caution, since it is almost impossible to classify them accurately.

7. The Holy Ghost has a special office in regard to Baptism. "By one Spirit we are all baptized." Baptism is "of water and the Spirit." "That which is born of the Spirit is spirit." "Clearly, therefore," says St. Ambrose, "the Holy Spirit is the Author of spiritual regeneration" (*De Sp. S.* II. vii.). Tertullian compares the Spirit's brooding over the waters at first to His present abiding "upon the waters as the Baptizer" (*De B.* iv.). "As the water poured into the kettle," says Cyril of Alexandria, "being associated with the vigour of fire, receives in itself the impress of its efficacy, so, through the indwelling of the Spirit, the sensible water is trans-elemented to a divine and ineffable efficacy, and sanctifieth those on whom it comes" (*In Joan.* iii.).

The operation of the Holy Ghost is expressed in some passages as that of sealing (2 Cor. i. 22; Eph. i. 13, iv. 30). St. Paul speaks of circumcision as a seal of the covenant with God under the Law (Rom. iv. 11); but something more than this is to be understood of the seal of Baptism. It is not a mere witness of covenant, but an absolute stamping with the impress of God. And the Holy Spirit is not simply the agent by Whom this stamping is done. He stamps His own impress, because the impress of the Trinity must necessarily be the impress of each Person. Consequently Baptism establishes a real connexion with the Holy Ghost, and a share in His grace. It would not be true to credit those who are only baptized with all the gifts of the Spirit spoken of in the N. T. as belonging to Christians, because these include some that are proper to Confirmation. But neither in the Fathers nor in the liturgies is the "seal" a title applied to the Confirmation-aspect of Baptism alone. They constantly associate it particularly with the water (Hermas, III. ix. 16; Amb. *De Sp. S.* I. vi.; Cyr. Hieros. *Cat.* i. 2, &c. See Pusey, *Scrip. Views*, Note E). The texts therefore indicate a personal relationship of the Holy Spirit to the baptized.

8. The necessity of Baptism is grounded on the effects attributed to it, and more expressly on our Lord's words to Nicodemus, and on the terms of the baptismal commission. The Pelagians denied its necessity for the remission of original sin (Aug. *De Haeres.* lxxxviii.), and some of the 16th-century Reformers followed in their wake, denying that it was necessary for the children of Christian parents (Zwing. *De vera et falsa Relig.*; Calvin, *Inst.* IV. ch. xvi. 15, 24, &c.). They argued from the text where St. Paul speaks of children as "holy" when only one parent is a believer (1 Cor. vii. 14). It is much disputed what "holy" means here. It has been taken as equivalent to legitimate, as describing their Christian education, or as designating their fitness for Baptism (Tert. *De Anima*, xxxix.; Aug. *De Bapt. Parv.* II. xxvi., III. xii.). But if it is understood more naturally as indicating a real difference in spiritual condition between those born within Christianity and those without, it does not abrogate the need for Baptism. Even among the Jews, whose inherited birthright within the covenant was distinctly recognised, circumcision was required.

St. Augustine took a hard line as to the damnation of the unbaptized (*De Bapt. Parv.* I. xvi.–xviii.; *Ep.* clxvi.; *De Anima*, I. ix.), yet even he allowed that there must be exceptions, when Baptism was unprocurable, as in the case of the penitent thief (*De B.* IV. xxiv. 31; *De Anima*, III. ix.). Scriptural colour has been found for the Baptism of desire in the spirit of Ezek. xviii., and for the Baptism of blood in the words to the sons of Zebedee (Matt. xx. 22), and in the flow of blood as well as water from the side of Christ. Concerning "them that are without," the unapproached heathen, we have no right to judge (1 Cor. v. 12, 13). God can of course work without Baptism that which He is ordinarily pleased to give by it. But the Bible gives no hint that it can be dispensed with where it may be had. It was required

even in such exceptional cases as those of St. Paul and Cornelius; and our Lord's words must stand as the guiding rule of the Church: "Except a man be born of water and the Spirit, he cannot enter into the kingdom of God."

9. Baptism, being into the "one body" of the "one Lord," by the "one Spirit," regenerating man into the "one God," is also itself "one" (Eph. iv. 4–6). This unity consists, first, in the contrast to the "divers washings" of the Law; secondly, in its unique effects peculiar to itself; thirdly, in the necessity of certain essentials of administration; and, fourthly, in the impossibility of its iteration. This last point lends great awfulness to the Sacrament. "The bath," says St. Cyril, "cannot be received twice or thrice; else might a man say, Though I fail once, I shall go right a second time; whereas if thou failest once, there is no setting right, for there is one Lord, and one Faith, and one Baptism" (*Cat.* Praef. 7). It is in this sense that many understand the text: "It is impossible for those who were once enlightened, ... if they shall fall away, to renew them again unto repentance" (Heb. vi. 4–6). The Syr. Vers. reads "baptized" for "enlightened," and the latter word was at least among the Fathers a familiar synonym for Baptism. Holy Scripture tells of lapses, but it never records a re-baptism. The simile of birth seems to forbid it. A child cannot enter a second time into its mother's womb and be born. The life may grow faint and diseased, and may be renewed by penitence and absolution; but if it is once really lost, it cannot be recovered.

VII. *Administration.*—1. Subjects. 2. Dispositions. 3. Matter. 4. Formula. 5. Minister. 6. Rites and Ceremonies.

1. The terms of the commission are the widest possible. "All nations" were to be baptized, without restriction to race.

The command is so explicit that it would need some very clear evidence to prove that there was to be a limitation as to age. The only argument of weight against Baptism of infants is that they are incapable of qualifying themselves by active dispositions. The absence of these in adults sets a positive bar against the reception of grace; but unconscious babes can offer no impediment to the work of God, and therefore active dispositions are unnecessary for them until they are old enough to acquire them. St. Augustine points out that in Abraham faith preceded the sign, but in Isaac the sign preceded the faith (*De B.* iv. ch. xxiv.). The disposition is not ignored because the order is reversed. Some of the Anabaptists argued against infant Baptism from the age of Christ when He was baptized. Gregory of Nazianzus had forestalled their objection centuries before by showing that the circumstances and nature of His Baptism were too dissimilar from ours to afford any precedent as to details (*Orat.* xl.). If 1 Cor. vii. 14 bears on the subject at all, it can only be adduced as a reason against baptizing the children of heathen, while under their parents' charge, and against their parents' will.

The positive arguments for infant Baptism are many. i. Children inherit original sin; Baptism is its appointed remedy (Rom. v.–vi.). Unless children are incapable of salvation at all, it is fitting that they should early receive the medicine of their healing. ii. The simile of birth, used by our Lord, suggests that Baptism is peculiarly appropriate to infants, who are thus born spiritually into the kingdom of God, as physically into the world, of no active will of their own. iii. The children of Jews were admitted into the covenant as infants, and it would be unreasonable that the children of Christians should be excluded because the New Covenant is greater than the Old. The covenant itself is "an everlasting covenant" (Gen. xvii. 13), but the sign has changed with its development. The analogy was thought so exact that in the 3rd century some urged that Baptism ought to take place on the eighth day (Cyp. *Ep.* lxiv. 2). iv. The Rabbis baptized the children of proselytes with their parents, on the ground "that what is done by their fathers redounds to their good" (*Talmud*, Tract. Chet. i.). v. Our Lord blessed infants (*βρέφη*), and said, "Suffer little children to come unto Me, and forbid them not: for of such is the kingdom of God" (Luke xviii. 16). He could not have spoken thus if they were incapable of being admitted into it (John iii. 5). vi. St. Peter said to the Jews, "The promise is unto you, and to your children;" and, in the light of the prophecy of Joel, it is at least more likely that he meant actual children than merely posterity (Acts ii. 17, 39). vii. Children are addressed in the Epistles as members of the Church (Eph. vi. 1; Col. iii. 20), without any hint that this membership began only at years of discretion. viii. The consistent usage of the Church is, however, the strongest evidence of the will of Christ. "The Church received it," says Origen, "as a tradition from the Apostles to give Baptism to infants" (*In Rom.* vi.). Even Tertullian, who with characteristic peculiarity was an advocate for delay, implies that this was not the usual custom (*De B.* xviii.).

2. The dispositions necessary for Baptism are Faith and Repentance. In Holy Scripture faith holds the more prominent place of the two. Our Lord declared its necessity when He said, "He that believeth and is baptized shall be saved" (Mark xvi. 16). It was definitely required of the jailor (Acts xvi. 31, 33); and, according to a very early tradition which crept into some texts of the N. T., of the eunuch also (Iren. III. xii. 8; [Acts viii. 37]). It is mentioned in some form or other in close connexion with the Baptisms on the day of Pentecost (Acts ii. 41), at Samaria (viii. 12), of Cornelius (x. 43), of Lydia (xvi. 14, 15), and of the Corinthians (xviii. 8). The whole tenor of the apostolic sermons, as well as such notices as that the belief was in "the kingdom of God, and the Name of Jesus Christ," or "on the Lord Jesus Christ," show that it was not a vague general quality of faith, but an explicit profession of belief in definite dogmas which presently found expression in the formal creeds of the Church.

Repentance is not mentioned so frequently as faith, but it is everywhere implied by the character of the Gospel. It had given a title to St. John's baptism as the "baptism of repentance;" it was inherent in any conception of the forgiveness of sin; and to the first converts it was set forth in the forefront as the one requisite (Acts ii. 38). Indeed, faith and repentance practically involve each other.

There is no indication in the N. T. that candidates for Baptism were subjected to any prolonged preparation, such as that which afterwards became customary. The circumstances of the first preaching of the Gospel were peculiar. None were likely to accept it unless they were too much in earnest to need the test of a lengthy probation. Yet Holy Scripture affords one instance which amply justifies the precautions against hasty Baptism which the Church afterwards adopted. Simon Magus either received Baptism hypocritically, or else with such insufficient faith and repentance that he immediately fell (Acts viii. 13–24). The circumstance is of value as an illustration of the place which the dispositions hold in relation to Baptism. Simon was truly baptized. "The Church," says St. Augustine, "had herself given birth to Simon Magus through the Sacrament of Baptism, and yet it was declared to him that he had no part in the inheritance of Christ. Did he lack anything in respect of Baptism, of the Gospel, or of the Sacraments? Nay, but he was born in vain, in that he lacked charity" (*De B.* I. ch. x. 14). His regeneration was barren of spiritual life. "He was baptized," says St. Cyril, "but he was not illuminated; he washed his body indeed with the water, but did not illuminate his heart by the Spirit; his body truly descended and ascended, but his soul was not buried with Christ, nor with Him raised" (*Cat.* Praef. 2). But it was more than a still-born birth. The very Baptism, unworthily received, increased his guilt. To a heathen St. Peter would scarcely have said, "Thou art in the gall of bitterness, and in the bond of iniquity." His sin was the worse because he had become a Christian.

3. The matter of Baptism is water. Our Lord mentions it specifically as necessary: "Except a man be born of water and the Spirit" (John iii. 5). No other element is suggested in Holy Scripture, and it is particularly related that this was used at sundry Baptisms (John iii. 23; Matt. iii. 11, 16; Acts viii. 36, x. 47). Cleansing by water is even an expression synonymous with Baptism (Eph. v. 26; Heb. x. 22). The Fathers noticed in this connexion what a place water had in the baptismal types and prophecies of the Bible. "If," says St. Cyril, "anyone is anxious to know why the gift is given through water, and not through some other element, let him take up Holy Scripture and he shall learn. For water is a noble thing, and of the world's four visible elements the most beautiful" (*Cat.* iii. 5). "Water alone," says Tertullian, "a matter ever perfect, bright, simple, pure in its own nature, supplied a vehicle worthy of God" (*De B.* iii.).

Immersion appears to have been used where it could be had. St. John stationed himself on the banks of the Jordan, and then at Aenon, "because there was much water there" (John iii. 23), which would scarcely have been necessary for affusion. Our Lord came up "out of the water" after His Baptism (Matt. iii. 16). The eunuch went down "into the water" with St. Philip (Acts viii. 38). St. Paul's symbol of burial and resurrection only receive their full significance from immersion (Rom. vi. 4; Col. ii. 12). Such types as the Flood, and the passage of the Red Sea, and the dipping of Naaman, also suggest it. But, if this was the ordinary method, there is evidence that affusion or even sprinkling sufficed. It is doubtful whether there was any water at Jerusalem in which the 3000 could have been immersed; still more so whether immersion could have been practised in the house of Cornelius, or the prison at Philippi. When St. Cyprian was once consulted as to the validity of sprinkling, he referred to Ezek. xxxvi. 25, "Then will I sprinkle clean water upon you, and ye shall be clean," and to the sprinkling of Jewish rites (Num. viii., xix.), "whence," he says, "it is apparent that the sprinkling of water has like force with the saving washing" (*Ep.* lxix. 11, 12). Those who insist on immersion chiefly argue from the sense of *βάπτειν*, which is not used of Baptism, whereas the word which is used did not necessarily mean immersion, for the Pharisees marvelled that our Lord had not "baptized" (*ἐβαπτίσθη*) before dinner (Luke xi. 38).

Trine immersion or affusion is of course founded on the mention of the three Persons of the Trinity in the baptismal commission.

4. The formula of Baptism is derived from our Lord's direction to the Apostles to baptize "into the Name of the Father, and of the Son, and of the Holy Ghost." Zwingli maintained that no form was necessary (*De vera et falsa Relig.*), and Luther that it was enough to give or receive it in any Name of God (*De Capt. Bab.*). But the tradition of the Church is that the words of commission impose a necessity of naming the three Persons of the Blessed Trinity (Tert. *Adv. Prax.* xxvi.; Cyp. *Ep.* lxxiii. 6; Bas. *De Sp. S.* xii.). While this declares the faith and the sphere into which the person is regenerated, the obligation is probably owing to a deeper reason. Holy Scripture indicates that a special power is involved in the solemn naming of God (Num. vi. 27; Ps. xx. 1, Acts iii. 6, &c.). Origen, writing of the formula, speaks of "the Divinity of the power of the invocation of the adorable Trinity" (*In Joan.* t. vi.). So viewed, the recitation of the Name becomes a ministerial act, setting in motion the mysterious operation of God.

In the Acts there is mention of Baptism "in the Name of Jesus Christ" (ii. 38), "of the Lord Jesus" (viii. 16, xix. 5), "of the Lord" (x. 48); and the Vulgate, supported by the Syriac, renders viii. 12, "in nomine Jesu Christi baptizabantur." Although in none of the passages is there any literal report of the words said, such as that in iii. 6, they would naturally convey the impression that the formula of administration contained the phrase "in the Name of Jesus." The anonymous author of the *De Rebaptismate*, in the 3rd century, so understood them, and dwells at length on "the power of the Name of Jesus invoked upon a man by Baptism," defending the form as not contrary to the commission of Christ (*De Rebap.* 6, 7). But he bears testimony himself to the fact that the Church had not been wont so to baptize. Some reliance has been put on a passage in St. Ambrose, where he says it is sufficient to name one Person, if the faith in the Trinity is not denied thereby (*De Sp. S.* I. iii.); but he is probably speaking of the confession of the recipient, not of the formula. A few have maintained the validity of the disputed form of words (Bede, in Act. x.; Nic. I. *Ep.* xcvii. 104;

P. Lomb. iv. 3; Scotus, doubtfully, iv. ch. iii. 2); but the general verdict has been against it. A pure conjecture that it was allowed for a time, perhaps to give special honour to the despised Name, was thrown out by some late writers (De Lyra, in loco; Th. Aquin. *Summa*, IH. lxvi. 6; Lyndwood, i. tit. 7; De Burgo, II. ch. iii., Hostiensis, III. ch. xlii. 6). Still later it has been suggested that the words were incorporated into the formula as an addition, "In the Name of the Lord, I baptize thee," &c., or, "I baptize thee in the Name of the Father, and of His Son Jesus Christ," &c. (Corn. à Lap. on Rom. vi. 3; Trombelli, iv. 406). Neither is probable. If the usual interpretation is correct, that the naming of the Trinity was always essential, the phrases in the Acts must be taken to mean simply that it was "Christian" Baptism, in the formula indicated by the Lord's commission, that is, Baptism "into Christ" (Rom. vi. 3; Gal. iii. 27), or by the power of Christ (see Bingham, XI. ch. iii. 3; Moberly, *Great Forty Days*, App.).

5. When St. John foretold the Baptism of the Gospel, he spoke as though it would be administered personally by Christ Himself—"He shall baptize you" (Matt. iii. 11). The Baptisms of the Incarnate ministry were, however, by the hands of His "disciples" (John iv. 2), and the great commission of Baptism was given to men. St. Augustine frequently insists that the fact which the Baptist was to learn from the descent of the Holy Ghost upon Christ (John i. 33) was "that the power of the Lord's Baptism was not to pass from the Lord to any man, while its ministration plainly would do so" (*In Joan.* t. v. 11; *De B.* III. ch. iv. 6, VI., VII.). If this is questionable, the truth itself was clearly conveyed by the declaration with which our Lord closed the baptismal commission, "Lo, I am with you alway, even unto the end of the world" (Matt. xxviii. 20). His Presence was pledged to accompany those who went forth from Him to baptize. The minister of Baptism must therefore be the delegate of Christ, while in the highest sense He is Himself the one Baptizer.

The recipients of the baptismal commission were the Apostles. They were specially gathered together, apparently alone, for the purpose of receiving it (cp. Matt. xxvi. 32, xxviii. 7, 10; Mark xvi. 7). Even if others were present, which seems improbable, the terms of the commission would confine its reception to them, since the authority to baptize is made a result of that "power" which our Lord Himself received as Man, and then committed to the Apostles (John xx. 21). It was for them to transmit it to others as they handed on the orders of the ministry. The sacramental character of Baptism would mark it out as an office for the Apostles, even if the commission had not been so explicitly conveyed to them. There would, therefore, be no doubt that the minister of Baptism must be an ordained representative of Christ through the Apostles, were it not for a widespread sanction of lay Baptism in emergency, with high authority, at later periods of Church history. The result of bringing the matter to the test of apostolic practice is unsatisfactory. It is not said who baptized the 3000 on the Day of Pentecost. There is, however, no impossibility in supposing that the Apostles baptized them all in a day; and if others assisted, these at least had their direct commission for the purpose. Hilary the Deacon thought the Baptism of Cornelius and others, apparently by the "brethren from Joppa" (Acts x. 23, 48), a clear case of lay Baptism (*Com. in* 1 Cor. i. 17), but some of these "brethren" may have received ordination. So also may whoever baptized the disciples at Ephesus, if it was not St. Paul (Acts xix. 5). We know nothing of the position of Ananias, who baptized St. Paul himself (ix. 17, 18). The Apostolical Constitutions say that both he and Philip the Deacon baptized by a special Divine call (VIII. 46), but the narrative of Acts viii. seems fully to warrant Baptism by a Deacon. St. Paul baptized some at Corinth (1 Cor. i. 14, 16), probably St. Silas the rest (Acts xviii. 8), and one of them baptized Lydia and the jailor (xvi.). St. Paul's assertion that he was not sent to baptize (1 Cor. i. 17) cannot mean that to baptize did not belong to the apostolic office, but only that for particular reasons he usually forbore to do it. Lay Baptism has, therefore, no direct support *from* the N. T.; on the contrary, the evidence points rather against it. The main controversies on the subject lie outside a scriptural enquiry.

6. Rites and ceremonies find little place in the N. T., owing to the character of the Books and the circumstances of primitive Christianity. There could have been little ritual at the Baptisms on the Day of Pentecost, by the roadside to Gaza, or in the prison at Philippi. Subsequent rites were built upon scriptural expressions, but the expressions themselves can rarely be indicative of actual ceremonial in use by the Apostles. Some have understood St. Timothy's "good profession before many witnesses" (1 Tim. vi. 12) to have been a baptismal profession of faith (Chrys., Theoph., Amb., &c. *ad loc.*), and "the interrogation of a good conscience before God" (1 Pet. iii. 21) to allude to questions and pledges at Baptism (Waterland, Wordsworth, De Wette, &c.). Sponsors were common among the Jews, according to the Rabbis (Lightfoot, *Hor. Heb.* on Matt. iii.), and perhaps the Christians adopted the usage at once from them. The unction spoken of (2 Cor. i. 21; 1 John ii. 20, 27) was probably a real anointing with oil, but rather that belonging to Confirmation than the baptismal anointing of the early centuries. The "seal" (2 Cor. i. 22; Eph. i. 13, iv. 30; cp. Rev. vii. 3) is suggestive of the sign of the Cross, but does not prove its actual use as a baptismal ceremony. Other ritual was plainly borrowed from Scripture language. The exorcisms were taken from our Lord's casting out of devils (Matt. xvii. 18). The unclothing represented the putting off the old man with the deeds of sin (Eph. iv. 22; Col. iii. 9; see Cyr. Hieros. *Cat.* xx. 2; Chrys. *In Col.* Hom. vi. 4). The chrisom robe symbolised the "new man" (Eph. iv. 24), and the putting on of Christ (Gal. iii. 27). Lights signified the illumination of Baptism (Heb. vi. 4, x. 32). The salt was the symbol of holy life, from our Lord's words, "Ye are the salt of the earth" (Matt. v. 13; Mark ix. 49, 50). The milk and honey pointed to the inheritance in the land of promise (Ex. iii. 8). The special times for Baptism were founded upon Scripture symbolism and precedents: Easter because Baptism is into the Death and Resurrection of Christ; Pentecost

because of the descent of the Holy Ghost, and because the first Baptisms took place at that Feast (Tert. *De B.* xix.). The eves of these days were selected, because the Sabbath spoke of eternal rest in God's inheritance (Honorius, *Gemma Animae*, III. ch. cxvi.).

VIII. *Literature.*—Of Greek Fathers there are Basil, *De Spiritu Sancto* (the *De Bapt.* under his name is not his, and is of secondary value); Cyril of Jerus., *Catechesis;* Gregory Naz., *Oratio de Bapt. Christi;* Chrysostom, *Homilies;* John Damascene, *De Fide Orth.* IV. ix. Latin Fathers: Tertullian's and Pacian's *De Bapt.*; Ambrose, *De Sacramentis;* Augustine, *De Bapt.* and *De Bapt. Parvulorum.* Migne's *Pat. Lat.* has an admirable classified index, No. XCVI., on Baptism. Pusey's *Scriptural Views of Baptism* (originally *Tracts for Times*, Nos. 67 to 69, enlarged as *Doctrine of Baptism*) is invaluable for patristic comments on Scripture. The Commentaries of Corn. à Lapide and Wordsworth are both largely patristic. See also Suicer, *Thesaurus.* Of Schoolmen, Th. Aquinas, *Summa*, III. chs. xxxviii., xxxix., lxvi.–lxxi., is important. For extreme Protestant views see Zwingli, *De vera et falsa Religione;* Calvin, *Inst.* IV. chs. xv., xvi.; Luther, *De Capt. Bab.* In spite of unorthodox opinions, there is much of value in the *Loci Communes* of Chemnitz and Gerhard (Lutheran); Voss (Calvinistic), *De Bapt.*; Limborch (Arminian), *Theol. Christi.* Bellarmin, *De Bapt.*, on the other side, is good. Of English works, those by strongly anti-sacramental writers are only worth consulting for historical purposes. The views taken may be seen in Bp. Hopkins, *Doct. of Sacraments* and *Nature of Regeneration;* Faber, *Prim. Doctrine of Regeneration;* J. Scott, *Inquiry into effect of Baptism*, in answer to Mant. Among orthodox treatises are Barrow, *Of Baptism;* Leslie, *Water Baptism;* Mant, *Bampton Lect.* (reprinted as *Two Tracts*, etc.); Waterland, *Regeneration;* Bethell, *Doct. of Regeneration;* Mozley, *Review of the Baptismal Controversy;* Sadler, *Second Adam and New Birth* and *Sacrament of Responsibility.* Other works, dealing however with much outside Scripture, are Hooker, V. chs. lviii.–lxiv.; Trombelli, *De Sac.* tom. i.–v.; Macaire (Makary), *Théol. Dog.* IV. ch. iii.; Maskell, *Holy Baptism;* Grueber, *Sacrament of Regeneration.* On Infant Baptism, Wall's *History*, with Gale's *Reflections* in reply; Bp. J. Taylor, *Liberty of Prophesying*, xviii., and *Life of Christ*, I. ch. ix. 6; Thorndike, *Laws of Church*, vi.–viii. On the Minister, Laurence, *Lay Baptism Invalid;* Waterland and Kellsall, *Letters;* Elwin, *Minister of Baptism.* [W. E.]

BAR-ABBAS (Βαραββᾶς; *Barabbas;* Aram. בַּר־אַבָּא, Bar-Abba, son of the father, *i.e.* of the teacher or master, cp. Samuel Bar-Abba and Nathan Bar-Abba, quoted by Lightfoot, *Hor. Heb.* in loco). He is described as a notable prisoner, and as guilty of sedition and murder in Jerusalem itself. He is also called a robber (λῃστής, John xviii. 40); a term which gives another side of the life of the insurrectionary leaders common in Judaea under the Roman government. The term "robbers" is used by Josephus to describe the Zealots (*B. J.* iv. 3, § 4). Nothing is known of Barabbas and his sedition from other sources. It is conjectured that the two robbers crucified with Jesus may have been two of Barabbas' comrades in insurrection (συστασιασταί) mentioned (Mark xv. 7) as in prison at the time. A remarkable reading gives Barabbas the additional name of Jesus, Barabbas thus becoming merely a patronymic. In Matt. xxvii. 16, 17 "Jesus" is inserted before "Barabbas" by a few authorities. But "it is against all analogy that a true reading should be preserved in no better Greek MSS. than the common origin of the cursives 1, 118, 209, and in none of the *ancient* Versions." The most probable source of the reading is to be found in the repetition of ΙΝ from ΥΜΙΝ (Tregelles) in *v.* 17, in which verse alone Origen found it. His doubtful approval (*Comm. Matt.* in loc.) has given it notoriety, and Trench (*Studies on Gospels,*[2] p. 300), Keim, and others have uncritically followed Origen. See Tisch. *Ed. Crit.* viii.; and Westcott and Hort, *Greek Testament*, notes on select readings. [E. R. B.]

BA'RACHEL (בְּרַכְאֵל, Ges. = *God blesses*, Renan ['Les Noms Théophores,' &c. in *REJ.* v. 172] = *he who blesses God*; Βαραχιήλ; *Barachel*), "the Buzite," father of Elihu (Job xxxii. 2, 6). [BUZ.] MV.[11] compares the Phoenic. proper name ברך, the Palmyrene בולברך and בריכתא. [F.]

BARACHI'AH, Zech. i. 1, 7, A. V. ed. 1611, and other early editions. [BERECHIAH, 7.]

BARACHI'AS (Βαραχίας; *Barachias*), Matt. xxiii. 35. [ZACHARIAS.]

BA'RAK (בָּרָק, *lightning*, as in Ex. xix. 16; Βαράκ; *Barac:* cp. the family name of Hannibal, Barca = "fulmen belli." The name is found among the Phoenicians, Palmyrenes, and Sabaeans; see MV.[11]), son of Abinoam of Kedesh (Judg. iv. 6), a refuge-city in Mount Naphtali. He was incited by Deborah, a prophetess of Ephraim, to deliver Israel from the yoke of JABIN. Jabin ("prudent") was probably (Keil) the dynastic name of those kings of northern Canaan whose capital city was Hazor on Lake Merom. Sisera, his general and procurator, oppressed a promiscuous Gentile population (Is. ix. 1) at Harosheth, hence called "Harosheth *of the Gentiles.*" Accompanied, at his own express desire, by Deborah, Barak led his rudely-armed force of 10,000 men from Naphtali and Zebulon to an encampment on the summit of Tabor, where the 900 iron chariots of Jabin would be useless. The force was assembled in small divisions so as to avoid exciting suspicion (such seems to be the meaning of מְשֻׁךְ in Judg. iv. 6: cp. xx. 37; Ex. xii. 21). At a signal given by the prophetess, the little army, seizing the opportunity of a providential storm (Joseph. v. 5, § 4) and a wind that blew in the faces of the enemy, boldly rushed down the hill, and utterly routed the unwieldy host of the Canaanites in the plain of Jezreel (Esdraelon), "the battle-field of Palestine" (Stanley, *S. and P.* p. 331; Thomson, *Land and the Book*, i. 141, &c.). From the prominent mention of Taanach (Judg. v. 19) and of the river Kishon, it is most likely that the victory was partly due to the suddenly swollen waves

of that impetuous torrent (χειμάῤῥους, LXX.), particularly its western branch. The victory was decisive: Harosheth was taken (Judg. iv. 16), Sisera murdered, and Jabin ruined. A peace of forty years ensued, and the next danger came from a different quarter. The victors composed a splendid epinician ode in commemoration of their deliverance (Judg. v. Cp. Milman, *Hist. of Jews*,[4] i. 247, &c.).

The obedience of Barak to the command of Deborah entitled him to a place among the heroes of faith (Heb. xi. 32). His refusal to go unless Deborah accompanied him does not seem to have been due to any censurable motive. Deborah warns him that it will be said, "A woman conquered Sisera," but he knew that her presence would facilitate the victory. The Israelites, like the Messenians, would be likely to "fight the more bravely, because their seers were present" (Pausanias, iv. 16), and Barak was anxious for something better than his own honour.

It is difficult to decide the date of Barak. He appears to have been a contemporary of Shamgar (Judg. v. 6). If so, he could not have been so much as 178 years after Joshua, where he is generally placed. The Bishop of Bath and Wells supposes the narrative to be a variation of Josh. xi. 1-12 (*Genealogies*, p. 228 sq. Cp. Stade, *Gesch. d. Volkes Israel*, i. 178, n. 1). A great deal may be said for this view: the names Jabin and Hazor; the mention of subordinate kings (Judg. v. 19; cp. Josh. xi. 2 sq.); the general locality of the battle; the prominence of chariots in both narratives, and especially the name Misrephoth-maim (Josh. xi. 8, a spot in 'Ain Meserfe; see Dillmann[2] in loco). Many chronological difficulties are also thus removed; but it is fair to add that in Stanley's opinion (*S. and P.* p. 392, note) there are geographical difficulties in the way. Keil and Edersheim (*Bible History*, ii. 120) place a hundred years between the events described in Joshua and Judges; Riehm (*HWB.* s. n.) and Ruetschi (Herzog, *RE.*[2] s. n.) consider these events distinct. Cp. Ewald, *Gesch. des Volkes Israel*,[2] ii. p. 489, &c.; Lord A. Hervey *Genealogies*, pp. 225-246 *sq.*) [DEBORAH.] [F. W. F.]

BARBARIAN (βάρβαρος). Πᾶς μὴ Ἕλλην βάρβαρος is the common Greek definition, quoted by Serv. *ad* Verg. *Aen.* ii. 504; and in this strict sense the word is used in Rom. i. 14, "I am debtor both to Greeks and barbarians;" where Luther used the term *Ungrieche*, which happily expresses its force. Ἕλληνες καὶ βάρβαροι is the constant division found in Greek literature, but Thucydides (i. 3) points out that this distinction is subsequent to Homer, in whom the word does not occur, although he terms the Carians βαρβαρόφωνοι (*Il.* ii. 867, where Eustathius connects the other form Κάρβανος with Κάρ). At first, according to Strabo (xiv. 662), the word "barbarian" was a sneering onomatopoeia applied to those who pronounced their words imperfectly (κατ' ὀνοματοποιίαν ἐπὶ τῶν δυσεκφόρως καὶ σκληρῶς καὶ τραχέως λαλούντων), and its generic use was subsequent. It often retains this primitive meaning, as in 1 Cor. xiv. 11 (of one using "the tongue") and Acts xxviii. 24 (of the Maltese, who spoke a Punic dialect. In Acts xxviii. 2 the A. V. "barbarous people" is replaced in the R. V. by "barbarians"). So too Aesch. *Agam.* 2013, χελιδόνος δίκην Ἄγνωτα φωνὴν βάρβαρον κεκτημένη: and it is even applied to one who spoke a patois, ἅτε Λέσβιος ὢν καὶ ἐν φωνῇ βαρβάρῳ τεθραμμένος, Plat. *Protag.* 341 C. It is not so strong a word as παλίγγλωσσος (Donaldson, *Crat.* § 88). Ovid defines the word in the often-quoted line:

> "Barbarus hic ego sum *quia non intelligor ulli*."
> (*Trist.* v. 10, 37.)

The ancient Egyptians (like the modern Chinese) had an analogous word for all τοὺς μὴ σφισιν ὁμογλώσσους (Herod. ii. 158); and βάρβαρος is used in the LXX. to express a similar Jewish distinction. Thus in Ps. lxiii. 1, λάος βάρβαρος is used to translate לְלַעַז, "peregrino sermone utens" (Schleusn. *Thes.* s. v.), which is also an onomatopoeian from לָעַג, "to stammer." In 1 Cor. v. 13, 1 Tim. iii. 7, we have οἱ ἔξω, and Matt. vi. 32, τὰ ἔθνη, used Hebraistically for גּוֹיִם (in very much the same sort of sense as that of βάρβαροι), to distinguish all other nations from the Jews (cp. Col. iii. 11); and in the Talmudists we find Palestine opposed to אַרְצוֹת, just as Greece was to Barbaría or ἡ βάρβαρος (cf. Cic. *Fin.* ii. 15; Lightfoot, *Centuria Chorogr.* ad init.). And yet so completely was the term βάρβαρος accepted, that even Josephus and Philo scruple as little to reckon the Jews among "barbarians" (*Antt.* xi. 7, § 1; Philo, *Leg. Allegg.* iii. 67, 1), as the early Romans did to apply the term to themselves ("Demophilus scripsit, Marcus vertit *barbare*;" Plaut. *Asin.* prol. 10). Very naturally the word after a time began to involve notions of cruelty and contempt (θηρὸς βαρβάρου, 2 Macc. iv. 25, xv. 2, &c.), and then the Romans excepted themselves from the scope of its meaning (Cic. *de Rep.* i. 37, § 68). Afterwards only the savage nations were called barbarians; though the Greek Constantinopolitans called the Romans "barbarians" to the very last (Gibbon, c. 51, vi. 351, ed. Smith; Winer, *s. v.*). [F. W. F.]

BARHU'MITE, THE. [BAHURIM.]

BARI'AH (בָּרִיחַ = *fleet*; A. Βερία, B. Μαρει; *Baria*), one of the sons of Shemaiah, a descendant of the royal family of Judah (1 Ch. iii. 22). [W. A. W.]

BAR-JE'SUS. [ELYMAS.]

BAR-JO'NA. [PETER.]

BAR'KOS (בַּרְקוֹס; *Bercos*). "Children of Barkos" were among the Nethinim who returned from the Captivity with Zerubbabel (Ezra ii. 53, [2 Esd.] B. Βαρκούς, A. Βαρκός; Neh. vii. 55, Βαρκουέ). [W. A. W.] [F.]

BARLEY (שְׂעֹרָה, *se'ôrah*; κριθή; *hordeum*), the well-known useful cereal, mention of which is made in numerous passages of the Bible. Pliny (*H. N.* xviii. 7) states that barley is one of the most ancient articles of diet. It was grown by the Egyptians (Ex. ix. 31; Herod. ii.

77; Diodor. i. 34; Plin. xxii. 25), and by the Jews (Lev. xxvii. 16; Deut. viii. 8; Ruth ii. 17, &c.), who used it for baking into bread, chiefly amongst the poor (Judg. vii. 13; 2 K. iv. 42; John vi. 9, 13); for making into bread, by mixing it with wheat, beans, lentiles, millet, &c. (Ezek. iv. 9); for making into cakes (Ezek. iv. 12); as fodder for horses (1 K. iv. 28). Compare also Juvenal (viii. 154) and Pliny (*H. N.* xviii. 14; xxviii. 21), who states that though barley was extensively used by the ancients, it had in his time fallen into disrepute, and was generally used as fodder for cattle only. Barley is the common food for horses in the East. Oats and rye were not cultivated by the Jews, and perhaps not known to them. [RYE.] (See also Kitto, *Phys. H. of Pal.* 214.) Barley is mentioned in the *Mishna* as the food of horses and asses.

It is the most universally cultivated cereal in the world, having a more northerly as well as southerly range than wheat. It is less impatient of drought, and will thrive in a much lighter soil. It arrives earlier at maturity, requiring less heat to ripen it, and yet is uninjured by a tropical sun. It will also yield much longer on the same land, without rotation of crops. There is consequently no part of Palestine where it is not the most ordinary grain.

The barley harvest is mentioned in Ruth i. 22, ii. 13; 2 Sam. xxi. 9, 10. It takes place in Palestine in March and April, and in the hilly districts as late as May; but the period of course varies according to the localities where the corn grows. The barley harvest always precedes the wheat harvest, generally by not less than three weeks (Robinson, *Bib. Res.* ii. 99, 278). In Egypt, the barley is about a month earlier than the wheat; whence its total destruction by the hail-storm (Ex. ix. 31). Barley was sown at any time between November and March, according to the season. Niebuhr states that he saw a crop near Jerusalem ripe at the end of March, and a field which had been just newly sown. But this must have been exceptional. The seed-time depends upon the time of "the former" or winter rains. As soon as ever the ground is thoroughly softened, the barley and wheat are both sown, and this may be as early as the first week of November, or as late as Christmas. The low grounds are frequently irrigated, where the means exist for so doing. Very little labour is expended on the cultivation. After the wooden plough has scratched the moist soil, the seed is cast in, and covered over by means of a rude brush-harrow. The yield consequently is very light. Except on the rich alluvial plains, it does not appear to exceed twenty bushels per acre.

In the Jordan valley, the barley harvest is over by the end of March, and I have eaten a barley cake in that month at Jericho, made from a crop which I had seen sown in December. In the plain of Seisaban (Shittim), I saw the Arabs in April dibbling maize into ground they had just cleared of barley. Generally speaking, the time of barley harvest coincided with that of the Passover, and it was a date to fix the time of year, as we should speak of Eastertide.

Major Skinner (*Adventures in an Overland Journey to India*, i. 330) observed near Damascus a field, newly sown with barley, which had been submitted to submersion similar to what is done to rice-fields. Dr. Royle (Kitto's *Cycl. Bib. Lit.*, art. "Barley") with good reason supposes that this explains Is. xxxii. 20, "Blessed are ye that sow beside all waters;" and demurs to the explanation which many writers have given, viz. that allusion is made to the mode in which *rice* is cultivated. We cannot, however, at all agree with this writer, that the passage in Eccles. xi. 1 has any reference to the irrigation of newly-sown barley fields. Solomon in the context is enforcing obligations to liberality, of that especial nature which looks not for a recompense: as Bishop Hall says, "Bestow thy beneficence on those from whom there is no probability of a return of kindness." It is clear that, if allusion is made to the mode of culture referred to above, either in the case of rice or barley, the force and moral worth of the lesson is lost; for the motive of such a sowing is expectation of an abundant return. The meaning of the passage is surely this: "Be liberal to those who are as little likely to repay thee again, as bread or corn cast into the pool or the river is likely to return again unto thee" (see *Speaker's Comm.* and Wright's *Ecclesiastes* in loco). Barley, as an article of human food, was less esteemed than wheat, but the poor usually mix wheat and barley meal for their bread. This would appear to have been the custom in ancient times, for, from 2 Ch. ii. 10, we learn that Solomon supplied equal quantities of wheat and barley to the woodmen in Lebanon. But barley bread alone is very poor diet, as we have found when compelled to live on it in remote parts of the country, and is much inferior in nutritive qualities to wheat or rye. [BREAD.] Compare also Calpurnius (*Ecl.* iii. 84), Pliny (*H. N.* xviii. 7), and Livy (xxvii. 13), who tells us that the Roman cohorts who lost their standards were punished by having barley-bread given them instead of wheaten. The Jews, according to Tract. *Sanhedr.* c. 9, § 5, had the following law: "Si quis loris caesus reciderit jussu judicum arcae inditus *hordeo cibatur*, donec venter ejus rumpatur." That barley bread is even to this day little esteemed in Palestine, we have the authority of modern travellers to show. Dr. Thomson (*The Land and the Book*, p. 449) says, "Nothing is more common than for these people to complain that their oppressors have left them nothing but *barley bread* to eat." This fact is important, as serving to elucidate some passages in Scripture. Why, for instance, was *barley* meal, and not the ordinary meal-offering of *wheat* flour, to be the jealousy-offering (Num. v. 15)? Because thereby is denoted the low reputation in which the implicated parties were held. The homer and a half of barley, as part of the purchase-money of the adulteress (Hos. iii. 2), has doubtless a similar typical meaning. With this circumstance in remembrance, how forcible is the expression in Ezekiel (xiii. 19), "Will ye pollute me among my people for handfuls of *barley*?" And how does the knowledge of the fact aid to point out the connexion between Gideon and the barley-cake, in the dream which the "man told to his fellow" (Judg. vii. 13). Gideon's family was poor in Manasseh, and he was the least in his father's house;

and doubtless the Midianites knew it. Again, the Israelites had been oppressed by Midian for the space of seven years. Very appropriate, therefore, is the dream and the interpretation thereof. The despised and humble Israelitish deliverer was as a mere vile barley-cake in the eyes of his enemies. On this passage Dr. Thomson remarks, "If the Midianites were accustomed in their extemporaneous songs to call Gideon and his band '*cakes of barley bread*,' as their successors, the haughty Bedawîn, often do to ridicule their enemies, the application would be all the more natural." That barley was cultivated abundantly in Palestine, is clear from Deut. viii. 8; 2 Ch. ii. 10, 15.

The cultivated barleys are usually divided into "two-rowed" and "six-rowed" kinds. Of the first the *Hordeum distichum*, the common summer barley of England, is an example; while the *H. hexastichum*, bere, or winter barley of farmers, will serve to represent the latter kind. The kind usually grown in Palestine is the *H. distichum*. It is too well known to need further description.* [W. H.] [H. B. T.]

BAR-NABAS (Βαρνάβας; *Barnabas*). His name was Joseph (Joses is another form of the same name), and he had the additional name of Barnabas given him by the Apostles (Acts iv. 36). Barnabas = Aram. בַּר־נְבוּאָה, son of prophecy (but see Ewald, *Hist. Isr.* vii., for another derivation). The name is explained in Acts *l. c.* as "the son of exhortation" (R. V.), probably because this was a principal department of the work of N. T. prophets; see, for example, Acts xv. 32. But A. V., following Vulgate, translates "the son of consolation." He belonged to a Levite family settled in Cyprus, but had kindred living at Jerusalem, namely, his cousin John Mark (Col. iv. 10; see Bp. Lightfoot's note), and Mary the mother of Mark, whose house was a centre of worship for the Christians (Acts xii. 12). His life falls under three divisions—

1. The first period reaches to his mission from Antioch (Acts xiii. 2).

2. The second begins with that mission and closes with his separation from St. Paul (Acts xv. 39).

3. The third, embracing the rest of his life, is almost a blank.

1. He is singled out for mention among those who sold land and brought the price into the common stock (Acts iv. 36, 37). He has a leading position in the Church at Jerusalem, for, when Saul at his first visit after conversion is received with mistrust, Barnabas is able to introduce him to the Apostles (Peter and James only, Gal. i. 19), and his assurances regarding him are accepted (Acts ix. 26–28). At the news of the conversion of the Gentiles (Ἕλληνες) at Antioch, Barnabas is sent to investigate and to carry on the work. Its importance leads him to fetch Saul from Tarsus and use his assistance. A whole year is spent by the two friends in founding the Church of Antioch (Acts xi. 22–26). The connexion of Barnabas with Cyprus, so near Tarsus and Antioch, may account for the previous knowledge of Saul of Tarsus apparently implied in Acts ix. 26; and also in part for his selection for the mission to Antioch,—in part only, for his personal qualifications are expressly mentioned (Acts xi. 24). At some time during the year's stay we must place his mission with Saul to Jerusalem to carry contributions in view of the prophesied famine. On their return to Antioch they were accompanied by Mark (Acts xii. 25).

2. By the command of the Spirit, Barnabas and Saul are set apart for missionary work, and sail from Seleucia to Cyprus (Acts xiii. 1 sq.). The commission and journey are fully described under art. PAUL. It is enough to notice that the choice of Mark as their attendant (ὑπηρέτης), and of Cyprus as their first destination, was probably due to Barnabas. They both returned to Antioch at the end of the journey, and spent some time with the disciples. Barnabas was now thoroughly domiciled at Antioch, and devoted to the interests of Gentile missions. Thus he withstands the Judaising emissaries (Acts xv. 2), and is sent with Paul to represent the Gentile cause at the Council of Jerusalem. On their way and on their arrival at Jerusalem they relate the conversion of the Gentiles; and in company with Judas and Silas they bring back the letter which confirms the freedom of the Syrian and Cilician Churches from the Mosaic law. An incident now occurs which is entirely omitted in the Acts. Certain brethren (τινὲς) came from James to Antioch, whose influence led Peter, then visiting Antioch, to refuse to eat with Gentile Christians (see Ewald, *Hist. Israel*, vii. in loco). This was dissimulation, for St. Peter had been taught not to regard any man as common or unclean (Acts x. 28). By this dissimulation Barnabas, who was equally aware of the truth, was carried away (Gal. ii. 13). The distrust engendered by his conduct may have prepared the way for the dissension between Paul and Barnabas which shortly afterwards led to their separation (Lightfoot, *Gal.* ii. 13, note). But the immediate occasion was the wish of Barnabas to take as their companion his cousin Mark, who had deserted them on the former journey. A sharp contention separated the two friends, and henceforward Silas takes the place of Barnabas as Paul's comrade (Acts xv. 36 sq.).

3. Barnabas sails to Cyprus with Mark, and we hear no more of him. A single verse (1 Cor. ix. 6) implies that at the date of that Epistle he was still active, and, like St. Paul, labouring for his own maintenance.

Three questions remain for consideration. (*a*) The first is the relation between Paul and Barnabas. Paul seems to have owed to Barnabas much of that impulse and guidance which he denies having owed to the other Apostles. Barnabas, following up the work of his countrymen, the Cyprians in Antioch, seems to have been the first to organise serious missionary endeavours among Gentiles, and the first to set Paul to this work (Acts xi. 25, 26). His former position at Jerusalem enabled him to get a favourable hearing at Jerusalem for Gentile missions, which, humanly speaking, Paul could scarcely have obtained. He was, as Hefele was

* The Hebrew word שִׁבֹּלֶת is derived from שׁשׁר, *horrere*; so called from the long rough awns which are attached to the husk. Similarly, *hordeum* is from *horrere*.

points out, trusted by both sides. But early in their journey Paul takes the lead, as is sufficiently indicated by the change of order from "Barnabas and Saul" to "Paul and Barnabas" after their departure from Cyprus. There are only three exceptions, which all admit of explanation (Herzog, *RE.*[2] s. n. Barnabas). (*b*) The next question is the apostleship of Barnabas. The title is clearly given to him (Acts xiv. 4 and 14). The true reading ἀπὸ (Acts iv. 36) cannot bear on the question, as it means the same as ὑπό. He is recognised by James, Cephas, and John as holding, together with Paul, the same position towards the Gentiles, as they themselves held towards "the circumcision" (Gal. ii. 9). Paul classes him with himself among the Apostles (1 Cor. ix. 5, 6). He has the same commission and consecration as Paul (Acts xiii. 2, 3); but the previous qualification of having seen the Lord (1 Cor. ix. 1) is in his case not related, though highly probable. (*c*) The third question is the genuineness of the Epistle attributed to Barnabas. This is scarcely in the province of this article. The external testimony is extremely favourable, while the internal testimony is extremely unfavourable. Though Pauline in some respects, and moreover akin in spirit to the Epistle to the Hebrews (attributed to Barnabas by Tertullian), it is alien to apostolic teaching in its view of the Old Testament. It abrogates all the truth and worth of the earlier dispensation, and reduces it to a riddle.' Such a work can hardly have proceeded from Barnabas the Apostle. See an admirable survey in Westcott, *Canon of N. T.* I. iv., and art. "Barnabas" in *Dict. of Christ. Biog.*, which however concludes that Barnabas may perhaps have been the author. The extra-biblical sources for the life of Barnabas are utterly untrustworthy. They are (1) Journeys and Martyrdom of St. Barnabas the Apostle (Tischendorf, *Acta Apost. Apoc.* p. 64; Lipsius, *Die Apokryphen Apostelgeschichten u. Apostellegenden*, ii. 2, pp. 270–320). Even Braunsberger regards this work as written by a heretic to support a mystical theology (*einer geheimen Lehre*), and the early sections of the narrative substantiate his view. The incidents and language are in some places a mere cento from the Acts of the Apostles. (2) The encomium of the monk Alexander printed in *Acta Sanctorum*, xi. Jun. It is probably a work of the 6th cent., and is independent of (1). According to Alexander, Barnabas was stoned and burnt: his body, unconsumed by the fire, was buried in a cave and discovered afterwards by revelation. (3) The pseudo-Clementine Homilies describe Barnabas as preaching at Alexandria, and claim him as one of the Petrine school; a curious contradiction of the attitude which he is made to assume in the Epistle of Barnabas.

Literature.—Tillemont (*Mémoires*, i. art. Barnabas, and notes in the same vol.) gathers and investigates fully traditional and patristic notices of Barnabas. The principal modern works are Hefele, *Das Sendschreiben des Ap. Barn.* (Einleitung), and Braunsberger, *Der Ap. Barnabas*, a very complete monograph (cp. also the list given *e.g.* in Kurtz, *Lehrb. d. Kirchengeschichte*,[9] § 30, 3). On Barnabas as a possible author of the Epistle to the Hebrews, see Wieseler, *Chronologie*, bk. ii. Appendix, p. 479 sq. [E. R. B.]

BARO'DIS (Βαρωδείς; *Rahotis*), a name inserted in the list of those "servants of Solomon" who returned with Zerubbabel (1 Esd. v. 34). There is no corresponding name in the list of Ezra or Nehemiah. [W. A. W.]

BAR-SABAS. [JOSEPH BARSABAS; JUDAS BARSABAS.]

BAR'TACUS (Βαρτάκος; *Bezuc*), the father of Apame, the concubine of king Darius (1 Esd. iv. 29). "The admirable" (ὁ θαυμαστὸς) was probably an official title belonging to his rank. The Syriac Version has ארשׁק, a name which recalls that of Artachaeas (Ἀρταχαίης), who is named by Herodotus (vii. 22, 117) as being in a high position in the Persian army under Xerxes, and a special favourite of that king (Simonis, *Onom.*; Smith's *Dict. of Biog.* i. 369). See *Speaker's Comm.* on 1 Esd. iv. 29. [W. A. W.]

BAR-THOLOMEW (Βαρθολομαῖος, i.e. בַּר תַּלְמַי, son of Talmai; *Bartholomaeus*. The Heb. *Talmai* is represented by Θολομαί, LXX. 2 Sam. xiii. 37, Cod. Alex. Talmai occurs in five other passages: see TALMAI; cp. also Θολομαῖος, Josephus, *Ant.* xx. 1, § 1. Edersheim, *Messiah*, i. 521, derives the name from Bar-Telamjon). Bartholomew appears in all the four lists of the Apostles (Matt. x. 3; Mark iii. 18; Luke vi. 14; Acts i. 13), and in nearly the same place; namely, second or third in the second quaternion. For the identification of Bartholomew with Nathanael, see NATHANAEL. Euseb. (*H. E.* v. 10) says that Pantaenus went as missionary to the Indians, and found in their possession the Gospel of St. Matthew in Hebrew which had been left there by Bartholomew. Mosheim (*de Rebus Christianis Comm.* p. 206) contends that the Indians to whom Pantaenus went were Jews in Arabia Felix, as a Gospel in Hebrew would have been useless to Indians. Bp. Lightfoot (*Colossians*, p. 392) inclines to understand Ethiopia. Amrus, translated by Assemani (*Bibl. Orient.* III. ii. 20), says, "He (Bartholomew) preached in Greater Armenia; however, he did not stop there, but he took himself to the regions of the Indians, and was there flayed." Cp. Lipsius, *Die Apokryphen Apostelgeschichten u. Apostellegenden*, ii. 2, pp. 54–108. [E. R. B.]

BAR-TIMAEUS (Βαρτιμαῖος; *Bartimaeus*), a blind beggar healed by our Lord near Jericho. The apparent discrepancies in the story cannot be fully discussed here, but they are mainly these. St. Matthew (xx. 29–34; see note in *Speaker's Comm.*) mentions two blind men; St. Mark (x. 46–52) and St. Luke (xviii. 35–43) only one. St. Luke places the miracle at the entrance to Jericho; St. Matthew and St. Mark, at the departure from it. A method of harmonising the narratives is suggested in Trench, *Miracles*, § 30. St. Mark alone gives the name of the man and that of his father, according to his custom of recording minute particulars of persons (see for parallels, Westcott, *Introd. to the Gospels*,[5] ch. vii. p. 364). In the Greek the description "son of Timaeus" precedes the proper name Bartimaeus, and therefore the objection to the words as an unnecessary explanation of the name does not hold good. Hitzig, quoted by Keim, tries to discredit the miracle by deriving Τιμαῖος from a

Syriac word meaning "blind." For possible derivations, see Lightfoot (*Hor. Heb.*) on the verse. [E. R. B.]

BA'RUCH (בָּרוּךְ, *blessed = Benedict*; Βαρούχ; Joseph. Βαροῦχος; *Baruch*). **1.** Son of Neriah, the friend (Jer. xxxii. 12), amanuensis (Jer. xxxvi. 4 ff., 32), and faithful attendant of Jeremiah (Jer. xxxvi. 10 sq.; Joseph. *Ant.* x. 6, § 2; B.C. 603) in the discharge of his prophetic office. He was of a noble family (Joseph. *Ant.* x. 9, § 1, ἐξ ἐπισήμου σφόδρα οἰκίας; cp. Jer. li. 59; Bar. i. 1, *De tribu Simeon*, Vet. Lat.), and of distinguished acquirements (Joseph. *l. c.* τῇ πατρῴῳ γλώττῃ διαφερόντως πεπαιδευμένος); and his brother Seraiah held an honourable office in the court of Zedekiah (Jer. li. 59). His enemies accused him of influencing Jeremiah in favour of the Chaldaeans (Jer. xliii. 3; cp. xxxvii. 13); and he was thrown into prison with that prophet, where he remained till the capture of Jerusalem, B.C. 586 (Joseph. *Ant.* x. 9, § 1). By the permission of Nebuchadnezzar he remained with Jeremiah at Masphatha (Joseph. *l. c.*), but was afterwards forced to go down to Egypt with "the remnant of Judah, that were returned from all nations" (Jer. xliii. 6; Joseph. *Ant.* x. 9, § 6). Nothing is known certainly of the close of his life. According to one tradition he remained in Egypt till the death of Jeremiah, and then retired to Babylon, where he died in the 12th year after the destruction of Jerusalem (Bertholdt, *Einl.* p. 1740 n.). Jerome, on the other hand, states, "on the authority of the Jews" (*Hebraei tradunt*), that Jeremiah and Baruch died in Egypt "before the desolation of the country by Nabuchodonosor" (*Comm. in Is.* xxx. 6, 7, p. 405. See Gifford, Introd. to Baruch, § ii., in *Speaker's Comm.*). [B. F. W.] [R.]

2. The son of Zabbai, who assisted Nehemiah in rebuilding the walls of Jerusalem (Neh. iii. 20).

3. A priest, or family of priests, who signed the covenant with Nehemiah (Neh. x. 6).

4. The son of Col-hozeh, a descendant of Pharez, the son of Judah (Neh. xi. 5). [W. A. W.]

BA'RUCH, THE BOOK OF, is remarkable as the only book in the Apocrypha which is formed on the model of the Prophets; and though it is wanting in originality, it presents a vivid reflection of the ancient prophetic fire. It may be divided into two main parts—i.-iii. 8, and iii. 9–end. The first part consists of an Introduction (i. 1–14), followed by a confession and prayer (i. 15–iii. 8). The second part opens with an abrupt address to Israel (iii. 9–iv. 30), pointing out the sin of the people in neglecting the divine teaching of Wisdom (iii. 9–iv. 8), and introducing a noble lament of Jerusalem over her children, through which hope still gleams (iv. 9–30). After this the tone of the book again changes suddenly, and the writer addresses Jerusalem in words of great joy, and paints in the colours of Isaiah the return of God's chosen people and their abiding glory (iv. 30–v. 9).

1. The book at present exists in Greek, and in several translations which were made from the Greek. The two classes into which the Greek MSS. may be divided do not present any very remarkable variations (Fritzsche, *Einl.* § 7). [The Uncial MSS. which contain the book are the Codex Vaticanus (B. = II.), Codex Alexandrinus (A. = III.), Codex Marchalianus (XII.), Codex Venetus (23). Twenty-two cursive MSS. are recorded in Holmes and Parsons' edition of the LXX. as preserving the text of Baruch. Of these, Codd. 22 and 233 are considered by Field and Lagarde to present Lucian's Recension of the LXX. A Hexaplaric Recension is given in the Syriac Version published by Ceriani (*Monumenta sacra et profana*, &c., Mediolan. 1861); this translation is said to have been made early in the 7th cent. by Paulus, bishop of Tela.—R.] Of the two Old Latin Versions which remain, the one (*Vet. Lat.* a) which is incorporated in the Vulgate (not translated by Jerome) is generally literal; the other (published by Jos. Caro, Rom. 1688, and reproduced from three MSS. by Sabatier) is more free. The vulgar Syriac and Arabic follow the Greek text closely (Fritzsche, *l. c.*). [For a full description of the Versions, see Kneucker (*Das Buch Baruch*, Leipz. 1879).]

2. The assumed author of the book is undoubtedly the companion of Jeremiah, though Jahn denied this; but the details are inconsistent with the assumption. If the reading in i. 1 be correct (ἔτει; cp. 2 K. xxv. 8), it is impossible to fix "*the fifth year*" in such a way as to suit the contents of the book, which exhibits not only historical inaccuracies, but also evident traces of a later date than the beginning of the Captivity (i. 3 sq.; iii. 9 sq.; iv. 22 sq. Cp. 2 K. xxv. 27).

3. The book was held in little esteem among the Jews (Hieron. *Praef. in Jerem.* p. 834 "...nec habetur apud Hebraeos;" Epiph. *de Mens. et Pond.* § 5, οὐ κεῖνται ἐπιστολαὶ (Βαρούχ) παρ' Ἑβραίοις); though it is stated in the Greek text of the Apostolical Constitutions that it was read, together with the Lamentations, "on the tenth of the month Gorpiaeus" (*i.e.* the day of Atonement; *Const. Ap.* v. 20, 1). But this reference is wanting in the Syriac Version (Bunsen, *Anal. Ante-Nic.* ii. 187), and the assertion is unsupported by any other authority. There is no trace of the use of the book in the New Testament, or in the Apostolic Fathers, or in Justin. It is first found quoted in the writings of Athenagoras, *Suppl.* c. 9, προφήτης, Bar. iii. 35. But from the time of Irenaeus it was frequently quoted both in the East and in the West, and generally as the work of Jeremiah (Iren. *adv. Haer.* v. 35, 1; *significavit Jeremias*, Bar. iv. 36—v.; Tertull. *c. Scorp.* viii. *Hieremiae*, Bar. (Epist.) vi. 3 sq.; Clem. *Paed.* i. 10, § 91, διὰ Ἱερεμίου, Bar. iv. 4; id. *Paed.* ii. 3, § 36, θεία γραφή, Bar. iii. 16–19; Orig. *ap.* Euseb. *H. E.* vi. 25, Ἱερεμίας σὺν θρήνοις καὶ τῇ ἐπιστολῇ (?); *Homil. in Jerem.* vii. 3, γέγραπται, Bar. iii. 9–13; *Sel. in Jerem.* c. xxxi. γέγραπται ἐν τῷ Βαρούχ, Bar. iii. 10; Cypr. *Test. Lib.* ii. 6, *apud Hieremiam*, Bar. iii. 35; *Orat. Dom. per Hieremiam*, Bar. (Epist.) vi. 5, &c.). It was, however, "obelized" throughout in the LXX. as deficient in the Hebrew (*Cod. Chis.* ap. *Daniel*, &c., Romae, 1772, p. xxi.). On the other hand it is contained as a separate book in the Pseudo-Laodicene Catalogue, and in the Catalogues of Cyril of Jerusalem, Athanasius, and Nicephorus; but it is not specially mentioned in the Conciliar catalogues of Carthage and Hippo, probably as being included under the title Jeremiah (cp. [Athan.] *Syn. S. Script.* ap. Credner,

Zur Gesch. des Kan. 138; Hilar. *Prol. in Psalm.* 15). It is omitted by those writers who reproduced in the main the Hebrew Canon (*e.g.* Melito, Gregory Nazianzen, Epiphanius). Augustine quotes the words of Baruch (iii. 16) as attributed "more commonly to Jeremiah" ("quidam . . . scribae ejus attribuerant . . . sed Jeremiae celebratius habetur:" *de Civ.* xviii. 33), and elsewhere uses them as such (*c. Faust.* xii. 43). At the Council of Trent Baruch was admitted into the Romish Canon; but the Protestant Churches have unanimously placed it among the apocryphal books, though Whiston maintained its authenticity (*l. c.* infra). [Miles Coverdale in his first edition, 1535, printed Baruch after Jeremiah, and not as one of the Apocrypha; in his second edition, 1550, he placed it among the Apocrypha. It may be noted that Baruch was not included in the list of the apocryphal books contained in the first (Latin) edition (1562) of the XXXIX. Articles. It was probably still regarded as part of the Book of Jeremiah. In 1571 it was finally placed among the Apocrypha.—R.]

4. Considerable discussion has been raised as to the original language of the book. Those who advocated its authenticity generally supposed that it was first written in Hebrew (Huet, Dereser, &c.; Jahn is undecided; Bertholdt, *Einl.* p. 1755), and this opinion found many supporters (Bendtsen, Grüneberg, Movers, Hitzig, De Wette, *Einl.* § 323). Others again have maintained that the Greek is the original text (Eichhorn, *Einl.* p. 388 sq.; Bertholdt, *Einl.* p. 1757; Hävernick, *ap.* De Wette, *l. c.*). The truth appears to lie between these two extremes. The two divisions of the book are distinguished by marked peculiarities of style and language. The Hebraic character of the first part (i.–iii. 8) is such as to mark it as a translation, and not as the work of a Hebraizing Greek: *e.g.* i. 14, 15, 22; ii. 4, 9, 25; iii. 8; and several obscurities seem to be mistranslations: *e.g.* i. 2, 8; ii. 18, 29. The second part, on the other hand, which is written with greater freedom and vigour, closely approaches the Alexandrine type. And the imitations of Jeremiah and Daniel which occur throughout the first part (cp. i. 15–18 = Dan. ix. 7–10; ii. 1, 2 = Dan. ix. 12, 13; ii. 7–19 = Dan. ix. 13–18) give place to the tone and imagery of the Psalms and Isaiah.

[A point which for a long time had apparently been overlooked by commentators convincingly illustrates the duality of authorship. The titles of the Deity in the two portions of the book are distinct. The Name "Lord" (*κύριος*) occurs twenty-six times in the first portion of the book, for the last time in ch. iii. 6. The Name "the Lord God" (*κύριος ὁ θεὸς*) occurs nineteen times in the first portion of the book, for the last time in ch. iii. 8. The Name "God" (*θεὸς*) occurs during the first portion once in a quotation (ii. 35), and once in iii. 4, where the reading seems very doubtful. In the second portion of the book the Name "God" occurs thirty-one times (*ὁ θεὸς* twenty-seven and *θεὸς* four times); but never the Name "Lord" or "the Lord God." The more unusual titles of "the Eternal One" (*ὁ αἰώνιος*) and "the Holy One" (*ὁ ἅγιος*) occur, the former eight, the latter three times in the second portion, but not at all in the first. That we have to do here with two different documents would seem to be the natural conclusion to be drawn (see Gifford on Baruch, *Speaker's Commentary*, Apocr. ii. 253, 1888).]

5. The most probable explanation of this contrast is gained by supposing that some one thoroughly conversant with the Alexandrine translation of Jeremiah, perhaps the translator himself (Hitzig, Fritzsche, Schürer), found the Hebrew fragment which forms the basis of the book already attached to the writings of that Prophet, and wrought it up into its present form. The peculiarities of language common to the LXX. translation of Jeremiah and the first part of Baruch seem too great to be accounted for in any other way (for instance, the use of *δεσμώτης, ἀποστολή, βόμβησις* [*βομβεῖν*], *ἀποικισμός, μάννα, ἀποστρέφειν* [*neut.*], *ἐργάζεσθαί τινι, ὄνομα ἐπικαλεῖσθαι ἐπί τινι*); and the great discrepancy which exists between the Hebrew and Greek texts as to the arrangement of the later chapters of Jeremiah, increases the probability of such an addition having been made to the canonical prophecies. These verbal coincidences cease to exist in the second part, or become very rare; but this also is distinguished by characteristic words: *e.g. ὁ αἰώνιος, ὁ ἅγιος, ἐπάγειν* (see Gifford, pp. 248–250). At the same time the general unity (even in language, *e.g. χαρμοσύνη*) and coherence of the book in its present form point to the work of one man (Fritzsche, *Einl.* § 5; Hitzig, *Psalm.* ii. 119; Ewald, *Hist. of Isr.* iv. 207 sq.). Bertholdt appears to be in error (*Einl.* pp. 1743, 1762) in assigning iii. 1–8 to a separate writer (De Wette, *Einl.* § 322).

[The concluding words of the panegyric upon Wisdom (iii. 24–37), "Afterwards did he show himself upon earth and conversed with men" (*μετὰ τοῦτο ἐπὶ τῆς γῆς ὤφθη καὶ ἐν τοῖς ἀνθρώποις συνανεστράφη*), were regarded by the Fathers (*e.g.* Orig. *Sel. in Ps.* cxxv., Ath. *Or. c. Ar.* ii. 49, § 409; Cyr. Jerus. *Cat.* xi. 15; Chrysos. *Expos. in Ps.* xlix. 3; Cypr. *Test. Lib.* ii. 6; Hippol. *c. Noet.* c. 5; Hil. Pictav. *in Ps.* lxviii. 19, *de Trin.* iv. 142; Epiph. *adv. Haer.* lvi. 7; Basil. *adv. Eun.* iv. 16) as a prediction of the Incarnation. Recent critics—Hitzig, Hilgenfeld, Schürer, and Kneucker—have maintained the view that it is a Jewish Christian interpolation. The words are at first sight sufficiently striking to give colour for either view. There is no need, however, to restrict the interpretation to these two alternatives, of prediction and interpolation. The abruptness of *v.* 37, which is certainly very noticeable, admits of explanation if, as is very probable, *v.* 36 resumes the reference to "Wisdom" which was interrupted at *v.* 32 by an ascription to the Almighty. It will then be seen that *vv.* 36, 37 correspond to *vv.* 27, 28, and the sense will be as follows:—God did not give the way of knowledge to the race of the giants (*v.* 27); and they perished because they lacked wisdom (*v.* 28); He gave the way of knowledge to "Jacob His servant and Israel His beloved" (*v.* 36): and after this she (*i.e.* Wisdom, *φρόνησις*, "the law which abideth for ever;" see iv. 1) appeared upon earth and "conversed with men" (cp. Prov. viii. 31; Ecclus. xxiv. 8, 10–12).—R.]

6. There are no certain data by which to fix the time of the composition of Baruch. Ewald (*l. c.* pp. 207 sq.) assigns it to the close of

the Persian period; and this may be true so far as the Hebrew portion is concerned; but the present book must be placed considerably later, probably about the time of the war of liberation (c. B.C. 160). This is also the view of Fritzsche (*Handb.* i. 173); Schrader (De Wette's *Einleit.* 603); Bissell (*Apocrypha*, p. 417); Keil (*Einl.* 733); Gifford (*Speaker's Comment.*). [Hitzig (*Zeitschrift für wissenschaftl. Theol.* 1860, p. 262, &c.) assigned its composition to so late a date as the reign of Vespasian; and more recently Schürer and Kneucker have agreed in placing it after the destruction of Jerusalem by Titus. They see in the references to the destruction of Jerusalem and to the captivity of the nation by the Chaldaeans (i. 2; ii. 23, 26) a picture of the great catastrophe of the Jewish nation in A.D. 70: the sacrifices and prayers for the welfare of Nebuchadnezzar and Belshazzar (i. 11) imply sacrifices and prayers for Vespasian and Titus (cp. Joseph. *Bell. Jud.* ii. 17, 2–4): the horrors recorded in ii. 3 have their parallel, not only in 2 K. vi. 28, Lam. ii. 20, iv. 10, but also in Josephus, *Bell. Jud.* vi. 3, 4 (see Schürer, *Apokryphen d. A.T.* in Herzog, *RE.*[2] 1877; *Gesch. Jüd. Volk.*[2] pp. 723, 724), and, according to Kneucker, the authors of the two parts were Jewish Pharisees dwelling at Rome.

This theory of a late date of composition cannot be lightly dismissed. The allusions to a catastrophe in the *first* part of the book have more points in common with the destruction of Jerusalem by Titus than with the devastation by Antiochus Epiphanes. The injunction in ii. 21–24 to render willing obedience to the heathen ruler would be appropriate to the attitude of theocratic Judaism towards Rome. The analogy of 4 Esdras and the Apocalypse of Baruch reminds us that the Chaldean invasion and capture of Jerusalem were the accepted historical types of the final overthrow by the Romans. The *second* part of the book has clearly been added for the purpose of introducing a tone of joyfulness and hope. The date of its composition must depend upon its relation to Ps. xi. in the so-called *Psalms of Solomon*. The close resemblance, amounting to verbal correspondence, between Bar. v. and Psalt. Salom. xi. cannot be merely accidental. The Psalterium Salomonis was in all probability originally composed in Hebrew, the latter portion of Baruch in Greek. Now, it may safely be assumed that a Hebrew writing would not have been based upon a Greek writing, and that therefore the Hebrew Ps. Sal. xi. was not derived from the Greek Baruch v. The alternative remains, that Baruch v. is based upon the Greek of Ps. Sal. xi.; and this seems to give the true solution. A comparison of the two documents tends to show that Baruch v. gives a free adaptation of Ps. Sal. xi. Now we know from Ps. Sal. i. ii. viii. xvii. that the Psalms of Solomon must have been written between 70 B.C. and 40 B.C. If then Baruch v. be dependent on a translation of Ps. Sal., it is obvious that its date must be considerably later than this period; and although there is no need to place it so late as the time of the destruction of Jerusalem, it is probably a work of the 1st cent. A.D., which the translator of the first portion of Baruch, finding ready to hand, appended to the older work to give it a more joyful termination. It is therefore interesting to find that Ewald, who ascribed the Psalms of Solomon to a date a little later than 170 B.C., held that the language of Bar. v. 7 sq. is in reality an echo of Ps. Sal. xi. 5–7 (*Hist. of Isr.* iv. p. 498). The coincidence of language has sometimes been explained on the supposition that it is derived from a common source in the LXX., especially the prophecies of Isaiah. This theory, however, is quite inadequate to account for the employment in both writings of such phrases as *στῆθι ἐπὶ τοῦ ὑψηλοῦ, ταπεινοῦσθαι ὄρος ὑψηλὸν . . . εἰς ὁμαλισμόν, ἐσκίασαν . . . οἱ δρυμοί, πᾶν ξύλον εἰωδίας ἵδε συνηγμένα τὰ τέκνα σου, κ. τ. λ.* But it is more commonly tacitly assumed that Ps. Sal. xi. is based upon Baruch (Geiger, *Psalt. Sal.* xi. pp. 137–139, 1871), and the similarity then becomes an argument for the priority of Baruch. The matter perhaps must for the present be left undecided, until the character of the Psalms of Solomon is better understood. In favour of the later date is to be reckoned the absence of testimony to the existence of Baruch until the second century. The theory also, as it has recently been stated, though apt to be discredited by the ingenuity which sees allusions to imperial Rome in the simplest words (*e.g.* the Coliseum: Bar. iii. 16, 17), throws an interesting light upon the purpose of the work as a whole. The picture of the judicial visitation by the Romans is not complete in the estimation of the theocratic Jew who compiled it, without a corresponding picture of Messianic restoration (iv. 36–v. 9).—R.]

7. The *Epistle of Jeremiah*, which, according to the authority of some Greek MSS., stands in the English Version as the 6th chapter of Baruch, is the work of a later period. It consists of a rhetorical declamation against idols (comp. Jer. x., xxix.), in the form of a letter addressed by Jeremiah "to them which were to be led captive to Babylon." The letter is divided into clauses by the repetition of a common burden: *they are no gods; fear them not* (*vv.* 16, 23, 29, 66); *how can a man think or say that they are gods?* (*vv.* 40, 44, 56, 64). The condition of the text is closely analogous to that of Baruch; and the letter found the same partial reception in the Church. The author shows an intimate acquaintance with idolatrous worship; and this circumstance, combined with the purity of the Hellenistic dialect, points to Egypt as the country in which the epistle was written. There is no positive evidence to fix its date, for the supposed reference in 2 Macc. ii. 2 is more than uncertain; but it may be assigned with probability to the 1st century B.C.

8. [The "Apocalypse of Baruch" in its entirety is a comparatively recent discovery. A complete Syriac Version of it was found by A. M. Ceriani in a MS. of the Ambrosian Library (marked B. 21 Inf.) assigned by William Cureton to the 6th century. A literal Latin translation was, with a short preface, published by Ceriani (*Monumenta sacra et profana*, i. 2, Milan, 1866), and is given in Fritzsche's *Libri Apocryphi* (pp. 654–699), 1871. Before that time it had only been known to scholars in the form of an Epistle of Baruch in Syriac to the nine and a half tribes (cp. 4 Esd. xiii. 40, *Vers. Arab.*), found in the London and Paris Polyglotts, which was edited in Syriac by Lagarde, Leipz. 1861, with

the aid of the Nitrian MSS. in the British Museum. In this incomplete form it was published in Latin by Fabricius in *Codex Pseudepigraphus*, V. T., ed. iii. t. ii. p. 145; in English by Whiston, *A Collection of Authentick Records*, Lond. 1727, and more recently by Jolowicz (1855); in French in the *Dictionnaire des Apocryphes*, ed. Migne, ii. 161 sq.

The Apocalypse was written, possibly in Hebrew, shortly after the destruction of Jerusalem. In general character it bears a remarkable resemblance to the Fourth Book of Esdras. So close is this similarity as to argue some real connexion between the two writings. The majority of scholars, including Langen and Dillmann, maintain the priority of 4 Esdras, from which they say the Apoc. of Baruch has borrowed. Schürer (*Gesch. Jüd. Volkes*, ii. 638–645) holds the opposite view: in his opinion the prominent thought of vengeance upon the Romans —present in Apoc. Bar., but not in 4 Esdras —implies that the former work was written when the great catastrophe was very recent, and therefore prior to the sister Apocalypse, which deals with the more abstract question of "the few" that were saved; he also maintains the priority of the Apocalypse on the ground of style, the composition of 4 Esdras being the more artificial and polished of the two. While the subject of relative date is not likely to be satisfactorily determined, the theory that both writings come from the same author may possibly account for the remarkable degree of resemblance. The Apocalypse has very little arrangement, and consists of a series of colloquies, visions, and prayers, loosely strung together. The language and imagery are chiefly borrowed from the writings of the O. T. The style, so far as it is possible to judge from the translation, is characterised by the diffuseness and artificiality commonly found in apocalyptic literature.

The writer was certainly a Jew, possibly still resident in Palestine (lxxx., "et relicti sumus nos hic valde pauci"). His mind is possessed with two main ideas, the recent destruction of the Jewish capital and the near approach of the Messianic consummation. (1) He desires to explain why God had permitted such calamities to overtake His people. It was a just punishment for national sins (i., xiii., lxxvii.); the dispersion of the sacred people was a boon to the Gentiles (i.); it hastened the final visitation of the world by the Most High (xx.). He consoles his countrymen by pointing out that an earthly Jerusalem was not the true "sacred city" (iv.); nothing temporal could be the object of hopes (xv., xxi., xliv.). In the world to come "the just" would find their happiness and reward (iv., xv., xxi., xxx., xliv., li.). (2) He dwells strongly upon the near approach of the end of all things (xx., xxii., xxx., xliii., lxxxii.), and the retribution that will be passed upon the world. He speaks of "the Messiah," as one who shall be revealed as the Servant to carry out the Divine judgment and to establish a Divine rule (xxix., xxx., xxxix., xl., lxx., lxxii.). He predicts the destruction of the Roman empire, which is depicted as a cedar-tree (xxxvi.), and as the fourth kingdom (xxxix., xl.).

The eighty-five chapters of which the extant work is composed are divided into unequal portions, of which the characteristic features are represented by Baruch's *Lament* (x.), his *Prayers* (xiv., xxi., xlviii., liv.), and his *Letter* to the nine and a half tribes (lxxviii.–lxxxv.). The scenes of the various colloquies and visions are "the valley of Cedron," "the sacred ruins," "Hebron," and "the oak" (? of Hebron). In the colloquies Baruch is addressed by a "voice from on high," "the Lord Himself," and by "the angel Ramiel," to whom belong the visions of truth (lv.). The book then as we have it (for it is probably incomplete) will fall into the following seven groups of chapters: i.–xii., xiii.–xx., xxi.–xxxiv., xxxv.–xlvi., xlvii.–lii., liii.–lxxvi., lxxvii.–lxxxv. Another division into seven parts is given by Prof. Stanton: i.–ix., x.–xii., xiii.–xx., xxi.–xxx., xxxi.–xliii., xliv.–lxxvi., lxxvii.–end (*The Jewish and the Christian Messiah*, p. 72, note; cp. Drummond's *Jewish Messiah*, p. 121).

The reader should observe (1) the strength of the language in which the doctrine of the resurrection is asserted, implying the Pharisaic origin of the work; (2) the remarkable instance of Chiliasm (ch. xxix.), a parallel to, or more probably the original of, the famous passage of Papias quoted in Irenaeus, v. 23; (3) the numerous instances of coincidence with N. T. phrases and ideas. This last phenomenon may be the accidental coincidence of contemporaneous thought, but it may also indicate the presence of Christian interpolations in the extant text. The following may be taken as examples. (*a*) Ch. x.: "laetabuntur enim magis steriles et gaudebunt illae quae filios non habent, et illae quae filios habent contristabuntur;" cp. Matt. xxiv 19 (Is. liv. 1). (*b*) Ch. xxi. 13: "Si enim haec tantum vita esset, quae hic est omni homini, nihil esset amarius hoc;" cp. 1 Cor. xv. 19. (*c*) Ch. xxi. 20: "illis qui putant longanimitatem tuam esse infirmitatem;" cp. 2 Pet. iii. 4–9. (*d*) Ch. xxiv. 1: "ecce enim dies veniunt et aperientur libri;" cp. Rev. xx. 12. (*e*) Ch. xxx. 1: "Cum implebitur tempus adventus Messiae et *redibit* in gloria, tunc omnes qui dormierunt in spe ejus resurgent." (*f*) Ch. xlviii. 33, 34: "non enim multi sapientes reperientur illo tempore ... et erunt rumores multi;" cp. 1 Cor. i. 26, Matt. xxiv. 24. (*g*) Ch. li. 10: "assimilabuntur angelis;" cp. Luke xx. 36. (*h*) Ch. li. 15: "In quo ergo perdiderunt homines vitam suam, et quocum commutaverunt animam suam;" cp. Matt. xvi. 25. (*i*) Ch. lxxvi. 3: "transibunt in conspectu tuo omnes regiones terrae istius;" cp. Matt. iv. 8. An account of the Apocalypse of Baruch is given in Schürer, *Gesch. Jüd. Volkes*, ii. pp. 638–645. On the Messianic treatment, see the works of Drummond and Stanton, quoted above. For other literature, see Langen, *De Apoc. Bar. Commentatio*, Friburg, 1867; Dillmann (art. *Pseudepigraphen*), in Herzog's *RE.*[2]; Renan, *Journ. des Savants*, 1877; Kaulen (art. *Apocryphen*), in Wetzer u. Welte's *KL.*[2]] [B. F. W.] [R.]

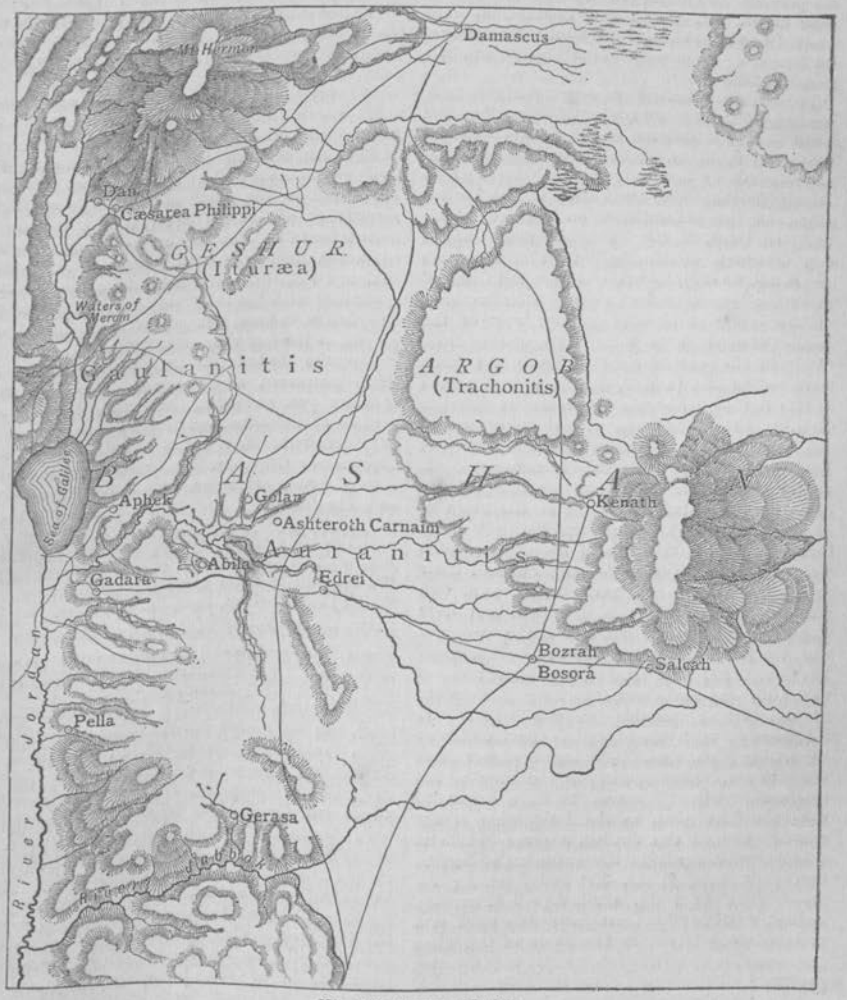
BARZIL'LAI (בַּרְזִלַּי, *iron; Berzillai*). 1. A wealthy Gileadite who showed hospitality to David when he fled from Absalom (2 Sam. xvii. 27, B. Βερζελλεί, A. -λί). On the score of his age, and probably from a feeling of independence, he declined the king's offer of ending his days at court (2 Sam. xix. 32–39). David before his death recommended his sons to the kindness of

Solomon (1 K. ii. 7). The descendants of his daughter AUGIA, who married ADDUS (who took the name Barzillai), were unable after the Captivity to discover "the description of their kindred," and were removed from the priests' office (1 Esd. v. 38. See Ezra ii. 61; Neh. vii. 63).

2. A Meholathite, whose son Adriel married Michal, Saul's daughter (2 Sam. xxi. 8, BA. Βερζελλεί). [R. W. B.] [F.]

BAS'ALOTH (B. Βασαλεμ, A. Βααλώθ; *Phasalon*), 1 Esd. v. 31. [BAZLITH.] One of the servants of the Temple. [W. A. W.]

BAS'CAMA (ἡ Βασκαμά; Jos. Βασκά; *Bascama*), a place in Gilead (εἰς τὴν Γαλααδῖτιν) where Jonathan Maccabaeus was killed by Trypho, and from which his bones were afterwards disinterred and conveyed to Modin by his brother Simon (1 Macc. xiii. 23; Joseph. *Ant.* xiii. 6, § 6). No trace of the name has yet been discovered. [G.] [W.]



Map of the Country of Bashan.

BA'SHAN (almost invariably with the definite article, הַבָּשָׁן; Βασάν; *Basan*), a district on the east of Jordan. It is not, like Argob and other districts of Palestine, distinguished by one constant designation, but is sometimes spoken of as the "land of Bashan" (אֶרֶץ הַבָּשָׁן, 1 Ch. v. 11; and cp. Num. xxi. 33, xxxii. 33), and sometimes as "all Bashan" (כָּל הַבָּ; Deut. iii. 10, 13; Josh. xii. 5, xiii. 12, 30), but most commonly without any addition. The LXX. have Γαλιλαία (? Gaulonitis) for Bashan in Is. xxxiii. 9. It was taken by the children of Israel after their conquest of the land of Sihon from Arnon to Jabbok. They "turned" from their road over Jordan and "went up by the way of Bashan"—probably by very much the same route as that now followed by the pilgrims of the Haj, and by the Romans before them—to Edrei. Here they encountered Og, king

of Bashan, who "came out" perhaps from the natural fastnesses of Argob, only to meet the entire destruction of himself, his sons, and all his people (Num. xxi. 33–35; Deut. iii. 1–3). Argob, with its sixty strongly-fortified cities, evidently formed a principal portion of Bashan (Deut. iii. 4, 5), though still only a portion (*v.* 13), there being besides a large number of unwalled towns (*v.* 5). Its chief cities were Ashtaroth (*i.e.* Beeshterah; cp. Josh. xxi. 27 [see Dillmann[2] in loco] with 1 Ch. vi. 71), Edrei, Golan, Salcah, and possibly Mahanaim (Josh. xiii. 30). Two of these cities, viz. Golan and Beeshterah, were allotted to the Levites of the family of Gershom, the former as a "city of refuge" (Josh. xxi. 27; 1 Ch. vi. 71).

The limits of Bashan are very strictly defined. It extended from the "border of Gilead" on the south to Mount Hermon on the north (Deut. iii. 3, 10, 14; Josh. xii. 5; 1 Ch. v. 23), and from the 'Arabah or Jordan valley on the west to Salcah (*Sulkhad*) and the border of the Geshurites, and the Maacathites on the east (Josh. xii. 3–5; Deut. iii. 10). This important district was bestowed on the half tribe of Manasseh (Josh. xiii. 29–31), together with "half Gilead." After the Manassites had assisted their brethren in the conquest of the country west of the Jordan, they went to their tents and to their cattle in the possession which Moses had given them in Bashan (xxii. 7, 8). It is just named in the list of Solomon's commissariat districts (1 K. iv. 13). And here, with the exception of one more passing glimpse, closes the history of Bashan as far as the Bible is concerned. It vanishes from our view until we meet with it as being devastated by Hazael in the reign of Jehu (2 K. x. 33). True, the "oaks" of its forests and the wild cattle of its pastures—the "strong bulls of Bashan"—long retained their proverbial fame (Ezek. xxvii. 6; Ps. xxii. 12), and the beauty of its high downs and wide sweeping plains could not but strike now and then the heart of a poet (Amos iv. 1; Ps. lxviii. 15; Jer. l. 19; Mic. vii. 14), but history it has none; its very name seems to have given place as quickly as possible to one which had a connexion with the story of the founder of the nation (Gen. xxxi. 47–8), and therefore more claim to use. Even so early as the time of the conquest, "Gilead" seems to have begun to take the first place as the designation of the country beyond the Jordan, a place which it retained afterwards to the exclusion of Bashan (cp. Josh. xxii. 9, 15, 32; Judg. xx. 1; Ps. lx. 7, cviii. 8; 1 Ch. xxvii. 21; 2 K. xv. 29). Indeed, "Bashan" is most frequently used as a mere accompaniment to the name of Og, when his overthrow is alluded to in the national poetry.

After the Captivity, Bashan is mentioned as divided into four provinces—Gaulonitis, Auranitis, Trachonitis, and Batanaea. Of these four, all but the third have retained almost perfectly their ancient names, the modern *Lejah* alone having superseded the Argob and Trachonitis of the Old and New Testaments. The province of *Jaulân* is the most western of the four; it abuts on the sea of Galilee and the lake of Merom, from the former of which it rises to a plateau nearly 3,000 feet above the surface of the water. This plateau, though now almost wholly uncultivated, is of a rich soil, and its N.W. portion rises into a range of hills almost everywhere clothed with oak forests (Porter, ii. 259). No less than 127 ruined villages are scattered over its surface. [GOLAN.]

The *Haurân* is to the S.E. of the last-named province and S. of the *Lejah*; like *Jaulân*, its surface is perfectly flat, and its soil esteemed amongst the most fertile in Syria. It too contains an immense number of ruined towns, and also many inhabited villages. [HAURAN.]

The contrast which the rocky intricacies of the *Lejah* present to the rich and flat plains of the *Haurân* and the *Jaulân* has already been noticed. [ARGOB.]

The remaining district, though no doubt much smaller in extent than the ancient Bashan, still retains its name, modified by a change frequent in the Oriental languages. *Ard el-Bathanyeh* lies on the east of the *Lejah* and to the north of the range of *Jebe Haurân* or *ed-Druze* (Porter, ii. 57). It is a mountainous district of the most picturesque character, abounding with forests of evergreen oak, and with soil extremely rich; the surface is studded with towns of very remote antiquity, deserted, it is true, but yet standing almost as perfect as the day they were built.

For the boundaries and characteristics of these provinces, and the most complete researches yet published into this interesting portion of Palestine, see Porter's *Damascus*, vol. ii.; Wetzstein, *Reisebericht üb. Hauran u. die Trachonen*; Oliphant, *Land of Gilead*; Merrill, *East of Jordan*; Schumacher's *Across the Jordan* and *The Jaulân*. [G.] [W.]

BA'SHAN-HA'VOTH-JA'IR. The name is so written in the A. V. of Deut. iii. 14; but the original is more correctly given by R. V.: "(Jair) called them, even Bashan, after his own name, Havvoth-Jair" (cp. Num. xxxii. 41). [F.]

BASH'EMATH, or BAS'MATH (better, R. V. "Basemath": בָּשְׂמַת, Ges. = *suave olens*, MV.[11] *pleasant*; *Basemath*). **1.** Daughter of Ishmael, the last married of the three wives of Esau (Gen. xxxvi. 3 [A. Βασεμμάθ, *D.* Μασεμμάθ, E. Μασεθμάν], 4 [*D.* as in *v.* 3, A. Βασεμ', E. Μασεθμάθ], 13 [A. Μασεμμάθ, *DE.* Μασσεμάθ]), from whose son, Reuel, four tribes of the Edomites were descended. When first mentioned, she is called Mahalath (Gen. xxviii. 9, Μαελέθ); whilst, on the other hand, the name Bashemath is in the narrative (Gen. xxvi. 34, A. Μασεμμάθ, *D*[vid]. Βασενεμάθ) given to another of Esau's wives, the daughter of Elon the Hittite. It is remarkable that all Esau's wives receive in the genealogical table of the Edomites (Gen. xxxvi.) different names from those by which they have been previously mentioned in the history. The diversity will be best seen by placing the names side by side:—

Genealogy (Gen. xxxvi. 2, 3).	Narrative (Gen. xxvi. 34; xxviii. 9).
1. Adah, d. of Elon.	2. Bashemath, d. of Elon.
2. Aholibamah, d. of Anah.	1. Judith, d. of Beeri.
3. Bashemath, d. of Ishmael.	3. Mahalath, d. of Ishmael.

If it may be assumed that these names refer to the same persons respectively (see *Speaker's*

Comm. on Gen. xxxvi., add. note A), it is best to explain the diversity as due to different traditions (see Ges. *Thes.* s. n. בשׂמת, and Dillmann[5] on Gen. xxxvi. 2, where other hypotheses are mentioned).

2. A daughter of Solomon and wife of one of his officers, called in A. V. BASMATH (1 K. iv. 15; B. Βασεμμάθ, A. Μασεμάθ; R. V. "Basemath"). [F. W. G.] [F.]

BASIN. 1. מִזְרָק, the *pouring* instrument, from זָרַק (Ges.); φιάλη; *phiala:* often in A. V. *bowl.* 2. אַגָּן; κρατήρ; *crater.* 3. כְּפוֹר; *crater;* in A. V. sometimes *cup,* from כָּפַר, *cover,* a cup with a lid. 4. סַף, wrongly in LXX. (Ex. xii. 22) θύρα, and in Vulg. *limen* (Ges.).

1. Between the various vessels bearing in the A. V. the names of basin, bowl, charger, cup, and dish, it is scarcely possible now to ascertain the precise distinction, as very few, if any remains exist of Jewish earthen or metal ware, and as the same words are variously rendered in different places. We can only conjecture as to their form and material from the analogy of ancient Egyptian or Assyrian specimens of works of the same kind, and from modern Oriental vessels for culinary or domestic purposes. Among the smaller vessels for the Tabernacle or Temple-service, many must have been required to receive from the sacrificial victims the blood to be sprinkled for purification. Moses, on the occasion of the great ceremony of purification in the wilderness, put half the blood in "basins" [R. V. "basons"] (מִזְרָקֹת), or bowls, and afterwards sprinkled it on the people (Ex. xxiv. 6, 8, xxxix. 21; Lev. i. 5, ii. 15, iii. 2, 8, 13, iv. 5, 34, viii. 23, 24, xiv. 14, 25, xvi. 15, 19; Heb. ix. 19). Among the vessels cast in metal, whether gold, silver, or brass, by Hiram for Solomon, besides the laver and great sea, mention is made of basins, bowls, and cups. Of the first (מִזְרָקִים, marg. *bowls*) he is said to have made 100 (2 Ch. iv. 8; 1 K. vii. 45, 46. Cf. Ex. xxv. 29 and 1 Ch. xxviii. 14, 17). Josephus, probably with great exaggeration, reckons of φιάλαι and σπονδεῖα, 20,000 in gold and 40,000 in silver, besides an equal number in each metal of κρατῆρες, for the offerings of flour mixed with oil (*Ant.* viii. 3, §§ 7, 8. Cp. Birch, *Hist. of Pottery,* i. 152).

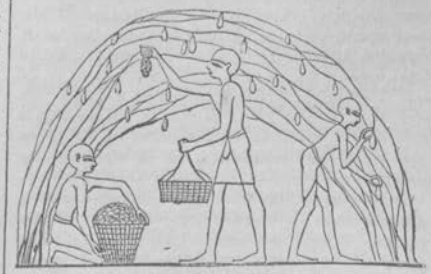
2. The "basin" from which our Lord washed the disciples' feet, νιπτήρ, was probably deeper and larger than the hand-basin for sprinkling, סִיר (Jer. lii. 18), which, in A. V. "caldrons" (R. V. "pots"), Vulg. *lebetes,* is by the Syr. rendered "basins for washing the feet" (John xiii. 5). (Schleusner, Drusius.) [WASHING OF FEET AND HANDS.] [H. W. P.]

BASKET. The Hebrew terms used in the description of this article are as follows:—(1) סַל, so called from the *twigs* of which it was originally made, specially used as the Greek κανοῦν (Hom. *Od.* iii. 442) and the Latin *canistrum* (Verg. *Aen.* i. 701) for holding bread (Gen. xl. 16 sq.; Ex. xxix. 3, 23; Lev. viii. 2, 26, 31; Num. vi. 15, 17, 19). The form of the Egyptian bread-basket is delineated in Wilkinson's *Anc. Egypt.* i. 177 [1878], after the specimens represented in the tomb of Rameses III. These were made of gold (cp. Hom. *Od.* x. 355), and we must assume that the term *sal* passed from its strict etymological meaning to any vessel applied to the purpose. In Judg. vi. 19, meat is served up in a *sal,* which could hardly have been of wickerwork. The expression סַלֵּי חֹרִי (Gen. xl. 16) is sometimes referred to the material of which the baskets were made (καναῖ βαϊνά, Symm.), or the white colour of the peeled sticks, or lastly to their being "full of holes" (A. V. margin), i.e. *open work* baskets; but it is best rendered as by most moderns and in R. V. "baskets of white bread."

(2) סַלְסְלוֹת, a word of kindred origin, applied to the basket used in gathering grapes (Jer. vi. 9).

Egyptian Baskets. (From Wilkinson.)

(3) טֶנֶא, in which the first-fruits of the harvest were presented (Deut. xxvi. 2, 4). From its being coupled with the kneading-bowl (A. V. "store," R.V. "kneading-trough"; Deut. xxviii. 5, 17), we may infer that it was also used for household purposes, perhaps to bring the corn to the mill. The equivalent term in the LXX. for this and the preceding Hebrew words is κάρταλλος, which specifically means a basket that tapers downwards (κόφινος ὀξὺς τὰ κάτω, Suid.), similar to the Roman *corbis.* This shape of basket appears to have been familiar to the Egyptians (Wilkinson, i.43–5 [1878]). (4) כְּלוּב, so called from its similarity to a birdcage or trap (κάρταλλος is used in the latter sense in Ecclus. xi. 30), probably in regard to its having a lid: it was used for carrying fruit (Am. viii. 1, 2); the LXX. gives ἄγγος; Symm. more correctly κάλαθος; the Vulg. *uncinus.* (5) דּוּד,



Egyptian Baskets. (From Wilkinson.)

used like the Greek κάλαθος (LXX.) for carrying fruit (Jer. xxiv. 1, 2), as well as on a larger scale for carrying clay to the brickyard (Ps. lxxxi. 6; κόφινος, LXX.; "pots," A.V.; "basket," R. V.), or for holding bulky articles (2 K. x. 7; κάρταλλος, LXX.): the shape of this basket and

the mode of carrying it usual among the brick-makers in Egypt is delineated in the cut given under BRICKS, and aptly illustrates Ps. lxxxi. 6.

The name Sallai (Neh. xi. 8, cp. xii. 20) is by some taken to indicate that the manufacture of baskets was a recognised trade among the Hebrews, but this explanation is very questionable (see others in Bertheau-Ryssel on Neh. xi. 8).

In the N. T. baskets are described under the three following terms, *κόφινος*, *σπυρίς*, and *σαργάνη*. The last occurs only in 2 Cor. xi. 33, in describing St. Paul's escape from Damascus: the word properly refers to anything twisted like a rope (Aesch. *Suppl.* 791) or any article woven of rope (*πλέγμα τι ἐκ σχοινίου*, Suid.); fish-baskets specially were so made (*ἀπὸ σχοινίου πλεγμάτιον εἰς ὑποδοχὴν ἰχθύων*, *Etym. Mag.*). With regard to the two former words, it may be remarked that *κόφινος* is exclusively used in the description of the miracle of feeding the five thousand (Matt. xiv. 20, xvi. 9; Mark vi. 43; Luke ix. 17; John vi. 13), and *σπυρὶς* in that of the four thousand (Matt. xv. 37; Mark viii. 8); the distinction is most definitely brought out in Mark viii. 19, 20. The *σπυρὶς* is also mentioned as the means of St. Paul's escape (Acts ix. 25). The difference between these two kinds of baskets is not very apparent, Their construction appears to have been the same; for *κόφινος* is explained by Suidas as *ἀγγεῖον πλεκτόν*, while *σπυρὶς* is generally connected with *σπεῖρα*. The *σπυρὶς* (*sporta*, Vulg.) seems to have been most appropriately used of the provision basket, the Roman *sportula*. Hesychius explains it as *τὸ τῶν πυρῶν ἄγγος*: compare also the expression *δεῖπνον ἀπὸ σπυρίδος* (Athen. viii. 17). The *κόφινος* of the N. T. seems to have been more akin to the wallet, if according to *Etym. Mag.* it is *βαθὺ καὶ κοῖλον χώρημα*. As used by the Romans (Colum. xi. 3, p. 460) it contained manure enough to make a portable hotbed [*Dict. of Gr. and Rom. Ant.* COPHINUS] in Rome itself it was carried about by the Jews (*quorum cophinus foenumque supellex*, Juv. iii. 14, vi. 542). [W. L. B.] [F.]

BAS'MATH (בָּשְׂמַת; B. Βασεμμάθ, A. Μασεμάθ; *Basemath*), Solomon's daughter, married to Ahimaaz, one of his commissariat officers (1 K. iv. 15). [BASHEMATH.] [W. A. W.]

BAS'SA (B. Βασσαί; A. Βασσά; Vulg. not recognizable), 1 Esd. v. 16. [BEZAI.] His descendants returned from the Captivity with Zerubbabel. [W. A. W.]

BA'STAI (*Βασθαί*; *Hasten*), 1 Esd. v. 31. [BESAI.] A servant of the Temple, whose descendants returned from the Captivity. [W. A. W.]

BASTARD. Among those who were excluded from entering the congregation, that is, from intermarrying with pure Hebrews (Selden, *Table Talk*, s. v. "Bastard"), even to the tenth generation, was the *mamzêr* (מַמְזֵר, A. V. "bastard." The etymology of the Hebrew word is much disputed. See Ges. *s. v.*), who was classed in this respect with the Ammonite and Moabite (Deut. xxiii. 2). This exclusion had reference, according to tradition, to the law of marriage only; and was not taken to affect his other religious or his political and social rights. A learned *mamzêr* stood higher than an ignorant priest. The Rabbis do not apply the term to any illegitimate offspring, born out of wedlock, but to the issue of any connexion within the degrees prohibited by the Law. A *mamzêr*, according to the Mishna (*Yebamoth*, iv. 13), is one, says R. Akiba, who is born of relations between whom marriage is forbidden. Simeon the Temanite says, the *mamzêr* is every one whose parents are liable to the punishment of "cutting off" by the hands of Heaven; R. Joshua, every one whose parents are liable to death by the house of judgment, as, for instance, the offspring of adultery. The ancient Versions (LXX., Vulg., Syr.) add another class, the children of a harlot, and in this sense the term *manzêr* or *mansêr* survived in Pontifical law (Selden, *De Succ. in Bon. Defunct.* c. iii.): "Manzeribus scortum, sed moecha nothis dedit ortum."

The child of a *goi*, or non-Israelite, and a *mamzêr* was also reckoned by the Talmudists a *mamzêr*, as was the issue of a slave and a *mamzêr*, and of a *mamzêr* and female proselyte. The term also occurs in Zech. ix. 6, "a bastard shall dwell in Ashdod," where it seems to denote a foreign race of mixed and spurious birth. Dr. Geiger infers from this passage that *mamzêr* specially signifies the issue of such marriages between the Jews and the women of Ashdod as are alluded to in Neh. xiii. 23, 24, and applies it exclusively to the Philistine bastard. See *Speaker's Comm.* and Dillmann[2] on Deut. *l. c.* Much interesting information is collected in Hamburger, *RE.* s. v. [W. A. W.] [F.]

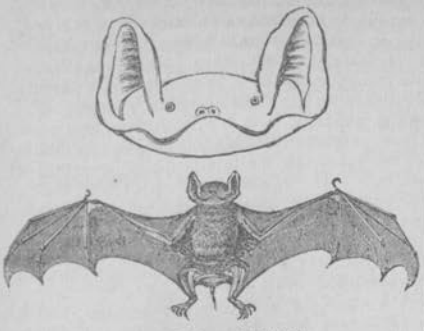
BAT (עֲטַלֵּף, *'atalleph*, literally *night-flier*; *νυκτερίς*; *vespertilio*). There is no doubt whatever that the A. V. and R. V. are correct in their rendering of this word: the derivation of the Hebrew name,[a] the authority of the old Versions, which are all agreed upon the point,[b] and the context of the passages where the Hebrew word occurs, are conclusive as to the meaning. It is true that in the A. V. of Lev. xi. 19, and Deut. xiv. 18, the *'atalleph* closes the lists of "*fowls* that shall not be eaten;" but it must be remembered that the ancients considered the bat to partake of the nature of a bird, and the Hebrew *ôph*, "fowls," which literally means "a wing," might be applied to any winged creature: indeed this seems clear from Lev. xi. 20, where, immediately after the *'atalleph* is mentioned, the following words, which were doubtless suggested by this name, occur: "All fowls that creep [R.V. "all winged creeping things"], going upon all four, shall be an abomination unto you." Besides the passages cited above, mention of the bat occurs in *Is. ii.* 20: "In that day a man shall cast his idols of

---

[a] Ges. from עטל = غطل (*ghatala*), "the night was dark," and עף, "flying." *νυκτερίς*, from *νύξ*, "night;" *vespertilio*, from *vesper*, "the evening." *Bat*, perhaps from *blatta*, *blacta* (see Wedgwood, *Dict. Engl. Etymol.*). Löw in MV.[11] compares it with Talm., Targ., and Syr. ܥܛܠ *naked*, and thinks the bat was so named from the character of its wings. Cp. the Fr. *chauve-souris*.

[b] With the exception of the Syriac, which has ܛܘܣܐ (*tawso*), "a peacock."

silver and his idols of gold . . . to the moles and to the bats;" and in Baruch vi. 22, in the

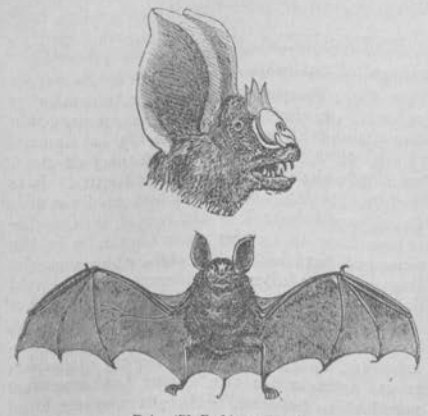


Bat. (*Taphozous perforatus.*)

passage that so graphically sets forth the vanity of the Babylonish idols: "Their faces are blacked through the smoke that cometh out of the temple; upon their bodies and heads sit *bats*, swallows, and birds, and the cats also."

Bats delight during the daylight to take up their abode in caverns and dark places.

Bats are exceptionally abundant in Palestine, owing doubtless to the immense number of caves where they live in perfect security, safe from the attacks of their natural enemies. It is difficult to ascertain how many species of bats exist in Palestine, as travellers have paid no attention to them. We have ourselves collected seventeen species, which are all that are hitherto known from the country. They comprise one *Pteropus*, or fruit-eating bat, four *Rhinolophidae*, nine *Vespertilionidae*, and three *Emballonuridae*. The fruit-eating bat is the large fox-headed *Pteropus*, known as *Cynonycteris aegyptiaca*, measuring twenty inches across the wings; and, contrary to the usual habits of the family, which are arboreal, is found in vast flocks in caves in the wooded parts of the country. A little horse-shoe tropical bat, with a tail as long as its body, swarms by thousands in the caves of the Jordan valley and Dead Sea



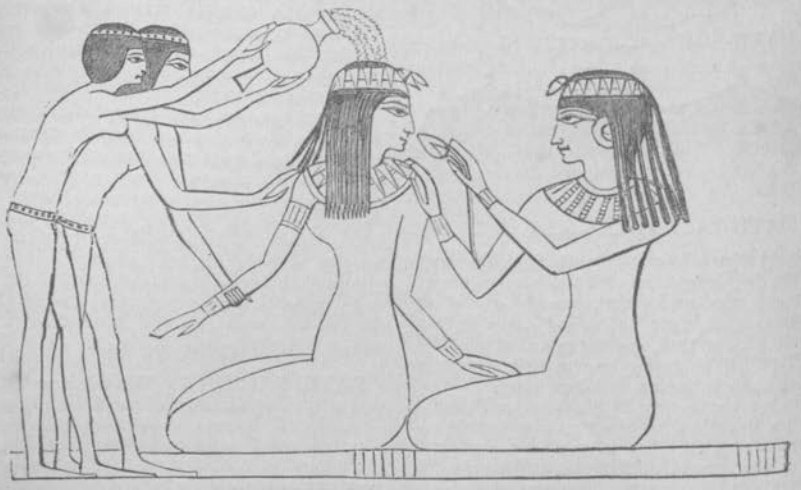
Bat. (*Phyllorhina tridens.*)

basin, especially in the glen of the Callirrhoë in Moab. Another tropical species, *Taphozous nudiventris*, is equally abundant in the ravines round the Lake of Galilee. Both these species are remarkable for large deposits of fat laid on at the base of the tail, just before the period of hybernation. Another well-known species, *Vesperugo kuhli*, swarms in such myriads in the quarries under the Temple of Jerusalem, and in the so-called Cave of Adullam, that we have found it almost impossible to keep a torch alight while creeping through the caverns. The common long-eared bat of England, *Plecotus auritus*, flits about everywhere. In the Dead Sea valley it is only the tropical species that are dormant in winter.

Many travellers have noticed the immense numbers of bats that are found in caverns in the East, and Layard says that on the occasion of a visit to a cavern these noisome beasts almost compelled him to retreat (*Nineveh and Babylon*, p. 307). To this day these animals find a congenial lurking abode "amidst the remains of idols and the sculptured representations of idolatrous practices" (*Script. Nat. H.* p. 8); thus forcibly attesting the meaning of the Prophet Isaiah's words. Bats belong to the order *Cheiroptera*, class *Mammalia*. [H. B. T.]

BATH, BATHING. This was a prescribed part of the Jewish ritual of purification in cases of accidental, leprous, or ordinary uncleanness (Lev. xv. *pass.*, xvi. 28, xxii. 6; Num. xix. 7, 19; 2 Sam. xi. 2, 4; 2 K. v. 10); as also after mourning, which always implied defilement, *e.g.* Ruth iii. 3, 2 Sam. xii. 20. The high-priest at his inauguration (Lev. viii. 6) and on the Day of Atonement, once before each solemn act of propitiation (xvi. 4, 24), was also to bathe. This the Rabbis have multiplied into *ten* times on that day. Maimon. (*Constit. de Vasis Sanct.* v. 3) gives rules for the strict privacy of the high-priest in bathing. There were bath-rooms in the later Temple over the chambers *Abtines* and *Happarvah* for the priests' use (Lightfoot, *Descr. of Temp.* 24). A bathing-chamber was probably included in houses even of no great rank in cities from early times (2 Sam. xi. 2), much more in those of the wealthy in later times; often in gardens (Susan. *v.* 15). With this anointing was customarily joined; the climate making both these essential alike to health and pleasure, to which luxury added the use of perfumes (Susan. *v.* 17; Judith x. 3; Esth. ii. 12). The "pools," such as that of Siloam and Hezekiah's (Neh. iii. 15, 16; 2 K. xx. 20; Is. xxii. 11; John ix. 7), often sheltered by porticoes (John v. 2), are the first indications we have of public bathing accommodation. Ever since the time of Jason (Prideaux, ii. 168) the Greek usages of the bath probably prevailed, and an allusion in Josephus (λουσόμενος στρατιωτικώτερον, *B. J.* i. 17, § 7) seems to imply the use of the bath (hence, no doubt, a public one, as in Rome) by legionary soldiers. We read also of a castle luxuriously provided with a volume of water in its court, and of a Herodian palace with spacious pools adjoining, in which the guests continued swimming, &c., in very hot weather from noon till dark (Joseph. *Ant.* xii. 4, § 11; xv. 3, § 3). The hot baths of Tiberias, or more strictly of Emmaus, near it, and of Callirrhoë, near the eastern shore of the Dead Sea, were much resorted to (Reland, i. 46; Joseph. *Ant.* xviii. 2, § 3, xvii. 6, § 5; *B. J.* i. 33, § 5; Amm.

Marcell. xiv. 8; Stanley, *S. and P.* pp. 295, 375; Hamburger, *RE.* s. nn. *Bad, Badeanstalten*). The parallel customs of ancient Egypt, Greece, and Rome are too well known to need special allusion (see *Dict. of Gr. and Rom. Ant.* art. *Balneae*). The verb "bathe" (save in Is. xxxiv. 5, where it is used by the A. V. to translate רָוָה [R. V. "hath drunk its fill"]) only occurs in the formula of Levitical law, "he shall wash his clothes and bathe himself in water," *i.e.* where "wash" precedes in the same verse. Elsewhere the A. V. always prefers "wash" for the word רָחַץ rendered "bathe" in that formula: *e.g.* Ex. ii 5; 2 Sam. xi. 2. [H. H.]



An Egyptian lady in the bath, with attendants. (Wilkinson.)

The distinction, adopted in the R. V., between "to bathe" and "to wash" helps to explain John xiii. 10 (see note in *Speaker's Comm.*). The guest, after the bath, needed only to have the dust washed from his feet when he reached the house of his host. The term λουτρόν (Eph. v. 26; Tit. iii. 5; see *Speaker's Comm.* in ll.), rendered "laver" in R. V. marg., is considered under BAPTISM (§ iv. 3, 4). The question whether βαπτίσωνται (Mark vii. 4) refers to the washing of the individuals who have been to the market or to the things brought from thence, is decided by the R. V. in favour of the former ("they wash themselves." See also *Speaker's Comm.*). It should not, however, be forgotten that the reading ῥαντίσωνται (BN., Westcott and Hort, Gebhart), "they sprinkle themselves," commends itself to many (cp. Nösgen in Strack u. Zöckler's *Kgf. Komm.* in loco). The means for bathing seem to have been amply supplied by the tanks and reservoirs of Jerusalem (see JERUSALEM, *Waters*), and those means still exist in a more limited extent. Many synagogues (*e.g.* at Safed in Galilee, as well as at Jerusalem) are furnished with bathing rooms suitable for the ceremonial washings connected with their worship. Cp. *B. D.* Amer. edit. [F.]

BATH-RAB'BIM, THE GATE OF (שַׁעַר בַּת־רַבִּים), one of the gates of the ancient city of Heshbon, by (עַל) which were two "pools,"[a] whereto Solomon likens the eyes of his beloved (Cant. vii. 4 [5]). The "Gate of Bath-Rabbim" at Heshbon would, according to the Oriental custom, be the gate pointing to a town of that name. The only place in this neighbourhood at all resembling Bath-Rabbim in sound is Rabbah (*Ammân*), but the one tank of which we gain any intelligence as remaining at *Hesbân*, is on the opposite (S.) side of the town to *Ammân* (Porter, *Handbk.*, p. 298). Conder (*Heth and Moab*, p. 125) supposes the gate to have been the passage cut through the rocks at the top of the mountain path from the stream to the city on the plateau above. The LXX. and Vulg. translate: *ἐν πύλαις θυγατρὸς πολλῶν*; *in portâ filiae multitudinis.* [G.] [W.]

BATH-SHEBA (בַּת־שֶׁבַע, 2 Sam. xi. 3, &c.; also called Bath-shua, בַּת־שׁוּעַ, in 1 Ch. iii 5; Βηρσάβεε; Joseph. Βεεθσαβή; i.e. *daughter of an oath*, or, *daughter of seven*, sc. *years*), the daughter of Eliam (2 Sam. xi. 3), or Ammiel (1 Ch. iii. 5), the son of Ahithophel (2 Sam. xxiii. 34), the wife of Uriah the Hittite. It is probable that the enmity of Ahithophel towards David was increased, if not caused, by the dishonour brought by him upon his family in the person of Bathsheba. The child which was the fruit of her adulterous intercourse with David died: but afterwards she became the mother of four sons, Solomon (Matt. i. 6), Shimea, Shobab, and Nathan. When, in David's old age, Adonijah, an elder son by Haggith, attempted to set aside in his own favour the succession promised to Solomon, Bathsheba was employed by Nathan to inform the king of the conspiracy (1 K. i. 11, 15, 23). After the accession of Solomon, she, as queen-mother, requested permission of her son for Adonijah to take in

[a] The "fishpools" of the A. V. is from the *piscinae* of the Vulg. The Hebrew word Berecah is simply a pool or tank.

marriage Abishag the Shunammite. This permission was refused, and the request became the occasion of the execution of Adonijah (1 K. ii. 23). [DAVID.] Bathsheba was said by Jewish tradition to have composed and recited Prov. xxxi. by way of admonition or reproof to her son Solomon, on his marriage with Pharaoh's daughter (Calmet, *Dict.* s. v.; Corn. a Lapid. *on Prov.* xxxi.). [H. W. P.]

BATH-SHUA (בַּת־שׁוּעַ; BA. ἡ Βηρσάβεε; *Bethsabee*), a variation of the name of Bathsheba, mother of Solomon, occurring only in 1 Ch. iii. 5. Notice that Shua was a Canaanite name (cp. 1 Ch. ii. 3, and Gen. xxxviii. 2, 12—where "Bath-shua" is really the name of Judah's wife), while Bathsheba's first husband was a Hittite. [W. A. W.]

BATH-ZACHARI'AS (quasi בֵּית זְכַרְיָה; א. Βαιθζαχαρία; A. and Josephus Βεθζαχαραί; *Bethzachara*), a place, named only in 1 Macc. vi. 32, 33, to which Judas Maccabaeus marched from Jerusalem, and where he encamped for the relief of Bethsura (Bethzur) when the latter was besieged by Antiochus Eupator. The two places were seventy stadia apart (Joseph. *Ant.* xii. 9, § 4), and the approaches to Bathzacharia were intricate and confined—στενῆς οὔσης τῆς παρόδου (Joseph. *B. J.* i. 1, § 5; cp. also the passage in the *Ant.* above, from which it is evident that Josephus knew the spot). This description is met in every respect by the modern *Beit Skâria*, which has been discovered by Robinson at nine miles north of *Beit sûr*, "on an almost isolated promontory or tell, jutting out between two deep valleys, and connected with the high ground south by a low neck between the heads of the valleys, the neck forming the only place of access to what must have been an almost impregnable position" (Rob. iii. 283, 284). The place is mentioned by Willibald (*E. T.* 20), and lies in the entangled country west of the Hebron road between 4 and 5 miles south-west of Bethlehem. [BETHZUR.] There are ancient foundations and rock-cut tombs (*PEF. Mem.* iii. 35, 108; Guérin, *Judée*, iii. 316–318). [G.] [W.]

BATTLE-AXE (Jer. li. 20). [AXE (7; Maul).]

BATTLEMENT. [HOUSE.]

BAV'AI (בַּוַּי, possibly of Persian origin, Ges.; B. Βεδεί, א. Βεζέρ, A. Βενεί; *Bavai*), son of Henadad, ruler (שַׂר) of the "district" (פֶּלֶךְ) of Keilah in the time of Nehemiah (Neh. iii. 18). [W. A. W.] [F.]

BAY-TREE (אֶזְרָח,* *'ezrâch*; κέδρος τοῦ Λιβάνου; *cedrus Libani*). It is difficult to see upon what grounds the translators of the A. V. have understood the Hebrew word of Ps. xxxvii. 35 to signify a "bay-tree" [R. V. "a green tree in its native soil"]; such a rendering is entirely unsupported by any kind of evidence. Most of the Jewish doctors understand by the term *ezrâch*, "a tree which grows in its own soil" (*indigena*, "one born in the land")—one that has never been transplanted (see Ges. s. *n.*); which is the interpretation given in the margin of the A. V. and accepted by most moderns. The LXX., however, followed by the Vulg. and the Arabic, reads "cedar of Lebanon," *i.e.* אֶזְרַח לְבָנוֹן for אֶזְרַח רַעֲנָן, which, on account of the unusual sense of אֶזְרָח (the word elsewhere being always applied to man and signifying a *native* as opposed to a foreigner [as in Lev. xvi. 29]), has been accepted by Hitzig, Grätz, Cheyne, Nowack, &c. Dr. Royle (Kitto's *Cycl. Bib. Lit.*, art. "Ezrach") suggests the Arabic *ashrut*, which, he says, is described in Arabic works on *Materia Medica*, as a tree having leaves like the *ghar* or "bay-tree." This opinion must be rejected as unsupported by any authority. At the same time, if the epithet רַעֲנָן, *ra'anan*, is to be taken in its usual sense of *luxuriant, spreading*, some tree is intended. The sweet bay is an evergreen tree, attaining the height of twenty or thirty feet, the *Laurus nobilis* of botanists, and of the natural order *Lauraceae*. The Orientals extract a scented oil from its foliage. It is not very common in Western Palestine, but is found in all the wooded glens, more or less sparsely. It is abundant on Mount Carmel, and in all the woods of Gilead. [W. H.] [H. B. T.]

BAZ-LITH (בַּצְלִית). "Children of Bazlith" were amongst the Nethinim who returned with Zerubbabel (Neh. vii. 54; NA. Βασαλώθ, B. Βασαώθ; *Besloth*). In Ezra ii. 52, the name is BAZLUTH (בַּצְלוּת; A. Βασαλώθ, B. Βασαδῶε; *Besluth*). [BASALOTH.] [W. A. W.] [F.]

BAZ'LUTH. See BAZLITH.

BDELLIUM (בְּדֹלַח, *bedôlach*; ἄνθραξ [in Gen.], κρύσταλλον [in Num.]; *bdellium*), a precious substance, the name of which occurs in Gen. ii. 12, with "gold" and "onyx stone," as one of the productions of the land of Havilah, and in Num. xi. 7, where *manna* is in colour compared to *bdellium*. There are few subjects that have been more copiously discussed than that which relates to the nature of the word *bedôlach*; and it must be confessed, that it is still impossible to say whether *bedôlach* denotes a mineral, or an animal production, or a vegetable exudation. Some writers have supposed that the word should be written *berôlach* (*beryl*), instead of *bedôlach*, as Wahl (in *Descr. Asiae*, p. 856) and Hartmann (*de Mulier. Hebraic.* iii. 96), but *beryl*, or *aqua marine*, which is only a pale variety of emerald, is out of the question, for the bdellium was white (cp. Ex. xvi. 31 with Num. xi. 7), while the beryl is yellow or red, or faint blue; for the same reason the ἄνθραξ ("carbuncle") of the LXX. (in Gen. *l. c.*) must be rejected; while κρύσταλλον ("crystal") of the same Version, an interpretation adopted by Reland (*de Situ Paradisi*, § 12), is mere conjecture. The Greek-Venetian and the Arabic Versions, with some of the Jewish doctors, understand "pearls" to be intended by the Hebrew word; and this interpretation Bochart (*Hieroz.* iii. 592), Gesenius (*Thes.*), Lagarde, and *Speaker's Comm.* accept; on the other hand the Greek Versions of Aquila, Theodotion, and Symmachus, Josephus

* From זָרַח, *ortus est* (*Sol*).

(*Ant.* iii. 1, § 6), Salmasius (*Hyl. Iatri.* p. 181), Celsius (*Hierob.* i. 324), Sprengel (*Hist. Rei Herb.* i. 18, and *Comment in Dioscor.* i. 80), and most modern writers (cp. MV.[11] *s. v.*, Dillmann,[5] and Delitzsch [1887] on Gen. ii. 12) believe, with the A. V., that *bedôlach* = bdellium, *i.e.* an odoriferous exudation from a tree which is, according to Kaempfer (*Amoen. Exot.* p. 668), the Palmyra Palm, *Borassus flabelliformis*, Linn., an Indian species, which furnishes Palmyra wood, and was found by Forskål, *Flor. Arab.* p. xci., at Beit el Fakih in Yemen, or Arabia Felix; compare Pliny (*H. N.* xii. 9, § 19), where a full description of the tree and the gum is given. The aromatic gum according to Dioscorides (i. 80) was called μάδελκον or βόλχον; and according to Pliny *brochon, malacham, maldacon*, names which seem to be allied to the Hebrew *bedôlach*. Plautus (*Curc.* i. 2, 7) uses the word *bdellium*.

As regards the theory which explains *bedôlach* by "pearls," it must be allowed that the evidence in its favour is very inconclusive: in the first place it assumes that Havilah is some spot on the Persian Gulf where pearls are found, a point however which is fairly open to question; and secondly, it must be remembered that there are other Hebrew words for "pearls," viz. *Dar*,[a] and according to Bochart, *Peninîm*,[b] though there is much doubt as to the meaning of this latter word. Amber has also been suggested with some show of probability.

The fact that *eben*, "a stone," is prefixed to *shôham*, "onyx," and not to *bedôlach*, seems to exclude the latter from being a mineral; nor do we think it a sufficient objection to say "that such a production as bdellium is not valuable enough to be classed with gold and precious stones," for it would be easy to prove that resinous exudations were held in very high esteem by the ancients, both Jews and Gentiles; and it is more probable that the sacred historian should mention, as far as may be in a few words, the *varied* productions, vegetable as well as mineral, of the country of which he was speaking, rather than confine his remarks to its mineral treasures; and since there is a similarity of form between the Greek βδέλλιον, or μάδελκον, and the Hebrew *bedôlach*, and as this opinion is well supported by authority, the balance of probabilities appears to us to be in favour of the translation of the A. V., though the point must be left an open one. [W. H.]

BEALI'AH (בְּעַלְיָה, *Jah is Lord;* see Nestle, *Die Israelit. Eigennamen*, p. 124; Baethgen, *Beiträge z. Semit. Religionsgesch.* p. 144: BN. Βαδαιά, A. Βααδιά; *Baalia*), a Benjamite, who joined David at Ziklag (1 Ch. xii. 5). [F.]

BEA'LOTH (בַּעֲלוֹת, the plur. fem. of Baal; B. Βαλμαινάν, A. Βαλὼθ; *Baloth*), a town in the south of Judah (Josh. xv. 24). [G.] [W.]

BE'AN (dissyll.), CHILDREN OF (υἱοὶ Βαιάν; Joseph. υἱοὶ τοῦ Βαάνου; *filii Bean*), a tribe, apparently of predatory Bedouin habits, retreating into "towers" (πύργους) when not plundering, and who were destroyed by Judas Maccabaeus (1 Macc. v. 4). The name has been conjectured to be identical with BEON; but it is very difficult to tell from the context whether the residence of this people was on the east or west of Jordan. In the *Speaker's Comm.* in loco it is conjectured that Bean may be identical with Maon, ב and מ being constantly confused. [G.] [F.]

BEANS (פּוֹל,[a] *pôl*; κύαμος; *faba*). There appears never to have been any doubt about the correctness of the translation of the Hebrew word. *Beans* are mentioned with various other things in 2 Sam. xvii. 28, as having been brought to David at the time of his flight from Absalom, and again in Ezek. iv. 9 *beans* are mentioned with "barley, lentiles, millet, and fitches," which the prophet was ordered to put into one vessel to be made into bread. Pliny (*H. N.* xviii. 12) also states that beans were used for a similar purpose. Beans are cultivated in Palestine, which country grows many of the leguminous order of plants, such as lentils, kidney-beans, vetches, &c. Beans are in blossom in Palestine in January; they have been noticed in flower at Lydda on the 23rd, and at Sidon and Acre even earlier (Kitto, *Phys. H. Palest.* 215); they continue in flower till March. In Egypt beans are sown in November and reaped in the middle of February, but in Syria the harvest is in May. Dr. Kitto (*ibid.* 319) says that the "stalks are cut down with the scythe, and these are afterwards cut and crushed to fit them for the food of cattle; the beans when sent to market are often deprived of their skins by the action of two small millstones (if the phrase may be allowed) of clay dried in the sun." Dr. Shaw (*Travels*, i. 257, 8vo ed., 1808) says that in Northern Africa beans are usually full-podded at the beginning of March, and continue during the whole spring; that they are "boiled and stewed with oil and garlic, and are the principal food of persons of all distinctions."

Herodotus (ii. 37) states that the Egyptian priests abhor the sight of beans, and consider them impure, and that the people do not sow this pulse at all, nor indeed eat what grows in their country; but a passage in Diodorus implies that the abstinence from this article of food was not general. The remark of Herodotus, therefore, requires limitation. The dislike which Pythagoras is said to have maintained for beans has been by some traced to the influence of the Egyptian priests with that philosopher (see Smith's *Dict. of Gr. and Rom. Biog.*, art. "Pythagoras").

Hiller (*Hierophyt.* ii. 130), quoting from the *Mishna*, says that the high-priest of the Jews was not allowed to eat eggs, cheese, flesh, bruised beans (*fabas frcsas*), or lentils on the day before the Sabbath.

The bean (*Vicia faba*) is too well known to need description; it is believed to be a native of Persia, but has been so long cultivated that its origin is lost. In the oldest Egyptian mummy cases, beans have been found. The site of the

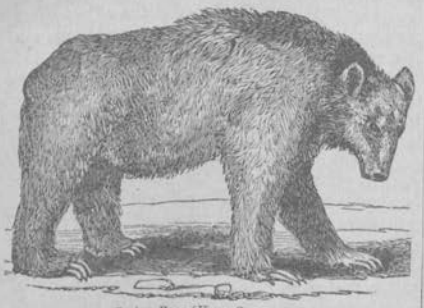
[a] דֹּר, Heb.; دُر, Arab. [b] פְּנִינִים.

[a] פּוֹל, from בָּלַל, "to roll," in allusion to its form. Lat. *bulla*; Dutch, *bol*, "a bean." The Arabic word فول *fûl*, is identical. Ges. *Thes.* s. v.

ancient Gibeah of Saul is now known as *Tuleil el Ful*, "the little Bean Hill." The bean is cultivated over a large portion of the old world from the north of Europe to the south of India; it belongs to the natural order of plants called *Leguminosae*. [W. H.] [H. B. T.]

BEAR (דֹּב,* or דּוֹב, Heb. and Chald. *dōb*; دب, Arab. *dubb*; ἄρκτος, ἄρκος, λύκος, in Prov. xxviii. 15; μέρμνα in Prov. xvii. 12, as if the word were דְּאֵבָה: *ursus, ursa*). The bear was formidable to man. "As if a man did flee from a lion, and a bear met him" (Amos v. 19). Its ferocity when deprived of its cubs is repeatedly mentioned. "They be mighty men, and they be chafed in their minds, as a bear robbed of her whelps in the field" (2 Sam. xvii. 8). "Let a bear robbed of her whelps meet a man, rather than a fool in his folly" (Prov. xvii. 12; so Hos. xiii. 8). Its craftiness in ambush is alluded to,—"He was unto me as a bear lying in wait" (Lam. iii. 10). And the deep monotonous grunt of the bear is compared to the lament of those who mourn over disappointed hopes. "We roar all like bears" (Is. lix. 11): so Horace, *Ep.* xvi. 51, "circumgemit ursus ovile."

The Syrian bear is distinguished by naturalists as *Ursus Syriacus*. It is only to be distinguished from the brown bear of Europe (*Ursus arctos*) by its lighter colour, and rather more slender claws, but it is still more closely allied to the Himalayan brown bear, which is very little paler in colour and with still longer claws. Giebel and many other naturalists unite all these as one species. The Syrian species or race extends through Northern Syria, Armenia, Northern Persia, and the Caucasus. We find bears represented on Assyrian monuments.



Syrian Bear (*Ursus Syriacus*).

None of these bears are naturally carnivorous, feeding generally on fruits and roots, and the Syrian bear is less addicted to animal food than its congener in colder climates, though all the species occasionally feed on flesh, and when individual bears have once acquired a carnivorous taste they soon prefer flesh, and become very dangerous to the flocks in their neighbourhood, and even to man himself. The sheepfolds and the goats of the villages often suffer from their visits, but they are more generally mischievous to the crops of lentils, of which they are very fond. The bear is now exterminated in Southern Palestine, and is comparatively rare in Galilee, though still not uncommon in all parts of Lebanon and Hermon. The writer never but once saw it south of Hermon, and this was in winter in a rugged ravine near the Lake of Gennesaret. It is said still to inhabit the wooded parts of Gilead and Bashan. The almost total denudation of timber and the more powerful weapons devised by man fully account for its disappearance elsewhere, for the bear is rarely found far away from woods or trees. Of its former abundance we have evidence both in the incidents mentioned in the sacred writings and in the frequent allusions to its habits.

Bear. (From a bronze bowl, Nimrud.)

The bear of Ceylon is sometimes the terror the Cingalese villages, from its ravages among the unarmed women and children, but the attack of the bears on the children of Bethel who had mocked Elisha, when "there came forth two she bears out of the wood and tare forty and two of them" (2 K. ii. 24), was clearly a divinely directed visitation, apart from the ordinary habits of the animal, although the Hebrew בָּקַע, *baka'*, does not appear necessarily to imply, as is generally understood, that the bears slew the children, or did more than wound or tear them. The ravine leading up from Jericho to Bethel is now entirely bare of timber, and could afford no cover for the bear; but when clothed with wood, it must have been, from its ruggedness, a secure fastness for any wild animals. The bear always has its lair in forest cover; it is therefore hardly necessary to suppose with some that they migrated from Lebanon and Hermon to the lowlands in winter, traces of them being found in Central Palestine about Samaria and Carmel as late as the Crusading times.

When we visited Hermon, before the snow had melted from the top, we found the snow ridges trodden in all directions by the tracks of bears, which were well known, but not much feared, by the shepherds, and we also saw their traces in the snow on Lebanon. The late Rev. F. W. Holland, the well-known explorer of the Sinaitic Peninsula, wrote to me the following graphic account of the Syrian bear on Hermon. "On June 27, 1865, I slept on the top of Mount Hermon. Just as the sun was setting, I saw two bears rolling each other over in the snow about 400 yards distant. We went to sleep, fully expecting a visit from them during the night, but they did not disturb us, though at daybreak we found them still near us. When

* Probably from דָּבַב, *lente incedere*.

the sun had risen, they left the snow and went down the mountain side. As we descended we came upon another in a narrow gorge busily engaged in rolling over the large boulders, though there did not appear to be food of any kind for him among the stones. I was some distance ahead of my companions, and he did not see me till I got within about fifty yards of him. He then reared himself up, and sat grinning at me as I approached with my little revolver, my only weapon. Unfortunately the Syrian we had with us came in sight and set up a shout, which so frightened the bear that he turned and fled, falling head over heels on a frozen spring, but did not stop till he was fully a quarter of a mile off, when turning round for a moment, he shook his head angrily and then galloped away. Bears must be very common on Mount Hermon. When I pointed them out to our guide, who lived in one of the villages at the foot of the Mount, and was a charcoal-burner by trade, he laughed at my appearing surprised to see them, and evidently did not consider them worth looking at or thinking about, saying there were many of them. When we were there, there was but little snow, and the bears had doubtless come up from the lower parts of Hermon to enjoy a roll in it." [H. B. T.]

BEARD (זָקָן; πώγων; *barba*). Western Asiatics have always cherished the beard as the badge of the dignity of manhood, and attached to it the importance of a feature. The Egyptians on the contrary, sedulously, for the most part, shaved the hair of the face and head, and compelled their slaves to do the like. Herodotus (i. 36) mentions it as a peculiarity of the Egyptians, that they let the beard grow in mourning, being at all other times shaved. Hence Joseph, when released from prison, "shaved his beard" to appear before Pharaoh (Gen. xli. 14). It was, however, the practice among the Egyptians to wear a false beard,

Beards. Egyptian, from Wilkinson (top row). Of other nations, from Rosellini and Layard (bottom row).

made of plaited hair, and of a different form according to the rank of the persons, private individuals being represented with a small beard, scarcely two inches long, kings with one of considerable length, square at the bottom, and gods with one turning up at the end (Wilkinson, *Anc. Egypt.* ii. 333 [1878]). The enemies of the Egyptians, including probably many of the nations of Canaan, Syria, Armenia, &c., are represented nearly always bearded. On the tomb of Beni Hassan is represented a train of foreigners with asses and cattle, who all have short beards, as have also groups of various nations on another monument. The Jews are represented with short beards in the Assyrian sculptures representing the capture of Lachish. [See cut under CAPTIVITIES OF THE JEWS.]

Egyptians of low caste or mean condition are represented sometimes, in the spirit of caricature, apparently with beards of slovenly growth (Wilkinson, ii. 127). In the Ninevite monuments is a series of battle-views from the capture of Lachish by Sennacherib, in which the captives have beards very like some of those in the Egyptian monuments.

There is, however, an appearance of conventionalism both in Egyptian and Assyrian treatment of the hair and beard on monuments, which prevents our accepting it as characteristic. Nor is it possible to decide with certainty the meaning of the precept (Lev. xix. 27; xxi. 5; cp. notes in *Speaker's Comm.*, and Knobel-Dillmann) regarding the "corners of the beard." It seems to imply something in which the cut of a Jewish beard had a ceremonial difference from that of other western Asiatics; and on comparing Herod. iii. 8 with Jer. ix. 26, xxv. 23, xlix. 32, it is likely that the Jews retained the hair on the sides of the face between the ear and the eye (*κρόταφοι*), which the Arabs and others shaved away in honour of their deity Orotal. To differentiate the chosen people from idolaters in this respect may have been a ground of the prohibition. In Lev. *ub. supr.* "marring" or "shaving off the corners of the beard" is associated with "cuttings in the flesh," and both these uniting in the costume of the eighty devotees of Jer. xli. 5 seems to mark a partial lapse into heathenish ways at that period.* Size and fulness of beard are said to be regarded, at the present day, as a mark of respectability and trustworthiness. The beard is the object of an oath, and that on which blessings or shame are spoken of as resting (D'Arvieux, *Moeurs et Coutumes des Arabes*). The custom was and is to shave or pluck it and the hair out in mourning (Is. l. 6, xv. 2; Jer. xli. 5, xlviii. 37; Ezra ix. 3; Ep. Jer. 31); to neglect it in seasons of permanent affliction (2 Sam. xix. 24), and to regard any insult to it as the last outrage which enmity can inflict. Thus David resented the treatment of his ambassadors by Hanun (2 Sam. x. 4); and so in feigning madness the defilement of his own beard is prominent (1 Sam. xxi. 13); so the people of God are figuratively spoken of as "beard" or "hair" which He will shave with "the razor, the king of Assyria" (Is. vii. 20). The beard was the object of salutation, and under this show of friendly reverence Joab beguiled Amasa (2 Sam. xx. 9). The dressing, trimming, anointing, &c. of the beard, was performed with much ceremony by persons of

* A Phœnic. inscription from Larnaca, in Cyprus, of the 5th to 4th century B.C., mentions among others connected with the temple of Ashtoreth, barbers (*gallabim*), who may have been employed in shaving the priests or worshippers, or—if the custom of 1 K. xviii. 28 be supposed [with Renan] to have prevailed in Cyprus—in healing the wounds inflicted upon themselves by the devotees in their frenzied rites. Cp. גלבים in Ezra v. 1. See *Corpus Inscript. Semiticarum*, No. 86 A 12 and p. 95. [S. R. D.]

wealth and rank (Ps. cxxxiii. 2). The removal of the beard was a part of the ceremonial treatment proper to a leper (Lev. xiv. 9). There is no evidence that the Jews compelled their slaves to wear beards otherwise than as they wore their own; but the Romans, when they adopted the fashion of shaving, compelled their slaves to retain their hair and beard, and let them shave when manumitted (Liv. xxxiv. 52, xlv. 44). [H. H.]

BEAST. The representative in the A. V. of the following Hebrew words: חַיָּה, בְּעִיר (חֵי(א), Chald.), בְּהֵמָה.

1. *Behêmâh* (בְּהֵמָה*; *τὰ τετράποδα, τὰ κτήνη, τὰ θηρία; jumentum, bestia, animantia, pecus;* "beast," "cattle," A. V.), which is the general name for "domestic cattle" of any kind, is used also to denote "any large quadruped," as opposed to fowls and creeping things (Gen. vi. 7, 20, vii. 2; Ex. ix. 25; Lev. xi. 2; 1 K. iv. 33; Prov. xxx. 30, &c.); or for "beasts of burden," horses, mules, &c., as in 1 K. xviii. 5, Neh. ii. 12, 14, &c.; or the word may denote "wild beasts," as in Deut. xxxii. 24, Hab. ii. 17, 1 Sam. xvii. 44. [BEHEMOTH, *note;* Ox.]

2. *Bĕ'ir* (בְּעִיר; *τὰ φορεῖα, τὰ κτήνη; jumentum;* "beast," "cattle") is used either collectively of "all kinds of cattle," like the Latin *pecus* (Ex. xxii. 5; Num. xx. 4, 8, 11; Ps. lxxviii. 48), or specially of "beasts of burden" (Gen. xlv. 17). This word, which is much rarer than the preceding, though common in Aramaic, is derived from a root בָּעַר, "to pasture."

3. *Chayyâh* (חַיָּה; *θηρίον, ζῶον, θήρ, τετράπους, κτῆνος, ἑρπετόν, θηριάλωτος, βρωτός; fera, animantia, animal;* "beast," "wild beast"). This word, which is the feminine of the adjective חַי, "living," is used to denote any animal. It is, however, very frequently used specially of "wild beast," when the meaning is often more fully expressed by the addition of the word הַשָּׂדֶה (*hassâdeh*), (wild beast) "of the field" (Ex. xxiii. 11; Lev. xxvi. 22; Deut. vii. 22; Hos. ii. 14, xiii. 8; Jer. xii. 9, &c.). Similar is the use of the Chaldee חֵיוָא (*cheyvâh*). [W. H.]

BEAST, WILD. The rendering of four Hebrew words in the A. V., and of three in the R. V. 1. חַיָּה (*chayyah; ζῶον, θηρίον, θήρ; fera, animal, animantium;* Arab. حيّة, *hayah*) signifies simply "a living thing," but is generally applied to wild animals [BEAST, 3]. In Ps. lxviii. 30, where the A. V. reads "company of the spearmen," the Hebrew text is חַיַּת קָנֶה, *chayyath kaneh*, "wild beast of the reeds" (and so R. V.), *i.e.* the crocodile. In most passages, however, whether with or without the words "of the field," it is used for wild animals generically, frequently as contrasted with birds (Gen. i. 28; Lev. xi. 2, &c.).

2. זִיז (*ziz; ὡραιότης, μονὰς ἄγριος; fera, ferus*) occurs twice—viz. Ps. l. 11, lxxx. 13—and is rendered by the A. V. and R. V. "wild beast." The word is from the unused root זוּז, *zuz*, "to move oneself," and is a common noun signifying "that which moves," having no reference to any special animal; the word *sâdeh*, "of the field," being in each instance coupled with it.

3. צִיִּים (*tziyyim; θηρία, δαιμόνια; hostiae, daemonia, dracones*), i.e. "inhabitants of the desert," from צִיָּה, *tziyyah*, "a desert" or "drought," used frequently of man (as in Ps. lxxii. 14), but in three passages—Is. xiii. 21, xxxiv. 14; Jer. l. 39—applied to some wild animal, and translated in the A. V. and R. V. "wild beasts of the desert." As in each of the three passages it is coupled with אִיִּים, *iyyim*, which, as we shall see, almost certainly denotes a particular animal, it is very probable that *tziyyim* also distinguishes some specific creature. But as to the meaning ancient Versions and critics are alike in uncertainty, scarcely any two agreeing. Bochart (*Hieroz.* ii. 206) argues strenuously in favour of the wild cat, referring to the Arabic not very dissimilar name ضيو, *tzaiwa;* and also suggesting that there is a reference to the cry of the wild cat, along with the howling of the jackal. But the reasoning is not cogent, though I should observe that I have noticed the ruins of deserted cities in Eastern Syria to be the special haunts of the wild cat. Others have suggested the hyaena, but this seems to be indicated by another word, *tzebûa'* (Jer. xii. 9). The Chaldee has apes (*cercopithecos*), the Targum *simiae*, and others *bubo*, "the great owl," but most have left it general; and Gesenius (*sub voce*) adopts this view, and here we may be content to leave it.

4. אִיִּים (*iyyim; ὀνοκένταυροι; ululae, onocentauri, fauni ficarii;* A. V. "wild beasts of the islands") occurs three times: Is. xiii. 22, xxxiv. 14; Jer. l. 39. The R. V. renders it "wolves" in the text, and "howling creatures" in the margin. The Arabic renders it ابن اوي, *Ibn awi*, "the son of howling." There can scarcely be a doubt but that the jackal (*Canis aureus*) is the animal intended. The jackal, to which the name *Ibn awi* and شغال (*shaghal*) is indiscriminately applied by the Arabs, is not otherwise mentioned in Scripture, as distinct from שׁוּעָל (*shu'al*, used indifferently for the jackal and the fox, and identical with the Arabic *shaghal*). The name both in Arabic and Hebrew is probably onomatopoetic, from the wailing cry of the jackal, and has nothing to do with אִי, "island," from which our translators, without any warrant from ancient Versions or authors, derived it. Bochart (*Hieroz.* iii. 12) identifies *iyyim* with the Greek *θώs*, and quotes a vast number of authorities to justify his conclusion, but seems to have some doubt as to what *θὼs* really signified. With our knowledge of the natural history of the East, we can apply the name to nothing else but the jackal (so MV.[11] and Fürst). Aristotle classes it with the wolf and the hyaena (*Hist. Anim.* ii. 17). It was smaller than the wolf (*id.* vi. 35), of a tawny colour, *δαφοινοὶ θῶες* (Hom. *Il.* λ. 474), gregarious, and howled like a wolf or fox (Pollux, *Onomast.*). It would indeed be strange if an

* From the unused root בָּהַם, "to be dumb."

animal so common and familiar in the East had escaped notice in the Bible. Nor is it a sufficient objection that it is elsewhere alluded to under the name *shu'al* (fox), for the Arabs do not distinguish the two any more than the Hebrews seem to have done, while it is not impossible that other Hebrew words also apply to it [see DRAGON]. The jackal (*Canis aureus*), so named from its yellow colour, is still the commonest of wild animals in Palestine, resorting especially to ruins and deserted cities, in the caves and recesses of which it conceals itself during the daytime. Where ruins, caverns, or quarries are not to be found, it secretes itself in thickets. The traveller in the Holy Land, wherever he pitches his camp, nightly hears the wailing cry of the packs of jackals as they scour the country in search of food. Nowhere are they more numerous than in the vast labyrinth of the ruins of Baalbek, where their howl suddenly breaks the stillness of the night, and is caught up from pack to pack, echoing back from the cavernous tunnels and temples, as if it were the wail of a thousand infants. "The jackals shall cry in their desolate houses." But though especially abundant in such places, they are to be heard in every part of the country, among the caves of the wilderness of Judah, in the desolate ravines by the Dead Sea, or round the villages of Sharon. They visit every stray camp, suddenly ceasing their howl as they prowl in silence to filch any stray morsel of food. In the same way they attempt to elude the vigilance of the keepers of the vineyards when they plunder the grapes in autumn. They hang about the towns; and even under the walls of Jerusalem often provoke a defiant chorus from the swarming pariah dogs, who are as intolerant of them as the hound is of the fox. From the latter they differ in their gregarious habits and their omnivorous tastes, preferring flesh and carrion, but in its absence feeding greedily on fruits. In its anatomy and structure, as well as habits, the jackal approaches the domestic dog very closely, and is by many naturalists believed to be its wild original; though probably, if the lineage of man's companion could be traced, the wolf as well as the jackal is among his progenitors. The jackal has a very wide geographical range, being found throughout North Africa, South-Eastern Europe (Greece, Turkey, and South Russia), Western and Central Asia, the Caucasus, and India. It is not recorded from China, having probably been exterminated by the density of the population. Several closely-allied species are found in Africa. [H. B. T.]

BE'BAI (בֵּבַי; *Bebai*). **1.** "Sons of Bebai," 623 (Neh. 628) in number, returned from Babylon with Zerubbabel (Ezra ii. 11, B. Βαβεί, A -αί; Neh. vii. 16, B. Βηβί, ℵA. -εί; 1 Esd. v. 13, Βηβαί); and at a later period twenty-eight more, under Zechariah the son of Bebai, returned with Ezra (Ezra viii. 11, Βαβεί). Four of this family had taken foreign wives (Ezra x. 28; 1 Esd. ix. 29). The name occurs also among those who sealed the covenant (Neh. x. 15. A. Βηβαί. The Greek text is confused. See Swete in loco, and the tables at end of Smend, *Die Listen d. BB. Esra u. Nehemia*). [BABI.]

2. Father of Zechariah, who was the leader of the twenty-eight men of his tribe mentioned above (Ezra viii. 11).

3. A. Βηβαί, B. and Vulg. omit, a place named only in Judith xv. 4 (see *Speaker's Comm.*). It is possibly a mere repetition of the name Chobai occurring next to it. [W. A. W.] [F.]

BE'CHER (בֶּכֶר; Ges. = *young*, as *c.g.* a *young* camel; Simonis also hints at this derivation, *Onom.* p. 399; *Bechor*).

1. The second son of Benjamin, according to the list both in Gen. xlvi. 21 (BA. Χοβώρ, D. -λ) and 1 Ch. vii. 6 (B. Ἀβειρά, A. Βοχόρ); but omitted in the list of the sons of Benjamin in 1 Ch. viii. 1, as the text now stands. No one, however, can look at the Hebrew text of 1 Ch. viii. 1, בִּנְיָמִן הוֹלִיד אֶת־בֶּלַע בְּכוֹרוֹ אַשְׁבֶּל, without at least suspecting that בְּכוֹרוֹ, *his first-born*, is a corruption of בֶּכֶר, *Becher*, and that the suffix וֹ is a corruption of ן, and belongs to the following אַשְׁבֶּל, so that the genuine sense in that case would be, *Benjamin begat Bela, Becher, and Ashbel*, in exact agreement with Gen. xlvi. 21. The enumeration, the second, the third, &c., must then have been added since the corruption of the text.

Becher went down to Egypt with Benjamin and Jacob, being one of the fourteen descendants of Rachel who settled in Egypt, viz. Joseph and his two sons Manasseh and Ephraim, Benjamin and his three sons above named, Gera, Naaman, Ehi (אֲחִי, alias אֲחִירָם, Ahiram, Num. xxvi. 38, and אֲחִרַח, Aharah, 1 Ch. viii. 1, and perhaps אֲחוֹחַ and אֲחִיָּה, *vv.* 4 and 7), and Ard (אָרֶךְ, but in 1 Ch. viii. 3, אֶדֶר, Addar), the sons of Bela, Muppim (otherwise Shuppim, and Shephuphan, 1 Ch. vii. 12, 15, viii. 5; but Shupham, Num. xxvi. 39), and Huppim (Huram 1 Ch. viii. 5, but Hupham Num. xxvi. 39), apparently the sons of Ahiram or Ehi (Aher, 1 Ch. vii. 12), and Rosh, of whom we can give no account, as there is no name the least like it in the parallel passages, unless perchance it be for Joash (יוֹאָשׁ), a son of Becher, 1 Ch. vii. 8.[a] And so, it is worthy of observation, the LXX. render the passage, only that they make Ard the son of Gera, great-grandson therefore to Benjamin, and make all the others sons of Bela. As regards the posterity of Becher, there is no family named after him at the numbering of the Israelites in the plains of Moab, as related in Num. xxvi. 38. But the no less singular circumstance of there being a *Becher*, and a family of *Bachrites*, among the sons of Ephraim (p. 35), seems to supply the true explanation. The slaughter of the sons of Ephraim by the men of Gath, who came to steal their cattle out of the land of Goshen, in that border affray related in 1 Ch. vii. 21, had sadly thinned the house of Ephraim of its males. The daughters of Ephraim must therefore have sought husbands in other tribes, and in many cases must have been heiresses. It is therefore highly probable

[a] We are more inclined to think that it is a corruption of רֹם, or רֹאשׁ, and belongs to the preceding אֲחִי, Ehi, as *Ahiram* is certainly the right name as appears by Num. xxvi. 38.

that Becher,[b] or his heir and head of his house, married an Ephraimitish heiress, a daughter of Shuthelah (1 Ch. vii. 20, 21), so that his house was reckoned in the tribe of Ephraim, just as Jair, the son of Segub, was reckoned in the tribe of Manasseh (1 Ch. ii. 22; Num. xxxii. 40, 41). The time when Becher first appears among the Ephraimites, viz. just before the entering into the Promised Land, when the people were numbered by genealogies for the express purpose of dividing the inheritance equitably among the tribes, is evidently highly favourable to this view (see Num. xxvi. 52–56; xxvii.). The junior branches of Becher's family would of course continue in the tribe of Benjamin. Their names, as given in 1 Ch. vii. 8, were Zemira, Joash, Eliezer, Elioenai, Omri, Jerimoth, and Abiah; other branches possessed the fields round Anathoth and Alameth (called Alemeth vi. 60) and Almon (Josh. xxi. 18). Which of the above were Becher's own sons, and which were grandsons, or more remote descendants, it is perhaps impossible to determine. But the most important of them, as being ancestor to king Saul, and his great captain Abner (2 Sam. iii. 38), the last named Abiah, was, it seems, literally Becher's son. The generations appear to have been as follows: Becher—Abiah (Aphiah, 1 Sam. ix. 1)—Bechorath[c]—Zeror—Abiel (Jehiel, 1 Ch. ix. 35)—Ner—Kish—Saul. Abner was another son of Ner, brother therefore to Kish, and uncle to Saul. Abiel or Jehiel seems to have been the first of his house who settled at Gibeon or Gibeah (1 Ch. viii. 29; ix. 35), which perhaps he acquired by his marriage with Maachah,[d] and which became thenceforth the seat of his family, and was called afterwards Gibeah of Saul (1 Sam. xi. 4; Is. x. 29). From 1 Ch. viii. 6, it would seem that before this, Gibeon, or Geba, had been possessed by the sons of Ehud (called Abihud *v.* 3) and other sons of Bela. But the text appears to be very corrupt.

Another remarkable descendant of Becher was Sheba the son of Bichri, a Benjamite, who headed the formidable rebellion against David described in 2 Sam. xx.; and another, probably, Shimei the son of Gera of Bahurim, who cursed David as he fled from Absalom (2 Sam. xvi. 5), since he is said to be "a man of the family of the house of Saul." But if so, Gera must be a different person from the Gera of Gen. xlvi. 21 and 1 Ch. viii. 3. Perhaps therefore the passage may only mean that Shimei was a Benjamite. In this case he would be a descendant of Bela.

From what has been said above it will be seen how important it is, with a view of reconciling apparent discrepancies, to bear in mind the different times when different passages were written, as well as the principle of the genealogical divisions of the families. Thus in the case before us we have the tribe of Benjamin described (1) as it was about the time when Jacob went down into Egypt; (2) as it was just before the entrance into Canaan; (3) as it was in the days of David; and (4) as it was eleven generations after Jonathan and David, *i.e.* in Hezekiah's reign. It is obvious how in these later times many new heads of houses, called *sons of Benjamin*, would have sprung up, while older ones, by failure of lines, or translation into other tribes, would have disappeared. Even the non-appearance of Becher in 1 Ch. viii. 1 may be accounted for on this principle, without any alteration of the text.

2. Son of Ephraim, Num. xxvi. 35, called Bered 1 Ch. vii. 20 (A. Βαράδ, B. omits). Same as the preceding. [A. C. H.]

BECHO'RATH (בְּכֹרַת, *first birth*; *Bechorath*), son of Aphiah, or Abiah, and grandson of Becher, according to 1 Sam. ix. 1 (B. Βαχεί, A. Βεχωράθ); 1 Ch. vii. 8 (B. 'Αβαχεί, A. Βοχόρ). [BECHER.] [A. C. H.]

BECTI'LETH, THE PLAIN OF (B. τὸ πεδίον Βακτειλαίθ, A. Βεκτελέθ, א^{ca} -τι-, א* Βαιτουλιά; Syr. ܒܝܬ ܛܒܝܠ = *house of slaughter*), mentioned in Judith ii. 21, as lying between Nineveh and Cilicia. The name has been compared with Βακταιαλλά, a town of Syria named by Ptolemy; the Bactiali of the Peutinger Tables, which place it 21 miles from Antioch. The most important plain in this direction is the Bekaa, or valley lying between the two chains of Lebanon. And it is possible that Bectileth is a corruption of that well-known name: if indeed it be a historical word at all (*see Speaker's Comm.* in loco). [G.] [W.]

BED and BEDCHAMBER (מִטָּה, עֶרֶשׂ, מִשְׁכָּב, מַצָּע, יָצוּעַ, the first being mostly κλίνη in LXX., while κοίτη, στρώματα, and στρωμνὴ appear promiscuously for the others). We may distinguish in the Jewish bed five principal parts:—1, the substratum; 2, the covering; 3, the pillow; 4, the bedstead or analogous support for 1; 5, the ornamental portions.

Beds. (From Fellows, *Asia Minor.*)

1. This substantive portion of the bed, or part lain upon, was limited to a mere mat, or one or more quilts. The word which precisely expresses this seems to be מַצָּע, contrasted with its "covering:" see Is. xxviii. 20, where the two are named.

2. A coverlid or quilt finer than those used in 1. This is called the "covering" (Is. *l. c.* מַסֵּכָה), and the two together appear to form the מִשְׁכָּב, "place of lying," which last term seems

[b] This view suggests the possibility of Becher being really the first-born of Benjamin, but having forfeited his birthright for the sake of the Ephraimitish inheritance.

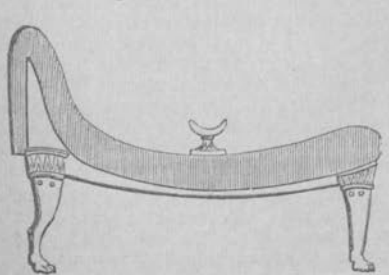
[c] It is possible that Bechorath may be the same person as Becher, and that the order has been accidentally inverted.

[d] Cp. 1 Ch. vii. 14; viii. 5, 6, 29; ix. 35.

used collectively in the singular for "bedding" among the stores brought for David's use (2 Sam. xvii. 28). In Prov. xxii. 27 this is that which is supposed to be "taken away from under" a man. Special forms of covering, probably luxurious or ornamental, are the מַרְבַדִּים of Prov. vii. 16, "coverings (R. V. "carpets") of tapestry" in A. V. The word עָצוּעַ, properly a participle just like *stratum* (used also, however, for a floor, or story, in 1 K. vi. 5, 6, 10), while its verb stands for "to make a bed" (Ps. cxxxix. 8), means comprehensively anything laid flat to lie on. It appears in combination with עֶרֶשׂ = "the couch of my bed" (Ps. cxxxii. 3, R. V. marg.). In summer a thin blanket or the outer garment worn by day (1 Sam. xix. 13) sufficed. This latter, in the case of a poor person, often formed both 1 and 2, and that without a bedstead. Hence the law provided that it should not be kept in pledge after sunset, that the poor man might not lack his needful covering (Deut. xxiv. 13).

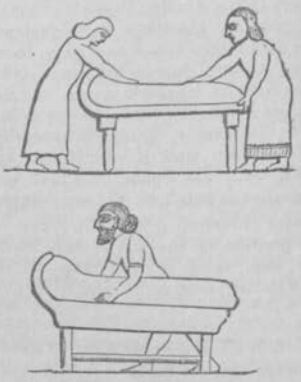
3. The only material mentioned for this is that which occurs in 1 Sam. xix. 13, and the word (כְּבִיר) used is of doubtful meaning, but seems to signify some fabric woven or plaited of goat's-hair (R. V. marg. *quilt* or *network*. See the Comm. in loco). It is clear, however, that it was something hastily adapted to serve as a pillow, and is not decisive of the ordinary use. In Ezek. xiii. 18 occurs the word כְּסָת (*προσκεφάλαιον*, LXX.), which seems to be the proper term. Such pillows are common to this day in the East, formed of sheep's fleece or goat's skin, with a stuffing of cotton, &c. We read of a "pillow," also, in the boat in which our Lord lay asleep (Mark iv. 38) as He crossed the lake. A block of stone such as Jacob used at Bethel, covered perhaps with a garment, was not unusual among the poorer folk, shepherds, &c.

4. The bedstead was not always necessary; the divan, or platform along the side or end of an Oriental room, sufficing as a support for the bedding (see preceding cut). Yet some slight and portable frame seems implied among the senses of the word מִטָּה, which is used for a "bier" (2 Sam. iii. 31), and for the ordinary bed (2 K. iv. 10), for the litter on which a sick person might be carried (1 Sam. xix. 15), for Jacob's bed of sickness (Gen. xlvii. 31, where "the bed's head" is perhaps illustrated by the raised



Bed and Head-rest. (Wilkinson, *Ancient Egyptians.*)

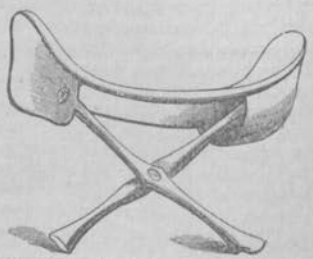
extremity of the bed in the subjoined figure), and for the couch on which guests reclined at a banquet (Esth. i. 6). Thus מִטָּה seems the comprehensive and generic term, and might etymologically be rendered "a stretcher." The proper word for a bedstead appears to be עֶרֶשׂ. As used Deut. iii. 11, it probably describes the sarcophagus of basalt in which lay the dead giant Og (cp. Dillmann[2] in loco). The basalt of the Argob is black, and is said to contain 20 per cent. of "iron" (cp. Pliny, *Nat. Hist.* xxxvi. 2). Most of the above words, however, seem to be used vaguely, especially in poetry.



Assyrian Beds. Making the bed. (Kouyunjik.)

5. The ornamental portions, and those which luxury added, were pillars and a canopy (Jud. xiii. 9 [CANOPY]), ivory carvings (Amos vi. 4), gold and silver (Joseph. *Ant.* xii. 2, § 15), and probably mosaic work. Purple and fine linen are also mentioned as constituting parts of beds (Esth. i. 6). In Cant. iii. 9, 10, the word אַפִּרְיוֹן, LXX. *φορεῖον*, seems to mean "a litter" (R. V. "palanquin;" cp. Delitzsch in loco). Perfumes were used; cp. those (Prov. vii. 17) with which the "strange woman" sprinkles her bed. She (*ib.* 16) speaks of "carved work" (חֲטֻבוֹת), which R. V. renders "striped clothes" of the yarn of Egypt (cp. the LXX. *ἀμφιτάποις τοῖς ἀπ' Αἰγύπτου*).

There is but little distinction of the *bed* from sitting furniture among the Orientals; the same article being used for rest by night and during the day. This applies both to the divan and bedstead in all its forms, except perhaps the



Pillow or Head-rest. (Wilkinson, *Ancient Egyptians.*)

litter. The "corner of a bed" (מִטָּה) suggests the place where two sides of the frame meet and where more support and ease are found. The "couch" (עֶרֶשׂ) which is made its parallel in Amos iii. 12, involves some specialty in connexion with the context; but this being uncertain

it is impossible to determine it (see R. V. text and marg. Cp. Gandell in *Speaker's Comm.*, and Keil[3] in loco, for the different views). There was also a garden-watcher's bed, מְלוּנָה, rendered variously in the A. V. "cottage" (R. V. "booth") and "lodge" (R. V. "hut"), which some have thought was slung like a hammock, perhaps from the trees (Is. i. 8; xxiv. 20).

Josephus (*Ant.* xii. 4, § 11) mentions the bedchambers in the Arabian palace of Hyrcanus.

The ordinary furniture of a bedchamber in private life is given in 2 K. iv. 10. The "bedchamber" in the Temple where Joash was hidden, was, as Calmet suggests (*Dict. of Bib.* art. *Beds*; see Keil), probably a store-chamber for keeping beds, not a mere bedroom, and thus better adapted to conceal the fugitives (2 K. xi. 2; 2 Ch. xxii. 11, חֲדַר הַמִּטּוֹת, R. V. marg. *chamber for the beds*, not the usual חֲדַר מִשְׁכָּב, "chamber of reclining," Ex. viii. 3 and *passim*).

The position of the bedchamber in the most remote and secret parts of the palace seems marked in the passages Ex. viii. 3; 2 K. vi. 12. [H. H.]

BEDA'D (בְּדַד; Βαράδ; *Badad*), the father of one of the kings of Edom, "Hadad ben-Bedad" (Gen. xxxvi. 35; 1 Ch. i. 46). [W. A. W.]

BEDA'IAH, Ezra x. 35. [BEDEIAH.]

BEDA'N. **1.** (בְּדָן; *Badan*), mentioned 1 Sam. xii. 11, as a Judge of Israel between Jerubbaal (Gideon) and Jephthah. As no such name occurs in the Book of Judges, various conjectures have been formed as to the person meant, most of which (now obsolete) are discussed in Pole (*Synopsis*, in loc.). The LXX., Syr., and Arab. all have Barak; and this correction, probable except for the order of the names, is accepted by most modern critics (see *e.g.* Wellhausen, *Speaker's Comm.*, and Driver, *Notes on the Heb. Text of the Books of Samuel*, in loco). [G. E. L. C.] [F.]

2. B. Βαδάμ, A. Βαδάν. Son of Ulam the son of Gilead (1 Ch. vii. 17). [W. A. W.]

BEDEI'AH (בְּדֵיָה; A. Βαδαιά, B. Βαραιά, ℵ. Μαδαιά; *Badaias*), one of the sons of Bani, in the time of Ezra, who had taken a foreign wife (Ezra x. 35). [W. A. W.] [F.]

BEE (דְּבוֹרָה,[a] *debôrah*; μέλισσα, μελισσών; *apis*). Mention of this insect occurs in Deut. i. 44, "The Amorites which dwelt in that mountain came out against you, and chased you as *bees* do;" in Judg. xiv. 8, "There was a swarm of *bees* and honey in the body of the lion;" in Ps. cxviii. 12, "They compassed me about like *bees*;" and in Is. vii. 18, "It shall come to pass in that day that the Lord shall hiss for the fly that is in the uttermost parts of the rivers of Egypt, and for the *bee* that is in the land of Assyria." Palestine abounded in bees, and was indeed a land "flowing with milk and honey."

The common bee of Palestine is the *Apis fasciata* of Latreille. It much resembles our English hive bee, *Apis mellifica*, and still more closely the bee of Italy and Southern Europe, but it is decidedly smaller and of a much lighter colour. It differs slightly in other ways. The swarms or colonies, especially of the wild ones, are generally more numerous, and the cells of the combs are naturally a little smaller, while the combs themselves are frequently of greater size and weight. Few countries in the world are more suited to bees than Palestine, with its dry climate, its stunted but varied flora, consisting in large proportion of aromatic thymes, salvias, mints and other labiate plants, as well as of crocuses, irises, and colchicums in spring, while the innumerable caves and fissures of the dry limestone rocks afford shelter and protection for the combs through all the countless wadys of the land. Bees are, if possible, even more abundant in the comparatively desert regions of the south, than in the cultivated central and northern districts. Many of the Bedouin, particularly in the wilderness of Judaea, obtain their subsistence by bee-hunting, bringing into Jerusalem skins and jars of that wild honey on which St. John the Baptist fed in the wilderness (Matt. iii. 4), and which Jonathan had long before unwittingly tasted when the comb had dropped on the ground from the tree in which it was suspended (1 Sam. xiv. 25, &c.). When we see the busy multitudes of bees about the cliffs (see Thomson, *The Land and the Book*, p. 299), we are reminded of the words, "With honey out of the stony rock should I satisfy thee" (Ps. lxxxi. 16, R. V.). Such stores of wild honey the men possessed who petitioned Ishmael for their lives on that account. "Slay us not, for we have treasures in the field, of wheat . . . and of honey" (Jer. xli. 8).

Most of the allusions in Scripture to bees refer to these unreclaimed stocks which inhabit the cliffs, and frequently also hollow trees, as in the instance referred to in the story of Jonathan. Having abundant space in which to expand their colonies, they do not swarm so frequently as those which are confined in artificial hives, and, when robbed, will sometimes attack the plunderers with great fury. In some parts of India so enormous are the swarms of wild bees, that there are ravines which it is impossible to traverse, owing to their attacks, which have been known to be fatal. Compare the expressions in Deut. i. 44, Ps. cxviii. 12, quoted above.

There can be no doubt that the attacks of bees in Eastern countries are more to be dreaded than they are in more temperate climates. Not only are swarms in the East far larger than they are with us, but on account of the heat of the climate it can be readily understood how their stings give rise to very dangerous symptoms. It would be easy to quote from Aristotle, Aelian, and Pliny, in proof of what has been stated; but let the reader consult Mungo Park's *Travels* (ii. 37, 38) as to the incident which occurred at a spot he named "Bees' Creek" from the circumstance (cp. also Oedman, *Vermisch. Samml.* pt. vi. c. 20). We can well, therefore, understand the full force of the Psalmist's complaint, "They came about me like bees."[b]

[a] From דָּבַר, *ordine duxit; coëgit* (*examen*). Ges. *Thes.* s. v.

[b] It is very curious to observe that in the passage of Deut. i. 44, the Syriac Version, the Targum of Onkelos, and an Arabic MS. read, "chased you as bees that are

The passage about the swarm of bees and honey in the lion's carcase (Judg. xiv. 8, R. V. "body") admits of easy explanation. The lion which Samson slew had been dead some little time before the bees had taken up their abode in the carcase, for it is expressly stated that "after a time" Samson returned and saw the bees and honey in the lion's carcase; so that "if," as Oedman has well observed, "any one here represents to himself a corrupt and putrid carcase, the occurrence ceases to have any true similitude, for it is well known that in these countries, at certain seasons of the year, the heat will in the course of twenty-four hours so completely dry up the moisture of dead camels, and that without their undergoing decomposition, that their bodies long remain, like mummies, unaltered and entirely free from offensive odour." To the foregoing quotation we may add that very probably the ants would help to consume the soft parts of the carcase, and leave perhaps in a short time little else than the skin and skeleton. Even in this country wrens and sparrows have been known not unfrequently to make their nests in the dried body of an exposed crow or hawk. Herodotus (v. 114) speaks of a certain Onesilus who had been taken prisoner by the Amathusians and beheaded, and whose head, having been suspended over the gates, had become occupied by a swarm of bees (cp. also Aldrovandus, *de Insect.* i. 110). The passage in Is. vii. 18, "The Lord shall hiss for the bee that is in the land of Assyria," has been understood by some to refer to the practice of arresting bees by loud jingling sounds when they are swarming in order to induce them to settle. However it may be explained, the fact is familiar to every bee-keeper, that the bees do settle more readily and quickly when the cymbal-like music is employed. But the passage more probably simply refers to the call to attention universally employed in Eastern countries (cp. Ges. *s. v.* שָׁרַק), which is always "hiss" or "hist" instead of our "halloa" or "hey." That the custom existed amongst the ancients of calling swarms to their hives, must be familiar to every reader of Virgil (*Georg.* iv. 64),

"Tinnitusque cie, et matris quate cymbala circum,"

and it is interesting to observe that this practice has continued down to the present day.

Besides the unreclaimed bees, vast numbers of the same species are also domesticated in Palestine, especially in Galilee. Probably the method of keeping them has not varied from the earliest times. The hives are very simple, consisting of large tubes of sun-dried mud, about eight inches in diameter, and four feet long, closed at either end with a cake of mud, pierced with a small hole, through which only three or four bees can pass at a time. There is a door at either end of the tube, and both seem to be used indifferently by the bees. The tubes or hives are laid horizontally close together in rows, piled in a pyramid. I once counted in one of these apiaries no less than seventy-eight tubes, each a distinct hive. Coolness being the great object, the whole is thickly plastered over with mud, and covered with boughs, while a large branch is stuck in the ground at each end, to assist the bees in alighting. At first we took these singular structures for ovens or hen houses. The barbarous practice of destroying the swarms for their honey is unknown. When the hives are full, the clay is removed from the ends of the tubes and the combs are extracted with a hook. Those pieces which contain young bees are carefully replaced, and the hives are then closed as before.

Honey, wild or from the hives, can be purchased everywhere, and is used for many culinary purposes, especially for kneading with flour to make sweet cakes. It was from the earliest times an article of commerce from Palestine. It was among the delicacies sent down by Jacob with his sons to the Governor of Egypt, a country in which, from its character, bees are and always must have been very scarce (Gen. xliii. 11). It is mentioned by Ezekiel among the commodities exported to Tyre: "Judah and the land of Israel were thy merchants; they traded for thy merchandise wheat, . . . honey" (xxvii. 17, R. V.).

The Orientals have a sweet tooth, and are in the habit of eating honey to a degree that would nauseate a Western stomach. It is probable that in several passages דְּבַשׁ, *debash*, stands for the دبس, *dibbs*, the sweet syrup made by boiling down the juice of the grape to the consistency of treacle, but in most instances bees' honey is undoubtedly signified. Bees'-wax was also employed for various purposes, but not, so far as we know, for candles. It was an ingredient in various ointments and perfumes.

The word of God is frequently compared in Scripture to honey for its sweetness (Ps. xix. 10, &c.). Deborah (bee) was a favourite and appropriate female name (Gen. xxxv. 8; Judg. iv. 5).

Besides the hive bee there are very many species of humble bee (*Bombus*) common in Palestine, several species of carpenter bee (*Xylocopa*), while the more solitary mason bees are especially numerous both in species and individuals, but their stores of honey are too inconsiderable to have ever been an object of search.

The LXX. has the following eulogium on the bee in Prov. vi. 8: "Go to the bee, and learn how diligent she is, and what a noble work she produces, whose labours kings and private men use for their health; she is desired and honoured by all, and though weak in strength, yet since she values wisdom, she prevails." This passage is not found in any Hebrew copy of the Scriptures; it exists however in the Arabic, and it is quoted by Origen, Clemens Alexandrinus, Jerome, and other ancient writers. Cp. *Speaker's Comm.* "Introd. to Proverbs," iii. § 12 (*a*) (3); Delitzsch on Prov. vi. 8 and *Einleit. in das Spruchbuch*, § 5; Strack in Strack u. Zöckler's *Kgf. Komm.* "Sprüche Salomos," *Einleit.* § 4.

The bee belongs to the family *Apidae*, of the *Hymenopterous* order of insects. The principal modern writers on bees are Swammerdam, Kirby and Spence, Réaumur, Huber, Schirach, Bonnet,

smoked," showing how ancient the custom is of taking bees' nests by means of smoke. Constant allusion is made to this practice in classical authors. Wasps' nests were taken in the same way. See Bochart (*Hieroz.* iii. 260).

Brandt, and Ratzeburg (*Med. Zoologie*, ii. 8, 177–205). [H. B. T.]

BEEL-IA'DA (בְּעַלְיָדָע = *known by Baal*; Βν. Βαλεγδᾶε, A. Βαλλιαδά; *Baaliada*), one of David's sons, born in Jerusalem (1 Ch. xiv. 7). In the lists in Samuel (2 Sam. v. 16) the name is ELIADA, El taking the place of Baal. [W. A. W.]

BEEL-SARUS (Βεελσάρος; *Beelsuro*), 1 Esd. v. 8. [BILSHAN] One of those who returned to Jerusalem with Zerubbabel. [W. A. W.]

BEEL-TETHMUS, an officer of Artaxerxes residing in Palestine (1 Esd. ii. 16, 25. See note in *Speaker's Comm.*). The name is a corruption of בְּעֵל טְעֵם = lord of judgment, the title of Rehum, the name immediately before it (Ezra iv. 8; where A. V. and R. V. render בְּעֵל טְעֵם "chancellor"). The title is now explained by the Assyrian Inscriptions, and signifies "lord of official intelligence" or "postmaster" (Sayce, *Introd.* to the Books of Ezra, Neh. and Esther, p. 25. Cp. Bertheau-Ryssel on Ezra iv. 8). [F.]

BEEL-ZEBUB (Βεελζεβούλ [Tischendorf-Gebhardt and Westcott and Hort read Βεεζεβούλ always]; *Beelzebub*), the title of a heathen deity, to whom the Jews ascribed the sovereignty of the evil spirits (Matt. x. 25, xii. 24; Mark iii. 22; Luke xi. 15 sq.). The correct reading is without doubt *Beelzebul*, and not *Beelzebub* as given in the Syriac, the Vulg., and some other Versions; the authority of the MSS. is decisive in favour of the former, the alteration being easily accounted for by a comparison with 2 K. i. 2, to which reference is made in the passages quoted. [BAAL, p. 308, No. 2.] Two questions present themselves in connexion with this subject:—(1) How are we to account for the change of the final letter of the name? (2) On what grounds did Jews assign to the Beelzebub of Ekron the peculiar position of ὁ ἄρχων τῶν δαιμονίων? The sources of information at our command for the answer to these questions are scanty: the names are not found elsewhere: the LXX. translates Beelzebub Βάαλ μυῖα θεός, as also does Josephus (*Ant.* ix. 2, § 1); and the Talmudical writers are silent on the subject.

1. The explanations offered in reference to the change of the name may be ranged under two classes, according as they are based on the *sound* or the *meaning* of the word. (*a*) The former proceeds on the assumption that the name Beelzebub was offensive to the Greek ear, and that the final letter was altered to avoid the double *b*, just as Habakkuk became in the LXX. Ἀμβακούμ (Hitzig, *Vorbemerk.* in Habakkuk); the choice of *l*, as a substitute for *b*, being decided by the previous occurrence of the letter in the former part of the word (Bengel, *Gnomon* in Matt. x. 25, comparing Μελχόλ in the LXX. as = Michal). It is, however, by no means clear why other names, such as Magog, or Eldad, should not have undergone a similar change: and we should prefer the assumption, in connexion with this view, that the change was purely of an accidental nature, for which no satisfactory reason can be assigned. (*b*) The second class of explanations carries the greatest weight of authority with it: these proceed on the ground that the Jews intentionally changed the pronunciation of the word, so as either to give a significance to it adapted to their own ideas, or to cast ridicule upon the idolatry of the neighbouring nations, in which case we might compare the adoption of Sychar for Sychem, Bethaven for Bethel. The Jews were certainly keenly alive to the significance of names, and not unfrequently indulged in an exercise of wit, consisting of a play upon the meaning of the words, as in the case of Nabal (1 Sam. xxv 25), Abraham (Gen. xvii. 5), and Sarah (Gen. xvii. 15). Lightfoot (*Exercitations*, Matt. xii 24) adduces instances from the Talmudical writers of opprobrious puns applied to idols.

The explanations which are thus based on etymological grounds, branch off into two classes.

(*a*) Some connect the term with זְבוּל, *habitation*, thus making Beelzebul, בַּעַל-זְ = οἰκοδεσπότης (Matt. x. 25), *the lord of the dwelling*, whether as the "prince *of* the power of the air" (Eph. ii. 2), or as the prince of the lower world (Paulus, quoted by Olshausen, *Comment.* in Matt. x. 25), or as inhabiting human bodies (Schleusner, *Lex.* s. v.), or as occupying a mansion in the seventh heaven, like Saturn in Oriental mythology (Movers, *Phoenic.* i. 260, quoted by Winer, *Realwort.* art. *Beelzebub*; cp. Michaelis, *Suppl. ad Lex.* p. 205, and Fürst for a similar view). (*b*) Others derive it from זֹבֶל, *dung* (a word, it must be observed, not in use in the Bible itself, but occurring in Talmudical writers in form זְבוּל), thus making Beelzebul, lit. *the lord of dung*, or *the dunghill*; and in a secondary sense, as *zebel* was used by the Talmudical writers as = *idol* or *idolatry* (comp. Lightfoot, *Exercit.* Matt. xii. 24; Luke xi. 15), *the lord of idols, prince of false gods*, in which case it = ἄρχων τῶν δαιμονίων.

It is generally held that the former of these two senses is more particularly referred to in the N. T. (Carpzov, *Appar.* p. 498, comparing the term גִּלּוּלִים as though connected with גֵּלֶל, *dung*; Olshausen, *Comment.* in Matt. xii. 25): the latter, however, is adopted by Lightfoot and Schleusner We have lastly to notice the ingenious conjecture of Hug (as quoted by Winer) that the fly under which Baalzebub was represented [on the cultus of the Ζεὺς ἀπόμυιος and of a god Myiodes or Myiocores, see Baudissin in Herzog, *RE.*² s. n. *Beelzebub*], was the *Scarabaeus pillularius* or *dunghill beetle*, in which case Baalzebub and Beelzebul might be used indifferently.

2. The second question hinges to a certain extent on the first. The reference in Matt. x. 25 may have originated in a fancied resemblance between the application of Ahaziah to Baalzebub, and that of the Jews of our Lord to Satan for the ejection of the unclean spirits. As no human remedy availed for the cure of this disease, the Jews naturally referred it to some higher power, and selected Beelzebub as the heathen deity to whom application was made in case of severe disease. The title ἄρχων

τῶν δαιμονίων may have special reference to the nature of the disease in question, or it may have been educed from the name itself by a fancied or real etymology. It is worthy of special observation that the notices of Beelzebul are exclusively connected with the subject of demoniacal possession,—a circumstance which may account for the subsequent disappearance of the name. Baudissin (*l. c.*) answers this question by referring to the fly as an unclean insect, and to the god of flies as an unclean god. He finds a parallel in the metamorphosis of the wicked god Loki into a fly. [W. L. B.] [F.]

BE-ER (בְּאֵר = *well*; τὸ φρέαρ; *puteus*).

1. One of the latest halting-places of the Israelites, lying beyond the Arnon, and so called because of the well which was there dug by the "princes" and "nobles" of the people, and which is perpetuated in a fragment of poetry (Numb. xxi. 16–18).[a] This is by some considered the BEER-ELIM, or "well of heroes," referred to in Is. xv. 8. The "wilderness" (מִדְבָּר) which is named as their next starting-point in the last clause of *v.* 18, may be that before spoken of in *v.* 13, or it may be a copyist's mistake for מִבְּאֵר. It was so understood by the LXX., who read the clause, καὶ ἀπὸ φρέατος—"and from the well," *i.e.* "from Beer" (see Dillmann[2] in loco).

According to the tradition of the Targumists —a tradition in part adopted by St. Paul (1 Cor. x. 4. See *Speaker's Comm.*, note)—this was one of the appearances, the last before the entrance on the Holy Land, of the water which had "followed" the people, from its first arrival at Rephidim, through their wanderings. The water — so the tradition appears to have run — was granted for the sake of Miriam, her merit being that, at the peril of her life, she had watched the ark in which lay the infant Moses. It followed the march over mountains and into valleys, encircling the entire camp, and furnishing water to every man at his own tent door. This it did till her death (Num. xx. 1), at which time it disappeared for a season, apparently rendering a special act necessary on each future occasion for its evocation. The striking of the rock at Kadesh (Num. xx. 10) was the first of these; the digging of the well at Beer by the staves of the princes, the second. Miriam's well at last found a home in a gulf or recess in the Sea of Galilee, where at certain seasons its water flowed, and was resorted to for healing purposes (Targums Onkelos and Pseudo-Jonathan on Num. xx. 1, xxi. 18. See also the quotations from the Talmud in Lightfoot on John v. 4, and in *Expositor* [1889], pp. 15–18).

2. B. Βαιήρ; A. Ῥαρά; Vulg. *Bera*. A place to which Jotham, the son of Gideon, fled for fear of his brother Abimelech (Judg. ix. 21). There is nothing in the text or elsewhere to indicate its position, though Keil (in loco) identifies it with *el Bireh* near the mouth of Wady es Surar (Robinson, ii. 347). [G.] [W.]

BE-E'RA (בְּאֵרָא, Ges. = *a well*; A. Βηρά, B. Βαιαιλά; *Bera*), son of Zophah, of the tribe of Asher (1 Ch. vii. 37). [W. A. W.] [F.]

BE-E'RAH (בְּאֵרָה, Ges. = *a well*; A. Βηρά, B. Βεήλ; *Beera*), son of Baal, prince (נָשִׂיא) of the Reubenites, carried away by Tiglath-pileser (1 Ch. v. 6). [W. A. W.] [F.]

BEER-E'LIM (בְּאֵר אֵלִים, *well of heroes*; φρέαρ τοῦ Αἰλείμ, A. Αἰλίμ; *puteus Elim*), a spot named in Is. xv. 8 as on the "border of Moab," apparently the south, Eglaim being at the north end of the Dead Sea. Gesenius, Delitzsch, and Mühlau think that the name points to the well dug by the chiefs of Israel on their approach to the Promised Land, close by the "border of Moab" (Num. xxi. 16; cp. *v.* 13), but this is rejected by Dillmann[2]. [BEER, 1.] Beer-elim was probably chosen by the Prophet out of other places on the boundary on account of the similarity between the sound of the name and that of יְלֵלָה—the "howling" which was to reach even to that remote point (Ewald, *Proph.* 233). [G.] [W.]

BE-E'RI (בְּאֵרִי, Ges. = *man of the well*; A*D.* Βεήρ, E. Βαιήλ; *Beeri*). **1.** The father of Judith, one of the wives of Esau (Gen. xxvi. 34), who is called in the genealogical table (Gen. xxxvi. 2) AHOLIBAMAH, daughter of Anah. Consequently some regard Beeri and Anah as names of the same person; others, with more probability, trace in the whole passage two independent traditions (see Dillmann[5] on Gen. xxxvi. 2). [F.]

2. Βεηρεί. Father of the prophet Hosea (Hos. i. 1). [F. W. G.]

BEER-LAHA'I-ROI (בְּאֵר לַחַי רֹאִי), R. V. marg. *the well of the living One Who seeth me* [cp. Delitzsch (1887) and Dillmann[5]]; ADE. τὸ φρέαρ τῆς ὁράσεως; *puteus viventis et videntis me*), a well (Gen. xvi. 14), or rather a living spring[a] (A. V. and R. V. "fountain," cp. *v.* 7), between Kadesh and Bered, in the wilderness, "in the way to Shur," and therefore in the "south country" (Gen. xxiv. 62; LXX. *aliter*), whose name, according to the explanation of the text, recalled to Hagar the Name of the LORD (Gen. xvi. 13, R. V. "Thou art a God that seeth") Who spake unto her there. By this well Isaac dwelt both before and after the death of his father (Gen. xxiv. 62; xxv. 11: in both passages the name is given in the A. V. as "the well [R. V. Beer-] Lahai-roi").

The well of Hagar was shown in the time of Jerome between Kadesh and Barad (*O.S.*[2] p. 135, 3). Mr. Rowland finds the well Lahai-roi at *'Ain Muweileh*, a station on the road to Beer-sheba, ten hours south of *Ruheibeh*; near which is a hole or cavern bearing the name of *Beit Hajar* (Ritter, *Sinai*, pp. 1086–7); but this

[a] There is no connexion between the "gather" in *v.* 16 and that in xx. 8. From the A. V. it might be inferred that the former passage referred to the event described in the latter; but the two words rendered "gather" are radically different,—קָהַל in xx. 8, where R. V. has "assemble," אָסַף in xxi. 16.

[a] One of the very few cases in which the two words עַיִן, *Ain*, a living spring, and בְּאֵר, *Beer*, an artificial well, are applied to the same thing.

requires confirmation. Prof. Palmer (*PEFQy. Stat.* 1871, pp. 21–2) mentions a rock-hewn chapel and other caves at *'Ain Muweileh*, which it would appear that the early Christians regarded "as sacred from some tradition attached to the spot." Mr. Holland (*MS. Notes*) says that the principal watering-place consists of a stream, and three or four shallow wells with troughs, and notes the presence of much water.

This well is not to be confounded with that by which the life of Ishmael was preserved on a subsequent occasion (Gen. xxi. 19), and which, according to the Moslem belief, is the well *Zemzem* at Mecca. [G.] [W.]

BEE'ROTH (בְּאֵרוֹת, *wells*; *Beroth*), one of the four cities of the Hivites who deluded Joshua into a treaty of peace with them, the other three being Gibeon, Chephirah, and Kirjath-jearim (Josh. ix. 17; LXX. *v.* 23, B. Βειρών, $1^{ab\,mg}$ Βηθώρ, AF. Βηρώθ). Beeroth was with the rest of these towns allotted to Benjamin (xviii. 25; B. Βεηρωθά, A. Βηρώθ), in whose possession it continued at the time of David, the murderers of Ish-bosheth being named as belonging to it (2 Sam. iv. 2; B. Βηρώθ, A. om.). From the notice in this place (*vv.* 2, 3) it would appear that the original inhabitants had been forced from the town, and had taken refuge at Gittaim (Neh. xi. 34), possibly a Philistine city. Probably this occurred on the occasion of Saul's massacre of the Gibeonites (2 Sam. xxi. 1), which would account for the animosity of Baanah and Rechab to Saul's son.

Beeroth is once more named with Chephirah and K.-jearim in the list of those who returned from Babylon (Ezra ii. 25; Neh. vii. 29, B. Βερώς; 1 Esd. v. 19, B. Βηρόγ, *aliter* Βηρώθ). [BEROTH.]

Beeroth was known in the times of Eusebius, and his description of its position (*OS.*[2] p. 247, 61, with the corrections of Reland, pp. 618–9; Rob. i. 452, note) agrees perfectly with that of the modern *el-Bireh*, which stands about ten miles north of Jerusalem by the great road to *Nâblus*, just below a ridge which bounds the prospect northwards from the Holy City (Rob. i. 451–2; ii. 262. See also *PEF. Mem.* iii. 8, 88; and Guérin, *Judée*, iii. 7–13. [Another site may be seen suggested in Dillmann[2] on Josh. ix. 17]). No mention of Beeroth beyond those quoted above is found in the Bible, but one link connecting it with the N. T. has been suggested, and indeed embodied in the traditions of Palestine, which we may well wish to regard as true, viz. that it was the place at which the parents of "the child Jesus" discovered that He was not among their "company" (Luke ii. 43–45). At any rate the spring of *el-Bireh* is even to this day the customary resting-place for caravans going northward, at the end of the first day's journey from Jerusalem (Stanley, p. 215; Lord Nugent, ii. 112; Schubert in Winer, *s. v.*).

A church was built by Helena on the spot where the Virgin Mary sank down on discovering her loss. The remains were to be seen in Maundrell's day (*E. T.* 436). The church was standing in the time of Quaresimus (ii. 787); he identifies *el-Bireh* with Michmash. *Bireh* belonged to the Knights Templar (Brocardus, vii. 178).

Besides Baanah and Rechab, the murderers of Ish-bosheth, with their father Rimmon, we find Nahari "the Beerothite" (הַבְּאֵרֹתִי, B. ὁ Βηθωραΐος, B^{ab} A. Βηρωθαΐος; 2 Sam. xxiii. 37), or "the Berothite" (הַבֵּרֹתִי, A. ὁ Βηρώθ, B. ὁ Βερθεί, 1 Ch. xi. 39), one of the "mighty men" of David's guard. [G.] [W.]

BEE'ROTH OF THE CHILDREN OF JAAKAN (בְּאֵרֹת בְּנֵי־יַעֲקָן; BAF. Βηρὼθ υἱῶν Ἰακείμ; *Beroth filiorum Jacan*), the wells of the tribe of the Bene-Jaakan, which formed one of the halting-places of the Israelites in the desert (Deut. x. 6). In the lists in Num. xxxiii. 31, the name is given as BENE JAAKAN only. [G.] [W.]

BEE'ROTHITE. [BEEROTH.]

BEER-SHEBA (בְּאֵר שֶׁבַע, בְּ שָׁבַע [in pause], *well of swearing*, or *of seven*; Φρέαρ ὁρκισμοῦ, and Φρέαρ τοῦ ὁρκοῦ, in Genesis; B. Βηρσαβέε, A. -βέθ [sometimes] in Joshua and later Books; Joseph. Βηρσουβαί· ὅρκιον δὲ φρέαρ λέγοιτο ἄν; *Bersabee*), the name of one of the oldest places in Palestine, and which formed, according to the well-known expression, "from Dan to Beersheba" (see below), the southern limit of the country. The sanctuary of Beersheba consisted of seven wells; and it is notable that among the Semites special sanctity was attached to a group of this number (W. R. Smith, *Religion of the Semites*, i. 165).

There are two accounts of the origin of the name. 1. According to the first, the well was dug by Abraham, and the name—Beersheba—given, because there he and Abimelech the king of the Philistines "sware" (נִשְׁבְּעוּ) both of them (Gen. xxi. 31), stress being laid by the Hebrew on the bond ratified by swearing. But the compact was also ratified by the setting apart of "*seven* (שֶׁבַע, *sheba*) ewe lambs"; and the name recalled to the Canaanite the seven things by which ratification was perfected (cp. Dillmann[5]).

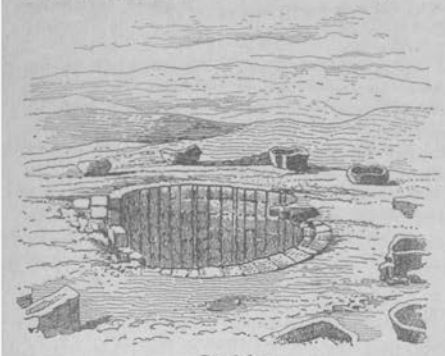
2. The other narrative ascribes the origin of the name to an occurrence almost precisely similar, in which both Abimelech the king of the Philistines, and Phichol his chief captain, are again concerned, with the difference that the person on the Hebrew side of the transaction is Isaac instead of Abraham (Gen. xxvi. 31–33). Here there is no reference to the "seven" lambs, and we are left to infer the derivation of Shibeah (שִׁבְעָה, A. V. "Shebah," R. V. "Shibah") from the mention of the "swearing" (יִשָּׁבְעוּ) in *v.* 31.

If we accept the statement of xxvi. 18 as referring to the same well as in the former account, we need not enquire whether these two accounts relate to two separate occurrences (Delitzsch [1887]), or refer to one and the same event, at one time ascribed to one, at another time to another of the early heroes and founders of the nation. It should be remembered that there are at present on the spot two principal wells, and five smaller ones (see below). They are among the first objects encountered on the entrance into Palestine from the south; and

being highly characteristic of the life of the Bible, at the same time that the identity of the site is beyond all question, the wells of Beersheba never fail to call forth the enthusiasm of the traveller.

The two principal wells—apparently the only ones seen by Robinson—are on or close to the northern bank of the *Wâdy es-Seb'a*. They lie just a hundred yards apart, and are so placed as to be visible from a considerable distance (Bonar, *Land of Prom.* 1). The larger of the two, which lies to the east, is, according to the careful measurements of Dr. Robinson, 12½ feet in diam., and at the time of his visit (April 12) was 44½ feet to the surface of the water: the masonry which encloses the well reaches downwards for 28½ feet. The other well is 5 feet in diam. and was 42 feet to the water.

The kerb-stones round the mouth of both wells are worn into deep grooves by the action of the ropes of so many centuries, and "look as if frilled or fluted all round." Round the larger well there are nine, and round the smaller five large stone troughs—some much worn and broken, others nearly entire, lying at a distance of 10 or 12 feet from the edge of the well. There were formerly ten of these troughs at the larger well. The circle around is carpeted with a sward of fine short grass with crocuses and lilies (Bonar, pp. 5–7). The water is excellent, the best, as Dr. Robinson emphatically records, which he had tasted since leaving Sinai.



Beersheba.

The five lesser wells—apparently the only ones seen by Van de Velde—are, according to his account and the casual notice of Bonar, in a group in the bed of the wady, not on its north bank, and at so great a distance from the other two, that the latter were missed by him.

On some low hills north of the large wells are scattered the foundations and ruins of a town of moderate size, *Kh. Bîr es-Seb'a*. There are no trees or shrubs near the spot. See *PEF. Mem.* iii. 394; Prof. Palmer in *PEF. Qy. Stat.* 1871, 36; and Guérin, *Judée*, ii. 277–284.

After the digging of the well Abraham planted a "tamarisk-tree" (R. V.) as a place for the worship of Jehovah, and here he lived until the sacrifice of Isaac, and for a long time afterwards (xxi. 33; xxii. 1, 19). Here also Isaac was dwelling at the time of the transference of the birthright from Esau to Jacob (xxvi. 33, xxviii. 10); and from the patriarchal encampment round the wells of his grandfather, Jacob set forth on the journey to Mesopotamia which changed the course of his whole life. Jacob does not appear to have revisited the place until he made it one of the stages of his journey down to Egypt. He then halted there to offer sacrifice to "the God of his father," doubtless under the sacred grove of Abraham.

From this time till the conquest of the country we lose sight of Beersheba, only to catch a momentary glimpse of it in the lists of the "cities" in the extreme south of Judah (Josh. xv. 28) given to the tribe of Simeon (Josh. xix. 2; 1 Ch. iv. 28). Samuel's sons were judges in Beersheba (1 Sam. viii. 2), its distance no doubt precluding its being among the number of the "holy cities" (LXX. τοῖς ἡγιασμένοις πόλεσι) to which he himself went in circuit every year (vii. 16).[a] By the times of the monarchy it had become recognised as the most southerly place of the country. Its position as the place of arrival and departure for the caravans trading between Palestine and the countries lying in that direction would naturally lead to the formation of a town round the wells of the patriarchs, and the great Egyptian trade begun by Solomon must have increased its importance. Hither Joab's census extended (2 Sam. xxiv. 7; 1 Ch. xxi. 2), and here Elijah bade farewell to his confidential servant (מְשָׁרֵת) before taking his journey across the desert to Sinaï (1 K. xix. 3). From Dan to Beersheba (Judg. xx. 1, &c.), or from Beersheba to Dan (1 Ch. xxi. 2; cp. 2 Sam. xxiv. 2), now became the established formula for the whole of the Promised Land; just as "from Geba to Beersheba" (2 K. xxiii. 8), or "from Beersheba to Mount Ephraim" (2 Ch. xix. 4), was that for the southern kingdom after the disruption. After the return from the Captivity the formula is narrowed still more, and becomes "from Beersheba to the valley of Hinnom" (Neh. xi. 30).

One of the wives of Ahaziah, king of Judah, Zibiah mother of Joash, was a native of Beersheba (2 K. xii. 1; 2 Ch. xxiv. 1). From the incidental references of Amos, we find that, like Bethel and Gilgal, the place was in his time the seat of an idolatrous worship, apparently connected in some intimate manner with the northern kingdom (Amos v. 5, viii. 14). In the latter of these passages we have perhaps preserved a form of words or an adjuration used by the worshippers, "Live the 'way' of Beersheba!"[b] After this, with the mere mention that Beersheba and the villages round it ("daughters") were re-inhabited after the Captivity (Neh. xi. 30), the name dies entirely out of the Bible records; like many other places, its associations are entirely confined to the earlier history, and its name is not even once mentioned in the New Testament.

---

[a] The LXX. probably read מִקְדָּשׁ instead of מָקוֹם; though it is possible that מָקוֹם, like the Arabic *maṣâm*, might have a special application to a holy place (see Wellhausen, *Der Text d. BB. Samuelis*, in loco).

[b] There is a correspondence worth noting between the word "way" or "manner" (R. V.) in this formula (דֶּרֶךְ, literally "the road"), and the word ἡ ὁδός, "the Way" (R. V.), by which the new religion is designated in Acts ix. 2, &c.

But though unheard of, its position ensured a continued existence to Beersheba. In the time of Jerome it was still a considerable place (oppidum, *Quaest. ad Gen.* xvii. 30; or vicus grandis, *OS.*[2] p. 138, 33), the station of a Roman praesidium; and later it is mentioned in some of the ecclesiastical lists as an episcopal city under the Bishop of Jerusalem (Reland, p. 620). Its present condition has been already described. It only remains to notice that the place retains its ancient name as nearly similar in sound as an Arabic signification will permit—*Bîr es-Seb'a*—the "well of the lion," or "of seven." [G.] [W.]

BE-ESH-TERAH (בְּעֶשְׁתְּרָה; B. Βοσορά, A. Βεεθαρά; *Bosra*), one of the two cities allotted to the sons of Gershom, out of the tribe of Manasseh beyond Jordan (Josh. xxi. 27). By comparison with the parallel list in 1 Ch. vi. 71 (B. Ἀσηρώθ, A. Ραμώθ), Beeshterah appears to be identical with ASHTAROTH; and in fact the name is considered by Gesenius and Olshausen (*Lehrb.* p. 613) and others a contracted form of Beth-Ashtoreth, the house of Ashtoreth. [BOSOR.] [G.] [W.]

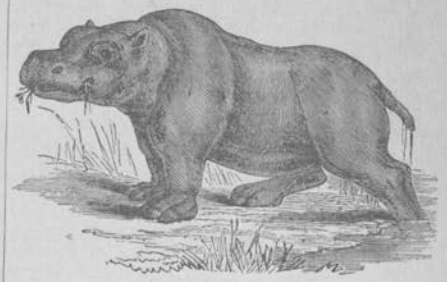
BEETLE (חַרְגֹּל, *chargôl*; ὀφιομάχης; *ophiomachus*; A. V. "beetle," R. V. "cricket"). The word only occurs once in the Bible, in Lev. xi. 22, where it is given along with the "locust," "bald-locust," and "grasshopper" as one of the flying creeping things which may be eaten, "which have legs above their feet, to leap withal upon the earth." It is clear from the context that some species of locust or orthopterous saltatorial insect is intended, and that our translation is erroneous, for no beetle has legs above its feet to leap withal, nor have any species of beetle been ever used as food, though locusts are frequently eaten. Gesenius and MV.[11] interpret the words as meaning "leaper," identical with the Arabic خرجل, *khardjala*, "to leap," used of locusts and of horses, comparing it with the German *Heuschrecke*, from *schrecken*, "to leap." Both Bochart and Rosenmüller (*Hieroz.* iii. p. 257) agree that some species of locust, and not wingless locusts in general, is indicated; but all attempts to identify it are mere conjectures. The LXX. rendering, ὀφιομάχης, "serpent fighter," occurs nowhere else, and is interpreted by Hesychius and Suidas as meaning a wingless species of locust. But the notion of any locust fighting serpents is of course utterly without foundation in tradition or fact. Yet some authors have suggested that the various species of *Truxalis* are intended, an orthopterous genus closely allied to the locusts, and very numerous in Syria. In order to give colour to the conjecture, it has been asserted that the *Truxalidae* are insectivorous. This, as we ourselves and other naturalists have ascertained by observation, is incorrect, the genus being as strictly herbivorous as the locust (see Fischer, *Orthopt. Europ.* p. 292). Jewish commentators render *chargôl* by "grasshopper," the numerous species of which are closely allied to those of the locust tribe.

True beetles, or *Coleoptera*, are very numerous in Palestine, probably over 1000 species being recognised, in marked contrast to the small number of butterflies, *Lepidoptera*, for which the country is not so suitable. [H. B. T.]

BEHEADING. [PUNISHMENTS.]

BEHE'MOTH (בְּהֵמוֹת;[a] θηρία; *behemoth*). This word has long been considered one of the *dubia vexata* of critics and commentators, but modern commentators generally believe the hippopotamus to be denoted by the original word; and so R. V. marg^n.

Behemah and *behemoth* are general terms for all large mammalia, in which sense it is so constantly used in the Hebrew; and also the specific designation of the hippopotamus. To this animal, and to this alone, it can apply in the Book of Job; and in this case only the translators of A. V., being without accurate knowledge, wisely abstained from any attempt to render the original.



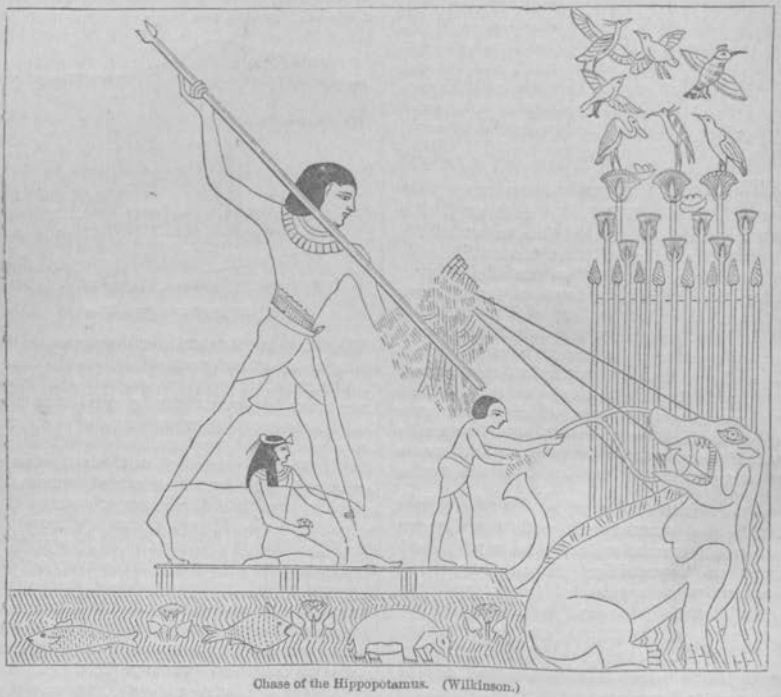
Hippopotamus amphibius.

Gesenius and Rosenmüller have remarked that since in the first part of Jehovah's discourse (Job xxxviii., xxxix.) *land animals and birds* are mentioned, it suits the general purpose of that discourse better to suppose that *aquatic or amphibious* creatures are spoken of in the last half of it; and that since the leviathan, by almost universal consent, denotes the crocodile, the behemoth seems clearly to point to the hippopotamus, his associate in the Nile. Harmer (*Observ.* ii. 319) says, "There is a great deal of beauty in the ranging of the descriptions of the behemoth and the leviathan, for in the Mosaic pavement the people of an Egyptian barque are represented as darting spears or some such weapons at one of the river-horses, as another of them is pictured with two sticking near his shoulders....It was then a customary thing with the old Egyptians thus to attack these animals (see woodcut below); if so, how beautiful is the arrangement: there is a most happy gradation; after a grand but just representation of the terribleness of the river-horse, the Almighty is represented as going on with His expostulations something after this manner:—'But dreadful as this animal is, barbed irons and spears have sometimes prevailed against him; but what wilt thou do with the crocodile? Canst thou fill his skin with barbed irons?'" &c. In the *Lithostrotum Praenestinum*, to which Mr. Harmer refers, there are two crocodiles, associates of three river-horses,

[a] Bochart, Gesenius, MV.[11], and others consider this word a hebraized form of the Egyptian *p-ehe-mau*, i.e. *Bos marinus* (see add. note to Job xl. 15 in *Speaker's Comm.*).

which are represented without spears sticking in them, though they seem to be within shot.

It has been said that some parts of the description in Job cannot apply to the hippopotamus: the 20th verse for instance, where it is said, "the mountains bring him forth food." This passage, many writers say, suits the elephant well, but cannot be applied to the hippopotamus, which is never seen on mountains. Again, the 24th verse (A. V.)—"his nose pierceth through snares"—seems to be spoken of the trunk of the elephant, "with its extraordinary delicacy of scent and touch, rather than to the obtuse perceptions of the river-horse." In answer to the first objection it has been stated, with great reason, that the word *hârim* (הָרִים) is not necessarily to be restricted to what we understand commonly by the expression "mountains." In the Praenestine pavement alluded to above, there are to be seen here and there, as Mr. Harmer has observed, "hillocks rising above the water." In Ezek. xliii. 15 (margin), the altar of God, only ten cubits high and fourteen square, is called [according to one etymology; see MV.[11]] "the mountain of God." "The eminences of Egypt, which appear as the inundation of the Nile decreases, may undoubtedly be called *mountains* in the poetical language of Job." But we think there is no occasion for so restricted an explanation. The hippopotamus, as is well known, frequently leaves the water and the river's bank as night approaches, and makes inland excursions for the sake of the pasturage, when he commits sad work among the growing crops (Hasselquist, *Trav.* p. 188). No doubt he might be often observed on the



Chase of the Hippopotamus. (Wilkinson.)

hill-sides near the spots frequented by him. Again, it must be remembered that the "mountains" are mentioned by way of contrast to the natural habits of aquatic animals generally, which never go far from the water and the banks of the river. but the behemoth, though passing much of his time in the water and in "the covert of the reed and fens," eateth grass like cattle, and feedeth on the hill-sides in company with the beasts of the field.[b] Livingstone observes that "they prefer to remain by day in a drowsy yawning state; and though their eyes are open, they take little notice of things at a distance." There is much beauty in the passages which contrast the habits of the hippopotamus, an amphibious animal, with those of herbivorous land-quadrupeds: but if the elephant is to be understood, the whole description is, comparatively speaking, tame.

With respect to the second objection, there is little doubt that the A. V. marginal reading is nearer the Hebrew than that of the A. V. "Will any take him in his sight, or bore his nose with a gin?" (see note [m] below). Perhaps this refers to leading him about alive with a ring in his nose, as, says Rosenmüller, "the Arabs are accustomed to lead camels," and we may add the English to lead bulls, "with a

[b] A recent traveller in Egypt, the Rev. J. L. Errington, writes to us. "The valley of the Nile in Upper Egypt and Nubia is in parts so very narrow, that the mountains approach within a few hundred yards, and even less, to the river's bank; the hippopotamus therefore might well be said to get its food from the mountains, on the sides of which it would grow."

ring passed through the nostrils." The expression in v. 17, "he moveth his tail like a cedar," has given occasion to much discussion; some of the advocates for the elephant maintaining that the word *zânâḥ* (זָנַב) may denote either extremity, and that here the elephant's trunk is intended. The parallelism, however, clearly requires the posterior appendage to be signified by the term. The expression seems to allude to the stiff unbending nature of the animal's tail, which in this respect is compared to the trunk of a strong cedar which the wind scarcely moves. The description of the animal's lying under "the shady trees," amongst the "reeds" and willows, is peculiarly applicable to the hippopotamus.[c] It has been argued that such a description is equally applicable to the elephant; but this is hardly the case, for though the elephant is fond of frequent ablutions, and is *frequently* seen near water, yet the *constant* habit of the hippopotamus, as implied in verses 21, 22, seems to be especially made the subject to which the attention is directed. The whole passage (Job xl. 15–24) may be thus literally translated:—

"Behold now Behemoth, whom I made with thee[d]; he eateth grass[e] like cattle.

"Behold now, his strength is in his loins, and his power in the muscles [so R. V.] of his belly.

"He moveth his tail like a cedar: the sinews of his thighs interweave one with another [R. V. "are knit together"].

"His bones[f] are as tubes of brass; his (solid) bones[g] each one as a bar of forged iron.

"He is (one of) the chief of the ways of God: his Maker hath furnished him with his scythe (tooth),[h]

"For the hills bring him forth abundant food, and all the beasts of the field have their pastime there.

"Beneath the shady trees[i] he lieth down, in the covert of the reed, and fens.[k]

"The shady trees[i] cover him with their shadow; the willows of the brook surround him.

"Lo! the river swelleth proudly against him, yet he is not alarmed: he is securely confident though a Jordan[l] burst forth against his mouth.

"Will any one capture him when in his sight?[m] will any one bore his nostril in the snare?"

This description agrees in every particular

---

[c] "At every turn there occurred deep, still pools, and occasional sandy islands densely clad with lofty reeds. Above and beyond these reeds stood trees of immense age, beneath which grew a rank kind of grass on which the sea-cow delights to pasture" (G. Cumming, p. 297).

[d] עִמָּךְ. Bochart says, "near thee," *i. e.* not far from thy own country. Gesenius and Rosenmüller translate the word "pariter atque te." Cary understands it, "at the same time as I made thee."

[e] חָצִיר "grass," not "hay," as the Vulg. has it, and some commentators: it is from the Arabic خضر, "to be green." The Hebrew word occurs in Num. xi. 5, in a limited sense to denote "leeks."

[f] עֶצֶם seems to refer here to the bones of the legs more particularly; the marrow-bones.

[g] גִּרְמֵי perhaps here denotes the rib-bones [so R. V. in marg.; in text "limbs"], as is probable from the singular number כְּמִטְיל בְּרְזֶל, which appears to be distributive and thereby emphatic. See Rosenmüll. *Schol.* in loco.

[h] "With these apparently combined teeth the hippopotamus can cut the grass as neatly as if it were mown with the scythe, and is able to sever, as if with shears, a tolerably stout and thick stem" (Wood's *Nat. Hist.* i. 762). חֶרֶב, perhaps the Greek ἄρπη. See Bochart (iii. 722), who cites Nicander (*Theriac.* 566) as comparing the tooth of this animal to a scythe. The next verse explains the purpose and use of the "scythe" with which God has provided His creature; viz. in order that he may eat the grass of the hills. A. V. and R. V. render the latter part of this verse as follows: "He *only* that made him can make his sword to approach *unto him*."

[i] תַּחַת־צְאָלִים; *ὑπὸ παντοδαπὰ δένδρα; sub umbra.* A. Schultens, following the Arabic writers Saadias and Abulwalid, was the first European commentator to propose "the lotus-tree" [so R. V.] as the signification of the Hebrew צְאָל, which occurs (as a plural) only in this and the following verse of Job. He identifies the Hebrew word with the Arabic ضَال, which according to some authorities is another name for the سِدر (*sidr*), the lotus of the ancient "lotophagi," *Zizyphus lotus*. It would appear, however, from Abu'lfadli, cited by Celsius (*Hierob.* ii. 191), that the *Dhâl* is a species distinct from the *Sidr*, which latter plant was also known by the name *Salam*. Sprengel identifies the *Dhâl* with the Jujube-tree (*Zizyphus vulgaris*). The other species, in Arabic نبك, *nubk*, is identical with the Hebrew נַעֲצוּץ, *na'atzootz*, and is the *Zizyphus spina-christi* of naturalists (Is. vii. 19). But even if it were proved that the צְאָל and the ضَال were identical, the explanation of the ضَال by Freytag, "Arbor quae remota a fluminibus nonnisi pluviâ rigatur, *aliis*, lotus Kam. Dj." does not warrant us in associating the tree with the reeds and willows of the Nile. Gesenius, strange to say, supposes the reeds (out of which numerous birds are flying in the woodcut [supra, p. 384] from Sir G. Wilkinson's work, and which are apparently intended to represent the *papyrus* reeds) to be the lote lilies. His words are: "At any rate, on a certain Egyptian monument which represents the chase of the hippopotamus, I observe this animal concealing himself in a wood of water-lotuses—*in loti aquaticae sylvâ*" (Wilkinson, *Customs and Manners*, iii. 71). We prefer the rendering of the A. V. "shady trees;" and so read Vulg., Kimchi, and Ibn Ezra, the Syriac and the Arabic, with Bochart. Rosenmüller takes צְאָלִים, "more Aramaeo pro צְלָלִים, ut וַיִּמְאַס pro וַיִּמְסַס, supra vii. 5, et Ps. lviii. 8" (*Schol. ad Job.* xl. 21).

[k] See woodcut (p. 384). Compare also Bellonius, quoted by Bochart: "Vivit arundinibus et cannis sacchari et foliis papyri herbae."

[l] The name of Jordan is used poetically for any river, as the Greek poets use Ida for any mountain and Achelous for any water (Rosenmüll. *Schol.*), or perhaps in its original meaning, as simply a "rapid river" (see Stanley, *S. & P.* § 37). This verse seems to refer to the inundation of the Nile, and is rendered by R. V. "Behold, if a river overflow, he trembleth not. He is confident, though Jordan swell even to his mouth."

[m] This seems to be the meaning implied. Compare in the case of Leviathan, xli. 2, 5; but see also Cary's rendering, "He receiveth it (the river) up to his eyes." R. V. 'Shall any take him when he is on the watch, or pierce through his nose with a snare?"

with the hippopotamus, which we fully believe to be the representative of the Behemoth of Scripture.

According to the Talmud, Behemoth is some huge land-animal which daily consumes the grass off a thousand hills; he is to have at some future period a battle with Leviathan. On account of his grazing on the mountains, he is called "the bull of the high mountains" (see Lewysohn, *Zool. des Talmuds*, p. 355). "The 'fathers,' for the most part," says Cary (Job, p. 402), "surrounded the subject with an awe equally dreadful, and in the Behemoth here, and in the Leviathan of the next chapter, saw nothing but mystical representations of the devil; others again have here pictured to themselves some hieroglyphic monster that has no real existence; but these wild imaginations are surpassed by that of Bolducius, who in the Behemoth actually beholds Christ!".

The hippopotamus, as being the largest quadruped known to the Israelites, was well distinguished as *Behemoth, the* beast *par excellence*. The genus is peculiar to the African continent, through the whole of which the species *Hippopotamus amphibius* is found from Abyssinia southward. We have, as has been seen, abundant historic evidence of its former existence throughout the whole course of the Nile. There is one other living species, a smaller animal, *Hippopotamus liberiensis*, on the West Coast of Africa, distinguished by having only two incisors in the lower jaw. It is quite possible that in former times the hippopotamus may have extended into Palestine, just as the crocodile still exists in the marshes under Mount Carmel. Five extinct species are found in the late tertiary deposits of the Sevalik range in India (Cautley and Falconer, *Faun. Antiq. Sival.* vii.; *Asiatic Researches*, 1836, xix. 39, and 1838, vii. 1014). Two other species are found in great abundance in the later gravels of Britain and Western Europe, along with shells of many species now existing in the locality, proving that the temperature has not very much changed, and that the extinct species inhabited cold and temperate climates.

The Book of Job alludes to the chase of the hippopotamus, as depicted on the Egyptian monuments. A similar method is still practised by the negroes, who float down a river on a raft or canoe, so as not to alarm the herd, and then strike one with a barbed weapon, to which a long line and buoy are attached. The animal, unable to disengage himself, is then rapidly pursued, and struck every time he comes to the surface, till he is worn out by loss of blood. But the more ordinary method of capture is by pitfalls, carefully concealed, across the paths they frequent in going by night to their pasture-grounds. The pitfalls are spiked at the bottom with sharp stakes, and require much care in their construction, for the caution and suspicion of the animal are great. "His nose pierceth through snares;" but when once he has inadvertently trodden on the treacherous platform, his despatch is easy.

The skin of the hippopotamus is cut into whips by the Dutch colonists of S. Africa, and also by the Nubians, and the monuments of Egypt testify that a similar use was made of the skin by the ancient Egyptians (Wilkinson, *Anc. Egypt.* i. 240 [1878]). The inhabitants of S. Africa hold the flesh of the hippopotamus in high esteem; it is said to be not unlike pork.

The hippopotamus belongs to the order *Pachydermata*, class *Mammalia*. [W. H.] [H. B. T.]

BE'KAH. [WEIGHTS.]

BEL. [BAAL.]

BEL AND DRAGON. [DANIEL, APOCRYPHAL ADDITIONS TO.]

BE'LA (בֶּלַע; *A.D.* Βάλακ in Gen. xiv. 2, 8, E. Βαλὰ in Gen. xiv. 2; *Bela; a swallowing up*, or *destruction*. In the *Liber Nom. Hebr.* in St. Jerome's works, tom. ii., it is corrupted to Σαλαὶ in the Cod. Reg.; but in the Cod. Colbert. it is written Βαλλά,[a] and interpreted *καταποντισμός* (see Ps. lv. [liv.] 9, LXX.). Jerome appears to confound it with בַּעַל, where he renders it "*habens*, sive devorans:" and with בָּלָה, where he says, "Balla, absorpta sive *inveterata*").

1. One of the five cities of the plain which was spared at the intercession of Lot, and received the name of Zoar (צוֹעַר), *smallness*, i.e. *a little one* (Gen. xiv. 2; xix. 22, LXX. Σήγωρ). It lay on the south-western extremity of the Dead Sea, on the frontier of Moab and Palestine (Jerome on Is. xv. 5; cp. Jer. xlviii. 34; Gen. xiii. 10). We first read of Bela in Gen. xiv. 2, 8, where it is named with Sodom, Gomorrah, Admah, and Zeboiim, as forming a confederacy under their respective kings, in the vale of Siddim, to resist the supremacy of the king of Shinar and his associates. It is singular that the king of Bela is the only one of the five whose name is not given; and this, as Delitzsch [*Genesis*, 1887, in loco] points out, may be a mark of genuineness in the narrative. The writer did not know the king's name and did not create one. But it also suggests the probability of *Bela* having been his own name, as well as the name of his city, which may have been so called from him. The tradition of the Jews was that it was called *Bela* from having been repeatedly engulphed by earthquakes; and in the passage Jer. xlviii. 34, "From Zoar even unto Horonaim (have they uttered their voice) as an heifer[b] of three years old," and in Is. xv. 5, they absurdly fancied an allusion to its destruction by three earthquakes (Jerome, *Quaest. Heb. in Gen.* xiv.). There is nothing improbable in itself in the supposed allusion to the *swallowing up* of the city by an earthquake, which בָּלַע exactly expresses (Num. xvi. 30); but the repeated occurrence of בָּלַע, and words compounded with it, as names of men, rather

[a] Βαλλὰ is also the reading of *A.D.* for *Bera* [E. Βαρὰ] in Gen. xiv. 2.

[b] In both passages the cry of the distressed Moabites is by A. V. compared to the lowing of a heifer whose calf has been taken from her. The R. V., on the other hand, takes the words עֶגְלַת שְׁלִשִׁיָּה to represent a proper name, Eglathshelishiyah. The authorities and arguments on both views are given in Delitzsch, *Isaiah*[4] xv. 5.—[F.]

favours the notion of the city having been called *Bela* from the name of its founder. This is rendered yet more probable by *Bela* being the name of an Edomitish king in Gen. xxxvi. 32 [A. Βαλάκ, E. -έκ]. For further information see De Saulcy's *Narrative*, i. 457–481, and Stanley's *S. and P.* p. 285. [ZOAR.]

2. Son of Beor (Gen. xxxvi. 32), who reigned over Edom in the city of DINHABAH, eight generations before Saul, king of Israel, or about the time of the Exodus. Bernard Hyde, following some Jewish commentators (Targ.-Jonathan here, and Targ. on 1 Ch. i. 44; cp. Simon. *Onomast.* 142, note), identifies this Bela with Balaam the son of Beor; but the evidence from the name does not seem to prove more than identity of family and race.* There is nothing whatever to guide us as to the age of Beor, the founder of the house from which Bela and Balaam sprung. Beor (בְּעֹר) is of a decidedly Chaldee or Aramean form, like Peor (פְּעֹר), Pethor (פְּתוֹר), Rehob (רְחֹב), and others: and we are expressly told that Balaam the son of Beor dwelt in Pethor, which is by the river of the land of the children of his people, *i.e.* the river Euphrates; and he himself describes his home as being in Aram (Num. xxii. 5; xxiii. 7). Saul again, who reigned over Edom after Samlah, came from Rehoboth by the river Euphrates (Gen. xxxvi. 37). We read in Job's time of the Chaldeans making incursions into the land of Uz, and carrying off the camels and slaying Job's servants (Job i. 17). In the time of Abraham we have the king of Shinar apparently extending his empire so as to make the kings on the borders of the Dead Sea his tributaries, and with his confederates extending his conquests into the very country which was afterwards the land of Edom (Gen. xiv. 6). Putting all this together, we may conclude with some confidence that Bela the son of Beor, who reigned over Edom, was a Chaldean by birth, and reigned in Edom by conquest. He may have been contemporary with Moses and Balaam. Hadad, of which name there were two kings (Gen. xxxvi. 35, 39), is probably another instance of an Aramean king of Edom, as we find the name Benhadad as that of the kings of Syria, or Aram, in later history (1 K. xx.). Compare also the name of Hadad-ezer, king of Zobah, in the neighbourhood of the Euphrates (2 Sam. viii. 3, &c.). The passage Gen. xxxvi. 31–39 is given in duplicate 1 Ch. i. 43–51.

3. Eldest son of Benjamin, according to Gen. xlvi. 21;* Num. xxvi. 38; 1 Ch. vii. 6, viii. 1, and head of the family of the Belaites. The houses of his family, according to 1 Ch. viii. 3–5, were Addar, Gera, Abihud (only named here), Abishua (only named here), Naaman, Ahoah, Shupham, and Haram. It is, perhaps, worth noticing that as we have Husham by the side of Bela among the kings of Edom (Gen. xxxvi. 34), so also by the side of Bela, son of Benjamin, we have the Benjamite family of Hushim (1 Ch. vii. 12), sprung apparently from a foreign woman of that name, whom a Benjamite took to wife in the land of Moab (1 Ch. viii. 8–11). [BECHER.]

4. Son of Ahaz, a Reubenite (1 Ch. v. 8; B. Βαλέκ, A. Βάλα). It is remarkable that his country too was "in Aroer, even unto Nebo and Baal-meon; and eastward he dwelt even unto the entering in of the wilderness from the river Euphrates" (*vv.* 8, 9, R. V.). [A. C. H.]

* In A. V. "Belah," R. V. "Bela."

BE'LAH. [BELA, 3.]

BE'LAITES, THE (הַבַּלְעִי), Num. xxvi. 38 [LXX. *v.* 42, B. ὁ Βαλεέλ, AF. Βαλεί; *Belaitæ*], descendants of BELA [No. 3]. [W. A. W.] [F.]

BE'LEMUS (Βήλεμος; *Balsamus*), 1 Esd. ii. 16 [LXX. *v.* 15]. [BISHLAM.] [W. A. W.]

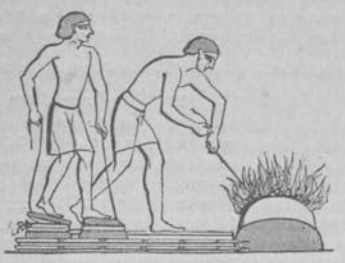
BE'LIAL. The translators of the A. V., following the Vulgate, have frequently treated the word בְּלִיַּעַל as a proper name, and given it in the form *Belial*, in accordance with 2 Cor. vi. 15. This is particularly the case where it is connected with the expressions אִישׁ, *man of*, or בֶּן־, *son of*: in other instances it is translated *wicked* or by some equivalent term (Deut. xv. 9; Ps. xli. 8, ci. 3; Prov. vi. 12, xvi. 27, xix. 28; Nah. i. 11, 15). The R. V. imitates the A. V. in this variety of treatment, if it is often careful to note in the margin the proper meaning of the expression (*e.g.* Deut. xiii. 13; Judg. xix. 22, xx. 13). But there can be no question that the word is not to be regarded in the O. T. as a proper name, or as a designation of Satan; its meaning there is *worthlessness*, and hence *recklessness*, *lawlessness*. Its etymology is uncertain: the first part בְּלִי = *without*; the second part is derived by most moderns from יָעַל, *profit*; so that the entire word signifies *worthlessness*. The expression *son* or *man of Belial* thus means simply a worthless, lawless fellow (παράνομος, LXX.): it occurs frequently in this sense in the Historical Books (Judg. xix. 22, xx. 13; 1 Sam. i. 16, ii. 12, x. 27, xxv. 17, 25, xxx. 22; 2 Sam. xvi. 7, xx. 1; 1 K. xxi. 10; 2 Ch. xiii. 7), and only once in the earlier Books (Deut. xiii. 13). The adjunct אִישׁ is occasionally omitted, as in 2 Sam. xxiii. 6 and Job xxxiv. 18, where בְּלִיַּעַל stands by itself, as a term of reproach.

In the N. T. the term appears in the form Βελίαρ (originally, no doubt, due to a corruption of *l* into *r*, but explained by later Syriac writers as = בלאיר, "Lord of the air;" cp. Eph. ii. 2) and not Βελίαλ, as given in the A. V. The change of λ into ρ is found occasionally (cp. Ges. *Thes.* s. l. ל; *e.g.* מְזָרוֹת, Job xxxviii. 32, for מְזָלוֹת, 2 K. xxiii. 5). The same change occurred in the Doric dialect (φαῦρος for φαῦλος), with which the Alexandrine writers were most familiar. The term as used in 2 Cor. vi. 15 is generally understood as an appellative of Satan [the word used by the Peshiṭto Version], as the personification of all that was bad (see note in *Speaker's Comm.*). This use of Belial (usually in the form Beliar) is also found in the *Sibyll. Books*, the *Ascension of Isaiah*, and the *Test. of XII. Patriarchs*. Bengel (*Gnomon* in loc.) explains it of Antichrist, as more strictly the opposite of Christ (*omnem colluviem anti-*

christianam notare videtur). Cp., on the subject generally, Schrader in Schenkel's *Bib.-Lex.* and Baudissin in Herzog, *RE.*[2] s. n.

[W. L. B.] [F.]

BELLOWS (מַפֻּחַ; *φυσητήρ*, LXX.). The word occurs only in Jer. vi. 29, "The bellows are burned" [R. V. in text, "blow fiercely"]; where their use is to heat a smelting furnace. They were known even in the time of Moses, and perhaps still earlier, since the operations of a foundry would be almost impossible without them. A picture of two different kinds of bellows, both of highly ingenious construction, may be found in Wilkinson, *Anc. Egypt.* ii. 316 [1878]. "They consisted," he says, "of a leather, secured and fitted into a frame, from which a long pipe extended for carrying the wind to the fire. They were worked by the feet, the operator standing upon them, with one under each foot, and pressing them alternately while he pulled up each exhausted skin with a string he held in his hand. In one instance we observe from the painting, that when the man left the bellows, they were raised as if inflated with air; and this would imply a knowledge of the valve. The pipes even in the time of Thothmes III., [supposed to have been] the contemporary of Moses, appear to have been simply of reed, tipped with a metal point to resist the action of the fire."



Egyptian Bellows. (Wilkinson.)

Bellows of an analogous kind were early known to the Greeks and Romans. Homer (*Il.* xviii. 470) speaks of twenty *φῦσαι* in the forge of Hephaestos, and they are mentioned frequently by ancient authors (*Dict. of Ant.*, art. *Follis*). Ordinary hand-bellows, made of wood and kid's-skin, are used by the modern Egyptians, but are not found in the old paintings. They may however have been known, as they were to the early Greeks. [F. W. F.]

BELLS. There are two words thus translated in the A. V. and R. V., viz. פַּעֲמֹן, Ex. xxviii. 33 (from פַּעַם, *to strike*; *κώδωνες*, LXX.), and מְצִלּוֹת, Zech. xiv. 20 (*τὸ ἐπὶ τὸν χαλινὸν τοῦ ἵππου*, LXX.; Vulg. *fraena*; A. V. marg. "bridles;" from צָלַל, *to sound, tingle*).

In Ex. xxviii. 33 the bells alluded to were the golden ones, according to the Rabbis 72 in number (Winer, s. v. *Schellen*),[a] which alternated with the three-coloured pomegranates round the hem of the high-priest's מְעִיל or ephod (Jos. *Ant.* iii. 7, § 4). The object of them was that his sound might be heard when he went in unto the holy place, and when he came out, that he die not (Ex. xxviii. 35); or "that as he went there might be a sound, and a noise made that might be heard in the Temple, for a memorial to the children of his people" (Ecclus. xlv. 9; cp. Luke i. 9, 21). No doubt they answered the same purpose as the bells used by the Brahmins in the Hindoo ceremonies, and by the Roman Catholics during the celebration of mass. They were not simply ornamental. To this day bells are frequently attached, for the sake of their pleasant sound, to the anklets of women. [ANKLET.] The little girls of Cairo wear strings of them round their feet (Lane, *Mod. Eg.* ii. 370), and at Koojar Mungo Park saw a dance "in which many performers assisted, all of whom were provided with little bells fastened to their legs and arms." But the bells on the high-priest's robes were to warn the people, and the priest himself, of the solemnity of his duties on the great Day of Atonement. Since even Philo gives no *special* symbolic significance to the bells in speaking of the "golden robes" (*de Profug.* 20; *de migr. Abrah.* 18, &c.), we can hardly accept Bähr's suggestion (*Symbolik*, ii. 126) that they were meant to indicate the duty of the high-priest as an *announcer* of truth. Josephus, in his *Antiquities* (iii. 7, § 4), only speaks of their beauty; in his *Jewish War* he makes the somewhat inane suggestion that the bells signified thunder and the pomegranates lightning (*B. J.* v. 5, § 7).

In Zech. xiv. 20, "bells of the horses" (where our marg. Vers., "bridles," follows the LXX.), the Heb. word is almost the same as מְצִלְתַּיִם, "a pair of cymbals;" and as they are supposed to be inscribed with the words "Holiness unto the Lord," it is probable that they were not bells as usually understood, but "concave or flat pieces of brass, which were sometimes attached to horses for the sake of ornament" (Jahn, *Arch. Bibl.* § 96). Indeed, they were probably the same as the שַׁהֲרֹנִים, *μηνίσκοι* (Is. iii. 18; Judg. viii. 21), lunulae of gold, silver, or brass used as ornaments, and hung by the Arabians round the necks of their camels, as we still see them in England on the harness of horses (see *Speaker's Comm.* note on Zech. xiv. 20; cp. Babelon, *Manuel d'Archéologie Orientale*, pp. 151–2). They were not only ornamental, but useful, as their tinkling tended to enliven the animals; and in the caravans they thus served the purpose of our modern sheep-bells. The comparison to the *κώδωνες* used by the Greeks to test horses seems out of place; and hence Archbishop Secker's explanation of the verse, as meaning that war-horses would become useless, and their trappings would be converted to sacred purposes, is untenable. The general meaning of the passage, as appears from the context, is that true religion will then be universally professed. [F. W. F.]

[a] Justin Martyr (*Dial.* 42) says that they were 12 in number, and makes them a symbol of the Apostles. Otto thinks that he confused the bells with the 12 gems of the Urim.

BEL'MAIM (BA. Βελβαίμ, א. Ἀβελβαίμ; *Belma*), a place which, from the terms of the passage, would appear to have been near Dothaim (Judith vii. 3). The name is perhaps retained in

'Ain and *Wâdy Belâmeh* south of *Jenîn*. Possibly it is the same as BELMEN. The Syriac has Abel-meholah. [G.] [W.]

BEL'MEN (B. Βαιλμαίν, ℵ. 'Αβελμαίν, A. Βελμαίν; Vulg. omits), one of the places to which the Jews sent messengers on the approach of Holofernes (Judith iv. 4). The Hebrew name would seem to have been Abelmaim, but the only place of that name in the O. T. was far to the north of the locality here alluded to. [ABEL-BETH-MA'ACHA.] The Syriac Version has Abel-meholah, which is more consistent with the context. [ABEL-MEHOLAH; BELMAIM.] See *Speaker's Comm.* on Judith iv 4. [G.] [W.]

BELSHAZ'ZAR (בֶּלְשַׁאצַּר, Dan. v. 1, &c.; בַּלְאשַׁצַּר, vii. 1; Βαλτάσαρ; *Baltasar*), according to the well-known scriptural narrative, the last native king of Babylon, spoken of in Dan. v., vii., viii. It is in the first of the above-named places — namely, the fifth chapter—that the account of Belshazzar's feast, the appearance of the handwriting on the wall, Daniel's interpretation of it, in which he foretells Belshazzar's overthrow, which was accomplished that very night, is given. Except in Josephus (*Ant.* x. ch. xi § 2) and the Book of Daniel, his name does not occur. Most scholars, however, taking into consideration that Josephus, when speaking of him, says, "Baltasar, who by the Babylonians was called Naboandelos," have identified him with this king, whose name appears also under the forms Nabonidos, Nabonnedos, Nabonadios, Nabannidochus, and Labynetos.

Belshazzar's name, however, occurs rather frequently in the cuneiform inscriptions of Babylonia; and he is, besides, often referred to when not mentioned by name. The most common form of the name is  , read *Bêl-šarra-ûsur*, composed of the name of the god Bel (Belos or Baal, Heb. בַּעַל), the accusative of the word *šarru*, "king" (Heb. שַׂר), and the imperative masc. sing. of *naṣâru*, "to protect" (Heb. נָצַר), the whole meaning, "Bel, protect the king!" The best-known passage in Babylonian literature in which his name occurs is that in which Nabonidus, his father, speaks of him in the following words: "and as for Bêl-šarra-ûsur, the firstborn son proceeding from my body, cause thou the reverence of thy great divinity to exist in his heart; and may he not give way to sin, may he be satisfied with fulness of life."[a] Belshazzar is also often mentioned on contract-tablets. One of these, dated the 26th day of Ve-Adar in the 1st year of Nabonidus, records a transaction concerning a plot of ground adjoining "the house of the son of the king," made seemingly through Bêl-rêṣûa, "servant of Belshazzar the son of the king." In the 3rd and 7th years of Nabonidus also transactions took place in which Belshazzar's servants (Nabû-šarra-ûṣur his scribe, Nabû-ṣabit-kâtâ his major-domo, and Nabû-ukîn-âḫê, messenger of his chief slave) were contracting parties. In the 11th year of Nabonidus, Belshazzar lent, through his major-domo, the sum of 20 mana of silver to Iddin-Marduk, whose property was to be Belshazzar's security for the repayment of the loan. Besides these and other commercial transactions and relations entered into by and for him, there are many records of the son of the king (that is, Belshazzar) having made gifts to the temples of Babylonia, chiefly to the shrine of the Sun-god in Ê-bara (or Ê-babara), within Sipar, the city identified with Sippara and the Biblical Sepharvaim. One of the most interesting of these notices records that, on the 5th day of Ab in the 17th year of Nabonidus—seemingly only a month or two before his death—Belshazzar paid ⅔rds (of a mana) and 7 shekels of silver on behalf of his sister Ina-Ê-sagila-rêmat, this sum representing the amount of tithe owing by her to the offertory-house at Sipar or Sepharvaim.[b]

As has been above remarked, Belshazzar frequently gave offerings to the temple of the Sun-god at Sipar, the reason of this probably being that he was commander of the army, which seems to have been permanently stationed in Akkad, the tract of country from which Akkad, which was apparently the twin city with Sipar or Sepharvaim, took its name. The Babylonian Chronicle informs us, in the entries for the years 7–11 of Nabonidus, that "the son of the king" was with the army in Akkad in each of those years, and a complete record is only missing, apparently, by the mutilation of the text. The gap extends, practically, from the 11th to the 17th year of Nabonidus, where the chronicle again resumes its interesting story. In the account of events in the 17th year of Nabonidus,

[a] The last eight lines of the inscription on the cylinders (four in number), found at the corners of the temple of the Moon-god at Muḳeyyor, the supposed Ur of the Chaldees (*Cuneiform Inscriptions of Western Asia*, vol. i., pl. 68). Sir H. C. Rawlinson deciphered this text in 1854.

[b] Whether, before Nabonidus became king of Babylonia, the family to which he belonged were in the public service or not, is doubtful. Belshazzar's trade-transactions seem to imply that they were merchants. All we know about Nabonidus's ancestry is the single fact stated in some of his records, that he was son (or descendant) of Nabû-balaṭ-su-iḳbî, the *rubû êmgu*, or "deeply-wise prince." Nabonidus seems to have followed in his father's footsteps, for he was certainly learned, being, as we now know, an ardent antiquarian. If learning were the speciality of the family, we have thus an explanation why Nabonidus was raised to the throne. This view would be borne out if it could be proved that the Belshazzar, "son of Balaṭu" (a possible abbreviation for Nabû-balaṭ-su-iḳbî, just as *Nadinu* is short for *Nabû-nadin-šumi*), who borrows some grain from Dâan-šum-iddin in the 1st year of Nabonidus, and who appears, in the usual place at the end of the list of witnesses, as the *scribe who wrote the tablet*, was really the son of king Nabonidus. This Belshazzar, who was probably the only one among the group of traders then assembled who could write a good hand, appears again five months later; and after this we have the name of his brother, Nabû-ukîn-âbli, son of *Nabonidus*, son of Balaṭu. If the Belshazzar mentioned in these documents be the Belshazzar of the Book of Daniel, and Nabonidus his father the well-known king, it would point to the probability, that Nabonidus was well advanced in years before he came to the Babylonian throne; Rêmut, son of Nabû-ukîn-âbli, descendant of Balaṭu (grandson of Nabonidus, and nephew of Belshazzar, descendants of Balaṭu), being witness to a contract in the first year of Nabonidus.

it is stated that Cyrus, after fighting a battle at Opis, had some conflicts with "the men of Akkad, and took Sipar on the 14th day of Tammuz without fighting. Nabonidus fled." From this last statement it would seem as if Nabonidus and Belshazzar had changed places, the former being with the army in Akkad, and the latter at Babylon. On the 16th day of Tammuz —two days latter—Ugbaru (Gobryas) and the army of Cyrus descended to Babylon without fighting. It was not until the 3rd of Marcheswan (nearly four months later) that Cyrus arrived at Babylon, and he at once "established peace to the city." Throughout the narrative of the taking of Babylon, Belshazzar is not once mentioned, but there is one passage to which, perhaps, an amendment may be proposed. As is well known, Belshazzar was, according to Daniel v., killed in the night, and Xenophon (*Cyrop.* vii. 5, 3) tells us that Babylon was taken by Cyrus during the night, whilst the inhabitants were engaged in feasting and revelry, and that the king was killed. So in the Babylonian Chronicle, lines 22–24, we have the statement that "On the night of the 11th of Marcheswan, Ugbaru (Gobryas) [descended ?] against [Babylon ?], and the king died. From the 27th of Adar until the 3rd of Nisan there was weeping in Akkad. All the people bowed their head." The most doubtful character in the above extract is that which stands for the word "and," the character in question having been regarded as the *large group* which stands for that word. A close examination of the original, however, shows that it is possible that there are two characters instead of one—namely, the *small* character for "and" and the character *tur*, which, in this connexion, would stand for *u mâr*, "and the son of," in which case the line would read, "and *the son of* the king died." Weeping in Akkad for Belshazzar is just what would be expected, when we take into consideration that he was for many years with the army there, and that he must have made himself a favourite by his liberality to the Akkadian temples. Even supposing, however, that the old reading is the right one, it is nevertheless possible that the passage refers to Belshazzar; for Berosus relates that Nabonidus, on surrendering to Cyrus, had his life spared, and that a principality or estate was given to him in Carmania, where he died. It is therefore at least probable that Belshazzar was regarded, even by the Babylonians, as king, especially after his father's surrender. With this improved reading of the Babylonian text, it is impossible to do otherwise than identify Gobryas with DARIUS the Mede (if we suppose that the last verse of the 5th chapter of Daniel really belongs to that chapter, and does not form part, as in the Hebrew text, of chapter vi.), he being mentioned, in the Babylonian Chronicle, in direct connexion with the death of the king's son (or the king, as the case may be). This identification, though not without its difficulties, receives a certain amount of support from Daniel vi. 1, where it is stated that "it pleased Darius to set over the kingdom an hundred and twenty princes," &c.—an act which finds parallel in the Babylonian Chronicle, which states that, after Cyrus promised peace to Babylon, "Gobryas, his governor, appointed governors in Babylon."

As has been shown above, Belshazzar was most likely not of royal race, Nabonidus, in his records, only stating, that he was son or descendant of Nabû-balaṭ-su-iḳbî. There is, in fact, no confirmation, in the Babylonian records, of the statement in Daniel v. 2, 11, 13, and 18, that Nebuchadnezzar was his father or grandfather. It is not improbable, however, that he really was descended from him on his mother's side, as has been suggested by Rawlinson (*Herod.* Essay viii. § 25), who connects Belshazzar, through his mother, with Nebuchadnezzar, regarding it as very likely that Nabonidus, who was certainly not descended from Nebuchadnezzar, would try to strengthen his position by marrying the daughter of that king, who would thus be Belshazzar's maternal grandfather. Belshazzar's death took place in 538 B.C., when he was probably about 57 years old. [T. G. P.]

BELTESHAZZAR. [DANIEL.]

BEN (בֵּן = *son*; LXX. omits; *Bεν*), a Levite "of the second degree," one of the porters appointed by David to the service of the ark (1 Ch. xv. 18). [W. A. W.]

BENA'IAH (בְּנָיָהוּ and בְּנָיָה = *built by Jah*; B. Βαναΐας or -ά, A. -αΐας, ℵ. Βανέας or Βεν- ; *Banaïas*), the name of several Israelites:—

1. BENAIAHU, the son of Jehoiada the chief priest (1 Ch. xxvii. 5), and therefore of the tribe of Levi, though a native of Kabzeel (2 Sam. xxiii. 20; 1 Ch. xi. 22), in the south of Judah; set by David (1 Ch. xi. 25) over his body-guard of Cherethites and Pelethites (2 Sam. viii. 18; 1 K. i. 38; 1 Ch. xviii. 17; 2 Sam. xx. 23), and occupying a middle rank between the first three of the Gibborim or "mighty men" and the thirty "valiant men of the armies" (2 Sam. xxiii. 22, 23; 1 Ch. xi. 25, xxvii. 6; and see Kennicott, *Diss.* p. 177). The exploits which gave him this rank are narrated in 2 Sam. xxiii. 20, 21; 1 Ch. xi. 22. He was captain of the host for the third month (1 Ch. xxvii. 5).

Benaiah remained faithful to Solomon during Adonijah's attempt on the crown (1 K. i. 8, 10), a matter in which he took part in his official capacity as commander of the king's body-guard (1 K. i. 32, 38, 44); and after Adonijah and Joab had both been put to death by his hand, he was raised by Solomon into the place of the latter as commander-in-chief of the whole army (ii. 35, iv. 4).

Benaiah appears to have had a son, called after his grandfather, Jehoiada, who succeeded Ahithophel about the person of the king (1 Ch. xxvii. 34). But this is possibly a copyist's mistake for "Benaiah the son of Jehoiada."

2. BENAIAH the PIRATHONITE (BA. om. in 2 Sam.; Vulg. in 2 Sam. and 1 Ch. xi. *Banaia*), an Ephraimite, one of David's thirty mighty men (2 Sam. xxiii. 30; 1 Ch. xi. 31), and the captain of the eleventh monthly course (1 Ch. xxvii. 14).

3. BENAIAHU (1 Ch. xv. 18, Βαναΐα); a Levite in the time of David, who "played with a psaltery on Alamoth" (1 Ch. xv. 18, 20, xvi. 5).

4. BENAIAHU; a priest in the time of David, appointed to blow the trumpet before the ark (1 Ch. xv. 24 [BℵA. Βαναΐ], xvi. 6 [BℵA. -αΐας]).

5. BENAIAH (A. Βαναΐας, B. om.); a Levite of the sons of Asaph (2 Ch. xx. 14).

6. BENAIAHU; a Levite in the time of Hezekiah, one of the "overseers (פְּקִידִים) of offerings" (2 Ch. xxxi. 13).

7. BENAIAH (A. Βαναιά; *Banaia*), one of the "princes" (נְשִׂיאִים) of the families of Simeon (1 Ch. iv. 36).

8. BENAIAH; a name common to four laymen in the time of Ezra who had taken strange wives (Βαναιά; Vulg. 1. *Banea*; 2. *Baneas*; 4. *Banaia*). 1 (Ezra x. 25, א. Μαν-) [BAANIAS]; 2 (Ezra x. 30) [NAIDUS]; 3 (x. 35); and 4 (x. 43) [BANAIAS].

9. BENAIAHU; father of Pelatiah, "a prince of the people" in the time of Ezekiel (xi. 1, 13).

[W. A. W.] [F.]

BEN-AM'MI (בֶּן־עַמִּי, *son of my kindred*), the son of the younger daughter of Lot, and the progenitor of the Ammonites (Gen. xix. 38). The LXX. (ed. Swete) and Vulgate enlarge upon the Hebrew text, by inserting the name of Ammon, as well as the explanation of it: καὶ ἐκάλεσεν τὸ ὄνομα αὐτοῦ Ἀμμάν ὁ υἱὸς τοῦ γένους μου; *Ammon, id est filius populi mei.* J. Derenbourg (*REJ.* ii. 123) and Halévy (*JAs.* vii. 19, p. 480) take Ammi to have become a local name of the god Ammon, as preserved by the cuneiform inscriptions in the name Ammi-nadab, a parallel to Chemosh-nadab (see Dillmann[5] on Gen. *l. c.*). [W. A. W.] [F.]

BENE'-BERA'K (בְּנֵי־בְרַק; B. Βαναι-βακάτ; A. Βαγηβαράκ; *et Bane et Baruch*; Syr. ܒܢܝ ܒܪܩ), one of the cities of the tribe of Dan, mentioned only in Josh. xix. 45. The paucity of information which we possess regarding this tribe (omitted entirely from the lists in 1 Ch. ii.-viii., and of which only one family is mentioned in Num. xxvi.) makes it impossible to say whether the "sons of Berak" who gave their name to this place belonged to Dan; or were, as we may perhaps infer from the name, earlier settlers dispossessed by the tribe. The reading of the Syriac, Baal-debak, is not confirmed by any other Version. Bene-barak is mentioned, with Joppa and Beth Dagon, under the form *Bana-aibarka* (*Banâ 'abarka*, Del.) in an inscription of Sennacherib (Schrader, *KAT.*[2] p. 172), and has been identified by Van de Velde with *Ibn Ibrák*, a village east of Jaffa. By Eusebius the name is divided (cp. Vulg.), and Βαρακαὶ (*OS.*[2] p. 249, 49) taken to have been a village near Azotus, Βαρεκά, now *Burkah*, which lies beyond the limits of Dan.

[G.] [W.]

BENE'-JA'AKAN (בְּנֵי־יַעֲקָן, *Children of Jaakan*; B. Βαναιά, A. Βανικάν, F. Βανιακάν [*v.* 31], Βανα- [*v.* 32]; *Benejaacan*), a tribe who gave their name to certain wells in the desert which formed one of the halting-places of the Israelites on their journey to Canaan [Deut. x. 6. BEEROTH OF THE CHILDREN OF JAAKAN]. In Num. xxxiii. 31, 32, the name is given in the shortened form of Bene-jaakan. The tribe doubtless derived its name from Jaakan, the son of Ezer son of Seir the Horite (1 Ch. i. 42), whose name is also given in Genesis as Akan. [AKAN; JAKAN.]

The situation of these wells has not been yet identified. In the time of Jerome and Eusebius (*OS.*[2] pp. 137, 21; 247, 61; *Beroth filiorum Jacim*, Ἰακείμ) the spot was identified with the place where Aaron died, and 10 miles from Petra on the top of a mountain. Robinson suggests the small fountain *et-Taiyibeh*, at the bottom of the Pass *er-Rubá'i* under Petra, a short distance from the Arabah. The word Beeroth, however, suggests not a spring but a group of artificial wells.

In the Targ. Ps.-Jon. the name is given in Numbers as Aktha, בֵּירֵי עַקְתָּא. [G.] [W.]

BENE'-KE'DEM (בְּנֵי־קֶדֶם, *the children of the East*), an appellation given to a people, or to peoples, dwelling to the east of Palestine. It occurs in the following passages of the O. T.:—(1) Gen. xxix. 1, "Jacob came into the land of the people [R. V. "children"] of the east," in which was therefore reckoned Haran. (2) Job i. 3, Job was "the greatest of all the men [R. V. "children"] of the east" [JOB]. (3) Judg. vi. 3, 33; vii. 12; viii. 10. In the first three of these passages the Bene-Kedem are mentioned together with the Midianites and the Amalekites; and in the fourth the latter peoples seem to be included in this common name: "Now Zebah and Zalmunna were in Karkor, and their hosts with them, about fifteen thousand men, all that were left of all the host of the children of the east" [R. V.]. In the events to which these passages of Judges relate, we find a curious reference to the language spoken by these eastern tribes, which was understood by Gideon and his servant (or one of them) as they listened to the talk in the camp; and from this it is to be inferred that they spoke a dialect intelligible to an Israelite: an inference bearing on an affinity of race, and thence on the growth of the Semitic languages. (4) 1 K. iv. 30, "Solomon's wisdom excelled the wisdom of all the children of the east" [R. V.]. (5) Is. xi. 14; Jer. xlix. 28; Ezek. xxv. 4, 10. From the first passage it is difficult to deduce an argument, but the other instances, with their contexts, are highly important. In Ezekiel, Ammon is delivered to the "children of the east," and its city Rabbah is prophesied to become "a stable for *camels*, and the children of Ammon a couching-place for *flocks*" [R. V.]; referring, apparently, to the habits of the wandering Arabs; while "palaces," also mentioned and thus rendered in the A. V., may be better read with R. V. "*encampments*." The words of Jeremiah strengthen the supposition just mentioned: "Of Kedar, and of the kingdoms of Hazor, which Nebuchadrezzar king of Babylon smote. Thus saith the Lord, Arise ye, go up to Kedar, and spoil the children of the east. Their *tents* and their *flocks* shall they take: they shall carry away for themselves their *curtains* [i.e. *tents*], and all their vessels, and their *camels*" [R. V.].

Opinions are divided as to the extension of the appellation of Bene-Kedem; some (as Rosenmüller, Winer, Knobel, and Dillmann) holding it to be a collective name for the Arabs of the East; just as the name *Saracen* (Σαρακηνός), which is apparently derived from شرقي, "eastern," has been extended to the whole race of which in the time of Pliny and Ptolemy

is designated a particular tribe (see Dillmann[5] on Gen. xxv. 15). From a consideration of the passages above cited, and that which makes mention of the land of Kedem, Gen. xxv. 6 [ISHMAEL], we think (with Gesenius and Fürst) that it primarily signified the peoples of the Arabian deserts (east and north-east of Palestine and Lower Egypt), and chiefly the tribes of Ishmael and of Keturah, extending even to Mesopotamia (so we may take Kedem in Num. xxiii. 7, and possibly in Is. ii. 6); and that it was sometimes applied to the Arabs and their country generally. The only positive instance of this latter signification of Kedem occurs in Gen. x. 30, where "Sephar, a mount of the *East*," is by the common agreement of scholars situate in Southern Arabia [ARABIA; SEPHAR].

In the O. T., עֵרֶב, with its conjugate forms, seems to be a name of the peoples otherwise called Bene-Kedem, and with the same limitations. The same may be observed of ἡ ἀνατολή, or ἀνατολαί, in the N. T. (Matt. ii. 1 sq.). אֶרֶץ קֶדֶם, אֶרֶץ בְּנֵי קֶדֶם, בְּנֵי קֶדֶם and קֶדֶם (in the passages above referred to) are translated by the LXX. and in the Vulg. (except LXX. in 1 K iv. 30 [LXX. *v.* 26], and LXX. and Vulg. in Is. ii. 6, where they make Kedem to refer to ancient time): in three places only (those in Jeremiah and Ezekiel) the LXX. transcribes the word Κεδέμ. [E. S. P.]

BEN-HADA'D (בֶּן־הֲדַד, *son of Hadad; vibs* Ἀδερ; *Benadad*), the name of three kings of Damascus. In the monolith inscription of Shalmaneser II. Hadad is written Dadda-'idri (cp. LXX. Ἀδέρ; Peiser in Schrader's *Keilinschrifti. Bibliothek*, i. p. 172 [cp. p. 134]); *Records of the Past*, N. S. iv. 70, or Hadad-'idri (Craig, *Hebraica*, 1887, p. 218). The full form of the word is considered by Pinches to be Ben-hadad-'idri (=the son of Adad [who is identified with Rimmon, the thunder-god] my glory); and this was abbreviated by the Hebrews into Ben-hadad and by the Assyrians into Addu (=Hadad)-'idri [cp. the views on this point of Fried. Delitzsch in *ZKF.* ii. 161, &c., and of Schrader in *ZKF.* ii. 365, *KAT.*[2] p. 200]. *Hadad* or *Adad* was the chief god of the Syrians, probably the Sun (Macrob. *Saturnalia*, i. 23; cp. Baethgen, *Beitr. z. Sem. Religionsgesch.* p. 67), still worshipped at Damascus in the time of Josephus (*Ant.* ix. 4, 6), and from it several Syrian names are derived, *e.g.* Hadad-ezer, i.e. *Hadad is help*. The god is represented on cylinders in the Brit. Mus. as crowned, wearing long hair and full beard, and holding a thunderbolt in his hand (Baethgen). The *son of Hadad*, therefore, means worshipper of Hadad. Damascus, after having been taken by David (2 Sam. viii. 5, 6), was delivered from subjection to his successor by Rezon (1 K. xi. 24), who "was an adversary to Israel all the days of Solomon."

BENHADAD I. (1 K. xv. 18) was either son or grandson to Rezon, and in his time Damascus was supreme in Syria, the various smaller kingdoms which surrounded it being gradually absorbed into its territory. Benhadad must have been an energetic and powerful sovereign, and his alliance was courted both by Baasha of Israel and Asa of Judah. He finally closed with the latter on receiving a large amount of treasure, and conquered a great part of the N. of Israel, thereby enabling Asa to pursue his victorious operations in the S. From 1 K. xx. 34, it would appear that he continued to make war upon Israel in Omri's time, and forced him to make "streets" in Samaria for Syrian residents. [AHAB.] This date is B.C. 950

BENHADAD II., son of the preceding, and also king of Damascus (1 K xx. 1, &c) Some authors call him *grandson*, on the ground that it was unusual in antiquity for the son to inherit the father's name. But Benhadad seems to have been a religious title of the Syrian kings, as we see by its reappearance as the name of Hazael's son, Benhadad III. The inscriptions of Shalmaneser II. (see Peiser and Craig *ll. c.*) narrate successful expeditions against him in the 6th, 11th, and 14th years of the reign of this Assyrian king. In the first of these Benhadad and Ahab are mentioned as allies, a fact corroborated by the Scripture account (1 K. xx. 34; cp. Edersheim, *Bible Hist.* iii. [pt. 2] p. 146, Schrader, *KAT.*[2] p. 199), though the alliance was of no long duration (1 K. xxii. 1, 31). Long wars with Israel in fact characterised the reign of Benhadad II., of which the earlier campaigns are described under AHAB. His power and the extent of his dominion are proved by the thirty-two vassal kings who accompanied him to his first siege of Samaria. Some time after the death of Ahab, probably owing to the difficulties in which Jehoram of Israel was involved by the rebellion of Moab, Benhadad renewed the war with Israel, and after some minor attempts, which were frustrated by Elisha (2 K vi. 8, &c.), attacked Samaria a second time (2 K. vi. 24, &c.), and pressed the siege so closely that there was a terrible famine in the city, and atrocities were committed in order to get food not less revolting than those which Josephus relates of the siege of Jerusalem by Titus. But when the Syrians were on the very point of success, they suddenly broke up in the night in consequence of a sudden panic, under which they fancied that assistance was coming to Israel from Egypt or some Canaanitish cities, as Tyre or Ramoth. Jehoram seems to have followed up this unhoped-for deliverance by successful offensive operations, since we find from 2 K. ix. 1 that Ramoth in Gilead was once more an Israelitish town. [AHAB.] Soon after this Benhadad fell sick (2 K. viii 7, &c.), and sent Hazael, one of his chief officers, with vast presents, to consult Elisha, who happened to be in Damascus, as to the issue of his malady. Elisha replied that the sickness was not a mortal one, but that still Benhadad would certainly die, and he announced to Hazael that he would be his successor, with tears at the thought of the misery which he (Hazael) would bring on Israel. On the day after Hazael's return Benhadad died, but not, as is commonly thought from a cursory reading of 2 K. viii. 15, by the hand of Hazael. Such a supposition is hardly consistent with Hazael's character, would involve Elisha in the guilt of having suggested the deed, and the introduction of Hazael's name in the latter clause of *v.* 15 can scarcely be accounted for, if he be also the subject of the first clause. Ewald, from the Hebrew text and a general consideration of the chapter (*Gesch. des V. I.* iii. 523, note), thinks that one or more of Benhadad's own

servants were the murderers; Calmet (*Fragm.* vii.) believes that the wet cloth which caused his death was intended to effect his cure. This view he supports by a reference to Bruce's *Travels*, iii. p. 33, and Klostermann adopts it (Strack u. Zöckler's *Kyf Komm.* in loco. The usual view is defended in *Speaker's Comm.*). Hazael succeeded him perhaps because he had no natural heirs, and with him expired the dynasty founded by Rezon. Benhadad's death was about B.C. 890, and he must have reigned some thirty years.

BENHADAD III., son of the above-mentioned Hazael, and his successor on the throne of Syria (2 K. xiii. 3, &c.). If at first permitted by the Lord to oppress Israel on account of their sins, his reign was nevertheless disastrous for Damascus; and the vast power wielded by his father sank into insignificance. In the striking language of Scripture, "Jehoahaz [the son of Jehu] besought the Lord, and the Lord hearkened unto him, for he saw the oppression of Israel, because the king of Syria oppressed them; and the Lord gave Israel a saviour" (2 K. xiii. 4, 5). This saviour was Jeroboam II. (cp. 2 K. xiv. 27), but the prosperity of Israel began to revive in the reign of his father Jehoash, the son of Jehoahaz. When Benhadad succeeded to the throne of Hazael, Jehoash, in accordance with a prophecy of the dying Elisha, recovered the cities which Jehoahaz had lost to the Syrians, and beat him in Aphek (2 K. xiii. 17, 23), in the plain of Esdraelon, where Ahab had already defeated Benhadad II. [AHAB.] Jehoash gained two more victories, but did not restore the dominion of Israel on the east of Jordan. This glory was reserved for his successor. The date of Benhadad III. is c. B.C. 810. His misfortunes in war are noticed by Amos i. 4. [G. E. L. C.] [F.]

BEN-HA'IL (בֶּן־חַיִל, *son of the host*, i.e. *warrior; Benhail*), one of the "princes" (שָׂרִים) whom king Jehoshaphat sent to teach in the cities of Judah (2 Ch. xvii. 7). The LXX. translates *τοὺς ἡγουμένους αὐτοῦ καὶ τοὺς υἱοὺς τῶν δυνατῶν.* [W. A. W.]

BEN-HA'NAN (בֶּן־חָנָן, Ges. = *son of one who is gracious;* B. *υἱὸς Φανά*, A. *Ἀναν*, *filius Hanan*), son of Shimon, in the line of Judah (1 Ch. iv. 20). [W. A. W.]

BENI'NU (בִּנֵינוּ, Ges. = *our son;* BN. *Βενιαμείν*, A. *Βανουαια*; *Baninu*), a Levite; one of those who sealed the covenant with Nehemiah (Neh. x. 13 [14]). [W. A. W.]

BENJAMIN (בִּנְיָמִין, *i.e.* Binyamin; in Gen. xxxv. 18, BD *Βενιαείν*, E. *Βενιαμίν*; *Benjamin*). **1.** The youngest of the children of Jacob, and the only one of the thirteen (if indeed there were not more; cp. "all his daughters," Gen. xxxvii. 35, xlvi. 7) who was born in Palestine. His birth took place on the road between Bethel and Bethlehem, a short distance—"a length of earth"—from the latter, and his mother Rachel died in the act of giving birth to him, naming him with her last breath Ben-oni, *the son of my sorrow* (R. V. marg. Cp. 1 Sam. iv. 19–22). This was by Jacob changed into Benjamin (*Binyamin*, Gen. xxxv. 16–18).

The name is worthy of some attention. From the terms of the story it would appear to be implied that it was bestowed on the child in opposition to the desponding, and probably ominous, name Ben-oni (*the son of my sorrow*) given him by his dying mother, and on this assumption it has been interpreted to mean *the son of the right hand* (as if בֶּן־יָמִין), *i.e.* fortunate, happy, *Felix*, the right hand of a thing representing, in the opinion of antiquity, the happy side. In this case the child brought to his father happiness as another (the twelfth) son, and as born in the land of that father's home. This interpretation is inserted in the text of the Vulgate, in the margin of the A. V. and R. V., and has the support of Gesenius (*Thes.* and MV.[11]), Dillmann,[5] and Delitzsch [1887]. The meaning given by Josephus—*διὰ τὴν ἐπ' αὐτῷ γενομένην ὀδύνην τῇ μητρί* (*Ant.* i. 21, § 3)—is completely different from this, and no doubt arose from confusion with Ben-oni. In the adjectival forms of the word the first syllable is generally suppressed, as בְּנֵי־יְמִינִי or בְּנֵי הַיְמִינִי, *i.e.* "sons of Yemini," for sons of Benjamin; אִישׁ יְמִינִי, "man of Yemini," for man of Benjamin (1 Sam. ix. 1; Esth. ii. 5); אֶרֶץ יְמִינִי, land of Yemini for land of Benjamin (1 Sam. ix. 4; B. *Ἰακείμ*, A. *Ἰεμεναίου*), as if the patriarch's name had been originally יָמִין, Yamin (cp. Gen. xlvi. 10), and that of the tribe Yeminites. In Judg. iii. 15, and 1 Sam. ix. 1, the A. V. reads in the margin "the son of Jemini," and "the son of a man of Jemini;" the R. V. omits such marginal renderings, and reads in Judg. "the Benjamite," and in 1 Sam. "a Benjamite."

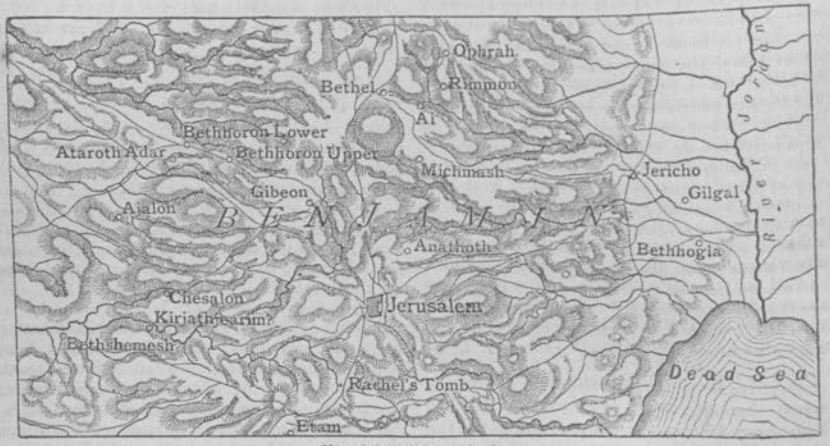
Until the journeys of Jacob's sons and of Jacob himself into Egypt we hear nothing of Benjamin, and so far as he is concerned those well-known narratives disclose nothing beyond the very strong affection entertained towards him by his father and his whole-brother Joseph, and the relation of fond endearment in which he stood, as if a mere darling child (cp. Gen. xliv. 20), to the whole of his family. Even the harsh natures of the elder patriarchs relaxed towards him. But Benjamin can hardly have been the "lad" which we commonly imagine him to be; for at the time that the patriarchs went down to reside in Egypt, when "every man with his house went with Jacob," ten sons are ascribed to Benjamin—a larger number than to any of his brothers—and two of these, if any weight may be attached to the plural formation of the names, may have represented families (Gen. xlvi. 21).[a]

And here, little as it is, closes all we know of the life of the patriarch himself; henceforward the history of Benjamin is the history of the tribe. And up to the time of the entrance on the Promised Land that history is as meagre as it is afterwards full and interesting. We know indeed that shortly after the departure from Egypt it was the smallest tribe but one (Num. i. 36: cp. *v.* 1); that during the march its position was on the west of the Tabernacle with its brother tribes of Ephraim and Manasseh

[a] See, however, Delitzsch [1887] in loco. According to other lists, some of these "children" would seem to have been grandchildren (cp. Num. xxvi. 38–41; 1 Ch. vii. 6–12, viii. 1).

(Num. ii. 18–24). We have the names of the "captain" of the tribe, when it set forth on its long march (Num. ii. 22); of the "ruler" who went up with his fellows to spy out the land (xiii. 9); of the families of which the tribe consisted when it was marshalled at the great halt in the plains of Moab by Jordan-Jericho (Num. xxvi. 38–41, 63), and of the "prince" who was chosen to assist in the dividing of the land (xxxiv. 21). These are indeed preserved to us. But there is nothing to indicate what were the characteristics and behaviour of the tribe which sprang from the orphan darling of his father and brothers: no touches of personal biography like those with which we are favoured concerning Ephraim (1 Ch. vii. 20–23): no record of zeal for Jehovah like that of Levi (Ex. xxxii. 26): no evidence of special bent as in the case of Reuben and Gad (Num. xxxii.). The only foreshadowing of the tendencies of the tribe which was to produce Ehud, Saul, and the perpetrators of the deed of Gibeah, is to be found in the prophetic gleam which lighted up the dying Jacob, "Benjamin is a wolf that ravineth; in the morning he shall devour the prey, and at even he shall divide the spoil" (Gen. xlix. 27, R. V.).

The proximity of Benjamin to Ephraim during the march to the Promised Land was maintained in the territories allotted to each. Benjamin lay immediately to the south of Ephraim and between him and Judah. The situation of this territory was highly favourable. It formed almost a parallelogram, of about 26 miles in length by 12 in breadth. Its limits are minutely described in Josh. xviii. 12–19, and they can still be traced with fair accuracy. The northern boundary probably left the Jordan at the mouth of *W. Nûeiâmeh*, and, passing N. of Jericho, crossed a wild mountain district, the wilderness of Bethaven, to Bethel, *Beitin*, whence it descended to Ataroth Adar, *Kh. Dârieh*, on the



Map of the tribe of Benjamin.

south side of the Lower Bethhoron, *Beit 'Ûr el-Tahta*. The western frontier was from Ataroth Adar to Kirjath-jearim, and thence the southern boundary ran by the waters of Nephtoah, and the hill at the north end of the Valley of the Giants, to the valley of Hinnom, under the "Shoulder of the Jebusite." This section of the boundary cannot be accurately traced until the position of Kirjath-jearim has been definitely fixed; the view usually accepted is that it was at *Kuryet el-'Enab*, and that the boundary crossed *W. Beit Hanîna*, the Valley of the Giants, to *Lifta*, Nephtoah, whence it passed to the valley of Hinnom. More probable sites for Kirjath-jearim have, however, been suggested by Williams at *Deir el-Hawa* (*H. C.* 11), and by Conder at *Kh. 'Erma* (*PEF. Mem.* iii. 43). From either of these places, which are near each other, and not far from *'Ain Shems*, Bethshemesh, the boundary would run by the Pools of Solomon and Rachel's tomb, to the south side of Jerusalem. This view is supported by the statement (1 Sam. x. 2) that Rachel's tomb was on the border of Benjamin; the identification of Nephtoah with Etam in Tal. Bab. *Yoma* 31 *a*; and the position, between Jerusalem and Bethlehem, assigned to the Valley of the Giants by Josephus (*Ant.* vii. 12, § 4; cp. 4, § 1). From the valley of Hinnom the boundary passed by Enrogel and Enshemesh to the valley of Achor, *Wâdy Kelt*, and thence to the mouth of the Jordan, leaving Jericho and Beth-hogla, *Kusr Hajla*, to the north. The smallness of this district, hardly larger than the county of Middlesex, was, according to the testimony of Josephus, compensated for by the excellence of the land (διὰ τὴν τῆς γῆς ἀρετήν, *Ant.* v. 1).[b] In the degenerate state of modern Palestine few traces remain of this excellence. But other and more enduring natural peculiarities remain, and claim our recognition, rendering this possession one of the most remarkable among those of the tribes.

(1.) The general level of this part of Palestine is very high, not less than 2,000 feet above the maritime plain of the Mediterranean on the one side, or than 3,000 feet above the deep valley of

[b] A trace of the pasture-lands may be found in the mention of the "herd" (1 Sam. xi. 5; R.V. "oxen"); and possibly others in the names of some of the towns of Benjamin: as hap-Parah, "the cow;" Zelah-ha-eleph, "the ox-rib" (Josh. xviii. 23, 28. R. V. omits the art. in both cases).

the Jordan on the other; besides which this general level or plateau is surmounted, in the district now under consideration, by a large number of eminences—*defined*, rounded hills—almost every one of which has borne some part in the history of the tribe. Many of these hills carry the fact of their existence in their names. Gibeon, Gibeah, Geba or Gaba, all mean "hill;" Ramah and Ramathaim, "eminence;" Mizpeh, "watch-tower;" while the "ascent of Beth-horon," the "cliff Rimmon," the "pass of Michmash" with its two "teeth of rock," all testify to a country eminently broken and hilly.

The special associations which belong to each of these eminences, whether as sanctuary or fortress, many of them arising from the most stirring incidents in the history of the nation, will be best examined under the various separate heads.

(2.) Not less important than these eminences are the roads—sometimes following the torrent beds and ravines, sometimes the rough mountain spurs—which gave access to the upper country from the plains of Philistia and of Sharon on the west, and the deep valley of the Jordan on the east;[c] the latter steep and precipitous in the extreme, the former more gradual in their declivity. Up these western passes swarmed the Philistines on their incursions during the times of Samuel and of Saul, driving the first king of Israel right over the higher district of his own tribe, to Gilgal in the hot recesses of the Arabah, and establishing themselves over the face of the country from Michmash to Aijalon. Down these same defiles they were driven by Saul after Jonathan's victorious exploit, just as in earlier times Joshua had chased the Canaanites down the long hill of Beth-horon, and as centuries afterwards the forces of Syria were chased by Judas Maccabaeus (1 Macc. iii. 16–24). The principal roads on the western side are: (1) the present carriage-road from Jerusalem by *Kulônieh*, *Kuryet el-'Enab*, and *W. 'Aly* to *Jaffa*; (2) from Jerusalem by *Beit 'Iksa*, *Biddu*, *Beit Likia*, and *Jimzu*, to Lydda; (3) from Jerusalem by *Sh'afât*, *El-Jib*, *Beit 'Ûr el-Fôka*, and *Beit 'Ûr el-Tahta* to join (2) below *Jimzu* with branches from *Beit 'Ûr el-Tahta* to *'Amwâs* and *Y'alô*; (4) from *El-Jib* by *W. Selmân* to *Jimzu*, and (5) from *El-Jib* by *Biddu* and *Kuryet el-'Enab* to *Y'alô*.

The passes on the eastern side are of a much more difficult and intricate character than those on the western. The principal one—which, now unfrequented, was doubtless in ancient times the main ascent to the interior—leaves the Arabah a short distance N. of the mouth of *W. Kelt*, and, breaking through the barren hills with many a wild bend and steep slope, passes up *W. Riyâh* and along the ridge of *Râs et-Tawîl* to *Mukhmâs*, *Deir Diwân*, *et-Tell* and *Beitin*, with a branch from *Mukhmâs* to *Bireh*, the ancient Beeroth. After the fall of Jericho this pass must have stood open to the victorious Israelites, as their natural inlet to the country. At its upper end must have taken place the repulse and subsequent victory of Ai, and through it Joshua perhaps hastened to the relief of the Gibeonites, and to his memorable pursuit of the Canaanites down the pass of Beth-horon, on the other side of the territory of Benjamin.

Another of these passes is that which since the time of our Saviour has been the regular road between Jericho and Jerusalem, the scene of the parable of the Good Samaritan.

Another pass, over which ran a Roman road, left the Jordan valley at *'Ain Dûk*, and, ascending a bold spur, passed by *Kh. Kaswal* to *et-Taiyibeh*; whence it passed, south of *Tell 'Azûr*, to join the north road S.E. of *Yebrûd*; a branch leading from *Kh. Kaswal* to *et-Tell* and *Beitin*, Bethel.

These intricate ravines may well have harboured the wild beasts which, if the derivation of the names of several places in this locality are to be trusted, originally haunted the district—*zeboim*, hyaenas (1 Sam. xiii. 18); *shual* and *shualbim*, foxes or jackals (Judg. i. 35; 1 Sam. xiii. 17); *ajalon*, gazelles.[d]

It must be remembered, too, that Benjamin occupied an important position on each side of the great highway from Jerusalem by *Bîreh* and *Beitin* to *Nâblus*, and thus commanded the only approach from the north to the Holy City and the Temple.

Such were the limits and such the character of the possession of Benjamin as fixed by those who originally divided the land. But it could not have been long before they extended their limits, since in the early lists of 1 Ch. viii. we find mention made of Benjamites who built Lod and Ono, and of others who were founders of Aijalon (*vv.* 12, 13), all which towns were beyond the spot named above as the westernmost point in their boundary. These places, too, were in their possession after the return from the Captivity (Neh. xi. 35).

The contrast between the warlike character of the tribe and the peaceful image of its progenitor has been already noticed. That fierceness and power are not less out of proportion to the smallness of its numbers and of its territory. This comes out in many scattered notices. (*a*) Benjamin was the only tribe which seems to have pursued archery to any purpose, and their skill in the bow (1 Sam. xx. 20, 36; 2 Sam. i. 22; 1 Ch. viii. 40, xii. 2; 2 Ch. xvii. 17) and the sling (Judg. xx. 16) was celebrated. (*b*) When, after the first conquest of the country, the nation began to groan under the miseries of a foreign yoke, it was to a man of Benjamin, Ehud the son of Gera, that they turned for deliverance. The story seems to imply that he accomplished his purpose on Eglon with less risk, owing to

[c] It is perhaps hardly fanciful to ask if we may not account in this way for the curious prevalence among the names of the towns of Benjamin of the titles of *tribes*. Ha-Avvim, the Avites; Zemaraim, the Zemarites; ha-Ophni, the Ophnite; Chephar ha-Ammonai, the village of the Ammonites; ha-Jebusi, the Jebusite,—are all among the names of places in Benjamin; and we can hardly doubt that in these names is preserved the memory of many an ascent of the wild tribes of the desert from the sultry and open plains of the low level to the fresh air and secure fastnesses of the upper district.

[d] The subject of the connexion between the topography of Benjamin and the events which took place there, is treated in the most admirable manner in the 4th chapter of Dean Stanley's *Sinai and Palestine*. Very much of the above article is drawn from that source.

his proficiency in the peculiar practice of using his left hand, a practice apparently confined to Benjamites, though by them greatly employed (Judg. iii. 15, and see xx. 16; 1 Ch. xii. 2). (*c*) Baanah and Rechab, "the sons of Rimmon the Beerothite of the children of Benjamin" (2 Sam. iv 2, 5, &c.), are the only Israelites west of the Jordan named in the whole history as captains of marauding predatory "bands" (גְּדוּדִים); and the act of which they were guilty — the murder of Ish-bosheth, the son of Saul and head of their house—hardly needed the summary vengeance inflicted on them by David to testify the abhorrence in which it must have been held by all Orientals, however warlike. (*d*) The dreadful deed recorded in Judg. xix. [JUDGES, BOOK OF], though repelled by the whole country, was unhesitatingly adopted and defended by the tribe of Benjamin with an obstinacy and spirit truly extraordinary. Of their obstinacy there is a remarkable trait in 1 Sam. xxii. 7–18. Though Saul was not only the king of the nation, but the head of the tribe, and David a member of a family which had as yet no claims on the friendship of the tribe of Benjamin, yet the Benjamites resisted the strongest appeal of Saul to betray the movements of David, and after those movements had been revealed by Doeg the Edomite (worthy member — as he must have seemed to them—of an accursed race!) they still firmly refused to lift a hand against those who had assisted him.

And yet, to return to the deed of Gibeah, in one or two of the expressions of that antique and simple narrative — the phrase "Benjamin my brother" (Judg xx. 23); the anxious inquiry, "What shall we do for wives for them that remain?" (Judg. xxi. 7, 16), and the entreaty, "Be favourable to them for our sakes" (R. V., "Grant them graciously unto us")— we seem to hear as it were an echo of those terms of fond affection which have given the son of Rachel's grief so distinct a place in our minds.

The frightful transaction of Judg. xix. was indeed a crisis in the history of the tribe: the narrative undoubtedly is intended to convey that the six hundred[e] (Judg. xx. 47) who took refuge in the cliff Rimmon, and who were afterwards provided with wives partly from Jabesh-gilead (Judg. xxi. 10), partly from Shiloh (xxi. 21), were the only survivors. A long interval must have elapsed between so abject a condition and the culminating point at which we next meet with the tribe.[f]

Several circumstances may have conduced to its restoration to that place which it was now to assume. The Tabernacle was at Shiloh in Ephraim during the time of the last Judge; but the ark was on the border of Benjamin at Kirjath-jearim. Ramah, the official residence of Samuel, and containing a sanctuary greatly frequented (1 Sam. ix. 12, &c.),—Mizpeh, where the great assemblies of "all Israel" took place (1 Sam. vii. 5), — Bethel, perhaps the most ancient of all the sanctuaries of Palestine, and Gibeon, specially noted as "the great high place" (2 Ch. i. 3), were all in the land of Benjamin. These must gradually have accustomed the people who resorted to these various places to associate the tribe with power and sanctity, and they tend to elucidate the anomaly which struck Saul so forcibly, "that all the desire of Israel" (1 Sam. ix. 20; R. V. "all that is desirable in Israel," with LXX. and Vulg.) should have been centred in the house of the smallest of its tribes (1 Sam. ix. 21).

The struggles and contests which followed the death of Saul arose from the natural unwillingness of the tribe to relinquish its position at the head of the nation, especially in favour of Judah. Had it been Ephraim, the case might have been different, but Judah had as yet no connexion with the house of Joseph, and was moreover the tribe of David, whom Saul had pursued with such unrelenting enmity. The tact and sound sense of Abner, however, succeeded in overcoming these difficulties, though he himself fell a victim in the very act of accomplishing his purpose; and the proposal that David should be "king over Israel" was one which "seemed good to the whole house of Benjamin," and of which the tribe testified its approval, and evinced its good faith, by sending to the distant capital of Hebron a detachment of 3,000 men of the "brethren of Saul" (1 Ch. xii. 29). Still the insults of Shimei and the insurrection of Sheba are indications that the soreness continued to exist, and we do not hear of any cordial co-operation or firm union between the two tribes until a cause of common quarrel arose, at the disruption, when Rehoboam assembled "all the house of Judah with the tribe of Benjamin, to fight against the house of Israel, to bring the kingdom again to the son of Solomon" (1 K. xii. 21; 2 Ch. xi. 1). Possibly the seal may have been set to this by the fact of Jeroboam having just taken possession of Bethel, a city of Benjamin, for the calf-worship of the northern kingdom[g] (1 K. xii. 29). On the other hand, Rehoboam fortified and garrisoned several cities of Benjamin, and wisely dispersed the members of his own family through them (2 Ch. xi. 10–12). The alliance was further strengthened by a covenant solemnly undertaken (2 Ch. xv. 9), and by the employment of Benjamites in high positions in the army of Judah (2 Ch. xvii. 17). But what above all must have contributed to strengthen the alliance was the fact that the Temple was the common property of both tribes. True, it was founded, erected, and endowed by princes of "the house of Judah;" but the city of "the Jebusite" (Josh. xviii. 28), and the whole of the ground north of the valley of Hinnom, were in the lot of Benjamin. In this latter fact is literally fulfilled the prophecy of Moses (Deut. xxxiii. 12): Benjamin "dwelt between" the "shoulders" of the ravines which encompass the Holy City on the west, south, and east (see a good treatment of this point in Blunt's *Undes. Coincidences*, Pt. II. § xvii.).

[e] "Et tribus Benjamin trecentos viros propter Apostolum reservatos" (Jer. *Ep. ad Paul.* 38).

[f] A fair argument in favour of the received chronology of the Book of Judges may be drawn from this circumstance—since no shorter period would have been sufficient for the tribe to have recovered such almost total extermination, and to have reached the numbers and force indicated in the lists of 1 Ch. xii. 1–8, vii. 6–12, viii. 1–40.

[g] Bethel, however, was on the very boundary line, and centuries before this date was inhabited by both Ephraimites and Benjamites (Judg. xix. 16).

Henceforward the history of Benjamin becomes merged in that of the southern kingdom. That the tribe still retained its individuality is plain from the constant mention of it in the various censuses taken of the two tribes, and on other occasions, and also from the lists of the men of Benjamin who returned with Zerubbabel (Ezra ii.; Neh. vii.) and took possession of their old towns (Neh. xi. 31–35). At Jerusalem the name must have been always kept alive, if by nothing else, by the name of "the high gate of Benjamin" (Jer. xx. 2). [JERUSALEM.]

But though the tribe had thus given up to a certain degree its independent existence, it is clear that the ancient memories of their house were not allowed to fade from the recollections of the Benjamites. The genealogy of Saul, to a late date, is carefully preserved in the lists of 1 Ch. (viii. 33–40, ix. 39–44); the name of Kish recurs as the ancestor of Mordecai (Esth. ii. 5. Cp. Bertheau-Ryssel in loco), the honoured deliverer of the nation from miseries worse than those threatened by Nahash the Ammonite. But it was reserved for a greater than these to close the line of this tribe in the sacred history. The royal name once more appears, and "Saul who also is called Paul" has left on record under his own hand that he was "of the stock of Israel, of the tribe of Benjamin" (Phil. iii. 5). It is perhaps more than a mere fancy to note how remarkably the chief characteristics of the tribe are gathered up in his one person. There was the fierceness, in his persecution of the Christians; and there were the obstinacy and persistence, which made him proof against the tears and prayers of his converts, and "ready not to be bound only, but also to die for the name of the Lord Jesus" (Acts xxi. 12, 13). There were the force and vigour to which natural difficulties and confined circumstances formed no impediment; and lastly, there was the keen sense of the greatness of his house, in his proud reference to his forefather "Saul the son of Cis, a man of the tribe of Benjamin."

Be this as it may, no nobler hero could be found to close the rolls of the worthies of his tribe—no prouder distinction could be desired for Benjamin than that of having produced the first judge of its nation, the first king, and finally, when Judaism gave place to Christianity, the great Apostle of the Gentiles.

2. BN. Βενιαμείν. A man of the tribe of Benjamin, son of Bilhan, and the head of a family of warriors (1 Ch. vii. 10).

3. BNA. Βενιαμείν. One of the "sons of Harim;" who, in the time of Ezra, had married a foreign wife (Ezra x. 32). [G.] [W.]

BEN'JAMIN, HIGH GATE, or GATE, OF (שַׁעַר בִּ֫נְיָמִין), Jer. xx. 2, xxxvii. 13, xxxviii. 7; Zech. xiv. 10. [JERUSALEM.]

BENJAMITE. An adjectival form of BENJAMIN.

BENO' (בְּנוֹ, *his son;* LXX. translates *υἱοῦ*; *Benno*), a Levite of the sons of Merari (1 Ch. xxiv. 26, 27). [W. A. W.]

BEN-O'NI (בֶּן־אוֹנִי, *son of my sorrow* or *hurt*, or *of my strength*, i.e. of *my last effort* [Hiller, *Onom.* 300]; *υἱὸς ὀδύνης μου*; *Benoni, id est filius doloris mei*), the name which the dying Rachel gave to her newly-born son, but which his father changed into BENJAMIN (Gen. xxxv. 18). [W. A. W.]

BEN-ZO'HETH (בֶּן־זוֹחֶת; B. *υἱοὶ* Ζωάβ, A. *υἱοὶ* Ζωχάθ; *Zoheth*), a name occurring among the descendants of Judah (1 Ch. iv. 20). The passage appears to be a fragment, and as if the name of a son of the Zoheth just mentioned had originally followed. [W. A. W.]

BEO'N (בְּעֹן; BF^{vid}. Βαιάν, A. Βαμά; *Beon*), a place on the east of Jordan (Num. xxxii. 3), a contraction of BAAL-MEON (cp. *v.* 38). [W.]

BEO'R (בְּעוֹר, Ges. = *a torch;* B. [usually] Βεώρ, A. [usually] Βαιώρ; *Beor*). **1.** The father of BELA, one of the early Edomite kings (Gen. xxxvi. 32; 1 Ch. i. 43). **2.** Father of Balaam (Num. xxii. 5, xxiv. 3, 15, xxxi. 8; Josh. xiii. 22, xxiv. 9 [BA. Σεπφώρ]; Mic. vi. 5), called BOSOR in 2 Pet. ii. 15. [BELA.] [W. A. W.] [F.]

BE'RA (בֶּרַע; AD. Βάλλα, E. Βαρά; Joseph. Βαλλάς; *Bara*), king of Sodom at the time of the invasion of the five kings under Chedorlaomer (Gen. xiv. 2). [W. A. W.]

BERA'CHAH (בְּרָכָה, *blessing;* BN. Βερχειά, A. Βαραχιά; *Baracha*), a Benjamite, one of "Saul's brethren," who attached himself to David at Ziklag (1 Ch. xii. 3). [W. A. W.]

BERA'CHAH, VALLEY OF (עֵמֶק בְּרָכָה, *valley of blessing;* Κοιλὰς Εὐλογίας; *vallis benedictionis;* R. V. Beracah); a valley (Jos. *τινὰ κοῖλον καὶ φαραγγώδη τόπον*) in which Jehoshaphat and his people assembled to "bless" Jehovah after the overthrow of the hosts of Moabites, Ammonites, and (?) Mehunim, who had come against them, and which from that fact acquired its name of "the valley of blessing" (2 Ch. xx. 26). The place is remarkable as furnishing one of the latest instances in the O. T. of a name bestowed in consequence of an occurrence at the spot.

The name of *Breikût* (بريكوت) still survives, attached to ruins in the *Wâdy el-'Arrûb*, between *Tekû'a*, Tekoa, and the main road from Bethlehem to Hebron; a position corresponding accurately enough with the locality of the battle as described in 2 Ch. xx. (Rob. iii. 275. The discovery is due to Wolcott; see Ritter, *Jordan*, p. 635). It must not be confounded with Caphar-barucha, now probably *Beni N'aim*, an eminence on very high ground, 3 or 4 miles east of Hebron, commanding an extensive view of the Dead Sea, and traditionally the scene of Abraham's intercession for Sodom. The tomb of Lot has been shown there since the days of Mandeville (Reland, p. 685; Rob. i. 489–91). [G.] [W.]

BERACHI'AH (בְּרַכְיָהוּ, *Jah blesses;* Βαραχία; *Barachia*), a Gershonite Levite, father of Asaph the singer (1 Ch. vi. 39). [BERECHIAH 6.]

BERAI'AH (בְּרָאיָה, *Jah is creator;* Βαραΐα; *Baraia*), son of Shimhi, a chief man of Benjamin (1 Ch. viii. 21). [W. A. W.]

BERE'A (Βεροῖα; *Beroea*). **1.** A city of Macedonia, to which St. Paul retired with Silas and Timotheus, in the course of his first visit to Europe, on being persecuted in Thessalonica (Acts xvii. 10); and from which, on being again persecuted by emissaries from Thessalonica, he withdrew to the sea for the purpose of proceeding to Athens (*vv.* 14, 15). The community of Jews must have been considerable in Berea, and their character is described in very favourable terms (*v.* 11). Sopater, one of St. Paul's missionary companions, was from this place (Βεροιαῖος, Acts xx. 4). He accompanied the Apostle on his return from the second visit to Europe (*ib.*); and he appears to have previously been with him, in the course of that second visit, at Corinth, when he wrote the Epistle to the Romans (Rom. xvi. 21).

Berea, now called *Verria* or *Kara Verria*, is fully described by Leake (*Northern Greece*, vol. iii. 290 sq.), and by Cousinéry (*Voyage dans la Macédoine*, vol. i. pp. 69 sq.). Situated on the eastern slope of the Olympian mountain-range, with an abundant supply of water, and commanding an extensive view of the plain of the Axius and Haliacmon, it is regarded as one of the most agreeable towns in Rumili, and has now 6,000 or 8,000 inhabitants. A few ancient remains—Greek, Roman, and Byzantine—still exist here. Two roads are laid down in the Itineraries between Thessalonica and Berea, one passing by Pella. St. Paul and his companions may have travelled by either of them. Two roads also connect Berea with Dium, one passing by Pydna. It was probably from Dium that St. Paul sailed to Athens, leaving Silas and Timotheus behind; and possibly 1 Thess. iii. 2 refers to a journey of Timotheus from Berea, not from Athens. [TIMOTHY.] The coin in *Akerman's Numismatic Illustrations of the N. T.*, p. 46, is erroneously assigned to the Macedonian Berea, and belongs to the following (see *Dict. of Gr. and Rom. Geog.*, art. BEROEA).

2. The modern *Aleppo*, mentioned in 2 Macc. xiii. 4 (Vulg. om.), in connexion with the invasion of Judaea by Antiochus Eupator, as the scene of the miserable death of Menelaus. This seems to be the city in which Jerome says that certain persons lived, who possessed and used St. Matthew's Hebrew Gospel (*De Vir. Illust.* c. 3. See *Dict. of Gr. and Rom. Geog.* s. n.)

3. Βερέα; *Berea.* A place in Judaea, where Bacchides, the general of Demetrius, encamped shortly before the engagement in which Judas Maccabaeus was slain (1 Macc. ix. 4). Bacchides whilst at Jerusalem heard that Judas had encamped at Eleasa (1 Macc. ix. 5), now *El'asa*, near Beth-horon, or according to Josephus (*Ant.* xii. 11, § 1) at *Beth-zepho*, now probably *Bir-ez-Zeit.* He thereupon marched to Berea, apparently *Bireh.* [BEEROTH.] [J. S. H.] [W.]

BERECHI'AH (בֶּרֶכְיָה and בֶּרֶכְיָהוּ, *Jehovah blesses;* A. Βαραχία, B. -ιαί; *Barachias*). **1.** One of the sons of Zerubbabel, and a descendant of the royal family of Judah (1 Ch. iii. 20).

2. A man mentioned as the father of Meshullam, who assisted in rebuilding the walls of Jerusalem (Neh. iii. 4 [ℵA. Βαραχίας, B. om.], 30 [Bℵ. Βαρχειά, A. Βαριά]; vi. 18 [BℵA. Βαραχειά].)

3. B. Βαραχεί, A. Βαραχιάς; *Barachia.* A Levite of the line of Elkanah (1 Ch. ix. 16).

4. Βαραχιά; *Barachias.* A doorkeeper for the ark (1 Ch. xv. 23).

5. A. Βαραχίας, B. Ζαχαρίας. One of the chief men of the tribe of Ephraim in the time of king Ahaz (2 Ch. xxviii. 12).

6. B. Βαραχιά, ℵ. -εία. Father of Asaph the singer (1 Ch. xv. 17). [BERACHIAH.]

7. Βαραχίας. Father of Zechariah the Prophet (Zech. i. 1). Here A. V., ed. 1611, reads "Barachiah." [G.] [W.]

BE'RED (בֶּרֶד, *hail;* Βαράδ; *Barad*). **1.** A place in the south of Palestine, between which and Kadesh lay the well Lahai-roi (Gen. xvi. 14). The name is variously given in the ancient Versions: Peshitto, *Gadar*, ܓܕܪ? = Gerar; Arab. *Iared*, يرد, probably a mere corruption of the Hebrew name; Onkelos, *Chagra*, חַגְרָא (elsewhere [*v.* 7] employed in the Targums for "Shur"); Ps.-Jonathan, *Chalutza*, חַלוּצָא, *i.e.* the Elusa, Ἔλουσα, of Ptolemy and the ecclesiastical writers, now *el-Khalasah*, in *W. Aslûj*, about 12 miles south of Beersheba (Rob. i. 201–2; Stewart, p. 205; Reland, p. 755; *PEFQy. Stat.* 1871, p. 35). We have the testimony of Jerome (*Vita S. Hilarionis*) that Elusa was called by its inhabitants *Barec*, which might represent a corruption of Bered, ך being read for ד (cp. *OS.*² p. 135, 3). Chalutza is the name elsewhere given in the Arabic Version for "Shur" and for "Gerar." The position of *el-Khalasah*, on the way from Beersheba to Shur and Egypt, meets all the requirements of Bered.

2. A. Βαράδ, B. om. A son or descendant of Ephraim (1 Ch. vii. 20), possibly identical with Becher in Num. xxvi. 35. [G.] [W.]

BERENI'CE. [BERNICE.]

BE'RI (בֶּרִי, if = בְּאֵרִי, Ges. *fontanus;* A. Βαρί, B. Ζαβρεί; *Beri*), son of Zophah, of the tribe of Asher (1 Ch. vii. 36). [W. A. W.]

BERI'AH (בְּרִיעָה [meaning uncertain. In Arabic برع means *to ascend, excel;* V. conj. *to give liberally*, Lev. xxii. 18; Deut. xii. 6 Saad.—S. R. D.]; *Baria, Beria, Brie*). **1.** A son of Asher (Gen. xlvi. 17, A. Βαριά, *D.* -εια; Num. xxvi. 44, 45 [LXX. *vv.* 28, 29. In *v.* 28, Βαριά; in *v.* 29 the name is omitted]), from whom descended "the family of the Beriites" (בְּרִיעִי, B.ᵃ *vid* Βαριαεί, B.ᵛᵗᵈ -ια, A. -αι, F. -ιαι; *familia Bricitarum*), Num. xxvi. 44.

2. A son or descendant of Ephraim, so called on account of his birth on an occasion of great calamity. The points to be considered are the meaning of the name in this instance, and the place of Beriah in the genealogy of Ephraim. The passage (1 Ch. vii. 20–23) runs thus: "And the sons of Ephraim; Shuthelah, and Bered his son, and Tahath his son, and Eleadah his son, and Tahath his son, and Zabad his son, and Shuthelah his son, and Ezer, and Elead, whom the men of Gath that were born in the land slew [lit. "and the men ... slew them"], because [or "when"] they came down to take away their cattle. And Ephraim their father mourned many days, and

his brethren came to comfort him. And he went in to his wife, and she conceived, and bare a son, and he called his name Beriah, because it went evil with his house" (R. V.) [lit. "because it was in evil to his house:" כִּי בְרָעָה הָיְתָה בְּבֵיתוֹ, ὅτι ἐν κακοῖς ἐγένετο ἐν οἴκῳ μου, LXX.: "eo quod in malis domus ejus ortus esset," Vulg. The real etymology of the name is uncertain, because—though it is borne by several persons—the root is not in use in Hebrew. In the passage quoted, it is stated to have been given on account of its assonance with *bera'ah*, "in evil" (cp. Cain, Moses, &c.). —S. R. D.]

The place of Beriah in the genealogy of Ephraim is hard to determine. The matter is of much importance. If the conflict with the men of Gath should be referred to the sojourn in Egypt, it would supply the one fact of history recorded in the Bible outside family events, between the coming into Egypt and the great oppression; otherwise this is but an incident of the little wars of the conquerors of Palestine which followed the campaigns of Joshua. There is much in favour of the later date. The event may be referred rather to Palestine than to Egypt, for "the settlements of the Ephraimites in the mountainous district, where Beth-horon, Gezer, Timnath-serah, &c., lay, were exactly suited for a *descent* upon the plains of the Philistine country where the men of Gath fed their cattle." After the catastrophe it would seem that "they called in" "the Benjamites to help them in driving away the men of Gath" (1 Ch. viii. 13). [SHUTHELAH, 1st ed.]

We find no families of Ephraim specified in Numbers but those descended from Shuthelah, Becher, Tahan, and Shuthelah's son Eran (xxvi. 35, 36). Beriah is here not indicated, though the first four persons in the passage under consideration probably have their descendants. Again, Beriah's daughter is said to have built the two Beth-horons and Uzzen-sherah (1 Ch. vii. 24). Similarly the expulsion of the Gittites is connected with the time of building cities, the days following Joshua's wars (1 Ch. viii. 12, 13). The genealogy is apparently repeated (vii. 25, 26), which may be explained by the theory that it is broken earlier (*v.* 21) to introduce a historical event. There seems therefore to be some confusion of the text. Of course on this explanation the name of Ephraim before "their father" would be a gloss. On this question the reader is referred to the full statement of Lord Arthur Hervey in art. SHUTHELAH, 1st ed. Cp. also *Speaker's Comm.* and Oettli (Strack u. Zöckler's *Kyf. Komm.*), notes on 1 Ch. vii. 20–23.

It seems therefore that we cannot venture to take the story of Beriah as relating to the period between the death of Joseph and the beginning of the Oppression, and as the one historical fact told in the Bible of this long time of obscurity. The Egyptian monuments have, however, preserved another incident which is definite as to place, and throws unexpected light on this obscure age of the sojourn. The discovery of this most important evidence is due to M. Groff, who has developed it in the *Revue Égyptologique*. Thothmes III., at a time which may be placed about B.C. 1550, or midway between the coming into Egypt and the Exodus, has left a record at Karnak of the peoples or tribes composing a great army of the confederated Syrians, Mesopotamians, and Assyrians, whom he defeated at the battle of Megiddo and afterwards led captive on the surrender of that stronghold. It is quite clear that the list is one of the nationality of the captives. It does not follow that Thothmes did not conquer some of them in their own territories, but the list is the tale of the captive army. The names, as Groff well remarks, are ethnographic and not geographic, —a most important distinction which his predecessors have failed to draw. His position is not only reasonable in itself, but it also receives confirmation from the circumstance that few of these names have been satisfactorily identified with localities. To his reasoning it may be added that, if we had a similar list of the component parts of an army raised in Syria in our own days, it would contain names of Arab tribes under race appellations, whose settlements, if any, were far away in Arabia. Among the names not identified with any known locality are two not far apart, Jakob-nal (or nar) and Joshep-al. The first of these M. de Rougé conjectured on its first discovery to possibly preserve the memory of some establishment of Jacob in Palestine. M. Groff has carried the investigation farther, and shown that these names are those of the tribes of Jacob and Joseph, the subject lost in the apocopated form being here preserved, as in Nathaniel for Nathan. The only inference that we can draw from this important discovery is, that during the interval between the death of Joseph and the birth of Moses, or in other words between the events of the Books of Genesis and Exodus, the Israelites, divided into the two tribes of Jacob and Joseph, when free to move to and fro after the manner of Arabs, supplied a contingent to the great confederation which Thothmes overthrew at the battle of Megiddo. This accords with the fear of the military power of the Hebrews exhibited by the Pharaoh of the Oppression, and with the statement that the people marched out of Egypt in martial order (Ex. xiii. 18). See M. Groff's papers in the *Revue Égyptologique*, 1885, p. 95 sq., p. 146 sq. For the chronological bearing of this discovery, see CHRONOLOGY.

For the older theories the curious may be referred to Barrett's *Synopsis* and Pole's *Synopsis* in loco.

3. B. Βεριγά, A. Βαρ-. A Benjamite, unless he be the same person as No. 2, adopted into the tribe of Benjamin, who was connected with the driving away of the "inhabitants of Gath" (1 Ch. viii. 13, apparently shortly after the conquest of Canaan; cp. *v.* 12. See supra No. 2).

4. One of the sons of Shimei, a Gershonite of the time of David (1 Ch. xxiii. 10, 11). [R. S. P.]

BERITES. [BERIAH, 1.]

BE'RITES, THE (הַבְּרִים; BA. ἐν Χαρρεί), a tribe or people who are named with Abel and Beth-maachah, places in the north of Palestine. They are mentioned as having been visited by Joab in his pursuit after Sheba the son of Bichri (2 Sam. xx. 14). The Vulgate has a different reading—"omnesque viri electi congregati fuerant" — apparently הַבְּחָרִים, *the*

young men, for הַבְּרִים; and this is Ewald's opinion is the correct reading (*Gesch.* iii. 249, note; so Wellhausen, *l.c.*). Klostermann, on the basis of the LXX, οἱ ἐν Χαρραί (Strack u. Zöckler, *Kgf. Komm.* for לְבֵית־הַבִּכְרִים prefers כָּל־הַבִּכְרִים "all the Bichrites" (*cp. v.* 13), and it is possible that this may be right (cp. Driver, *Notes on the Heb. Text of the Books of Sam.*, in loco). Thomson (*Land and the Book*, p. 275) supposes that the Berites lived at *Biria*, N. of *Safed*, which place he identifies with the *Beroth* (Βερώθη) of Jos. *Ant.* v. 1, § 18. [G.] [W.]

BERNI'CE (Βερνίκη, shortened for Βερενίκη [Joseph.], the Macedonian form of Φερενίκη: see Sturz, *Dial. Maced.* p. 31; *Bernice*). The name is frequent in the princely families of Egypt and Palestine (see *Dict. Biogr. and Mythol.*). The Bernice or Berenice of Acts xxv., xxvi. was the eldest of the three daughters of Herod Agrippa I. by Cypros, the other two being Drusilla and Mariamme. She was named after her grandmother, the wife of Aristobulus. She was first married to Marcus, son of Alexander the Alabarch (for a different view see Schürer, *N. T. Zeit-Geschichte*, p. 314, n. 3). After his death she was given to her uncle Herod, king of Chalcis in Lebanon, as his second wife. By him she had two sons, Berenicianus and Hyrcanus. After Herod's death, B.C. 48, she lived with her brother Agrippa under circumstances of the gravest suspicion. The scandal is mentioned by Juvenal (vi. 156). To disprove the accusation she persuaded Polemon king of Cilicia to marry her, her wealth being the inducement. A separation soon took place, Bernice's misconduct being assigned as the reason (Jos. *Ant.* xx. 7, 3). Besides grosser crimes, Bernice's jealousy of her sister Drusilla's beauty and her consequent persecution of her were alleged by Drusilla as a cause of her desertion of her husband Azizus for Felix (Jos. *Ant.* xx. 7, 2). Bernice returned to her brother Agrippa, and with him came down to welcome Festus at Caesarea on his arrival as procurator of Judaea (Acts xxv. 13). She was present when St. Paul had his audience (Acts xxv. 23 and xxvi. 30), and this threefold mention of her name may be taken as an indication of her political importance. The Apostle had already reasoned of righteousness, temperance, and judgment to come before Drusilla; and now Bernice, another of the three adulterous sisters, sat before him. (Mariamme, wife of Archelaus, had also forsaken her husband Archelaus for Demetrius: Jos. *Ant.* xx. 7, 3.) The one redeeming feature of her career which is known to us, was her earnest endeavour to stop the cruelties of Florus, the last and worst of the Roman governors. She was in Jerusalem at the time fulfilling a vow; and she is said to have urged her petition barefoot at the tribunal, and at the risk of her life (*Jos. B. J.* ii. 15, 1). With the rest of the Syrian vassals she gave her support to Vespasian in his successful attempt on the empire (Tac. *Hist.* ii. 81). In the last struggle she took part with the Romans, and at the close of the war came to Rome and openly renewed a connexion with Titus formed some time before (Tac. *Hist.* ii. 2). It was believed that he would have married her, but for the evident discontent caused by her presence in the city. He reluctantly dismissed her. She revisited Rome after Vespasian's death, but obtained no notice (Dio Cass. lxvi. 15 and 18; Suet. *Tit.* 7). She is remarkable as the last of the Herodian dynasty who claims a place in history. The destruction of Jerusalem cut short her ambitious design of refounding the Herodian kingdom of Judaea. The dynasty had begun, says Hausrath, in blood and terror, and it ended in moral rottenness and putrefaction. See, besides the authorities quoted, a full and spirited article on her by Hausrath in Schenkel's *Bibel-Lexikon*. [E. A. B.]

BER'ODACH-BAL'ADAN (2 K. xx. 12). [MERODACH-BALADAN.]

BE'ROTH (B. Βηρόγ, A. Βηρώθ), 1 Esd. v. 19. [BEEROTH.]

BE-RO'THAH, BE-RO'THAI (בֵּרוֹתָה, בֵּרֹתַי, probably the same as בְּאֵרוֹת, *wells* [Ges.]; *Berotha, Beroth*). Berothah, the first of two names (probably identical), each of which occurs once only, is given by Ezekiel (xlvii. 16) in connexion with Hamath and Damascus as forming part of the northern boundary of the Promised Land. MV.[11], with Furrer (*ZPDV.* viii. 34), identifies it not with Berytus (*Beirût*) but with *Bereitân* in the *Bḳâ'*; Orelli (Strack u. Zöckler, *Kgf. Komm.* in loco) with some place north of *Hōms* (= Hameth = Emesa). Berothai (2 Sam. viii. 8) is the name of a city of Zobah taken by David, also in connexion with Hamath and Damascus. [F. W. G.] [F.]

BERO'THITE, THE (1 Ch. xi. 39). [BEEROTH.]

BERYL (תַּרְשִׁישׁ, *tarshish*; χρυσόλιθος, θαρσεῖς, ἄνθραξ, λίθος ἄνθρακος; *chrysolithus, hyacinthus, mare*) occurs in Ex. xxviii. 20, xxxix. 13; Cant. v. 14; Ezek. i. 16, x. 9, xxviii. 13; Dan. x. 6. The *tarshish* was the first precious stone in the fourth row of the high-priest's breastplate; in Ezekiel's vision "the appearance of the wheels and their work was like unto the colour of a *tarshish*;" it was one of the precious stones of the king of Tyre; the body of the man whom Daniel saw in his vision was like the *tarshish*.

It is impossible to say with any degree of certainty what precious stone is denoted by the Hebrew word: Luther reads the "turquoise;" the LXX. supposes either the "chrysolite" or the "carbuncle" (ἄνθραξ); Onkelos and the Jerusalem Targum have *kerum jama*, by which the Jews appear to have understood "a white stone like the froth of the sea," which Braun (*de Vest. Sacer.* ii. c. 17) conjectures may be the "opal." The R. V., while always employing "beryl" in the text, has given in different places three marginal readings — "chalcedony," Ex. xxviii. 20; "topaz," Cant. v. 14; "stone of Tarshish," Ezek. i. 16. For other opinions, mere conjectures, see Braun.

It is generally supposed that the *tarshish* derives its name from the place so called, respecting the position of which see TARSHISH. Josephus (*Ant.* iii. 7, § 5) and Braun (*l. c.*) understand the *chrysolite* to be meant, not, however, the *chrysolite* of modern mineralogists,

but the *topaz*; for it certainly does appear that by a curious interchange of terms the ancient chrysolite is the modern topaz, and the ancient topaz the modern chrysolite (see Plin. *H. N.* xxxvii. 8; Hill on Theophrastus, *de Lapid.*; King's *Antique Gems*, p. 57), though Bellermann (*Die Urim und Thummim*, p. 62, Berlin, 1824) has advanced many objections to this opinion, and has maintained that the topaz and the chrysolite of the ancients are identical with the gems now so called. Braun, at all events, uses the term *chrysolithus* to denote the topaz, and he speaks of its brilliant golden colour. There is little or nothing in the passages where the *tarshish* is mentioned to lead us to anything like a satisfactory conclusion as to its identity, excepting in Cant. v. 14, where we do seem to catch a glimmer of the stone denoted: "His hands are orbs of gold adorned with the tarshîsh-stone." This seems to be the correct rendering of the Hebrew [R. V. "His hands are as rings (marg. *cylinders*) of gold set with beryl" (marg. *topaz*)]. The orbs or rings of gold, as Cocceius has observed (see *Speaker's Comm.* in loco), refer not to rings on the fingers, but to the fingers themselves, as they gently press upon the thumb, and thus form the figure of an orb or ring. The latter part of the verse is the casual expletive of the former. It is not only said in this passage that the hands are called orbs of gold, but the reason why they are thus called is immediately added—specially on account of the beautiful chrysolites with which the hands were adorned (Braun, *de V. S.* ii. 13). Pliny says of the *chrysolithos*, "It is a transparent stone with a refulgence like that of gold." Since then the *golden stone*, as the name imports, is admirably suited to the above passage in Canticles, and would also apply, though in a less degree, to the other Scriptural places cited —as it is supported by Josephus, and conjectured by the LXX. and Vulg.—the ancient *chrysolite* or the modern yellow *topaz* appears to have a better claim than any other gem to represent the *tarshish* of the Hebrew Bible, certainly a better claim than the *beryl* of the A. V., a rendering which appears to be unsupported by any kind of evidence. [W. H.] [H. B. T.]

BERZE'LUS (B. Φαηζελδαίος, A. Ζορζελλέος; *Phargeleu*), 1 Esd. v. 38. [BARZILLAI.]

BE'SAI (בֵּסַי, of uncertain meaning, see Ges.; B. Βασεί, A. -σι in Ezra, BNA. Βησεί in Neh.; *Besee*). "Children of Besai" were Nethinim who returned to Judaea with Zerubbabel (Ezra ii. 49; Neh. vii. 52). [BASTAI.] [W. A. W.] [F.]

BESODEI'AH (בְּסוֹדְיָה, Ges. [one] *in the secret of Jah*, i.e. the trusted one of Jah; B. Βαδιά, N. Ἀββδειά, Avid. Βασω Δια; *Besodia*), father of Meshullam, and one of the repairers of the wall of Jerusalem (Neh. iii. 6). [W. A. W.]

BESO'R, THE BROOK (נַחַל הַבְּשׂוֹר; BA. χειμάρρος τοῦ Βοσόρ in 1 Sam. xxx. 9, 10: in *v.* 21, B. Βεανάς, A. Βεχώρ; *torrens Besor*), a torrent-bed or wady in the extreme south of Judah, of which mention occurs only in 1 Sam. xxx. *ll. c.* The expression in *v.* 10 perhaps implies that it was a wide and deep ravine, difficult to cross. It is plain from the conditions of the narrative that it must have been south of Ziklag, but hitherto the situation of neither town nor *wâdy* has been identified with any probability. Dr. Robinson has suggested (*Phys. Geog.* 112) *W. 'Arârah*, the south-western branch of *W. es-Seb'a*. The name may signify, from the Arabic, "cool" (Ges.). [G.] [W.]

BE'TAH (בֶּטַח, *confidence*; A. Μασβάχ, B. Μασβάκ; *Bete*), a city belonging to Hadadezer, king of Zobah, mentioned with Berothai as having yielded much spoil of brass to David (2 Sam. viii. 8). In the parallel account 1 Ch. xviii. 8 (BN. Μεταβηχάς, A. Ματεβέθ), the name is called, by an inversion of letters, Tibchath. Ewald (*Gesch.* ii. 195) pronounces the latter to be the correct reading, and compares it with Tebach (Gen. xxii. 24), which is generally adopted here by modern scholars (see *QPB.*[3]). [G.] [W.]

BE'TANE (B. Βαιτανή, N. Βα-, A. Βλιτανή; Vulg. omits), a place apparently south of Jerusalem (Judith i. 9), and possibly identical with the Βηθενλμ of Eusebius (*OS.*[2] p. 263, 68), two miles from the Terebinth of Abraham and four from Hebron. This has been variously identified with Betharath, Bethainum, and Betaneh or Ecbatana in Syria, placed by Pliny (v. 17) on Carmel (Winer, s. v. *Betane*). Ball conjectures בֵּית־עֲנוֹת (Josh. xv. 59), *Beit 'Anûn*, five miles north of Hebron (see *Speaker's Comm.* on Judith i. 9). Bethany is inadmissible from the fact of its unimportance at the time, if indeed it existed at all. [G.] [W.]

BE'TEN (בֶּטֶן, Ges. perhaps a valley i. q. בִּטְנִ, κοιλάς; Jerome, *OS.*[2] p. 54, 27 = venter; B. Βαίθοκ, A. Βατνέ; *Beten*), one of the cities on the border of the tribe of Asher (Josh. xix. 25, only). By Eusebius (*OS.*[2] p. 249, 40) it is said to have been then called Βεθβετέν, and to have been situated eight miles east of Ptolemais; a position which agrees with that of the village *el-B'aneh* (*PEF. Mem.* i. 150, 153). [G.] [W.]

BETH (בַּיִת, according to Gesenius [*Thes.* and *Lex.*], from a root בּוּת, preserved in Aramaic, *to pass the night*), the most general word for a house or habitation. Strictly speaking, it has the force of a settled, stable, dwelling, as in Gen. xxxiii. 17, where the building of a "house" marks the termination of a stage of Jacob's wanderings (cp. also 2 Sam. vii. 2, 6); but it is also employed for a dwelling of any kind, even for a tent, as in Gen. xxiv. 32, where it must refer to the tent of Laban (cp. Judg. xviii. 31; 1 Sam. i. 7, where it refers to the tent of the Tabernacle; and 2 K. xxiii. 7, where it expresses the textile materials [A. V. "hangings"; R. V. marg. *tents*, Heb. *houses*] for the tents of Astarte). From this general force the transition was natural to a house in the sense of a family, as Ps. cvii. 41, "families" (Prayer-Bk. V. "households"), or a pedigree, as Ezra ii. 59. In 2 Sam. xiii. 7, 1 K. xiii. 7, and other places, it has the sense of "home," *i.e.* "to the house." Beth has also some collateral and almost technical meanings, similar to those which we apply

to the word "house," as in Ex. xxv. 27 for the "places" or sockets into which the bars for carrying the table were "housed;" and others.

Like *aedes* in Latin and *Dom* in German, Beth has the special meaning of a temple or house of worship, in which sense it is applied not only to the Tabernacle (see above) or Temple of Jehovah (1 K. iii. 2; vi. 1, &c.), but to those of false gods—Dagon (Judg. xvi. 27; 1 Sam. v. 2), Rimmon (2 K. v. 18), Baal (2 K. x. 21), Nisroch (2 K. xix. 37), and other gods (Judg. ix. 27). "Bajith" in Is. xv. 2 is really ha-Bajith = "the temple"—not improbably the "house of high places" mentioned in the Mesha-inscription — some well-known idol fane in Moab. [BAJITH.]

Beth is more frequently employed in combination with other words to form the names of places than Kirjath, Hatzer, Beer, Ain, or any other word. A list of the places compounded with Beth is given below in alphabetical order: but in addition to these it may be allowable here to notice two, which, though not appearing in that form in the A. V., yet do so in the LXX., probably with greater correctness.

BETH-E'KED (בֵּית עֵקֶד; B. Βαιθάκαθ; A. Βαιθακάδ; *camera pastorum*), A. V. and R. V. the "shearing house" [R. V. marg. *house of gathering*], at the pit or well (בְּאֵר) of which the forty-two brethren of Ahaziah were slain by Jehu (2 K. x. 12). It lay between Jezreel and Samaria, according to Jerome (*OS.*[2] p. 141, 17), 15 miles from the town of Legio, and in the plain of Esdraelon. It is now *Beit Kâd* (*PEF. Mem.* ii. 83).

BETH-HAGGAN (בֵּית הַגָּן, B. Βαιθάν; A.[?vid] Βαιαγγάν; *Domus horti*), A. V. and R. V. "the garden-house" (2 K. ix. 27), one of the spots which marked the flight of Ahaziah from Jehu. It is doubtless the same place as EN-GANNIM, "spring of gardens," the modern *Jenîn*, on the direct road from Samaria northward, and overlooking the great plain (Stanley, *S. & P.* p. 349, note). [G.] [W.]

BETH-ABA'RA (Βηθαβαρά, quasi בֵּית עֲבָרָה, *house of ford* or *ferry*; *Bethania*; R. V. *Bethany*, marg. *Bethabarah* and *Betharabah*), a place beyond Jordan, πέραν τοῦ Ἰορ.; in which, according to the Received Text of the N. T., John was baptizing (John i. 28), apparently at the time that he baptized Christ (cp. *vv.* 29, 35, 39). If the reading of the Received Text be the correct one, Bethabara may be identical with Bethbarah, the ancient ford of Jordan, of which the men of Ephraim took possession after Gideon's defeat of the Midianites [BETH-BARAH]; or, which seems more likely, with Beth-nimrah, on the east of the river, nearly opposite Jericho [BETH-NIMRAH]. But the oldest MSS. (B, A) and the Vulgate* have not Bethabara but Bethany, a reading which Origen (*ad loc.*) states to have obtained in almost all the copies of his time, σχέδον πάντα τὰ ἀντίγραφα, though altered by him in his edition of the Gospel on topographical grounds. In favour of Bethabara are: (*a*) the extreme improbability of so familiar a name as Bethany being changed by copyists into one so unfamiliar as Bethabara, while the reverse — the change from an unfamiliar to a familiar name—is of frequent occurrence. (*b*) The fact that Origen, while admitting that the majority of MSS. were in favour of Bethany, decided notwithstanding for Bethabara. (*c*) That Bethabara was still known in the days of Eusebius (*OS.*[2] s. v.), and greatly resorted to by persons desirous of Baptism (*ritali gurgite baptizantur*).

Still the fact remains that the most ancient MSS. have "Bethany," and that name has been accordingly restored to the text by Lachmann, Tischendorf, Westcott and Hort, Gebhardt, and the R. V. At this distance of time, and in the absence of exhaustive research on the east of Jordan, it is impossible to decide on evidence so slight and conflicting. It must not be overlooked that if Bethany be accepted, the definition "beyond Jordan" still remains, and therefore another place must be intended than the well-known residence of Lazarus. Major Conder has proposed (*PEF. Mem.* ii. 89; and *PEFQy. Stat.* 1877, 184–7; 1878, 120) to identify Bethabara with *'Abârah*, a ford of the Jordan, near Bethshean; and to read Batanaea (Basan) for the Bethany of the oldest MSS. The theory is ingenious, but it does not meet all the requirements of the case, some of which necessitate a site nearer Judaea and Jerusalem. Westcott (*Speaker's Comm.* in loco) conjectures "an obscure village in Peraea." It may be added that the tradition which places the scene of Christ's Baptism at the Jordan nearly opposite Jericho appears to be at least as old as the first half of the 4th century. The question is discussed in *Antoninus*, App. i., P. P. Text Society Series. [G.] [W.]

BETH-ANA'TH (בֵּית עֲנָת, MV.[11], Nestle, Halévy, Baethgen, &c. = "house [or temple] of the goddess 'Anât;" B. Βαιθαμέ, A. Βαιναθάθ; *Bethanath*), one of the "fenced cities" of Naphtali, named with Bethshemesh (Josh. xix. 38); from neither of which were the Canaanites expelled (Judg. i. 33; B. Βαιθανάχ, A. Βαιθενέθ). It is now probably *'Ainitha*, 5½ miles W.N.W. of *Kades*, Kadesh (Thomson, *Land and the Book*, p. 212). By Eusebius (*OS.*[2] pp. 242, 70; 249, 45, s. vv. Ἀνείρ, Βηθαναθά) it is spoken of as a village called Batanaea, 15 miles eastward of Caesarea, and reputed to contain medicinal springs, λουτρὰ ἰάσιμα: this place, however, appears to be the modern *'Anîn* (see *PEF. Mem.* ii. 44). [G.] [W.]

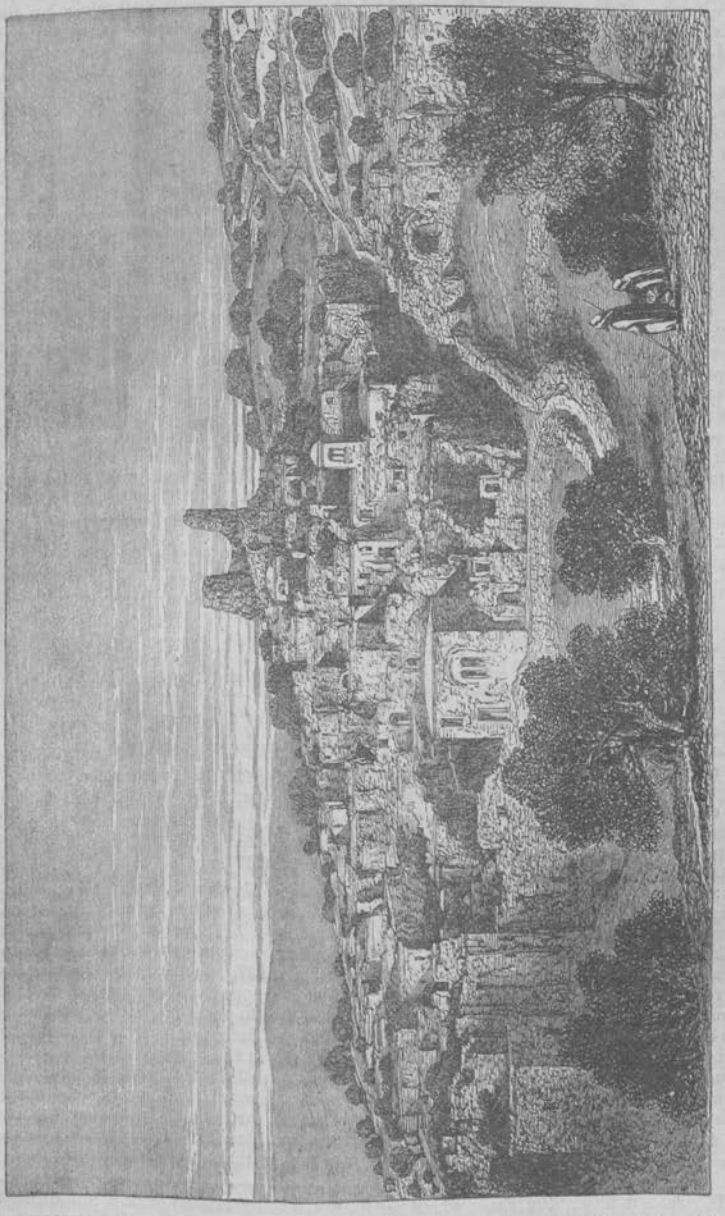
BETH-ANO'TH (בֵּית עֲנוֹת, possibly [Dillmann, Baethgen] called after the goddess 'Anath; B. Βαιθανάμ, A. Βαιθανών; *Bethanoth*), a town in the mountainous district of Judah, named with Halhul, Bethzur, and others, in Josh. xv. 59 only. It is very probably the modern *Kh. Beit 'Ainûn*, N.E. of Hebron, the remains of which, near to those of *Halhûl* and *Beit Sûr*, were discovered by Wolcott and visited by Robinson (iii. 281). See also *PEF. Mem.* iii. 311, 351. [G.] [W.]

BETHANY (in Talm. quasi בֵּית הִינֵי, said to mean *house of unripe dates*; Βηθανία; *Bethania*), a village which, scanty as are the notices of it contained in Scripture, is more intimately associated in our minds with the most familiar acts and scenes of the last days of the life of

* Jerome (*OS.*[2] p. 146, 6) has Beth-abara.

Christ than perhaps any other place. It was at Bethany that He raised Lazarus from the dead, and from Bethany that He commenced His "triumphal entry" into Jerusalem. It was His nightly resting-place during the time immediately preceding His Passion; and here at the houses of Martha and Mary, and of Simon the leper, we are admitted to view Him, more nearly than elsewhere, in the circle of His domestic life.

Though it was only at a late period of the life of our Lord that His connexion with



Bethany, from the road to Jericho. (From a photograph.)

Bethany commenced, yet this is fully compensated for by its having been the scene of His very last acts on earth. It was somewhere here (Luke xxiv. 50; Acts i. 9, 12), on these wooded slopes beyond the ridge of Olivet, that the Apostles stood when they last beheld His figure, as, with "uplifted hands"—still, to the very moment of disappearance, "blessing" them—He was "taken up" into the "cloud" which "received" and hid Him from their "stedfast" gaze, the words still ringing in their ears, which prove that space and time are no

hindrance to the connexion of Christians with their Lord—"Lo! I am with you alway, even to the end of the world" (Matt. xxviii. 20).

The little information we possess about Bethany is entirely gathered from the N. T., neither the O. T. nor the Apocrypha having apparently any allusion to it. It was situated "at" (πρὸς) the Mount of Olives (Mark xi. 1; Luke xix. 29), about 15 stadia from Jerusalem (John xi. 18), on or near the usual road from Jericho to the city (Luke xix. 29, cp. v. 1; Mark xi. 1, cp. x. 46), and close by and west (?) of another village called BETHPHAGE, the two being several times mentioned together.

There never appears to have been any doubt as to the site of Bethany, which is now known by a name derived from Lazarus—*el-'Azeriyeh*[a] (العازريه). It lies on the eastern slope of the Mount of Olives, fully a mile beyond the summit, and not very far from the point at which the road to Jericho begins its more sudden descent towards the Jordan valley (Lindsay, p. 91, and De Saulcy, p. 120). The spot is a woody hollow more or less planted with fruit-trees,—olives, almonds, pomegranates, as well as oaks, and carobs; the whole lying below a secondary ridge or hump, of sufficient height to shut out the village from the summit of the mount (Rob. i. 431, 432; Stanley, p. 189; Bonar, pp. 138-9).

From a distance the village is, to use the emphatic words of one published description, "remarkably beautiful"—"the perfection of retirement and repose"—"of seclusion and lovely peace" (Bonar, pp. 139, 230, 310, 337; and see Lindsay, p. 69). It is difficult to reconcile these glowing descriptions with Dean Stanley's words (p. 189), or with the impression which the present writer derived from the actual view of the place. Possibly something of the difference is due to the different time of year at which the visits were made.

El-'Azeriyeh itself is a ruinous and wretched village, a "wild mountain hamlet" of "some twenty families," the inhabitants of which display even less than the ordinary Eastern thrift and industry (Rob. i. 432; Stanley, p. 189; Bonar, p. 310). In the village are shown the traditional sites of the house and tomb of Lazarus: the former the remains of a square tower, apparently of old date, though certainly not of the age of the kings of Judah, to which De Saulcy assigns it (p. 128); the latter a deep vault excavated in the limestone rock, the bottom reached by twenty-six steps. The house of Simon the leper is also exhibited. As to the real age and character of these remains there is at present no information to guide us.

Schwarz maintains *el-'Azeriyeh* to be AZAL; and would fix Bethany at a spot which, he says, the Arabs call Beth-hanan, on the Mount of Offence above Siloam (pp. 135, 263).

These traditional spots are first heard of in the 4th century—in the *Itinerary* of the Bordeaux Pilgrim, and in the *Onomasticon* of Eusebius (where the name itself has dropped out of the text; *OS.*[2] p. 251, 10) and Jerome (*OS.*[2] p. 142, 3); and they continued to exist, with certain varieties of buildings and of ecclesiastical establishments in connexion therewith, down to the 16th century, since which the place has fallen gradually into its present decay. This part of the history is well given by Robinson (i. 432-3). By Mandeville and other mediaeval travellers the town is spoken of as the "Castle of Bethany," an expression which had its origin in *castellum* being employed by the Vulgate as the translation of κώμη in John xi. 1. See *PEF. Mem.* iii. 27.

The derivation of the name of Bethany is much disputed. That given above—that of Lightfoot and Reland (cp. Hamburger, *RE.* Abth. II. *s. n.* Beth-Hini)—is preferred by many to that of Simonis (*Onom.* s. v.), viz. בֵּית עֲנִיָּה, *locus depressionis*, which has no special applicability to this spot more than to any other, while it lacks the correspondence with Beth-phage, "House of *Figs*," and with the "Mount of *Olives*," which gives so much colour to this derivation, although it is true that the dates have disappeared, and the figs and olives alone are now to be found in the neighbourhood of Bethany. This has been well brought out by Stanley (*S. & P.* pp. 186, 187).[b] [G.] [W.]

BETHANY beyond Jordan (John i. 28). See BETH-ABARA.

BETH-ARA'BAH (בֵּית הָעֲרָבָה, *house of the desert;* BA. Βαιθαραβά, in Josh. xv. 6; *Betharaba*), one of the six cities of Judah which were situated down in the Arabah, *i.e.* the sunk valley of the Jordan and Dead Sea ("wilderness," Josh. xv. 61, B. Θαραβαάμ, A. Βηθαραβά), on the north border of the tribe, and apparently between Beth-hoglah and the high land on the west of the Jordan valley (xv. 6). It is also included in the list of the towns of Benjamin (xviii. 22, B. Βαιθαβαρά, A. Βαιθαραβά). [G.] [W.]

BETH-A'RAM (accurately, as in R. V., BETH-HARAM, בֵּית הָרָם; B. om., A. Βηθαράμ; *Betharam*), one of the towns of Gad on the east of Jordan (Josh. xiii. 27), described as in "the valley" (הָעֵמֶק, not to be confounded with the Arabah or Jordan valley), and no doubt the same place as that named BETH-HARAN in Num. xxxii. 36. No further mention is found of it in the Scriptures; but Eusebius and Jerome (*OS.*[2] pp. 137, 16; 248, 87. The name appears to have dropped out of the text of Eusebius) report that in their day the appellation (*a Syris dicitur*) of Betharam was Bethramtha, Βηθραμφθά (see also the quotations from the Talmud in Schwarz, p. 231; the Syriac and other Versions, however, have all Bethharan, with no material variation), and that, in honour of Augustus, Herod had named it Libias (Λιβιάς). Josephus's account is that Herod (Antipas), on taking

[a] The Arabic name is given from Robinson. Lord Lindsay, however, denies that this is correct, and asserts, after frequently hearing it pronounced, that the name is *Lazarieh*. The *PEF.* Name Lists agree with Robinson.

[b] Mühlau (in Riehm's *HWB.* s. n. Bethania) prefers, at least for the Greek form of the name, the sense of the "house of the unhappy or poor," Jerome that of "domus adflictionis ejus vel domus obedientiae" (*OS.*[2] p. 93, 26). Some of the lesser Greek *Onomastica* adopt one or other of these last-named derivations, or add a fresh one—οἶκος δόξης—or combine them (cp. *OS.*[2] index, s. n. Βηθανία). [F.]

possession of his tetrarchy, fortified Sepphoris and the city (πόλις) of Betharamphtha, building a wall round the latter, and calling it Julias in honour of the wife of the emperor. As this could hardly be later than B.C. 1—Herod the Great, the predecessor of Antipas, having died in B.C. 4—and as the Empress Livia did not receive her name of Julia until after the death of Augustus, A.D. 14, it is probable that Josephus is in error as to the new name given to the place, and speaks of it as having originally received that which it bore in his own day. It is curious that he names Libias long before (*Ant.* xiv. 1, § 4), in such connexion as to leave no doubt that he alludes to the same place. Under the name of Amathus he again mentions it (*Ant.* xvii. 10, § 6; cp. *B. J.* ii. 4, § 2), and the destruction of the royal palaces there by insurgents from Peraea.

Ptolemy gives the locality of Libias as 31° 26′ lat. and 67° 10′ long. (Ritter, *Jordan*, p. 573); and Eusebius and Jerome (*OS.*[2] ut supra) state that it was five miles south of Bethnabran, or Bethamnaran (*i.e.* Beth-nimrah?). This agrees with the position of *Tell Râmeh*, a conspicuous mound, east of Jordan, near the mouth of *W. Hesbân:* the mound is 70 feet high, and 50 feet across at the top; there are a few old foundations (*U. S. P. E. S. Stat.* iii. 76; iv. 84). Tristram appears (*Land of Moab*, p. 348) to have been given the name *Beit-harran* for this mound. [G.] [W.]

BETH-ARBE'L (בֵּית אַרְבֵאל; T.[7] ἐκ τοῦ οἴκου τοῦ Ἱεροβοάμ, A. Ἱεροβαάλ), named only in Hos. x. 14, as the scene of a sack and massacre by Shalman (Shalmaneser). No clue is given to its position; it may be the ancient stronghold of Arbela in Galilee, but (Hitzig, MV.[11], Schrader, Orelli) is more probably another place of the same name, now *Irbid*, N.E. of Pella, of which mention is made by Eusebius (*OS.*[2] p. 236, 72). The Prophet perhaps alludes to a recent event, and Schrader suggests (*KAT.*[2] pp. 440–2) that Beth-Arbel was taken either by Shalmaneser III. during his campaign of 773 B.C. against Damascus, or by Salamanu, king of Moab, who was contemporary with Hosea, and whose name appears in the list of subject monarchs who gave tribute to Tiglath-pileser II. after the fall of Damascus in 732 B.C. His own preference is with Nowack for the latter of these two suggestions. In either case Beth-Arbel would have been east of Jordan. In the Vulgate Jerome has translated the name to mean "e domo ejus qui judicavit Baal," *i.e.* Jerubbaal (יְרֻבָּעַל) or Gideon, understanding Salman as Zalmunna, and the whole passage as referring to Judg. viii. [G.] [W.]

BETH-A'VEN (בֵּית אָוֶן, *house of naught*, i.e. *badness;* Josh. xviii. 12, B. Βαιθών, A. Βαιθαύν; *Bethaven*), a place on the mountains of Benjamin, east of Bethel (Josh. vii. 2, B. Βαιθήλ, A. Βηθαύν), and lying between that place and Michmash (1 Sam. xiii. 5 [LXX. see below]; also xiv. 23, B. Βαμώθ, A.[vid] Θαύν). In Josh. xviii. 12, the "wilderness" (*Midbar* = pasture-land) of Bethaven is mentioned. In 1 Sam. xiii. 5 the reading of the LXX. is Βαιθωρών, Beth-horon; but if this be correct, another Beth-horon must be intended than that commonly known, which was much further to the west (cp. Wellhausen, *l. c.*). In Hos. iv. 15, v. 8, x. 5 (οἶκος Ἀών, but A. οἶκος τῆς ἀδικίας, and so B. marg.), the name is transferred, with a play on the word very characteristic of this Prophet, to the neighbouring Bethel—once the "house of God," but then the house of idols, of "naught." [G.] [W.]

BETH-AZMA'VETH (בֵּית עַזְמָוֶת, for etymology see AZMAVETH; B. Βηθασμώθ; A. Βηθ'; *Bethazmoth*). Under this name is mentioned, in Neh. vii. 28 only, the town of Benjamin which is elsewhere called AZMAVETH and BETH-SAMOS.

Mr. Finn proposes to identify Azmaveth with *Hizmeh*, a village on the hills of Benjamin to the S.E. of *Jeb'a*. [G.] [W.]

BETH-BAAL-MEO'N[a] (בֵּית בַּעַל מְעוֹן; B. οἶκος Μελαβώθ; A. οἶκος Βελαμών; *Oppidum Baalmaon*), a place in the possessions of Reuben, on the "Mishor" or downs (A. V. "plain") east of Jordan (Josh. xiii. 17). At the Israelites' first approach its name was BAAL-MEON (Num. xxxii. 38 [cp. Dillmann], or, in its contracted form, BEON, xxxii. 3), to which the Beth was possibly a Hebrew addition. Later it would seem to have come into possession of Moab, and to be known either as Beth-meon (Jer. xlviii. 23) or Baal-meon (Ezek. xxv. 9). It was built or rebuilt by king Mesha, according to the inscription on the "Moabite Stone" (*Recovy. of Jerusm.* p. 507; *Records of the Past*, N. S. ii. 201), and a distinction seems to be made between Beth-Baal-emon and Baal-meon (cp. ll. 9, 26). The name is still attached to a ruined place of considerable size (*beträchtlich*, Seetzen), to the S.W. of *Hesbân*, and bearing the name of *M'ain*, which appears to give its appellation to the *Wâdy Zerka M'ain* (Tristram, *Land of Moab*, pp. 303–4; Seetzen, *Reisen*, p. 408). [G.] [W.]

BETH-BA'RAH (בֵּית בָּרָה; quasi בֵּית עֲבָרָה [one of the few instances of the *'Ain* being rejected in contraction, Ges. *Thes.* 976 *b*], *house of passage*, or *of the ford;* BA. Βαιθηρά; *Bethbera*), named only in Judg. vii. 24, as a point apparently south of the scene of Gideon's victory, which took place at or about Bethshean, and to which point "the waters" (הַמַּיִם) were "taken" by the Ephraimites against Midian. What these "waters" were is not clear, probably the *wâdys* and streams which descend from the highlands of Ephraim; it is only plain that they were distinct from the Jordan, to which river no word but its own distinct name is ever applied. Beth-barah derives its chief interest from the possibility that its more modern representative may have been Beth-abara where John baptized [BETH-ABARA]; but there is not much in favour of this beyond their similarity in sound. The pursuit of the Midianites can hardly have reached so far south as Beth-abara, which was accessible to Judaea and Jerusalem and all the "region round about" (ἡ περίχωρος; *i.e.* the oasis of the South Jordan at Jericho).

---

[a] It is possible that the name contains a trace of the tribe or nation of Maon,—the Maonites or Mehunim. [MAON; MEHUNIM.]

If the derivation of the name given above be correct, Beth-barah was probably the chief ford of the district, and may therefore have been that by which Jacob crossed on his return from Mesopotamia, and at which Jephthah slew the Ephraimites. [G.] [W.]

BETH-BA'SI (B. Βαιθβαισσεί [*v.* 62], Βαιθβασσεί [*v.* 64], A. Βεθβασί; *Bethbessen*), a town which from the mention of its decays (τὰ καθῃρημένα) must have been originally fortified, lying in the desert (τῇ ἐρημῷ), and in which Jonathan and Simon Maccabaeus took refuge from Bacchides (1 Macc. ix. 62, 64). Josephus (*Ant.* xiii. 1, § 5) has Βηθαλαγά (Beth-hogla), but a reading of the passage quoted by Reland (p. 632) presents the more probable form of Beth-keziz. Either alternative fixes the situation as in the Jordan valley not far from Jericho. [KEZIZ, VALLEY OF.] [G.] [W.]

BETH-BIR'EI (בֵּית בִּרְאִי, MV.[11] = *place of fatness*; B. [by inclusion of the next name] οἶκος Βραουμσεωρείμ, A. οἶκ. Βαρουμ-; *Beth-berai*; R. V. *Beth-biri*), a town of Simeon (1 Ch. iv. 31), which, by comparison with the parallel list in Josh. xix., appears to have also the name of BETH-LEBAOTH, of which it may possibly have been a corruption. It lay to the extreme south, with Beersheba, Hormah, &c. (cp. Josh. xv. 32, Lebaoth). [G.] [W.]

BETH'-CAR (בֵּית כַּר, Ges. = *house of lambs*; B. Βαιθχόρ, A. Βελχόρ; *Bethchar*), an unknown place named as the point to which the Israelites pursued the Philistines from Mizpeh on a memorable occasion (1 Sam. vii. 11). From the unusual expression "under Beth-car" (מִמַּתַּחַת לְבֵית), it would seem that the place itself was on a height, with the road at its foot. Josephus (*Ant.* vi. 2, § 2) has μέχρι Καρβαίων, and goes on to say that the stone Ebenezer was set up at this place to mark it as the spot to which the victory had extended. [EBEN-EZER.] This must not be confounded with the Κορέαι of *Ant.* xiv. 3, § 4; of *B. J.* i. 6, § 5, and iv. 8, § 1. The Targum has Bethsharon. [G.] [W.]

BETH-DA'GON (בֵּית דָּגוֹן, *house of Dagon*; *Bethdagon*).

1. B. Βαγαδιήλ, A. Βηθδαγών. A city in the low country (*Shefelah*) of Judah (Josh. xv. 41), and therefore not far from the Philistine territory, with which its name implies a connexion. From the absence of any conjunction before this name, it has been suggested that it should be taken with the preceding, "Gederoth-Beth-dagon;" in that case probably distinguishing Gederoth from the two places of similar name in the neighbourhood, but the suggestion is not adopted by the R. V. Caphar-dagon existed as a very large village between Diospolis (Lydda) and Jamnia in the time of Jerome (*OS.*[2] p. 138, 14, *s. v.* Beth-dagon). The site, hitherto unknown (Dillmann[2] in loco), has been recovered by M. Ganneau at *Dajûn*, between Lydda and *Yebnah*, Jamnia (*PEFQy. Stat.* 1874, p. 279). It is mentioned, with Joppa and Beneberak, in an inscription of Sennacherib (Schrader, *KAT.*[2] p. 289).

2. A town apparently near the coast, named as one of the landmarks of the boundary of Asher (Josh. xix. 27; בֵּית דָּגוֹן, B. Βαιθεγενέθ, A. Βηθδαγών). The name and the proximity to the coast point to its being a Philistine colony. Conder (*Hdbk. to Bible*, p. 268) proposes to identify it with *Kh. D'aûk*, a mound near the mouth of the Belus. Cp. Dillmann[2] in loco.

3. In addition to the two modern villages noticed above as bearing this ancient name, a third has been found by Robinson (iii. 298) a few miles east of *Nâblus*. Josephus (*Ant.* xiii. 8, § 1, and *B. J.* i. 2, § 3) gives the name of Dagon to the fortress in the Jordan valley in which Simon Maccabaeus was killed. [DOCUS.] There can be no doubt that in the occurrence of these names we have indications of the worship of the Philistine god having spread far beyond the Philistine territory. Possibly these are the sites of towns founded at the time when this warlike people had overrun the face of the country to "Michmash, eastward of Bethaven," on the south, and Gilboa on the north—*i.c.* to the edge of the heights which overlook the Jordan valley—driving "the Hebrews over Jordan into the land of Gad and Gilead" (1 Sam. xiii. 5–7, cp. 17, 18; xxix. 1; xxxi. 1). [G.] [W.]

BETH-DIBLATHA'IM (בֵּית דִּבְלָתָיִם, *house of the double cake* [of figs]; B. οἶκος Δαιβλαθαίμ, A. οἶκ. Δεβ-; *domus Deblathaim*), a town of Moab (Jer. xlviii. [LXX. xxxi.] 22), apparently the place elsewhere called ALMON-DIBLATHAIM. In the inscription on the "Moabite stone," found at Dibon, king Mesha states that he built Beth-Diblathaim (called Diblathan, *Recov. of Jer.* p. 507; Stade, *Ges. d. V. Isr.* i. 534). [G.] [W.]

BETH-EDEN. Amos i. 5, marg. [EDEN, 2.]

BETH-EL (בֵּית אֵל, *house of God*; ADE. [Gen. xxxv. 15] Βαιθήλ; Joseph. Βηθήλ, Βεθήλη πόλις; *Bethel*). **1.** A well-known city and holy place of Central Palestine.

Of the origin of the name of Bethel there are two accounts extant. 1. It was bestowed on the spot by Jacob under the awe inspired by the nocturnal vision of God, when on his journey from his father's house at Beersheba to seek his wife in Haran (Gen. xxviii. 19; LXX. οἶκος θεοῦ; *Bethel*). He took the stone which had served for his pillow and put (וַיָּשֶׂם) it for a pillar, and anointed it with oil; and he "called the name of that place (הַמָּקוֹם הַהוּא) Bethel; but the name of 'the' city (הָעִיר) was called Luz at the first." The expression in the last paragraph of this account is curious, and indicates a distinction between the "city" and the "place"—the early Canaanite "city" Luz, and the "place," as yet a mere undistinguished spot, marked only by the "stone," or the heap (Joseph. τοῖς λίθοις συμφορουμένοις), erected by Jacob to commemorate his vision.

2. But according to another account, Bethel received its name on the occasion of a blessing bestowed by God upon Jacob after his return from Padan-aram; at which time also (according to this narrative) the name of Israel was given him. Here again Jacob erected (יַצֵּב) a "pillar of stone," which, as before, he anointed with oil (Gen. xxxv. 14, 15). The key of this story would seem to be the fact of God's "speak-

ing" with Jacob. "God went up from him in the place where He 'spake' with him"—"Jacob set up a pillar in the place where He 'spake' with him," and "called the name of the place where God spake[a] with him Bethel."

Whether these two narratives represent distinct events (see *Speaker's Comm.* and Delitzsch [1887] on Gen. xxviii. 19), or, as would appear to be the case in other instances in the lives of the patriarchs, are different representations of the one original occasion on which the hill of Bethel received its consecration, we do not know. It is perhaps worth notice that the Prophet Hosea —in the only reference which the later Hebrew Scriptures contain to this occurrence—had evidently the second of the two narratives before him, since in a summary of the life of Jacob he introduces it in the order in which it occurs in Genesis (xxxv.), laying full and characteristic stress on the keyword of the story: "He had power over the Angel and prevailed; he wept and made supplication unto Him; He found him at Bethel, and there He *spake* with us, even the LORD, the God of hosts" (Hos. xii. 4, 5, R. V.).

Early as is the date involved in these narratives, yet, if we are to accept the precise definition of Gen. xii. 8, the name of Bethel would appear to have existed at this spot even before the arrival of Abram in Canaan: he removed from the oaks of Moreh to "'the' mountain on the east of Bethel," with "Bethel on the west and Hai on the east." Here he built an altar; and hither he returned from Egypt with Lot before their separation (xiii. 3, 4). See Stanley, *S. and P.* p. 218. It is, however, considered by some more probable that the names, afterwards so well known, are here given by anticipation (cp. Delitzsch in loco).

In one thing, however, the above narratives all agree,—in omitting any mention of towns or buildings at Bethel at that early period, and in drawing a marked distinction between the "city" of Luz and the consecrated "place" in its neighbourhood (cp., besides the passages already quoted, Gen. xxxv. 7). Even in the ancient chronicles of the conquest the two are still distinguished (Josh. xvi. 1, 2); and the appropriation of the name of Bethel to the city appears not to have been made till still later, when it was taken by the tribe of Ephraim; after which the name of Luz occurs no more (Judg. i. 22–26). If this view be correct, there is a strict parallel between Bethel and Moriah, which, probably a heathen sacred spot, received its consecration when Abraham offered up Isaac, but did not become the site of an actual sanctuary till the erection of the Temple there by Solomon. [MORIAH.]

The intense significance of the title bestowed by Jacob on the place of his vision—"House of God"—and the wide extent to which that appellation has been adopted in all languages and in spite of the utmost diversities of belief, has been well noticed by Stanley (*S. and P.* pp. 220–1). It should not be overlooked how far this has been the case with the actual name; the very syllables of Jacob's exclamation forming, as they do, the title of the chief sanctuary of the Mahometan world—the Beit-allah of Mecca; while they are not less the favourite designation of the meanest conventicles of the humblest sects of Protestant Christendom.

On the other hand, how singular is the fact—if the conclusions of etymologists are to be trusted (Spencer, *De Leg. Hebr.* i. 444; Bochart, *Canaan*, ii. 2)—that the awful name of Bethel should have lent its form to the word by which was called one of the most perplexing of all the perplexing forms assumed by the idolatry of the heathen—the Baitulia of the ancient Phoenicians, the λίθοι ἔμψυχοι, or small portable stones to which magical life was ascribed. Another opportunity will occur for going more at length into this interesting subject [STONES. Cp. Delitzsch (1887) on Gen. xxxv. 14, 15, and Mühlau in Keim's *HWB.* s. n. "Beth-el"]; it will be sufficient here to say that the Baitulia seem to have preserved the erect position of their supposed prototype, and that the worship included the anointing them with oil (Arnobius, *adv. Gentes*, i. 39).

The actual stone of Bethel itself was the subject of a Jewish tradition, according to which it was removed to the second Temple, and served as the pedestal for the ark. It survived the destruction of the Temple by the Romans, and was resorted to by the Jews in their lamentations (Reland, *Pal.* p. 638). [TEMPLE, THE SECOND.]

After the conquest Bethel is frequently heard of. In the troubled times when there was no king in Israel, it was to Bethel that the people went up in their distress to ask counsel of God (Judg. xx. 18, 26, 31, xxi. 2, LXX. and R. V.; in the A. V. and Vulg. [exc. in xx. 31] the name is translated "house of God"). Here was the ark of the covenant under the charge of Phinehas the grandson of Aaron, with an altar and proper appliances for the offering of burnt-offerings and peace-offerings (xx. 26–28, xxi. 4); and the unwonted mention of a regular road or causeway as existing between it and the great town of Shechem is doubtless an indication that it was already in much repute. Later than this we find it named as one of the holy cities to which Samuel went in circuit, taking equal rank with Gilgal and Mizpeh (1 Sam. vii. 16).

Probably it was this ancient reputation—combined with its situation on the extreme south frontier of his new kingdom, and with the hold which it must have had on the sympathies both of Benjamin and Ephraim, the former's by lot and the latter's by conquest—which made Jeroboam choose Bethel as the depository of the new false worship which was to seal and consummate the division between the ten tribes and the two. Here he established one of the two calves of gold, the priests of "the high places which he had made," and an altar[b] of incense, by which he himself stood to burn; as we see him in the familiar picture of 1 K. xii., xiii. Towards the end of Jeroboam's life Bethel fell into the hands of Judah (2 Ch. xiii. 19), whence it was probably recovered by Baasha (xvi. 1). It then remains unmentioned for a long period.

[a] The word is the same (דבר), and is rendered "spake" by R. V. in all three cases; in the A. V. it is rendered "talked" in the first two.

[b] W. R. Smith, *Religion of the Semites*, i. 470, suggest that this altar was a pillar crowned by a sort of capital bearing a bowl. This would illustrate Amos iii. 14, ix. 1.

The worship of Baal, introduced by the Phoenician queen of Ahab (1 K. xvi. 31), had probably alienated public favour from the simple erections of Jeroboam to more gorgeous shrines (2 K. x. 21, 22). Samaria had been built (1 K. xvi. 24) and Jezreel, and these things must have all tended to draw public notice to the more northern part of the kingdom. It was during this period that Elijah visited Bethel, and that we hear of "sons of the prophets" as resident there (2 K. ii. 2, 3), two facts apparently incompatible with the active existence of the calf-worship. The mention of the bears so close to the town (ii. 23, 25) looks too as if the neighbourhood were not much frequented at that time. But after his destruction of the Baal-worship throughout the country, Jehu appears to have returned to the simpler and more national religion of the calves, and Bethel comes once more into view (2 K. x. 29). Under the descendants of this king the place and the worship must have greatly flourished, for by the time of Jeroboam II., the great-grandson of Jehu, the rude village was again a royal residence with a "king's house" (Amos vii. 13); there were palaces both for "winter" and "summer," "great houses" and "houses of ivory" (iii. 15), and a very high degree of luxury in dress, furniture, and living (vi. 4–6). The one original altar was now accompanied by several others (ii. 8, iii. 14); and the simple "incense" of its founder had developed into the "burnt-offerings" and "meal-offerings" of "solemn assemblies," with the fragrant "peace-offerings" of "fat beasts" (v. 21, 22).

How this prosperity came to its doom we are not told. After the desolation of the northern kingdom by the king of Assyria, Bethel still remained an abode of priests, who taught the wretched colonists "how to fear Jehovah," "the God of the land" (2 K. xvii. 27, 28). According to the Jewish tradition (*Seder Olam Rabba*, ch. xxii.) the golden calf of Bethel was carried off by Shalmaneser, but the buildings remained till the time of Josiah, by whom they were destroyed; and in the account preserved of his reforming iconoclasm we catch one more glimpse of the altar of Jeroboam, with its last loathsome fire of "dead men's bones" burning upon it, the altar and high-place surviving in their archaic antiquity amidst the successive additions of later votaries, like the wooden altar of Becket at Canterbury, which continued in its original simplicity through all the subsequent magnificence of the church in which he was murdered (Stanley, *Canterbury*, p. 184). Not the least remarkable of these later works was the monument (מַצֵּבָה; στήλη; 2 K. xxiii. 17), evidently a conspicuous erection, of the "man of God" who proclaimed the ultimate downfall of this idolatrous worship at its very outset (1 K. xiii. 1) and who would seem to have been at a later date canonized as it were by the votaries of the very idolatry which he denounced. "Woe unto you! for ye build the sepulchres of the prophets, and your fathers killed them" (Luke xi. 47).

But, in any case, the fact of the continued existence of the tomb of this protester through so many centuries of idolatry illustrates very remarkably the way in which the worship of Jehovah and the false-worship went on side by side at Bethel. It is plain from several allusions of Amos that this was the case (v. 14, 22): and the fact before noticed of prophets of Jehovah being resident there, and of the friendly visits even of the stern Elijah; of the relation between the "man of God from Judah" and the lying prophet (1 K. xiii. 18) who caused his death; of the manner in which Zedekiah the son of Chenaanah, a priest of Baal, resorts to the name of Jehovah for his solemn adjuration (1 K. xxii. 11), and lastly of the way in which the denunciations of Amos were tolerated and he himself allowed to escape, — all these point to a state of things well worthy of investigation. In this connexion, too, it is curious that men of Bethel and Ai returned with Zerubbabel (Ezra ii. 28; Neh. vii. 32); and that they returned to their native place whilst continuing their relations with Nehemiah and the restored worship (Neh. xi. 31). In the 1st Book of Esdras the name appears as BETOLIUS (v. 21: cp. Ezra ii. 28). In later times Bethel is only named once, amongst the strong cities in Judaea which were repaired by Bacchides during the struggles of the times of the Maccabees (1 Macc. ix. 50).

Bethel is mentioned by Jerome (*OS.*[2] p. 135, 8) as twelve miles from Jerusalem on the right hand of the road to Neapolis; and here its ruins still lie under the scarcely altered name of *Beitin*. They cover a space of "three or four acres," and consist of "very many foundations and half-standing walls of houses and other buildings." "The ruins lie upon the front of a low hill between the heads of two hollow wadys which unite and run off into the main valley *es-Suweinit*" (Rob. i. 448–9). Dr. Clarke, and other travellers since his visit, have remarked on the "stony" nature of the soil at Bethel, as perfectly in keeping with the narrative of Jacob's slumber there. For a description of *Beitin* see *PEF. Mem.* ii. 295, 305. When on the spot little doubt can be felt as to the localities of this interesting place. The mount S.E. of Bethel, on which there are the ruins of a Byzantine church, *Kh. el-Mukâtir*, must be the "mountain" on which Abram built the altar, and on which he and Lot stood when they made their division of the land (Gen. xii. 8, xiii. 10). It is still thickly strewn to its top with stones formed by nature for the building of "altar" or sanctuary (*PEF. Mem.* ii. 373). As the eye turns involuntarily eastward, it takes in a large part of the plain of the Jordan opposite Jericho; distant, it is true, but not too distant to discern in that clear atmosphere the lines of verdure that mark the brooks which descend from the mountains beyond the river, and fertilise the plain even in its present neglected state; but which, if properly used, would again render the district what it once was, "a garden of the Lord, even as the land of Egypt." Eastward again of this mount, at about the same distance on the left that Bethel is on the right, is a third hill crowned by a remarkably desolate-looking mass of grey débris, the most perfect heap of ruin to be seen even in that country of ruins. This is *et-Tell*, "the mound," or "the heap," agreeing in every particular of name, aspect, and situation, with AI.

An admirable passage on the history of Bethel will be found in Stanley (*S. & P.* pp. 217–223).

2. A town in the south part of Judah, named in 1 Sam. xxx. 27. The collocation of the name in this list is decisive against its being the well-known Bethel (see Wellhausen and Klostermann *l. c.*); but opinions are still divided about the Bethel named in Josh. xii. 16 (BA. om. See Dillmann[2]). In 1 Sam. xxx. 27 the LXX. B. reads Βαιθσούρ, *i.e.* Bethzur (A. Βαιθήλ). By comparison of the lists of the towns of Judah and Simeon (Josh. xv. 30, xix. 4; 1 Ch. iv. 29, 30), the place appears under the names of CHESIL, BETHUL, and BETHUEL. [G.] [W.]

BETHEL, MOUNT. A point on the southern boundary of the children of Joseph (Josh. xvi. 1), where, however, R. V. reads more correctly "through the hill country to Bethel." It was in Mount Bethel (R. V. "in the mount of Bethel") that Saul assembled 2,000 of his chosen men before Jonathan made his attack on the Philistine garrison of Geba (1 Sam. xiii. 2). "The hill country" is apparently the ridge E. of Bethel which parts the waters of the Mediterranean from those of the Dead Sea. [BETH-EL.] [W.]

BETHELITE, THE (הַבֵּיתְאֵלִי; B. ὁ Βαιθηλείτης, A. Βαιθι-), HIEL, is recorded as the rebuilder of Jericho (1 K. xvi. 34). [G.] [W.]

BETH-E'MEK (בֵּית הָעֵמֶק, *house of the valley*; B. Σαφθαιβαιθμέ [apparently joining to previous name], A. Βηθαεμέκ; *Bethemec*), a place on or near the border of Asher, on the north side of which was the ravine of Jiphthah-el (Josh. xix. 27). Robinson has discovered an *'Amka* about 6½ miles to the N.E. of *'Akka*; but if his identification of *Jefât* with Jiphthah-el be tenable, the site of Beth-emek must be sought for farther south than *'Amka* (Rob. iii. 103, 107, 8. Cp. Dillmann[2]). Conder (*PEFQy. Stat.* 1883, p. 137) identifies Jiphthah-el with *W. el-Kurn*, but, if *'Amka* be Beth-emek, it is more probably *W. el-Karâk'a*. [G.] [W.]

BE'THER, THE MOUNTAINS OF (הָרֵי בֶתֶר; Ges. explains ב to be a region cut up into mountains and valleys: ὄρη κοιλωμάτων; *Bethr* and *Bethel*), Cant. ii. 17. There is no clue to guide us as to what mountains are intended here.

For the site of Bether, so famous in the post-biblical history of the Jews, and so disputed, see Reland, pp. 639, 640; Rob. iii. 267–271; Hamburger, *RE.* Abth. ii. s. n. *Bethar*. [G.] [W.]

BETHES'DA[a] (Βηθεσδά, as if בֵּית חֶסֶד, *house of mercy*, or בֵּית אֶשְׁדָּא, *place of the flowing of water*; א. Βηθζαθά, *place of olives*; B. Βηθσαιδά, *fishing-place*; Euseb. Βηζαθά.; *Bethsaida*), the Hebrew name of a reservoir or tank (κολυμβήθρα, *i.e.* a swimming-pool), with five "porches" (στοαί), close upon the sheep-*gate* [R. V.] or *market* [A. V.] (ἐπὶ τῇ προβατικῇ: it will be observed that the word market is supplied) in Jerusalem (John v. 2). It should be noted that the Sinaitic Version and Chrysostom, quoting John v. 2, read προβατικὴ κολυμβήθρα, "sheep-pool;" and that the Vulgate has *probatica piscina*. Eusebius, the author of the tract *De Semente*, Cyril of Jerusalem, and Jerome also write of Bethesda as the "sheep-pool." The porches—*i.e.* cloisters or colonnades—were extensive enough to accommodate a large number of sick and infirm people, whose custom it was to wait there for the "troubling of the water" (*v.* 7).

There were other κολυμβηθραι or "swimming-pools" at Jerusalem, such as the pool of Siloam (John ix. 7, 11), the pools *Struthion* and *Amygdalon* (Jos. *B. J.* v. 11, § 4), and the pool of Solomon (*B. J.* v. 4, § 2). The κολυμβήθρα was usually rectangular in form, open to the air, and surrounded by "porches" or cloisters[b] (στοαί), in which the bathers lounged and undressed. Siloam had four such cloisters (*Itin. Hierosol.*), of which remains have been found; Bethesda had five, a peculiarity that may be explained by comparing the statements of Eusebius and Cyril. From the former we gather that Bethesda was a double pool, and from the latter (*Hom. in Par.* § 2) that it had four cloisters round it and one in the middle. We may, perhaps, then reconstruct Bethesda as two pools closely adjoining each other, so as to form a square or rectangle, with a cloister on each side and one in the centre between the two pools.

Eusebius—though unfortunately he gives no clue to the situation of Bethesda—describes it (*OS.*[2] p. 251, 15) as a swimming-pool in Jerusalem, which is the sheep-*pool*, formerly having five porches; and he identifies it with the twin pools (ἐν ταῖς λίμναις διδύμοις), of which one was supplied by the periodical rains, while the water of the other was of a reddish colour (πεφοινιγμένον), due, as the tradition then ran, to the fact that the flesh of the sacrifices was anciently washed there before offering, on which account the pool was also called προβατικὴ (see, however, the comments of Lightfoot on this view, in his *Exercit.* on John v. 2). Eusebius's statement is partly confirmed by the Bordeaux Pilgrim (A.D. 333), who, after mentioning in his *Itinerary* "two large pools at the side of the Temple; that is, one on the right hand and one on the left," states that "more within the city there are twin pools, having five porches, which are called Bethsaida," and he adds that the water when agitated is of a ruddy colour (*Itin. Hierosol.*).

The writer of the tract *De Semente* (Migne, xxviii. 164) says that the sheep-pool was in existence in his day (*circ.* 320 A.D.), but that the five stoae had been destroyed. Eucherius (*De Loc. Sanct.*), 440 A.D., notices the twin pools, and the ruddy colour of the water in one of them; and Theodosius, 530 A.D., places it about 100 paces from the house of Pilate, and says (*De Ter. Sanct.* viii.) that near, or in it according to some MSS., there was a church dedicated to the Virgin. Antoninus states (*Itin.* xxvii.) that at

[a] The reading "Bethesda," though supported by the Peshiṭto, has the weight of MS. authority against it; and R. V. gives in the margin the alternative readings "Bethsaida" and "Bethzatha." The pool is not mentioned by any Jewish writer.

[b] Cloisters or colonnades round artificial tanks are common in the East. One example is the *Taj Bowree*, in the set of drawings of Beejapore published by the East India Company.

the time of his visit, 570 A.D., the pool was choked with filth, and that in one of the porches there was the Basilica of St. Mary. In the next century the Mary-legend, now connected with the Church of St. Anne, was fully established, and the placed was styled "the holy Probatica in which the illustrious Anna brought forth Mary" (Sophr. *Anac.* xx.; cp. Joan. Dam. *In Nat. B. V. Mar.*; *De Fide Orth.* iv.).

Four sites have been proposed for Bethesda:—

1. The large reservoir called the *Birket Isrâîl*, within the walls of the city, close by the St. Stephen's gate and under the north-east wall of the Haram area, is now shown as the modern representative of Bethesda. This tradition, however, does not appear to be older than the 13th century, for Brocardus, 1283 A.D., is the first to distinctly apply the name *Piscina Probatica* to this pool; the earlier historians of the Crusades seem to refer to 2. The arguments in favour of the *Birket Isrâîl* are, that the most probable position of the sheep-gate is at the N.E. part of the city [JERUSALEM], which applies equally to 2 and 3; and that if this remarkable reservoir be not Bethesda, it is not easy to see which of the ancient pools it represents.

2. A large pool adjacent to the Church of St. Anne, which has recently been recovered (*PEF. Qy. Stat.* 1888, pp. 115–134). Several writers, from William of Tyre onwards, allude to the presence of water in this pool; and in the *Citez de Iherusalem*, mention is made of a spring in front of the church. In favour of this site are, its close connexion with the Church of St. Anne, and the birthplace, according to modern tradition, of the Virgin; the identity of sense between *Beit Hanna*, the house of Anne, and Beth-Hesda, both meaning house of mercy or compassion; and the discovery in that place of a marble foot with an inscription testifying to the cure of a certain Pompeia Lucilia.

3. Sir C. Warren (*Recovy. of Jerusm.* pp. 196, 198) has identified the two *souterrains* near the Convent of the Sisters of Sion with the Bethesda of Eusebius and the Bordeaux Pilgrim; and the two large pools mentioned by the latter with the *Birket Isrâîl* and the pool which formerly existed to the north of it. This identification has the support of very early tradition; and the *souterrains* are situated in that part of the city which at the time of the Gospel history was known as Bezetha, a name which is only another form of Bethzatha and Bezatha (see *Bordeaux Pilgrim*, Appendix iii., P. P. Text Society Series).

Pool of Bethesda—Birket Isrâîl. (As it appeared about 1860. The pool is now filled up, or nearly so.)

4. Robinson (i. 342–3), with whom Conder agrees, suggests the "fountain of the Virgin," in the valley of the Kedron, a short distance above the Pool of Siloam. In favour of this are its situation, supposing the sheep-gate to be at the south-east of the city, as Lightfoot, Robinson, and others suppose; the strange intermittent "troubling of the water" caused by the periodical ebbing and flowing of the supply; and the fact that the Jews of the present day bathe in it when the water rises as a cure for rheumatism. Against it are the confined size of the pool; the difficulty of finding room for a kolumbethra with its five stoae; and the absence of any trace or tradition of the existence of a pool in that locality (see Barclay's detailed account, *City*, &c. pp. 516–524 and 325–6).[c]

For a description of the *Birket Isrâîl*, as dis-

[c] May it not, however, be possible that the true reading of John v. 2 is, "There is in Jerusalem, by the sheep-pool, *a building* which is called in Hebrew Bethesda, having five porches"? In this case there would be two distinct places, the pool and a building, analogous to a modern hospital for sick poor, with five aisles or covered galleries.

closed by Sir C. Warren's excavations, see *PEF. Mem. of Jerusalem*, pp. 122–126. [G.] [W.]

BETH-E'ZEL (בֵּית הָאֵצֶל), of uncertain etymology [see Ges.]; οἶκος ἐχόμενος αὐτῆς; *domus vicina*), a place named only in Mic. i. 11. It may have been situated in the plain of Philistia; but others identify it with Azel on the Mount of Olives (Zech. xiv. 5. Cp. Riehm, *HBW.* s. n.). [G.] [W.]

BETH-GA'DER (בֵּית גָּדֵר, *house of the wall*; B. Βαιθγαιδών, A. Βαιθγεδώρ; *Bethgader*), the same place as GEDER (Josh. xii. 13). It has not been identified. [G.] [W.]

BETH-GA'MUL (בֵּית גָּמוּל, *house of the weaned*; T.[7] οἶκος Γαιμώλ, א. Γαμωλά; *Bethgamul*), a town of Moab, in the *mishor* or downs east of Jordan ("plain country," Jer. xlviii. [LXX. ch. xxxi.] 23, cp. *v.* 21); apparently a place of late date, since there is no trace of it in the earlier lists of Num. xxxii. 35–38 and Josh. xiii. 16–20. A place called *Kh. Jemail*, nearly due east of Dibon, and not far from *Umm Rus'as*, was visited by Tristram (*Land of Moab*, p. 150). It occupies a conspicuous position, and meets the requirements of the text. *Umm el-Jemâl*, mentioned by Burckhardt as lying south of *Busrah*, is much too far to the north. [G.] [W.]

BETH-HACCE'REM (בֵּית הַכֶּרֶם, *house of the vineyard*; in Neh., א. Βηθακάμ, B. Βηθαχάμ, A. Βηθαχχαρμά; in Jer., B. Βαιθθαχαρμά, א. Βεθθα-, א[1]. Βαβρά, A. Βηθθαχάρ; *Bethacharam, Bethacarem*; R. V. "Beth-haccherem"), a town which, like a few other places, is distinguished by the application to it of the word *pelec*, פֶּלֶךְ, A. V. "part" [R. V. "district"] (Neh. iii. 14). It had then a "ruler" called שַׂר. From the other mention of it (Jer. vi. 1) we find that it was used as a beacon-station, and that it was near Tekoa. By Jerome (*Comm.* Jer. vi.) a village named *Bethacharma* is said to have been on a mountain between Tekoa and Jerusalem, a position in which the eminence known as the Frank mountain (Herodium) stands conspicuous; and this has accordingly been suggested as Beth-haccerem (Pococke, Rob. i. 480). The name is at any rate a testimony to the early fruitfulness of this part of Palestine.

Karem (Καρέμ) is one of the towns added in the LXX. to the Hebrew text of Josh. xv. 59 [LXX. 59 a], as in the mountains of Judah, in the district of Bethlehem. This is doubtless *'Ain Kârim*, near Jerusalem, which may possibly also be Beth-haccerem. [G.] [W.]

BETH-HA'RAN (בֵּית הָרָן; B. Βαιθαράν, A. Βαιθαρρά; *Betharan*), one of the "fenced cities" on the east of Jordan, "built" by the Gadites (Num. xxxii. 36). It is named with Beth-nimrah, and therefore is no doubt the same place as BETH-ARAM (accurately Beth-haram, Josh. xiii. 27. See Dillmann,[2] *ll. cc.*). The name is not found in the lists of the towns of Moab in Isaiah, Jeremiah, or Ezekiel. A *Beit Haran* still remains among the ruined sites S. of the Arnon (Tristram, *Land of Moab*, p. 348). [G.] [W.]

BETH-HOG'LA and -HOGLAH (בֵּית חָגְלָה, Ges. *house of partridge*; though Jerome gives another interpretation, *locus gyri*, reading the name בֵּית עֲגֵלָה, and connects it with the funeral races or dances at the mourning for Jacob [ATAD]: *Bethagla*); a place on the border of Judah (Josh. xv. 6; B. Βαιθαγλάαμ, A. Βαιθαλά) and of Benjamin (xviii. 19), to which latter tribe it was reckoned to belong (xviii. 21, B. Βεθεγαιώ, A. Βηθαγλά). A magnificent spring and a ruin between Jericho and the Jordan still bear the names of *'Ain Hajla* and *Kûsr Hajla*, and are doubtless on or near the old site (Rob. i. 544–6; see also *PEF. Mem.* iii. 213; Dillmann[5] on Gen. l. 11). The LXX. reading, Βαιθαγλαάμ, may point to En-eglaim, a place which was certainly near this locality. [G.] [W.]

BETH-HO'RON (בֵּית חוֹרוֹן, or בֵּית חֹרֹן, and once בֵּית חֹרֹן, *place of the hollow*; B. Ὡρωείν, A. Βηθωρών; *Beth-horon*), the name of two towns or villages, an "upper" (בֵּית הָעֶלְיוֹן) and a "nether" (בֵּית הַתַּחְתוֹן; Josh. xvi. 3, 5; 1 Ch. vii. 24), on the road from Gibeon to Azekah (Josh. x. 10, 11) and the Philistine plain (1 Macc. iii. 24). Beth-horon lay on the boundary line between Benjamin and Ephraim (Josh. xvi. 3, 5, and xviii. 13, 14), was counted to Ephraim (Josh. xxi. 22; 1 Ch. vii. 24), and given to the Kohathites (Josh. xxi. 22; 1 Ch. vi. 68 [53]).

The road connecting the two places is memorable in sacred history as the scene of two of the most complete victories achieved by the Jewish arms; that of Joshua over the five kings of the Amorites (Josh. x.; Ecclus. xlvi. 6). and that of Judas Maccabaeus over the forces of Syria under Seron (1 Macc. iii. 13–24). Later still, the Roman army under Cestius Gallus was totally cut up at the same spot (Joseph. *B. J.* ii. 19, §§ 8, 9).

There is no room for doubt that the two Beth-horons still survive in the modern villages of *Beit'ûr* (بيت عور) *et-Tahta* and *el-Fôka*, which were first noticed by Dr. Clarke, and have been since visited by Dr. Robinson, Dean Stanley, and others (*PEF. Mem.* iii. 17, 86). Besides the similarity of the name, and the fact that the two places are still designated as "upper" and "lower," all the requirements of the narrative are fulfilled in this identification. The road is still the direct one from the site which must have been Gibeon (*el-Jîb*) and from Michmash (*Mûkhmâs*) to the Philistine plain on the one hand, and Antipatris (Joseph. *B. J.* ii. 19, § 9) on the other. On the mountain which lies to the southward of the nether village is still preserved the name (*Yâlo*) and the site of Ajalon, so closely connected with the proudest memories of Beth-horon; and the long "descent" between the two remains unaltered from what it was on that great day which was "like no day before or after it" (Josh. x. 14). See map p. 394.

The importance of the road on which the two Beth-horons are situated, the main approach to the interior of the country from the Philistine plain, at once explains and justifies the frequent fortification of these towns at different periods of the history (1 K. ix. 17; 2 Ch. viii. 5; 1 Macc. ix. 50; Judith iv. 4, 5). The road is now very

rough, and little used; but, as late as the 16th century, it was the principal and most frequented line of communication between Jerusalem and the coast. There are many traces of the Roman paved road near Beth-horon. It leaves the main north road at *Tuleil el-Fûl*, 3½ miles from Jerusalem, due west of Jericho, and, bending slightly to the north, runs by the modern village of *el-Jîb*, the ancient Gibeon; it then proceeds by the Beth-horons in a direct line due west to *Jimzu* [GIMZO] and *Ludd* [LYDDA], where it parts into three, diverging north to *Kefr Sâba* [ANTIPATRIS], south to Gaza, and west to *Yâfa* [JOPPA].

From Gibeon to the Upper Beth-horon is a distance of about 4 miles of broken ascent and descent. The ascent, however, predominates, and this therefore appears to be the "going up" to Beth-horon which formed the first stage of Joshua's pursuit.[a] With the upper village the descent commences; the road rough and difficult even for the mountain-paths of Palestine: now over sheets of smooth rock flat as the flagstones of a London pavement; now over the upturned edges of the limestone strata; and now amongst the loose rectangular stones,[b] so characteristic of the whole of this district. There are in many places steps cut, and other marks of the path having been artificially improved. But though rough, the way can hardly be called "precipitous;" still less is it a ravine (Stanley, p. 208), since it runs for the most part along the back of a ridge or watershed dividing wadys on either hand. After about three miles of this descent, a slight rise leads to the lower village standing on its mamelon,—the last outpost of the Benjamite hills, and characterised by the date-palm in the enclosure of the village mosque. A short and sharp fall below the village, a few undulations, and the road is amongst the *dûra* of the great corn-growing plain of Sharon.

This rough descent from the upper to the lower *Beit 'ûr* is the "going down to Beth-horon" of the Bible narrative. Standing on the high ground of the upper village, and overlooking the wild scene, we may feel assured that it was over this rough path that the Canaanites fled to their native lowlands.

In a remarkable fragment of early history (1 Ch. vii. 24. See note in *Speaker's Comm.*) we are told that both the upper and lower towns were built by a woman of Ephraim, Sheerah [R. V.], who in the present state of the passage appears as a granddaughter of the founder of her tribe, and also as a direct progenitor of the great leader with whose history the place is so closely connected. [G.] [W.]

BETH-JESHI'MOTH, or -JESI'MOTH (בֵּית הַיְשִׁימוֹת, in Numb. הַיְשִׁמֹת, *house of the wastes;* B. Αἰσιμώθ, A. Ἀσιμώθ; *Bethsimoth*), a town or place east of Jordan, in the "deserts" (עַרְבֹת) of Moab; that is, on the lower level at the south end of the Jordan valley (Num. xxxiii. 49); and named with Ashdoth-pisgah and Beth-peor. It was one of the limits of the encampment of Israel before crossing the Jordan. Later it was allotted to Reuben (Josh. xii. 3, B. Ἀσειμώθ, A. Ἀσι-, F[vid]. Αἰσι-; xiii. 20, B. Βαιθθασειμώθ, A. Βησιμούθ; *Bethjesimoth*), but came at last into the hands of Moab, and formed one of the cities which were "the glory of the country" (Ezek. xxv. 9). Eusebius (*OS.*[2] p. 247, 81) mentions Βηθασιμοὶθ as a place near the Dead Sea, opposite to and 10 miles from Jericho. It is now probably *'Ain Suweimeh*, a small mound near the N.E. corner of the Dead Sea, covered with chips of pottery and glass (see Dillmann[2] on Numb. xxi. 20). [G.] [W.]

BETH-LEBA'OTH (בֵּית לְבָאוֹת, *house of lionesses;* B. Βαθαρώθ, A. Βαιθαλβάθ; *Bethlebaoth*), a town in the lot of Simeon (Josh. xix. 6), and therefore in the extreme south of Judah (xv. 32, Lebaoth), probably in the wild country to which its name bears witness. In 1 Ch. iv. 31 the name is BETH-BIREI. [G.] [W.]

BETH-LEHEM (בֵּית לֶחֶם, Ges. = *house of bread;* Βαιθλεέμ or Βηθλεέμ; *Bethlehem*). **1.** One of the oldest towns in Palestine, already in existence at the time of Jacob's return to the country. Its earliest name was EPHRATH or EPHRATAH (see Gen. xxxv. 16, xlviii. 7; Josh. xv. 59, LXX.), and it is not till long after the occupation of the country by the Israelites that we meet with it under its new name of Bethlehem.

The ancient name lingered as a familiar word in the mouths of the inhabitants of the place (Ruth i. 2, iv. 11; 1 Sam. xvii. 12), and in the poetry of the Psalmists and Prophets (Ps. cxxxii. 6; Mic. v. 2) to a late period. [EPHRATH.] In the genealogical lists of 1 Ch. it recurs, and Ephrath appears as a person—the wife of Caleb and mother of Hur (חוּר; ii. 19, 50, iv. 4); the title of "father of Bethlehem" being bestowed both on Hur (iv. 4) and on Salma, the son of Hur (ii. 51, 54). The name of Salma recalls a very similar name intimately connected with Bethlehem, namely, the father of Boaz, Salmah (שַׂלְמָה, Ruth iv. 20; A. V. and R. V. "Salmon") or Salmon (שַׂלְמוֹן, v. 21). Hur is also named in Ex. xxxi. 2, and 1 Ch. ii. 20, as the father of Uri the father of Bezaleel.

After the conquest Bethlehem appears under its own name Bethlehem-judah (Judg. xvii. 7; 1 Sam. xvii. 12; Ruth i. 1, 2), possibly, though hardly probably, to distinguish it from the small and remote place of the same name in Zebulun. As the Hebrew text now stands, however, it is absent from the list of the towns of Judah in Joshua xv., but it is retained in the original text preserved by the LXX., and forms part of the eleven names which that Version inserts between *vv.* 59 and 60 [in Swete's ed. *v.* 59 a. Cp. Dillmann[2] in loco]. Among these it occurs between Theko (Tekoa), Θεκώ (cp. 1 Ch. iv. 4, 5), and Phagor (? Peor, Φαγώρ).

[a] The statements of Dr. Robinson and Dean Stanley on this point are somewhat at variance; but although the road from Gibeon to *Beit 'ûr el-Fôka* is by no means a uniform rise, yet the impression is certainly that of an ascent; and *Beit 'ûr*, though perhaps no higher than the ridge between it and Gibeon, yet looks higher, because it is so much above everything beyond it.

[b] In the traditions of the Jews these stones are believed to be those which were showered from heaven on the routed Canaanites. Whoever beholds them is bound to bless God (Otho, p. 83).

A remarkable obscurity rests over Bethlehem throughout the whole of the Sacred history. Not to speak of the later event which has made the name of Bethlehem so familiar to the whole Christian and Mussulman world, it was, as the birthplace of David, the scene of a most important occurrence to ancient Israel. And yet from some cause or other it never rose to any eminence, nor ever became the theatre of any action or business. It is difficult to say why Hebron and Jerusalem, with no special associations in their favour, were fixed on as capitals, while the place in which the great ideal king, the hero and poet of the nation, drew his first breath and spent his youth, remained an "ordinary Judaean village." No doubt this is in part owing to what will be noticed presently—the isolated nature of its position; but that circumstance did not prevent Gibeon, Ramah, and many other places situated on eminences from becoming famous, and is not sufficient to account entirely for such silence respecting a place strong by nature, and so important as a military position that it was at one time occupied by a Philistine garrison (2 Sam. xxiii. 14; 1 Ch. xi. 16).

Though not named as a Levitical city, it was apparently a residence of Levites, for from it came the young man Jonathan, the son of Gershom, who became the first priest of the Danites at their new northern settlement (Judg. xvii. 7, xviii. 30), and from it also came the concubine of the other Levite whose death at Gibeah caused the destruction of the tribe of Benjamin (xix. 1–9).

The Book of Ruth is a page from the domestic history of Bethlehem: the names, almost the very persons, of the Bethlehemites are there brought before us; we are allowed to assist at their most peculiar customs, and to witness the very springs of those events which have conferred immortality on the name of the place. Many of these customs were doubtless common to Israel in general, but one thing must have been peculiar to Bethlehem. What most strikes the view, after the charm of the general picture has lost its first hold on us, is the intimate connexion of the place with Moab. Of the origin of this connexion no record exists, no hint of it has yet been discovered, but it continued in force for at least a century after the arrival of Ruth, till the time when her great grandson could find no more secure retreat for his parents from the fury of Saul, than the house of the king of Moab at Mizpeh (1 Sam. xxii. 3, 4. JESSE). But whatever its origin, here we find the connexion in full vigour. When the famine occurs, the natural resource is to go to the country of Moab and "continue there;" the surprise of the city is occasioned not at Naomi's going but at her return. Ruth was "not like" the handmaidens of Boaz—some difference of feature or complexion there was doubtless which distinguished the "children of Lot" from the children of Abraham, Isaac, and Jacob; but yet she gleans after the reapers in the field without molestation or remark, and when Boaz in the most public manner possible proclaims his intention of taking the stranger to be his wife, no voice of remonstrance is raised, but loud congratulations are expressed: the parallel in the life of Jacob occurs at once to all, and a blessing is invoked on the head of Ruth the Moabitess, that she may be like the two daughters of the Mesopotamian Nahor, "like Rachel and like Leah, who did build the house of Israel." This, in the face of the strong denunciations of Moab contained in the Law, is, to say the least, very remarkable.

The elevation of David to the kingdom does not appear to have affected the fortunes of his native place. The residence of Saul acquired a new title specially from him, by which it was called even down to the latest time of Jewish history (2 Sam. xxi. 6; Joseph, *B. J.* v. 2, § 1, Γαβαθσαουλή), but David did nothing to dignify Bethlehem, or connect it with himself. The only touch of recollection which he manifests for it, is that recorded in the well-known story of his sudden longing for the water of the well by the gate of his childhood (2 Sam. xxiii. 15).

The few remaining casual notices of Bethlehem in the Old Testament may be quickly enumerated. It was fortified by Rehoboam (2 Ch. xi. 6). By the time of the Captivity, the Inn (?) of Chimham by אֵצֶל = "close to") Bethlehem, appears to have become the recognised point of departure for travellers to Egypt (Jer. xli. 17) —a caravanserai or khan (גֵּרוּת; see Stanley, App. § 90; R. V. "Geruth-Chimham;" marg. *the lodging-place of C.* See *QPB.*[3] in loco), perhaps the identical one which existed there at the time of our Lord (*κατάλυμα*), like those which still exist all over the East at the stations of travellers. Lastly, "children of Bethlehem," to the number of 123, returned with Zerubbabel from Babylon (Ezra ii. 21; Neh. vii. 26).

In the New Testament Bethlehem retains its distinctive title of Bethlehem-judah[a] (Matt. ii. 1, 5), and once, in the announcement of the Angels, the "city of David"[b] (Luke ii. 4; cp. John vii. 42; *κώμη*; *castellum*). Its connexion with the history of Christ is too familiar to all to need any notice here: the remark should merely be made that as in the earlier history less is recorded of the place after the youth of David than before, so in the later, nothing occurs after the birth of our Lord to indicate that any additional importance or interest was fastened on the town. In fact, the passages just quoted, and the few which follow, exhaust the references to it in the N. T. (Matt. ii. 6, 8, 16; Luke ii. 15).

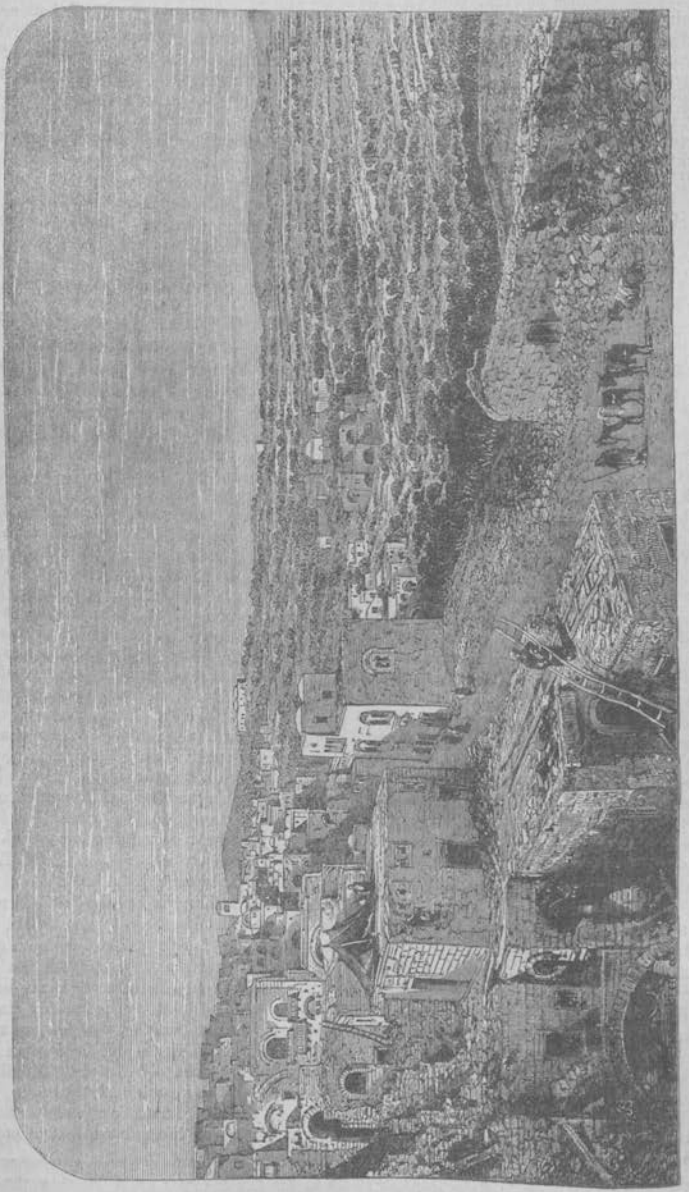
After this nothing is heard of it till near the middle of the 2nd century, when Justin Martyr speaks of our Lord's birth as having taken place "in a certain cave very close to the village," which cave he goes on to say had been specially pointed out by Isaiah as "a sign." The passage from Isaiah to which he refers is xxxiii. 13–19; and in the LXX. Version of v. 16 occurs the following—"He shall dwell in the lofty cave of the strong rock" (Justin. *Dial. c. Tryph.* §§ 70, 78). Such is the earliest supplement we possess to the meagre indications of the

---

[a] In the Greek copies of St. Matthew the name is given as τῆς Ἰουδαίας (Westcott and Hort); but in the more ancient Syriac recension published by Mr. Cureton it is, as in the O. T., Bethlehem-judah.

[b] Observe that this phrase has lost the meaning which it bears in the O. T., where it specially and invariably signifies the fortress of the Jebusites, the fastness of Zion (2 Sam. v. 7, 9; 1 Ch. xi. 5, 7).

narrative of the Gospels; and while it is not possible to say with certainty that the tradition is true, there is no reason for discrediting it. There is nothing in itself improbable—as there certainly is in many cases where the traditional scenes of events are laid in caverns—in the supposition that the place in which Joseph and Mary took shelter, and where was the "manger" or "stall" (whatever the φάτνη may have been),[e] was a cave in the limestone rock of which the eminence of Bethlehem is composed (see *Speaker's Comm.* on Luke ii. 7). Nor is it necessary to assume that Justin's quotation from Isaiah is the ground of an inference of



Bethlehem, from the Armenian convent. (From a photograph.)

his own; it may equally be an authority happily adduced by him in support of the existing tradition.

But the step from the belief that the Nativity may have taken place in a cavern, to the belief that the present subterraneous vault or crypt is that cavern, is a very wide one. Even in the

[e] It is as well to remember that the "stable," and its accompaniments, are the creations of the imagination of poets and painters, with no support from the Gospel narrative.

150 years that had passed when Justin wrote, so much had happened at Bethlehem that it is difficult to believe that the true spot could have been accurately preserved. In that interval—an interval as long as that between the landing of William III. and the battle of Waterloo—not only had the neighbourhood of Jerusalem been overrun and devastated by the Romans at the destruction of the city, but the Emperor Hadrian, amongst other desecrations, had actually planted a grove of Adonis at the spot (*lucus inumbrabat Thamuz id est Adonidis*, Jerome, *ad Paul.* 58, 3). This grove remained at Bethlehem for no less than 180 years, viz. from A.D. 135 till 315. Cyril of Jerusalem, born 317, says, "Bethlehem a few years ago was a wild wood" (*Catech.* xii. 20). After this the place was purged of its abominations by Constantine, who about A.D. 330 erected the present church (Euseb. *Vit. Const.* 3, 40. See Tobler, p. 102, *note*). Conceive the alterations in the ground implied in this statement!—a heathen sanctuary established and a grove planted on the spot—that grove and those erections demolished to make room for the Basilica of Constantine!

The modern town of *Beit Lahm* (بيت لحم) lies to the east of the main road from Jerusalem to Hebron, 6 miles from the former. It is a well-built stone town, standing on a narrow limestone ridge which runs east and west. The hill has a deep valley on the north, and another on the south. The west end shelves down gradually; but the east end is bolder, and overlooks a plain of some extent. The slopes of the ridge are in many parts covered by terraced gardens, shaded by rows of olives with figs and vines, the terraces sweeping round the contour of the hill with great regularity. Towards the eastern end of the ridge is the open market-place, and beyond it spreads the noble Basilica of St. Helena, "half church, half fort," now embraced by its three convents—Greek, Latin, and Armenian.

This is not the place for a description of the "holy places" of Bethlehem. All that can be said about them has been well said by Lord Nugent (i. 13–21) and Dean Stanley (pp. 438–442. See also, though interspersed with much irrelevant matter, Stewart, pp. 246, 334–5). The architecture of the church is described by De Vogüé (*Les Églises de la Terre Sainte*, pp. 46–117); see also Fergusson's *History of Architecture*, vol. ii. 288–290.[d] One fact, of great interest—probably the most genuine about the place—is associated with a portion of the crypt of this church; namely, that here, "beside what he believed to be the cradle of the Christian faith," St. Jerome lived for more than thirty years, leaving a lasting monument of his sojourn in the Vulgate translation of the Bible.

In the plain below and east of the convent, about a mile from the walls, is the traditional scene of the Angels' appearance to the shepherds, a very small poor village called *Beit Sahûr*, to the east of which are the unimportant remains of a Greek church. These buildings and ruins are surrounded by olive-trees (Seetzen, ii. 41, 42). Here in Arculf's time, "by the tower of Ader," was a church dedicated to the three shepherds, and containing their monuments (Arculf, p. 6). But this plain is too rich ever to have been allowed to lie in pasturage, and it is more likely to have been then occupied, as it is now and as it doubtless was in the days of Ruth, by corn-fields, and the sheep to have been kept on the hills.*

The traditional well of David (2 Sam. xxiii. 15), a group of three cisterns, is on a flat rock terrace to the north-west of the present town. About half a mile east of the convent there is a small spring, but the principal water supply is from a shaft over the Jerusalem aqueduct, on the south side of the hill; there is also a large well in the monastery.

The population of *Beit Lahm* is about 5,000 souls, almost entirely Christians. All travellers (e.g. *Eothen*) remark the good looks of the women, the substantial clean appearance of the houses, and the general air of comfort (for an Eastern town) which prevails.

2. בֵּ֫ית לֶ֫חֶם; B. Βαιθμάν, A. Βαιθλεέμ; *Bethlehem*. A town in the portion of Zebulun named nowhere but in Josh. xix. 15. It has been recovered by Dr. Robinson at *Beit Lahm*, about six miles west of Nazareth, and lying between that town and the main road from Akka to Gaza. Robinson characterises it as "a very miserable village, none more so in all the country, and without a trace of antiquity except the name" (iii. 113). It was probably the birthplace of Ibzan, the judge. [G.] [W.]

BETH'LEHEMITE, THE (בֵּית הַלַּחְמִי; *Bethlehemites*). A native or inhabitant of Bethlehem. Jesse (LXX. aliter in 1 Sam. xvi. 1, BA. Βηθλεεμείτης in 1 Sam. xvi. 18, A. Βηθλεεμείτης in 1 Sam. xvii. 58, B. om.) and Elhanan (2 Sam. xxi. 19, B. Βαιθλεεμείτης, A. Βηθλεεμίτης) were Bethlehemites. Another Elhanan, son of Dodo of Bethlehem, was one of David's guard (2 Sam. xxiii. 24; LXX. aliter). [ELHANAN.] [W. A. W.] [F.]

BETH-LO'MON (A. Βαιθλωμών, B. Ραγεθλωμών; *Scpolemon*), 1 Esd. v. 17. [BETH-LEHEM, 1.] [G.] [W.]

BETH-MA'ACHAH (בֵּ֫ית מַעֲכָה, and with the article, בֵּ֫ית הַמַּ֫עֲכָה; B. Βαιθμαχά, A. Βηθμαχά; *Bethmaacha*), a place named only in 2 Sam. xx. 14, 15, and there occurring more as a definition of the position of ABEL than for itself (see Driver in loco). It is said to be now represented by Abl, a village six and a half miles west of Banias in the north of Palestine (Harper, *The Bible and modern Discoveries*, p. 313). [G.] [W.]

BETH-MARCA'BOTH (בֵּ֫ית הַמַּרְכָּבֹת, *house of the chariots*, in Chronicles, without the ar-

[d] Dean Stanley mentions, and recurs characteristically to the interesting fact, that the present roof is constructed from English oak given to the church by Edward IV. (*S. & P.*, pp. 141, 439). Tobler, p. 104, *note*, adduces the authority of Eutychius that the present church is the work of Justinian, who destroyed that of Constantine as not sufficiently magnificent.

* Ἀγραυλοῦντες (Luke ii. 8; A. V. and R. V. "abiding in the field") has no special reference to "field" more than hill; but means rather "passing the night out of doors." Χώρα also means a "district" or neighbourhood, with no special topographical signification.

ticle: in Josh., B. Βαιθμαχερέβ, A. Βαιθαμμαρχασβώθ; in Ch., B. Βαιθμαρειμώθ, A. ἐν Βαιθ'μαρχαβώθ: *Bethmarchaboth*), one of the towns of Simeon, situated to the extreme south of Judah, with Ziklag and Hormah (Josh. xix. 5; 1 Ch. iv. 31). What "chariots" can have been in use in this rough and thinly inhabited part of the country, at a time so early as that at which these lists of towns purport to have been made out, we know not. At a later period—that of Solomon—"chariot cities" are named, and a regular trade with Egypt in chariots was carried on (1 K. ix. 19 = 2 Ch. viii. 6; 1 K. x. 29 = 2 Ch. i. 17), which would naturally require depôts or stopping-places on the road "up" to Palestine (Stanley, p. 160). In the parallel list (Josh. xv. 31), Madmannah (LXX. Μακαρεἰμ) occurs in place of Bethmarcaboth; possibly the latter was substituted for the former after the town had become the resort of chariots (cp. Dillmann,[2] *l. c.*).

[G.] [W.]

BETH-MEO'N (בֵּ֣ית מְעוֹן; *οἶκος Μαών*; *Beth-maon*), Jer. xlviii. 23. A contracted form of BETH-BAAL-MEON. [G.] [W.]

BETH-ME'RHAK (בֵּ֣ית הַמֶּרְחָק; *ἐν οἴκῳ τῷ μακράν*; *procul a domo*). The A. V. translates, "a place that was far off"; R. V. as the name above, but in margin *the Far House* (see MV.[11]). A place (2 Sam. xv. 17) outside Jerusalem at which David tarried, when fleeing from Absalom, that he might see his servants, and those who were to accompany him, pass by. There is no clue to its exact position. [W.]

BETH-NIM'RAH (בֵּ֣ית נִמְרָה, Ges. *house of limpid and wholesome water:* in Num., B. Ναμράμ, A. Ἀμβράν; in Josh., B. Βαιθαναβρά, A. Βηθαμνά: *Bethnemra*), one of the "fenced cities" on the east of the Jordan taken and "built" by the tribe of Gad (Num. xxxii. 36) and described as lying "in the valley" (בָּעֵמֶק) beside Beth-haran (Josh. xiii. 27). In Num. xxxii. 3 (B. Ναμβρά, A. Ἀμβράμ, F. Ναμρά) it is named simply NIMRAH. By Eusebius and Jerome (*OS.*[2] pp. 136, 1; 137, 19; 246, 42, *s. nn.* Βηθναμράν, Βηθναμβρίς, Bethamnaram, and Bethnemra) the village is said to have been still standing five miles north of Libias (Betharan); and Eusebius further mentions (*OS.*[2] p. 278, 22, *s. n.* Νεβρὰ) that it was a large place, *κώμη μεγίστη*, in Batanaea, and called Ναβαρά.

It is now *Tell Nimrîn*, on the south side of and close to the perennial stream of *Nahr Nimrin*, the Arab appellation of the lower end of the *Wâdy Sh'aib*, where the waters of that valley discharge themselves into the Jordan, close to one of the regular fords a few miles above Jericho. The mound is surrounded by *sidr* groves, and the stream is fringed with canes (Conder, *MS. Notes;* Morrill, *East of Jordan*, p. 207). The *Wâdy Sh'aib* runs back up into the eastern mountains, as far as *es-Salt*. Its name (the modern form of Hobab?) connects it with the wanderings of the children of Israel, and a tradition still clings to the neighbourhood that it was down this valley they descended to the Jordan (Seetzen, ii. 377).

It seems to have escaped notice how fully the requirements of Bethabara are met in the circumstances of Bethnimrah—its abundance of water and its situation close to "the region round about Jordan" (*ἡ περίχωρος τοῦ Ἰορδάνου, i.e.* the CICCAR of the O. T., the Oasis of Jericho), immediately accessible to "Jerusalem and all Judaea" (John i. 28; Matt. iii. 5; Mark i. 5) by the direct and ordinary road from the capital. Add to this, what is certainly a confirmation of this suggestion, that in the LXX. (B.) of Josh. xiii. 27 the name of Bethnimrah is found almost exactly assuming the form of Bethabara—Βαιθαναβρά (see above).

The "Waters of Nimrim," which are named in the denunciations of Moab by Isaiah (xv. 6) and Jeremiah (xlviii. 34), may from the context be the brook which still bears the same name at the south-east part of the Dead Sea. [NIMRIM.] A similar name (signifying, however, in Arabic, "panther") is not uncommon on the east of the Jordan. [G.] [W.]

BETHO'RON (B. Βαιθωρών; A. Βεθωρώ; Vulg. om.), Judith iv. 4. [BETH-HORON.]

BETH-PA'LET (בֵּ֣ית פָּלֶט, Ges. *house of flight;* in Josh., B. Βαιφάλαδ, A. Βαιθφαλέθ; *Bethphelet;* R. V. *Beth-pelet*), a town among those in the extreme south of Judah, named in Josh. xv. 27, and Neh. xi. 26 (BA. om., א[c.1mg] Βηβφαλατ'), with Moladah and Beer-sheba. In the latter place it is BETHPHELET (so Vulgate). Its remains have not yet been discovered. [G.] [W.]

BETH-PAZ'ZEZ, (בֵּ֣ית פַּצֵּץ, Ges. = *house of dispersion;* B. Βησσαφής, A. Βαιθφασής; *Beth-pheses*), a town of Issachar named with Enhaddah (Josh. xix. 21), and of which nothing is known. [G.] [W.]

BETH-PEO'R (בֵּ֣ית פְּעוֹר; *οἶκος Φογώρ*; in Josh., B. Βαιθφογώρ, A. Βεθ-; *fanum Phogor, Phogor, Bethphogor;* in *OS.*[2] p. 156, 20, *Beth-fogor*), a place, no doubt, dedicated to the god Baalpeor, on the east of Jordan, opposite (*ἀπέναντι*) Jericho, and six miles above Libias or Betharan (Eusebius, *OS.*[2] p. 247, 78). It was in the possession of the tribe of Reuben (Josh. xiii. 20). In the Pentateuch the name occurs in a formula by which one of the last halting-places of the children of Israel is designated—"the ravine (הַנִּיא) over against (מוּל) Beth-peor" (Deut. iii. 29; iv. 46). In this ravine Moses was probably buried (xxxiv. 6).

Here, as in other cases, Beth-Peor may be an abbreviation for Beth-Baal-Peor (cp. W. R. Smith, *Religion of the Semites*, i. 93, n. 2).

Conder (*Heth and Moab*, p. 143) places Beth-peor on a narrow ridge S. of *el-Maslûbiyeh;* Tristram (*Land of Moab*, p. 305) on the ridge N. of *Jebel Neba*, Nebo. Cp. Dillmann[2] on Num. xxiii. 28. [G.] [W.]

BETH-PHAGE (Βεθφαγή and Βηθφαγῆ; *Bethphage;* בֵּ֣ית פַּגֵּי [Delitzsch, *Heb. N. T.*], *house of unripe figs*), the name of a place on the Mount of Olives, on the road between Jericho and Jerusalem. From the two being twice mentioned together, it was apparently close to BETHANY (Matt. xxi. 1; Mark xi. 1; Luke xix. 29); and from its being named first

of the two in the narrative of a journey from east to west, it may be presumed that it lay, if anything, to the eastward of Bethany. The fact of our Lord's making Bethany His nightly lodging-place (Matt. xxi. 17, &c.) is no confirmation of this (as Winer would have it); since He would doubtless take up His abode in a place where He had friends, even though it were not the first place at which He arrived on the road. No remains which could answer to this position have however been found (Rob. i. 433), and the traditional site is above Bethany, halfway between that village and the top of the mount.

By Eusebius and Jerome, and also by Origen, the place was known, though no indication of its position is given; by Eusebius (*OS.*[2] p. 251, 9) it is called *κώμη*, by Jerome (*OS.*[2] p. 142, 1) *villula*. They describe it as a village of the priests, possibly from "Beth-phace," signifying in Syriac the "house of the jaw," and the jaw in the sacrifices being the portion of the priests (Reland, p. 653). Lightfoot's theory, grounded on the statements of the Talmudists, is extraordinary: that Bethphage was the name of a district reaching from the foot of Olivet to the wall of Jerusalem (but see Reland, p. 652; Hug, *Einl.* i. 18, 19). Schwarz (pp. 263–4) and Barclay (in his map) appear to agree in placing Bethphage on the southern shoulder of the "Mount of Offence," above the village of Siloam, and therefore west of Bethany.

The mediaeval Bethphage was discovered in 1877 on the road from the Mount of Olives to Bethany (*PEFQy. Stat.* 1878, p. 51). Certain passages in the Talmud (Tal. Bab. *Menachoth*, xi. 2; 78 *b*) seem to indicate that Bethphage marked, on the east, the Sabbatic zone round Jerusalem; and Ganneau proposes (*PEFQy. Stat.* 1878, p. 60) to identify it with *Kefr et-Tûr*, the village of the Mount of Olives, which is at the required distance from the city.

The name of Bethphage, the signification of which as given above is generally accepted, is, like those of Bethany, Caphenatha, Bezetha, and the Mount of Olives itself, a testimony to the ancient fruitfulness of this district (Stanley, *S. & P.* p. 187). [G.] [W.]

BETH-PHE'LET (R. V. *Beth-pelet*), Neh. xi. 26. [BETH-PALET.]

BETH-RA'PHA (בֵּית רָפָא, *house of Rapha*, of uncertain etymology; B. *ὁ Βαθραάλα*, A. *Βαθρεφά*; *Bethrapha*), a name which occurs in the genealogy of Judah as the son of Esh-ton (1 Ch. iv. 12 only). There is a Rapha in the line of Benjamin and elsewhere, but no apparent connexion exists between those and this, nor has the name been identified as belonging to any place. [G.] [W.]

BETH-REHO'B (בֵּית רְחוֹב, *house of Rechob*, or *of room;* in Judg. B. *ὁ οἶκος Ραάβ*, A. *Τώβ*; *Rohob*).

1. A place described as being "far from Zidon," and as having near it the valley in which lay the town of Laish or Dan (Judg. xviii. 28). It is probably the same as REHOB, a place mentioned (Num. xiii. 21; LXX. v. 22, B. *Ραάβ*, A. *Ροώβ*, F. *Ροώθ*) as the extreme point reached by the spies, and used apparently as Dan was afterwards, to denote approximately the northern limit of the Promised Land. Dr. Robinson conjectures (iii. 371) that this ancient place is represented by the modern *Hunîn*, a fortress commanding the plain of the *Hûleh*, in which the city of Dan (*Tell el-Kâdy*) lay. It may, however (see Dillmann[2] on Num. *l. c.*), as has been suggested in the case of the neighbouring town of Abel-Beth-Maacah, have been a colony or offshoot from the Aramean state of Beth-rehob (2 Sam. x. 6). It must not be confounded with two towns of the name of Rehob in the territory of Asher. [REHOB.]

2. *Ροώβ*. An Aramean state the soldiers of which were hired by the Ammonites, in conjunction with those of Zobah, Maacah, and Ishtob (the men of Tob), to fight against David (2 Sam. x. 6). In *v.* 8 it is called Rehob (A. *Ροάβ*); and in 1 Ch. xix. 6 Aram-Naharaim (A. V. and LXX. "Mesopotamia") takes the place of Beth-rehob and Ishtob (see *Speaker's Comm.* and Klostermann on 2 Sam. x. 6). It lay apparently to the S. of Zobah, and bordered on the Euphrates. [ARAM (1).] Some authorities (see Dillmann,[2] *l. c.*), however, think that it is the same as the Beth-rehob of Judg. xviii. 28, and the Rehob of Num. xiii. 21. [REHOB.]

Hadadezer the king of Zobah is said to have been the son of Rehob (2 Sam. viii. 3, 12; BA. *Ραάβ*). [G.] [W.]

BETH-SAIDA (*Βηθσαϊδά*; بيت صيدا, *a fishing place*, "*sporting lodge;*" *Bethsaida*), the name of one or possibly two places in Northern Palestine.

"Bethsaida of Galilee," a city (*πόλις*), was the native place of Andrew, Peter, and Philip (John i. 44; xii. 21), and perhaps situated in the land of Gennesareth (*τὴν γῆν Γ.*; Mark vi. 45, cp. *v.* 53). It was evidently not far from Capernaum and Chorazin (Matt. xi. 21; Luke x. 13; and cp. Mark vi. 45 with John vi. 11); and, if the interpretation of the name is to be trusted, close to the water's edge. By Jerome (*Comm. in Esai.* ix. 1) and Eusebius (*OS.*[2] p. 251, 7) these towns and Tiberias are all mentioned together as lying on the shore of the lake. Epiphanius (*adv. Haer.* ii.) says of Bethsaida and Capernaum, *οὐ μακρὰν ὄντων τῷ διαστήματι*. Wilibald (A.D. 722) went from Magdalum to Capernaum, thence to Bethsaida, and then to Chorazin, or possibly, from the context, to Gergesa, now *Khersa*, on the eastern shore of the lake. These ancient notices, however, though they fix its general situation, do not contain any indication of its exact position; and as its name and all memory of its site have perished, no positive identification can be made of it.

The difficulty experienced in fixing the site of Bethsaida is due, in great measure, to the uncertainty in which the question whether there were two places of that name, or only one, is still involved.

I. The theory that there were two Bethsaidas was first put forward by Reland (p. 653), and it has since been adopted by Robinson, Stanley, Tristram, and other authorities. The arguments in its favour are:—(*a*) That John (xii. 21) mentions a Bethsaida of Galilee, which Mark (vi. 45, 53) seems to place in Gennesareth; whilst

Josephus alludes to a Bethsaida in Lower Gaulonitis, which was on the Lake of Gennesareth, and near the Jordan. This place, formerly a village (κώμη), was rebuilt and adorned by Philip the tetrarch, and raised to the dignity of a town under the name of Julias, after the daughter of the Emperor (*Ant.* xviii. 2, § 1; *Vit.* 71;—*B. J.* ii. 9, § 1; iii. 10, § 7). Here Philip died, and was, perhaps, buried (*Ant.* xviii. 4, § 6). Pliny (v. 15) and Jerome (*Comm. on* Matt. xvi. 13) both speak of Julias as east of Jordan. (*b*) That in a narrative of the same event, the feeding of the five thousand, Luke (ix. 10) places the scene of the miracle at Bethsaida, whilst Mark (vi. 45) states that the disciples were told "to go to the other side before to Bethsaida," after the miracle had been performed.

II. On the other hand, (*a*) the words (A. V.) "a desert place belonging to" a city called Bethsaida are omitted in the Sinaitic Version of Luke ix. 10, in a very ancient Syriac recension (the Nitrian) published by Mr. Cureton, by Westcott and Hort, and by R. V.; (*b*) no ancient author or pilgrim mentions two Bethsaidas; and (*c*) the Sinaitic Version, in a remarkable ["but quite arbitrary"] reading of John vi. 23 (see Westcott in *Speaker's Comm.* p. xcii.), describes the place where the five thousand were fed as being near Tiberias. This view is confirmed by Arculf, who places the scene of the miracle on the grassy plain behind *'Ain Barîdeh* (E. T. p. 9), and who travelled before any motive could have arisen for the transference of the site from the eastern to the western shore of the lake. The miracle took place in a τόπος ἔρημος (Mark vi. 31, 32)—a retired spot covered with a profusion of green grass (John vi. 3, 10; Mark vi. 39; Matt. xiv. 19). When evening was come, Matthew says (xiv. 22, 34) that the disciples were directed to go before "unto the other side," and that "they came into the land of Gennesareth"; Mark (vi. 45–53) that they were "to go to the other side before unto Bethsaida," and that "they came into the land of Gennesareth"; and John (vi. 17–21) that they "went over the sea toward Capernaum," and that, after the storm, "immediately the ship was at the land whither they went." It is, perhaps, impossible to completely reconcile these statements; but if *'Ain Barîdeh* were the starting-point, *Tell Hûm*, Capernaum, and the mouth of the Jordan, Bethsaida Julias, would be nearly in the same direction, and it is possible that, after having started for Bethsaida, the wind and waves of the storm may have driven the boat out of its course, and obliged the disciples to land near *Khân Minyeh*, in the land of Gennesareth. The arguments in favour of one Bethsaida are given by Wilson (*Recov. of Jerusalem*, pp. 375–387) and Thomson (*Land and the Book*, p. 373).

If Dalmanutha (Mark viii. 10) were on the west side of the lake, then the village mentioned in *v.* 22[a] must have been Bethsaida Julias; because in the interval Christ had departed by ship to the other side (*v.* 13). And with this well accords the mention immediately after of the villages of Cæsarea Philippi (*v.* 27), and of the "high mountain" of the Transfiguration (ix. 2), which, as Stanley has ingeniously suggested,[b] was not the traditional spot, but a part of the Hermon range somewhere above the source of the Jordan (*S. and P.* p. 399).

The advocates of two Bethsaidas place the Galilean town at *et-Tâbiqah*, on the shore of the lake between *Khân Minyeh* and *Tell Hûm*, except Ritter, Seetzen, and Socin, who identify it with *Khân Minyeh*, and Bethsaida Julias at *et-Tell*, a ruin on the hillside, east of Jordan, where the river leaves the mountains. If there was only one Bethsaida, it was probably near the mouth of the Jordan, and perhaps, like *Kerak* (Taricheae), surrounded by the river, and so liable to be included at one period in Galilee and at another in Gaulonitis. [G.] [W.]

BETH-SAMOS (B. Βαιτασμών, A. Βαιθασμώθ; *Cebethamus*), 1 Esd. v. 18. [BETH-AZMAVETH.]

BETH-SAN (T.[c] Βαιθσάν, A. in 1 Macc. xii. Βεθσά; *Bethsan*), 1 Macc. v. 52; xii. 40, 41. [BETH-SHEAN.]

BETH-SHAN (*Bethsan;* 1 Sam. xxxi. 10, 12, A. Βηθσάν, B. [*v.* 10] Βαιθέμ, [*v.* 12] Βαιθσαμ; 2 Sam. xxi. 12, A. Βηθσάν, B. Βαίθ). [BETH-SHEAN.] [W. A. W.] [F.]

BETH-SHEA'N (בֵּית שְׁאָן, *house of rest* or *security;* or, in Samuel, BETH-SHAN [בֵּית שָׁן]; *Bethsan*), a city which, with its "daughter" towns, belonged to Manasseh (1 Ch. vii. 29; B. Βαιθσαάν, A. -σάν), though within the limits of Issachar (Josh. xvii. 11; B[ms] A. Βαιθσάν, B. Καιθσάν), and therefore on the west of Jordan (cp. 1 Macc. v. 52), but not mentioned in the lists of the latter tribe. The Canaanites were not driven out from the town (Judg. i. 27; B. Βαιθσάν, A. Βαιθήλ).[a] In Solomon's time it seems to have given its name to a district extending from the town itself to Abel-meholah; and "all Bethshean" was under the charge of one of his commissariat officers (1 K. iv. 12; B. πᾶς ὁ οἶκος Δάν, A. π. ὁ οἱ. Σάν).

The corpses of Saul and his sons were fastened up to the wall of Bethshean by the Philistines (1 Sam. xxxi. 10, 12; A. Βηθσάν [bis], B. Βαιθέμ [*v.* 10], Βαιθσάμ [*v.* 12]) in the open "street" or space (רְחֹב), which—then as now—fronted the gate of an Eastern town (2 Sam. xxi. 12). From this time we lose sight of Bethshean till the period of the Maccabees, in connexion with whose exploits it is mentioned more than once in a cursory manner (1 Macc. v. 52; cp. 1 Macc. xii. 40, 41). The name of Scythopolis (Σκύθων πόλις) appears for the first time in 2 Macc. xii. 29. [SCYTHOPOLIS.] This name, which it received after the exile, and under the Greek dominion, has not survived to the present day; as in many other cases (cp. PTOLEMAIS) the old Semitic appellation has revived, and the place is still called

[a] The use of the word κώμη in this place is remarkable. Stanley suggests that its old appellation had stuck to it, even after the change in its dignity (*S. & P.* App. § 85).

[b] A similar suggestion was made by Reland (*Pal.* pp. 334–6) and by Lightfoot (*Hor. Hebr.* p. 447).

[c] The LXX. (T[r]. and Swete) in Judg. i. 27 contains the words ἡ ἐστιν Σκυθῶν πόλις inserted after Bethshean.

Beisân. In the Mishna (*Avoda Zarah*, i. § 4) Bethshean is cited as an example of a town containing an idol, and therefore only to be entered by Jews on certain conditions. It became a famous Christian school contemporary with Caesarea, the seat of a bishopric (4th cent.), and was the birthplace of the Gnostic Basilides. It lies in the Ghôr or Jordan valley, about twelve miles south of the Sea of Galilee, and four miles west of the Jordan. The town is situated on the south side of the *Nahr Jâlûd*, on a low table-land above the Jordan valley (*PEF. Mem.* ii. 105). A few miles to the south-west are the mountains of Gilboa, and close beside the town runs the water of the *'Ain Jâlûd*, the fountain of which is by Jezreel, and is in all probability the spring by which the Israelites encamped before the battle in which Saul was killed (1 Sam. xxix. 1).[b] Three other large brooks pass through or by the town; and in the fact of the abundance of water, and the exuberant fertility[c] of the soil consequent thereon, as well as in the power of using their chariots, which the level nature of the country near the town conferred on them (Josh. xvii. 16), resides the secret of the hold which the Canaanites retained on the place.

If Jabesh-Gilead was where Dr. Robinson conjectures—at *ed-Deir* in the *Wâdy Yâbis*—the distance from thence to *Beisân*, which it took the men of Jabesh "all night" to traverse, cannot be less than twenty miles. [G.] [W.]

BETH-SHE'MESH (בֵּית שֶׁמֶשׁ, *house of the sun; Bethsames*), the name of several places.

1. One of the towns which marked the north boundary of Judah (Josh. xv. 10; **πόλις ἡλίου**), but reckoned among the cities of Dan (Josh. xix. 41). It was in the neighbourhood of Kirjath-jearim and Timnah, and therefore in close proximity to the low-country of Philistia. The expression "went down" in Josh. xv. 10, 1 Sam. vi. 21, seems to indicate that the position of the town was lower than Kirjath-jearim; and it is in accordance with this indication that there was a valley (עֵמֶק) of cornfields attached to the place (1 Sam. vi. 13; B. **Βαιθσάμυς**, A. **Βεθθάμυς**).

From Ekron to Beth-shemesh a road (דֶּרֶךְ, **ὁδός**) existed along which the Philistines sent back the ark after its calamitous residence in their country (1 Sam. vi. 9, 12); and it was in the field of "Joshua the Beth-shemite" (בֵּית הַשִּׁמְשִׁי) that the "great stone" [ABEL] was, on which the ark was set down (1 Sam. vi. 18; see *QPB.*[2] *in loco*). Beth-shemesh was a "suburb city," allotted to the priests (Josh. xxi. 16, B. **Βαιθσάμυς**, A. **Βεθσάμες**; 1 Ch. vi. 59, B. **Βασάμυς**, A. **Βαιθσάμυς**); and it is named in one of Solomon's commissariat districts under the charge of Ben-Dekar (1 K. iv. 9; B. **Βαιθσάμυς**, A. **Βεθσάμυς**). It was the scene of an encounter between Jehoash, king of Israel, and Amaziah, king of Judah, in which the latter was worsted and made prisoner (2 K. xiv. 11, 13, B. **Βαιθσάμυς** [bis], A. **Βηθ-** [or **Βεθ-**] **σαμυέ**; 2 Ch. xxv. 21, 23, BA. **Βαιθσάμυς** [bis]). Later, in the days of Ahaz, it was taken and occupied by the Philistines, together with several other places in this locality (2 Ch. xxviii. 18; BA. **Βαιθσάμυς**).

By comparison of the lists in Josh. xv. 10, xix. 41 (B. **πόλεις Σάμμαυς**, A. **πόλις Σαμές**), 43, and 1 K. iv. 9, it will be seen that IR-SHEMESH, "city of the sun," must have been identical with Beth-shemesh, Ir being probably the older form of the name; and again, from Judg. i. 35 (LXX. aliter), it appears as if Harheres, "mount of the sun," were a third name for the same place (Robinson and Keil); suggesting an early and extensive worship of the sun in this neighbourhood. [IR-SHEMESH; HERES.]

Beth-shemesh is now *'Ain Shems*. It was visited by Dr. Robinson, who found it to be in a position exactly according with the indications of Scripture, on the north-west slopes of the mountains of Judah—"a low plateau at the junction of two fine plains" (Rob. iii. 153)—about two miles from the great Philistine plain, and three or four from Ekron (ii. 224–6). The origin of the *'Ain* ("spring") in the modern name is not obvious, as no spring or well appears now to exist at the spot; but the *Shems* and the position are decisive (*PEF. Mem.* iii. 60).

2. **Βαιθσάμυς**, A. **Βαιθσμάς**. A city on the border of Issachar (Josh. xix. 22; cp. *v.* 38), not identified.

3. B. **Θεσσάμυς**, A. **Θασμοὺς** in Josh.; B. **Βαιθσάμυς**, A. **Βεθσάμυς** in Judg. One of the "fenced cities" of Naphtali, twice named (Josh. xix. 38; Judg. i. 33), and on both occasions with BETH-ANATH. The Canaanite inhabitants were not expelled from either place, but became tributaries to Israel. Jerome's expression (*OS.*[2] p. 140, 8, *s. n.* Bethsames) in reference to this is perhaps worthy of notice, "in quâ *cultores* pristini manserunt;" possibly glancing at the worship from which the place derived its name.

4. By this name is once mentioned (Jer. xliii. [LXX. l.] 13) an idolatrous temple or place in Egypt, which B. renders by **Ἡλιουπόλις ἐν Ὄν**, A. **Ἡ ἐν ἐνών**, *i.e.* the famous Heliopolis; Vulg. *domus solis*. In the Middle Ages Heliopolis was still called by the Arabs *'Ain Shems* (Rob. i. 25). [AVEN; ON.] [G.] [W.]

BETH-SHEMITE, THE (בֵּית־הַשִּׁמְשִׁי; B. **ὁ Βαιθσαμυσείτης**, A. **ὁ Βεθθαμυσίτης**; *Bethsamita, Bethsamitis*). Properly "the Beth-shimshite," an inhabitant of Beth-shemesh (1 Sam. vi. 14, 18). The LXX. in *v.* 14 refer the words to the field and not to Joshua the owner of the field. [W. A. W.]

BETH-SHIT'TAH (בֵּית הַשִּׁטָּה, *house of the acacia*; B. **Βηθσεεδτά**, A. **Βασεεττά**; *Beth-*

[b] The exactness of the definition in this description is impaired in the A. V. by the substitution of "a fountain" for "*the* fountain" of the original and R. V. Cp. the LXX. readings; B. **Ἀελδών**, A. **Ἀενδώρ** (?=En-dor; cp. xxviii. 7, or = En-harod [Klostermann]).

[c] So great was this fertility, that it was said by the Rabbis, that if Paradise was in the land of Israel, Bethshean was the gate of it: for that its fruits were the sweetest in all the land (see Lightfoot, *Chor. Cent.* lx.; Hamburger, *RE.*[2] s. n.). The name is (see Riehm, *HWB.* s. n.) called Nysa or Nyssa (from its vine-culture) by Pliny (*H. N.* v. 16), and **Μεθορὰμ** by Zomara (Reland, p. 993). Its fertility was due to its extreme heat, for which it is still as noted as it was in the days of Josephus (*B. J.* iii. 9, § 1).

setta), one of the spots to which the flight of the host of the Midianites extended after their discomfiture by Gideon (Judg. vii. 22). Both the narrative and the name (cp. "Abel-Shittim," which was in the Jordan valley opposite Jericho) require its situation to be somewhere near the river, where also Zererath (probably Zeredatha or Zartan) and Abel-meholah doubtless lay: no certain identification has yet been made of any of these spots; but they were probably not far from the mouth of *W. Mâleh*. The *Shŭttah* mentioned by Robinson (ii. 356) and Wilson (Ritter, *Jordan*, p. 414) is too far to the west to suit the above requirements. Josephus's version of the locality is absolutely in favour of the place being well watered: *ἐν κοίλῳ τινὶ χαράδραις περιειλημμένῳ* (*Ant.* v. 6, § 5). [G.] [W.]

BETH-SU'RA (T.^{r} *ἡ* Βαιθσούρα, *τὰ* Βαιθσούρα; A. generally Βεθσούρα; *Bethsura*, exc. 1 Macc. iv. 29, *Bethoron*), 1 Macc. iv. 29, 61; vi. 7, 26, 31, 49, 50; ix. 52; x. 14; xi. 65; xiv. 7;—2 Macc. xi. 5; xiii. 19, 22. [BETH-ZUR.]

BETH-TAPPUAH (תַּפּוּחַ בֵּ', *house of the apple* or *citron*; B. Βαιθαχού, A. Βεθθαπφουέ; *Beth-thaphua*), one of the towns of Judah, in the mountainous district, and near Hebron (Josh. xv. 53; cp. 1 Ch. ii. 43 [B. Θαπούς, A. Θαφφού]). It is, perhaps, the Taphon or Tefo of 1 Macc. ix. 50. Here it has actually been discovered by Robinson under the modern name of *Teffûh*, 1¾ hour, or say 5 miles, W. of Hebron, on a ridge of high table-land. The terraces of the ancient cultivation still remain in use; and though the "apples" have disappeared, yet olive-groves and vineyards with fields of grain surround the place on every side (Rob. ii. 71; Schwarz, p. 105; *PEF. Mem.* iii. 310).

The name of Tappuah was borne by another town of Judah which lay in the rich lowland of the Shefelah. [APPLE; TAPPUAH.] [G.] [W.]

BETHU'EL (בְּתוּאֵל, Ges. = *man of God*, for מ', an interpretation queried by Tregelles and MV.[11]; Βαθουήλ; Joseph. Βαθούηλος; *Bathuel*), the son of Nahor by Milcah, nephew of Abraham, and father of Rebekah (Gen. xxii. 22, 23; xxiv. 15, 24, 47; xxviii. 2). In xxv. 20, and xxviii. 5, he is called "Bethuel the Syrian" (*i.e.* Aramite, הָאֲרַמִּי). Though often referred to as above in the narrative, Bethuel only appears in person once (xxiv. 50). Upon this an ingenious conjecture is raised by Prof. Blunt (*Coincidences*, I. § iv.) that he was the subject of some imbecility or other incapacity. The Jewish tradition, as given in the Targum Ps.-Jonathan on Gen. xxiv. 55 (cp. *v.* 33), is that he died on the morning after the arrival of Abram's servant, owing to his having eaten a sauce containing poison at the meal the evening before; and that, on that account, Laban requested that his sister's departure might be delayed for a year or ten months. Josephus was perhaps aware of this tradition, since he speaks of Bethuel as dead (*Ant.* i. 16, § 2). [G.] [W.]

BETHU'EL (בְּתוּאֵל, Ges. = *man of God*, for מ' [see above]; B. Βαθούν, A. Βαθούλ; *Bathuel*), 1 Ch. iv. 30. [BETHUL.]

BETHU'L (בְּתוּל; Arab. بثور [*Bethur*]; *Bethul*), a town of Simeon in the south, named with El-tolad and Hormah (Josh. xix. 4; B. Βουλά, A. Βαθούλ). In the parallel lists in Josh. xv. 30 (BA. Βαιθήλ) and 1 Ch. iv. 30 (B. Βαθούν, A. Βαθούλ), the name appears in the Heb. under the forms of CHESIL (כְּסִיל) and BETHUEL, and probably also under that of Bethel in Josh. xii. 16 (LXX. om.); since, for the reasons urged under BETHEL, and also on account of the position of the name in this list, the northern Bethel can hardly be intended. [BETHEL.] [G.] [W.]

BETHU'LIA (Βετυλούα; B. commonly Βαιτουλουὰ or Βετ-, A. commonly Βαιτυλουὰ or Βετ-, ℵ. Βαιτουλλιὰ or -λούα; *Bethulia*), the city which was the scene of the chief events of the Book of Judith, in which book only does the name occur. Its position is there described with very minute detail. It was near to Dothaim (iv. 6), on a hill (*ὄρος*) which overlooked (*ἀπέναντι*) the plain of Esdraelon (vi. 11, 13, 14; vii. 7, 10; xiii. 10), and commanded the passes from that plain to the hill-country of Manasseh (iv. 7; vii. 1), in a position so strong that Holofernes abandoned the idea of taking it by attack, and determined to reduce it by possessing himself of the two springs or wells (*πηγαί*) which were "under the city" in the valley at the foot of the eminence on which it was built, and from which the inhabitants derived their chief supply of water (vi. 11; vii. 7, 13, 21). Notwithstanding this detail, however, the identification of the site of Bethulia has hitherto defied all attempts, and is one of the greatest puzzles of sacred geography; so much so as to form an important argument against the historical truth of the Book of Judith (Rob. iii. 337–8. See *Speaker's Comm.*, note on Jud. iv. 6).

In the Middle Ages the name of Bethulia was given to "the Frank Mountain," between Bethlehem and Jerusalem (Rob. i. 479: see Bonaparte's Desp. to the Directory, dated 21 Floréal 1799), but it is unnecessary to say that this is very much too far to the south to suit the narrative. Others have assumed it to be *Safed* in North Galilee (Rob. ii. 425); which again, if in other respects it would agree with the story, is too far north. Von Raumer (*Pal.* pp. 135–6) suggests *Sanûr*, which is perhaps the nearest to probability. The ruins of that town are on an "isolated rocky hill," with a plain of considerable extent to the east, and, as far as situation is concerned, naturally all but impregnable (Rob. ii. 312). It is about three miles from *Tell Dothân*, and some six or seven from *Jenîn* (Enganim), which stand on the very edge of the great plain of Esdraelon. Though not absolutely commanding the pass, which leads from *Jenîn* to *Sebustieh* and forms the only practicable ascent to the high country, it is yet sufficiently near to bear out the somewhat vague statement of Jud. v. 6. Nor is it unimportant to remember that *Sanûr* actually endured a siege of two months from Djezzar Pasha without yielding, and that on a subsequent occasion it was only taken after a three or four months' investment, by a force very much out of proportion to the size of the place (Rob. ii. 313). Conder proposes (*PEF. Mem.* ii.

156) to identify Bethulia with *Meselieh* or *Mithilia*, a small village on the hillside, south of *Jenîn* and near *W. el-Melek*. Other opinions as to locality may be seen in Riehm, *HWB.* s. n., and in *Speaker's Comm.* l. c. [G.] [W.]

BETH-ZACHARI'AS. [BATH-ZACHARIAS.]

BETH-ZUR (בֵּית צוּר, *house of rock;* in Josh. B. Βαιθσούρ, A. Βεθ-; *Bessur, Bethsur,* and in Macc. *Bethsura*), a town in the mountains of Judah, named between Halhul and Gedor (Josh. xv. 58). As far as any interpretation can, in their present imperfect state, be put on the genealogical lists of 1 Ch. ii. 42–49, Bethzur would appear from *v.* 45 (A. Βηθσούρ, B. Γεδ-) to have been founded by the people of Maon, which again had derived its origin from Hebron. However this may be, Bethzur was "built"—*i.e.* probably fortified—by Rehoboam, with other towns of Judah, for the defence of his new kingdom (2 Ch. xi. 7; BA. Βαιθσουρά). After the Captivity the people of Bethzur assisted Nehemiah in the rebuilding of the wall of Jerusalem (Neh. iii. 16; Bא. Βησόρ, A. Βηθ-σούρ); the place had a "ruler" (שַׂר), and the peculiar word Pelec (פֶּלֶךְ) is employed to denote a district or circle attached to it, and to some other of the cities mentioned here. [TOPOGRAPHICAL TERMS.]

In the wars of the Maccabees, Bethzur, or Bethsura, played an important part. It was fortified by Judas and his brethren "that the people might have a defence against Idumaea," and they succeeded in making it "very strong, and not to be taken without great difficulty" (Jos. *Ant.* xii. 9, § 4); so much so that it was able to resist for a length of time the attacks of Simon Maccabaeus (1 Macc. xi. 65) and of Lysias (2 Macc. xi. 5), the garrison having in the former case capitulated. Before Bethzur took place one of the earliest victories of Judas over Lysias (1 Macc. iv. 29), and it was in an attempt to relieve it when besieged by Antiochus Eupator, that he was defeated in the passes between Bethzur and Bath-zacharias, and his brother Eleazar killed by one of the elephants of the king's army (1 Macc. vi. 32–47; Jos. *Ant.* xii. 9, § 4). The recovery of the site of Bethzur, under the almost identical name of *Beit Sûr*, by Wolcott and Robinson (i. 216, note; iii. 277), explains its impregnability, and also the reason for the choice of its position, since it commands the road from Beersheba and Hebron, which has always been the main approach to Jerusalem from the south (*PEF. Mem.* iii. 311, 324).

A short distance from the Tell, on which are strewn the remains of the town, is a spring, *'Ain edh-Dhirweh*, which in the days of Jerome, and later, was regarded as the scene of the baptism of the Eunuch by Philip. The probability of this is examined elsewhere [GAZA]; in the meantime it may be noticed that *Beit Sûr* is not near the road to Gaza (Acts viii. 26), which runs much more to the north-west (cp. Riehm, *HWB.* s. n.). [BETH-SURA.]

[G.] [W.]

BETO'LIUS (B. Βετολιώ, Vulg. (?) *Liptis*), 1 Esd. v. 21. His descendants returned from the Captivity with Zerubbabel. [BETH-EL.]

BETOMES'THAM and BETOMAS'THEM; Syr. *Bithmasthim*), a town "over against Esdraelon, facing the plain that is near Dothaim" (Judith iv. 6 [B. Βαιτομαισθάιμ, A. Βετομεσθ-, א. and Vulg. om.]; xv. 4 [BA. Βαιτομασθάιμ, א. -θέν]), and which from the manner of its mention would seem to have been of equal importance with Bethulia itself. No attempt to identify it has yet been successful (see *Speaker's Comm.*, note on Judith iv. 6). It is possibly mentioned under the form *Estomason* in the list of Christian bishoprics (Reland, pp. 223, 225). [BETHULIA; DOTHAIM.] [G.] [W.]

BETO'NIM (בְּטֹנִים, Ges. = *pistachio nuts;* B. Βοτανεί, A. Βοτανίν; *Betonim*), a town in the inheritance of the children of Gad, apparently on their northern boundary (Josh. xiii. 26). The word, somewhat differently pointed (בָּטְנִים), occurs in Gen. xliii. 11, A. V. and R. V. "nuts," and is probably related to the modern Arabic word *Butm* = terebinth, *Pistacia terebinthus.* The identification of Betonim with *Batneh* near Es-Salt has been proposed by Robinson and Van de Welde (see Dillmann[2] in Josh. *l. c.*).

[G.] [W.]

BETROTHING. [MARRIAGE.]

BEU'LAH [3 syll.] (בְּעוּלָה = *she who is married;* οἰκουμένη; *inhabitata*), the name which the land of Israel is to bear, when "the land shall be married (תִּבָּעֵל)," Is. lxii. 4. [F.]

BE'ZAI (בֵּצַי, Ges., following Bohlen, connects it with the Persian for *sword;* LXX. [2 Esd.], B. Βασού, A. Βασσού; in Neh. vii. אA. Βεσεί, A. Βασί; *Besai*). "Children of Bezai," to the number of 323 [Neh. 324], returned from Captivity with Zerubbabel (Ezra ii. 17; Neh. vii. 23). The name occurs again among those who sealed the covenant (Neh. x. 18, B. Βησεί, A. Βηθεί). [BASSA.]

[W. A. W.] [F.]

BEZAL'E-EL (בְּצַלְאֵל, *in the shadow,* i.e. protection *of God;* Βεσελεήλ; *Beseleel*). **1.** The artificer to whom was confided by Jehovah the design and execution of the works of art required for the Tabernacle in the wilderness (Ex. xxxi. 1–6). His charge was chiefly in all works of metal, wood, and stone, Aholiab being associated with him for the textile fabrics; but it is plain from the terms in which the two are mentioned (xxxvi. 1, 2; xxxviii. 22), as well as from the enumeration of the works in Bezaleel's name in xxxvii. and xxxviii., that he was the chief of the two, and master of Aholiab's department as well as his own. Bezaleel was of the tribe of Judah, the son of Uri the son of Hur (or Chur). Hur was the offspring of the marriage of Caleb (one of the chiefs of the great family of Pharez) with Ephrath (1 Ch. ii. 19, 50), and one of his sons or descendants (cp. Ruth iv. 20) was Salma, or Salmon, who is handed down under the title of "father of Bethlehem;" and who, as the actual father of Boaz, was the direct progenitor of king David (1 Ch. ii. 51, 54; Ruth iv. 21). [BETHLEHEM; HUR.]

2. BA. Βεσελήλ, ℵ. Βεσσελ-. One of the sons of Pahath-moab who had taken a foreign wife (Ezra x. 30). [G.] [W.]

BE'ZEK (בֶּזֶק; Βεζέκ; *Bezec*). **1.** The residence of Adoni-bezek, *i.e.* the "lord of Bezek" (Judg. i. 5); in the "lot (גּוֹרָל) of Judah" (*v.* 3), and inhabited by Canaanites and Perizzites (*v.* 4). Some (see Riehm, *HWB.* s. n.) consider this to have been a distinct place from, others the same as,

2. A. Βεζέκ, where Saul numbered the forces of Israel and Judah before going to the relief of Jabesh-gilead (1 Sam. xi. 8). From the terms of the narrative this cannot have been more than a day's march from Jabesh, and was therefore doubtless somewhere in the centre of the country, near the Jordan valley. In accordance with this is the mention by Eusebius (*OS.*[2] p. 249, 52) of two places of this name seventeen miles from Neapolis (Shechem), on the road to Bethshean (Scythopolis). The LXX. B. reads καὶ ἐπισκέπτεται αὐτοὺς Ἀβιέζεκ ἐν Βαμά, and possibly alludes to some "high place" (=Gibeah, Wellhausen) at which this solemn muster took place under one Abiezek; A. has the reading ἐν Βεζέκ. This Josephus gives as Βαλά (*Ant.* vi. 5, § 3). It is now *Kh. Ibzîk*, fourteen miles from *Nâblus* on the road to *Beisân* (*PEF. Mem.* ii. 231–237). [G.] [W.]

BE'ZER IN THE WILDERNESS (בֶּצֶר בַּמִּדְבָּר; Βοσόρ ἐν τῇ ἐρήμῳ; *Besor in solitudine*), a city of the Reubenites, with "suburbs," in the *Mishor* or downs, set apart by Moses as one of the three cities of refuge on the east of the Jordan, and allotted to the Merarites (Deut. iv. 43; Josh. xx. 8, xxi. 36; 1 Ch. vi. 78). In the two last passages the exact specification, בַּמִּישׁר, of the other two is omitted, but traces of its former presence in the text in Josh. xxi. 36 are furnished us by the reading of the LXX. [*v.* 35] and Vulg.—B. τὴν Βοσὸρ ἐν τῇ ἐρήμῳ, τὴν Μεισὼ (A. τῇ Μισὼρ) καὶ τὰ περισπόρια αὐτῆς; *Bosor in solitudine*, Misor *et Jaser*.

It was known to Eusebius, who says (*OS.*[2] p. 247, 55, *s. n.* Βοσόρ) that it was east of Jericho, in the desert beyond Jordan; and it is probably the same as the *Bezer* or *Bosor* mentioned in connexion with Dibon, in the inscription of king Mesha on the Moabite stone (*Records of the Past*, N. S. ii. 203). It is now perhaps *Kesûr el-Besheir*, a ruin S.W. of *Dhibân*. Dillmann[2] (Deut. *l. c.*) is disposed to identify it with the Bozrah of Jer. xlviii. 24. [G.] [W.]

BE'ZER (בֶּצֶר; A. Βασάρ, B. om.; *Bosor*), son of Zophah, one of the heads of the house of Asher (1 Ch. vii. 37). [W. A. W.]

BE'ZETH (T.[7] Βηζέθ; B. Βηθζαίθ; *Bethzecha*), a place at which Bacchides encamped after leaving Jerusalem, and where there was a "great pit" (τὸ φρέαρ τὸ μέγα; 1 Macc. vii. 19). By Josephus (*Ant.* xii. 10, § 2) the name is given as "the village Bethzetho" (κώμη Βηθζηθὼ λεγομένη), which recalls the name applied to the Mount of Olives in the early Syriac recension of the N. T. published by Mr. Cureton — Beth-Zaith corresponding precisely with the reading of the Sinaitic MS. in 1 Macc. vii. 19. The name may refer either to the main body of the Mount of Olives, or to the hill north of Jerusalem, which at a later period was called Bezetha. [G.] [W.]

BI'ATAS (T.[7] Φαλίας, A. Φιαθάς; *Philias*), 1 Esd. ix. 48; a Levite teacher and expounder of the Law after the return from the Captivity. [PELIAH.] [W. A. W.] [F.]

BIBLE (Gk. τὰ βιβλία; Lat. *Biblia*). This is the most general designation for the Christian sacred Books, and embraces those which were primarily given to the Jews, as well as the more strictly Christian writings of the New Testament. The Romish Church and also some other Christian communions include, under this name of Bible, the deutero-canonical books of the Apocrypha. In the Septuagint αἱ βίβλοι is found (Dan. ix. 2) as the name given to the Jewish Scriptures, but τὰ βιβλία occurs in a quotation made by Eusebius (*Praep. Evang.* xiii. 12, 16) from the writings of Aristobulus, a Jewish philosopher who lived in the first half of the second century before Christ. It is also used in the prologue to the Book of Sirach, and in 1 Macc. i. 56 we find the expression τὰ βιβλία τοῦ νόμου. Josephus, too (*cont. Apion.* i. 8), speaks of the βιβλία of the Jewish Scriptures, and subsequently the word is constantly employed by the Greek Fathers and historians in the sense of Holy Scripture.

In Greek the plural form of the word (τὰ βιβλία) gave the valuable intimation that the contents of the volume so named were various, and that in the collection several separate books were comprised. The Jewish Scriptures alone, as we shall see, were counted as twenty-two Books, and comprised more than that number of distinct portions, while the time that intervened between the composition of the earliest and the latest of these must have been several centuries. But the Latin ecclesiastical writers having treated *Biblia* as a singular, the word has entered as singular into the languages of Western Christendom, and thus the diversity of origin and the variety of the contents of the Bible have been somewhat put out of sight.

These same Jewish and Christian Books are sometimes spoken of collectively as "the Scriptures" *par excellence*. *Scriptura* is the Latin rendering of the Greek γραφή, a name which our Lord Himself (John v. 39) applied to the Jewish Books, and by which they are spoken of in other places of the New Testament (Acts xvii. 2, 11, xviii. 24, 28; Rom. xv. 4; 1 Cor. xv. 3, 4). St. Paul, too, to mark the high estimation in which these Books were held, calls them more than once (Rom. i. 2; 2 Tim. iii. 15) ἅγιαι γραφαί, the Holy Scriptures, and this title is now often applied to the whole Bible.

As the Christian writers also sometimes (cp. Heb. ix. 15) speak of God's earlier dispensation, which is set forth in the Jewish Scriptures, as a διαθήκη (Lat. *testamentum, foedus*), a testament or covenant, and St. Paul (2 Cor. iii. 14) calls it ἡ παλαιὰ διαθήκη, "the Old Testament,"—while they regard the Christian dispensation, of which they are the ministers, as a new διαθήκη (2 Cor. iii. 6; Heb. ix. 15),—the word "Testament" has come to be generally applied to the two divisions of the Bible, and this had grown to be usual in

the Church as early as the close of the second century (Tert. *adv. Prax.* 15; Epiphanius, *Haer.* xxx. 7). So the pre-Christian and post-Christian portions are spoken of respectively as the Old and the New Testaments. It will be convenient to treat of these two divisions of the Bible separately.

I. The Books of the Old Testament are preserved to us in the Hebrew Bible, but the form under which we now find them in Hebrew MSS. and in printed texts differs somewhat from that in which these sacred records were first set down. Leaving out of consideration whether the present square character of the Hebrew text was the earliest form of writing among the Jews (though there can be little question that it was not), we know that in the earliest times only the consonantal part of each word was expressed in writing, the vowels being easily supplied by the intelligence of the reader. But all the Hebrew MSS. which as yet have been discovered, and our Hebrew Bibles as usually printed, are now supplied with points above or below the consonants to indicate the necessary vowels. These additions to the primary text were made at a late date, when foreign invasion and dispersion had broken up the unity of the Jewish people, and the vocalization was not brought into its present form till several centuries after the commencement of the Christian era. Ever since the return of the Jews from Babylon there had existed men, like the Scribes of the New Testament, learned in the traditional interpretation of the sacred text, and it was by such men that a system of marks for vocalization was elaborated; and after this was complete, all copies of the Hebrew Bible were conformed to the one type. These men are known as the "Massoretes" or "possessors of tradition" (from *Massorah* = tradition), and hence the text which we possess is frequently named the "Massoretic text." Beside the vowel-points the Massoretes have also added some marginal notes in places where for some reason, either because the adopted text was thought not quite correct or not adapted for public reading, the reader was required to modify the written words. Such marginal notes are called *Keri*, a name designating the text which is to be read as distinguished from the *Kethib* or written text in the body of the page. It is easy to understand how these carefully prepared MSS. (in which the standard for the consonantal portion was probably derived from some copy of high repute and splendid calligraphy, but not necessarily the most free from errors of copying) would in time supersede all others. In this way it has come to pass that our Hebrew Bibles represent only one recension of the sacred text, viz. that which the Massoretes adopted in post-Christian times. There are, moreover, very few sources from which we are able to get knowledge of the earlier condition of the text; the chief being the Septuagint, the Targums, and the Samaritan Pentateuch. The oldest Hebrew MS. of any portion of the Bible the date of which can be fixed with certainty was written at the commencement of the tenth century of our era. This is known as the *Codex Petropolitanus*, the Petersburg MS., and it is dated A.D. 916.

The arrangement of the Books in the Hebrew Bible differs from that adopted in the English Version, and requires to be specially noticed. The first section is that which contains the five Books of Moses, and was called by the Jews the תורה or "Law," and sometimes by the Rabbins "the five-fifths of the Law." The Hebrew names of the Books are taken in each case from some word or words occurring in the first sentence of the text. Thus the first Book is called "Bereshith," *i.e.* "In the beginning." The names given to these Books in our English Bibles—Genesis, Exodus, Leviticus, Numbers, and Deuteronomy—are derived by transliteration or translation from the Septuagint.

Next to the Law follows the section called נביאים, "the Prophets." This consists of two parts, each containing four Books. The נביאים ראשונים or "earlier Prophets" include (1) Joshua, (2) Judges, (3) Samuel, and (4) Kings. In the two last-named the two Books are counted as one. The second part or נביאים אחרונים, "the later Prophets," comprises (1) Isaiah, (2) Jeremiah, (3) Ezekiel, and (4) the twelve smaller prophecies, known by us as "the minor Prophets," and which in the Jewish enumeration were counted for one Book only.

The third section is called כתובים or "Writings," and is generally known as the "Hagiographa." This contains first the Psalms, next Proverbs, then Job, after these the five Megilloth or "Rolls," which were so named because, being used on certain annual occasions in the synagogue-service, they were written each on a separate roll. These Rolls are, The Song of Songs, Ruth, Lamentations, Ecclesiastes, and Esther. These are followed by Daniel, Ezra, and Nehemiah, and last of all Chronicles, called in the Hebrew דברי הימים, *i.e.* "The Words of the Days," and in the Septuagint τὰ παραλειπόμενα, "things omitted," a name which marks the Book as supplementary to the Books of Kings. We are indebted to Jerome for the name "Chronicles."

We know that a threefold division of the Hebrew Scriptures after this manner existed in our Lord's time. He speaks (Luke xxiv. 44) of "the Law of Moses, the Prophets, and the Psalms," as if giving a complete enumeration of the Jewish Books. But it is to be noted that while He applies to the first two sections the names by which they are distinguished in the Hebrew Bible, He only mentions in the third section the one Book, "the Psalms," which stands first in that division. It would not therefore be of necessity a sound conclusion to decide from this alone that all the Books now included in the third portion of the Hebrew Bible were embraced by Christ under the name of Psalms. And it ought to be remembered that three Books of the Hagiographa—Esther, Canticles, and Ecclesiastes—are never quoted in the New Testament, nor by the learned Jew of Alexandria, Philo, who lived at the same date as the New Testament writers; while from Jewish authorities we learn that there was a discussion between the Schools of Hillel and Shammai, the founders of which were contemporaries of Herod the Great, whether Canticles and Ecclesiastes formed a part of the canonical Jewish Scriptures.

Towards the end of the 1st century A.D. Josephus gives us an account of the Jewish Books then recognised as Scripture. He says

(*c. Apion.* i. 8): "We do not possess myriads of books discordant and conflicting, but only two-and-twenty, which contain a history of all time, and are justly believed to be divine. Of these, five are the Books of Moses: . . . from the death of Moses to the reign of Artaxerxes, who succeeded Xerxes as king of Persia, the Prophets compiled the history of their times in thirteen Books. The remaining four contain hymns to God and didactic teaching for men." This account appears to embrace all the Books of the Jewish Bible. The thirteen Books of history written by the prophets, from Moses to Artaxerxes, would embrace those eight which form the second section of the Jewish Books, with Ruth added as a conclusion to Judges, and Lamentations combined with Jeremiah. With these Josephus reckoned Ezra and Nehemiah (counted as one), Chronicles, Esther, Job, and Daniel. The four which he places in his last class are Psalms, Proverbs, Ecclesiastes, and the Song of Songs. He has classified the Books in a different way from the order in which they are found arranged in the Hebrew Bible, because he wanted to enforce most strongly his statement about the regular and uninterrupted composition of the whole Jewish history. There has been no list of the Hebrew Scriptures preserved to us of an earlier date than Josephus.

Josephus' enumeration, though not his arrangement, is that which was known to the earliest Christian writers: as to Melito, Bishop of Sardis (Euseb. *H. E.* iv. 26), to Origen (Euseb. *H. E.* vi. 25), and to Jerome († A.D. 420), who derived his information almost entirely from Jewish sources (*Prol. gal. in lib. Reg.*). Through Jerome the traditional Jewish opinions concerning the composition of these Books became generally accepted among Christians, and were passed down with little or no question to comparatively recent times. These traditional opinions set the Pentateuch far above the other Old Testament Scriptures both in importance and antiquity. In the Book of Chronicles (2 Chron. xxv. 12) the Pentateuch is spoken of as "the Book of Moses;" and following this the Talmud (*Baba Bathra*, f. 14 b) relates that "Moses wrote his book (the Pentateuch) with the exception of eight verses which were added by Joshua." Compared with the Law, therefore, all other parts of the Scriptures were to the mind of the Jew of very secondary value, and only to be accounted of as their teaching found support from the Mosaic records. The Law was believed to have been given in its entirety to the people before they entered Canaan, and all the rest of Israel's history to have been passed through with a full knowledge of this elaborate code, and consequently to have been made all the more sinful by the great deflections which it presented from the legislation bequeathed to the people by their great leader and lawgiver. This opinion, accepted by the Christian world, exercised a persistent influence on nearly all the expositions of Scripture down to modern times. About the middle of last century, however, a course of inquiry was commenced which has considerably modified the opinions of many students, and the results and tendencies of which cannot be disregarded. Therefore, before ascribing to the first division of the Old Testament that antiquity which has so long been claimed for it, we are bound to state what has been put forward by the advocates of a much later origin. A French physician named Astruc published in 1753 a work which may be taken as the starting-point of these inquiries. Examining the language of the Book of Genesis, he came to the conclusion that Moses had before him for the composition of that Book many records of a date anterior to his own, and out of these compiled his narrative. A principal point in Astruc's argument is the occurrence throughout the Book of different designations for the Deity. He dwells also on the occurrence of repetitions which seemed to him to be inconsistent with unity of authorship, and he assigned parts of the Book of Genesis to at least twelve different writers. The same kind of investigation has since been applied to the other Books; and similar peculiarities being observable in them, and also in the Book of Joshua, the conclusion has been drawn that the writers who exhibit these peculiarities cannot have lived before Moses, and that on this ground the Mosaic authorship of the Pentateuch must be given up.

Commencing a little later, but carried on side by side with the linguistic investigations, there has been another line of inquiry. The growth of Israel's religion as represented in the historical Books has been studied, and a comparison made of this history with what might have been looked for had the laws of the Pentateuch been known and observed from the time of Israel's departure out of Egypt. The conclusions arrived at by labourers in these investigations may be briefly stated thus. The large number of different documents assumed by the earlier scholars has been reduced to three or four, and the distinctions recognised between the different portions are mainly those marked by the use of different designations for the Deity. The historical inquiries have dealt with the Scripture records as they would with secular history, and have started with Israel's existence as a nation from the date of the Exodus. The people were then settled in Egypt, and their conflict with the Egyptian power cemented their national unity. They were delivered by Moses, and it is argued that he and others who felt with him ascribed their deliverance to the aid of Jehovah, Who was worshipped by the people, but was not their sole divinity. Moses taught them that by Jehovah's help they had been enabled to emerge from what was meant to be permanent bondage, and to perform that long series of journeyings which brought them to the borders of Canaan. During his leadership he also gave to the people some elementary laws, and specially the ten commandments and those simple statutes in Exodus which follow the ten words. It is thought that the condition of the people was far too rude to be fitted for the acceptance of the more advanced legislation, and that it was not till the times of David and Solomon that a point of culture was reached which made extensive literary composition possible; and that some time after this, mainly through the instrumentality of the Prophets of the eighth century, a first draft of the Mosaic Books was brought into form, the legislative portion of which comprised the laws contained in Exodus xx.–xxiv., some of which are given in a summary

form also in Exodus xxxiv. The compiler of this first Code, spoken of often as the "Book of the Covenant" (Exod. xxiv. 7), is supposed to have gathered his material partly from records preserved from old times in the form of pedigrees and the like, and partly from the current traditions of the people. The thread which binds his narrative into one is the enforcement of the sole worship of Jehovah, and the special use of that name in those portions which are assigned to the earliest form of the Pentateuch has caused its supposed writer to be named the Jahvist, in contradistinction to the Elohist, who employs more frequently *Elohim* (rendered *God* in the English Bible) for the Divine name. This first writer tells the story of Israel taken into covenant with Jehovah, and how by His power the land of old promised to Abraham became the possession of his descendants. His composition is supposed to have date about the time of Isaiah. The influence of Moses is thought to have been feeble in the times immediately after his death, but still kept alive by the nobler part of the people till the days of Samuel, when an impulse was given to prophetic labours which increased through the times of the earlier kings, and had acquired so great an influence in the days of Amos and Isaiah as to enable the prophets to formulate a primary legislation and to come forward as the religious reformers of the nation.

But just as Moses had had no great array of sympathisers, and his zeal for the one God had only been kept alive in the nation by the enthusiasm of a few men of whom Samuel may be taken as a prominent example, so the prophets were not without their hindrances. It depended on the king whether they were supported in their labours or impeded altogether. With the monarch on their side their influence was considerable, but even down to the times of Hezekiah they had not been able to secure the abolition of the high places, where other deities had a share in the honours, nor to enforce the sole worship of Jehovah, which they are so constant in proclaiming in their words.

It is not until the days of Josiah that such sole worship is recorded in the national history, and it is to the time of that solemn narrative in 2 K. xxii., where we are told how Hilkiah found the Book of the Law in the house of the Lord, that many persons refer the composition of the Book of Deuteronomy, which forbids the offering of sacrifices at any places except (Deut. xii. 13) "in the place that Jehovah chooseth in one of thy tribes." It is thought that priest and prophet at that time combined to make the idea which Moses first put forward a reality for the nation. For this purpose the Deuteronomic code was composed, and a sanctity claimed for it on account of the place in which it was reported to have been discovered. For this end a deception was practised upon the people which the introduction of the new code might be deemed to justify. The new laws were in time combined with the older, and thus the Pentateuch continued till after the return from Babylon. Then by the hands of Ezra and his fellow-labourers further additions were made, and those laws introduced which are found scattered in the Books of Leviticus and Numbers. One main aim of this later code is said to have been to make more marked the distinction between the priests of the house of Aaron and the members of the other Levitical families who were engaged in the service of the Temple, but who did not come near to the altar. The Levites had many of them in former times served at those high places which had been abolished by Josiah. When, therefore, these men came to join themselves to the service of the one shrine at Jerusalem, it was deemed needful to put a difference between them and the priestly body who had from the first been specially attached to the Temple on Mount Zion. These final laws were in time combined with those previously enacted, and thus a last edition brought the Pentateuch into, or nearly into, its present form.

The investigations of which these are the results are not without value, though they cannot be accepted in their entirety. They have made it clear that in the Mosaic Books there are three stages of legislation, and have also pointed out how the history indicates a national advance from one of them to the others. Thus the traditional teaching that the whole history of Israel was a falling away from a complete plan which was assumed as the nation's standard from the first can hardly be accepted. Of the threefold form of the legislation there can be no question. In the "Book of the Covenant" there is no provision made of priests as a distinct class; the second code in Deuteronomy sets before us the whole tribe of Levi as priests; while in the middle Books there is a marked distinction placed between the family of Aaron, who are alone to serve at the altar, and the rest of the Levites who are employed in the Temple-worship, but in a subordinate position. Again, in Ex. xx. 24 there is a command that altars shall be built in all places where Jehovah records His Name; in Deuteronomy (xii. 13) the sacrifices are only to be offered "in the place which Jehovah chooseth in one of thy tribes;" in Leviticus (i. 3 sq.) it is ordered that the sacrifices shall be brought to the door of the tent of meeting, and that the sons of Aaron are to take the blood and sprinkle it on the altar. Again, the sacrifices enjoined in Exodus are only burnt-offerings and peace-offerings: these the legislation in Deuteronomy increases by tithes, vows, and freewill offerings, while the middle Books add thereto sin-offerings and trespass-offerings. In Exodus there is very little said about purification. It is forbidden (Ex. xxii. 31) to eat the flesh that is torn of beasts in the field, and it is said of the whole people, "Ye shall be holy men unto me." In Deuteronomy the people are forbidden to cut themselves; a distinction is made between clean and unclean beasts, and washing with water is appointed for the unclean. To these regulations are superadded, in Leviticus and Numbers, various modes of purification, the use of the ashes of a red heifer, and all those observances appointed at the healing of a leper. Once more, the feasts first ordained in Exodus are the Sabbath, the feast of unleavened bread, the Sabbatical year, the feasts of harvest and of ingatherings. In Deuteronomy we find the Passover, the feast of unleavened bread, the feast of weeks, the feast of tabernacles, and the year of release; while in the Books of Leviticus and Numbers we have, beside these, the observance of the new moons, the seven great

Sabbaths, the day of firstfruits, the feast of trumpets, the Day of Atonement, and the year of Jubilee. Thus three stages of religious service are provided for.

Now, it is clear from the history of Israel that for a long period no attempt was made, even by the most religious men, to observe anything beyond the covenant code of the Pentateuch. For during the time of the Judges there were many altars erected beside the one at Shiloh. Men who were not priests, as Joshua and Gideon, offered sacrifices, and the sacrifices are only peace-offerings and burnt-offerings. Later on, in the days of Samuel, the same is the case. Saul as well as Samuel offers sacrifice, and it is not the fact of such men offering which constitutes an offence, when God is displeased with the sacrifice. In the times of the Kings we find worship continued at the high places, and it was not done away with by the erection of Solomon's Temple; while in the northern kingdom, after the severance, we find Elijah sacrificing at an altar of Jehovah on Carmel, which had been used long before. The reforms of Hezekiah and Josiah were attempts, in some degree successful, to put an end to such worship; but as late as Jeremiah's time (Jer. xli. 5) we find that worshippers went to Mizpah, and looked upon that ancient sanctuary as "the house of the Lord." Further than this, the additional offerings, purifications, and festivals which have been mentioned as peculiar to the legislation of Deuteronomy and the middle Books, find no place in the language of the Psalms or in the writings of the Prophets before the Exile. The sin-offering is first mentioned (2 Ch. xxix. 21, 23, 24) by the chronicler in his account of the restoration of religion under Hezekiah, and the trespass-offering in Isaiah (liii. 10), though it is doubtful whether the word there can be pressed to prove the observance of such offerings at the Temple in Isaiah's time. The Levitical purifications and the elaborate cycle of feasts are not mentioned at all in the literature before the Exile.

The question has, of course, arisen whether, in consequence of this great divergence of practice as shown in the history and literature from the legislation as given in the Pentateuch, it is possible to accept the Pentateuchal legislation as of Mosaic origin. In considering such a question we should not leave out of sight that in Ex. xxiv. 4 it is expressly stated that Moses wrote all the words of the Lord, meaning that Book of the Covenant which is contained in those chapters, and that also in Deuteronomy (xxxi. 9) a like statement is made concerning the Deuteronomic code; but no such definite declaration is put forward concerning the legislation in the Books of Leviticus and Numbers. This seems to imply that the code of Exodus should stand first in order, then the Deuteronomic laws, and after them the laws of Leviticus and Numbers, these last as being Mosaic in the sense that they were revealed to Moses, but not necessarily gathered and put into form till a period after the date of the second code. Viewed in this order, and in the light of the history, the threefold code admits of explanation, and the non-observance of the larger portion becomes intelligible. The Book of the Covenant given at Sinai was a simple statute book, containing what was needful for the guidance of the heads of tribes before the people became permanently settled in Canaan. The second code, in Deuteronomy, was put forth for the edification of the whole people, and is designed for a state where the entire land is occupied by Israel, and the enemies driven utterly away: while the legislation in Leviticus and Numbers is provided for a state in which the people have become thoroughly settled in their religious life, and as God's chosen people press forward towards a grand ideal of devotion to His service. By these several codes preparation was made for a regular development of the religious life of the nation, but that development was long hindered. Much of the religious discipline of Israel fell into abeyance during the forty years' sojourn in the desert (Josh. v. 5; Amos v. 25); and when the people entered the Holy Land, their enemies were not driven out at once, nor did Israel realise a complete national life for long years to come; and meanwhile they were borne down on all sides by foreign oppressors, and often led away to foreign superstitions. When the people became united under the sovereignty of the house of David, we discover that instead of one central seat for Divine worship, numerous altars had been, from the national needs, established in various parts of the land, in harmony with the primal legislation of the covenant given at Sinai. These numerous shrines, often held very sacred, made an advance to the Deuteronomic stage difficult, and during the brief union of the whole nation it was never carried out. Soon the ten tribes were severed from the rest, and the task was made more difficult still, though the more religious element of the nation longed for the realisation of the higher ideal. The attempts at reform under Hezekiah and Josiah show this, and make us able to understand how the discovery of the Deuteronomic code in the reign of the latter king was a veritable new revelation to the majority of the nation, though the language of Huldah shows that to her, and to those who felt with her, it was but the bringing to light of what the imperfect worship of former generations had buried in an oblivion which was never intended. The short time between the reforms of Josiah and the Captivity, largely occupied with the troubles of foreign invasion, made any advance impossible; but when the chastened people were brought back under Ezra and Nehemiah, both those leaders were ready to inaugurate and the nation to accept the more complete religious code which is comprised in the Books of Leviticus and Numbers, and which then for the first time became the rule by which the services of the second Temple were carried on. Such neglect and oblivion of the two fuller codes as is here presumed cannot be taken to prove their non-existence. Accepting Moses as the Prophet of the Lord, and regarding, as Christ did, his legislation not as a product of national development, but as a divinely inspired code, containing an ideal to which the nation was to be taught to press forward, the prophetic character of the two later codes is just what we should expect,—a provision made from the outset whereby Israel should be trained to the doctrine of Atonement, and prepared for Him of Whom Moses spake as a Prophet like unto himself. More-

over, there are some portions of evidence that point to the earlier existence of the whole Mosaic code which deserve consideration. The language of Deuteronomy and of Leviticus and Numbers is not that of the later kingdom, during which modern speculation would place their composition, nor of the time of the Chronicler; while the Levitical code, which never came to be observed till after the Exile, refers in all its details to a time when a life in the wilderness and a camp was what the writer had before him, while throughout the whole there is no anachronism such as must have beset a composition written after the Exile, and by one without experience of the camp life in the desert. But, above all, we find hints, slight indeed, but yet sufficient, throughout the whole history, that the fuller codes were not altogether unknown, but only through circumstances rendered impracticable. In the first flush of hope as they entered the land the people celebrated a grand Passover feast, long neglected and to be long neglected in the future, but proved by this celebration not to have been unknown. In the times of the Judges, the ark of the covenant and the tent of meeting are frequently spoken of; there is a distinct priesthood at Shiloh, and the vow of the Nazarite is understood by the parents of Samson, though these things are only found appointed in the supposedly later Levitical legislation. In the days of Samuel the ark of the covenant plays a large part in the history, though Samuel seems to have neglected it; and the Urim and Thummim, which belong only to the fuller legislation, are consulted by Saul. The Temple of Solomon, as did the Tabernacle before it, makes provision, by the separation of the Most Holy Place, for the observance of the solemnities of the great Day of Atonement; yet never from the time of its institution in Lev. xvi. have we any allusion to this, the highest and most significant service of the whole code, in any part of the historic, prophetic, or poetic literature of the nation. Indications like these make it impossible for us to doubt that, though well-nigh forgotten, the codes enjoining these services were in existence from the first, and that the Book of the Law found by Hilkiah was a copy of that which Moses wrote and delivered to the priests, the sons of Levi (Deut. xxxi. 9). That something analogous to what we now call editing was performed upon the sacred Books of the Jews in the days of Ezra seems highly probable, but in the case of the Law this work was bestowed on material which had existed from very early times. This material may have been modified in many parts by the varying circumstances of the national life, but it still retained so great a portion of the primitive record as to make the name "Law of Moses" something more than a fiction. To those who regard the Bible as the channel of God's revelation and its teaching as inspired, the acceptance of a conclusion which would import into its records the sanction of a deception practised for ever so good an end must be entirely repugnant. But there seems no need to take such a course. The historic development of Israel's religion does not prove the non-existence of the whole of the three Mosaic codes. It only shows that the people did not for a long while advance beyond the first stage. To adopt the theory proposed of the late origin as well as the manner of introduction of the Deuteronomic legislation is to commence undermining the whole credit of the sacred volume.

In the second section of the Hebrew Bible it is not difficult to understand why the Books comprised in the first half, though generally accounted historical, should have been placed by the Jews where they now stand, and reckoned among the prophetical writings. The earliest chroniclers of whom we read in the Old Testament belonged to the prophetic order, and their works are often alluded to by the compiler of the Chronicles (1 Ch. xxix. 29; 2 Ch. ix. 29, xii. 15, xx. 34). Before the days of Isaiah mention is made of Samuel, Nathan, Gad, Ahijah, Iddo, Shemaiah, and Jehu the son of Hanani, as labourers on this work of the national Chronicles, and the existence of such a composition (2 Ch. xxiv. 27) as the story (or commentary, Heb. *midrash*) of the Book of the Kings is proof that much attention had been paid to the keeping of these records. Drawn from the writings of these authors, and others unrecorded who preceded them, the Books of Joshua, Judges, Samuel, and Kings have a claim to the name of prophetical Books, though they contained no predictive element whatever. That the Books are of this composite character may be seen from many parts. The last few chapters of Judges (xvii.–xxi.) seem clearly to belong to a different work than the earlier chapters, and in 1 Sam. xvi. and xvii. we can trace, as it seems, two narratives of the history of Saul and David. The first supplies the material for the account of David's anointing and his introduction into the palace of Saul at the time of the king's frenzy. The latter—which contained, it may be, a history of David's prowess—is used as the source whence the conquest of Goliath is taken, and, though ranged after the previous history, shows clearly that it belongs to an earlier time, for it makes Saul and Abner alike ignorant of David's name and parentage. The compiler has been at no pains to disguise the double source of his information, and this fact is good evidence that we are presented by him with a faithful copy of what he had before him. The Book of Joshua is in style and character closely connected with the Pentateuch, while Judges, Samuel, and Kings are probably the work of three separate compilers, the last of whom must have lived after the conquest of Jerusalem by Nebuchadnezzar, the second towards the close of the reign of David, and the first perhaps among the sons of the prophets of whom we read in the days of Samuel. The Talmud ascribes the Book of Judges to Samuel, and the Book of Kings to Jeremiah. The Books of Samuel are clearly written from another point of view than the Kings. One proof of this is that the compiler of Samuel mentions without disapproval the worship at the high places, while in the Kings we constantly find (1 K. iii. 2; xiv. 23; xv. 14, &c.) this worship represented as the great blot on reigns in Judah marked otherwise by much zeal for pure religion.

The collection of the writings of the "later prophets" must have been a work of some considerable time. The last three of the minor Prophets date after the return from Babylon, while the work of Ezekiel may have been

brought into its form by the writer himself during his residence in exile. The Book of Jeremiah, in which the order of prophecies in the Septuagint differs considerably from their arrangement in the Hebrew text, may have been entrusted to Baruch, and another copy perhaps to some of those who went down into Egypt, and the double arrangement may be accounted for as having been carried out in two separate places, Babylon and Egypt. We may be sure that the writings of Isaiah and the earlier prophets were preserved in like manner by *disciples*, and there is little doubt that among the followers of "the men of Hezekiah" there would be many to collect and preserve this literature previous to the national overthrow. There is still much controversy about the integrity of Isaiah and also of Zechariah, opinion inclining in both cases to a double authorship. There is no question about any other Book except that of Jonah, which has been placed in the Canon rather as dealing with the history of one of the Prophets, than as being the work of the Prophet himself.

The contents of the third division of the Hebrew Bible are very varied, and seem to show in many ways that this part was not finally closed at as early a period as the other two. We have in it poetry, prophecy, history, and philosophic teaching, and it is not easy to find a principle on which, as in the two former divisions, the Books are formed into one collection. First stand the Psalms, divided into five books: viz. Bk. 1, Pss. i.–xli.; Bk. 2, xlii.–lxxii.; Bk. 3, lxxiii.–lxxxix.; Bk. 4, xc.–cvi.; Bk. 5, cvii.–cl. The whole volume of the Psalms is called in Hebrew תְּהִלִּים, "Praises," and it is by the titles of many of the Psalms, and by the note at the close of Psalm lxxii. "The Prayers of David the son of Jesse are ended," that these poems are connected specially with the name of David. It is probable that they were gathered at two or three times. The first collection most likely consisted of those which David wrote for the service of the Temple. These may have been gathered by Solomon, and perhaps form the main part of Book 1. The next period of activity in provision for the music of the Temple-worship appears to have been in the days of Hezekiah, to whose scribes (Proverbs xxv. 1) we may perhaps set down the collection of such of David's Psalms as were not contained in the earlier service book and also of the Psalms of Asaph. These, with additions, form Books 2 and 3, and it was perhaps not before the days of Nehemiah (2 Macc ii. 13) that a further collection was undertaken, and even then the Psalm-book may have been left open to accept further additions, if, as many suppose, there are in it a few Psalms which suit best with the events of Maccabean times. The division into five Books was probably made to match in the Psalter the five Books of the Law. According to the titles affixed to the Psalms, David is said to have written seventy-three, and his singers—Asaph, Ethan, and the sons of Korah—twenty-four. Two are ascribed to Solomon (viz. lxxii. and cxxvii.), and one (Ps. xc.) to "Moses the man of God." In the title of Ps. cxxxvii. the Septuagint joins Jeremiah's name to that of David, and mentions Haggai and Zechariah as authors of the Psalms cxxxviii. and cxlvi.–cxlviii. About one-third of the Psalms have no title or ascription. Sometimes the titles may be accepted as genuine or as representing very early tradition, but in some cases they are only of late origin and the result of conjecture. No authority should be attached to them except after they have been subjected to strict criticism.

The poetical genius of David was succeeded by a philosophic mind in his son Solomon, to whom we owe a large part of the Proverbs, which Book stands next in the Hagiographa. The word *Mashal*, a proverb, from which the Hebrew name of the Book is derived, implies primarily sententious wisdom conveyed under the form of a comparison or simile, and then the more general proverbial utterance, a wise thought tersely expressed, even when there is contained in it nothing of the nature of a simile. The Book, though ascribed in the title to Solomon, is made up of several parts. The first section extends from ch. i.–ix., the next from x.–xxiv. 22, and this portion is specially marked as the "Proverbs of Solomon." The first clause of xxiv. 23, rendered in the A. V. "These things also belong to the wise," but which would be better translated "These also are sayings of the wise," marks the commencement of a short appendix (xxiv. 23–34), which contains words of the same character as what precede, though not perhaps so generally attributed to Solomon. From xxv. 1–xxix. 27 we have additional proverbs ascribed to Solomon, which were collected at a later period by "the men of Hezekiah." Then follow "the words of Agur" (xxx. 1–33), though some would render the first words of verse 15 "the proverbs of Alukah," and so break up the chapter into two parts; and lastly "the words of king Lemuel" (xxxi. 1–31), though it may be that the alphabetical acrostic containing the character of the virtuous woman (*vv.* 10–31) is an independent composition, the author of which is left unnamed. The brevity of these final pieces suggests that when the Book was being closed there were added to the Salomonic portions such passages of the same nature as time had consecrated and made a permanent part of the national literature.

The Book of Job has its name from the person whose history forms its subject, and whose trials gave rise to the debate contained therein. The Rabbinical tradition that Moses was the author is not to be regarded, the philosophic character of the discussion pointing to an age as late as, if not later than, that of Solomon. But though the style may indicate a somewhat late date for the composition, Job himself may have lived in very early times; and the history, which the writer of the Book has used for the basis of his discussion, may have been for a long time part of the national store. The introductory portion and the conclusion are in prose, Job's lament and the debate with his friends in poetry; and the Book seems to have been written at some period of national suffering when problems concerning the dealings of Providence were forced upon the mind, both with reference to the people at large and to individuals.

Of the five Rolls two are ascribed to Solomon, viz. the Song of Songs and Ecclesiastes, but there has been much doubt expressed whether in

these Books some later writers have not adopted the name of Solomon to give a dignity to their composition, though never intending that the reader should accept the impersonation for a real fact. These doubts have been strengthened by the discussions, already alluded to, which prevailed among the Jews concerning the canonicity of these Books. With regard to the Song of Songs there has been a further discussion whether the language should be interpreted allegorically of the love of Christ for His Church, in which case it is wonderful that St. Paul, who uses the figure of the marriage bond so constantly in illustration of the union between the Church and her Lord, should have made no quotation from a Book so filled with the same imagery; or whether the work should be regarded literally as a pastoral poem, painting in Oriental figures the struggles and triumph of a pure affection. It seems justifiable to allow to writers of Scripture, where there is no design of deception, the literary privileges of which other writers avail themselves, and that therefore we are not bound by the form adopted in these two books to accept them as Solomon's own composition.

The Book of Ruth is a connecting link between Judges and the history of David contained in Samuel, and so is counted by the Jews along with the former Book. The Lamentations are probably the work of Jeremiah, as the prefatory verse, with which the Book is introduced in the Septuagint, represents them to be. The Book of Esther is one of the latest of the canonical Scriptures, written perhaps in the reign of Xerxes or of his son Artaxerxes Longimanus. It is intended to account for the observance of the feast of Purim (2 Macc. xv. 36), and explains the cause of its institution. The absence of the Divine name from the whole Book may perhaps best be accounted for by regarding it as drawn from Persian records. Of the author nothing is known, but it is one of those Books which, dealing with the history of the Exile and the Return, were favourite subjects with the restored people, and which were amplified in later times by additions which appear in the Greek of the Septuagint Version. The like amplification has happened to the Book of Daniel and to Ezra and Nehemiah's narrative, and from the same cause.

The order in which these five rolls are placed in our Hebrew Bibles (though not observed in all MSS.) is the order of the yearly feasts at which they are severally read; Canticles being read at the feast of the Passover, Ruth at Pentecost, Lamentations on the 9th of Ab (the anniversary of the destruction of the holy Temple, and for other reasons a black day in Jewish history), Ecclesiastes at the feast of Tabernacles, and Esther at Purim.

The Haggadic additions to Daniel and Ezra-Nehemiah have just been alluded to. That the former of these was a Book which it delighted the people so to expand with legend is probably the reason why it is found among the Kethubim, and not placed with Haggai, Zechariah, and Malachi among the Prophets. The quasi-historical character of much of the matter in Daniel may be another reason for its position. The Book of Ezra is a historic compilation from several sources, one part (ch. ii. and iii. 1) being identical with the seventh chapter of Nehemiah, while other portions are perhaps drawn from writings by Haggai and Daniel, while the four closing chapters are made up of Ezra's own history, and the whole was probably put into one narrative at a somewhat later date than Ezra's time, with the view of forming a continuation to the Books of Chronicles.

The Book of Nehemiah was always counted as one with the preceding. It consists in the main of personal narrative by Nehemiah concerning those events in the restoration of the people and the rebuilding of Jerusalem in which the writer himself took part; but the text, from vii. 6 to xii. 47, is composed of documents which have been inserted into the first narrative from national records and genealogies, with a view of giving more completeness to the history. There is one indication that this portion must have been allowed to be augmented by annotators till a comparatively late date; for in xii. 11, among the high priests we come upon the name of Jaddua, who, we know, was a contemporary of Alexander the Great. But whether only a few names, in this place, were inserted at so late a period, or a larger part of the inserted materials was then introduced, we are not able to judge, though about the authority of the sources from whence these were drawn there can be no question, while the first six chapters and those portions of chapter xii. where Nehemiah speaks in the first person and the whole of the last chapter have always been received as the genuine work of Nehemiah.

The two Books of Chronicles, placed last in order in the Hebrew Bible, have been assigned to Ezra, and their composition may very well be placed about that date. There occurs however in one place (1 Ch. iii. 22, 24) a genealogy, that of Zerubbabel, which is carried down to a much later time, but this may be explained in the same way as the occurrence of Jaddua's name in Nehemiah. The Books were written that the genealogies of the Levites might be known, and so the Temple might be served by the proper officers and in their due courses. The early chapters of the first Book are occupied with these registers, and the remainder is devoted to a history of the kingdom of the house of David, introduced by a brief mention of the first king, Saul. Such a history was calculated both to comfort and to warn the newly-returned people, by showing from the past what sins had led to the downfall of the people, and yet how, on their repentance, God had not forsaken them, but brought them again to Jerusalem, in the way set forth by the narrative of Ezra-Nehemiah.

We do not find for the Old Testament, what exists for the New, a definite date at which the Canon is known to have been authoritatively closed. We are therefore compelled to go back from post-Christian times to arrive at any conclusion on the subject. The first witness of importance is Jerome, who died A.D. 420. He has preserved for us, in his *Prologus Galeatus*, a list of the Books acknowledged in his day by the Jews. He says they are generally reckoned as twenty-two, viz. five Books of Moses, eight of the Prophets, and nine of the Hagiographa. But, he adds, some separate Ruth from Judges and Lamentations from Jeremiah, and thus make the number of the Books to be twenty-four. Jerome's list, it will be seen, embraces all the

writings of the Old Testament, and it represents, there is no doubt, a traditional canon of a much earlier date.

Origen's list, which is preserved for us by Eusebius (*H. E.* vi. 25), goes back to a time a century and a half before Jerome. It is substantially the same as his, stating that the Books are twenty-two in number, and combining Ruth with Judges and Lamentations with Jeremiah. A slip of the scribe has made the Books enumerated to be only twenty-one, for the Book of the twelve minor Prophets is unmentioned. But though Origen's Greek is lost, we have Ruffinus' translation of it, in which the omission is supplied, and the list made identical with Jerome's.

A still earlier list, made by Melito bishop of Sardis, is also given by Eusebius (*H. E.* iv. 26). Melito lived somewhere in the latter half of the 2nd century. His list does not state how many Books were reckoned in the Canon, but he mentions the five Books of Moses, Joshua, Judges, Ruth, four Books of Kings, two of Chronicles, the Psalms, Proverbs, Ecclesiastes, Song of Solomon, Job, Isaiah, Jeremiah, twelve minor Prophets in one Book, Daniel, Ezekiel, Esdras. The last named no doubt included Nehemiah, and probably also Esther, which otherwise does not appear. All the other Books (Jeremiah, including Lamentations), though in a different order, find a place in Melito's canon.

This brings us back to Josephus, whose enumeration has been already mentioned, and shown to accord with our present list. But Jewish evidence goes farther than this. For in the prologue of Ecclesiasticus we find allusion to a translation of these same Books made at least a century and a half before Christ. The writer of this prologue, Jesus the son of Sirach, speaks of his grandfather having "much given himself to the reading of the Law, and the Prophets, and other Books of our fathers," and how he was in consequence drawn to write something himself. This sentence points to the threefold division of the Jewish sacred Books as known to the writer of Ecclesiasticus. Shortly afterwards the prologue speaks of these same writings, "the Law itself and the Prophets and the rest of the Books," as being translated, and says, "They have no small difference when they are spoken in their own language." The writer to whom we owe these remarks lived about 132 B.C. in the reign of Ptolemy Euergetes II., and from his words we may almost certainly conclude that the Septuagint Version had by his day been brought to a completion. That Version embraces all the Books of the Old Testament accepted by the Christian Church. Beyond this we cannot go.

The statements which are found in Rabbinical writings concerning the non-acceptance, even in Christian times, of such works as Ecclesiastes and the Song of Solomon, must be taken to mean no more than that, as in the case of the New Testament, so with the Old, one or two Books belonged to a class of *ἀντιλεγόμενα*. They were widely received, but not everywhere nor by all. But the Greek translators counted them as of the Canon, and supplied a version of them as they had done of the Books universally received.

II. The New Testament, like the Old, comprises several Books, by various writers, but the whole was in all probability composed within the last half of the first century of our era. Much more time elapsed, however, before these works were all gathered into one collection, and stamped with authority as canonical writings. A recently discovered work, *The Teaching of the Apostles*, shows that in the very early years of the 2nd century only a small part of our present Canon was known to that portion of the Christian Church to which the writer of this treatise belonged. The Canon now includes twenty-seven separate writings, the works of eight or nine different authors. Most of them were accepted in some portion of Christendom at a very early period of Church history, though a few only gained general acceptance after the lapse of some centuries. It is in the 4th century that we first find a list of New Testament Books containing all the present Canon. At the Council of Laodicea (A.D. 363) a list of Books was accepted "which should be read in the Church;" and of our present Books only the Apocalypse was there omitted. This Book is found included, thirty-four years later (A.D. 397), in the list accepted at the Council of Carthage. The Books about which any question was raised in the Church, and which are called by Eusebius (*H. E.* iii. 25) *ἀντιλεγόμενα*, are the Epistle to the Hebrews, the Epistles of St. James and St. Jude, the Second Epistle of St. Peter, the Second and Third Epistles of St. John, and the Apocalypse.

In our English Bibles these various Books are arranged according to their subject-matter, the historical Books standing first, followed by the letters of St. Paul and the other Apostles, and the volume is concluded by the Apocalypse, which, being largely eschatological, seems to claim the last place in the volume. It is, however, quite certain that letters from the Apostles were written to the Churches which they had founded or in which they had preached the Gospel, some time before the need was felt for any history of the life of Christ, or of the foundation of the Christian society. Some of St. Paul's Epistles are generally accepted as the earliest in order of time of all our Christian writings, and the dates at which they were produced range most probably from A.D. 52, when the first letter to the Thessalonians was sent from Corinth, down to A.D. 67, when the Second Epistle to Timothy was despatched from Rome during that second imprisonment which was terminated by St. Paul's martyrdom. The other Books were produced at various times within and subsequent to these dates.

Of the Gospels it is certain that St. John's was written later than the other three, and probably almost as late as any Book in the New Testament Canon. The other three Gospels, called Synoptic, because they treat mainly of the same part of Christ's history, viz. His life in and around Galilee, and so may be studied together, are yet written each from a different point of view. St. Matthew writes for Jews, and so deals with all that would carry most conviction to that people that Jesus was the promised Messiah. St. Luke as clearly was writing for the Gentile world and from the point of view of a non-Jew; while St. Mark is a Jew, writing probably for some Hellenic Church, and brings out especially all that bespeaks the divinity of Jesus.

The Acts of the Apostles is, as its introduction intimates, a continuation of the Gospel narrative, by adding to the recital of what Jesus did and taught, a history of what was done and taught by those who immediately followed Him, showing how they fulfilled His parting command to preach first in Jerusalem and throughout Judea, then in Samaria and Galilee, and afterwards to go forth to the uttermost parts of the earth.

The letters of St. Paul, much more than those which bear the names of the other Apostles, were directed to special circumstances in the state of those Churches to which they were addressed. Sometimes they are letters of rebuke for errors which were creeping into the midst of a congregation, sometimes they are written in answer to questions addressed to the Apostle, sometimes they are letters of encouragement, and of thanks to the brethren for acts of kindness shown to St. Paul himself, and sometimes more than one of these features are exhibited in the same epistle. The Pastoral Letters (to Timothy and Titus) contain advice to those disciples for the government of the Churches over which they had been placed by St. Paul himself.

The Epistle to the Hebrews, sometimes assigned to St. Paul, is now more generally thought to have been written by some Christian of Alexandria, perhaps Apollos, to whom St. Paul's arguments and the Jewish Scriptures were extremely familiar, and who was possessed of a style and knowledge calculated to commend the advances which Christianity had made beyond the Jewish faith and practice, and to convince men that, even though faith in Him brought with it a great conflict of suffering, Christ was a precious gain to those who had laid hold on Him.

The other Epistles of the New Testament are often styled Catholic, because they are addressed to the Church of Christ at large, and not to any special congregation. The name applies well enough to all but the Second and Third Epistles of St. John, one of which is written to a Christian lady and her children, the other to an individual Christian.

The Apocalypse commences with exhortations and warnings to the Churches then existing in Asia, and advances in prophetic strain to picture the trials and victories of Christ's Church throughout all time. The date of this work, which seems much more to lean on the Jewish economy than *does* St. John's Gospel, ought almost certainly to be placed before the destruction of Jerusalem.

All the original autographs of the New Testament writings have, as was very likely to be the case, perished long ago, but many MSS. of comparatively early date are still in existence, some going back to within less than a century of the time when the Canon was settled at the Council of Carthage. These MSS. are of two kinds. The earliest in date are written in capital letters, and have no separation between the different words. These are called *uncials*, from the character of the writing. By the 9th century, however, a running hand, which combined the letters of each word together, had superseded the more cumbrous early writing, and MSS. in that hand (styled *cursive*) are much more numerous than the uncials; but, as being made many centuries later, they have the chance of being heirs to an abundant store of copyists' blunders. The principal uncials known at present are distinguished as A, B, C, D, and ℵ. The first is the Codex Alexandrinus in the British Museum, of which copies have lately been produced in facsimile by photography. B is the Codex Vaticanus at Rome; C the Codex Ephraemi, which is at Paris; and D the Codex Bezae, in the University Library at Cambridge. ℵ is the Codex Sinaiticus, discovered at a monastery on Mount Sinai by Dr. Tischendorf, and since edited by him. Recent scholarship has given a decided preference to the text of B, and, next to that, *the* text of ℵ. Of uncial MSS. about a score are known, but many of these are fragmentary and contain only small portions of the text. So also are most of the cursives, though about thirty, out of a total of nearly a thousand, have the text entire.

Besides MSS. we can learn something of the character of the earliest text from Versions that have been made of it, of which the earliest Latin, the Syriac, and those Versions in the languages of Egypt are the most important. Latin Versions were first made in Northern Africa for the use of Christian congregations in Carthage and elsewhere. There exist in whole or part three Syriac Versions, the earliest of which must have been made in the 2nd century; while the 2nd and 3rd centuries produced the Egyptian Versions, of which the Coptic is of the greatest antiquity. It is not possible to arrive at certainty from Versions as to what the original Greek text must have been, but they are often very helpful in deciding which readings may safely be rejected.

A third aid to the study of the text is found in the quotations made from it in the writings of the early Fathers. But this source of help is not so valuable as it might be judged to be, because the earlier authors were not so much concerned about verbal accuracy in their quotations, as to give the drift of the passage on which they were dwelling. Hence they appear often to have quoted from memory, the same writer giving on different occasions slightly varying readings of the same text.

Yet by means of these helps to criticism it is well-nigh certain in every passage what the original text of the New Testament was. There is probably not more than one word in a thousand about which any serious doubt can remain as to what the true reading must have been.

On the Old Testament the student may refer with advantage to some of the earlier *Einleitungen*—as Eichhorn (Göttingen, 1823–24); De Wette (Berlin, 1844); Hävernick (Erlangen, 1836); Hengstenberg (Berlin, 1831–39): and concerning more recent investigations, to the writings of Prof. Kuenen of Leyden, and of Dr. J. Wellhausen of Marburg, a condensed sketch of whose opinions are given in his article *Israel*, in the tenth edition of the *Encyc. Brit.*; and to the works of Dr. W. Robertson Smith, *The Old Testament in the Jewish Church*, and *The Prophets of Israel*.

For the New Testament the *Prolegomena* of Mill (Oxford, 1707) and of Wetstein (Amsterdam, 1730) are still valuable. Further information will be found in the *Introduction to the New Testament*, by Dr. Salmon. [J. R. L.]

The preceding article is intended to give only a general view of the subject. It must be supplemented by the articles CANON, OLD TESTAMENT, NEW TESTAMENT, SEPTUAGINT, VULGATE, VERSIONS (ANCIENT), and by the special articles on the separate Books of the Bible.
[EDD.]

BICH'RI (בִּכְרִי; BA. Βαχορεί; *Bichri* and *Bochri*; *first-born*, Sim.; *youthful*, Gesen., Fürst; but perhaps rather *son of Becher*), ancestor of Sheba (2 Sam. xx. 1 ff.). [BECHER.] [A. C. H.]

BID'KAR (בִּדְקַר, Ges. [Treg. and MV.[11]] = בֶּן־דְּקַר [cp. 1 K. iv. 9, R. V.], *a piercer*, but this abbreviation of בן into ב is questioned by Olshausen, *Lehrb. d. Heb. Sprache*, p. 613; B. Βαδεκά, B[b]A. = -καρ, B[ams]. Βαλεκάρ; Joseph. Βαδάκρος; *Badacer*), Jehu's "captain" (שָׁלִישׁ; Joseph. ὁ τῆς τρίτης μοίρας ἡγεμών, *Ant.* ix. 6, § 3), originally his fellow-officer (2 K. ix. 25); who completed the sentence on Jehoram son of Ahab, by casting his body into the field of Naboth after Jehu had transfixed him with an arrow. [W. A. W.] [F.]

BIER. [BURIAL.]

BIG'THA (בִּגְתָא, of uncertain meaning, see Oettli [Strack u. Zöckler's *Kjf. Komm.* in loco]. Ges. connects it, Bigthan, and Abagtha with a Pers. root signifying "fortunate." MV.[11] and Bertheau-Ryssel = *God-given*; Βαραζί; *Bagatha*), one of the seven "chamberlains" (סָרִיסִים, eunuchs) of the harem of Ahasuerus (Esth. i. 10). [F. W. F.]

BIG'THAN and **BIGTHA'NA** (בִּגְתָן, Esth. ii. 21, and בִּגְתָנָא, vi. 2; *Bagathan*, the same as Abagtha in i. 10), an eunuch (chamberlain, A. V.) in the court of Ahasuerus, one of the seven "who kept the door" (marg. "threshold," ἀρχισωματοφύλακες, LXX.), and who conspired with Teresh, one of his coadjutors, against the king's life. The conspiracy was detected by Mordecai, and the eunuchs hung, *i.e.* crucified, or impaled (Herod. iii. 120; Thuc. i. 110, &c.). Prideaux (*Con.* i. 363) supposes that these officers had been partially superseded by the degradation of Vashti and the elevation of Mordecai, and sought revenge by the murder of Ahasuerus. The suggestion falls in with that of the Chaldee Vs., and of the LXX., which in Esth. ii. 21 interpolates the words ἐλυπήθησαν οἱ δύο εὐνοῦχοι τοῦ βασίλεως . . . ὅτι προήχθη Μορδοχαῖος. The name is omitted by the LXX., on both occasions. Bigthan is probably derived from the Persian and Sanskrit *Bagadâta*, "a gift of fortune" (Gesen.-Treg. after Bohlen, *s. v.* See BIGTHA). Ahasuerus (if Xerxes be intended by this name) afterwards fell a victim to the conspiracy of an eunuch (Ctesias, *Pers.* 29; Arist. *Polit.* v. 10; Diod. Sic. xi. 69). [F. W. F.]

BIG'VAI (בִּגְוַי, probably from the Pers., *happy*. Cp. the name Βαγαῖος [Her. iii. 128]; *Beguai*, *Begoai*).

1. "Children of Bigvai," 2056 (Neh. 2067) in number, returned from the Captivity with Zerubbabel (Ezra ii. 14 [B. Βαογεί, A[vid]. Βαγουά]; Neh. vii. 19 [א. Βαγοεί, A. Βαγουεί, B. Βατοεί]), and 72 of them at a later date with Ezra (Ezra viii. 14 [B. Βαγοουθί, A. Γαβουαεί]). [BAGOI; BAGO.]

2. Apparently one of the chiefs of Zerubbabel's expedition (Ezra ii. 2 [A. Βαγουά, B. Βατουσί]; Neh. vii. 7 [BN. Βατοεί, A. Βαγουαί]), and who afterwards signed the covenant (Neh. x. 16 [B. Βαγοσί, NA. Βαγοεί]). [F. W. F.] [F.]

BIL'DAD (בִּלְדַד = *Bel hath loved* [cp. Eldad], Nöldeke, *ZDMG.* 1888, p. 479; Βαλδάδ; *Baldad*), the second of Job's three friends. He is called the "Shuhite" (הַשּׁוּחִי, which implies both his family and nation. Shuah was the name of a son of Abraham and Keturah, and of an Arabian tribe sprung from him, when he had been sent eastward by his father. Gesen. (*s. v.*) supposes it to be "the same as the Σακκαία of Ptolemy (v. 15) to the east of Batanea," and therefore to the east of the land of Uz [SHUAH: Fried. Delitzsch (*ZKF.* ii. 91, &c.) identifies this with Sûḥu on the Euphrates, south of Carchemish]. The LXX., strangely enough, renders it ὁ τῶν Σαυχέων τύραννος, appearing to intend a distinction between him and the other friends, whom in the same verse it calls βασιλεῖς (Job ii. 11).

Bildad takes a share in each of the three controversies with Job (viii. xviii. xxv.). He follows in the train of Eliphaz, but with more violent declamation, less argument, and keener invective. He relies much on proverbial wisdom (viii. 11–18; xviii. 4–20), and represents the orthodox sage; whereas Eliphaz is more of the prophet and Zophar of the formalist (see Cox on Job). Bildad's address is abrupt and untender, and in his very first speech he cruelly attributes the death of Job's children to their own transgressions; and loudly calls on Job to repent of his supposed crimes. His second speech (ch. xviii.) merely recapitulates his former assertions of the temporal calamities of the wicked; on this occasion he implies, without expressing, Job's wickedness, and does not condescend to exhort him to repentance. In the third speech (ch. xxv.), unable to refute the sufferer's arguments, he takes refuge in irrelevant dogmatism on God's glory and man's nothingness, which is practically an admission of defeat: in reply to which Job justly reproves him both for deficiency in argument and failure in charitable forbearance. Cp. Ewald, *Das Buch Ijob*; Bradley, *The Book of Job*, on chs. viii., xviii., xxv. [F. W. F.]

BIL'EAM (בִּלְעָם; A. Ἰβλαάμ, B. om.; *Baalam*), a town in the western half of the tribe of Manasseh, named only in 1 Ch. vi. 70, as being given (with its "suburbs") to the Kohathites. In the lists in Josh. xvii. 11 and xxi. 24 this name does not appear, but Ibleam (LXX. om.) is probably, by an easy change of letters, the same place [IBLEAM]. [G.] [W.]

BIL'GAH (בִּלְגָּה, Ges. = *cheerfulness*; A. Βελγά, B. Ἐμμήρ; *Belga*). **1.** A priest in the time of David; the head of the fifteenth course for the Temple-service (1 Ch. xxiv. 14).

2. A priest who returned from Babylon with Zerubbabel and Joshua (Neh. xii. 5 [N[c.am.gnp]

Βαλγάς, om. BA.], 18 [$\aleph^{c.\text{ampl}}$ Βαλγάς, B$\aleph^{*}$A. ωμ.; *Belgae*]); probably the same who, under the slightly altered name BILGAI, sealed the covenant (Neh. x. 8 [B. Βελσειά, $\aleph$. Βελσιά, A. Βελγαί; *Belgai*]). [W. A. W.] [F.]

BIL'GAI (בִּלְגַי), Neh. x. 8; probably the same as BILGAH, 2.

BIL'HAH (בִּלְהָה, perhaps *simple;* Βαλλά; *Bala*). **1.** Handmaid of Rachel (Gen. xxix. 29), and concubine of Jacob, to whom she bore Dan and Naphtali (Gen. xxx. 3–8, xxxv. 25, xlvi. 25; 1 Ch. vii. 13). Her stepson Reuben afterwards lay with her (Gen. xxxv. 22), which entailed a curse upon Reuben (Gen. xlix. 4).

2. A town of the Simeonites (1 Ch. iv. 29; B. Ἀβελλά, A. Βαλαά; *Bala*); also called Baalah and Balah. [BAAL, p. 308, No. 2, *b*.] [W. A. W.] [F.]

BIL'HAN (בִּלְהָן; *Balaan, Balan;* the same root as Bilhah, Gen. xxx. 3, &c.). The final ן is evidently a Horite termination, as in Zaavan, Akan, Dishan, Aran, Lotan, Alvan, Hemdan, Eshban, &c.; and may be compared with the Etruscan *ena*, Greek α(ν)ς, ων, &c. It is frequent in the Tema-inscriptions (cp. *Studia Biblica* [1885], p. 214.—S. R. D.).

1. A Horite chief, son of Ezer, son of Seir, dwelling in Mount Seir, in the land of Edom (Gen. xxxvi. 27 [A. Βαλαάν, L^{ed}E. -αμ]; 1 Ch. i. 42 [B. Βαλαάμ, A. -αν]).

2. A Benjamite, son of Jediael (1 Ch. vii. 10 [BA. Βαλαάν]). It does not appear clearly from which of the sons of Benjamin Jediael was descended, as he is not mentioned in Gen. xlvi. 21, or Num. xxvi. But as he was the father of Ehud (*v.* 10), and Ehud seems, from 1 Ch. viii. 3, 6, to have been a son of Bela, Jediael, and consequently Bilhan, were probably Belaites. The occurrence of Bilhan as well as Bela in the tribe of Benjamin, names both imported from Edom, is remarkable. [A. C. H.] [F.]

BIL'SHAN (בִּלְשָׁן, if = בֶּן־לְשָׁן, then *eloquent*, but see BIDKAR; *Belsan*), one of Zerubbabel's companions on his expedition from Babylon (Ezra ii. 2 [B. Βασφάμ, A. Βαλασάν]; Neh. vii. 7 [B. Βαλσάν, $\aleph$. Βασφάν, A. Βαασάν]). [F.]

BIM'HAL (בִּמְהָל, if = בֶּן־מַהַל, then *circumcised*, but see BIDKAR; B. Ἰμαβαήλ, A. Βαμαήλ; *Chamaal*), one of the sons of Japhlet in the line of Asher (1 Ch. vii. 33). [W. A. W.]

BIN'EA (בִּנְעָא; *Banaa*), the son of Moza; one of the descendants of Saul (1 Ch. viii. 37 [B. Βανά, A. Βαανά]; ix. 43 [B$\aleph$. Βαανά, A. Βανά]). [W. A. W.]

BIN'NUI (בִּנּוּי=*a building*, perhaps with reference to the formation of a family [cp. Gen. xxx. 3, R. V. marg.], a name frequent after the Exile. **1.** A Levite, father of Noadiah, in Ezra's time (Ezra viii. 33; B. Ἐβαννάιδ, A. υἱὸς Βαναιά; *Bennoi*).

2. One of the sons of Pahath-moab, who had taken a foreign wife (Ezra x. 30; B$\aleph$. Θανουέλ, A. Βανουί; *Bennui*). [BALNUUS.]

3. Another Israelite, of the sons of Bani, who had also taken a foreign wife (Ezra x. 38; B$\aleph$A. Βανούι; *Bennui*).

4. Altered from BANI in the corresponding list in Ezra (Neh. vii. 15 [B$\aleph$A. Βανουί; *Bannui*]).

5. A Levite, son of Henadad, who assisted at the reparation of the wall of Jerusalem, under Nehemiah (Neh. iii. 24 [B$\aleph$A. Βανεί; *Bennui*]; x. 9 [BA. Βαναιού, $\aleph^{\text{ca}}$. Ἀβαναιού; *Bennui*]). Possibly the same as the Levite Binnui in xii. 8 [B$\aleph$A. Βανουί; *Bennui*]. [W. A. W.] [F.]

BIRDS (עוֹף, צִפּוֹר, עַיִט, בָּזָךְ, בַּעַל כָּנָף; *'Oph, tzippor, 'ayit, ba'al-chânâph;* τὰ πετεινά, τὰ ὄρνεα τοῦ οὐρανοῦ, ὄρνις, ὀρνίθιον; *volucris, avis*). עוף, from the root עוף, *'ooph*, "to fly," the same as the Arabic عاف, *'aph*, is frequently used of birds in general; and it is not pretended by any that it denotes any particular species. צִפּוֹר, which occurs upwards of forty times in the O. T., equivalent to the Arabic صفر, *scfar*, "to whistle," is everywhere translated "bird" or "fowl" except in two passages where it is given as "sparrow," a rendering more accurately expressive of its real meaning. The Hebrews, like the modern Orientals, seem to have been singularly unobservant of the distinctions of the vast number of species of passerine birds. With the exception of a few very striking and conspicuous species, as the swallows, swift, and starling, they were all included as *tzippor*, "sparrows;" just as the Arabs and Syrians speak of them all as عصفور, *'asfûr*, i.e. "sparrow," yet when the distinctions are pointed out, recognise them at once as a kind of *'asfûr*. The word may be taken, with the consent of all the critics, as the common name of all small perching birds, though especially applied to the sparrow. Bochart, while explaining the word as including all passerine birds, adduces and discusses at some length nine passages, where with more or less reason the sparrow is specifically intended; but it is unnecessary to enter upon these. The Greeks used στρουθίον with exactly the same indefiniteness and latitude. [See SPARROW, under which the small birds are more fully treated of.]

עַיִט, *'ayit*, is translated "bird" by the A. V. in Jer. xii. 9, by R. V. "bird of prey;" elsewhere "fowls," always denoting birds of prey, from the root עיט, "to rush on the prey." In each passage where it occurs, some familiar characteristic of raptorial birds is referred to, but nothing which points to any particular species. "When the fowls (*'ayit*) came down upon the carcases, Abram drove them away" (Gen. xv. 11). "There is a path which no fowl (*'ayit*) knoweth, and which the vulture's eye hath not seen" (Job xxviii. 7). In the former passage, the habit of the various species of eagles and vultures congregating over a carcase is referred to, in the second the wonderful power of distant vision. Raptorial birds do not detect their prey by scent, but by vision. No blast which falls in the night, although it be close to a griffin's roosting-place, where the birds are often astir, is attacked till morning, save by the jackals and hyaenas; but if it be during the day, although there may not be a vulture in the sky which the human eye can detect, within a few minutes a speck will appear

overhead, and a vulture will wheel and circle in rapid downward flight, followed in rapid succession from all quarters by a motley crowd of carrion feeders, kites, buzzards, eagles, crows: "Wherever the carcase is, there will the eagles be gathered together."

The track of a wounded deer or gazelle can be descried by the vulture from a height where it cannot itself be detected by any human eyes.

In Is. xviii. 6, "The fowls shall summer upon them," we have another well-known habit of birds of prey alluded to. The Ethiopian enemies of Israel are to be stripped like a vine, of foliage, sprigs, and branches—only a bare stem is to be left, and on this the buzzard shall perch. No large raptorial bird will settle on a green tree if a dead stump or bare pole is in the neighbourhood, a fact which is often taken advantage of by fowlers in setting their snares for these birds.

בַּעַל כָּנָף, *ba'al chânâph*, i.e. *possessor of wings*, is used in Prov. i. 17, and is a poetical expression denoting generally all birds (cp. Eccles. x. 20 Heb.)

In the summary of the history of Creation in Genesis, birds are described as having been created on the fifth day, from the waters, immediately after sea-monsters, reptiles, and fishes, and before the beasts of the earth (Mammalia), which preceded man on the sixth day.

The recently exhumed Assyrian tablets of the Creation are unfortunately deficient, so far as has yet been ascertained, in that portion which relates to the work of the fifth day as recorded in Genesis. But the seventh tablet in the series discovered by the late G. Smith at Kouyunjik, though only a fragment, records the creation of "cattle of the field, beasts of the field, and creeping things of the field," exactly in the same order as in Genesis, and also refers to the previous creation of "the strong monsters" (G. Smith, *Chaldaean Account of Genesis*, p. 76).

The reference in the tablet to the satisfaction which a former creation, apparently that of sea-monsters or whales, had given the Creator, is parallel to Gen. i. 23; and if the missing tablet be ever discovered, there is reason to expect that we shall find the creation of birds in the same order as given in Genesis. Cp. Sayce, *Religion of the ancient Babylonians*, p. 388, &c.; *Records of the Past*, N. S. i. 129.

As a matter of fact, this order of bird creation is in exact accord with the geological record. The earliest undoubted appearance of birds in our fossil remains is in the Oolitic deposits, where at Solenhofen, in Bavaria, the fossilised remains of a bird, known as *Archaeopteryx*, were discovered in 1861. Some supposed footprints of birds had been found in the triassic formation in the valley of the Connecticut in 1835; but most palaeontologists are now agreed in referring them to gigantic reptiles and not to birds. Thus the first appearance of a bird is exactly where it is placed in the Mosaic record, immediately following the great reptilian epoch. The *Archaeopteryx* has many curious reptilian peculiarities, especially the long lizard-like tail of twenty vertebrae, from each of which springs a pair of well-developed rectrices or tail feathers. The unique specimen is now in the British Museum. More remains of birds—some of them resembling or allied to Penguins, Cormorants, Divers, Rails, and Waders—have been found in the Cretaceous or Chalk deposits; and still more in the Eocene, some of which retain the reptilian character and have their jaws or beaks armed with true teeth. Still more numerous are the birds of the Meiocene deposits, and they are still more closely allied to our existing forms; no less than forty-four existing genera being represented in the lacustrine deposits of Auvergne, in the neighbourhood of Mentz, in the freshwater formations of Berne and Provence, in Greece, the Himalayas, and North America. After this the Pleiocene and Postpleiocene forms rapidly become closely allied to living species; with which in the cave deposits and kitchen middens they are for the most part identical. It is interesting to observe that in the Oceanic islands, such as the Mauritius and the other Mascarene Islands, and in New Zealand, which mammalia had scarcely reached when first discovered by man, the highest forms of life were birds, many of them incapable of flight, and of gigantic size, side by side with gigantic tortoises and reptiles. To these places the products of the sixth day's creation had not reached.

The birds of Palestine are exceptionally numerous and varied for so small a region, 348 species having been already recorded from that country. Ornithologically, Palestine belongs to what is termed by naturalists "the Palae-arctic region," *i.e.* Europe; Africa north of the Sahara, but not Egypt; Asia Minor, Syria, Persia, and all Asia north of the Himalayas and North China. But of this region Palestine is almost an outlying province, impinging as it does on Egypt, which belongs to the Ethiopian region on one side, and on the Indian region on another. In winter, the bird population of Palestine is chiefly composed of hordes of European migrants of all orders and families, which seek refuge there. When spring returns, these begin for the most part to troop northwards, and the native or truly indigenous birds take their places, largely reinforced by summer migrants from the south. Still the seaboard and the interior, until the western limits of the Jordan valley are reached, are purely Palae-arctic in their character. But the depressed valley of the Ghor, or Jordan and Dead Sea, which is sunk 1300 feet below the level of the Mediterranean, seems to be an outlier of the Ethiopian region, containing also a sprinkling of Indian forms; the Sunbird, Bush-babbler, Smyrna Kingfisher, Bulbul, and others being the most remarkable species. The Southern and Eastern desert regions present, as their chief ornithological characteristic, the types of the African deserts. In the whole of the country, as might be expected from the character of its coast and the scarcity of marshes, sea-birds and water-fowl are comparatively scarce; but probably in no country in the world are diurnal birds of prey more numerous in individuals or more varied in species. This explains the exceptional number of Hebrew names of birds of prey, which are preserved to us in Leviticus and Deuteronomy. Game birds are few, both in numbers and species, while of passerine birds, especially warblers, the numbers far exceed those of Southern England. The most abundant of all families of birds,

though the species are few, are the Pigeons and Doves. [H. B. T.]

BIR'SHA (בִּרְשַׁע, Ges. [Treg. and MV.[11]], if = בֶּן־רָשַׁע, *a wicked one*, but see BIDKAR, and against the interpretation Dillmann[5] and Delitzsch [1887] in loco; Βαρσά; *Bersa*), king of Gomorrah at the time of the invasion of Chedorlaomer (Gen. xiv. 2). [F.]

BIRTH. [CHILDREN.]

BIRTHDAYS (τὰ γενέσια, Matt. xiv. 6). Properly τὰ γενέθλια is a birthday feast (and hence in the early writers the day of a martyr's commemoration), but τὰ γενέσια seems (according to Schleusner, Meyer, Bleek, &c.) to be used in this sense in later and Hellenistic Greek, for in Herod. iv. 26 it means a day in honour of the dead. It is, however, possible that in Matt. xiv. 6 the feast to commemorate Herod's *accession* is intended (Grotius; Wieseler, *Beitr.* p. 182; Hausrath; Volkmar, &c.), for we know that such feasts were common (especially in Herod's family, Joseph. *Ant.* xv. 11, § 6, xvii. 8, § 4; Blunt's *Coincidences*, Append. vii.), and were called "the day of the king" (Hos. vii. 5). The Gemarists distinguish expressly between ניונוסיא של מלכים, γενέσια *regni*, and the יום הלדה or birthday (*Avodah Zarah*, i. 3, ed. Strack; Lightfoot, *Hor. Hebr. ad* Matt. xiv. 6). On the other hand, Josephus (*Ant.* xii. 4, § 7) and Philo (*c. Flacc.*) use γενέσια for a birthday feast, and Josephus uses ἡμέρα τῆς ἀρχῆς for an anniversary of accession (*Ant.* xv. 11, § 6), so that the question must be regarded as an open one (see *Speaker's Comm.* in loco; Edersheim's *Life and Times of Jesus the Messiah*, i. 672).

The custom of observing birthdays is very ancient (Gen. xl. 20; Jer. xx. 15); and in Job i. 4, &c., we read that Job's sons "feasted every one his day." In Persia they were celebrated with peculiar honours and banquets, for the details of which see Herod. i. 138. And in Egypt "the birthdays of the kings were celebrated with great pomp. They were looked upon as holy: no business was done upon them, and all classes indulged in the festivities suitable to the occasion. Every Egyptian attached much importance to the day, and even to the hour of his birth" (Wilkinson, *Anc. Egypt.* i. 281 [1878]). Probably in consequence of the ceremonies usual in their celebration, the Jews regarded their observance as an idolatrous custom (Lightfoot, *l. c.*). [F. W. F.]

BIRTHRIGHT (בְּכוֹרָה; τὰ πρωτοτόκια). We must distinguish this from the "blessing" exercised by Isaac and Jacob in turn, in favour of a selected son or sons, analogous to a testamentary disposition; whereas the analogy of birthright is rather with entail. The blessing, in the instances which we have of it, includes spiritual privilege; whereas the birthright seems limited to property. Yet the blessing, being of a mixed character, limits or overrides primogeniture in the case of Reuben, and of Manasseh who was adopted with, but postponed to, Ephraim by Jacob. The distinctive mention of first-born sons in each generation meets us in the earliest genealogies; even in that of the outcast Cain we have, down to Lamech, a line apparently of first-born sons (Gen. iv. 17 sq.). Afterwards an even more distinctive formula is found with considerable uniformity: "A. lived so many years and begat B., and A. lived after he begat B. so many years and begat sons and daughters." The first deviation occurs in the generations from Noah, but the same formula is resumed in tracing the line of Terah's descent from Shem through Arphaxad, whom Shem "begat after the flood," and who seems preferred to the elder brothers. Distinctive mention of first-born sons appears in Gen. xxii. 21, xxv. 13, xxxv. 23, xxxvi. 15; Num. xxvi. 5, &c. The advantages accruing to the eldest son were not definitely fixed in patriarchal times. The theory that he was the priest of the family rests on no scriptural statement, and the Rabbis appear divided on the question (see Hottinger's *Note on Goodwin's Moses and Aaron*, i. 1; Ugol. iii. 53). Great respect was paid to him in the household; and, as the family widened into a tribe, this grew into a sustained authority, undefined save by custom, in all matters of common interest. Thus the "princes" of the congregation had probably rights of primogeniture (Num. vii. 2; xxi. 18; xxv. 14). A "double portion" of the paternal property was under certain circumstances allotted to the firstborn by the Mosaic Law (Deut. xxi. 15–17), nor could the caprice of the father then deprive him of it. This probably means twice as much as any other son enjoyed. Of similar character, in earlier days, was the exceptional inheritance of Joseph, his sons reckoning with his brethren, and becoming heads of tribes (Gen. xlviii. Cp. Riehm, *HWB.* s. n. "Erbrecht"). This seems to explain the request of Elisha for a "double portion" of Elijah's spirit (2 K. ii. 9; so most commentators). The sin of Onan (Gen. xxxviii. 9) is clearly the result of a wish to maintain the birthright in his own line instead of in that of his deceased elder brother. And we may account for the tenacity with which Tamar clung to her domestic and conjugal rights by the same consideration, although, being a Canaanitess, she takes a heathenish mode of maintaining them (*ib.* 13 sq.: see Kurtz, *Gesch. des A. Bundes*, § 86). Reuben, through his unfilial conduct, was deprived of the birthright (Gen. xlix. 4; 1 Ch. v. 1). We see, however, from Gen. xxxvii. 21, 29, 30, that in earlier days he had some kind of position distinct and apart from his brethren, and that he felt some responsibility for the younger sons as especially pertaining to him (*v.* 30; cp. xlii. 37). It is likely that some remembrance of this lost pre-eminence stirred the Reubenite leaders of Korah's rebellion (Num. xvi. 1, 2; xxvi. 5–9). Esau's act, transferring his right to Jacob, was allowed to be valid (Gen. xxv. 33). The first-born of the king was his successor by law[a] (2 Ch. xxi. 3); David, however, by Divine appointment, excluded Adonijah in favour of Solomon, which deviation from rule was indicated by the anointing (Goodwin, *op. cit.* 4, with Hottinger's notes).

[a] In an article in the *Bibliotheca Sacra* (Ohio, U.S.), January 1888, an opinion is urged, with much support of chronological coincidences, that the succession to the Jewish throne lay in the son first born after the father had reached twenty-one years of age.

The Jews attached a sacred import to the title (see Schöttgen, *Hor. Hebr.* i. 922): thus "Israel is ... My firstborn" (Ex. v. 22); and thus "firstborn" and "first-begotten" seem applied to the Messiah (Rom. viii. 29; Heb. i. 6). See FIRST-BORN, HEIR. Keil, *Bibl. Archaol.* II. iii. 1. 1, § 142, has some remarks of interest. [H. H.]

BIR'ZAVITH (בִּרְזָוִת, *Keri* בִּרְזָיִת; B. Βηζαίθ, A. Βερζαιέ; *Barsaith*), a name occurring in the genealogies of Asher (1 Ch. vii. 31), and possibly, from the mode of its mention, the name of a place (cp. the similar expression, "father of Bethlehem," "father of Tekoa," &c. in chs. ii. and iv.). The reading of the *Keri* may be interpreted "well of olives." No trace of it is found elsewhere. [W. A. W.]

BISH'LAM (בִּשְׁלָם, if = בֶּן־שְׁלָם, *peaceful* [but see BIDKAR]; *Beselam*), apparently an officer or commissioner (συντασσόμενος, 1 Esd. ii. 16) of Artaxerxes in Palestine at the time of the return of Zerubbabel from Captivity (Ezra iv. 7). The LXX. translates it ἐν εἰρήνῃ, *in peace* (see margin of A. V.); so also the Syriac and Arabic Versions; but this has nothing to recommend it. [W. A. W.]

BISHOP (ἐπίσκοπος). This word, applied in the N. T. to the officers of the Church who were charged with certain functions of superintendence, had been in use before as a title of office. The inspectors or commissioners sent by Athens to her subject-states were ἐπίσκοποι (Aristoph. *Aves*, 1022), and their office, like that of the Spartan Harmosts, authorized them to interfere in all the political arrangements of the states to which they were sent. Other instances of the use of the term are the following. It is "the designation of the inspectors whose business it was to report to the Indian kings (Arrian, *Ind.* xii. 5); of the commissioners appointed by Mithridates to settle affairs in Ephesus (Appian, *Mithr.* 48); of magistrates who regulated the sale of provisions under the Romans (Charisius in the *Dig.* l. 4, 18); and of certain officers in Rhodes whose functions are unknown" (Ross, *Inscr. Graec. Ined.* fasc. iii. Nos. 275, 276. Cp. Lightfoot, *Philipp.* p. 93). Fresh instances from inscriptions are given by Hatch, *Bampton Lectures*, pp. 37, 38 (cp. C. Gore, *The Church and the Ministry*, p. 403); and the word is used once by Cicero, *ad Attic.* vii. 11. To the Hellenistic Jews the title was familiar from its use in the LXX., where it appears in the following passages:—Job xx. 29 (אֵל); 2 Ch. xxxiv. 12, 17, of Josiah's overseers (מְפַקֵּד); Is. lx. 17, exactors (נֹגְשִׂים); Numb. iv. 16, office (פְּקֻדָּה); 2 K. xi. 18 (פְּקֻדוֹת), officers over the house of the Lord; *v.* 15, officers of the host. So Numb. xxxi. 14 (פְּקֻדִים); Judg. ix. 28, Zebul his officer (פְּקִיד); Nehem. xi. 9, 14, 22, overseer (פְּקִיד). In Wisd. i. 6 it is used of God, as the true beholder of the heart; and in 1 Macc. i. 51, of the overseers whom Antiochus appointed over all the people (so Joseph. *Ant.* xii. 5, § 4). In the N. T. the word is only found in five places. Once (1 Pet. ii. 25) it is applied to our Lord, the "Shepherd and Bishop of your souls;" and four times to officers of the Christian Church, at Ephesus (Acts xx. 28; 1 Tim. iii. 2), Philippi (Philip. i. 1), and Crete (Titus i. 7). That the "bishops" thus spoken of are identical with "presbyters" is scarcely disputed by any who accept the Pastoral Epistles as genuine.* The following facts, among others, may be taken as establishing it beyond controversy:—

1. ἐπίσκοποι and πρεσβύτεροι are nowhere named together as being orders distinct from each other.

2. ἐπίσκοποι and διάκονοι are named apparently as an exhaustive division of the local officers of the Churches addressed by St. Paul as an Apostle (Phil. i. 1; 1 Tim. iii. 1, 8).

3. The same persons are described by both names (Acts xx. 17, 28; Titus i. 5, 7; cp. 1 Pet. v. 1, 2, πρεσβύτεροι ... ἐπισκοποῦντες, if this last word, omitted in BN., be genuine).

4. πρεσβύτεροι discharge functions which are essentially "episcopal," *i.e.* involving pastoral superintendence (1 Tim. v. 17; 1 Pet. v. 1, 2). See further, Lightfoot, *Philipp.* p. 94.

The age which followed that of the Apostles witnessed a gradual change in the application of the words. In the Epistle of Clement of Rome (*circa* 96 A.D.) the two words ἐπίσκοπος and πρεσβύτερος are still dealt with as interchangeable (*ad Cor.* I. xlii., xliv., lvii.), and in the Διδαχὴ τῶν δώδεκα ἀποστόλων the terms ἐπίσκοποι and διάκονοι are joined together (c. xv.) exactly as they are by St. Paul. But by the time of Ignatius (A.D. 110) the "Bishop" is recognised as distinct from, and superior to, the presbyters. See Polyc. §§ 5, 6; Eph. § 2, &c.

Assuming as proved the identity of the "Bishops" and "elders" of the N. T., we have to inquire into (I.) the origin of the titles and the relation which existed between them; (II.) the functions and mode of appointment of the men to whom both titles were applied; (III.) their relations to the general government and discipline of the Church.

I. There can be no doubt that πρεσβύτεροι had the priority in order of time. Whether the existence of a body bearing that name is implied in the use of the correlative οἱ νεώτεροι (cp. Luke xxii. 26; 1 Pet. v. 5) in the narrative of Ananias may be doubtful (see Acts v. 6, and obs. νεανίσκοι in *v.* 10); but there can be no question that the order itself is recognised as an already existing fact in Judaea in Acts xi. 30. Presbyters take part in the deliberations of the Church at Jerusalem in Acts xv., and are appointed "in every city" among the Gentile Churches planted by St. Paul and St. Barnabas on their first missionary journey (Acts xiv. 23). Of the origin of the order St. Luke says nothing, but his silence is best explained by the supposition that, as the expansion of the Church rendered organization necessary, the organization would be that of the Jews (cp. Jas. ii. 2, where συναγωγή is used of a Christian assembly), and thus as a matter of course a

* Harnack maintains that the orders were originally distinct; but then he refuses to accept the authority of the Pastoral Epistles, and distinctly says that "anyone who admits the genuineness of the Pastoral Epistles will reach quite different conclusions from one who regards them as non-Pauline, and relegates them to the second century." See *Expositor*, 3rd Series, v. 322.

body of elders or presbyters (cp. Luke vii. 3, πρεσβύτεροι = זְקֵנִים) would be chosen for disciplinary purposes, and to watch over the well-being of the society. It is more difficult to explain the origin of the title ἐπίσκοπος. The earliest occurrence of it is in the address of St. Paul to the Ephesian elders at Miletus (Acts xx. 28); and there it is rather descriptive of functions than given as a title. [Still earlier, ἐπισκοπή, "bishopric," occurs in a quotation from Ps. cix. in St. Peter's speech in Acts i. 20.] The earliest Epistle in which the word is formally used as equivalent to πρεσβύτεροι (except on the improbable hypothesis that 1 Timothy belongs to the period following on St. Paul's departure from Ephesus in Acts xx. 1) is that to the Philippians, as late as the time of the Apostle's first Roman imprisonment. It is used again only in the Pastoral Epistles; and thus, as far as the N. T. is concerned, is limited to *Gentile* Churches. With regard to the source of the title two views are possible. (1) It may have been suggested by the use of the term in the LXX.; and, remembering the earliest use of the kindred ἐπισκοπή, there appears to be much probability in this view. If the office was thus designated, it was only natural that the holder of the office should be termed ἐπίσκοπος. (2) It may, however, have been selected because of its use in contemporary Gentile societies, where it was possibly used of officers, in the general sense of "overseers" (cp. Hatch, *B. L.* p. 37, with Gore, *Church and Ministry*, p. 409). But it would be a serious error to infer that, because this term was chosen for Church officers, therefore they were "in relation to the Christian communities what the senate was in relation to a municipality, and what the committee was in reference to an association." The Church, as the translators of the LXX. before her, in framing her religious vocabulary seems designedly to have selected terms which were not profaned by religious or rather idolatrous associations, but which had been used in civil and political senses (cp. Trench's *Synonyms of the N. T.*, p. 122). Just as ἐκκλησία and λειτουργία were transferred from civil to religious uses, so it may have been with ἐπίσκοπος. The use of the term in 1 Pet. ii. 25 as applied to the "Shepherd and Bishop of souls" is of itself sufficient to prevent us from pressing the argument from the identity of titles; and if it was selected as the name of office in the Gentile Churches, it may well have been because there was a life in the organization of the Church higher than that of the synagogue, and functions of pastoral superintendence devolving on the elders of the Christian congregation which were unknown to other periods. The instances of its use collected at the beginning of this article show to how great an extent it was a neutral word. This of itself was an advantage. It had the further merit of being to some extent descriptive as well as titular; a *nomen officii* as well as a *nomen dignitatis*. It was profaned by no idolatrous associations. It could be associated, as πρεσβύτερος could not be, with the thought of the highest pastoral superintendence—of Christ Himself as the ποιμὴν καὶ ἐπίσκοπος.

II. Of the order in which the first elders were appointed, as of the occasion which led to the institution of the office, we have no record. Arguing from the analogy of the seven in Acts vi. 5, 6, it might have seemed probable that the *choice* (ἐκλογή) would be made by the members of the Church collectively, and the *appointment* (κατάστασις: cp. Acts vi. 3, οὓς καταστήσωμεν) by the Apostles; the act of ordination being accompanied with prayer and imposition of hands. But within the limits of the N. T. (with which alone this article is concerned) it cannot be said that there is evidence of anything like popular election of the elders. Those ordained "in every Church" by St. Paul and St. Barnabas on their first missionary journey evidently received their appointment from those Apostles (χειροτονήσαντες δὲ αὐτοῖς πρεσβυτέρους). Titus is left in Crete that he may *appoint* (καταστήσῃς, Titus i. 5) elders in every city, nothing being said of their *election*; while the directions given to Timothy in 1 Tim. iii. 1–13 (and perhaps v. 22) imply that the appointment rested with him. In the case of Timothy himself the πρεσβυτέριον, probably the body of the elders at Lystra, had taken part with the Apostle in the act of ordination, but there is a significant difference in the prepositions used in the two passages in which St. Paul speaks of this. The "gift" (χάρισμα) was in Timothy *through* (διὰ) the laying on of the Apostle's hands (2 Tim. i. 6), *with* (μετὰ) the laying on of the hands of the presbytery (1 Tim. iv. 14). "Laying on of hands" is alluded to in several other passages of the N. T., and was clearly the outward sign of the communication of all χαρίσματα, including "gifts of healing" as well as more definitely spiritual gifts (see Acts viii. 18; ix. 12, 17; xiii. 3; xix. 6; xxviii. 8; Heb. vi. 2). It is doubtful whether in 1 Tim. v. 22 the reference is to ordination (so Van Oosterzee, after most of the older interpreters), or to the restoration of penitents (Ellicott), or whether it is purposely left indefinite so as to include all the various occasions on which the rite was used (Huther). There is, however, no doubt that from the first the two essentials of "prayer" and "laying on of hands" were required in the ordination of all Church officers alike.

The conditions to be observed in the selection of ἐπίσκοποι are stated in the Pastoral Epistles (1 Tim. iii. 1–7; Titus i. 5–9). They are: blameless life and reputation among "those that are without" as well as within the Church, fitness for the work of teaching, the wide kindliness of temper which shows itself in hospitality, the being "the husband of one wife." Some doubt has been felt with regard to the meaning of this expression, and three different interpretations have been proposed of what the Apostle forbids. (1) Simultaneous polygamy (this, however, seems to be excluded by the parallel requirement in the case of a widow, ἑνὸς ἀνδρὸς γυνή, cp. v. 9). (2) Successive polygamy (so Ellicott, and the majority of commentators). (3) Any unfaithfulness to the marriage vow, whether by keeping a concubine, or by other laxity of life (so Huther; cp. the *Dictionary of Christian Antiquities*, ii. 1097). Further, the man who is chosen must have shown powers of government in his own household as well as in self-control, nor must he be a recent, and therefore an untried, convert. When appointed, the

duties of the Bishop-elders were as follows:— 1. *General superintendence over the well-being of the flock* (1 Pet. v. 2). According to the aspects which this function presented, those on whom it devolved were called ποιμένες (Eph. iv. 11), προεστῶτες (1 Tim. v. 17), προϊστάμενοι (Rom. xii. 8; 1 Thess. v. 12), and ἡγουμένοι (Heb. xiii. 7, 17, 24). Its exercise called for the χάρισμα κυβερνήσεως (1 Cor. xii. 28). A reference to these passages will be sufficient to show that so far as the N. T. is concerned there is no evidence whatever that the office was instituted primarily for a *financial* purpose. It is on behalf of the *souls* that the rulers watch as they that shall give account. They are over the flock "in the Lord." It is thus the whole spiritual oversight of the flock that is contemplated. Corporal works of mercy would not be forgotten, but neither would they be the main business of the ἐπίσκοποι. 2. *The work of teaching both publicly and privately.* "Though *government* was probably the first conception of the office, yet the work of *teaching* must have fallen to the presbyters from the very first, and have assumed greater prominence as time went on. With the growth of the Church, the visits of the Apostles and Evangelists to any individual community must have become less and less frequent, so that the burden of instruction would be gradually transferred from these missionary preachers to the local officers of the congregation. Hence St. Paul in two passages, where he gives directions relating to Bishops or presbyters, insists specially on the faculty of teaching as a qualification for the position (1 Tim. iii. 2; Titus i. 9). Yet even here this work seems to be regarded rather as incidental to, than as inherent in, the office. In the one Epistle he directs that double honour shall be paid to those presbyters who have ruled well, but *especially* to such as 'labour in word and doctrine' (1 Tim. v. 17), as though one holding this office might decline the work of instruction. In the other, he closes the list of qualifications with the requirement that the Bishop (or presbyter) hold fast the faithful word in accordance with the apostolic teaching 'that he may be able both to exhort in the healthy doctrine and to confute gainsayers,' alleging as a reason the pernicious activity and growing numbers of the false teachers. Nevertheless there is no ground for supposing that the work of teaching and the work of governing pertained to separate members of the presbyteral college. As each had his special gift, so would he devote himself more or less exclusively to the one or the other of these sacred functions" (Lightfoot on *Philipp.* p. 192). 3. *The work of visiting the sick* appears in Jas. v. 14 as assigned to the elders of the Church. There indeed it is connected with the practice of anointing as a means of healing, but this office of Christian sympathy would not, we may believe, be confined to the exercise of the extraordinary χαρίσματα ἰαμάτων, and it is probably to such "visitation of the sick" that we are to refer the ἀντιλαμβάνεσθαι τῶν ἀσθενούντων of Acts xx. 35, and the ἀντιλήψεις of 1 Cor. xii. 28. 4. Among these acts of charity that of *receiving strangers* occupied a conspicuous place (1 Tim. iii. 2; Tit. i. 8). The Bishop-elder's house was to be the house of the Christian who arrived in a strange city, and found himself without a friend. 5. Of the part taken by them in the liturgical meetings of the Church we have no distinct evidence. Reasoning from the language of 1 Cor. x. xii., and from the practices of the post-apostolic age, we may believe that they would preside at such meetings, and that it would belong to them to bless and to give thanks when the Church met to break bread.

The mode in which these officers of the Church were supported or remunerated varied probably in different cities. At Miletus St. Paul exhorts the elders of the Church to follow his example and work for their own livelihood (Acts xx. 34). In 1 Cor. ix. 14, and Gal. vi. 6, he asserts the right of the ministers of the Church to be supported by it. In 1 Tim. v. 17 he gives a special application of the principle in the assignment of a double allowance (τιμή certainly includes "recompense," cp. Acts xxviii. 10; and see Ellicott and Huther in loco) to those who have been conspicuous for their activity.

Collectively at Jerusalem, and probably in other Churches, the body of Bishop-elders took part in deliberations (Acts xv. 6–22, xxi. 18), addressed other Churches (xv. 23, where, however, the true reading is οἱ ἀπόστολοι καὶ οἱ πρεσβύτεροι ἀδελφοί), and were joined with the Apostles in the work of ordaining by the laying on of hands (1 Tim. iv. 14 compared with 2 Tim. i. 6). But the office of ordaining others is never entrusted to Bishop-elders by themselves. There is not a word about it in St. Paul's address to the Ephesian elders at Miletus; and from the fact that the Apostle sent Timothy as his delegate and representative to the already organized Church of Ephesus, it may fairly be argued that the ἐπίσκοποι of the N. T. had not ordinarily this power committed to them. If the presbyters were self-sufficient for their own government or their own propagation, it is difficult if not impossible to understand why Timothy should have been sent to Ephesus to exercise these functions, and thus set aside and override their authority (cp. Bp. Charles Wordsworth's *Remarks on Dr. Lightfoot's Essay*, p. 36). It lay in the necessities of any organized society that such a body of men should be subject to a power higher than their own, whether vested in one chosen by themselves or deriving his authority from some external source; and we find accordingly that it belonged to the delegate of an Apostle, and *à fortiori* to the Apostle himself, to receive accusations against them, to hear evidence, to admonish where there was hope of amendment, to depose where this proved unavailing (1 Tim. v. 1, 19; Titus iii. 10).

III. It is clear from what has been said that episcopal functions in the modern sense of the words, as implying a special superintendence over the ministers of the Church with powers of ordaining others, belonged only to the Apostles, and to those whom they invested with their authority. The name of Apostle was not, however, limited to the twelve. It was claimed by St. Paul for himself (1 Cor. ix. 1); it is used by him of others (2 Cor. viii. 23; Philip. ii. 25, and perhaps Rom. xvi. 7: see, however, Dr. Gifford's note in the *Speaker's Commentary* in loco). It is clear that a process of change must

have been at work between the date of the latest of the Pastoral Epistles and the letters of Ignatius, leading not so much to an altered organization as to a modification of the original terminology, and a *localization* of the higher office. The name of Apostle is looked on in the latter as belonging to the past, a title of honour which their successors could not claim. [It is, however, still found in the Διδαχὴ τῶν δώδεκα ἀποστόλων, but apparently as the title of itinerant rather than permanently localized ministers (c. xi.).] That of Bishop rises in its significance and takes the place left vacant. The dangers by which the Church was threatened made the exercise of the authority which was thus transmitted more necessary. The permanent superintendence of the Bishop over a given district, as contrasted with the less settled rule of the travelling apostle, would tend to its development. According to one view which has much in its favour, the Revelation of St. John presents something like an intermediate stage in this process. The Angels of the Seven Churches are partly addressed as their representatives, partly as individuals ruling them (see Rev. ii. 2, iii. 2–4). The name may belong to the special symbolism of the Apocalypse, or have been introduced like πρεσβύτεροι from the synagogue, and we have no reason for believing it ever to have been in current use as part of the terminology of the Church. But the functions assigned to the Angels are those of the earlier apostolate, of the later episcopate (cp. Trench on the *Epistles to the Seven Churches of Asia*, p. 53, and Archdeacon Lee in the *Speaker's Commentary*, in loco: but against this view see Lightfoot on *Philipp.* p. 197). The abuse of the old title of the highest office by pretenders, as in Rev. ii. 2, may have led to a reaction against its being used at all except for those to whom it belonged κατ' ἐξοχήν. In this, or in some similar way, the constitution of the Church assumed its later form; the Bishops, Presbyters, and Deacons of the Ignatian Epistles took the place of the Apostles, Bishops or elders, and Deacons of the New Testament. The full history of the change, however, belongs rather to the subject of the antiquities of the early Church than to the province of Biblical exegesis. For fuller information on this point, and for the later history of the word, see BISHOP in the *Dict. of Christ. Antiq.*; *The Expositor*, 3rd Series, vols. v. and vi.; and Gore, *The Church and the Ministry*.

[E. H. P.] [E. C. S. G.]

BITHIAH (בִּתְיָה [= בַּת יְהוָה, Olshausen, *Lehrb. d. Heb. Sprache*, p. 611], *worshipper*, lit. *daughter*, *of Jehovah*; B. Γελιά, A. Βεθθιά; *Bethia*), an Egyptian princess, "the daughter of Pharaoh," a wife of Mered, a man of the tribe of Judah, mentioned in an obscure passage in the genealogies of that tribe (1 Ch. iv. 17–19). Mered appears to have been a descendant of Caleb the son of Jephunneh, and to have lived in the early days of the occupation of Canaan, as four of his sons are spoken of as founders of towns. The passage in which he is mentioned may be translated thus: "And the sons of Ezrah [were] Jether, and Mered, and Epher, and Jalon: and she bare Miriam, and Shammai, and Ishbah the father of Eshtemoa. And his wife the Jewess [R. V.] bare Jered the father of Gedor, and Heber the father of Soco, and Jekuthiel the father of Zanoah. And these are the sons of Bithiah the daughter of Pharaoh, which Mered took. And the sons of his wife Hodiah [R. V. "the wife of Hodiah"], the sister of Naham, [R. V. "were"] the father of Keilah, whose inhabitants are Garmites, and of Eshtemoa, whose inhabitants are Maachathites" (1 Ch. iv. 17–19). The probable order would be to transpose "And these are the sons of Bithiah," &c., so as to precede "and she bare:" or else the full stop can be omitted at the close of *v.* 18, "which Mered took" (see JEHUDIJAH for the rendering and possible transpositions).

From the mention of the Jewish wife, it is clear that Bithiah was an Egyptian: Pharaoh is therefore the regal title [PHARAOH], not a proper name. We have thus a glimpse of the relations of the Hebrews and Egypt. The peaceable intermarriage of a Pharaoh's daughter with even a powerful Hebrew chief is out of the question. We must rather suppose Bithiah to have been carried captive in a foray. Now it was precisely in the early period of the occupation that Egypt was the prey of foreign Shemite conquest. On the fall of the 19th dynasty, a time of anarchy ensued, and the Syrian "Arisu" ruled the country, which was apparently broken up into several principalities. At such a time an Egyptian princess might easily have been taken captive. If Bithiah were the mother of Miriam, the LXX., however, making Miriam child of Jether, there would be a double confirmation of the view here taken, in the use of an Egyptian name, for long afterwards disused, and the Egyptian non-Semitic precedence of the daughter.

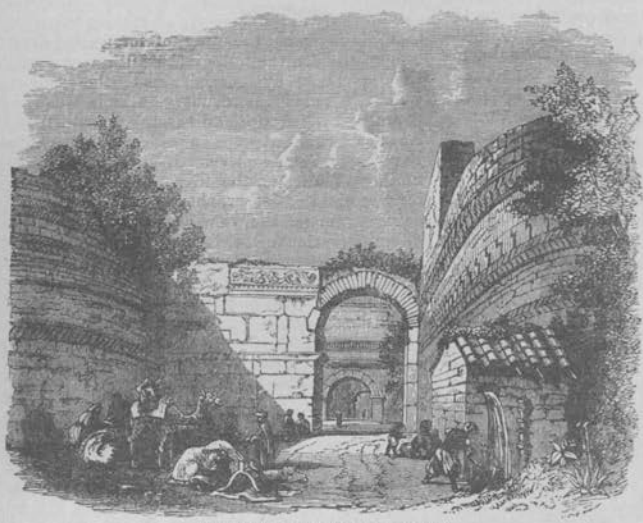
The name Bithiah implies conversion, although Semitic names were prevalent in Egypt at this time, like Bata-'anta, "daughter of (the goddess) Anath," a daughter of Ramses II. of the 19th dynasty. [PUTIEL.] [R. S. P.]

BITH'RON (more accurately "the Bithron," הַבִּתְרוֹן, *the broken or divided place*, from בָּתַר, *to cut up*, Ges.; διὰν τὴν παρατείνουσαν; *omnis Bethhoron*), a place—from the form of the expression, "all the Bithron," doubtless a district—in the Arabah or Jordan valley, on the east side of the river (2 Sam. ii. 29). The spot at which Abner's party crossed the Jordan not being specified, we cannot fix the position of the Bithron, which lay between that ford and Mahanaim. As far as we know, the whole of the country in the *Ghôr* on the other side of the river is of the broken and intersected character indicated by the derivation of the name. If the renderings of the Vulg. and Aquila are correct, they must of course intend another Bethhoron than the well-known one; perhaps *Livias* (Fürst). Bethharam, the conjecture of Thenius, is not probable. Maundeville (*E. T.* p. 180) says that the Jordan "separates the land of Galilee, and the land of Idumea, and the land of Betron." Dr. Robinson suggests, doubtfully (*Phys. Geog.* pp. 63, 79), that *Wâdy 'Ajlûn*, north of the Jabbok, may be Bithron. [G.] [W.]

BITHY'NIA (Βιθυνία; *Bithynia*). This province of Asia Minor, though illustrious in the earlier parts of post-apostolic history, through Pliny's letters and the Council of Nicaea, has

little connexion with the history of the Apostles themselves. It is only mentioned in Acts xvi. 7 and in 1 Pet. i. 1. From the former of these passages it appears that St. Paul, when on his progress from Iconium to Troas, in the course of his second missionary journey, made an attempt to enter Bithynia, but was prevented, either by providential hindrances or by direct Divine intimations. From the latter it is evident that, when St. Peter wrote his First Epistle, there were Christians (probably of Jewish or proselyte origin) in some of the towns of this province, as well as in "Pontus, Galatia, Cappadocia, and Asia."

Bithynia, considered as a Roman province, was on the south-west contiguous to ASIA. On the east its limits underwent great modifications. The province was originally inherited by the Roman republic (B.C. 74) as a legacy from Nicomedes III., the last of an independent line of monarchs, one of whom had invited into Asia



Gate of Nicaea, the capital of Bithynia.

Minor those Gauls who gave the name of GALATIA to the central district of the peninsula. On the death of Mithridates, king of Pontus, B.C. 63, the western part of the Pontic kingdom was added to the province of Bithynia, which again received further accessions on this side under Augustus, A.D. 7. Thus the province is sometimes called "Pontus and Bithynia" in inscriptions; and the language of Pliny's letters is similar. The province of Pontus was not constituted till the reign of Nero [PONTUS]. It is observable that in Acts ii. 9 Pontus is in the enumeration and not Bithynia, and that in 1 Pet. i. 1 both are mentioned. See Marquardt's continuation of Becker's *Röm. Alterthümer*, III. i. p. 146. For a description of the country, which is mountainous, well-wooded, and fertile, see Hamilton's *Researches in Asia Minor*, and cp. Ainsworth in the *Roy. Geog. Jour.* vol. ix. The course of the river Rhyndacus is a marked feature on the south-western frontier of Bithynia, and the snowy range of the Mysian Olympus on the south-west (see *Dict. of Gr. and Rom. Geog.*, art. BITHYNIA). [J. S. H.] [W.]

BITTER HERBS (מְרֹרִים, *merôrim*; πικρίδες; *lactucae agrestes*). The Hebrew word occurs in Ex. xii. 8; Num. ix. 11; and Lam. iii. 15: in the latter passage it is said, "He hath filled me with bitterness, he hath made me drunken [R. V. "sated"] with wormwood." The two other passages refer to the observance of the Passover: the Israelites were commanded to eat the Paschal lamb "with unleavened bread and with bitter herbs."

There can be little doubt that the term *merôrim* is general and includes the various edible kinds of bitter plants, whether cultivated or wild, which the Israelites could with facility obtain in sufficient abundance to supply their numbers either in Egypt, where the first Passover was eaten, or in the deserts of the Peninsula of Sinai, or in Palestine. The Mishna (*Pesachim*, c. 2, § 6) enumerates five kinds of bitter herbs—*chazereth*, *'ulshin*, *thamcah*, *charchabina*, and *maror*—which it was lawful to eat either green or dried. There is great difficulty in identifying the plants which these words respectively denote, but lettuce, endive, chicory, and bugloss are among the five. The reader may see the subject discussed by Bochart (*Hieroz.* i. 691, ed. Rosenmüller), by Carpzovius (*Apparat. Hist. Crit.* p. 402), and by Knobel-Dillmann[2] on Exod. xii. 8. According to the testimony of Forskâl, in Niebuhr's Preface to the *Description de l'Arabie* (p. xliv.), the modern Jews of Arabia and Egypt eat lettuce, or, if this is not at hand, bugloss[a] with the Paschal lamb. The Greek word πικρὶς is identified by Sprengel (*Hist. Rei Herb.* i. 100) with the *Helminthia* [rather, *Picris*] *Echioides* (Linn.), Bristly Helminthia (Ox-tongue), a plant belonging to the chicory group. *Helminthia* is merely a modern subdivision of the genus *Picris* of Linnaeus.

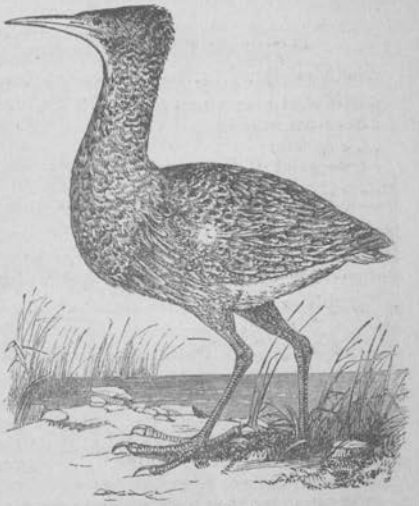
Abenezra in Celsius (*Hierob.* ii. 227) remarks that, according to the observations of a certain learned Spaniard, the ancient Egyptians always used to place different kinds of herbs upon the table, with mustard, and that they dipped morsels of bread into this salad. That the Jews derived this custom of eating herbs with their meat from the Egyptians is extremely probable, for it is easy to see how, on the one hand, the bitter-herb salad should remind the Jews of the bitterness of their bondage (Ex. i. 14), and,

[a] لسان الثور (*lissan etthôr*), which Forskâl (*Flor. Ægypt.* p. lxii.) identifies with *Borago officinalis*.

on the other hand, how it should also bring to their remembrance their merciful deliverance from it. It is curious to observe in connexion with the remarks of Abenezra, the custom—for such it appears to have been—of dipping a morsel of bread into *the* dish (τὸ τρύβλιον) which prevailed in our Lord's time (Matt. xxvi. 23; John xiii. 26. See notes in *Speaker's Comm.*). May not τὸ τρύβλιον be the salad dish of bitter herbs, and τὸ ψώμιον, the morsel of bread of which Abenezra speaks?[b]

The *merôrim* may well be understood to denote various sorts of bitter plants, such particularly as belong to the *Cruciferae*, as some of the bitter cresses, or to the chicory group of the *Compositae*, the hawkweeds, and sow-thistles, and wild lettuces which grow abundantly in the Peninsula of Sinai, in Palestine, and in Egypt. There are not many of these two great families of plants which are not eaten as salads by the Orientals. The artichoke is eaten raw, as are the hearts of all the other larger wild thistles. Many of the cresses, the stocks (*Matthiola*), and Elecampane (*Inula*), are used as salads by the Arabs (Decaisne, *Florula Sinaica* in *Annal. des Sciences Natur.* 1834; Strand, *Flor. Palaest.* No. 445, &c.). [W. H.] [H. B. T.]

BITTERN (קִפֹּד, *kippôd*; ἐχῖνος, πελεκάν, Aq.; κύκνος, Theod. in Zeph. ii. 14; *ericius*). The Hebrew word has been the subject of various interpretations, the old Versions generally sanctioning the "hedgehog" or "porcupine;" in which rendering they have been followed by Bochart (*Hieroz.* ii. 454), Shaw (*Trav.* i. 321, 8vo ed.), Lowth (Isaiah xiv. 23), the R.V., and others. The grounds for this rendering are due to the similarity between the Hebrew word and the Arabic name of the porcupine and hedgehog (قنفذ, *kunfud*); but on an examination of the passages where the name occurs, it will be seen at once that this rendering is inadmissible. The word occurs in Is. xiv. 23, where of Babylon the Lord says, "I will make it a possession for the *kippôd* and pools of water;"—in Is. xxxiv. 11, of the land of Idumea it is said, "The *kâath* and the *kippôd* shall possess it;" and again in Zeph. ii. 14, "I will make Nineveh a desolation and dry like a wilderness; flocks shall lie down in the midst of her; . . . both the *kâath* and the *kippôd* shall lodge in the chapiters [R.V.] thereof; *their* voice shall sing in the windows." The former passage would seem to point to some solitude-loving aquatic bird, which might well be represented by the *bittern*, as the A. V. has it; but the passage in Zephaniah which speaks of Nineveh being made "dry like a wilderness," does not at first sight appear to be so strictly suited to this rendering. Gesenius, Lee, Parkhurst, Winer, MV.[11], all give "hedgehog" or "porcupine" as the representative of the Hebrew word; but neither of these two animals ever lodges on the chapiters of columns, nor is it their nature to frequent pools of water. Not less unhappy is the reading of the Arabic Version, *el-houbara*, a species of bustard—the *Houbara undulata* (see *Ibis*, i. 284), which is a dweller in dry open plains. We are inclined to believe that the A. V. is correct, and that the bittern is the bird denoted by the original word; as to the objection alluded to above that this bird is a lover of marshes and pools, and would not therefore be found in a locality which is "dry like a wilderness," a little reflection will convince the reader that the difficulty is more apparent than real. Nineveh might be made "dry like a wilderness," but the bittern would find an abode in the Tigris which flows through the plain of Mesopotamia; as to the bittern perching on the chapiters of ruined columns, there is no difficulty in the expression, for the columns would be prostrate, and lying in a



Botaurus stellaris.

thick tangle of nettles and rushes, where the bittern would, according to its observed habit, conceal itself during the day, standing motionless on a stem or tuft. There are many reedy marshes by the Tigris near Nineveh. In these, when the city was desolate, the bittern would take up its abode, and its loud booming would be heard by night among the ruins. As a matter of fact the bittern is very plentiful throughout the swamps, both of the Tigris and the Euphrates, as well as in all the marshes of Syria; and its strange booming note, which we have often heard disturbing the stillness of the night, gives a sense of desolation, only surpassed by the wail of the hyaena. In all countries where it is found, the peasants have a superstitious dread of its unearthly boom, and the bird itself is a somewhat mysterious, peculiar creature, rarely seen by day, and, when found, looking exactly like a stump of withered rushes, standing perfectly erect, with its long beak pointing directly upwards.

The Bittern, *Botaurus stellaris*, was formerly familiar in the fen districts of England, but now

[b] Our custom of eating salad mixtures is in all probability derived from the Jews. "Why do we pour over our lettuces a mixture of oil, vinegar, and mustard? The practice began in Judaea, where, in order to render palatable the bitter herbs eaten with the paschal lamb, it was usual, says Moses Kotsinses, to sprinkle over them a thick sauce called Karoseth, which was composed of the oil drawn from dates or from pressed raisin-kernels, of vinegar and mustard" (see "Extract from the Portfolio of a Man of Letters," *Monthly Magazine*, 1810, p. 148).

only an occasional straggler is ever found, for drainage and cultivation have banished it. It has a most extensive range, being found in the whole of Europe, Africa, and Asia. Two other species are known, both closely resembling it: one in America, the other in Australasia and New Zealand. It belongs to the heron family, Ardeidae; but, unlike its congeners, it is not gregarious, eschewing the society of even its own species. [H. B. T.]

BITUMEN. [SLIME.]

BIZJO'TH-JAH (בִּיזְיוֹתְיָה; BA. *αἱ κῶμαι αὐτῶν, i.e.* בְּנוֹתֶיהָ, which is no doubt right, Hollenberg [*Char. d. Alex. Uebers. d. B. Josua*, p. 14], Dillmann and Driver; see Neh. xi. 2; *Baziothia*; R. V. *Biziothiah*), a town in the south of Judah named with BEERSHEBA and BAALAH (Josh. xv. 28). No mention or identification of it is found elsewhere. [G.] [W.]

BIZ'THA (בִּזְתָא; Βαζάν, A. Βαζεά; *Bazatha*), the second of the seven eunuchs of king Ahasuerus' harem (Esth. i. 10). The name is Persian, possibly بستہ, *beste*, a word referring to his condition as a eunuch (Ges., MV.[11] Cp. Bertheau-Ryssel in loco). [F.]

BLACK. [COLOURS.]

BLAINS (אֲבַעְבֻּעֹת; *φλυκτίδες* [Ex. ix. 9], *ἀναζέουσαι ἔν τε τοῖς ἀνθρώποις καὶ ἐν τοῖς τετράποσι*; also שְׁחִין, *pustula ardens*), violent ulcerous inflammations (from בּוּעַ, "to boil up"). Blains were the sixth plague of Egypt, and are called in Deut. xxviii. 27, 35, "the botch of Egypt" (שְׁחִין מִצְרַיִם; cp. Job ii. 7, שְׁחִין רָע). The disease intended seems to have been the *ψωρὰ ἀγρία* or black leprosy, a fearful kind of elephantiasis (cp. Plin. xxvi. 5). It must have come with dreadful intensity on the magicians whose art it baffled, and whose scrupulous cleanliness (Herod. ii. 36) it rendered nugatory: so that they were unable to stand in the presence of Moses because of the boils.

Other names for purulent and leprous eruptions are בַּהֶרֶת שְׂאֵת (Morphea alba), סַפַּחַת (Morphea nigra), and the more harmless scab, מִסְפַּחַת, Lev. xiii. *passim* (Jahn, *Arch. Bibl.* § 189). [F. W. F.]

BLASPHEMY (נְאָצוֹת, נְדוּפִים; *βλασφημία*), in its technical English sense, signifies the speaking evil of God (נָקַב שֵׁם יְהוָה), and in this sense it is found in Ps. lxxiv. 18, Is. lii. 5, Rom. ii. 24, &c. But according to its derivation (*βλάπτω φημὴ* quasi *βλαψιφ.*) it may mean any species of calumny and abuse (or even an unlucky word, Eurip. *Ion*, 1187): see 1 K. xxi. 10; Acts xviii. 6; Jude 9, &c. Hence in the LXX. it is used to render בָּרַךְ, Job ii. 5; גִּדֻּפָה, 2 K. xix. 6; הוֹכִיחַ, 2 K. xix. 4, and לָעַג, Hos. vii. 16, so that it means "reproach," "derision," &c.: and it has even a wider use, as 2 Sam. xii. 14, where it means "to despise Judaism," and 1 Macc. ii. 6, where *βλασφημία*=idolatry. In Ecclus. iii. 18 we have *ὡς βλάσφημος ὁ ἐγκαταλιπὼν πατέρα*, where it is equivalent to *κατηραμένος* (Schleusner, *Thesaur.* s. v.).

Blasphemy was punished with stoning, which was inflicted on the son of Shelomith (Lev. xxiv. 11. Cp. also 1 K. xxi. 13). On this charge both our Lord (Matt. xxvi. 65) and St. Stephen (Acts vi. 11, vii. 57, &c.) were condemned to death by the Jews. From Lev. xxiv. 16, wrongly understood, arose the singular superstition about never even *pronouncing* the name of Jehovah. Ex. xxii. 28, "Thou shalt not revile the gods, nor curse the ruler of thy people," is by many not referred to blasphemy in the strict sense, since "Elohim" is there used of magistrates, &c.; but the majority of modern commentators prefer with R. V. to render "thou shalt not revile God," &c. (see *Speaker's Comm.* in loco; *QPB.*[3] note on Exod: xxi. 6), and rightly understand the passage as a protest against blasphemy.

The Jews, misapplying Ex. xxiii. 13, "Make no mention of the name of other gods," seemed to think themselves bound to give nicknames to the heathen deities; hence their use of Bosheth for Baal, Bethaven for Bethel, Beelzebul for Beelzebub (Hos. iv. 5, &c.). It is not strange that this "contumelia numinum" (Plin. xiii. 9), joined to their zealous proselytism, made them so deeply unpopular among the nations of antiquity (Winer, s. v. *Gotteslästerung*). When a person heard blasphemy he laid his hand on the head of the offender, to symbolise his sole responsibility for the guilt, and, rising on his feet, tore his robe, which might never again be mended. On the mystical reasons for these observances, see Lightfoot, *Hor. Hebr. ad* Matt. xxvi. 65.

It only remains to speak of "the blasphemy against the Holy Ghost," which has been so fruitful a theme for speculation and controversy (Matt. xii, 32; Mark iii. 28). It consisted in attributing to the power of Satan those unquestionable miracles which Jesus performed by "the finger of God," and the power of the Holy Spirit; nor have we any safe ground for *extending* it to include all sorts of *willing* (as distinguished from *wilful*) offences, besides this one limited and special sin. The expression "it shall not be forgiven him, neither in this world," &c., is a direct application of a Jewish phrase. According to the Jewish school notions, "a quo blasphematur nomen Dei, ei non valet poenitentia ad suspendendum judicium, nec dies expiationis ad expiandum, nec plagae ad adstergendum, sed omnes suspendunt judicium, *et mors abstergit.*" Our Lord used the phrase to imply that "blasphemy against the Holy Ghost shall not be forgiven; neither before death, *nor by means of death*" (Lightfoot, *Hor. Hebr.* in loco; Hamburger, *RE.* s. v. *Lästerung*). As there are no tenable grounds for identifying this blasphemy with "the sin unto death," 1 John v. 16, we shall not here enter into the very difficult inquiries to which that expression leads.

For other uses of the word in the N. T. see Matt. ix. 3, xv. 19; Acts xxvi. 11; Eph. iv. 31; Col. iii. 8; 1 Tim. i. 13, vi. 4; 2 Pet. ii. 11. See Suicer, *Thes.* s. v.; and for Jewish customs, Hamburger, *RE.* s. v. *Lästerung*. [F. W. F.]

BLASTUS (Βλάστος; *Blastus*), the chamberlain (*ὁ ἐπὶ τοῦ κοιτῶνος*) of Herod Agrippa I.,

mentioned in Acts xii. 20, as having been persuaded by the Tyrians and Sidonians to gain them a hearing from the king. His position and influence corresponded to those of the "praepositi sacro cubiculo" at Rome (see Gibbon, *Decl. and Fall*, xvii.). Chamberlains were generally eunuchs [EUNUCH]. [E. R. B.]

BLESSING. [SALUTATION.]

BLINDING. [PUNISHMENTS.]

BLINDNESS (עִוָּרֹן, עִוָּרֶת, from the root עוּר, *to bore*) is extremely common among Orientals from many causes: *e.g.* the quantities of dust and sand pulverised by the sun's intense heat; the perpetual glare of light; the attacks of flies which convey the contagion of ophthalmia; the contrast of the heat with the cold sea-air on the coast where blindness is specially prevalent; the dews at night while they sleep on the roofs; small-pox, old age, &c.; and perhaps more than all the Mahommedan fatalism, which leads to a neglect of the proper remedies in time. One traveller mentions 4,000 blind men in Cairo, and Volney reckons that 1 in every 5 were blind, besides others with sore eyes (i. 86. Cp. Trench, *On the Miracles*. ch. 8 [on Matt. ix. 27, &c.]). *Ludd*, the ancient Lydda, and *Ramleh*, enjoy a fearful notoriety for the number of blind persons they contain. The common saying is that in *Ludd* every man is either blind or has but one eye. Jaffa is said to contain 500 blind out of a population of 5,000 at most. There is an asylum for the blind in Cairo (which contains 300), and their conduct is often turbulent and fanatic (Lane, i. 39, 292). Blind beggars figure repeatedly in the N. T. (Matt. xii. 22, &c.), and "opening the eyes of the blind" is mentioned in prophecy as a peculiar attribute of the Messiah (Is. xxix. 18, &c.). The Jews were specially charged to treat the blind with compassion and care (Lev. xix. 4; Deut. xxvii. 18).

Penal and miraculous blindness is several times mentioned in the Bible (סַנְוֵרִים, Gen. xix. 11, ἀορασία, LXX.; 2 K. vi. 18–22; Acts ix. 9). In the last passage some have attempted (on the ground of St. Luke's profession as a physician) to attach a technical meaning to ἀχλὺς and σκότος (Jahn, *Arch. Bibl.* § 201), viz. a spot or "thin tunicle over the cornea," which vanishes naturally after a time: for which fact Winer (s. v. *Blindheit*) quotes Hippocr. (*Praedict.* ii. 215), ἀχλυὲς . . . ἐκλεαίνονται καὶ ἀφανίζονται ἢν μὴ τρῶμά τι ἐπιγένηται ἐν τούτῳ τῷ χωρίῳ. But this does not remove the supernatural character of the infliction. In the same way analogies are quoted for the use of saliva (Matt. viii. 23, &c.) and of fish-gall in the case of the Tobias (cp. Plin. *H. N.* xxxii. 24); but, whatever may be thought of the latter instance, it is very obvious that in the former the saliva was no more instrumental in the cure than the touch alone would have been (Trench, *On the Miracles*, ad loc.).

Blindness wilfully inflicted for political or other purposes was common in the East, and is alluded to in Scripture (Num. xvi. 14; 1 Sam. xi. 2; Jer. xxii. 12). [F. W. F.]

BLOOD (דָּם). To blood is ascribed in Scripture the mysterious sacredness which belongs to life, and God reserves it to Himself when allowing man the dominion over and the use of the lower animals for food, &c. (as regards, however, the eating of blood, see FOOD). Thus reserved, it acquires a double power: (1) that of sacrificial atonement, in which it had a wide recognition in the heathen world; and (2) that of becoming a curse, when wantonly shed, *e.g.* even that of beast or fowl by the huntsman, unless duly expiated, *e.g.* by burial (Gen. ix. 4; Lev. vii. 26, xvii. 11–13). As regards (1), the blood of sacrifices was caught by the Jewish priest from the neck of the victim in a basin, then sprinkled seven times (in the case of birds at once squeezed out) on the altar, *i.e.* on its horns, its base, or its four corners, or on its side above or below a line running round it, or on the mercy-seat, according to the quality and purpose of the offering: but that of the Passover on the lintel and door-posts (Exod. xii.; Lev. iv. 5–7, xvi. 14–19; Ugolini, *Thes.* vol. x. and xiii.). There was a drain from the Temple into the brook Cedron to carry off the blood (Maimon. *apud* Cramer, *de Arâ Exter.*; Ugolini, viii.). In regard to (2), it sufficed to pour the animal's blood on the earth, or to bury it, as a solemn rendering of the life to God; in case of human bloodshed a mysterious connexion is observable between the curse of blood and the earth or land on which it is shed, which becomes polluted by it, and as it were animated with a curse upon the blood-shedder; and the proper expiation is the blood of that shedder, which every one had thus an interest in seeking, and was bound to seek (Gen. iv. 10, 11, ix. 4–6; Num. xxxv. 33; Ps. cvi. 38; see BLOOD, REVENGER OF). Thus a domestic animal causing human death appears to share a homicidal curse (Ex. xxi. 28), a development in fact of the Covenant to Noah (Gen. ix. 5). In the case of a dead body found, and the death not accounted for, the guilt of blood attached to the nearest city, to be ascertained by measurement, until freed by prescribed rites of expiation (Deut. xxi. 1–9). The guilt of murder is one for which "satisfaction" was forbidden (Num. xxxv. 31; cf. Ps. ix. 12). The prohibition against murder and against eating blood and strangled animals formed two of the seven Noachic precepts, enforced on all proselytes of the gate, which was doubtless a further reason for the retention of the two latter in Acts xv. 20, 29. [H. H.]

BLOOD, ISSUE OF (זוֹב דָּם; זוֹב, Rabbin.; *fluxu laborans*). The term is in Scripture applied only to the case of women under menstruation or menorrhagia (Lev. xv. 19–30; Matt. ix. 20, γυνὴ αἱμορροοῦσα; Mark v. 25 and Luke viii. 43, οὖσα ἐν ῥύσει αἵματος). The latter caused a permanent legal uncleanness, the former a temporary one, mostly for seven days; after which she was to be purified by the customary offering. This latter is a prolonged and exaggerated condition of the former, and was a most intractable complaint, baffling the best physicians, until recent research threw light upon it. The "bloody flux" (δυσεντερία) in Acts xxviii. 8 (on the accuracy exhibited by St. Paul in the use of this term, see note in *Speaker's Comm.*), where the patient is of the male sex, represents the normal form of dysentery, in which the mucous membrane of the

rectum is shed off, together with a constant voiding of blood, fever, and prostration (see Bartholini, *de Morbis Biblicis*, 17). [H. H.]

BLOOD, REVENGER OF (גֹּאֵל; *Goël*). It was, and even still is, a common practice among nations of patriarchal habits, that the nearest of kin should, as a matter of duty, avenge the death of a murdered relative. The early impressions and practice on this subject may be gathered from writings of a different though very early age and of different countries (Gen. xxxiv. 30; Hom. *Il.* xxiii. 84, 88, xxiv. 480, 482; *Od.* xv. 270, 276; Müller on Aeschyl. *Eum.* c. ii. A. & B.). Compensation for murder is allowed by the Koran, and he who transgresses after this by killing the murderer shall suffer a grievous punishment (Sale, *Koran*, ii. 21, and xvii. 230; Rodwell, pp. 167, 388). Among the Bedouins and other Arab tribes, should the offer of blood-money be refused, the "Thar," or law of blood, comes into operation, and any person within the *fifth* degree of blood from the homicide may be legally killed by any one within the same degree of consanguinity to the victim. Frequently the homicide will wander from tent to tent over the Desert, or even rove through the towns and villages on its borders, with a chain round his neck and in rags, begging contributions from the charitable to pay the apportioned blood-money. Three days and four hours are allowed to the persons included within the "Thar," for escape. The right to blood-revenge is never lost, except as annulled by compensation: it descends to the latest generation. Similar customs with local distinctions are found in Persia, Abyssinia, among the Druses and Circassians (Niebuhr, *Descr. de l'Arabie*, pp. 28, 30, *Voyage*, ii. 350; Burckhardt, *Notes on the Bedouins*, i. 148–157, *Travels in Arabia*, i. 409, ii. 330, *Syria*, pp. 113, 540, 643; Vambéry, *Travels*, p. 108; Arnold, *Persia*, ii. 183; Layard, *Nin. & Bab.* pp. 305–307; Chardin, *Voyages*, vi. 107–112; W. R. Smith, *Religion of the Semites*, i. See Index, s. v. Blood-revenge). Money-compensations for homicide are appointed by the Hindú law (Sir W. Jones, vol. iii. chap. vii.), and Tacitus remarks that among the German nations "luitur homicidium certo armentorum ac pecorum numero" (*Germ.* 21). By the Anglo-Saxon law also money-compensation for homicide, *wer-gild*, was sanctioned on a scale proportioned to the rank of the murdered person (Lappenberg, ii. 336; Lingard, i. 411, 414).

The spirit of all legislation on the subject has probably been to restrain the licence of punishment assumed by relatives, and to limit the duration of feuds. Burckhardt, as quoted above, considers the custom beneficial, as tending to diminish tribal warfare among the Arabs. The law of Moses was very precise in its directions on the subject of Retaliation.

1. The wilful murderer was to be put to death without permission of compensation. The nearest relative of the deceased became the authorized avenger of blood (גֹּאֵל, *the redeemer*, or *avenger*, as next of kin, Gesen. *s. v.* p. 254, who rejects the opinion of Michaelis, understanding by it "polluted," *i.e.* till the murder was avenged; ὁ ἀγχιστεύων, LXX., *propinquus occisi*, Vulg., Num. xxxv. 19), and was bound to execute retaliation himself if it lay in his power. The king, however, in later times appears to have had the power of restraining this licence. The shedder of blood was thus regarded as impious and polluted (Num. xxxv. 16–31; Deut. xix. 11; 2 Sam. xiv. 7, 11, xvi. 8, and iii. 29, with 1 K. ii. 33, 37; 1 Ch. xxiv. 22–25).

2. The law of retaliation was not to extend beyond the immediate offender (Deut. xxiv. 16; 2 K. xiv. 6; 2 Ch. xxv. 4; Jer. xxxi. 29, 30; Ezek. xviii. 20; Joseph. *Ant.* iv. 8, § 39).

3. The involuntary shedder of blood was permitted to take flight to one of six Levitical cities, specially appointed out of the forty-eight as cities of refuge, three on each side of the Jordan (Num. xxxv. 22, 23; Deut. xix. 4–6). The cities were Kedesh, in Mount Naphtali; Shechem, in Mount Ephraim; Hebron, in the hill-country of Judah. On the E. side of Jordan, Bezer, in Reuben; Ramoth, in Gad; Golan, in Manasseh (Josh. xx. 7, 8). The elders of the city of refuge were to hear his case and protect him till he could be tried before the authorities of his own city. If the act were then decided to have been involuntary, he was taken back to the city of refuge, round which an area with a radius of 2,000 cubits (or with the suburbs 3,000, Patrick) was assigned as the limit of protection, and was to remain there in safety till the death of the high-priest for the time being. Beyond the limit of the city of refuge the revenger might slay him, but after the high-priest's death he might return to his home with impunity (Num. xxxv. 25, 28; Josh. xx. 4, 6). The roads to the cities were to be kept open (Deut. xix. 3).

To these particulars the Talmudists add, among others of an absurd kind, the following:—At the cross-roads posts were erected bearing the word מקלט, *refuge*, to direct the fugitive. All facilities of water and situation were provided in the cities: no implements of war or chase were allowed there. The mothers of high-priests used to send presents to the detained persons to prevent their wishing for the high-priest's death. If the fugitive died before the high-priest, his bones were sent home after the high-priest's death (P. Fagius in Targ. Onk. Ap. Rittershus. *de Jure Asyli, Crit. Sacr.* viii. p. 159; Lightfoot, *Cent. Chorogr.* c. 50, *Op.* ii. p. 208).

4. If a person were found dead, the elders of the nearest city were to meet in a rough valley untouched by the plough, and, washing their hands over a beheaded heifer, protest their innocence of the deed, and deprecate the anger of the Almighty (Deut. xxi. 1–9). [H. W. P.]

BOANE'RGES (Βοανηργές, not Βοανεργὲς as Textus Receptus; Vulg. *Boanerges*). The etymology is obscure. That Βοανη represents בְּנֵי (for בְּנֵי) is rejected by Kautzsch (*Gramm. d. Bibl.-Aram.* § 5, 2 (a)) as "monstrous," and he thinks no better of connecting ργες with רִנַּשׁ (Aram.) or רַעַשׁ (Heb.); neither mean "thunder," but "tumult," "shaking." Kautzsch himself prefers the root רנן. The true reading Βοανηργὲς is important, as pointing to the division Βοανη-ργες. The intention of the name was probably to mark the personal character of the two

Apostles. Westcott (*Gospel of St. John*, Introd. p. xxxii.) justifies the name as regards St. John (1) by the sayings ascribed to him (Luke ix. 49, 54); (2) by the general tone of the Apocalypse; (3) by the stern denunciations of doctrinal error in St. John's Epistles. Ebrard (in Herzog,[2] art. "John the Apostle") points out in this connexion the mistake of conceiving St. John as a sentimental, emotional character. Suicer (*s. v.* βροντή) collects passages from nearly all the great Fathers, which explain the name to refer merely to the office of the sons of Zebedee as Apostles and Evangelists; they thundered forth the Gospel. This does not appear an adequate explanation. Archbp. Trench notices the coincidence that thunder is not mentioned in the N. T. except in the writings of St. John. See whole art. Trench, *Studies in the Gospels*, "Sons of Thunder." [E. R. B.]

BOAR, WILD (חֲזִיר, *khazir*; σῦς; *asser*; Arab. خنزير, *khanzir*; *Sus scrofa*, Linn.), occurs only once in the A. V., Ps. lxxx. 13, "The boar out of the wood doth waste it," but the Hebrew word is frequently used, and rendered in A. V. "swine" when referring to the domesticated animal. The passage quoted is the only reference to the wild boar in Scripture. In the N. T. all the allusions are to the domesticated animal, invariably termed χοῖρος. It must not however be supposed that the wild boar was rare in Bible lands, for throughout the East it is and always has been plentiful; the configuration of the country and the many wooded glens and gorges, as well as the marshes and reeds of the Jordan and its tributaries, affording it secure lairs. From the thickets and canebrakes of the Jordan, it is even now impossible for either man or dog to dislodge the wild boar. But during the annual overflowing of the river, a little before harvest time, they are driven out of their submerged haunts, and spread themselves over the upper country, concealing themselves in woods or thickets by day, and committing fearful devastation among the crops at night, trampling and destroying far more than they eat. In the neighbourhood of Jericho, the husbandmen at this period have to keep watch by night, over both their barley and especially their root crops. The presence of the marauders can always be detected by the crashing noise they make in forcing their way through the thickets, when the guards fire, directed by the sound. In a single night a party of wild boars will uproot a whole field, and destroy the husbandman's hopes for the year. Nor is it only in and near the Jordan Valley that the boar is destructive. Even on the slopes of Hermon, where the vine is largely cultivated, the wild boar commits great ravages among the vines, devouring not only the grapes, but the young shoots; and yet contriving effectively to conceal himself during the day. In the downs of Southern Philistia and Beersheba, it is equally common, ploughing up the plains in every direction for the roots of the asphodels, irises, and crocuses which there abound, and which form its sole subsistence. In the regions east of Jordan, where men are few and boars are many, they scarcely take the trouble to conceal themselves in the daytime. On one of the sculptures of Kouyunjik, a wild sow is depicted with nine young ones in a cane-brake (Layard, *Nineveh and Babylon*, p. 109, Pl. 12, 2nd Series, Mon.).

The wild boar, *Sus scrofa*, is a pachydermatous animal, family *Suina*. It has an immense geographical range, extending throughout the whole continental old world, except South Africa, irrespective of climate. The Indian boar has by some been distinguished as *Sus Indicus*, having a longer and more pointed head, and small and pointed ears. It is rather smaller than the West Asiatic hog, which is quite as large as, and more active than, the German race. In all the varieties, the young are very prettily marked with zebra-like stripes. Other species are found in Africa and South-Eastern Asia and its islands, and many extinct, among the fossils of the later Tertiaries. [H. B. T.]

BO'AZ (בֹּעַז, Ges. connects this with an Arabic word = *sprightliness, alacrity*; B. Βόος, A. [sometimes] Βοόζ; *Booz*). **1.** A wealthy Bethlehemite, kinsman to Elimelech, the husband of Naomi. Finding that the kinsman of Ruth, who stood in a still nearer relation than himself, was unwilling to perform the office of גֹּאֵל, he had those obligations publicly transferred with the usual ceremonies to his own discharge; and hence it became his duty by the "levirate law" to marry Ruth (although it is hinted, Ruth iii. 10, that he was much her senior, and indeed this fact is evident whatever system of chronology we adopt), and to redeem the estates of her deceased husband Mahlon (iv. 1 ff.; Jahn, *Arch. Bibl.* § 157. See notes in *Speaker's Comm.* on Ruth iv., and consult Riehm, *HWB.* s. n. *Ruth*). He gladly undertook these responsibilities, and their happy union was blessed by the birth of Obed, from whom in a direct line our Lord was descended. No objection seems to have arisen on the score of Ruth's Moabitish birth; a fact which has some bearing on the date of the narrative (cp. Ezra ix. 1 sq.). [BETHLEHEM.]

Boaz is mentioned in the genealogy (Matt. i. 5), but there is great difficulty in assigning his date. The genealogy in Ruth (iv. 18–22; see notes in *Speaker's Comm.*) only allows 10 generations for 850 years, and only 4 for the 450 years between Salmon and David, if (as is almost certain from St. Matt. and from Jewish tradition) the Rahab mentioned is Rahab the harlot. If Boaz be identical with the judge Ibzan [IBZAN], as is stated with some shadow of probability by the Jerusalem Talmud and various Rabbis, several generations must be inserted. Dr. Kennicott, from the difference in form between Salmah and Salmon (Ruth v. 20, 21), supposes that by mistake two different men were identified (*Dissert.* i. 543); but we want at least *three* generations, and this supposition gives us only one. Mill quotes from Nicolas Syranus the theory, "dicunt majores nostri, et bene quod videtur, quod *tres fuerint Booz sibi succedentes;* in Mt. i. isti tres sub uno nomine comprehenduntur." Even if we shorten the period of the Judges to 240 years, we must suppose that Boaz was the youngest son of Salmon, and that he did not marry till the age of 65 (Dr. Mill, *On the Genealogies;* Lord A. Hervey, *Id.* p. 262, &c.). The difficulties in con-

nexion with this genealogy have led some critics to consider it a mere excerpt from 2 Ch. ii., and inserted in the original text by an unknown writer in the Greek period (Reuss, *Die Gesch. d. heilig. Schriften A. T.*, p. 298; Oettli in Strack u. Zöckler's *Kgf. Komm.*, Ruth. Einleit. § 4). This opinion is purely conjectural.

2. The name of one of Solomon's brazen pillars erected in the Temple porch. [JACHIN.] It stood on the left, and was 17½ cubits high (1 K. vii. 15, 21 [LXX. *v.* 7, B. Βαλάζ, A. Βόος]; 2 Ch. iii. 15, 17, BA. Ἰσχύς; Jer. lii. 21). It was hollow and surmounted by a chapiter, 5 cubits high, ornamented with network and 100 pomegranates. The apparent discrepancies in stating the height of it, arise from the including and excluding of the ornament which united the shaft to the chapiter, &c. [F. W. F.]

BOC'CAS (ὁ Βοκκάς; *Boccus*), a priest in the line of Esdras (1 Esd. viii. 2). [BUKKI; BORITH.]

BO'CHERU (בְּכֹרִי, with the termination *-u* sometimes found in proper names; cp. Gashmu "the Arabian" [Neh. vi. 1, 6], and see Olshausen, *Lehrb. d. Heb. Sprache*, p. 201; Euting, *Nab. Inschriften*, pp. 90–92: LXX. πρωτότοκος: *Bocru;* 1 Ch. viii. 38, ix. 44), son of Azel, of the descendants of Saul. [BECHER.] [S. R. D.]

BO'CHIM (הַבְּכִים, *the weepers;* ὁ Κλαυθμών, Κλαυθμῶνες; *locus flentium sive lacrymarum*), a place on the west of Jordan, above Gilgal (Judg. ii. 1, 5), so called because the people "wept" there. The LXX. inserts ἐπὶ Βαιθήλ after Bochim in Judg. ii. 1, possibly a tradition that the place of weeping was near Bethel. [G.] [W.]

BO'HAN (בֹּהַן, *thumb;* Βαίων; *Boen*), a Reubenite, after whom a stone was named, possibly to commemorate some achievement in the conquest of Palestine (1 Sam. vii. 12). Its position was on the border of the territories of Benjamin and Judah between Beth-arabah and Beth-hogla on the E., and Adummim and En-shemesh on the W. Its exact situation is unknown (Josh. xv. 6 [see Dillmann² in loco]; xviii. 17, A. Βαάμ). M. Ganneau proposes to identify it with *Hajr el-Asbah*, a large stone, 6 miles S.W. of *'Ain Hajla*, Beth-hogla, which gives its name to the locality. This, however, seems to be too far south for a point on the boundary of Benjamin (*PEF. Mem.* iii. 199). [STONES.] [W.]

BOIL. [MEDICINE.]

BOLSTER. The Hebrew word (מְרַאֲשֹׁת, *mĕra'ăshôth*) so rendered, denotes, like the English, simply a place for the head. Hardy travellers, like Jacob (Gen. xxviii. 11, 18) and Elijah (1 K. xix. 6), sleeping on the bare ground, would make use of a stone for this purpose; and soldiers on the march had probably no softer resting-place (1 Sam. xxvi. 7, 11, 12, 16). Possibly both Saul and Elijah may have used the water-bottle which they carried as a bolster; and if this were the case, David's midnight adventure becomes more conspicuously daring. The "pillow" of goat's hair which Michal's cunning put in the place of the bolster in her husband's bed (1 Sam. xix. 13, 16) was probably, as Ewald suggests, a net or curtain of goat's hair, to protect the sleeper from the mosquitoes (*Gesch.* iii. p. 101, note), like the "canopy" of Holofernes. [W. A. W.]

BOLLED. Ex. ix. 31, "the flax was bolled," rather as in R. V. marg. "was in bloom" (*QPB.*³). The Heb. word גִּבְעֹל is connected by Ges. with גָּבִיעַ, a cup, and so here, a cup or calix of flowers. The record is one of importance as fixing the date of the plague of hail about the middle of February or early in March (see *Speaker's Comm.* on Ex. ix. 31, note; Knobel places it in January. See Dillmann, Exod.² l. c.). [F.]

BONDAGE. [SLAVERY.]

BONNET. [See HEAD-DRESS.] In Old English, as in Scotch to this day, the word "bonnet" was applied to the head-dress of men. Thus in Hall's *Rich. III.*, fol. 9 a: "And after a lytle season puttyng of hys *boneth* he sayde: O Lorde God creator of all thynges, howe muche is this realme of Englande and the people of the same bounden to thy goodnes." And in Shakspere (*Haml.* v. 2):

"Your *bonnet* to his right use: 'tis for the head."

[W. A. W.]

BOOK. [WRITING.]

BOOTHS. [SUCCOTH; TABERNACLES, FEAST OF.]

BOOTY. This consisted of captives of both sexes, cattle, and whatever a captured city might contain, especially metallic treasures. The earliest Biblical record of such a capture is that by Abram in his rescue of Lot, where the king of Sodom offers him the entire plunder, claiming only the rescued captives for himself. This Abram rejects as regards his own share, but stipulates that his confederates shall receive their portion (Gen. xiv. 24). Within the limits of Canaan, no captives were to be made (Deut. xx. 14, 17); beyond those limits, in case of warlike resistance, all the women and children were to be made captives, and the men put to death. So the Israelites anticipate that, if worsted by the Canaanites, they would be put to the sword, and "their wives and children become a prey" (Num. xiv. 3). A special charge was given to destroy the "pictures [R. V. "figured stones"] and images" of the Canaanites, as tending to idolatry (Num. xxxiii. 52). The case of Amalek was a special one, in which Saul was bidden to destroy the cattle. So also was that of the expedition against Arad, in which the people take a vow to destroy the cities, and that of Jericho, on which the curse of God seems to have rested, and the gold and silver &c. of which were viewed as reserved wholly for Him (1 Sam. xv. 2, 3; Num. xxi. 2; Josh. vi. 19). The law of booty —as laid down in the case of Amalek—was, that it should be divided equally between the army who won it and the people of Israel; but of the former one head in every five hundred was reserved to God, and appropriated to the priests, and of the latter one in every fifty was similarly reserved, and appropriated

to the Levites (Num. xxxi. 26–47). The share of the women in the spoil, as enhancing their interest in the victory, is mentioned in several lyric passages, and these point no doubt to well-known custom (Judg. v. 30; 2 Sam. i. 24; Ps. lxviii. 12). As regarded the army, David added a regulation that the baggage-guard should share equally with the troops engaged. The present made by David out of his booty, to the elders of towns in Judah, was an act of grateful courtesy merely, though perhaps suggested by the Law (Num. *l. c.*). So the spoils devoted by him to provide for the Temple must be regarded as a freewill offering (1 Sam. xxx. 24–26; 2 Sam. viii. 11; 1 Ch. xxvi. 27). In the extraordinary victory of Judith, the plunder of the hostile camp is left to the people promiscuously for thirty days, the camp-furniture of Holofernes, with his bed and canopy, being assigned to her as her special share, and by her dedicated (Judith xv. 11; xvi. 19). The name given to the son of Isaiah, "Maher-shalal-hash-baz" (R. V. marg. "the spoil speedeth, the prey hasteth"; see also *QPB.*[3]) is expressive of the havoc to be wrought within a few years upon Damascus and Samaria by the king of Assyria; and the plunder of treasures by the hostile hand is an oft-recurring image of prophecy. Thus the spoiler that was never yet spoiled, and that gathered spoil like eggs from the nest of every nation, aptly portrays the violent career of the Assyrian (Is. viii. 3, 4; x. 14; xxxiii. 1). [H. H.]

BO'OZ (Rec. T. Βοάζ; Westcott and Hort, Βοὲς in Matt., Βοὸς in Luke; *Booz*), Matt. i. 5; Luke iii. 32. [BOAZ.]

BO'RITH (*Borith*), a priest in the line of Esdras (2 Esd. i. 2). The corresponding name is Boccas in 1 Esd. viii. 2, and BUKKI in 1 Ch. vi. 5.

BORROWING. [LOAN.]

BOS'CATH, 2 K. xxii. 1. [BOZKATH.]

BOSOM. See (1) ABRAHAM'S BOSOM; (2) DRESS, 3, (4); (3) MEALS. Cp. also CRUSE (3).

BO'SOR. **1.** B. Βοσόρ; A. Βοσσὸρ in *v.* 26; בֹּצֶר; *Bosor*; a city, both large and fortified, on the east of Jordan in the land of Gilead (Galaad), named with Bozrah (Bosora), Carnaim, and other places in 1 Macc. v. 26, 36. It is now probably *Busr el-Hariri* at the southern edge of the *Lejah*. [G.] [W.]

2. ὁ Βόσορ; *ex Bosor;* i. q. BEOR, the father of Balaam (2 Pet. ii. 15). The origin of Bosor for Beor is quite uncertain. Probably it is due to a textual corruption. That it is a Chaldaism for Beor, as is sometimes stated, is entirely out of the question; for though, under certain circumstances (see Driver's *Heb. Tenses*[2], § 178), the Heb. ע = Chald. ע, the reverse change of Heb. ע = Chald. ע is unheard of. Cp. Flecker, *Scripture Onomatology*, pp. 69–75. [S. R. D.]

BOS'ORA (BN. Βοσορά, בָּצֵר; *Barasa, Bosor*), a strong city in Gilead taken by Judas Maccabaeus (1 Macc. v. 26, 28). It is probably the Roman Bostra, now *Busrah*, near the south border of the Hauran. The ruins are extensive and perfect; temples, churches, mosques, triumphal arches, a great theatre, gateways, colonnades, &c.; a Roman road connected it with Damascus on the one hand and with *Busra* on the Euphrates on the other (Reland, *Pal.* p. 665; Porter, ii. chap. 12; De Vogüé, *Syrie Centrale;* Merrill, *East of Jordan*, pp. 53–58; Wright in *Leisure Hour*, 1874, p. 763.) [G.] [W.]

BOTCH. [MEDICINE.]

BOTTLE. The words which are usually rendered in A. V. "bottle" are, in O. T., 1. חֵמָת (Gen. xxi. 14, 15, 19; R. V. marg. *skin*); ἀσκός; *uter:* a skin-bottle. 2. נֵבֶל, or נֹבֶל (1 Sam. x. 3; Job xxxviii. 37; Is. xxx. 14, marg.; Jer. xiii. 12; Lam. iv. 2, "pitcher"); ἀγγεῖον, κεράμιον, ἀσκός; *uter, vas testeum, lagena, lagunc(u)la.* 3. בַּקְבּוּק (Jer. xix. 1); βικὸς ὀστράκινος; *lagunc(u)la:* earthen bottle. 4. נֹאד (Josh. ix. 4, 13; Judg. iv. 19; 1 Sam. xvi. 20; Pss. lvi. 8, cxix. 83); ἀσκός; *uter, lagena;* R. V. "wine-skin." On the Hebrew version of Ps. lvi. 8 it may be remarked (1) that the word נֹאד—possibly selected for its alliteration with נָדִי, the opening word of the verse—means properly a skin, *i.e.* a bottle made of skin; (2) that there is no ground for supposing that any custom prevailed among the Israelites of collecting tears in vessels used for the purpose, and for which the name "lachrymatories" appears to have been invented.

In N. T. the only word rendered "bottle" (R. V. "wine-skin") is ἀσκός (Matt. ix. 17; Mark ii. 22; Luke v. 37). The bottles of Scripture are thus evidently of two kinds. 1. The skin bottle; 2. The bottle of earthen or glass ware, both of them capable of being closed from the air.

1. The skin bottle will be best described in the following account collected from Chardin and others. The Arabs, and all those that lead a wandering life, keep their water, milk, and other liquors, in leathern bottles. These are made of goatskins. When the animal is killed, they cut off its feet and its head, and they draw it in this manner out of the skin, without opening its belly. They are stuffed out full and strained by driving in billets and chips of oak-wood, and are then tanned with oak-bark, or in Arabia with acacia-bark, and the hairy part left outside. If not tanned, a disagreeable taste is imparted to the water. They afterwards sew up the places where the legs were cut off and the tail, and when it is filled they tie it about the neck. The great leathern bottles are made of the skin of a he-goat, and the small ones, that serve instead of a bottle of water on the road, are made of a kid's skin. These bottles when rent are repaired sometimes by setting in a piece; sometimes by gathering up the wounded place in manner of a purse; sometimes they put in a round flat piece of wood, and by that means stop the hole (Chardin, ii. 405, viii. 409; Wellsted, *Arabia*, i. 89, ii. 78; Lane, *Mod. Egyp.* ii. c. 14, p. 154; Harmer, from Chardin's notes, ed. Clarke, i. 284; Baker, *Abyssinia*, p. 50;

Robinson, *Pal.* ii. 79). Bruce gives a description of a vessel of the same kind, but larger. "A *gerba* (Lane, *kirbeh*) is an ox's skin, squared, and the edges sewed together by a double seam, which does not let out water. An opening is left at the top, in the same manner as the bunghole of a cask; around this the skin is gathered to the size of a large handful, which, when the gerba is full of water, is tied round with whipcord. These gerbas contain about sixty gallons each, and two of them are the load of a camel. They are then all besmeared on the outside with grease, as well to hinder the water from oozing through, as to prevent its being evaporated by the heat of the sun upon the gerba, which, in fact, happened to us twice, so as to put us in danger of perishing with thirst" (*Travels*, iv. 334).

Skin Bottles. (From the Museo Borbonico.)

Wine-bottles of skin are mentioned as used by Greeks, Romans, and Egyptians, by Homer (*Od.* vi. 78, *οἶνον ἔχενεν ἀσκῷ ἐν αἰγείῳ*; *Il.* iii. 247); by Herodotus, as used in Egypt (ii. 121), where he speaks of letting the wine out of the skin by the *ποδεών*, the end usually tied up to serve as the neck; by Virgil (*Georg.* ii. 384). Also by Athenaeus, who mentions a large skin-bottle of the nature of the gerba (*ἀσκὸς ἐκ παρδαλῶν δερμάτων ἐῤῥαμμένος*, v. 28, p. 199). Chardin says that wine in Persia is preserved in skins saturated with pitch, which, when good, impart no flavour to the wine (*Voyages*, iv. 75). Skins for wine or other liquids are in use to this day in Spain, where they are called *borrachas*.

The effect of external heat upon a skin-bottle is indicated in Ps. cxix. 83, "a bottle [R. V. marg. *wine-skin*] in the smoke;" and of expansion produced by fermentation in Matt. ix. 17, "new wine in old bottles" [R. V. "wine-skins"].

2. Vessels of metal, earthen, or glass ware for liquids were in use among the Greeks, Egyptians, Etruscans, and Assyrians (*χρυσότυπος φιάλη Τυρσηνή*, Athen. i. 20 (28); *ἀργυρέη φιάλη*, *Il.* xxiii. 243; *ἀμφίθετον φιάλην ἀπύρωτον*, *ib.* 270), and also no doubt among the Jews, especially in later times. Thus Jer. xix. 1, "a potter's earthen bottle." The Jews probably borrowed their manufactures in this particular from Egypt, which was celebrated for glass work, as remains and illustrations of Egyptian workmanship are extant at least as early as the 15th century B.C. (Wilkinson, *Anc. Egypt.* ii. 59, 60 [1878]).

Egyptian Bottles. 1 to 7, glass; 8 to 11, earthenware. (From the British Museum Collection.)

Glass bottles of the 3rd or 4th century B.C. have been found at Babylon by Sir A. Layard. At Cairo many persons obtain a livelihood by selling Nile water, which is carried by camels or asses in skins, or by the carrier himself on his back in pitchers of porous grey earth (Lane, *Mod. Egyp.* ii. 153, 155; Burckhardt, *Syria*, p. 611; Maundrell, *Journey*, p. 407, Bohn; Wilkinson, *Anc. Egypt.* i. 148–158; *Dict. of Gk. and Rom. Antiq.*, s. v. "Vinum"; Layard, *Nineveh and Babylon*, pp. 196, 503; Gesenius, *s. vv.*) [H. W. P.]

Assyrian Glass Bottles. (From the British Museum Collection.)

BOTTOMLESS PIT. [DEEP, THE.]

BOW. [ARMS.]

BOWELS (the translation of two very different words, מֵעַיִם, רַחֲמִים; *τὰ σπλάγχνα*). The bowels being regarded by the Hebrews as the seat of the affections, mercy, tenderness, and compassion, the word often stands as an equivalent for heart, breast, and bosom with us. In most cases the R. V. has adopted the English idiom ("tender mercies," "compassion," "heart") in place of the literal translation of the A. V. (cp. the two in *e.g.* Pss. xxv. 6, xl. 8; Prov. xii. 10; Cant. v. 4; Luke i. 78; 2 Cor. iii. 15, vi. 12; Philip. i. 8, ii. 1; Col. iii. 12; Philem. *vv.* 7, 12, 20; 1 John iii. 17); in some the word "bowels" is still retained (*e.g.* Jer. iv. 29, xxxi. 20), as giving a more appropriate sense (cp. *D. B.*, Amer. ed.). [F.]

BOWL. 1. גֻּלָּה; *στρεπτὸν ἀνθέμιον*; *funiculus*; see Ges. *Thes.* p. 288. 2. סַפָּל; *λεκάνη*; *concha*: in Judg. v. 25, A. V. and R. V. "dish"; in Judg. vi. 38, A. V. and R. V. "bowl." 3. גָּבִיעַ; *κρατήρ*; *scyphus*. 4. מִזְרָק; *κύαθος*; *cyathus*. Of these words (1) may be taken to indicate chiefly roundness, from גָּלַל, *to roll*, as a ball or globe, placed as an ornament on the tops or capitals of columns (1 K. vii. 41; 2 Ch. iv. 12, 13: cp. the form גֻּל in Zech. iv. 2); also the knob or boss from which proceed the branches of a candlestick (Zech. iv. 2), and also a suspended lamp, in A. V. and R. V. "golden bowl" (Eccles. xii. 6). (2) Of uncertain etymology. Ges. connects it with smallness or shallowness,

and it perhaps represents a shallow dish or basin. It is rendered *bowls* by A. V. in 1 K. vii. 50, 2 K. xii. 13 (14), and *cups* by R. V. (3) A round vessel (Jer. xxxv. 5), *κεράμιον*, LXX. (4) A lustratory vessel, from נָקָה, *pure*.

Bowl, with Hebrew Inscription. (Birch's *Ancient Pottery.*)

Bowl, with Syriac Inscription. (Birch's *Ancient Pottery.*)

A like uncertainty prevails as to the precise form and material of these vessels as is noticed under BASIN. Bowls would probably be used at meals for liquids, or broth, or pottage (2 K. iv. 40). Modern Arabs are content with a few wooden bowls. In the Brit. Mus. are deposited several terra-cotta bowls with Chaldean inscriptions of a superstitious character, expressing charms against sickness and evil spirits, which may possibly help to explain the "divining cup" of Joseph (Gen. xliv. 5. See DIVINATION). The bowl was filled with some liquid and drunk off as a charm against evil. See the case of Tippoo Sahib drinking water out of a black stone as a charm against misfortune (Gleig, *Life of Munro*, i. 218). One of the Brit. Mus. bowls still retains the stain of a liquid. These bowls, however, are thought by Mr. Birch not to be very ancient (Layard, *Nin. and Bab.* pp. 509, 511, 526; Birch, *Anc. Pottery*, i. 154; Shaw, p. 231.) [H. W. P.]

BOX. The A. V. rendering of פַּךְ (*φακός*; *lenticula*), "a box of oil," in 2 K. ix. 1, 3; but more correctly "vial" in 1 Sam. x. 1. R. V. has "vial" in both places. [ALABASTER.] [F.]

BOX-TREE (תְּאַשּׁוּר,[a] *teasshûr*; *θαασούρ*, *κέδρος*; *buxus*, *pinus*; R. V. margin, *cypress*) occurs in Is. lx. 13, together with "the fir-tree and the pine-tree," as furnishing wood from Lebanon for the Temple that was to be built at Jerusalem. In Is. xli. 19 the *teasshûr* is mentioned in connexion with "the cedar, ... the fir-tree and the pine," &c., which should one day be planted in the wilderness. The Talmudical and Jewish writers generally are of opinion that the box-tree is intended, and with them agree Montanus, Deodatus, the A. V. and other modern Versions; Rosenmüller (*Bibl. Bot.* 300), Celsius (*Hierob.* ii. 153), and Parkhurst (*Heb. Lex.* s. v. תאשור) are also in favour of the box-tree. The Syriac and the Arabic Version of Saadiah understand the *teasshûr* to denote a species of cedar called *sherbin*,[b] which is distinguished by the small size of the cones and the upright growth of the branches. This interpretation is also sanctioned by Gesenius and most modern commentators. Hiller (*Hierophyt.* i. 401) believes that the Hebrew word may denote either the box or the maple. With regard to that theory which identifies the *teasshûr* with the *sherbin*, there is not, beyond the authority of the Syriac and Arabic Versions, any satisfactory evidence to support it. Although the Arabic Version of Dioscorides gives *sherbin* as the rendering of the Greek *κέδρος*, the two trees which Dioscorides speaks of are rather to be referred to the genus *juniperus* than to that of *pinus*. The true *sherbin* is the *Juniperus excelsa*, one of the most conspicuous and characteristic trees of the higher part of Lebanon. It has often been confounded with the cedar and especially with the cypress, which it resembles in its habit and general appearance. Celsius (*Hierob.* i. 80) and Sprengel (*Hist. Rei Herb.* i. 267), as well as Niebuhr, have been led to confound the tall juniper with the cedar. The same word, however, in the Chaldee, the Syriac, and the Arabic Versions, is occasionally used to express the *berosh* (בְּרוֹשׁ), which is either the juniper or the pine, most probably the latter (*Pinus halepensis*). The passage in Ezek. xxvii. 6,[c] although it is one of acknowledged difficulty, is taken by many, with Bochart (*Geog. Sac.* i. iii. c. 5, 180) and Rosenmüller, to uphold the claim of the box-tree to represent the *teasshûr*; and is thus translated by R. V.: "they have made thy benches (marg. *deck*) of ivory, inlaid with boxwood (*al.* larch, cp. *QPB.*[3]) from the isles of Chittim." Now it is probable that the isles of Chittim may refer to any of the islands or maritime districts of the Mediterranean. Modern critics [see MV.[11]] identify Chittim here with Cyprus, but Bochart believes that Corsica is intended in this passage: the Vulg. has "de insulis Italiae." Corsica was celebrated for its box-trees (Plin. xvi. 16; Theophrast. *H. P.* iii. 15, § 5), and it is well known that the ancients understood the art of veneering wood, especially box-wood, with ivory, tortoise-shell, &c. (Virg. *Aen.* x. 137). This passage therefore does certainly seem to favour the opinion that *teasshûr* denotes the wood of the box-tree (*Buxus longifolia*), the Oriental representative of our European *Buxus sempervivus*, differing in having larger and more pointed leaves, and in other inconspicuous points. It is a small evergreen tree, about twenty feet high, growing in the higher parts of Lebanon. The wood is highly prized in Syria for the manufacture of combs, spoons, locks, and other domestic articles. [W. H.] [H. B. T.]

BO'ZEZ (בּוֹצֵץ, Ges. = *shining*; BA. Βαζές; *Boses*), the name of one of the two "sharp

[a] Apparently from the root אָשַׁר, "to be straight, upright" (Ges. *Thes.*).

[b] שְׁרִבִּין.

[c] קַרְשֵׁךְ עֲשׂוּרֵשֵׁן בַּת־אַשֻּׁרִים מֵאֵיי כִּתִּים [Baer]; A. V. "The company of the Ashurites have made thy benches of ivory, brought out of the isles of Chittim." Bochart, followed by most critics, reads בַּתְאַשֻּׁרִים as one word, בַּת־א׳.

rocks" (Hebrew, "teeth of the cliff") "between the passages" by which Jonathan entered the Philistine garrison. It seems to have been that on the north side (1 Sam. xiv. 4, 5). Robinson notices two hills of blunt conical form in the bottom of the *Wâdy Suweinit* just below *Mŭkhmâs* (i. 441 and iii. 289); Stanley, on the other hand, could not make them out (*S. & P.* p. 205, note). And indeed these hills answer neither to the expression of the text nor the requirements of the narrative. Conder (*Tent Work in Pal.* ii. 112–14) proposes to identify it with *el-Hosn*, a cliff on the N. side of *W. Suweinît*, near *Mŭkhmâs*; cp. *PEFQy. Stat.*, 1881, p. 252. [G.] [W.]

BOZ'KATH (בָּצְקַת, perhaps an *elevated* place; B. Βασηδώθ, A. Μασχάθ, in Josh.; BA. in Kings, Βασουρώθ; Joseph. Βοσκέθ; *Bascath* in Josh., *Besecath* in Kings), a city of Judah in the Shefêlah; named in the same group with Lachish and Eglon (Josh. xv. 39). It is mentioned once again (2 K. xxii. 1) as the native place of the mother of king Josiah. Here it is spelt in the A. V. "Boscath." The site has not yet been discovered. [G.] [W.]

BOZ'RAH (בָּצְרָה, possibly from a root with the force of restraining, therefore used for a *sheepfold*, Ges., and also for a *fortified place*, MV.[11]; Βοσόρρα; Βοσόρ, also ὀχυρώμα, Jer. xlix. 22; τεῖχος, Amos i. 12; θλίψις, Mic. ii. 12; Vulg. *ovile*; *Bosra*), the name of more than one place on the east of Palestine. **1.** In Edom—the city of Jobab the son of Zerah, one of the early kings of that nation (Gen. xxxvi. 33; 1 Ch. i. 44). This is doubtless the place mentioned in later times by Isaiah (xxxiv. 6; lxiii. 1) in connexion with Edom, by Jeremiah (xlix. 13, 22), Amos (i. 12), and, perhaps, by Micah (ii. 12), "sheep of B." (R. V., cp. Is. xxxiv. 6), though the word is here rendered by the Vulgate and by Gesenius "the sheep into a fold" (Ges. *Thes.* p. 230). It was known to Eusebius, who speaks of it (*OS.*[2] p. 247, 58) as a city of Esau in the mountains of Idumaea, in connexion with Is. lxii. 1, and in contradistinction to Bosor the "city of refuge." There is no reason to doubt that the modern representative of Bozrah is *el-Buseireh*, البصيرة, which was first visited by Burckhardt (*Syr.* p. 407; *Beszeyra*), and lies in the mountain district to the S.E. of the Dead Sea, between *Tûfileh* and *Petra*, about half-way between the latter and the Dead Sea. Irby and Mangles mention it under the name of *Ipseyra* and *Bsaida* (chap. viii.: see also Robinson, ii. 167). The "goats" which Isaiah connects with the place were found in large numbers in this neighbourhood by Burckhardt (*Syr.* p. 405).

2. In his catalogue of the cities of the land of Moab, Jeremiah (xlviii. 24) mentions a

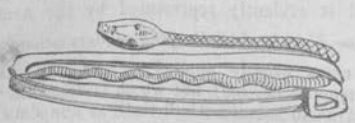
Bozrah.

Bozrah as in "the plain country" (v. 21, אֶרֶץ הַמִּישֹׁר, *i.e.* the high level downs on the east of the Dead Sea and of the lower Jordan, the *Belka* of the modern Arabs). Here lay Heshbon, Nebo, Kirjathaim, Diblathaim, and the other towns named in this passage, and it is here that Bozrah should be sought, and not, as has been suggested, at Bostra, the Roman city in Bashan full sixty miles from Heshbon (Porter's *Damascus*, ii. 163). If recovered [see Dillmann[2] on Deut. iv. 43], it is probably the same as Bezer in the wilderness, and the Bezer, or Bosor, of king Mesha's inscription [BEZER] (*Records of the Past*, N. S. ii. 203), now *Kesûr el-Besheir*, S.W. of *Dhîbân*, Dibon. [G.] [W.]

RACELET (אֲצַעֲדָה; ψέλλιον; χλιδών). Under ARMLET an account is given of these ornaments, the materials of which they were generally made, and the manner in which they

were worn, &c. Besides אֲצָעָדָה (Num. xxxi. 50; 2 Sam. i. 10) four other words are translated by "bracelet" in the Bible, viz.: 1. צְמִיד (from צָמַד, to fasten), Gen. xxiv. 22, Num. xxxi. 50, &c. 2. שֶׁרֶה (a chain, *σειρά*, from its being wreathed, שָׂרַר). It only occurs in this sense in Is. iii. 19 [R. V. marg. *chains*], but compare the expression "wreathen chains" in Ex. xxviii. 14, 22. Bracelets of fine twisted Venetian gold are still common in Egypt (Lane, ii. 368, Append. A and plates). 3. פְּתִיל, Gen. xxxviii. 18, 25, rendered "bracelet" by A. V., but meaning probably "a string by which a seal-ring was suspended" (Gesen. *s. v.*; cp. R. V. "cord"). The same word is rendered "lace" (Ex. xxviii. 28); "wires" (Ex. xxxix. 3); "ribband" (Num. xv. 38; R. V. "cord"); "line" (Ezek. xl. 3); and "thread" (Judg. xvi. 9; R. V. "string"). 4. חָח, Ex. xxxv. 22; R. V. "brooches." This word is thought by many to mean "a nose-ring" (*al.* LXX. *σφραγῖδες*; *armillae*. Cp. Bochart, *Hieroz.* i. 764). Elsewhere it is rendered "hook" (2 K. xix. 28; Ezek. xxix. 4) and "chain" (Ezek. xix. 4; R. V. "hooks").

Men as well as women wore bracelets, as we see from Cant. v. 14, which may be rendered, "His wrists are circlets of gold full set with topazes" [R. V. "His hands are *as* rings of gold set with beryl"]. Layard says of the Assyrian kings: "The arms were encircled by armlets, and *the wrists by bracelets*, all equally remarkable for



Gold Egyptian Bracelet. (Wilkinson.)

the taste and beauty of the design and workmanship. In the centre of the bracelets were stars and rosettes, which were probably inlaid with precious stones" (*Nineveh*, ii. 323). These

Assyrian Bracelet Clasp. (Nineveh Marbles.)

may be observed on the sculptures in the British Museum. [ARMLET; ANKLET.] [F. W. F.]

BRAMBLE, BRIER, PRICKS, THISTLE, THORNS, THORN-HEDGE.[a] By these names at least eighteen Hebrew and four Greek words are rendered in the A. V. and R. V. In the many passages where they occur the context rarely gives any clue by which we can identify the particular species denoted, and in many cases the derivation does not aid us in the identification. But it can scarcely be doubted that by different Hebrew names different plants are indicated, and in most cases a knowledge of the Flora of Palestine will enable us to arrive at a probable conclusion. To those who have noticed the plants of Palestine, how truly it is, in its shrubs and weeds alike, a land of thorns and briers; it can be no matter of surprise that our Hebrew vocabulary, scanty as it is on most subjects of natural history, should here be so rich. The combined heat and dryness of the climate develop a tendency to form thorns, even in the succulent groups where we should least expect them. Botanically the thorn, *spina*, is entirely distinct from the prickle, *aculeus*; the former being formed in the wood, and often disappearing under cultivation or in a rich soil; the latter being an excrescence on the bark, as in the rose or the bramble, and unaffected by cultivation. All plants become more spiny in rocky and parched situations; the expansive effort, which under moister conditions would develop a twig or branch with leaf or blossom, being arrested, and forming merely a barren spine. Upon waste land in these regions the whole growth is thorny. "Upon the land of my people shall come up thorns and briers" (Is. xxxii. 13). "The thorn and the thistle shall come up on their altars" (Hos. x. 8).

The Hebrew words are: 1. *'Atad*, אָטָד (*ῥάμνος*, *rhamnus*), rendered by the A. V. and R. V. in Judg. ix. 14, 15, "bramble," and in Ps. lviii. 9, "thorns." There can be little question as to the plant intended, for the Arabic عَطَد, *atad*, is identical, and is applied by the natives to the Boxthorn or Rhamnus of which two species are common—*Lycium Europaeum* (L.),

Lycium Europaeum.

spread over the whole country, from the Lebanon downwards, excepting in the Jordan valley, where its place is taken by *Lycium*

[a] This article may replace THORNS and THISTLES in Vol. III., where the subject is not so fully treated.

Arabicum (Boiss.), an allied form. It is used, like our hawthorn, for hedges, having numerous erect branches with stiff short spines, small pinkish white flowers, and a dark berry. It has very small, thick, oblong leaves, close set, less than half the size of those of our box-tree, to which it has a fancied resemblance, whence its English name. It belongs to the family *Solanaceae*.

2. *Choach*, חוֹחַ (ἄκαν, ἀκάνθη, κνίδη, ἀκχούχ; *carduus, tribulus, spina, lappa;* and in Job xli. 2, ψέλλιον, *armilla*), variously rendered. In Is. xxxiv. 13, by the A. V. "brambles," by the R. V. "thistles," marg. *thorns:* in 1 Sam. xiii. 6, "thickets;" by A. V. and R. V. "The people did hide themselves in thickets" (ἐν ταῖς μάνδραις, *abditis*): in 2 K. xiv. 9, 2 Ch. xxv. 18, Job xxxi. 40, in the A. V. and R. V. "thistle," marg. *thorns:* "The thistle that was in Lebanon sent to the cedar that was in Lebanon;" "Let thistles grow instead of wheat." In other passages both the A. V. and R. V. render the word "thorns." In Job xli. 2, "Canst thou bore his jaw through with a thorn?" (R. V. "hook"), the word is evidently used for a weapon resembling a *choach*. The Arabic أخوخ, *achooch*, is almost identical, and is applied to a prickly hawthorn. Celsius would therefore translate it by *Prunus sylvestris*, the blackthorn, which however is not a native of the country. The only passage which affords any indication of the character of the plant is that in Job, from which we may infer that it is a thorny plant of quick growth, springing up in cultivated ground. There are two classes of prickly weeds which choke the corn-fields of Palestine—the true thistles, and the Centaureas or knapweeds. As the knapweed seems to be designated by *dardar*, *choach* may very well stand for the common thistle [see MV.[11]]. Of this genus there are many species abundant in the Holy Land, especially in the corn plains of the coast and of Esdraelon. The typical thistle of the corn-fields is *Notobasis syriaca* (L.), a tall pink flowering thistle with powerful spines. *Carthamus dentatus* (Vahl), and *C. oxyacantha*, a yellow flowering species with poisonous spines, inflicting irritating wounds, are also common. About 80 species of thistles have been recorded from Palestine.

3. *Dardar*, דַּרְדַּר (τρίβολος, *tribulus*), occurs in the O. T. in connexion with the Heb. *kôts* (קוֹץ) in Gen. iii. 18, "thorns and *thistles*," and Hos. x. 8: "The thorn and the *thistle* shall come up on their altars" (A. V. and R. V.). Τρίβολος, "thistles," occurs in Matt. vi. 16, and also in Heb. vi. 8, "briers" A. V., "thistles" R. V. There is not much difficulty in identifying the plant intended, at least generically, as the Tribulus is often mentioned in classical writers in connexion with *carduus*, "the thistle," and is generally admitted to be a knapweed or star thistle, of which several species, especially one, the *Centaurea calcitrapa* (L.), are most troublesome intruders in corn-fields throughout the Mediterranean countries. There is also another species closely allied to this, but with even more powerful spines, an inch and a half in length, very abundant in fields and waste places in Northern Palestine, *Centaurea verutum* (L.), which is so formidable that horses refuse to face it, and it has to be beaten down with sticks. Celsius has argued at great length (*Hierob.* ii. p. 128) in favour of the prickly *Fagonia arabica* (L.), but it is unnecessary to enter on his argument, as the plant is an inhabitant of the desert, and only found within Palestine about the shores of the Dead Sea. Sprengel, Royle, and others suggest *Tribulus terrestris* (L.), which, though a common weed, is neither characteristic nor especially spinous. It is clear that *dardar* has always been identified in the LXX. and elsewhere with τρίβολος, which is indisputably the *Centaurea calcitrapa*. This has been shown by Du Molin (*Flore Poétique Ancienne*, p. 305) in his dissertation on the *Tribulus* of Virgil. The thorns of these star thistles are not on the leaf or stem, but are simply the scales of the involucrum or flower sheath, lengthened into long hard spines. We are further enabled to identify τρίβολος by the ancient military engine named from it, a ball with iron spikes projecting in all directions, thrown down to arrest cavalry, and which may frequently be seen in museums. This instrument has still a place in modern military defence, under the name of "caltrop," taken from this same thistle.

4. *Chedek*, חֶדֶק, occurs twice: in Prov. xv. 19, "The way of the slothful man is as an hedge of thorns," A. V. and R. V. (ἄκανθα, *spina*); in Mic. vii. 4, "The best of them is a brier," A. V. and R. V. (σὴς ἐκτρώγων, *paliurus*). The Hebrew word is evidently represented by the Arabic حدق, *hhedek*, which Freytag renders *melongena*, the name usually applied to the egg plant (*Solanum melongena*), but which is described by the Arabian botanist Abu'l Fadli as abundant in Phoenicia, like *melongena*, but larger, covered with thorns and bearing a fruit the size of a walnut, green at first, but yellow when ripe. This is an exact description of *Solanum sanctum* (L.), commonly known as the apple of Sodom or vine of Sodom, and which is very common in all the hotter parts of Palestine, where it is often used as a hedge. The context in the passages where *chedek* occurs suggests not a ground thistle, but some taller prickly plant suitable for fencing, as is the Sodom apple. It is a shrubby plant from 3 to 5 feet high, with widely-branching stems, thickly clad with spines like those of the English brier, with large leaves, woolly on the underside, and a spinous midrib. The blossom resembles in shape and colour that of the potato, to which it is closely allied, and bears a large crop of fruit, perfectly spherical, larger than the potato apple, at first green, then yellow, and finally, when the pulp within has dried, a brilliant red, containing inside a quantity of dust and small black seeds. We may thus definitely assign the *chedek* to the Sodom apple.

5. *Kôtz*, קוֹץ (ἄκανθα, *spinae*), occurs twelve times in the Old Testament, and is always in our Versions translated "thorns," as in Gen. iii. 18: "*Thorns* also and thistles shall it bring forth to thee." In the LXX. it is rendered by ἄκανθα, which is also frequently used in the N. T. ("thorns," A. V. and R. V.), as in the Sermon on the Mount and in the Parable of the Sower. *Kôts* is derived from a root signifying

"to cut," perhaps allied to the Arabic قاط (Ges.). But neither from its derivation, nor from the context of the passages where it occurs, have we ground to refer it to any particular species. It is probably as general as the words by which it is rendered in the Greek and English.

6. *Shâmîr*, שָׁמִיר, occurs only in Isaiah; where in seven out of eight passages it is used in connexion with שַׁיִת, *shayith*. It is variously rendered by the LXX. χέρσος, ξηρά, ἄγρωστις, χόρτος, *vepres spinae*. Both the A. V. and R. V. always translate it "briers." Celsius (*Hierob.* ii. 187) identifies this with the Arabic سمر, *samur*, described by Abu'l Fadli as a thorny tree, a species of *sidra*, but which does not bear fruit, and which is common in Arabia. But while this may be accepted without hesitation, it is not so easy at once to identify the *sidra* specifically, as the Arabs give the name to different trees in different localities. The Arabs of Southern and Eastern Palestine give the name *sidra* to all thorny non-fruit-bearing trees which attain any size, and of these there are many species commonly found, all belonging to the natural order *Rhamnaceae*. Some are distinguished by the natives as *dâhl*, *nub'k*, and *samur*. The latter name is given in the south to *Paliurus aculeatus* (L., Christ's thorn), and further north to *Rhamnus palaestina* (Boiss.), the Syrian buckthorn, which is more common on the higher lands. The Hebrew *shâmîr* may therefore with probability be assigned to one or both of these species. The *Rhamnus* is very like our blackthorn in appearance, with very small leaves, yellow blossom, and thorns like those of the hawthorn. *Paliurus aculeatus* has much larger leaves, small whitish blossoms, and a number of sharp thorns on the twigs, as well as spines on the midriff of the leaves. It is common about Jerusalem, and by some has been taken, as its name implies, for the material of which the crown of thorns was composed (but see § 8).

7. *Shaîth*, שַׁיִת (ἄκανθα, *spina*), occurs only in Isaiah (*e.g.* v. 6, vii. 23–25, &c.), and then only in connexion with *shâmîr*; it is rendered "thorns" in A. V. and R. V. It is probably an indefinite term; at least we have no clue or derivation by which we can assign it to any particular species.*

8. *Na'atzûtz*, נַעֲצוּץ (στοιβή, *saliunca*), occurs twice, in Isaiah vii. 19 and lv. 13, and is rendered by "thorns" in A. V. and R. V. Celsius would refer *na'atzûz* to the Arabic نعض, *na'd*, which is explained to be a large thorny fruit-bearing tree, and identified by him with the *nub'k*, or *dhâl*, ضال, *Zizyphus spina-christi* (L.). The *nub'k* is very common in the Jordan valley and in the hotter parts of the country. It often forms impenetrable thickets, and grows to a considerable size when it has room. The larger trees are known as Dâhl, but I believe there is no specific difference, though Abu'l Fadli states that there are two species, bearing the same fruit, but the larger having smaller thorns, and growing in the mountains. The Zizyphus is not uncommon near Jerusalem, but there is stunted in growth. In the low plains it reaches its full size and is known as the Dhôm tree. One of these overshadowing the fountain of 'Ain Dûk at Jericho is an ancient and noble tree, and superstitiously honoured by the Arabs. It is sometimes called the Lotus tree. The thorns of the Zizyphus are long, sharp, and recurved, and apt to create a festering wound. The leaves are oval and of a very glossy green. The blossom is small and white, and the fruit a yellow berry, the size of a small gooseberry, of a pleasant subacid flavour and with a stone like that of the hawthorn. It is eaten by the natives fresh or dried, with sour milk. It is generally believed that of the Zizyphus, or, as it is often called, the Jujube tree, was composed the crown of thorns of our Lord's Passion. Its tough and flexible twigs are well suited for such a purpose, and the plant is one of the denizens of the valleys round Jerusalem.

No fence is more impervious or more easily made than that of the *nub'k*. The Arabs simply cut down a few branches and lay them in line round the barley as it is sown. No goats, cattle, or camels will attempt to force it, insignificant as it appears, not more than a yard high, while the twigs and recurved hooks become so interwoven that to pull them aside is no easy task.

9. *Barkanim*, בַּרְקָנִים (*tribuli*, untranslated in the LXX.), occurs only in Judg. viii. 7, 16, "I will tear your flesh with thorns of the wilderness and with briers," A. V. and R. V. The Rabbinical commentators simply state that it is a species of thorn, but do not further define it. Celsius, referring to David's punishment of the Ammonites after the capture of Rabbath, suggests that *Barkanim* may mean the spiked wheels of threshing instruments dragged over the prostrate bodies of the captives. To this it may be objected that we have no evidence that such threshing machines were in use at this early period; and as *tribulus* means both a brier and a threshing instrument, Gesenius very reasonably observes that the instrument is more likely to have been named from the plant than the plant from the instrument. As to the particular species intended we have no clue, etymological or other, but about the fords of Succoth the Zizyphus now grows in impenetrable thickets, and higher up the country by Bethshean the common bramble, *Rubus fruticosus* (L.), is very common. One of these is probably indicated by the Hebrew word.

10. *Sillôn*, סִלּוֹן, σκόλωψ, occurs in Ezek. ii. 6, xxviii. 24—"thorns," "pricking briers," A. V. and R. V. This seems to be identical with the Arabic سلان, *sallon*, the sharp points at the end of each segment of the palm-leaf, and hence sometimes used for a needle-point.

11. *Sârâbim*, סָרָבִים, occurs once only in Ezek. ii. 6, where both A. V. and R. V. have "briers." The LXX. renders the passage παροιστρήσουσι, and the Vulgate *increduli*. There has been, as these various interpretations show, a wide discrepancy between the different translators. Celsius (*Hierob.* ii. 222) interprets the word *refractarii* as from סרב, "to rebel" [cp. A. V.

* Celsius, after searching in vain for a key, pathetically concludes, "Ejus indagandae usque adeo nulla patet via, nullumque vestigium, ut neque conjecturae locus relictus videatur." (*Hierob.* ii. 187.)

marg.], and rejects the rendering *spinae* as a Latin gloss. The rendering "briers" seems, however, to be that preferred by modern commentators.

12. *Sirpad*, סִרְפָּד (*κόννζα*, Symm. *ἀντὶ κνιδός*, *urtica*), occurs once only: "Instead of the *brier* shall come up the myrtle tree" (Is. lv. 13). The Rabbinical commentators support the rendering of A. V. and R. V. rather than that of the LXX., which interprets it as a kind of nettle. But having no etymological or other clue, all is mere conjecture.

13. *Sirim*, *Siroth*, סִירִים, סִירוֹת, always in the plural (*ἄκανθαι*, *ἀκάνθινα ξύλα*, *σκόλοψ*, *σμίλαξ*; *spinae*), "thorns," A. V. and R. V. The word occurs in several passages. We have no etymological key to indicate any particular species. It may be a general term, but from the context in Eccles. vii. 6 we may infer a plant used for firing. There is one thorny plant of rapid and abundant growth, universally used for heating ovens, and which cannot be assigned to any of the words examined above, *Acanthus spinosus* (L.). From its large and abundant foliage, it is most suitable for kindling, and we have often noticed the women in the summer collecting the acanthus in large bundles for fuel.

14. *Tzinnim*, *Tzeninim*, צִנִּים [Prov. xxii. 5; Job v. 5], צְנִינִים [Num. xxxiii. 55; Josh. xxiii. 13] (*βολίς*, *τρίβολος*; *sudes*, *lancea*), "thorns," A. V. and R. V.; in Amos iv. 2 (metaph.), "hooks." The word is simply used for a thorn or prick, and has no reference to any particular plant.

15. *Sek*, שֵׂךְ (*σκόλοψ*, *clavis*), is found only in Num. xxxiii. 55, where the A. V. and R. V. render it "pricks"; "As pricks in your eyes."

The word is identical with the Arabic شوك, *shawk*, a thorn. This, like the last, appears to be a general term. From the same root *sook*, שׂוּךְ, "to hedge," "enclose," or "twist," is also derived the word *mesoochah*, מְסוּכָה (Mic. vii. 4) or מְשֻׂכָה (Prov. xv. 19), translated "thorn-hedge" in A. V and R. V.

16. קִמּוֹשׂ, *kimmôsh* (cp. Baer on Hos. ix. 6), is in Is. xxxiv. 13 and Hos. ix. 6 rendered "nettles;" the kindred form קִמְשֹׁנִים (pl.), Prov. xxiv. 13, is rendered "thorns."

Thus among the various Hebrew names nine at any rate may, with more or less probability, be assigned to conspicuous and familiar thorny plants of the country. Among these, however, is not our briar or wild rose, which can only just claim a place in the Flora of the country. There are several beautiful specimens of wild briar, but they are all in the extreme north and on Hermon and Lebanon.

The prickly pear (*Opuntia vulgaris*, L.), though now so common and ordinarily used for hedges in Palestine, is not among the brambles and briers of Scripture, having been introduced from tropical America. It has now overrun the whole of the Mediterranean countries, and is often incorrectly introduced into scriptural and historical pictures. On the whole subject see Dietrich, 'Dornen- u. Distel-namen' in his *Abhandl. f. Semit. Wortforschung* (1844). [H. B. T.]

BRASS (*χαλκός*). The word נְחֹשֶׁת is improperly translated by A. V. and R. V. by "brass" in the earlier Books of Scripture, since the Hebrews were not acquainted with the compound of copper and zinc known by that name. In most places of the O. T. the correct translation would be "copper," although it may sometimes possibly mean "bronze" (*χαλκὸς κεκραμένος*), a compound of copper and tin. Indeed a simple metal was obviously intended, as we see from Deut. viii. 9, "out of whose hills thou mayest dig brass," and Job xxviii. 2, "Brass is molten out of the stone," and Deut. xxxiii. 25, "Thy shoes shall be iron and brass," which seems to be a promise that Asher should have a district rich in mines, which we know to have been the case, since Eusebius (viii. 15, 17) speaks of the Christians being condemned *τοῖς κατὰ Φαινὼ τῆς Παλαιστίνης χαλκοῦ μετάλλοις* (Lightfoot, *Cent. Chorogr.* c. 99). [ASHER.]

Copper was known at a very early period, and the invention of working it is attributed to Tubal-cain (Gen. iv. 22; cp. Wilkinson, *Anc. Egypt.* ii. 153; cp. "Prius aeris erat quam ferri cognitus usus," Lucr. v. 1292). Its extreme ductility (*χαλκὸς* probably from *χαλάω*) made its application almost universal among the ancients, as Hesiod expressly says (*Dict. of Gk. and Rom. Antiq.*, art. *Aes*).

The same word is used for money, in both Testaments (Ezek. xvi. 36; Matt. x. 9, &c.).

It is often used in metaphors, *e.g.* Lev. xxvi. 9, "I will make your heaven as iron and your earth as brass," *i.e.* dead and hard. This expression is reversed in Deut. xxviii. 23 (cp. Coleridge's "All in a hot and *copper* sky," &c. *Anc. Mar.*). "Is my flesh of brass?" *i.e.* invulnerable (Job vi. 12). "They are all brass and iron," *i.e.* base, ignoble, impure (Jer. vi. 28). It is often used as an emblem of strength (Zech. vi. 1; Jer. i. 18, &c.). The "brazen thighs" of the mystic image in Nebuchadnezzar's dream were a fit symbol of the Ἀχαιοὶ χαλκοχίτωνες. No special mention of orichalcum seems to be made in the Bible.

The word *χαλκολίβανον* in Rev. i. 15, ii. 18 (*οἱ πόδες αὐτοῦ ὅμοιοι χαλκολιβάνῳ*), has excited much difference of opinion. St. John was probably thinking of the *χαλκὸς στίλβων* of Dan. x. 6 or *χαλκὸς ἐξαστράπτων* of Ezek. i. 7. The A. V. renders it "fine brass," as though it were from *χ.* and *λείβω* (smelting brass), or that *ὀρείχαλκος* which was so rare as to be more valuable than gold. Bochart makes it "aes album igneo colore splendens," as though from לָבָן, "shining" (R. V. "burnished brass"). It *may* perhaps be deep-coloured [amber-coloured, *Speaker's Comm.*] frankincense, as opposed to *ἀργυρολίβανον*. Suidas defines it as *εἶδος ἠλέκτρου τιμιώτερον χρυσοῦ*. See Wetstein, *N. T.* ii. 472; Bochart, *Hieroz.* ii. 883. [F. W. F.]

On the use of copper and bronze in ancient Egypt, among the Hebrews, and in Assyria, see *PSBA.* xii. pp. 227–34. [F.]

BRAYING IN A MORTAR, Prov. xxvii. 2. [PUNISHMENTS, III. (*a*) 4.]

BRAZEN SEA, 2 K. xxv. 13; Jer. lii. 17. [SEA, MOLTEN.]

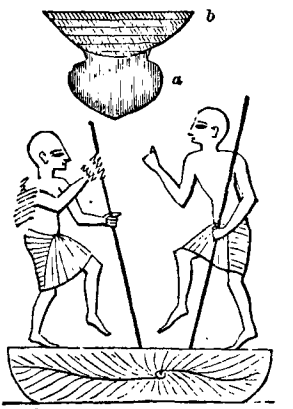
BRAZEN SERPENT. [SERPENT.]

BREAD (לֶחֶם). The preparation of bread as an article of food dates from a very early period: it must not, however, be inferred from the use of the word *lechem* in Gen. iii. 19 ("bread," A. V. and R. V.) that it was known at the time of the fall, the word there occurring in its general sense of *food:* the earliest undoubted instance of its use is found in Gen. xviii. 6. The corn or grain (דָּגָן, שִׁבֳּר) employed was of various sorts: the best bread was made of wheat, which after being ground produced the "flour" or "meal" (קֶמַח; ἄλευρον; Judg. vi. 19; 1 Sam. i. 24; 1 K. iv. 22, xvii. 12, 14), and when sifted the "fine flour" (סֹלֶת; more fully סֹלֶת חִטִּים, Ex. xxix. 2; or קֶמַח סֹלֶת, Gen. xviii. 6; σεμίδαλις) usually employed in the sacred offerings (Ex. xxix. 40; Lev. ii. 1; Ezek. xlvi. 14), and in the meals of the wealthy (1 K. iv. 22; 2 K. vii. 1; Ezek. xvi. 13, 19; Rev. xviii. 13). "Barley" was used only by the very poor (John vi. 9, 13), or in times of scarcity (Ruth iii. 15, compared with i. 1; 2 K. iv. 38, 42; Rev. vi. 6; Joseph. *B. J.* v. 10, § 2). Being the food of horses (1 K. iv. 28), it was considered a symbol of what was mean and insignificant (Judg. vii. 13; comp. Joseph. *Ant.* v. 6, § 4, *μάζαν κριθίνην, ὑπ' εὐτελείας ἀνθρώποις ἄβρωτον*; Liv. xxvii. 13), as well as of what was of a mere animal character, and hence ordered for the offering of jealousy (Num. v. 15; cp. Hos. iii. 2; Philo, ii. 307). "Spelt" (כֻּסֶּמֶת; *ὄλυρα, ζέα*; A. V. *rye, fitches, spelt;* R. V. "spelt" always) was also used both in Egypt (Ex. ix. 32) and Palestine (Is. xxviii. 25; Ezek. iv. 9; 1 K. xix. 6, LXX. *ἐγκρυφίας ὀλυρίτης*): Herodotus indeed states (ii. 36) that in the former country bread was made exclusively of *olyra*, which, as does the LXX., he identifies with *zea;* but in this he was mistaken, as wheat was also used (Ex. ix. 32; cp. Wilkinson's *Anc. Eg.* i. 180 [1878]). Occasionally the grains above mentioned were mixed, and other ingredients, such as beans, lentiles, and millet, were added (Ezek. iv. 9; cp. 2 Sam. xvii. 28); the bread so produced is called "barley cakes" (Ezek. iv. 12, so R. V.), inasmuch as barley was the main ingredient. The amount of meal required for a single baking was an ephah or three measures (Gen. xviii. 6; Judg. vi. 19; 1 Sam. i. 24; Matt. xiii. 33), which appears to have been suited to the size of the ordinary oven. The baking was done in primitive times by the mistress of the house (Gen. xviii. 6) or by one of the daughters (2 Sam. xiii. 8). Female servants were employed in large households (1 Sam. viii. 13), and it appears always to have been the proper business of women in a family (Jer. vii. 18, xliv. 19; Matt. xiii. 33; cp. Plin. xviii. 11, 28). Baking as a profession was carried on by men (Hos. vii. 4, 6). In Jerusalem the bakers congregated in one quarter of the town, as we may infer from the names "bakers' street" (Jer. xxxvii. 21) and "tower of the ovens" (Neh. iii. 11, xii. 38; "furnaces," A. V. and R. V.). In the time of the Herods, bakers were scattered throughout the towns of Palestine (*Ant.* xv. 9, § 2). As the bread was made in thin cakes, which soon became dry and unpalatable, it was usual to bake daily, or when required (Gen. xviii. 6; cp. Harmer's *Observations*, i. 483): reference is perhaps made to this in the Lord's Prayer (Matt. vi. 11; Luke xi. 3). The bread taken by persons on a journey (Gen. xlv. 23; Josh. ix. 12) was probably a kind of biscuit.

The process of making bread was as follows:—The flour was first mixed with water, or perhaps milk (Burckhardt's *Notes on the Bedouins*, i. 58); it was then kneaded (לוּשׁ) with the

Egyptians kneading dough with their hands (Wilkinson. From a painting in the Tomb of Rameses III. at Thebes).

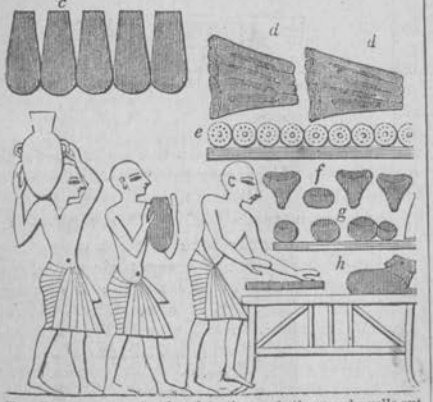
hands (in Egypt with the feet also; Herod. ii. 36; Wilkinson, ii. 386) in a small wooden bowl



Egyptians kneading the dough with their feet. At *a* and *b* the dough is probably left to ferment in a basket, as is now done at Cairo (Wilkinson).

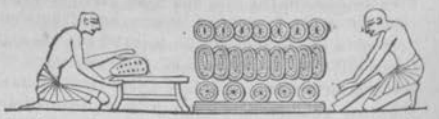
or "kneading-trough" (מִשְׁאֶרֶת, a term which may, however, rather refer to the leathern bag in which the Bedouins carry their provisions, and which serves both as a wallet and a table: Niebuhr's *Voyage*, i. 171; Harmer, iv. 366 sq.; the LXX. inclines to this view, giving *ἐγκαταλείμματα* in Deut. xxviii. 5, 17 ["store," A. V.; "kneading-trough," R. V.]; the expression in Ex. xii. 34, however, "bound up in their clothes," favours the idea of a wooden bowl), until it became dough (בָּצֵק; *σταῖς*, Ex. xii. 34, 39; 2 Sam. xiii. 8; Jer. vii. 18; Hos. vii. 4: the term "dough" is improperly given in the A. V. as = עֲרִיסוֹת, in Num. xv. 20, 21; Neh. x. 37; Ezek. xliv. 30. [In these passages R. V. has "dough" in the text and *coarse meal* in margin]). When the kneading was completed, leaven (שְׂאֹר; *ζύμη*) was generally added

[LEAVEN]: but when the time for preparation was short, it was omitted, and unleavened cakes, hastily baked, were eaten, as is still the prevalent custom among the Bedouins (Gen. xviii. 6, xix. 3; Ex. xii. 39; Judg. vi. 19; 1 Sam. xxviii. 24). Such cakes were termed מַצּוֹת (ἄζυμα, LXX.), a word of doubtful sense, variously supposed to convey the ideas of *sweetness* (Gesen. *Thesaur.* p. 815), or [more probably] *purity* (Knobel-Dillmann on Ex. xii. 20), while leavened bread was called חָמֵץ (lit. *sharpened* or *soured*; Ex. xii. 39; Hos. vii. 4). Unleavened cakes were ordered to be eaten at the Passover to commemorate the hastiness of the departure (Ex. xii. 15, xiii. 3, 7; Deut. xvi. 3), as well as on other sacred occasions (Lev. ii. 11, vi. 16; Num. vi. 15). The leavened mass was allowed to stand for some time (Matt. xiii. 33; Luke xiii. 21), sometimes for a whole night ("their baker sleepeth all the night," Hos. vii. 6; see R. V. marg.), exposed to a moderate heat in order to forward the fermentation ("he ceaseth to stir *the fire*, from the kneading of the dough until it be leavened," Hos. vii. 4, R. V.). The dough was then divided into round cakes (כִּכָּרוֹת לֶחֶם, lit. *circles*; ἄρτοι; "loaves," A. V. and R. V.; Ex. xxix. 23; Judg. viii. 5; 1 Sam. x. 3; Prov. vi. 26; in Judg. vii. 13, צְלוֹל; μαγίς), not unlike flat stones in shape and appearance (Matt. vii. 9; cp. iv. 3), about a span in diameter and a finger's breadth in thickness (cp. Lane's *Modern Egyptians*, i. 164): three of these were required for the meal of a single person (Luke xi. 5), and consequently one was barely sufficient to sustain life (1 Sam. ii. 36, "morsel," A. V., "loaf," R. V.; Jer. xxxvii. 21, "piece," A. V., "loaf," R. V.), whence the expression לֶחֶם לַחַץ, "bread of affliction" (1 K. xxii. 27; Is. xxx. 20), referring not to the quality (*pane plebeio*, Grotius), but to the



Two Egyptians carrying bread to the confectioner, who rolls out the paste, which is afterwards made into cakes of various forms, *c, d, e, f, g, h* (Wilkinson).

quantity: two hundred would suffice for a party for a reasonable time (1 Sam. xxv. 18; 2 Sam. xvi. 1). The cakes were sometimes *punctured*, and hence called חַלָּה (κολλυρίς; Ex. xxix. 2, 23; Lev. ii. 4, viii. 26, xxiv. 5; Num. xv 20; 2 Sam. vi. 19), and mixed with oil. Similar cakes, sprinkled with seeds, were made in Egypt (Wilkinson, ii. 386). Sometimes they were rolled out into wafers (רָקִיק; λάγανον; Ex. xxix. 2, 23; Lev. ii. 4; Num. vi. 15–19),



Egyptians making cakes of bread sprinkled with seeds (Wilkinson).

and merely coated with oil. Oil was occasionally added to the ordinary cake (1 K. xvii. 12). A more delicate kind of cake is described in 2 Sam. xiii. 6, 8, 10; the dough ("flour," A. V.) is kneaded a second time, and probably some stimulating seeds added, as seems to be implied in the name לְבִיבוֹת (from לֵבָב, *heart*: cp. our expression *a cordial*; κολλύριδες; *sorbitiunculae*). The cakes were now taken to the oven; having been first, according to the practice in Egypt, gathered into "white baskets" (Gen. xl. 16), סַלֵּי חֹרִי, a doubtful expression, referred by some to the whiteness of the bread (καναῖ χονδριτῶν; Aquil. κόφινοι γυρέως; *canistra farinae*; R. V. "baskets of white bread:" see notes in *Speaker's Comm.* and Delitzsch, *Genesis* [1887], in loco), by others, as in the A. V., to the whiteness of the baskets, and again, by connecting the word חֹרִי with the idea of a *hole*, to an open-work basket (*margin*, A. V.), or lastly to bread baked in a hole (Kitto, *Cyclop.* art. *Bread*). The baskets were placed on a tray and carried on the baker's head (Gen. xl. 16; Herod. ii. 35; Wilkinson, ii. 386).

An Egyptian carrying cakes to the oven (Wilkinson).

The methods of baking (אֲפָה) were, and still are, very various in the East, adapted to the various styles of life. In the towns, where professional bakers resided, there were no doubt fixed ovens, in shape and size resembling those in use among ourselves: but more usually each household possessed a portable oven (תַּנּוּר; κλίβανος), consisting of a stone or metal jar about three feet high, which was heated inwardly with wood (1 K. xvii. 12; Is. xliv. 15; Jer. vii. 18) or dried grass and flower-stalks (χόρτος, Matt. vi. 30); when the fire had burned down, the cakes were applied either inwardly (Herod. ii. 92) or outwardly: such ovens were used by the Egyptians (Wilkinson, ii. 385), and by the Easterns of Jerome's time (*Comment.* in Lam. v. 10), and are still common among the Bedouins

(Wellsted's *Travels*, i. 350; Niebuhr's *Descript. de l'Arabie*, pp. 45, 46). The use of a single oven by several families only took place in time of famine (Lev. xxvi. 26). Another species of oven consisted of a hole dug in the ground, the sides of which were coated with clay and the bottom with pebbles (Harmer, i. 487). Jahn (*Archaeol.* i. 9, § 140) thinks that this oven is referred to in the term כִּירַיִם (Lev. xi. 35); but the dual number is an objection to this view (see Knobel-Dillmann in loco); the term חֹרִי (Gen. xl. 16) has also been referred to it.

Other modes of baking were specially adapted to the migratory habits of the pastoral Jews, as of the modern Bedouins; the cakes were either spread upon stones, which were previously heated by lighting a fire above them (Burckhardt's *Notes*, i. 58) or beneath them (Belzoni's *Travels*, p. 84); or they were thrown into the heated embers of the fire itself (Wellsted's *Travels*, i. 350; Niebuhr, *Descript.* p. 46); or lastly, they were roasted by being placed between layers of dung, which burns slowly, and is therefore specially adapted for the purpose (Ezek. iv. 12, 15; Burckhardt's *Notes*, i. 57; Niebuhr's *Descript.* p. 46). The terms by which such cakes were described were עֻגָה (Gen. xviii. 6; Ex. xii. 39; 1 K. xvii. 13; Ezek. iv. 12; Hos. vii. 8), מָעוֹג (1 K. xvii. 12; Ps. xxxv. 16), or more fully עֻגַת רְצָפִים (1 K. xix. 6, lit. on the *hot stones*, R. V. marg.; "coals," A. V. and R. V.), the term עֻגָה referring, however, not to the mode of baking, but to the *rounded* shape of the cake (Gesen. *Thesaur.* p. 997): the equivalent terms in the LXX. ἐγκρυφίας, and in the Vulg. *subcinericius panis*, have direct reference to the peculiar mode of baking. The cakes required to be carefully turned during the process (Hos. vii. 8; Harmer, i. 488). Other methods were used for other kinds of bread; some were baked on a pan (מַחֲבַת, see Knobel-Dillmann on Lev. ii. 5; τήγανον; *sartago:* the Greek term survives in the *tajen* of the Bedouins), the result being similar to the *khubz* still used among the latter people (Burckhardt's *Notes*, i. 58), or like the Greek ταγήνιαι, which were baked in oil, and eaten warm with honey (Athen. xiv. 55, p. 646); such cakes appeared to have been chiefly used as sacred offerings (Lev. ii. 5, vi. 14, vii. 9; 1 Ch. xxiii. 29). A similar cooking utensil was used by Tamar (2 Sam. xiii. 9), named מַשְׁרֶת (τήγανον), in which she baked the cakes and then emptied them out in a heap (יָצַק, not *poured*, as if it had been broth) before Amnon. A different kind of bread, probably resembling the *ftita* of the Bedouins, a *pasty* substance (Burckhardt's *Notes*, i. 57), was prepared in a saucepan, מַרְחֶשֶׁת (ἐσχάρα; *craticula*; *frying-pan*, A. V. and R. V.; none of which meanings, however, correspond with the etymological sense of the word, which is connected with *boiling*; see Knobel-Dillmann on Lev. ii. 7); this was also reserved for sacred offerings (Lev. ii. 7; vii. 9). As the above-mentioned kinds of bread (the last excepted) were thin and crisp, the mode of eating them was by breaking (Lev. ii. 6; Is. lviii. 7; Lam. iv. 4; Matt. xiv. 19, xv. 36, xxvi. 26; Acts xx. 11; comp. Xen. *Anab.* vii. 3, § 22, ἄρτους διέκλα), whence the term פֶּרֶס, to *break* = to *give bread* (Jer. xvi. 7): the pieces broken for consumption were called κλάσματα (Matt. xiv. 20; John vi. 12). Old bread is described in Josh. ix. 5, 12, as *crumbled* (נִקֻּדִים; a sense preferred by Dillmann[2] after Aquil. ἐψαθυρωμένος; *in frusta comminuti*. The A. V. and R. V., "mouldy," follow the LXX. B. εὐρωτιῶν καὶ βεβρωμένος), a term which is also applied (1 K. xiv. 3) to a kind of biscuit, which easily crumbled (κολλυρίς; "cracknels," A. V. and R. V.). [W. L. B.] [F.]

BREASTPLATE of the High Priest. [PRIEST, Dress of.]

BREASTPLATE. [ARMS, p. 241.]

BREECHES (מִכְנָסַיִם; περισκελῆ; *feminalia*), part of the dress of the priests. They were short, and extended only from the loins to the thigh (Ex. xxviii. 42, xxxix. 28; Lev. vi. 19, xvi. 4; Ezek. xliv. 18: cp. Joseph. *Ant.* iii. 7, § 1; Philo, *de Monarch.* ii. 5). See PRIEST, Dress of. [F.]

BRETHREN OF JESUS. [BROTHER.]

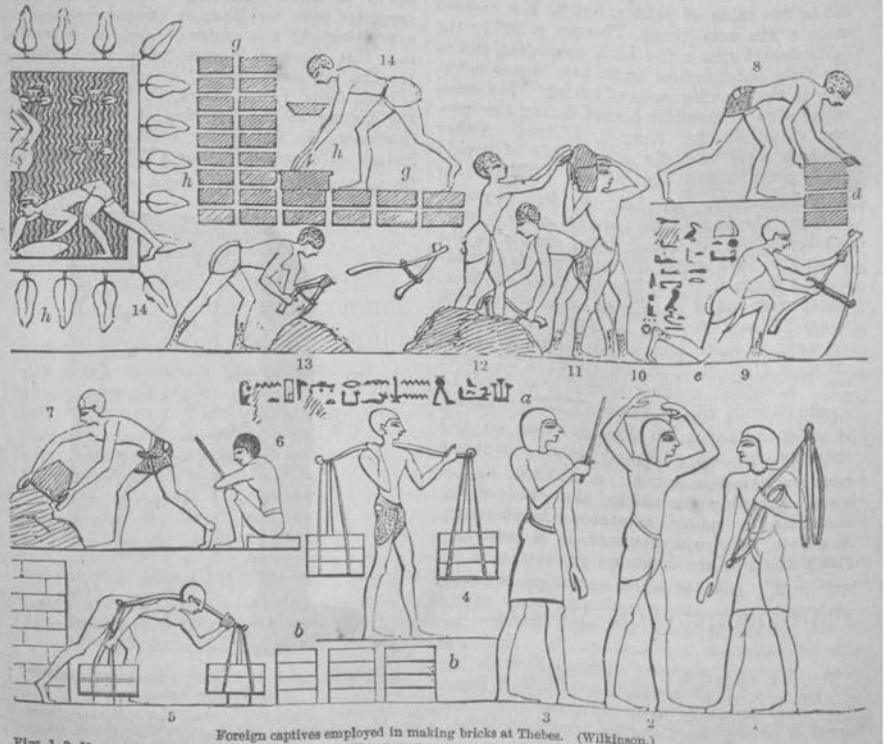
BRICK (לְבֵנָה, *made of white clay*, from לָבַן, *to be white*; πλίνθος; *later*; in Ezek. iv. 1, A. V., *tile*). Herodotus (i. 179), describing the mode of building the walls of Babylon, says that the clay dug out of the ditch was made into bricks as soon as it was carried up, and burnt in kilns (κάμινοι). The bricks were cemented with hot bitumen (ἄσφαλτος), and at every thirtieth row crates of reeds were stuffed in. This account agrees with the existing remains at some places, as at Mugheir, Ur (Pietro della Valle, *Viaggi*, ii. 844), and with the history of the building of the Tower of Confusion, in which the builders used brick instead of stone, and slime (חֵמָר; ἄσφαλτος) for mortar (Gen. xi. 3; Joseph. *Ant.* i. 4, § 3).

Egyptian brick stamped with the praenomen of Thotmes III. (Birch's *Ancient Pottery*.)

In the alluvial plain of Assyria, both the material for bricks and the bituminous cement, which bubbles up from the ground, and is collected and exported by the Arabs, were close

at hand for building purposes (Plin. *H. N.* xxxv. 15, 51, 178); but the Babylonian bricks were more commonly burnt in kilns than those used at Nineveh, which are chiefly sun-dried, like the Egyptian (see Maspéro, *Archéol. Égypt.* p. 8; Babelon, *Man. d'Archéol. Orient.* p. 12). Xenophon mentions a wall called the wall of Media, not far from Babylon, made of burnt bricks set in bitumen (πλίνθοις ὀπταῖς ἐν ἀσφάλτῳ κειμέναις), 20 feet wide and 100 feet high. Also another wall of brick 50 feet wide (Diod. ii. 7, 8, 12; Xen. *Anab.* ii. 4, § 12, iii. 4, § 11; Nah. iii. 14; Layard, *Nineveh*, ii. 46, 252, 278). While it is needless to inquire to what place, or to whom the actual invention of brick-making is to be ascribed, there is perhaps no place in the world more favourable for the process, none in which the remains of original brick structures have been more largely used in later times for building purposes. The Babylonian bricks are usually from 12 to 13 in. square, and 3½ in. thick. (English bricks are usually 9 in. long, 4½ wide, 2½ thick.) They most of them bear the name, inscribed in cuneiform character, of Nebuchadnezzar, whose buildings, no doubt, replaced those of an earlier age (Layard, *Nin. and Babyl.* pp. 505, 531). They also possess more of the character of tiles (Ezek. iv. 1). They were sometimes glazed and enamelled with patterns of various colours. Semiramis is said by Diodorus to have overlaid some of her towers with surfaces of enamelled brick bearing elaborate designs (Diod. ii. 8). Enamelled bricks have been found at Nimroud (Layard, ii. 312). Pliny (vii. 56, 57, 193) says that the Babylonians

Brick Arch, Thebes. (Birch's *Ancient Pottery.*)



Foreign captives employed in making bricks at Thebes. (Wilkinson.)

Figs. 1, 2. Men returning after carrying the bricks. Figs. 3, 6. Taskmasters. Figs. 4, 5. Men carrying bricks. Figs. 7, 9-13. Digging and mixing the clay or mud. Figs. 8, 14. Making bricks with a wooden mould, *d*, *h*. Fig. 14. Fetching water from the tank, *h*. At *e* the bricks (tôbi) are said to be made at Thebes.

used to record their astronomical observations on tiles (*coctilibus lateribus*). He also, as well as Vitruvius, describes the process of making bricks at Rome. There were three sizes: (1) 1½ ft. long, 1 ft. broad; (2) 4 (Greek) palms long, 12·135 in.; (3) 5 palms long, 15·16875 in. The breadth of (2) and (3) was the same. He says the Greeks preferred brick walls in general to stone (xxxv. 14, 49, 172; see Vitruv. ii. 3, 8). Bricks of more than 3 palms length and of less than 1½ palm are mentioned by the Talmudists (Gesen., p. 740; see Plin. *l. c.* 171). The Israelites, in common with other captives, were employed by the Egyptian monarchs in making bricks and in building (Ex. i. 14; v. 7). Kiln-bricks were not generally used in Egypt, but were dried in the sun, and even without straw are as firm as when first put up in the reigns of the Amunophs and Thothmes, whose names they bear. The usual dimensions vary from 20 in. or 17 in. to 14¼ in. long; 8¾ in. to 6¼ in. wide; and 7 in. to 4½ in. thick. When made of the Nile mud, or alluvial deposit, they required (as they still require) straw to prevent cracking, but those formed of clay taken from the torrent beds on the edge of the desert held together without straw; and crude brick walls had frequently the additional security of a layer of reeds and sticks, placed at intervals to act as binders (Wilkinson, i. 342 [1878]; Birch, *Ancient Pottery*, p. 9 sq. [1873], cp. Herod. i. 179). Baked bricks however were used, chiefly in places in contact with water. They are smaller than the sun-dried bricks. A brick pyramid is mentioned by Herodotus (ii. 136) as the work of King Asychis. Sesostris (ii. 138) is said to have employed his captives in building. Numerous remains of buildings of various kinds exist, constructed of sun-dried bricks, of which many specimens are to be seen in the British Museum, with inscriptions indicating their date and purpose. (See cut on p. 457.) Among the paintings at Thebes, one on a tomb, given on the preceding page, represents the enforced labours in brick-making of captives, who are distinguished from the natives by the colour in which they are drawn. Watching over the labourers are "task-masters," who, armed with sticks, are receiving the "tale of bricks" and urging on the work. The processes of digging out the clay, of moulding, and of arranging, are all duly represented; and though the labourers cannot be determined to be Jews, yet the similarity of employment illustrates the Bible history in a remarkable degree (Wilkinson, i. 342–345; Birch, *l. c.*: see Aristoph. *Av.* 1133, Αἰγύπτιος πλινθοφόρος; Ex. v. 17, 18). The Jews learned the art of brick-making in Egypt, and we find a complaint made by Isaiah that the people built altars of brick instead of unhewn stone as the Law directed (Is. lxv. 3; Ex. xx. 25).[a] [POTTERY.] [H. W. P.]

BRIDE, BRIDEGROOM. [MARRIAGE.]

[a] Mention is made of a brick-kiln in 2 Sam. xii. 31 Jer. xliii. 9, Nah. iii. 14; but it is very doubtful if מַלְבֵּן has the sense of brick-*kiln* in any of these passages. Cp. Driver, *Notes on the Heb. Text of the Books of Sam.* l. c.; and cp. *QPB.*[3] and R.V. marg. on the same passage. [S. R. D.]

BRIDGE. The only mention of a bridge in the canonical Scriptures is possibly and quite indirectly in the proper name Geshur (גְּשׁוּר), a district in Bashan, N.E. of the sea of Galilee, whose inhabitants, the Geshurites, are mentioned several times in Scripture (Deut. iii. 14; Josh. xii. 5, xiii. 13; 1 Ch. ii. 23; Gesen. p. 308). Absalom was the son of a daughter of the king of Geshur (2 Sam. iii. 3, xiii. 37, xiv. 23, 32; 1 Ch. iii. 2). The Chaldee paraphrase on Nahum ii. 6 renders שְׁעָרִים, "gates," by "bridges," where however dykes or weirs are perhaps to be understood, which, being burst by inundation, destroyed the walls of Nineveh (Diod. ii. 27). Judas Maccabaeus is said to have intended to make a bridge in order to besiege the town of Casphor or Caspis, situate near a lake (2 Macc. xii. 13). Josephus (*Ant.* v. 1, § 3), speaking of the Jordan at the time of the passage of the Israelites, says that it had never been bridged before, οὐκ ἔζευκτο πρότερον, as if since that time bridges had been made over it. In Is. xxxvii. 25, קֻר, *dig for water*, is rendered by LXX. γέφυραν τίθημι.

Permanent bridges over water do not appear to have been used by the Israelites in their earlier times, and west of the Jordan there are no rivers of permanent importance (see Amm. Marc. xiv. 8; Reland, p. 284); but we have frequent mention made of fords, and of their military importance (Gen. xxxii. 22; Josh. ii. 7 Judg. iii. 28, vii. 24, xii. 5; Is. xvi. 2).

Though the arch was known and used in Egypt as early as the 15th century B.C. (Wilkinson, ii. 302 sq.; Birch, i. 14), the Romans were the first constructors of arched bridges. They made bridges over the Jordan and other rivers of Syria, of which remains still exist, especially one between Lake Hûleh and the Sea of Galilee, called the Bridge of the daughters of Jacob (Stanley, p. 296; Irby and Mangles, pp. 90–92, 142, 143; Burckhardt, *Syria*, p. 315; Robinson, ii. 441). The bridge (γεφύρα) connecting the Temple with the upper city, of which Josephus speaks (*B. J.* vi. 6, § 2; *Ant.* xv. 11, 5), seems to have been an arched viaduct (Robinson, i. 288; iii. 224). [H. W. P.]

BRIER. [BRAMBLE.]

BRIMSTONE (גָּפְרִית,[a] *gophrith*; θεῖον; *sulphur*). There can be no question that the Hebrew word, which occurs several times in the Bible, is correctly rendered "brimstone;"[b] this meaning is fully corroborated by the old Versions. The word is very frequently associated with "fire:" "The Lord rained upon Sodom and Gomorrah brimstone and fire out of heaven" (Gen. xix. 24; see also Ps. xi. 6; Ezek. xxxviii.

[a] Probably allied to גֹּפֶר, a general name for such trees as abound with resinous inflammable exudations; hence גָּפְרִית, "sulphur," as being very combustible. See Gesenius, *s. v.* Cp. the Arabic كِبْرِيت, *kibrīt*, and the Assyrian *ku pru*. Lagarde conjectures it to be connected with the Bactrian *vohû kereti*, fumigant, Pers. *gō-girdi*, sulphur (*Uebersicht üb. d. im Aram., Arab., u. Hebr. üibliche Bildung d. Nomina*, pp. 217–20).

[b] From A.-S. *brennan*, "to burn," and *stone*.

22). In Job xviii. 15 and Is. xxx. 33, "brimstone" occurs alone, but no doubt in a sense similar to that in the foregoing passages, viz. as an expression synonymous with lightning, as has been observed by Le Clerc (*Dissert. de Sodomae subversione*, Comment. Pentat. adjecta, § iv.), Michaelis, Rosenmüller, Dillmann,[b] and others.[c] There is a peculiar sulphurous odour which is occasionally perceived to accompany a thunderstorm; the ancients draw particular attention to it: see Pliny (*N. H.* xxxv. 15), "Fulmina ac fulgura quoque sulphuris odorem habent;" Seneca (*Q. nat.* ii. 53), and Persius (*Sat.* ii. 24, 25). Hence the expression "fire and brimstone" in the Sacred writings to denote a storm of thunder and lightning. The stream of brimstone in Is. xxx. 33 is, no doubt, as Lee (*Heb. Lex.* p. 123) has well expressed it, "a rushing stream of lightning."

From Deut. xxix. 23, "the whole land thereof is brimstone...like the overthrow of Sodom," it would appear that native sulphur itself is alluded to (see also Is. xxxiv. 9). There are extensive deposits of sulphur in the volcanic districts of South-Eastern and North-Eastern Palestine, chiefly on the east side of Jordan. In the region of Argob or Trachonitis, and on the banks of the Yarmuk or Hieromax, these deposits are especially abundant. In the Yarmuk, near the ancient Gadara, are nine hot sulphurous springs (Tristram, *Land of Israel*, p. 462). But by far the most important deposits are round the Dead Sea, where sulphur is found, not only in the strata of the surrounding cliffs, but ejected in vast quantities from springs, both on the edge of and in the lake, and also in some of the ravines running down to it. From these different sources, it is scattered in lumps larger or smaller over the flats to the north and west of the lake. One of the most remarkable rock deposits is in the Wâdy Mahawat, at the south-west of the lake; where, on the sides of the Wâdy, are exposed large masses of bitumen overlying a thin stratum of sulphur (*Land of Israel*, p. 358). All along the western shore of the lake, from 'Ain Feshkah to Jebel Usdum, occur hot springs, producing an abundant deposit of sulphur. But nowhere are these phenomena more wonderful than in the gorge of the Callirrhoë or Zerka Main, and many of the lesser glens opening on to the east of the Dead Sea. The hot springs of Callirrhoë are annually depositing an incrustation of sulphur on the sides of the glen, to a thickness sometimes of 150 feet, and all traces of the ancient baths and the erections of Herod have long since been buried under many feet of brimstone. Scarcely less rapid has been the deposit on parts of the shore, a little to the south of the mouth of the Callirrhoë (Tristram, *Land of Moab*, p. 243, &c.). Not the least interesting feature of these sulphur deposits and springs, is that they support a peculiar and unique flora, chiefly of the Asclepiad family, such as *Daemia cordata*, described by Josephus with marvellous legends (*Bell. Jud.* vii. 6, 3). *Cleome trinervia* is another of these curious plants, with the smell and colour of the sulphur on which it grows. See also Irby and Mangles (*Travels*, p. 453), Burckhardt (*Travels*, p. 394), who observes that the Arabs use sulphur in diseases of their camels, and Shaw (*Travels*, ii. 159).

Sulphur was much used by the Greeks and Romans in their religious purifications (Juv. ii. 157; Plin. xxxv. 15): hence the Greek word *θεῖον*, lit. "the divine thing," was employed to express this substance. Sulphur is found nearly pure in different parts of the world, and generally in volcanic districts; it exists in combination with metals and in various sulphates; it is very combustible, and is used in the manufacture of gunpowder, matches, &c. Pliny (*l. c.*) says one kind of sulphur was employed "ad ellychnia conficienda." [W. H.] [H. B. T.]

[b] A different explanation is preferred by Bp. Harold Browne (*Speaker's Comm.* on Gen. xix. 24) and Dean Payne Smith (*O. T. Comm. for Engl. Readers*, in loco). Taking "brimstone" to mean bitumen, the bitumen, whether volcanic or otherwise, was made the instrument by which the offending cities were destroyed.

BROIDED, BROIDERED. See EMBROIDERER. The word "broided" occurs in the A. V. [ed. 1611] of 1 Tim. ii. 9, "not with broided hair," and has been replaced by the corrupt form "broidered" in many more modern editions. "Broided" (see marg. *plaited*) is an old form of *braided*, which word has been placed in this text by the R. V. [F.]

BROOK. Four Hebrew words are thus rendered in the O. T.

1. אֲפִיק, *âphik* (Ps. xlii. 1 [2]); according to Gesenius, properly the *bed*, which holds in or contains the stream. It occurs only in the poetical Books. Elsewhere it is rendered "stream," "channel," "river."

2. יְאוֹר, *yĕôr* (Is. xix. 6 [A. V. "the brooks of defence," R. V. "the streams of Egypt"], 7, 8 [A. V. "brooks," R. V. "Nile" in both *vv.*], xxiii. 3, 10 [A. V. "river," R. V. "Nile" in both *vv.*]), an Egyptian word, according to Ebers = *aur āa*, "the great stream" (*Aegypten*, &c., p. 338), and which occurs on the Rosetta-inscription (*c.* B.C. 195). It is the Memphitic *jaro*, Sahidic *jero*, and Assyr. *jârû*, and is generally applied to the Nile, or to the canals by which Egypt was watered (see MV.[11] *s. v.*). The only exceptions to this usage are found in Dan. xii. 5, 6, 7, where A. V. and R. V. read "river" (see *Speaker's Comm.*[2] on Dan. xii. 5), and the word is applied to the Tigris.

3. מְיכָל, *mîcâl* (2 Sam. xvii. 20), which occurs but once, and is of very uncertain derivation and meaning, though some such sense as "rivulet" (A. V. and R. V. "brook") would be in accordance with the context (see Driver, *Notes on the Heb. Text of the Books of Sam.* in loco). The Targum erroneously paraphrases it "Jordan."

4. נַחַל, *nachal*, a term applied both to the dry torrent-bed (Num. xxi. 12, A. V. and R. V. "valley"; Judg. xvi. 4, A. V. and R. V. "valley" in text, "brook" in marg.) and to the torrent itself (1 K. xvii. 3, A. V. and R. V. "brook"). It corresponds with the Arabic *wâdy*, the Greek χειμάρρους, the Italian *fiumara*, and the Indian *nullah*. For further information, see RIVER. [W. A. W.] [F.]

BROTHER (אָח; ἀδελφός). The word is sometimes used in Hebrew as in all languages in

a general or metaphorical sense. In the O. T. the term "brother" is sometimes applied to (1) kinsman, and not a mere brother—*e.g.* nephew (Gen. xiv. 16, xiii. 8), husband (Cant. iv. 9); (2) one of the same tribe (2 Sam. xix. 13); (3) of the same people (Ex. ii. 11), or even of a cognate people (Num. xx. 14); (4) an ally (Amos i. 9); (5) any friend (Job v. 15); (6) one of the same office (1 K. ix. 13); (7) a fellow-man (Lev. xix. 17); (8) metaphorically of any similarity. It is a very favourite Oriental metaphor, as in Job xxx. 19, "I am become a brother to the jackals" (Gesen. *s. v.*).

The word ἀδελφὸς has a similar range of meanings in the N. T., and is also used for a disciple (Matt. xxv. 40, &c.); a fellow-worker, as in St. Paul's *Epp.* passim; and especially a Christian. Indeed, we see from the Epistles and the early Fathers that it was by this name that Christians usually spoke of each other. The name "Christian" was merely used to describe believers objectively, *i.e.* from the Pagan point of view, as we see from the places where it occurs, viz. Acts [xi. 26], xxvi. 28, and 1 Pet. iv. 16. Cp. Cremer, *Bibl.-theolog. Wörterb. d. N Tlich. Gräcität*,[4] s. n.

The Jewish schools distinguish between "brother" and "neighbour;" "brother" meant an Israelite by blood, "neighbour" a proselyte. They allowed neither title to the Gentiles; but Christ and the Apostles extended the name "brother" to all Christians, and "neighbour" to all the world, 1 Cor. v. 11; Luke x. 29, 30 (Lightfoot, *Hor. Hebr. ad Matt.* v. 22).

We must now briefly touch on the difficult and interesting question as to who were "the brethren of the Lord," and pass in review the theories respecting them. And first we would observe that in arguing at all against their being the *real* brethren of Jesus, far too much stress has been laid on the assumed indefiniteness of meaning attached to the word "brother" in Scripture. When the word is used *historically* and *continuously*, there is no such indefiniteness. In all the adduced cases it will be seen that, when the word is used in any but its proper sense, the context, in every case of real importance, prevents the possibility of confusion; and indeed in the only two exceptional instances (not metaphorical), viz. those in which Lot and Jacob are respectively called "brothers" of Abraham and Laban, the word is only extended so far as to mean "nephew;" and it must be remembered that even these exceptions are quoted from a single Book, many centuries earlier than the Gospels. If then the word "brethren," as repeatedly applied to James, &c. really means "cousins" or "kinsmen," it will be the *only* instance of such an application being repeatedly used without any data being furnished to correct the laxity of meaning. Again, no really parallel case can be quoted from the N. T., except in merely rhetorical and tropical passages; whereas when "nephews" or "cousins" are meant they are always specified as such, as in Col. iv. 10, Acts xxiii. 16 (Kitto, *The Apostles*, &c., p. 165 sq.). It is, then, obvious that there is no adequate warrant in the language alone, to take "brethren" as meaning "relatives;" and therefore the *à priori* presumption is in favour of a literal acceptation of the term. We have dwelt the more strongly on this point, because it seems to have been far too easily assumed that no importance is to be attached to the mere fact of their being *invariably* called Christ's *brothers;* whereas this consideration taken alone would go far to prove that they really were so.

There are, however, three traditions respecting them. They are first mentioned (Matt. xiii. 56) in a manner which would certainly lead an unbiassed mind to conclude that they were our Lord's uterine brothers. "Is not this the carpenter's son? Is not *His mother* called Mary? *and His brethren* James, and Joses, and Judas, and Simon? *and His sisters*, are they not all with us?" But since we find that there was a "Mary, the mother of James and Joses and Judas and Simon" (Matt. xxvii. 36), and that a "James and Judas (?)" were sons of Alphaeus (Luke vi. 15, 16), the most general tradition is —I. That they were all our Lord's first cousins, the sons of Alphaeus (or Clopas), who is supposed to have been a brother of Joseph (Hegesippus *ap.* Euseb. *H. E.* iv. 22) and Mary, a sister of the Virgin. This tradition is accepted by Jerome (*Cat. Script. Ecc.* 2), Augustine, and the Latin Church generally, and is now the one most commonly received. Yet there seem to be overwhelming arguments against it: for (1) The reasoning entirely depends on three very doubtful assumptions, viz. *a.* that "his mother's sister" (John xix. 25) must be in apposition with "Mary, the wife of Cleophas," which would be improbable, if only on the ground that it supposes two sisters to have had the same name, a supposition substantiated by very few parallel cases [Wieseler (cp. Mark xv. 40) thinks that Salome, the wife of Zebedee, is intended by "his mother's sister"]; *b.* that "Mary, the mother of James," was the wife of Alphaeus, *i.e.* that the James intended in Luke vi. 15 is Ἰάκωβος ὁ Ἀλφαίου; *c.* that Cleophas, or more correctly Clopas, whose wife Mary was, is identical with Alphaeus (Hegesipp.); which may be the case, although it cannot be proved. (2) If the cousins of our Lord were meant, it would be signally untrue that "neither did his brethren believe on him" (John vii. 5 sq.), for in all probability three out of the four (viz. James the Less, Matthew (or Levi), and Simon, as well as Jude, the brother (or, more probably, the son) of James, were actual *Apostles*. We do not see how this objection can be removed. (3) It is quite unaccountable that these "brethren of the Lord," if they were only his cousins, should be always mentioned in conjunction with the Virgin Mary, and never with their own mother Mary, who was both alive and in constant attendance on our Lord. (4) The "brethren of the Lord" are generally spoken of as *distinct from* the Apostles: see Acts i. 14, 1 Cor. ix. 15; and Jude (*v.* 17) seems clearly to imply that he himself was not an Apostle. It seems to us that these four objections are quite adequate to *necessitate* the rejection of the very slight grounds adduced for the identification of the "brethren of the Lord" with the "sons of Alphaeus." If "the Lord's brethren" were His cousins, what possible reason could have prevented the Evangelists from calling them cousins? Why, in writing plain prose, should they have gone out of their way to suggest a false inference? Whatever happens to other

theories, *this* at least (though it has been the favourite *theory* in the Western Church) must be absolutely rejected. It was an arbitrary attempt on the part of Jerome to assert the virginity not only of Mary but of Joseph. He invented it in A.D. 383 as furnishing a plausible argument against Helvidius; and afterwards, when it had served its temporary purpose, he quietly allowed it to fall into abeyance (see Lightfoot, *Galatians*, pp. 247–249). The real usage of the word "brethren" (apart from its lax and metaphorical applications) is alone sufficient to relegate this theory into the region of obsolete conjectures.

II. A second tradition accepted by Hilary, Epiphanius, and the Greek Fathers generally, makes them the sons of *Joseph* by a former marriage with a certain Escha or Salome of the tribe of Judah; indeed Epiphanius (*Haeres.* 29, § 4) even mentions the supposed order of birth of the four sons and two daughters. But Jerome (*Com. in Matt.* xii. 49) slights this as a mere conjecture, borrowed from the "deliramenta Apocryphorum," and Origen says that it was taken from the Gospel of St. Peter. The only shadow of ground for its possibility is the generally received tradition that there was a difference of age between Joseph and the Virgin. On the other hand, it is a fatal objection to this late tradition that, if the brethren were sons of Joseph by an earlier marriage, James as the eldest of them was legally "the son of David" and the lineal heir to David's throne.

III. Theophylact suggested that they were the offspring of a levirate marriage between Joseph and the wife of his deceased brother Alphaeus. But, apart from all evidence, it is obviously idle to examine so arbitrary an assumption.

The arguments *against* their being the sons of the Virgin after the birth of our Lord, are founded on—(1) The almost constant tradition of her ἀειπαρθενία. St. Basil (*Serm. de S. Nativ.*) even records a story that "Zechary was slain by the Jews between the porch and the altar" for affirming her to be a Virgin *after*, as well as before the birth of her most holy Son (Jer. Taylor, *Duct. Dubit.* ii. 3, 4). Still the tradition was *not* universal: it was denied, for instance, by those who were called Antidicomarianitae and Helvidiani; and it appears to have been unknown to, or unaccepted by, Tertullian and Victorinus bishop of Petavium. To quote Ezek. xliv. 2 as any *argument* on the question is plainly absurd. (2) The fact that on the cross Christ commended His mother to the care of *St. John*; but this is easily explicable on the ground of His brethren's apparent disbelief in Him at that time, though they seem to have been converted by the Resurrection. Indeed the objection, if it has any weight at all, tells also against the two other theories. (3) The identity of their names with those of the sons of Alphaeus. This argument loses every particle of weight, when we remember the constant recurrence of names in Jewish families, and the extreme commonness of these particular names. In the N. T. alone there may be at least five contemporary Jameses, and several Judes, not to mention the (at least) 21 Simons, 17 Joses, and 16 Judes mentioned by Josephus.

On the other hand, the arguments *for* "the brethren of the Lord" being (as they are exclusively called) his actual brethren are numerous and, *taken collectively*, to an unprejudiced mind almost irresistible, although singly they are open to objections: *e.g.* (1) The word πρωτότοκος. υἱός, Luke ii. 7. (2) Matt. i. 25, οὐκ ἐγίνωσκεν αὐτὴν ἕως οὗ ἔτεκεν, κ.τ.λ., to which, Alford justly remarks, only one meaning *could* have been attached but for preconceived theories about the ἀειπαρθενία. (3) The general tone of the Gospels on the subject. The "brethren" are *constantly* spoken of *with* the V. Mary, and with no shadow of a hint that they were not her own children (Matt. xii. 46; Mark iii. 31, &c.). (4) The inference which would be naturally drawn from Matt. i. 18. It can, we think, be hardly denied that any one of these arguments is singly stronger than those produced on the other side.

To sum up, then, we have seen (I.) that "the brethren of the Lord" could hardly have been identical with the sons of Alphaeus, and (II.) that we have no grounds for supposing them to have been the sons of Joseph by a previous, or (III.) a levirate marriage; and (IV.) that the arguments in favour of their being actual brothers of our Lord are very strong, and that the tradition on the other side (derived partly from apocryphal Gospels, partly from guesswork) is not sufficiently weighty or unanimous to set them aside. Finally, this tradition of the perpetual virginity of the mother of our Lord (which any one may hold, if he will, as one of the "pie credibilia," Jer. Taylor, *Duct. Dub.* ii. 3, 6) is easily accounted for by the widespread Manichean error of the inferiority of the wedded to the virgin state. Scripture in no way requires us to believe it, and the notion of a *nominal* marriage, such as prevailed in the 3rd and 4th centuries, was absolutely unknown to the Jews. Since Mary's previous virginity is alone requisite to the Gospel narrative, we must regard the question of her ἀειπαρθενία as one of mere curiosity. [JAMES; JOSES; JUDE.]

The question has been discussed by many writers. Besides the chief New Testament commentators, see Herder, *Briefe Zweener Bruder Jesu*, 1775; Blom, *de τοῖς ἀδελφοῖς*, 1839; Schaff, *Das Verhaltniss der Jacobus*, &c., 1842; Lange, *Leben Jesu*, i. 421–437 (E. T.); Keim, *Jesu von Nazara*, ii. 143 (E. T.); Laurent, *Neutest. Stud.* p. 153 ff. (1856); Pressensé, *Jesus Christ*, p. 287; Mill, *Mythical Interpretn.* pp. 219–274; McClellan, *New Test.* p. 654; and especially Bishop Lightfoot, *Galatians*, pp. 241–274. Bishop Lightfoot supports the hypothesis of Epiphanius. The Helvidian view may claim to be derived directly from Scripture; is supported by the high authority of Tertullian, who would have been eager to reject it if there had been any grounds for doing so; and is accepted by Herder, Winer, Wieseler, Laurent, Meyer, Stier, Alford, Weiss, Ewald, De Wette, Keim, De Pressensé, McClellan, and an increasing number of modern critics. [F. W. F.]

BRUIT, Jer. x. 22; Nah. iii. 19. The word, now obsolete, means report, rumour. The A. V. follows the Genevan Version; the R. V. has substituted "rumour" for "bruit" in Jeremiah, but retained "bruit" in Nahum. See *D. B.*, Amer. ed. [F.]

BUBASTIS. [PIBESETH.]

BUCKLER. [ARMS, II. 5; SHIELD.]

BUK'KI (בַּקִּי, of uncertain meaning [see Ges. and MV.[11]]; *Bocci*). **1.** Son of Abishua and father of Uzzi, fifth from Aaron in the line of the high-priests in 1 Ch. v. 31, vi. 36 (LXX. vi. 5 [B. Βωέ, A. Βωκαΐ], 51 [BA. Βωκαΐ]), and in the genealogy of Ezra, Ezra vii. 4 (B. Βοκκεί, A. -ί) and 1 Esd. viii. 2 (BA. Βοκκά), where he is called BOCCAS, which is corrupted to BORITH (2 Esd. i. 2). Whether Bukki ever filled the office of high-priest, we are not informed in Scripture. Epiphanius in his list of the ancestors of Jehoiada, whom he fancifully supposes to be brother of Elijah the Tishbite, omits both Bukki and Abishua (*advers. Melchizedec.* iii.). Josephus (*Ant.* viii. 1, § 3) expressly says that all of Aaron's line between Joseph (Abishua) the high-priest and Zadok, who was made high-priest in the reign of David, were private persons (*ἰδιωτεύσαντες*), *i.e.* not high-priests, and mentions by name "Bukki the son of Joseph the high-priest," as the first of those who lived a private life, while the pontifical dignity was in the house of Ithamar. But in v. 11, § 5, Josephus says as expressly that Abishua (there called Abiezer), having received the high-priesthood from his father Phinehas, transmitted it to his own son Bukki, who was succeeded by Uzzi, after whom it passed to Eli. We may conclude therefore that Josephus had no more means of knowing for certain who were high-priests between Phinehas and Eli than we have; and we may adopt the opinion, which is far the most probable, that there was no high-priest between them, unless perhaps Abishua. For an account of the absurd fancies of the Jews, and the statements of Christian writers relative to the succession of the high-priests at this period, see Selden, *de Success. in Pontif. Hebr.*; also *Genealog. of our Lord*, ch. x. [A. C. H.]

2. B. Βακχίρ, A. Βοκκί, F. Βαχχί; *Bocci*. Son of Jogli, "prince" (נָשִׂיא[a]) of the tribe of Dan, one of the ten men chosen to apportion the land of Canaan between the tribes (Num. xxxiv. 22). [A. C. H.]

BUKKI'AH (בַּקִּיָּהוּ, *vide* BUKKI; Βουκίας, B. Βουκείας [*bis*], A. Βοκκίας [*v.* 4], Κοκκίας [*v.* 13]; *Bocciau*), a Kohathite Levite, of the sons of Heman, one of the musicians in the Temple, the leader of the sixth band or course in the service (1 Ch. xxv. 4, 13). [A. C. H.]

BUL. [MONTHS.]

BULL, BULLOCK, terms used synonymously with ox, oxen, in the A. V. and R. V., as the representatives of several Hebrew words; twice in the N. T. as the rendering of *ταῦρος* (Heb. ix. 13, x. 4).

Behemah, בְּהֵמָה, "beast," is used for cattle in general, and is not always confined to horned cattle, *e.g.* in Gen. xxxiv. 23, "Shall not their *cattle* be ours?"

Bâkâr, בָּקָר, is properly a generic name for horned cattle when of full age and fit for the plough, without distinction of sex. It is almost always used collectively, though occasionally for an individual, as in Is. xi. 7. Accordingly it is variously rendered *bullock* (Is. lxv. 25, R. V. "ox"), *cow* (Ezek. iv. 15), *oxen* (Gen. xii. 16). Hence in Deut. xxi. 3, עֶגְלַת בָּקָר is *a heifer* [R. V. "an heifer of the herd"]; Ex. xxix. 1, פַּר בֶּן־בָּקָר, *a young bullock*; and in Gen. xviii. 7, simply בֶּן־בָּקָר, rendered *a calf* in A. V. and R. V. It is derived from an unused root, בָּקַר, "to cleave," hence "to plough," as in Latin *armentum* is *aramentum*. It is identical with the Arabic بَقَر, *bakara*.

Shôr, שׁוֹר, Arabic ثَوْر, *thawr*, differs from בָּקָר in the same way as שֶׂה, a *sheep*, differs from צֹאן, a *flock* of sheep. It is a generic name, but almost always signifies *one head of horned cattle*, without distinction of age or sex. It is very seldom used collectively. The Chaldee form of the word, תּוֹר, occurs in Ezra vi. 9, 17, vii. 17; Dan. iv. 25, &c.; and Plutarch (*Sull.* c. 17) says *Θῶρ οἱ Φοίνικες τὴν βοῦν καλοῦσι*. [It is one of the few words which appear to be common to Semitic and Aryan peoples; cp. *ταῦρος*, *taurus*, Sk. *sthûras* (according to Curtius, meaning *strong*), Germ. *stier*, Engl. *steer*, though how this community is to be explained must be matter of conjecture. There is no apparent Semitic derivation (cp. Fleischer in Levy, *NHWB.* iv. p. 680).—S. R. D.]

'Ègel, *'ęgelah*, עֵגֶל, עֶגְלָה, Arabic عِجْل, *'ajil*, *a calf*, *male* or *female*, *properly of the first year*, derived, as Gesenius thinks, from an Aethiopic word signifying *foetus*, *embryo*, *pullus*, *catulus*, while others derive it from עָגַל, *volvit*, *rotavit*, *festinavit*. The word is used of a trained heifer (Hos. x. 11), of one giving milk (Is. vii. 21, 22), of one used in ploughing (Judg. xiv. 18), and of one three years old (Gen. xv. 9). Almost synonymous with עֵגֶל is פַּר, the latter signifying generally a young bull of two years old, though in one instance (Judg. vi. 25) possibly a bull of seven years old. It is the customary term for bulls offered in sacrifice, and hence is used metaphorically in Hos. xiv. 3, "so will we render, 'as bullocks,' our lips," R. V. The LXX. and Syr. have, however, "the fruit of our lips," reading *i.e.* פְּרִי for פָּרִים, and this is preferred by many moderns (see *QPB.*[2] in loco).

There are four or five passages in which the word אַבִּרִים, *'abirim*, is used for *bulls*. It is the plural of אַבִּיר, *strong*, whence its use. See Ps. xxii. 13, l. 13, lxviii. 31; Is. xxxiv. 7; Jer. l. 11.

All the above words refer to domesticated cattle, which formed of old, as now, an important part of the wealth of the people of Palestine. [See CATTLE.] [W. D.] [H. B. T.]

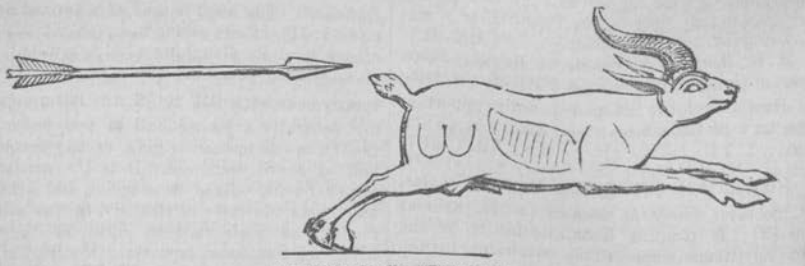
BULL, WILD, the A. V. rendering of תְּאוֹ, *tô* (Is. li. 20), the form תְּאוֹ, *tô* (Deut. xiv. 5), being translated "wild ox," the R. V. rendering both by "antelope." The LXX. gives *ὄρυξ* in the latter, and *σεντλίον* (!) in Isaiah (*incpte scripsit*, Gesenius); the Vulg. *oryx* in both passages. It

[a] The "princes" are only specified in the case of seven tribes out of the ten; not in the case of Judah, Simeon, and Benjamin.

is almost certain that the LXX., Vulgate, and R. V. are right in the rendering "oryx" or "antelope," though doubts are expressed under Ox. From its position in the catalogue of animals permitted as food, it must have been some creature of the bovine or antelope classes; and the allusion in Isaiah shows it to have been wild and untameable. Neither Bochart, Gesenius, or other authority, offers any satisfactory derivation for the word, nor does it seem to have any representative in Arabic. The Chaldaean Onkelos and some Arabic commentators (Bochart, *Hieroz.* ii. p. 367) propose some species of wild cattle. But to this Rosenmüller reasonably objects that the buffalo is not indigenous in Syria. Though it is now domesticated in the swamps of the Huleh and other similar localities, yet it is an introduction from India, and there is no reason to believe that it was ever known in Western Asia, until brought back by the Khalifs after their conquest of Persia. Wild oxen or bulls are frequently represented in Assyrian sculptures. Though now used in Egypt, we do not find it portrayed on any of the ancient monuments. Nor can we assign the *teô* to the extinct aurochs, since that animal is

Assyrian King hunting wild Bulls. (Nimrud.)

designated by *rcêm*; and moreover, as Bochart observes (*loc. cit.*), it was far too powerful a creature to be captured in a net, and as a matter of fact we know that it was by pitfalls and not by nets that it was taken. Τάφρους αὐταῖς κρυπτὰς ἐργάζονται βαθείας, καὶ ταύταις αὐτοὺς ἑλλοχῶσιν (Aelian, xvii. 45). *Hos studiose foveis captos interficiunt* (Caesar, *de Bell. Gall.* vi. 28). The deer and antelope tribes, on the contrary, were and are taken by dogs, nets, and snares. The *teô*, therefore, probably stands for some of the larger antelopes, formerly much more common in these regions than at present, and of which three species still linger in scanty numbers on the eastern frontier of Palestine. The antelope or gazelle frequently occurs in hunting scenes in Assyrian sculptures. These are the *Antilope leucoryx*, Pall., or Oryx; the Addax, *Antilope addax*, Licht., and the Bubale, *Antilope bubalis*, Pall.; the بقه الوشر *bekk'r el wash*, "wild cow" of the Arabs. As the Addax is pretty generally identified with the *Strepsiceros* of Pliny or the Pygarg, there remain but two claimants, the Bubale and the Oryx, and we may reasonably accept the rendering of the LXX., and allow *teô* to mean "antelope" generally, or "oryx" specifically.



Antelope or Gazelle. (Kouyunjik.)

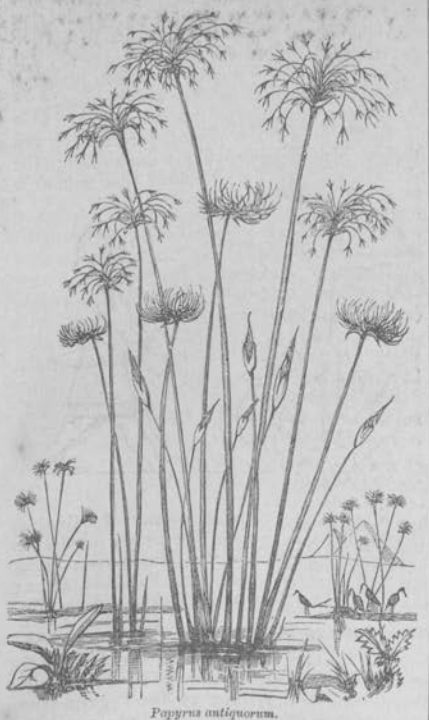
The *Antilope leucoryx* is a very beautiful and graceful antelope, with long slender recurved horns, which attain a length of 3 feet. It is of a sandy-white colour on the lower parts and face, with a darker facial stripe, and sandy-coloured flanks. It inhabits Kordofan, Sennaar, the Sahara, Upper Egypt, Arabia, and the Syrian desert, occasionally extending, according to some authorities, into Persia. [H. B. T.]

BULRUSH, RUSH, FLAG, REED, PAPER-REED, PAPYRUS.[a] Six Hebrew words, גֹּמֶא, אַחוּ, אֲגַמּוֹן, סוּף, עָרוֹת, קָנֶה, are represented in the A. V. and R. V. by one or other of these names; and as the translations are frequently interchanged, the whole group may be conveniently considered together.

Gôme, גֹּמֶא (πάπυρος, βιβλίς, θήβη, ἕλος; *papyrus, scirpus, juncus*), is variously translated in the English Versions: in Ex. ii. 3, "ark of bulrushes," A. V. and R. V., but in the margin of R. V. *papyrus*: in other passages it is rendered "rush" in both A. V. and R. V., except in Is. xviii. 2, where the R. V. has "vessels of papyrus." The Hebrew word means literally "the absorber," from the root גָּמָא, *hausit*; but the

[a] This article is in place of REED in Vol. III., where the subject is not so fully treated.

word may be Egyptian, cp. the Coptic *gōme*, "reed" (MV.[II]). It is the celebrated paper-reed of Egypt, *Papyrus antiquorum*, Willd.; a



Papyrus antiquorum.

name which, in some form or other, has found its way into almost every language in the world. From it was made the ark in which the infant Moses was preserved; but, as is stated by Isaiah (xviii. 2), it was employed in the construction of much larger vessels. Its employment in ship- or boat-building is frequently alluded to by ancient writers. Πλοῖα ποιοῦσιν ἐξ αὐτοῦ, Theophr. *Hist. Pl.* iv. 9. "Naves primum repertas in Aegypto in Nilo ex papyro," Plin. vii. 56. "Cum tenet omnia Nilus, conseritur bibula Memphitis cymba papyrus," Luc. *Phars.* iv. 136. Celsius (*Hierob.* ii. 144–152) adduces numerous references to the various uses of the papyrus from classical authors. The Egyptians employed it not only in the construction of light vessels for the navigation of the Nile, but for baskets, ropes, sails, shoes, sandals, napkins, and all sorts of domestic utensils. For these latter, as for boats, a wicker skeleton of papyrus stem was caulked and then thinly coated with tenacious pitch, till, as Pliny (xvi. 36) describes it, it became "glutino tenacior, rimisque explendis fidelior pice." Bruce states (vol. vi. p. 7) that boats of papyrus are still used among the Abyssinians. They have not, however, been found in the Central Lakes of Africa, where the plant abounds, probably being too fragile for the storms of these inland seas. But the celebrity of the papyrus is derived from its employment in the manufacture of paper, being the earliest material so used, and which has given its name to the material throughout the world. The method of preparation was very simple. Sir Gardner Wilkinson thus describes it: "Papyri are of the most remote Pharaonic periods. The mode of making them was as follows: The interior of the stalks of the plant, after the rind had been removed, was cut into thin slices in the direction of their length, and these being laid on a flat board in succession, similar slices were placed over them at right angles; and their surfaces being cemented together by a sort of glue, and subjected to a proper degree of pressure and well dried, the papyrus was completed. The length of the slices depended of course on the breadth of the intended sheet, as that of the sheet on the number of slices placed in succession alongside each other, so that though the breadth was limited, the papyrus might be extended to an indefinite length." The papyrus was so highly valued in Egypt that the right of growing and selling it was a government monopoly from which large profits accrued. It formerly abounded on the Nile and in the shallow lagoons of Lower Egypt, where, with its spreading rhizomes running laterally just below the surface of the ooze, it helped largely to consolidate the mud of the Nile. Ancient writers represent it as forming a dense forest on some parts of the river banks. This was only in the permanent marshes, or lagoons, as alluded to by Job (viii. 11), "Can the rush (*gôme*) grow up without mire?" It is strange that it has become utterly extinct in Egypt, and that to find it at all in Africa we must go to the marshes of the White Nile in Nubia 7° north latitude. Thence southwards it is common; and in the region of the Central Lakes, Victoria Nyanza and Albert Nyanza, vast tracts of swamp are covered with it. But it still exists in several places in Palestine, the only region of Asia where this characteristically Ethiopian plant has been found. It is there well known as بابور, *bābūr*, i.e. πάπῡρος; a term which, like its double βύβλος, is of Egyptian origin. The most interesting locality is at the north-east corner of the Plain of Gennesareth, where the copious fountain of 'Ain et Tîn feeds a small but dense swamp, filled with a mass of tall papyrus, very close to the supposed site of the scriptural Bethsaida. Higher up the Jordan valley, below Tell Kadi, the upper part of Lake Huleh, the ancient Merom, is covered with a floating mass of papyrus many acres in extent, quite impenetrable from the treacherous character of the morass beneath the masses of papyrus root, while the beautiful blossom tufts which surmount the stems wave with the gentlest air like a silver sea. There are also patches of papyrus on the Plain of Sharon, in a little swamp, Munkalid, N.E. of Jaffa; in the Nahr el Wedja; and also near the source of the Zerka river, under Mount Carmel at its south-east extremity. This has been supposed to be a distinct species, *Cyperus syriacus*, Parl., but it is now clearly proved to be identical, though growing under less favourable circumstances. The papyrus also claims a place in the Flora of Europe, being found by the Anapus river near Syracuse (probably introduced), and where paper is still manufactured from it. It is also stated to grow in the Lake Trasimene in Etruria.

The papyrus is the giant monarch of the rush tribe, or *Cyperaceae*, to which natural order it belongs. The root is very bulky, spreading and fleshy, with many rhizomes sending out shoots upwards and rootlets downwards, and from it springs a tall triangular stem tapering upwards, and protected by a sheath. These stems are about ten feet high, but in warm swamps, like that of Lake Huleh, they reach the length of sixteen feet. When the stem has nearly attained its full length, the sheath opens, setting free a beautiful tuft like a feather broom, displaying, in botanical phraseology, a many-rayed umbel. The secondary umbels are composed of three or four short rays, with an involucel of the three awl-shaped leaflets. The flowers are a short spike at the extremity of each ray, and the earliest do not appear till towards the end of summer.

Agmôn, אַגְמוֹן. The word is frequently used with a figurative or metaphorical meaning, and is always so rendered both in the LXX. and the Vulgate. Yet there can be no question as to its primary signification. It is from the root אגם, *agam* (inusit.), allied to the Arabic اجم, *ag'am*, "a marshy pool or reed-bed." "Densi frutices, arundinetum, palus" (Freytag).

In Is. ix. 14, xix. 15, *agmôn* occurs in the proverbial expression "branch and rush," A. V., "palm-branch and rush," R. V., simply equivalent to our "root and branch," and so interpreted in the ancient Versions, ἀρχὴν καὶ τέλος, *μέγαν καὶ μίκρον*, *caput et caudam*. In Job xli. 2 it is translated "hook" by A. V.; "rope," marg. *rope of rushes*, by R. V. Celsius (*Hierob.* i. 468) gives the best explanation of this passage, viz. that allusion is made to the common practice of carrying fish that have been caught by a wisp of rushes thrust through their gills (cp. however Delitzsch in loco). In the other passage in Job (xli. 20) in which *agmôn* is translated by A. V. "chaldron," it has been suggested that the word has a different derivation from an Arabic root signifying "to burn," the interpretation adopted by the LXX. and Vulg. (ἄνθραξ, *ferens*). The R. V. seems to have solved the difficulty by suggesting "*burning* rushes." The rapidity and terrific roar with which a cane-brake once set on fire will burn can scarcely be understood by any who have not seen the result of such a conflagration in an Eastern ravine overgrown with reeds. It might be very doubtful whether *agmôn* could be referred to any special species of reed or cane were it not for the expression in Is. lviii. 5, "to bow down his head as a bulrush" (A. V., "rush" R.V.), which probably points to some rush easily yielding to the wind, and with a tuft or panicle at the top. The same plant must be referred to in Matt. xi. 5, "a reed shaken with the wind." And while the general term for reeds is קָנֶה, it is probable that אַגְמוֹן is referable to one familiar species. This can be no other than the reed typical of the country, *Arundo donax* (L.), in Arabic قصب, *kasab*, a very tall cane about 12 feet high, with a magnificent panicle of blossom at the top, and so slender and elastic that it will lie perfectly flat under a gust of wind, and immediately recover its erect position. The *Arundo donax* is very common in Egypt and Syria, growing not only in marshes, but also in lands only occasionally irrigated. The finest masses of it are to be

Arundo donax.

seen in the cane-brakes on the north-west side of the Dead Sea, where, nourished by the warm springs, it lines the shore for several miles with an impenetrable fringe, the lair of wild boars and leopards, to the exclusion of all other vegetation; and where it attains a gigantic size. There are also large patches of it along the whole Jordan valley, but not of such luxuriant growth. In the valleys of the Arnon and Callirrhoë on the east side of the Dead Sea, it is also most luxuriant. *Arundo donax* belongs to the family *Graminaceae*.

Achu, אָחוּ, occurs in Job viii. 11, and also in Gen. xli. 2, 18. The word is also used untranslated in Ecclus. xl. 16. In the passage from Job, "Can the *flag* grow without water?" (A. V.), the R. V. has in the margin *reed grass* (*βούτομος*, LXX.; *carectum*, Vulg.). In the passages in Genesis the LXX. have left the word untranslated, ἄχει, as in Ecclus. The Vulgate has *loci palustres* and *virectum paludis*; "meadow," A. V.; "reed-grass," R. V. The word ἄχι occurs in the LXX. Is. xix. 7, as the representative of עָרוֹת ("paper reeds," A. V.; "meadows," R. V.). Jerome, in his commentary on this passage, incidentally gives the origin of the word *achu*: "Pro junco, papyrum LXX. transtulerunt, de quo charta fit, addentes de suo ἄχει χλωρόν, quod in Hebraico non habetur. Cumque ab eruditis quaererem, quid hic sermo significaret, audivi ab Aegyptiis hoc nomine linguâ eorum omne quod in palude virens nascitur appellare." The word would thus be familiar to the Alexandrine translators, who retained it, as being equally intelligible with its Greek equivalent. Gesenius, without hesitation, infers it, from this and other authorities, to be an Egyptian word [so all moderns. See Ebers, *Aeg. u. die Bb. Moses*,

i. 33§ sq.—from ἑλκέω, *green*; or Delitzsch on Job viii. 11.—S. R. D.]. From the passage in Job, where it is named along with the papyrus, we may assume, although Jerome generalises it, that some specific plant is intended, and from the mention of it in Genesis we see that it was a plant eaten by cattle. Two marsh plants, both very common in Egypt,—*Cyperus esculentus* (L.), the edible rush, and *Butomus umbellatus* (L.), the flowering rush,—would meet all the requirements of the sacred text, and would also well correspond with the "flag" of the A. V.

Sûph, סוּף (ἕλος; *carectum, papyrio, juncus*), is translated by A. V. and R. V. "flags" in Ex. ii. 3, 5, "She laid the ark in the *flags* by the river's brink;" and also in Is. xix. 6. In Jonah ii. 5 it is rendered "weeds": "The weeds were wrapped about my head." The word also frequently occurs in combination, יַם־סוּף. The invariable name for the Red Sea is "the sea of weeds." In this connexion, as in the passage from Jonah, it must be understood of seaweed. But in Exodus it may be taken to mean generally "weeds" or marsh vegetation, such as the rank rushes on the border of the Nile. Celsius (*Hierob.* ii. 66) points out that it refers to the smaller herbage to the exclusion of the papyrus, reed, or cane. [The word has no apparent derivation in Hebrew, and is in all probability Egyptian. It has been connected by some with the Coptic *sippe*, "sea-weed," or *rebe*, "reeds," and by others (Brugsch) with the Egyptian *tufi*, "papyrus" (see Knobel-Dillmann on Exod. xiii. 18; MV.[11]).—S. R. D.]

'Aróth, עָרוֹת (τὸ ἄχι τὸ χλωρὸν πᾶν), occurs only once, Is. xix. 7, and is rendered "paper reeds" by the A. V., "meadows" by the R. V. Whatever be the true rendering, that of the A. V. cannot be correct, for the prophet had only just before mentioned the papyrus under its unquestioned name of גֹּמֶא, and would not immediately mention the same plant under a totally different name. The Rabbinical commentators state that it is a name for all pot-herbs and green garden stuff, which is evidently the interpretation adopted by the LXX. The word is derived from עָרָה, "to be bare or naked," and is the same as the Arabic عَرَا, *'ara*, an open plain, and hence probably signifies meadows containing the rank green herbage which abounds in marshy places.

Káneh, קָנֶה (κάλαμος, καλαμίσκος, καλάμινος, πήχος, ἀγκών, ζυγός, πυθμήν; *arundo, culmus, calamus, fistula statera*), from the same root as the English "cane," occurs in many passages of the Old Testament, and is the generic name for a reed or stalk of any kind, and hence for the stem of a candlestick, a measure of length, the armbone, &c. Thus "seven ears of corn came up upon one *stalk*" (Gen. xli. 5, 22). "Branches of the *candlestick*" (Ex. xxv. 32). "Let mine *arm* fall from my shoulder blade" (Job xxxi. 22). In Ezek. xl. 5, &c., it is used for a *measuring reed*, 6 cubits in length. In Ezek. xxvii. 19 it is translated by A. V. and R. V. "calamus," the rendering elsewhere of a very different word: "Cassia and calamus were in thy market." The equivalent Greek word κάλαμος is similarly applied in the N. T. to the growing reed, to a stalk, to a measuring rod (Rev. xi. 1, &c.), and to a pen made of reed (3 John *v.* 13).

Many species of reed are found in different parts of Palestine, and it is most probable that *káneh* is a general term with no special reference to any one species. The most common, besides those already mentioned, are *Arundo phragmitis* (L.), the *Phragmitis communis* of modern botanists, still used universally for pens in the East; the common toad rush (*Juncus bufonius*, L.); and many species of *Cyperus*, or triangular stalked rush. There are also about fifteen species of sedge (*Carex*) abundant in different parts of the country. [H. B. T.]

BULRUSHES, ARK OF. [MOSES.]

BU'NAH (בּוּנָה, Ges. = *prudence*; B. Βαναιά, A. Βαναά; *Buna*), a son of Jerahmeel, of the family of Pharez in Judah (1 Ch. ii. 25).

BUN'NI. **1.** (בָּנִי, Ges. = *built*; *Bonni, Boni*), one of the Levites in the time of Nehemiah (Neh. ix. 4); possibly the same person is mentioned in x. 15. The LXX. in both cases translates the name by *viós*.

2. Another Levite, but of earlier date than the preceding (Neh. xi. 15). The name, בּוּנִי [ed. Baer], is also slightly different. The LXX. omits it.

Bunni is said to have been the Jewish name of Nicodemus (Lightfoot on John iii. 1; Ewald, v. 233). [W. A. W.]

BURDEN (מַשָּׂא), used sometimes in the sense of an oracle or prophecy (cp. Is. xiii. 1, &c. For Jer. xxiii. 33 and the highly probable variant reading of LXX. and Vulg., see the commentators, e.g. *QPB.*[3]). מ does not express of necessity threatening language, but rather—by its etymology—language lifted up above ordinary language, such as the judicial language of God, or language spoken with uplifted or emphatic voice (see Oehler, *Theology of the O. T.* § 210, n. 9; Schultz, *Alttest. Theologie*,[4] p. 241, n. 6; Delitzsch[4] on Is. xiii. 1). [F.]

BURIAL, SEPULCHRES. The Jews uniformly disposed of the corpse by entombment, where possible, and, failing that, by interment; extending this respect to the remains even of the slain enemy and malefactor (1 K. xi. 15; Deut. xxi. 23), in the latter case by express provision of law. Since this was the only case so guarded by Mosaic precept, it may be concluded that natural feeling was relied upon as rendering any such general injunction superfluous. Similarly, to disturb remains was regarded as a barbarity, only justifiable in the case of those who had themselves outraged religion (2 K. xxiii. 16, 17; Jer. viii. 1, 2). The Rabbis quote the doctrine "dust thou art, and unto dust thou shalt return," as a reason for preferring to entomb or inter their dead; but that preferential practice is older than the Mosaic record, as traceable in patriarchal examples, and it continued unaltered by any Gentile influence. So Tacitus (*Hist.* v. 5) notices that it was a point of Jewish custom, *corpora condere quam cremare*. The treatment of the remains of Saul and his sons was exceptional; see below (1 Sam. xxxi. 11–13; 2 Sam. ii. 4–6).

On this subject we have to notice: (1) the place of burial, its site and shape; (2) the mode of burial; (3) the prevalent notions regarding this duty; to which may be usefully added (4) a brief review of parallel customs among other ancient races.

1. A natural cave, enlarged and adapted by excavation, or an artificial imitation of one, was the standard type of sepulchre. This was what the structure of the Jewish soil supplied or suggested. A distinct and simple form of sepulture, as contrasted with the complex and elaborate rites of Egypt, clings to the region of Palestine, and varies but little with the great social changes between the periods of Abraham and the Captivity. Jacob and Joseph, who both died in Egypt, are the only known instances of the Egyptian method applied to patriarchal remains. Sepulchres, when the owners' means permitted it, were commonly prepared beforehand, and stood often in gardens, by roadsides, or even adjoining houses. Kings and prophets alone were probably buried within towns, and Samuel, as a special honour, in his own house (1 K. ii. 10, xvi. 6, 28; 2 K. x. 35, xiii. 9; 2 Ch. xvi. 14, xxviii. 27; 1 Sam. xxv. 1, xxviii. 3). Sarah's tomb and Rachel's [RACHEL] seem to have been chosen merely from the accident of the place of death; but the successive interments at the former (Gen. xlix. 31) form a chronicle of the strong family feeling among the Jews. It was the sole fixed spot in the unsettled patriarchal life; and its purchase and transfer, minutely detailed, are remarkable as the sole transaction of the kind, until repeated on a similar occasion at Shechem [MACHPELAH]. Thus it was deemed a misfortune, or an indignity, not only to be deprived of burial (Is. xiv. 20; Jer. *passim*; 2 K. ix. 10), but in a lesser degree to be excluded from the family sepulchre (1 K. xiii. 22), as were Uzziah, the royal leper, Ahaz, and Manasseh (2 Ch. xxvi. 23; xxviii. 27; xxxiii. 20). Thus the remains of Saul and his sons were reclaimed, to rest in his father's tomb. Similarly it was a mark of a profound feeling towards a person not of one's family, to wish to be buried with him (Ruth i. 17; 1 K. xiii. 31), or to give him a place in one's own sepulchre (Gen. xxiii. 6; cp. 2 Ch. xxiv. 16). The head of a family commonly provided space for more than one generation; and these galleries of kindred sepulchres are common in many Eastern branches of the human race. Cities soon became populous and demanded cemeteries (cp. the term πολυάνδριον, Ezek. xxxix. 11, 15), which were placed without the walls; such an one seems intended by the expression in 2 K. xxiii. 6, Jer. xxvi. 23, "the graves of the children of the people," situated in the valley of the Kedron, or of Jehoshaphat. Jeremiah (vii. 32; xix. 11) threatens that the valley called Tophet, the favourite haunt of idolatry, should be polluted by burying there (cp. 2 K. xxiii. 16). Such was also the "Potter's Field" (Matt. xxvii. 7).

The Mishnaic description of a sepulchre, complete according to Rabbinical notions, is somewhat as follows: a cavern about 6 cubits square, or 6 by 8, from three sides of which are recessed longitudinally several vaults, called כוכים, each large enough for a corpse. These have been compared to pigeon-holes and to ovens. They are described as "rectangular, sloping spaces, cut into the wall of the rock, extending 6 feet horizontally, sufficiently wide and high to admit of a corpse being pushed in," *i.e.* end-ways (*Survey of W. Palestine, Special Papers*, p. 288). On the fourth side, the cavern is approached through a small open covered court or portico, חצר, of a size to receive the bier and bearers. In some such structures the demoniac may have housed (Mark v. 3). The entry from this court to that cavern was closed by a large stone, called גולל, which was door-shaped, and swinging upon hinges; or a small closely-fitting slab without hinges; or cheese-shaped, and so capable of being rolled, thus confirming the Evangelistic narrative. In *Survey of W. P.* ii. 123 one such is recorded as found, cylindrical, of 3½ feet diameter, *in situ*; while the marks of its grinding against the face of the rock remain: for one swinging on pivots, see *ib.* 111. Sometimes several such caverns, each with its recesses, were entered from the several sides of the same portico (Mishna *Bava Bathra*, 6, 8, quoted by J. Nicolaus, *de Sepulchris Hebraeorum*). For further particulars, see TOMBS. In the climate of Palestine decomposition is rapid, and the bones of previous corpses were probably removed to a common receptacle, thus allowing of successive entombments. Osteophagi for collecting the bones have been found with Hebrew and Greek inscriptions, but none of them are apparently earlier than the Christian era. The collection of the bones of criminals condemned to death is mentioned in the Talmud *Moed Katon*, i. 3. Benjamin of Tudela (*E. P.* p. 86) saw "tubs" (osteophagi) filled with the bones of Israelites in the cave of Machpelah at Hebron. The collection of the bones of corpses is still a common custom in the Greek Church. For a description of the osteophagi, see M. Clermont-Ganneau in *Revue Archéologique*, Juin 1873, Novembre 1878. The masonry tombs are rare; they are usually of Roman date, and most commonly found in the northern part of the country. At *Ammân* there are, according to Conder, many "towers of well-cut masonry filled inside with well-arranged sarcophagi" (*Palestine*, p. 176). The tombs haunted by the demoniac may have been of masonry, and have disappeared. With the "*kokim* given off from" the "sides" of the chamber (above) cp. Ezek. xxxii. 23, "whose graves are set in the sides of the pit," and Is. xiv. 15. Where contiguous chambers exist, one with *kokim*, the other with loculi of a different shape, the outer or older one is generally that which has the *kokim*. These, therefore, may be taken to represent the older arrangement. The later loculi are distinguished as *shelf* graves, *trough* graves, and *sunk* graves, the term sufficiently expressing the character. The earlier sepulchres, to judge from 2 K. xiii. 21, did not prevent mutual contact of remains. Sepulchres were marked sometimes by pillars, as that of Rachel, or by pyramids, as those of the Asmoneans at Modin (Joseph. *Ant.* xiii. 6, § 7). Cp. three known as "the Spindles" at El Meghazel near Sidon, described and figured by Perrot and Chipiez, p. 154; cp. *Quart. Review*, Jan. 1886, pp. 210–11; their chief members are cylinder or pyramid on a quadrate basement. Like temples, tombs were, from their assumed inviolability, sometimes made the depositories of treasures (De Saulcy, ii. 183). We find them

also distinguished by a "title" (2 K. xxiii. 17). Such as were not otherwise noticeable were scrupulously "whited" (Matt. xxiii. 27) once a year, after the rains before the Passover, to warn passers-by of defilement (Hottinger, *Cippi Hebr.* p. 1034; Rossteusch, *de Sepul. calce notat.* ap. Ugolini, p. xxxiii.). For the bed, perhaps sarcophagus, of Og, see under BED. "Two subterranean tombs, built rudely in basalt, surmounted by domes, and closed with square doors of black basalt, were found in *Beisân*" (Bashan; see *Survey of W. Palestine, Special Papers*, p. 292). Roman columbaria also are found in well-known Roman sites in Palestine. Tombs also exist with Christian emblems and Greek inscriptions; and the seven-branched candlestick is found on tombs with *kokim* and with graves of the 3rd century A.D. For a description of those at Sheik Abreik in Galilee, see *Survey of W. Pal.* i. pp. 386–7, of about the Christian era, where this device appears; as does that of the lion (also found over ancient synagogue, *ib.* p. 319), perhaps the emblem of Judah. They are of divers ancient patterns, and the corpses lie indifferently in all directions of the compass. Others contain niches for lamps and tear-bottles (Ps. lvi. 8). In one over 200 such niches occurred, all black with smoke (*ib.* pp. 344, 351; ii. 375). Inscriptions in tombs seem extremely rare. One such, but illegible, is figured in ii. 376. The name of Alkios, grandson of Simon Maccabaeus, occurs on a tomb near Gezer (*PEF. Qy. Statement*, 1875, p. 57). Tribal marks are believed to be occasionally discerned, as on a portico of a tomb (*ib.* p. 363).

We may trace in the above arrangements some elements of the imagery of the prophets. Thus the "shadow of death" is the contrast offered by these sepulchral chambers with their rayless vaults, to the bright glare of the Syrian sky without. The "gates of the grave" are the massive slabs or sliding stones with which the entries of some are closed. The idea of the Prophet in Is. xiv. 9 sq. seems to be derived from some vast chamber of departed kings, with its lateral *kokim*, rousing up its dead tenants to greet the greatest of earthly monarchs in his fall. Similar is the expression of Ezekiel (xxxii. 21), where the Prophet (*vv.* 18–32) contemplates seven or more vast nations with the chief of each and "all her multitude round about her graves" (*v.* 24, cp. *vv.* 22, 23, 25, 26), each forming a vast necropolis, and sings his awful dirge of triumph over their downfall, as they lie, an unclean heap of "uncircumcised" slain, with "their iniquities upon their bones" (*v.* 27). The Mukam or Mohamedan sanctuaries, connected with the names of various Bible worthies, may in some cases be their veritable tombs, besides those of the chief patriarchs near Hebron. Such are those of Eleazar and Phinehas, of Samson, of Aaron on Mount Hor, and of Joshua (*ib.* p. 262 sq.). [TOMBS.]

2. With regard to the mode of burial, we should remember that our impressions, as derived from the O. T., are those of the burial of persons of rank or public eminence, whilst those gathered from the N. T. regard persons of a private station. But in both cases "the manner of the Jews" included the use of spices, where they could command the means. Thus Asa lay in a "bed of spices" (2 Ch. xvi. 14; cp. Jer. xxxiv. 5). A portion of these were burnt in honour of the deceased, and to this use was probably destined part of the 100 pounds' weight of "myrrh and aloes" in our Lord's case. On high state occasions, the vessels, bed, and furniture used by the deceased were burnt also. Such was probably the "great burning" made for Asa. If a king was unpopular, or died disgraced (*e.g.* Jehoram, 2 Ch. xxi. 19; Joseph. *Ant.* ix. 5, § 3), this was not observed. At the present day articles of value are annually burned at the tombs of certain celebrated Rabbis in Palestine. In no case, save that of Saul and his sons, were the bodies burned, nor in that case were they so burnt as not to leave the "bones" easily concealed and transported, and the whole proceeding looks like a hasty precaution against hostile violence. Even then the bones were interred, and re-exhumed for solemn entombment. The penal doom of Achan and that of Nadab and Abihu seem to have attached an evil omen to fire, whether as causing death, or as applied to human remains; which was enhanced by its idolatrous association with the Molech and Baal rituals (Lev. x. 2–6, xviii. 21, xx. 2–5, 14; Num. xi. 1–3, xvi. 35; Josh. vii. 15, 25; 2 K. xxiii. 10; Jer. vii. 31, xix. 5, xxxii. 35). In Amos x. 8–10 a city straitly besieged and ravaged by pestilence seems to be depicted. "Ten men in one house" and all dying show such crowded quarters and such rapid mortality as Thucydides ascribes to the siege and plague at Athens (ii. 52). The dead must be disposed of somehow, and cremation is the only resource; but the horror which it raised in the Hebrew, even when practised by an extern on an extern, seems expressed in Amos ii. 1. Like cannibalism, it was regarded as the extremity of dire distress (cp. Deut. xxviii. 53 sq.). In Amos vi. 10 the uncle, perhaps the last kinsman left, turns cremator[a]; and the last of the ten inmates being thus dealt with, the solitary housekeeper is asked, "Any more yet?" and replies, "None." To which the kinsman replies, "Hush! no mention of the sacred Name," either as unsuited to such a charnel-house atmosphere, or as desecrated by association with the burning of human remains, or perhaps a cry of despair, or of superstition (so nearly Pusey, Maurice, *et al.*). The bones, however, are brought forth, to be placed probably in some common repository. The mere fact of a great mortality never causes men to burn corpses; nor did it do so among the Jews on such an occasion (Ezek. xxxix. 12–14).

A company of public buriers appears in Ezek. *l. c.* The occasion is the offence to the "passengers"[b] arising from the unburied horde of the typical Gog, lying "on the face of the field," and tasking the strenuous efforts of the united population for seven months to get rid

[a] The word and idea conveyed in the LXX. are wholly different, καὶ παραβιῶνται there taking the place of וּמַסְרְפוֹ, "and he that burneth him" (A. V.).

[b] A. V. "It shall stop the *noses* [marg. or mouths] of the passengers" (lit. shall muzzle), Ezek. xxxix. 11 [R. V. takes it differently: "it shall stop them that pass through"]; cp. Joel ii. 20. But for this the LXX. have περιοικοδομήσουσι τὸ περιστόμιον τῆς φάραγγος, which shows a different original.

of them (*v.* 12). These are then supplemented by burial-corps "of continual employment" in various parts of the country, and by the more casual aid of passers-by who "set up a sign," wherever remains are still found exposed, "till the buriers have buried it" (*vv.* 14, 15). This duty of "buriers," which the Prophet saw in vision as arising from an exceptional necessity, had become, it seems, customary in the times of the N. T. (Acts v. 6, 10). The closing of the eyes, kissing, and washing the corpse (Gen. xlvi. 4, l. 1; Acts ix. 37) are customs common to all nations. As regards the last of these, Lane, detailing the practice prevailing in modern Egypt, which is probably in its main features of high antiquity, says, "The 'mughassil,' or washer of the dead, soon comes . . . The ordinary ablution preparatory to prayer having been performed upon the corpse, with the exception of the washing of the mouth and nose, the whole body is well washed from head to foot, with warm water and soap, and with 'leef,' or fibres of the palm-tree; or, more properly, with water in which some leaves of the lote-tree, 'nabk,' or 'sidr,' have been boiled. The nostrils, ears, &c., are stuffed with cotton; and the corpse is sprinkled with a mixture of water, pounded camphor, and dried and pounded leaves of the 'nabk,' and with rose-water; sometimes other dried and pounded leaves are added to those of the 'nabk.' The ankles are bound together and the hands placed upon the breast" (*Mod. Egypt*, c. xxviii. p. 512, ed. 1860). Coffins were but seldom used, and if used were open; but fixed stone sarcophagi were common in tombs of rank. The bier, the word for which in the O. T. is the same as that rendered bed [see BED], was borne by the nearest relatives, and followed by any who wished to do honour to the dead. The grave-clothes (*ὀθόνια, ἐντάφια*) were probably of the fashion worn in life, but swathed and fastened with bandages, and the head covered separately. Previously to this being done, spices were applied to the corpse in the form of ointment, or between the folds of the linen; hence our Lord's remark (John xii. 7), that the woman had anointed His body *πρὸς τὸ ἐνταφιάζειν*, "with a view to dressing it in these *ἐντάφια*;" not, as in A. V. "for the *burial*," and R. V. "against the day of my *burying*." According to Josephus (*c. Ap.* ii. 27), the dead were buried decently, but without extravagant expense, and without costly monuments. The nearest relations performed the obsequies; and passers-by were obliged to join the funeral and assist in the lamentation. Mourning women were apparently hired, as at the present day, to wail for the dead (Jer. ix. 17). After the funeral, the house and its remaining inhabitants were purified. The high-priest was forbidden to defile himself by going "in to any dead body" (Lev. xxi. 10, 11). For the burial of Jews at Jerusalem at the present day, see Tobler, *Denkblätter*, p. 325. For the custom of mourners visiting the sepulchre, see MOURNING; for that of frequenting tombs for other purposes, see DIVINATION, § 5.

3. The precedent of Jacob's and Joseph's remains being returned to the land of Canaan was followed, in wish at least, by every pious Jew. Following a similar notion, some of the Rabbis taught that only in that land could those who were buried obtain a share in the resurrection which was to usher in Messiah's reign on earth. Thus that land was called by them "the land of the living," and the sepulchre itself, "the house of the living." Some even feigned that the bodies of the righteous, wherever else buried, rolled back to Canaan under ground, and found there only their appointed rest (J. Nicolaus, *de Sepult. Heb.* xiii. 1). Tombs were in popular belief, led by the same teaching, invested with traditions. Thus Machpelah is stated (Lightfoot, *Centuria Chorographica*, s. v. Hebron) to have been the burial-place not only of Abraham and Sarah, but also of Adam and Eve; and there was probably at the time embraced in the N. T. a spot fixed upon by tradition as the site of the tomb of every prophet of note in the O. T. To repair and adorn these was deemed a work of exalted piety (Matt. xxiii. 29). The scruples of the Scribes extended even to the burial of the ass whose neck was broken (Ex. xxxiv. 20), and of the first-born of cattle (R. Maimon. *de Primogen.* ch. iii. § 4, quoted by J. Nicolaus, *de Sepult. Heb.* xvi. 3, 4).

The neighbourhood of Jerusalem is thickly studded with tombs, many of them of great antiquity. An account of them is given under TOMBS, to which the reader is referred for further particulars of the subjects treated of in this article. An ancient Jewish sarcophagus was found at Jerusalem, another in a rock-cut tomb near the Convent of the Cross, and others at Ashdod, Carn Caitu, Jifna, and Sheik Abreik (*PEF. Survey*, &c., 1869–70, p. 152; 1871, pp. 90, 105, 116; 1873, p. 59; 1878, p. 64). For ossuaries with inscriptions found near Jerusalem, see *ib.* 1874, p. 149.

4. But all our Bible records are from the monotheistic point of view, and all known or traditional sepulchres those of monotheistic memories. The post-Babylonian extension of monotheism over the whole Palestinian area, together with the habit of constantly retenanting the same graves with new remains, would tend to efface all traces of earlier heathenish burial, which must at one time have been abundant in the Northern kingdom, and prevalent even in the Southern (cp. Jer. viii. 1, 2). It is on this ground, as well as generally, worth while to review the principal features of burial among ancient, especially neighbouring, nations. Of Hittite and Amorite burial nothing seems specially to be known. Of Babylonian, recent research has collected some highly interesting facts (see *Zeitschrift für Assyriologie*, ii. 4, &c. Dec. 1887), of which the chief are as follows. Entire necropoleis of considerable size show their extant remains at Surghul and El Hibba between Tigris and Euphrates. These occupy a group of artificial hillocks, raised 15 metres or less above the plain, forming entire areas of ruin, the whole of which are mortuary in character. Cremation, mostly incomplete, was the practice, for which the vast neighbouring sedge-growths combined with asphalt furnished the combustibles, although here and there palm and other grained woods were used. Very few remains of bodies are found without clear traces of fire. The corpses were enveloped in sedge-matting and plastered over with soft clay, or sometimes encased in a sort of clay oven to concentrate the heat, the calcined shells of

which are still found in abundance *in situ*. The fires were quenched, when the skeleton alone remained, and the bones were often gathered in narrow-necked vessels. These remains show that the man retained his war-equipment or dress of peace, the woman her ornaments, the child its toy. A pair of golden earrings was found well preserved. Some stone hatchets and flint arrow-heads with bronze rings and other implements often melted into shapeless lumps, perforated stones, spindles of burnt clay, stones for polishing, &c. there deposited to be of service to the dead, were picked out from the vast layers of dust; and especially some curious seals with birds or horned animals figured upon them—all having passed through the fire. Offerings of food showed their remains in date-kernels and bones of edible animals, more or less burnt, also clay receptacles for perfumes, with perforations to allow their vapours to escape. These articles were sometimes packed together in an open vessel, similar to the closed one which received the human remains.

Besides these, cremated with the corpse, subsequent offerings for human wants, chiefly those primary ones of clothing, food, and drink, showed copious remnants; but others also, symbolical, notably three forms of *phallus*, with intermediate gradations, and the "nail-cylinder," sometimes inscribed, occurred. Of pottery an extensive array—bowl, platter, cup, and bottle, showing delicate modelling—survived. The hillocks sometimes have higher terraces imposed on lower, as if to meet the demands of later mortality. A canal, lined with brick laid in asphalt, carried off temporary inundations; fragments even of statues, the bulks of which had probably been long removed, were picked up, but rarely. The most extraordinary feature of the whole mortuary system was, however, plainly visible in the ground lines and foundations of large masses of small houses, chambered, and copiously furnished with rills of water (one having as many as eight such), solely intended for the supposed *post-mortem* tenancy of the dead. The recital impresses one with the notion of enormous labour expended, and the corpses of perhaps an entire province gathered here; while of solid belief in the material needs of a future state hardly such an extensive monument exists elsewhere. For examples of this belief prevailing from Central Asia to Central America and Fiji, see Tylor's *Primitive Culture*, ch. xi., especially pp. 413 sq. Some extreme examples are (*ib.* pp. 409–10), an annual mock-fight among the Queensland aborigines, to scare away the souls let loose by death in the year's course; nets set by North American Indians around their cabins to intercept neighbours' departing souls; a widow followed home from her husband's funeral by a man flapping the air with a bundle of twigs to drive off his ghost and set her free to remarry. For some points of Biblical contact with some of its practices, cp. Deut. xxvi. 14, where the confessing Israelite is to declare, in making the prescribed offering, "I have not eaten thereof in my mourning . . . . nor given thereof for the dead," showing that a *cultus* of the dead with eatables was among practices familiar but forbidden to him; and Jer. xvi. 7, "neither shall men break bread for them [the dead] in mourning, to comfort them for the dead,"[c] &c. with Hos. ix. 4: also Ezek. xxxii. 27, ". . . the uncircumcised, which are gone down to hell with their weapons of war, and have laid their swords under their heads," referring without doubt to the burial or cremation with weapons, as above. On certain practices of laceration, &c. and of cutting off hair as a funereal offering, Prof. W. R. Smith remarks (*Religion of the Semites*, i. 305) that they "were deemed efficacious to maintain an enduring covenant between the living and the dead," referring to Wilken, *Haaropfer*, p. 74.

As regards the Persians, Vaux (*Nineveh and Persepolis*, p. 392)—quoting Arrian's description of the tomb of Cyrus, identified by Porter, Morier, and others with the solid stone building at Mûrghab, which is taken by Prof. Sayce (on Herod. i. pp. 120, 233, notes) to be the tomb of another Cyrus, brother of Xerxes—adds, "Within is the gold coffin of Cyrus, near which is a seat with feet of gold; the whole is hung around with coverings of purple and carpets of Babylon." The Magi were entrusted with the special custody of this tomb, and a small house near it is mentioned as for their use. Since the time of Cambyses, Arrian states that it had continued in their charge, handed on from father to son. Q. Curtius narrates how "Alexander the Great so respected the established customs of the country, that when the body of Darius was found, he caused it to be embalmed and sent to his mother Sisygambis, that it might be buried after the manner of the kings of Persia in the tombs of his ancestors" (*ib.* p. 362).

Of the Egyptian threefold method of embalming, so much is popularly known, from Herodotus (ii. 85–88) downwards to the latest unrollings of mummies, as to supersede more minute description here. One or two special points may be noted. With the worship of ancestors was connected the custom of visiting and banqueting in sepulchres. The offerings were the materials of the banquet—"cakes, wine, fruit, &c. with other comestibles." Libations of oil and wine were also poured over the mummy case (Rawlinson's *Ancient Egypt*, i. 423). These further illustrate the passage cited above from Jeremiah. A future state of which the basis is the need of the body to the soul accounts for the minute and scrupulous study of the preservation of remains. In sepulchral mural paintings this belief finds elaborate expression. There the soul is judged, its merits and demerits weighed in scales. In some cases it is handed over to jackal-headed demons to decapitate. Of the Egyptian Book of Hades we read (*Records of the Past*, x. 83): "The general sense of the great composition is . . . that the Sun and the gods or the souls who accompany him are swallowed up by the Earth in the west, and that they arise in the east. Of the various scenes recorded, one of the most notable shows souls in a lake of flame, but not apparently of penal infliction, to whom vegetables are brought as nourishment" (*ib.* pp. 124–5). This accounts for the funereal banquets and offerings referred to above. The Sun-god Ra is invoked in a

[c] Here the author annotates that the "funeral feast which has for its object to comfort the mourners is, I apprehend, in its origin a feast of communion with the dead."

sepulchral hymn, "Thou givest illumination to those there [in the nether world] departed," the same deity being thus the source of light to the living and the dead. We may compare the threat of the Sun-god in the Odyssey in a legend apparently containing Egyptian elements (xii. 383, δύσομαι εἰς Ἀΐδαο καὶ ἐν νεκύεσσι φαείνω). The copious inscriptions on lids of sarcophagi are well known from popular examples. On one of King Mankaura he is said to be "living eternally," a formula not of the earliest date, and supposed to mark a new religious development in the annals of Egypt. The absorption of the purified soul in Osiris makes its appearance here for the first time (Rawlinson, *ub. sup.* ii. 64). We read (*Records, &c.*, x. 9, 19 and note) that "a tomb in the consecrated mountains of the west was at one time the last and highest comfort that religion could bestow;" whereas the Louvre Papyrus, dated as of the Ptolemaean period, says, "Do not build thy tomb in thine own estate," showing how greatly the tenets of the old belief had by that time become relaxed.

In Butler's *Ancient Coptic Churches*, p. 92, it is regarded as "quite probable that ancient Egyptian forms of burial survived among wealthy persons even into Christian times, though nothing of the kind is known now," and a note adds that "embalming was still common as late as the 4th century A.D., for we read that St. Antony's dread of the process was the chief reason why his followers concealed his body." The writer adds that "the Mahomedan custom is, to lay the body in a white shroud, which is then loosely folded over it. Round this a winding sheet is wrapped, of a material varying with the wealth, &c." of the deceased . . . "Three loose bands are then tied round the sheet—one at the neck, one at the waist, and one at the knees or feet. When the body is placed in the tomb, these bands are further loosened or removed. The present Coptic custom is to dress the deceased in his best dress and lay over him a sheet of cloth, silk, &c. They do not swathe in bands, and they use a coffin."

For parallel customs among classic nations, see *Dict. of Gr. and Rom. Antiqq.*, s. v. FUNUS. Dennis (*Cities, &c. of Etruria*, i. 38) says that the Roman *columbaria* of masonry were probably derived from the pigeon-holed tombs which abound in Etruria, but views combustion as of far higher antiquity. "De Jorio, a practical excavator, says, burial among the Greeks was to burning as ten to one, among the Romans as one to ten." Burial is, however, noted by Dennis as practised in the earliest known times of Greece, and that in the Homeric times burning was probably confined to the wealthy, owing to its cost. This, however, is inconsistent with the "pyres in thick succession burning," after the pestilence, of *Il.* i. 52, and with the truce to burn the dead, both Greek and Trojan, with the process picturesquely detailed, in *Il.* vii. 407 sq. The Roman fashion is noted as varying from time to time. Numa is recorded by Plutarch (*Numa*) as wishing to be buried, and expressly forbidding his body to be burnt. Dennis thinks burning may have then been customary for great men only, and that early Roman practice was in favour of burial, and that in the early Republic it was generally preferred. Burning gradually became fashionable, probably as wealth and luxury increased; but for the poorer sort and vast slave population burial must always have prevailed, and from Hor. *Sat.* i. 8, 8–11, plainly did so at the Augustan period. The oldest Etruscan tombs appear to be fitted with rock-hewn couches, as they exhibit furniture of a more archaic character than the "niched" sort. Yet many of these last are probably of high antiquity, and contained vases, mirrors, and other objects, of a purely Etruscan style. Only at Veii and Sutri are cinerary *ollae* found in Etruria, to receive which, when burning was preferred, the Roman *columbaria* had sometimes a hole sunk in the floor. An ancient Etruscan tomb, rock-hewn, low, dark, and with a slab-door, contained several such cinerary jars of great size; then smaller crocks, bronzes, &c.; and showed mural grotesque paintings, human and animal, patch-worked in red and yellow, supposed emblematical of the destiny of the soul. On the stone bench running along either side of the chamber, lay respectively the skeleton of a warrior with helmet and breastplate, and that of his wife. Around or beside them lay a bronze ewer, small pots painted in the earliest Etruscan style, a light candelabrum, a bronze mirror, small figures of gods and men in terra-cotta, and some of animals in amber. A small inner chamber contained square earthen cinerary urns, with lids and handles, the latter of human-headed form, supposed portraits of the incinerated dead. In the centre was a low brazier of bronze, 2 feet in diameter, probably to burn perfumes and neutralize sepulchral effluvia. Here then we have burial and cremation side by side in the same tomb, but the seeming principal figures entombed without fire. The Grotta del Triclinio, described by the same writer, shows a funeral feast gaily depicted, attended with music, dancing, and all the excitement of convivial life,—happy groups in bright colours. See also a curious description of an Etruscan cemetery, *ib.* i. 423.

In and near ancient Sidon several conspicuous tombs and an entire although small cemetery have been unearthed recently. MM. Perrot and Chipiez (*History of Art in Phoenicia*, &c., pp. 144–5) say that Syrian and Phoenician tombs are seldom found intact; when so, they are Graeco-Roman merely, and probably had an earlier occupant; that the corpses are mummy-looking, "but prepared with much more care and refinement" than Egyptian; that everything—general idea, accidental forms, external decoration—tells us of borrowing from Egypt by Phoenicia. Many minor characteristics, however, point to a Greek source (see *e.g.* a specially elegant sculptured head, No. 127 on p. 186). The accessories imply the usual beliefs that the dead retained a quasi-life and had not lost all communion with the living to whom their favour was important. The scene between Saul and the Witch of Endor shows that such beliefs had Hebrew currency; although possibly Samuel may have been believed to have been specially gifted and favoured after death, somewhat as Teiresias in Homer,[a] his prophetic

[a] μάντηος ἀλαοῦ, τοῦ τε φρένες ἔμπεδοί εἰσιν·
τῷ καὶ τεθνεῶτι νόον πόρε Περσεφόνεια,
οἴῳ πεπνύσθαι· τοὶ δὲ σκιαὶ ἀΐσσουσιν.
(*Od.* x. 493–5.)

power as it were abiding. Besides actual sarcophagi (resembling mummy-cases, with covers, some of which show the head and neck only, others the whole figure of the deceased), coffins of stone, later of cedar, later still of stone again, have been found, the period ranging in known tombs from the 6th to the 3rd century B.C. In Perrot (*ub. sup.* No. 134), a recumbent figure holds an alabaster jar of the kind used in funeral rites for the offering of precious unguents. The antiques found in these tombs include sculpture, metallurgy, the glyptic art, jewellery, ivories, with glass, terra-cotta, and fictile objects. Garlands of real leaves are supposed to have entwined the coffin-handles (*ib.* pp. 198–203). In one coffin the ear orifices of the corpse were prolonged through perforations in the lid. With this cp. Tylor (*ub. sup.* 409), "The Iroquois . . . used to leave an opening in the grave for the lingering soul to visit its body, and some of them still bore holes in the coffin for the same purpose." In some Phoenician tombs bronze masks were found, the models, doubtless, of the likenesses on the sarcophagus-lid. In one rings and nails showed traces of a cedar coffin gone to dust. "The funerary furniture has the same character as with the Egyptians and Chaldaeans;" but the dead were not burnt until the period of classic decadence. The most noted Sidonian tomb is that of King Eshmunazar, ascribed to the 4th century B.C., resembling a mummy-case, and inscribed with a text given at length in *Records, &c.*, ix. pp. 111 sq.; cp. Rawlinson's *Phoenicia*, p. 350, n. 2, also Perrot &c. *ub. sup.* He forbids all to violate his remains, "for treasures I have none;" and imprecates on any so presuming, that they "shall have no funeral couch with the Rephaim [well-known Hebrew term = *Manes*, as in Ps. lxxxviii. 10] nor be buried in graves, nor shall there be any son or offspring to succeed to them" (cp. Ps. lxix. 25, cix. 13). Thus the words of the same context, "The day of my non-existence has come, my spirit has disappeared," need not be taken as excluding a future state. [H. H.]

BURNING. See BURIAL, 2; PUNISHMENTS, III. (*a*) 3.

BURNT-OFFERING (עֹלָה or עוֹלָה, and in poetical passages כָּלִיל, *i.e.* "perfect;" ὁλοκάρπωσις [Gen.], ὁλοκαύτωμα [Ex. and Lev. &c.], LXX.; ὁλοκαύτωμα, N. T.; *holocaustum*, Vulg.). The original derivation of the word עֹלָה is from the root עָלָה, "to ascend;" and it is applied to the animal-offering, which was wholly consumed by fire on the altar, and the whole of which, except the refuse ashes, "ascended" in the smoke to God (Judg. xx. 40). It corresponds therefore in sense, though not exactly in form, to the word ὁλοκαύτωμα, "whole burnt-offering," from which the name of the sacrifice in modern languages is taken. Every sacrifice was in part "a burnt-offering," because, since fire was the chosen manifestation of God's Presence, the portion of each sacrifice especially dedicated to Him was consumed by fire. But the term is generally restricted to that which is properly a "*whole* burnt-offering," the whole of which was so offered and so consumed.

The burnt-offering is first named in Gen. viii. 20, as offered after the Flood (in iv. 4 we find the more general word מִנְחָה, "offering," a word usually applied to unbloody sacrifices, though in the LXX. and in Heb. xi. 4 translated by θυσία). Throughout the whole of the Book of Genesis (see xv. 9, 17; xxii. 2, 7, 8, 13) it appears to be the only sacrifice referred to; afterwards it became distinguished as one of the regular classes of sacrifice under the Mosaic Law.

Now all sacrifices are divided (see Heb. v. 1) into "gifts" and "sacrifices-for-sin" (*i.e.* eucharistic and propitiatory sacrifices), and of the former of these the burnt-offering was the choicest specimen. Accordingly (in Ps. xl. 8, 9, quoted in Heb. x. 5) we have first (in *v.* 8) the general opposition, as above, of sacrifices (θυσίαι; propitiatory) and offerings (προσφοραί); and then (in *v.* 9) "burnt-offering," as representing the one, is opposed to "sin-offering," as representing the other. Similarly in Ex. x. 25 (less precisely) "burnt-offering" is contrasted with "sacrifice" (so in 1 Sam. xv. 22; Ps. l. 8; Mark xii. 33). On the other hand, it is distinguished from "meat- [R. V. meal-] offerings" (which were unbloody), and from "peace-offerings" (both of the eucharistic kind), because only a portion of them was consumed (see 1 K. iii. 15, viii. 64, &c.).

The meaning therefore of the whole burnt-offering was that which is the original idea of all sacrifice, the offering by the sacrificer of himself, soul and body, to God, the submission of his will to the Will of the Lord (see Ps. xl. 10, li. 17, 19, and compare the more general treatment of the subject under the word SACRIFICE). It typified (see Heb. v. 1, 3, 7, 8) our Lord's offering (as especially in the Temptation and the Agony), the perfect sacrifice of His own human will to the Will of His Father. As that offering could only be accepted from one either sinless or already purified from sin, therefore the burnt-offering (see Ex. xxix. 36–38; Lev. viii. 14, 18, ix. 8, 12, xvi. 3, 5, &c.) was preceded by a sin-offering, always according to some, usually according to others (*e.g.* Delitzsch in Riehm's *HWB.* s. n. "Brandopfer"). So also we Christians, because the sin-offering has been made once for all for us, offer the continual burnt-offering of ourselves, "as a living sacrifice, holy and acceptable to the Lord" (see Rom. xii. 1).

In accordance with this principle it was enacted that with the burnt-offering a "meal-offering" (of flour and oil) and "drink-offering" of wine should be offered, as showing that, with themselves, men dedicated also to God the chief earthly gifts with which He had blessed them (Lev. viii. 18, 22, 26, ix. 16, 17, xiv. 20; Ex. xxix. 40; Num. xxviii. 4, 5).

The ceremonial of the burnt-offering is given in detail in the Book of Leviticus. The animal was to be a male unblemished; either a young bullock, ram, or goat, or, in case of poverty, a turtle-dove or pigeon. It was to be brought by the offerer "*of his own voluntary will, that he might be accepted*," and slain by himself, after he had laid his hand upon its head, to make it his own representative, on the north side of the altar. The priest was then to sprinkle the

blood upon the altar,[a] and afterwards to cut up and burn the whole victim, only reserving the skin for himself. The birds were to be offered similarly, but not divided (see Lev. i., vii. 8, viii. 18–21, &c.). It will be observed how all these ceremonies were typical of the meaning described above, and especially how emphatically the freedom of will in the sacrificer is marked

The burnt-offering being thus the rite which represented the normal state and constant duty of man, when already in covenant with God,[b] was the one kind of sacrifice regularly appointed. Thus there were, as *public burnt-offerings*—

1st. *The daily burnt-offering*, a lamb of the first year, sacrificed every morning and evening (with an offering of flour and wine) for the people (Ex. xxix 38–42, Num. xxviii. 3–8).

2ndly. *The Sabbath burnt-offering*, double of that which was offered every day (Num. xxviii. 8–10).

3rdly. *The offering at the new moon, at the three great festivals, the great Day of Atonement, and feast of trumpets:* generally two bullocks, a ram, and seven lambs (see Num. xxviii. 11–xxix. 39).

Private burnt-offerings were appointed at the consecration of priests (Ex. xxix. 15; Lev. viii. 18, ix. 12), at the purification of women (Lev. xii. 6, 8), at the cleansing of the lepers (Lev. xiv. 19), and removal of other ceremonial uncleanness (xv. 15, 30), on any accidental breach of the Nazaritic vow, or at its conclusion (Num. vi.; cp. Acts xxi. 26), &c.

But *freewill burnt-offerings* were offered and accepted by God on any solemn occasions, as, for example, at the dedication of the Tabernacle (Num. vii.) and of the Temple (1 K. viii. 64), when they were offered in extraordinary abundance. But, except on such occasions, the nature, the extent, and the place of the sacrifice were expressly limited by God, so that, while all should be unblemished and pure, there should be no idea (as among the heathen) of buying His favour by costliness of sacrifice. Of this law Jephthah's vow was a transgression, consistent with the semi-heathenish character of his early days (see Judg. xi. 3, 24). The sacrifice of cows in 1 Sam. vi. 14 was also a formal infraction of it, excused by the probable ignorance of the people, and the special nature of the occasion. Consult on the subject generally, and specially for its typical signification, Jukes, *The Law of the Offerings*, p. 33, &c.; Dillmann on Lev. i. 3 sq.; W. R. Smith, *Religion of the Semites*, i. cp. Index, *s. n.* [A. B.] [F.]

BUSH (סְנֶה,[a] *sĕneh*; *βάτος*; *rubus*). The Hebrew word occurs only in those passages which refer to Jehovah's appearance to Moses "in the flame of fire in the bush" (Ex. iii. 2–4; Deut. xxxiii. 16). The Greek word is *βάτος* both in the LXX. and in the N. T. (Mark xii. 26; Luke xx. 37 [note that, both in St. Mark and St. Luke, "the bush" refers to the section of the Pentateuch so called. See *Speaker's Comm.* in loco]; Acts vii. 35; see also Luke vi. 44, where it is correctly rendered "bramble bush" by the A. V. and R. V.). *Βάτος* is used also to denote the *sĕneh* by Josephus, Philo, Clemens, Eusebius, and others (see Celsius, *Hierob.* ii. 58). Some Versions adopt a more general interpretation, and understand any kind of *bush*, as the A. V. The Arabic in Acts vii. 35 has *rhamnus*. Others retain the Hebrew word.

From the word *sĕneh* being used of the burning bush alone, and never in any other conjunction, we infer that some definite species of bush is intended. It cannot be our bramble, which does not occur in a state of nature in the Sinaitic Peninsula, which is too hot and dry for this group of plants. That the Hebrew should be rendered *βάτος* by the LXX. is immaterial, as the ancients, not carefully discriminating species, frequently transfer the name of a known plant to another resembling it. The question is, what kind of bush is found on Sinai, which would best answer the conditions of the problem; and this seems certainly to be the *Acacia nilotica*, known in Egypt as *sunt*, closely allied to the *Acacia seyal* or shittim tree, but much smaller and closer in growth. Both Celsius (*Hierob.* ii. 58) and Dean Stanley (*S. and P.* p. 17) would trace the derivation of the name of Sinai to the *seneh* or "thorny tree." The bush may possibly be *Crataegus aronia*, which Sir J. Hooker noticed on Mount Sinai; but which certainly is very rare in comparison with the *sunt* or Acacia bush. The bramble planted by the monks near their chapel, in the convent of St. Catharine, called by Sprengel *Rubus sanctus*,[b] is not an indigenous shrub. We incline, therefore, to the *Acacia nilotica* or *sunt*. [H. B. T.]

BUSHEL. [MEASURE.]

BUTLER. [CUPBEARER; JOSEPH.]

BUTTER (חֶמְאָה, *chem'hāh*; *βούτυρον*; *butyrum*), curdled milk, as distinguished from חָלָב, *fresh milk*; hence *curds*, *butter*, and in one place probably *cheese*. It comes from an unused root, חָמָא = Arab. خَمَأَ, *spissum fuit lac*. In Gen. xviii. 8, *butter and milk* are mentioned among the things which Abraham set before his heavenly guests (cp. Judg. v 25; 2 Sam. xvii. 29). Milk is generally offered to travellers in Palestine in a curdled or sour state,—*lebben*, thick, almost like butter (cp. Josephus' rendering in Judg. iv. 19: *γάλα διεφθορὸς ἡδή*). In Deut. xxxii. 15, we find חֶמְאַת בָּקָר וְחֲלֵב צֹאן among the blessings which Jeshurun had enjoyed, where milk of kine would seem contrasted with milk of sheep. The two passages in Job (xx. 17, xxix. 6) where the word חֶמְאָה occurs are also best

[a] It is clear that in this ceremony the burnt-offering touched closely on the propitiatory or sin-offering; although the solemnity of the blood-sprinkling in the latter was much greater, and had a peculiar significance. It is, of course, impossible that the forms of sacrifices should be rigidly separated, because the ideas which they enshrine, though capable of distinction, are yet inseparable from one another.

[b] This is remarkably illustrated by the fact that heathens were allowed to offer burnt-offerings, and that Augustus ordered two lambs and a bullock to be offered for him every day (Joseph. *B. J.* ii. 17, § 2).

[a] The derivation is uncertain. The corresponding word occurs with a similar meaning in Aramaic and Arabic. See MV.[11] [S. R. D.]

[b] "This," says Sir J. Hooker, "is a variety of our bramble, *Rubus fruticosus*."

satisfied by rendering it *milk* (A. V. and R. V. "butter"); and the same may be said of Ps. lv. 21, which should be compared with Job xxix. 6.

In Prov. xxx. 33, Gesenius thinks that cheese is meant, the word מִיץ signifying *pressure* rather than churning (A. V. and R. V.). Jarchi (on Gen. xviii. 8) explains חֶמְאָה to be *pinguedo lactis, quam de ejus superficie colligunt*, i.e. cream, and Vitringa and Hitzig give this meaning to the word in Is. vii. 15–22. Butter was not in use among the Greeks and Romans except for medicinal purposes, but this fact is of no weight as to its absence from Palestine. Robinson mentions the use of butter at the present day (*Bib. Res.* i. 449), and also the method of churning (i. 485, and ii. 418), and from this we may safely infer that the art of butter-making was known to the ancient inhabitants of the land, so little have the habits of the people of Palestine been modified in the lapse of centuries. Butter is used in different ways by the Arabs of the Hedjaz (Burckhardt, *Travels in Arabia*, i. 52), but it is not the butter which is elsewhere eaten with bread; this butter they call *zubdeh*, which is cream or fresh *semu*, the liquid butter consisting of the fatty particles of the milk separated from the whey and the caseine (see Thomson, *The Land and the Book*, ii. 393; *D. B.* Amer. ed. *s. v.*). [W. D.] [H. B. T.]

BUZ (בּוּז, *contempt*; ὁ Βαύξ). **1.** The second son of Milcah and Nahor (Gen. xxii. 21). The gentilic name is בּוּזִי, and Elihu is called "the Buzite" (Βουζίτης) of the kindred of Ram, *i.e.* Aram. Elihu was therefore probably a descendant of Buz, whose family seems to have settled in Arabia Deserta or Petraea, since Jeremiah (xxv. 23, Πῶς), in denouncing God's judgments against them, mentions them with Thema and Dedan. Some connect the territory of Buz with Busan, a Roman fort mentioned in Amm. Marc. xviii. 10, and others with Basta in Arabia Petraea, which however has only the first letter in common with it (Winer, *s. v.*).

The jingle of the names Huz and Buz is by no means so apparent in the Hebrew (בּוּז, עוּץ); but it is quite in the Oriental taste to give to relations these rhyming appellatives: cp. Ishua and Ishui (Gen. xlvi. 17); Mehujael and Methusael (Gen. iv.), Uzziel and Uzzi (1 Ch. vii. 7): and among the Arabians, Hároot and Mároot, the rebel angels; Hasan and Hoseyn, the sons of 'Alee, &c. The Koran abounds in such homoioteleuta, and so pleasing are they to the Arabs, that they even call Cain and Abel, Kabil and Habil (Weil's *Bibl. Legends*, 23; also Southey's *Notes to Thalaba*), or Habîl and Habid (see Stanley, p. 413). The same idiom is found in Mahratta and the modern languages of the East.

2. A name occurring in the genealogies of the tribe of Gad (1 Ch. v. 14; A. Ἀχιβούζ, B. Ζαβουχάμ; *Buz*). [F. W. F.]

BU'ZI (בּוּזִי, no article; Βουζεί; *Buzi*), father of Ezekiel the Prophet (Ezek. i. 3). Hackett (*D. B.* Amer. ed. *s. n.*) considers the name gentilic elsewhere to be personal here; and that as Ezekiel was a priest, Buzi must have been one also. [F.]

BU'ZITE (בּוּזִי; Βουζίτης; *Buzites*). A descendant of Buz. The term is applied to Elihu, who was of the kindred of Ram or Aram (Job xxxii. 2, 6). [G.]

BY in 1 Cor. iv. 4. The sentence "I know nothing by myself" (A. V.) is more correctly rendered by R. V. "I know nothing against myself." The phrase of the A. V. means in Old English, "I am not conscious of any evil" (see *Speaker's Comm.* in loco). [F.]

BY AND BY is the A. V. rendering of εὐθύς in Matt. xiii. 21; of ἐξαυτῆς in Mark vi. 25; of εὐθέως in Luke xvii. 7, xxi. 9. The R. V. has dropped the word and replaced it by "straightway" in Matt. and in Luke xvii. 7 (adopting a different punctuation of the verse), by "forthwith" in Mark, and by "immediately" in Luke xxi. 9. [F.]

C

CAB. [MEASURES.]

CAB'BON (כַּבּוֹן, of uncertain meaning; BA. Χαβρά; *Chebbon*), a town [possibly the same as מַכְבֵּנָה, 1 Ch. ii. 49] in the low country (*Shefélah*) of Judah, named with Lahmam and Kithlish (Josh. xv. 40), which is only once mentioned, and of which nothing has been since discovered. Tristram (*Bible Places*, p. 40) proposes to identify it with *el-Kubeibeh*, 3¼ miles S.W. of *Beit Jibrin*, and near *Kefr Lâm*, Lahmam. [G.] [W.]

CA'BUL (כָּבוּל; B. Χωβαμασομέλ, including the Hebrew word following, מְשֻׁמְאֵל, which A. translates Χαβὼλ ἀπὸ ἀριστερῶν; *Cabul*), a place named as one of the landmarks on the boundary of Asher (Josh. xix. 27). It is probably the same as the *Chabolo* (Χαβωλὼ) of Josephus, which was in the district of Ptolemais and 40 stadia from Jotapata, now *Jefat* (*Vit.* 42–44). It is now *Kábúl*, a village 4½ English miles N.W. of *Jefat* (*PEF. Mem.* i. 271). For references to the Talmud, see Schwarz, p. 192. It is mentioned by Rabbi Uri of Biel (1564), and Marino Sanuto says it was called *Custrum Zabulon* by the Saracens in his day. Being thus on the very borders of Galilee, it is more than probable that there is some connexion between this place and the district אֶרֶץ כָּבוּל, "the land of C.") containing twenty cities, which was presented by Solomon to Hiram king of Tyre (1 K. ix. 11–14). The LXX. rendering of the name in 1 K., ὅριον, appears to arise from their having read גְּבוּל, *Gebool*, "boundary," for כָּבוּל. From the connexion in 1 K. ix. 13, the word seems to have suggested to Hiram the idea of worthlessness, though in what way is uncertain. According to Josephus, Hiram, not liking Solomon's gift, seizes on the name of one of the cities, which in his own Phoenician tongue expresses his disappointment (*μεθερμηνευόμενον γὰρ τὸ Χαβαλὼν κατὰ Φοινίκων γλῶτταν, οὐκ ἀρέσκον*, Jos. *Ant.* viii. 5, § 3 [cp. A. V. marg. of 1 K. ix. 13]), and forms from it a designation for the whole district; but this statement

respecting the meaning of כבול in Phoenician is not substantiated. Gesenius gives, only to reject, other etymologies of the name; Ewald (*Hist.* iii. 292) thinks that the name may have been wittily interpreted as if = כבל, *like naught*. Josephus states (*Ant.* viii. 5, § 3) that the land of *Chabalon* (Χαβαλών) was near Tyre, and (*cont. Ap.* i. 17) Χαβουλὼν in Galilee. He says elsewhere (*B. J.* iii. 3, § 1) that Lower Galilee extended from Tiberias to *Chabulon* near Ptolemais, where, however, the town *Chabolo* is evidently intended. In 2 Ch. viii. 2 Solomon is said to have built or rebuilt the cities. [G.] [W.]

CAD'DIS (Καδδίς, A. Γαδδίς, ℵ. Γαδδεί; *Gaddis*), the surname (διακαλούμενος) of JOANNAN, the eldest brother of Judas Maccabaeus (1 Macc. ii. 2).

CADES (ℵA. Κηδές, *v.* 63; Κεδές, *v.* 73; *Cades*), 1 Macc. xi. 63, 73. [KEDESH.]

CA'DES-BARNE (Κάδης Βαρνή; Vulg. has a different reading), Judith v. 14. [KADESH-BARNEA.]

CADESH. A. V. ed. 1611 (Gen. xvi. 14, xx. 1), R. V. KADESH.

CAD'MIEL (B. Καδοήλος, A. Καδμιὴλ in *v.* 26; B. Δαμαδιήλ, A. Καδωὴλ in *v.* 58; *Cadmihel*), a Levite appointed over the works of the Temple (1 Esd. v. 26, 58). [KADMIEL.] [F.]

CAESAR (Καῖσαρ; ὁ Καῖσαρ, John xix. 12; *Caesar*). In the N. T. Caesar is always a title, never a personal name, and denotes the emperor reigning at the time. It first became famous as the hereditary family name (*cognomen*) of C. Julius Caesar, the founder of the empire. It had been introduced a century before into the ancient patrician stock of the Julii, and was, as long as that stock occupied the throne, the distinctive name of the members of that noble house. When with the death of the Emperor Caius the Julian stock became extinct, his successor Claudius assumed with the imperial dignity the family name of the extinct stock. After that time it passed from one dynasty to another. Tacitus speaks of Caesar and Augustus as "names of imperial dignity" ("principatus vocabula," *Hist.* ii. 80). From Hadrian's time onwards usage changed, and Caesar became the title, not of the reigning emperor, but of the heir apparent. See Marquardt-Mommsen, *Römischen Alterthümer*, ii. pp. 746, 1082.

Four times in the N. T. the imperial name and authority come before us. (1) The Pharisees and Herodians tempt Jesus to challenge the sovereignty of Caesar in Judaea by condemning the payment of tribute to him (the poll-tax: Matt. xxii. 17; Mark xii. 14; Luke xx. 22). (2) Disloyalty to Caesar is the charge with which Pilate is threatened when he is disposed to release the "King of the Jews" (John xix. 12). Our Lord's claim of kingship was employed both in His lifetime and afterwards (Acts xvii. 7) to arouse the suspicion that His teaching was hostile to the Caesar. (3) Appeal to the tribunal of Caesar, the right of every Roman citizen, is the means employed by St. Paul to avoid being taken to Jerusalem for trial, and to put an end to his lengthened imprisonment at Caesarea (Acts xxv. 11). On this privilege of appeal and its limitations, see Wieseler, *Chronologie Apost. Zeit.* pp. 383–8; Conybeare and Howson, *Life and Epistles of St. Paul*, ch. xxii. (4) Caesar's household (see below) contained many Christians, who formed an important part of the Roman church at the time of St. Paul's first imprisonment (Phil. iv. 22). [E. R. B.]

CAESAR'S HOUSEHOLD. The "domus" or "familia Caesaris" represented by this expression (Phil. iv. 22) includes properly the whole of the imperial household, from those highest in rank and influence to the slaves of the lowest order. It is not, however, probable that the friends whose salutation St. Paul conveys are to be reckoned amongst the former. The "saints" alluded to by the Apostle dated their conversion to the Gospel earlier than the time of St. Paul's visit to Rome, and Bishop Lightfoot has ingeniously recovered some of their names from the list in Rom. xvi. These converts were Greeks, Syrians, and Jews, foreigners temporarily or permanently residing in the capital; and the inscriptions relating to the imperial household record names corresponding with the list in the Epistle sufficient to establish the presumption that in that list some members of the household are included. Indirectly this result is a testimony to the genuineness of the last two chapters of the Ep. to the Romans. See Lightfoot, *Philippians*, detached note at end of ch. iv. (from which the above is taken), and *Speaker's Comm.* in loco. [F.]

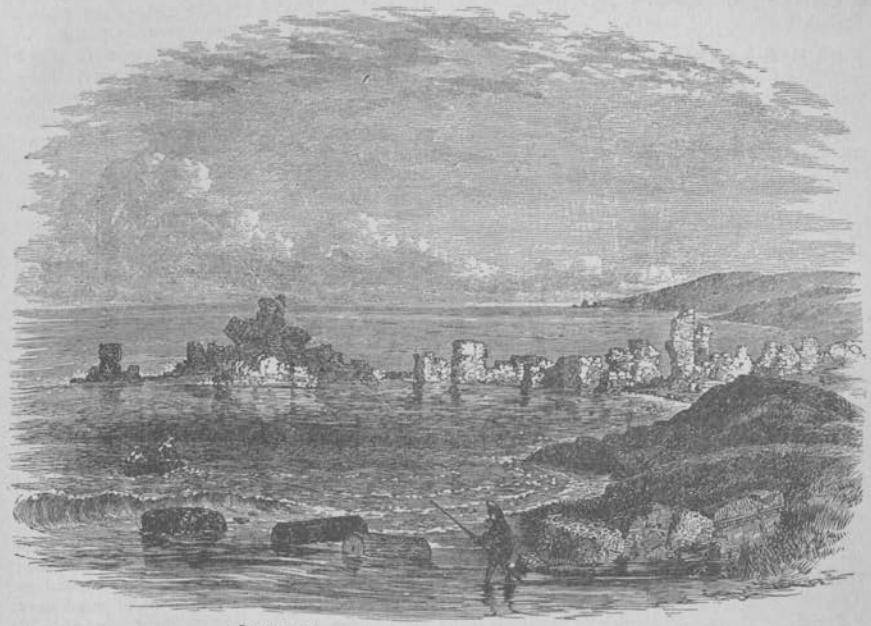
CAESARE'A (Καισαρεία, Acts viii. 40; ix. 30; x. 1, 24; xi. 11; xii. 19; xviii. 22; xxi. 8, 16; xxiii. 23, 33; xxv. 1, 4, 6, 13). The passages just enumerated show how important a place this city occupies in the Acts of the Apostles. It was the residence, apparently for several years, of Philip, one of the seven Deacons or almoners (viii. 40; xxi. 8, 16), and the scene of the conversion of the Italian centurion, Cornelius (x. 1, 24; xi. 11). Here Herod Agrippa I. died (xii. 19). From hence St. Paul sailed to Tarsus, when forced to leave Jerusalem on his return from Damascus (ix. 30), and at this port he landed after his second missionary journey (xviii. 22). He also spent some time at Caesarea on his return from the third missionary journey (xxi. 8, 16), and before long was brought back a prisoner to the same place (xxiii. 23, 33), where he remained two years in bonds before his voyage to Italy (xxv. 1, 4, 6, 13).

Caesarea was situated on the coast of Palestine, on the line of the great road from Tyre to Egypt, and between Joppa and Dora (Joseph. *B. J.* i. 21, § 5). The journey of St. Peter from Joppa (Acts x. 24) occupied rather more than a day. On the other hand St. Paul's journey from Ptolemais (Acts xxi. 8) was accomplished within the day. The distance from Jerusalem is given by Josephus, in round numbers, as 600 stadia (*Ant.* xiii. 11, § 2; *B. J.* i. 3, § 5). The Jerusalem Itinerary of the road passing through Nicopolis and Lydda gives 68 miles (Wesseling, p. 600. Dr. Robinson thinks this ought to be 78: *Bib. Res.* ii. 242, note). There is, however, a more direct road, through Antipatris, which is 7 or 8 miles shorter than that given in the Itinerary,—a point of some importance in

reference to the night-journey of Acts xxiii. [ANTIPATRIS.]

The site of Caesarea was formerly occupied by a town called "Strato's tower," which, according to Strabo, had a landing-place (*πρόσορμον ἔχων*). This town was rebuilt and enlarged by Herod the Great, and its importance was so increased by his great works that it was spoken of as being the head of Judaea ("Judaeae caput," Tac. *Hist.* ii. 79). The utmost care and expense were lavished on the building of Caesarea, which occupied ten years. It was a proud monument of the reign of Herod, who named it in honour of the Emperor Augustus. The full name was Καισαρεία Σεβαστή (Joseph. *Ant.* xvi. 5, § 1). It was sometimes called Caesarea Stratonis, and Caesarea Palaestinae; sometimes also (from its position) *παραλιός* (Joseph. *B. J.* iii. 9, § 1), or *ἡ ἐπὶ θαλάττῃ* (*ib.* vii. 1, § 3). It must be carefully distinguished from CAESAREA PHILIPPI.

The magnificence of Caesarea is described in detail by Josephus in two places (*Ant.* xv. 9; *B. J.* i. 21). The chief features were connected with the harbour (itself called Σεβαστὸς λιμὴν on coins and by Josephus, *Ant.* xvii. 5, § 1), which was equal in size to the Piraeus,—a vast breakwater, composed of stones 50 feet long, curved round so as to afford complete protection from the south-westerly winds, leaving an opening only on the north. Broad landing-wharves surrounded the harbour; and conspicuous from the sea was a temple, dedicated to Caesar and to Rome, and containing colossal statues of the Emperor and the Imperial City. Caesarea contained also an amphitheatre and a theatre. The latter was the scene of the death of Herod Agrippa I. Caesarea was the



Caesarea Palaestinae. (From a Sketch by Wm. Tipping, Esq.)

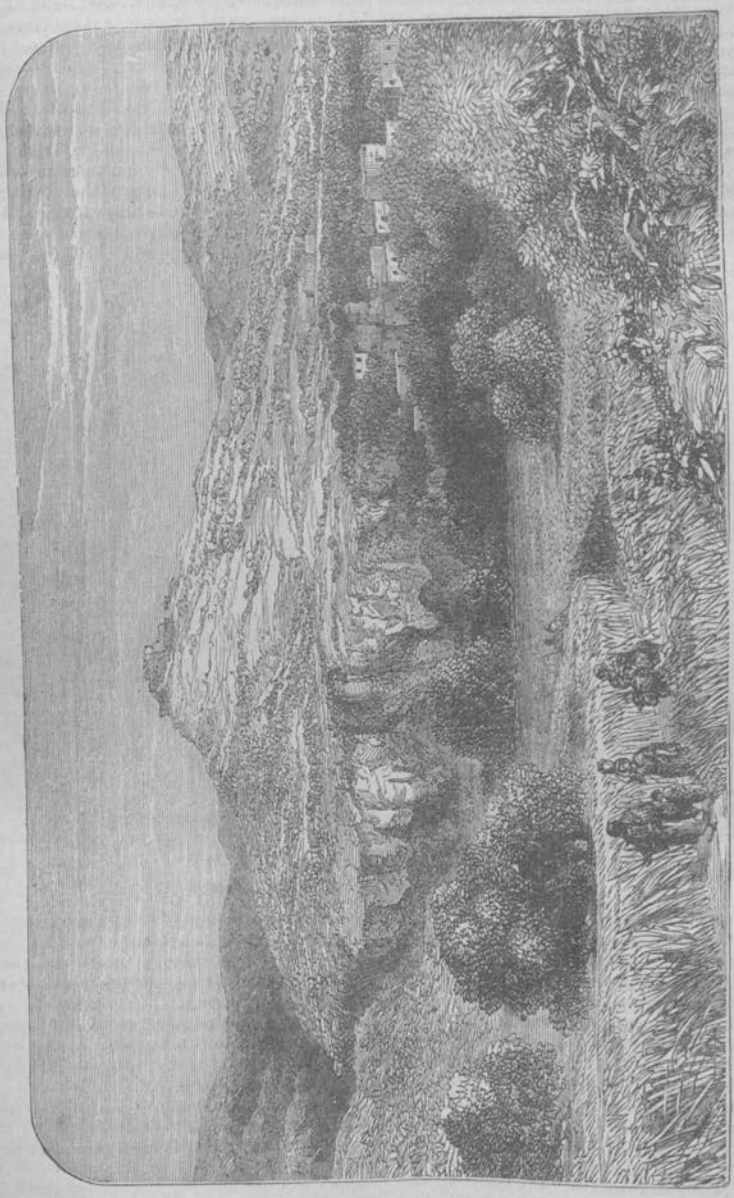
official residence of the Herodian kings, and of Festus, Felix, and the other Roman procurators of Judaea. Here also were the head-quarters of the military forces of the province. It was by no means strictly a Jewish city. The Gentile population predominated; and at the synagogue-worship the Scriptures of the O. T. were read in Greek. Constant feuds took place here between the Jews and Greeks; and an outbreak of this kind was one of the first incidents of the great war. It was at Caesarea that Vespasian was declared emperor. He made it a Roman colony, called it by his name, and gave to it the *Jus Italicum*. The history of the place, during the time of its greatest eminence, is summed up in one sentence by Pliny: "Stratonis turris, eadem Caesarea, ab Herode rege condita: nunc Colonia prima Flavia, a Vespasiano Imperatore deducta" (v. 14).

To the ecclesiastical geographer Caesarea is interesting as the home of Eusebius. It was also the scene of some of Origen's labours and the birth-place of Procopius. In 333 A.D. "the bath of Cornelius," perhaps a public bath erected by the centurion at his own cost, was shown to pilgrims (*Itin. Hieros.*). It continued to be a city of some importance even in the time of the Crusades. Now, though an Arabic corruption of the name still lingers on the site (*Kaisâriyeh*), it is utterly desolate; and its ruins have for a long period been a quarry, from which other towns in this part of Syria have been built. Remains of the theatre, the hippodrome, the mole, the temple, the aqueducts, and the walls of the Roman city are still extant (see Buckingham's *Travels;* the Appendix to vol. i. of Dr. Traill's *Josephus; PEF. Mem.* ii. 13–28; Guérin, *Samarie*, ii. 321–339). [J. S. H.] [W.]

CAESARE'A PHILIPPI (Καισάρεια ἡ Φιλίππου) is mentioned only in two Gospels (Matt. xvi. 13; Mark viii. 27), and in accounts of the

same transactions. The story in Eusebius, that the woman healed of the issue of blood, and supposed to have been named Berenice, lived at this place, rests on no foundation.

Caesarea Philippi was the northernmost point of our Lord's journeyings; and the passage in His life which was connected with the place was otherwise a very marked one (see Stanley's *Sinai & Palestine*, p. 391). The place itself is remarkable both in its physical and picturesque characteristics, and also in its historical associations. It was at the easternmost and most



Caesarea Philippi and the hill from which issues the eastern source of the Jordan. (From a photograph.)

important of the two recognised sources of the Jordan, the other being at *Tell el-Kâdy* [DAN or LAISH, which by Winer and others has been erroneously identified with Caes. Philippi]. Not that either of these sources is the most distant fountain-head of the Jordan, the name of the river being given (as in the case of the Mississippi and Missouri, to quote Dr. Robinson's illustration), not to the most remote fountains, but to the most copious. The spring rises, and the city was built, on a limestone terrace in a valley at the base of Mount Hermon. Caesarea

Philippi has no O. T. history, though it has been not unreasonably identified with BAAL-GAD. Its annals run back direct from Herod's time into heathenism. There is no difficulty in identifying it with the *Panium* of Josephus; and the inscriptions which show that the god Pan had once a sanctuary at this spot are not yet obliterated. Here Herod the Great erected a temple to Augustus, the town being then called from the grotto where Pan had been honoured. It is worth while here to quote in succession the words of Josephus and of Dr. Robinson:—"Herod, having accompanied Caesar to the sea and returned home, erected a beautiful temple of white marble near the place called Panium. This is a fine cavern in a mountain; under which there is a great cavity in the earth; and the cavern is abrupt and very deep, and full of still water. Over it hangs a vast mountain, and under the mountain rise the springs of the river Jordan. Herod adorned this place, which was already a very remarkable one, still further by the erection of this temple, which he dedicated to Caesar" (Joseph. *Ant.* xv. 10, § 3; cp. *B. J.* i. 21, § 3). "The situation is unique; combining in an unusual degree the elements of grandeur and beauty. It nestles in its recess at the southern base of the mighty Hermon, which towers in majesty to an elevation of 7000 or 8000 feet above. The abundant waters of the glorious fountain spread over the terrace luxuriant fertility and the graceful interchange of copse, lawn, and waving fields" (Robinson, iii. 404).

Panium became part of the territory of Philip, tetrarch of Trachonitis, who enlarged and embellished the town, and called it Caesarea Philippi, partly after his own name, and partly after that of the emperor (*Ant.* xviii. 2, § 1; *B. J.* ii. 9, § 1). Agrippa II. followed in the same course of flattery, and called the place Neronias (*Ant.* xx. 9, § 4). Josephus seems to imply in his life (*Vit.* 13) that many heathens resided here. Titus exhibited gladiatorial shows at Caesarea Philippi after the end of the Jewish war (*B. J.* vii. 2, § 1). The old name was not lost. Coins of *Caesarea Paneas* continued through the reigns of many emperors. Under the simple name of Paneas it was the seat of a Greek bishopric in the period of the great councils and of a Latin bishopric during the Crusades. It is still called *Bánias*, the first name having here, as in other cases, survived the second. A striking monument is the castle above the site of the city, one of the most remarkable fortresses in the Holy Land. [J. S. H.] [W.]

CAGE. The term so rendered by A. V. (marg. *coop*) and R. V. in Jer. v. 27, כֶּלֶוב, is more properly a *trap* (παγίς, *decipula*), in which decoy birds were placed. It is referred to in Ecclus. xi. 30 under the term κάρταλλος, which is elsewhere used of a tapering basket. [FOWLING.] In Rev. xviii. 2 the Greek term is φυλακή, meaning a prison or restricted habitation rather than a cage. [W. L. B.]

CAIAPHAS [3 syll.] (Καϊάφας; Καΐφας, D; *Caiphas*). His true name, Joseph, is given in Josephus, *Ant.* xviii. § 2, 2, where we learn that Caiaphas was a distinguishing name, just as another Joseph was called Joseph Barnabas (Acts iv. 36). Caiaphas has been explained as from כַּיָּפָא, Prov. xvi. 26 (Targum), and Keim does not hesitate to render it "the oppressor." But Delitzsch (*Zeitschrift für Luth. Theol.* 1876, p. 594) shows on the evidence of the Peshitto and the Mishna (*Parah*, iii. 5) that the Greek K here represents ק not כ, and he prints the name קַיָּפָא in Acts iv. 36 (cp. also Derenbourg, *Essai sur l'Histoire de la Palestine*, p. 215, n. 2). The derivation given above must therefore be abandoned, and Delitzsch cautiously refuses to give a substitute.

Joseph Caiaphas was appointed high-priest by Valerius Gratus, probably A.D. 18, and was superseded by Vitellius, A.D. 36, in favour of Jonathan the son of Ananus (Jos. *Ant.* xviii. 2, 2, and 4, 3). He thus held the office for a length of time very unusual at that period. For the conjunction of Annas and Caiaphas as high priests at the commencement of the ministry of the Baptist (Luke iii. 2), see ANNAS. The first recorded words of Caiaphas were spoken at the Sanhedrin assembled after the raising of Lazarus. In Caiaphas the Sadducees, to whom he and Annas belong, advance on this occasion to the position henceforth occupied by them as the bitter enemies of Jesus and the real authors of His death. They combine with the Pharisees, but the latter fall into the background (John xi. 47. See Westcott in loco). The unconscious prediction of Caiaphas that "Jesus should die for the nation" (v. 50) has been well said to be the last utterance of Jewish prophecy. St. John's description of Caiaphas as "high-priest that year" (xi. 49, 51, and xviii. 13) has been supposed (Keim) to betray ignorance of his long tenure of the office (but see Westcott in loco on the emphatic use of "that," ἐκεῖνος). The next mention of Caiaphas is at the meeting of the chief priests and rulers in his palace (αὐλή, Matt. xxvi. 3), at which the seizure of Jesus by stratagem was determined on. The bargain with Judas was the result of this decision. After the betrayal and the examination before Annas, Jesus was sent bound to Caiaphas (John xviii. 24). Some doubt may exist as to the parts assigned by St. John to Annas and Caiaphas respectively, but St. Matthew (xxvi. 57) shows plainly that it was Caiaphas who by his adjuration drew from Jesus the confession that He was the Son of God, and asked for the sentence of death (Matt. xxvi. 63 sq.). Indeed the Synoptists do not name Annas in connexion with the trial. The last mention of Caiaphas is as being present at the examination of Peter and John after their arrest in the Temple (Acts iv. 6). Here Annas is described as high-priest, and Caiaphas, who was probably in possession of the office, has no title given him. [See ANNAS.] It follows that it is impossible to assign with any certainty to Caiaphas the action said to have been taken by the high-priest in Acts v. 17 sq. Nothing is known of Caiaphas after his deposition. Westcott observes that "the relationship of Caiaphas to Annas (son-in-law) is not mentioned by any writer except St. John, and yet this relationship alone explains how Caiaphas was able to retain his office by the side of Annas and his sons." [E. R. B.]

CAIN (קַיִן [the meaning is altogether uncertain. The text asserts only an *assonance*, not

an etymology (as in Seth, Noah, and many other cases); Cain being connected with קָנָה not because it is derived from it (which would be against the laws of philology), but because it resembles it in sound. In Arabic قين means "a smith."—S. R. D.]; Κάιν; Joseph. Κάις; *Cain*). The historical facts in the life of Cain, as recorded in Gen. iv., are stated with suddenness and brevity[a]:—He was the eldest son of Adam and Eve; he followed the business of agriculture; in a fit of jealousy, roused by the rejection of his own sacrifice and the acceptance of Abel's, he committed the crime of murder, for which he was expelled from Eden, and led the life of an exile (a punishment assigned for the same crime by Homer and the laws of Menu); married (cp. v. 4; see Delitzsch on Gen. iv. 16 [1887], and Riehm, *HWB.* 'Kain'), he settled in the land of Nod, and built a city which he named after his son Enoch; his descendants are enumerated, together with the inventions for which they were remarkable. Occasional references to Cain are made in the N. T. (Heb. xi. 4; 1 John iii. 12; Jude *v.* 11).

The following points deserve notice in connexion with the Biblical narrative:—1. The position of "the land of Nod." The words do not define a geographical area, but as the name Nod itself implies—a land of *flight* or *exile*, in reference to *v.* 12 where a cognate word is used. The attempt to identify it with India is erroneously far-fetched; the only indication of its position is the indefinite notice that it was "east of Eden" (*v.* 16), which of course throws us back to the previous settlement of the position of Eden itself [EDEN]. It seems vain to attempt the identification of Nod with any special locality; the direction "east of Eden" may have reference to the previous notice in iii. 24, and may indicate that the land was opposite to (κατέναντι, LXX.) the entrance, which was barred against his return. It is not improbable that the *east* was further used to mark the direction which the Cainites took, as distinct from the Sethites, who would, according to Hebrew notions, be settled towards the west.

2. The "mark set upon Cain" has given rise to various speculations, many of which would never have been broached, if the Hebrew text had been consulted: the words are better rendered by the R. V. "the LORD appointed a sign for Cain, lest any finding him should smite him"; *i.e.* Jehovah *gave a sign to* Cain, very much as signs were afterwards given to Noah (Gen. ix. 13), Moses (Ex. iii. 2, 12), Elijah (1 K. xix. 11), and Hezekiah (Is. xxxviii. 7, 8). Whether the sign was perceptible to Cain alone, and given to him once for all, in token that no man should kill him, or whether it was some sign or bodily mark (cp. the Jewish traditions in Hamburger, *RE.* s. n. Kain), perceptible also to others and designed as a precaution to them, is uncertain; the nature of the sign itself is still more uncertain (see *Speaker's Comm.*, Ellicott's *O. T. Comm.*, and Delitzsch in loco).

3. The narrative implies the existence of a considerable population; for Cain fears lest he should be murdered in return for the murder he had committed (*v.* 14). The Talmud and Josephus (*Ant.* i. 2, § 1) explain his fears as arising not from men but from wild beasts; but such an explanation is wholly unnecessary. The family of Adam may have largely increased before the birth of Seth, as is indeed implied in the notice of Cain's wife (*v.* 17), and the mere circumstance that none of the other children are noticed by name may be explained on the ground that their lives furnished nothing worthy of notice.

4. The character of Cain deserves a brief notice (cp. 1 John iii. 12). He is described as a man of a morose, disappointed, and revengeful temper; and that he presented his offering in this state of mind, or without the deeper religious apprehension of Abel, is implied in the rebuke contained in *v.* 7, which is rendered by R. V.: "If thou doest well (or, as the LXX. has it, ἐὰν ὀρθῶς προσενέγκῃς), shalt thou not be accepted? (canst thou not lift it up? Cp. R. V. marg. and *QPB.*[3]) and if thou doest not well, sin coucheth (as a wild beast) at the door: and unto thee shall be his [Abel's] desire, and thou shalt rule over him" (better as marg., shall be its [sin's] desire; but thou shouldest rule over it). The narrative implies therefore that his offering was rejected, not on account of the nature of the gift, but on account of the temper in which it was brought.

5. The descendants of Cain are enumerated to the sixth generation (*v.* 17, &c.). Some commentators (from Buttmann to Kuenen; see Delitzsch and Riehm) have traced an artificial structure in this genealogy, by which it is rendered parallel to that of the Sethites (ch. v.): *e.g.* there is a decade of names in each, commencing with Adam and ending with Jabal and Noah, the deficiency of generations in the Cainites being supplied by the addition of the two younger sons of Lamech to the list; and there is a considerable similarity in the names, each list containing a Lamech and an Enoch; while Cain in the one = Cain-an in the other, Methusael = Methuselah, and Mehujael = Mahalaleel: the inference from this comparison being that the one was framed out of the other. But the genealogy of ch. v. may well have co-existed with that of iv. 17, &c. The differences far exceed the points of similarity; the order of the names, the number of generations, and even the meanings of those which are noticed as similar in sound, are easily to be explained by the tendency of tradition to assimilate what might be ethically distinct, or are sufficiently distinct to remove the impression of artificial construction. [On questions connected with the structure of Gen. iv. cp. Dillmann,[2] pp. 88–90 with the reff., and Delitzsch (1887) on iv. 18. Cp. also both on Cain and on the two lists Lenormant, *Les Origines de l'Histoire*, chs. iv.–v.—S. R. D.]

6. The social condition of the Cainites is prominently brought forward in the history. Cain himself was an agriculturist, Abel a shepherd: the successors of the latter are represented by the Sethites and the progenitors of the Hebrew race in later times, among whom a pastoral life was always held in high honour from the simplicity and devotional habits which it engendered:

[a] The opinion which counts Cain a myth or an elemental deity is examined by Baethgen, *Beiträge zur Semit. Religionsgeschichte*, p. 151; cp. Sayce, *Hibbert Lectt.* p. 236.

the successors of the former are depicted as the reverse in all these respects. Cain founded the first city; Lamech instituted polygamy; Jabal introduced the nomadic life; Jubal invented musical instruments; Tubal-cain was the first *smith*; Lamech's language takes the stately tone of poetry; and even the names of the women—Naamah (*pleasant*), Zillah (*shadow*), Adah (*ornamental*)—seem to bespeak an advanced state of civilisation. But along with this, there was violence and godlessness: Cain and Lamech furnish proof of the former, while the concluding words of Gen. iv. 26 imply the latter.

7. The contrast established between the Cainites and the Sethites appears to have reference solely to the social and religious condition of the two races. On the one side there is pictured a high state of civilisation, unsanctified by religion, and productive of luxury and violence; on the other side, a state of simplicity which afforded no material for history beyond the declaration, "Then began men to call upon the name of the Lord." The historian thus accounts for the progressive degeneration of the religious condition of man, the evil gaining a predominance over the good by its alliance with worldly power and knowledge, and producing the state of things which necessitated the flood (see W. Schultz in Herzog, *RE.*² s. n. Kain).

8. Another motive may be assigned for the introduction of this portion of sacred history. All ancient nations have loved to trace up the invention of the arts to some certain author, and, generally speaking, these authors have been regarded as objects of divine worship. Among the Greeks, Apollo was held to be the inventor of music, Vulcan of the working of metals, Triptolemus of the plough. We may decline to find the name Apollo in Jabal and Jubal, or Vulcan in Tubal-cain, or identify from similarity of meaning Naamah with Venus (Sansc. Vanas); but it is possible that the Hebrew historian has recorded here the names of those to whom the invention of the arts was traditionally assigned, obviating at the same time the dangerous error into which other nations had fallen, and reducing the estimate of their value by the position which their inventors held as descendants not of Abel the accepted but of Cain the "cursed." [W. L. B.] [F.]

CAIN (with the article, הַקַּיִן = "the lance," Ges.; B. Ζακανάειμ, A. Ζανὼ Ἀκείμ [both texts include the name preceding]; *Accain*; R. V. *Kain*); one of the cities in the hill-country of Judah, named in the same list with Carmel, Ziph, and Juttah, and immediately after Zanoah (Josh. xv. 56). It is probably *Kh. Yûkîn*, S.E. of Hebron, near *Kh. Sûnût*, Zanoah, and *Tell ez-Zif*, Ziph (*PEF. Mem.* iii. 312, 371). [G.] [W.]

CAI'NAN (marg. correctly Kenan, so R. V.; קֵינָן; Καινάν; *Cainan; teli faber*, Gesen. *Thes.*, as if = קַיָן, from the Arab. *to forge*, as in Tubal-cain, Gen. iv. 22: see Dr. Mill's *Vindic. of our Lord's Geneal.*, p. 150). **1.** Son of Enos, aged 70 years when he begat Mahalaleel his son. He lived 840 years afterwards, and died aged 910 (Gen. v. 9–14). The rabbinical tradition was that he first introduced idol-worship and astrology — a tradition which the Hellenists transferred to the post-diluvian Cainan (2). Thus Ephraem Syrus asserts that the Chaldees in the time of Terah and Abram worshipped a graven god called Cainan; and Gregory Bar-Hebraeus, another Syriac author, also applies it to the son of Arphaxad (Mill, *ut sup.*). The origin of the tradition is not known; it may be due to the assonance with the Sabaean god Kenan [Baethgen, *Beiträge zur Semit. Religionsgeschichte*, pp. 128, 152], or it may have been suggested by the meaning of the supposed root in the Arabic and Aramean dialects; just as another signification of the same root seems to have suggested the tradition that the daughters of Cain were the first who made and *sang* to musical instruments (Gesen. *s. v.* קין).

2. Καινάμ, son of Arphaxad, and father of Sala, according to Luke iii. 36, 37, and usually called the second Cainan. He is also found in the LXX. in the genealogy of Shem, Gen. x. 24 [A. Καινάμ, E. -άν], xi. 12 [Καινάν], and 1 Ch. i. 18 (A. Καινάν, B. om.), but is nowhere named in the Hebrew codd., nor in any of the Versions made from the Hebrew, as the Samaritan, Chaldee, Syriac, Vulgate, &c. Moreover it can be demonstrated that the intrusion of the name into the Version of the LXX. is comparatively modern, since Augustine is the first writer who mentions it as found in the O. T. at all; and since we have the absolute certainty that it was not contained in any copies of the Alexandrine Bible which either Berosus, Eupolemus, Polyhistor, Josephus, Philo, Theophilus of Antioch, Julius Africanus, Origen, Eusebius, or even Jerome, had access to. It seems certain therefore that his name was introduced into the genealogies of the Greek O. T. in order to bring them into harmony with the genealogy of Christ in St. Luke's Gospel, where Cainan was found in the time of Jerome. The question is thus narrowed into one concerning its introduction into the Gospel. It might have been thought that it had found its way by accident into the genealogy of Joseph, and that St. Luke inserted that genealogy exactly as he found it. But as Beza's very ancient MS. (D) presented to the University of Cambridge does not contain the name of Cainan, and there is strong ground for supposing that Irenaeus's copy of St. Luke did not contain it, it seems on the whole more probable that Cainan was not inserted by St. Luke himself, but was afterwards added in deference to tradition, or by accident, or to make up the number of generations to 17, or from some other cause which cannot now be discovered. For further information, see *Geneal. of our Lord J. C.*, ch. viii.; Heidegger, *Hist. Patriarch.* ii. 8–15; Bochart, *Phaleg*, lib. ii. cap. 13; and for the opposite view, Mill's *Vindic. of our Lord's Geneal.*, p. 143. [A. C. H.]

CAIUS. [JOHN, Second and Third Epistles of.]

CAKES. [BREAD.]

CA'LAH (כָּלַח; Χαλάχ; *Chalc*; Assyr. *Kalḫu*, *Kalḫi*, *Kâlḫa*, *Kalaḫ*), one of the most ancient cities of Assyria, being mentioned (Gen x. 11) with Nineveh, "the city Rehoboth," and Resen, as having been founded by Asshur, the patriarch of the Assyrians, when he emigrated from the land of Shinar. Calah has been thought to be identical with the Halah (חֲלַח) of

the Books of Kings and Chronicles (2 K. xvii. 6, xviii. 11; 1 Ch. v. 26), but the Greek form of this name, Ἀλαέ, is against this, and the Assyrian inscriptions, which give the native name of Calah, settle the question definitely. Calah, the Assyrian *Kalḫu*, is represented by the mounds known under the name of Nimroud, from which a large proportion of the Assyrian sculptures now in the British Museum came. These ruins are situated about 20 miles south of Kouyunjik (Nineveh), on an irregular wedge of land formed by the Tigris and the greater or upper Zab, where the latter flows into the former (see map in art. NINEVEH, *D. B.*[1] ii. 549). According to Aššur-naṣir-âpli, king of Assyria, about 885 B.C. Calah was founded by Shalmaneser I., about 1300 years before Christ,[a] and was rebuilt by Aššur-naṣir-âpli, who raised there a royal palace of considerable extent and great magnificence. The walls were decorated with bas-reliefs of large size and most careful execution, in some cases coloured in the natural tints, as far as was possible upon alabaster. These sculptures represent the religious ceremonies in which the king, as priest, engaged, and the military expeditions which he led. The entrances were adorned by winged lions and bulls, many of them human-headed. This palace built by Aššur-naṣir-âpli is known as the North-west Palace. Others were built by his successors, one being the much ruined Central Palace (where the Black Obelisk was found),

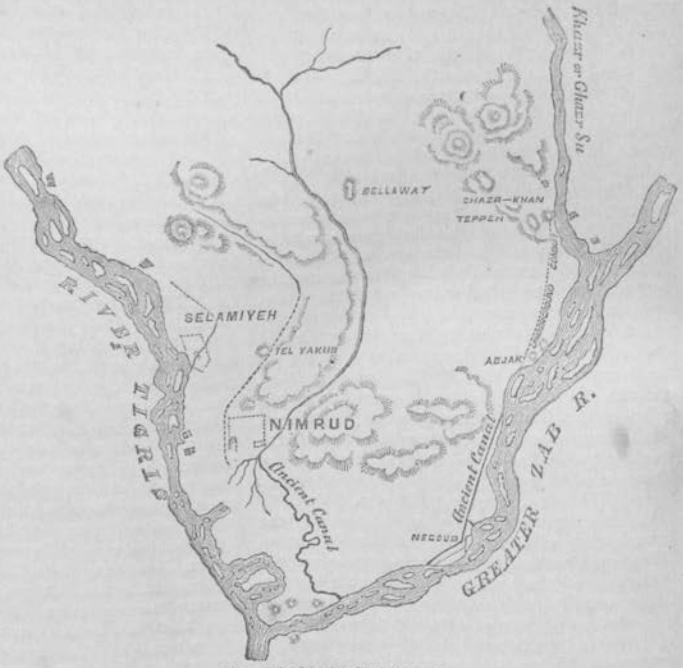


Chart of the District about Nimroud.

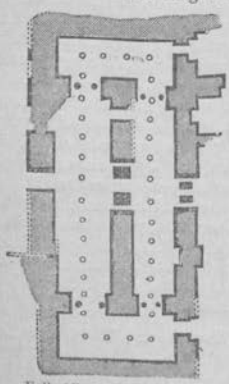
erected by Shalmaneser II., son and successor of Aššur-naṣir-âpli, east of the N.W. Palace. This was also the palace of the biblical Tiglath-pileser, but was completely dismantled by Esarhaddon, who used the materials for the construction of his own palace.[b] Sargon, king of Assyria B.C. 722, restored the N.W. Palace, and his grandson, Esarhaddon, B.C. 681, built the South-west Palace, with materials taken from the Central Palace. Lastly, the grandson of Esarhaddon, Aššur-êtil-îlâni, the last king of Assyria but one, built a smaller edifice in the south-eastern corner of the platform of Nimroud. Of the sculptures which adorned the walls of these buildings, those of Tiglath-pileser are probably the most interesting, on account of their being those of a king whose name carries with it biblical associations. The length of the palace-mound of Nimroud is about 600 yards (from N. to S.), and the breadth about 400 yards (from E. to W.). At the north-west corner stands a lofty conical mound 140 feet high. This covers the ruins of the *zikkuratu*, or Tower of Calah, which was excavated by Sir H. Layard, who found it to be square at the base, each side measuring 167 ft. 6 in., and faced with hewn stone to a height of 20 ft. Besides the above-named palaces, there were also two temples on this site, one of them being dedicated to Nebo, and adorned with two colossal statues of that god, as well as four smaller



Hall of Esarhaddon's Palace at Nimroud.

[a] Schrader, in his *Cuneiform Inscriptions and the Old Testament*, vol. i. p. 80, says, "Thus the foundation of Kalah took place about 500 years before the time when the passage of Genesis we are now considering was composed by the Jahvistic-prophetic narrator, writing about 800 B.C."

[b] Fortunately a good portion of these most interesting remains have been preserved.

ones.[e] In Assyrian times the Tigris flowed quite close to the western side of the platform on which the palaces stood, but there is now a considerable interval, the river having changed its course. The town was enclosed within walls of considerable extent, the plan of the city being oblong, the northern side showing traces of no less than 58 towers. The palaces and temples above described were situated in the south-west corner of the enclosure. The platform upon which they were built was composed of sun-dried bricks, faced with slabs of stone, and it rises 13 yards above the river-bed. Steps or inclined passages led from the palace-platform to the town.

The successors of Shalmaneser I. seem to have taken but little interest in the city of Calah, and it did not long remain a serious rival of Nineveh and Assur, in which cities most of the Assyrian kings preferred to dwell. Calah owes its principal importance to Aššur-naṣir-âpli (885 B.C.), who completely rebuilt the city, finished the great wall, and settled there the captives which he had brought from the lands that he had conquered. Besides the building of the N.W. Palace, he dug also an irrigation-canal from the upper Zab towards the city, and adorned its banks with orchards and vineyards. Calah remained faithful to Shalmaneser II., son of Aššur-naṣir-âpli, during the revolt of his son, Aššur-danin-âpli, against him, the inhabitants remembering the favours which Shalmaneser and his father had conferred upon them. Shalmaneser's son and grandson, and likewise Tiglath-pileser, resided here, but the city never regained the importance it had in Aššur-naṣir-âpli's reign, and Aššur-êtil-îlâni's efforts to make the city a royal residence resulted in nothing—the end was too near, for under his successor, Sin-šarra-iškun or Saracos, Assyria fell, never to rise again.

To Sir H. Layard the greatest credit is due for his enthusiastic work on this important site, which he was the first to discover. Hormuzd Rassam and George Smith also excavated there. Cp. Sir H. Layard's *Nineveh and its Remains*, *Nineveh and Babylon*, &c.; H. Rassam's articles; G. Smith's *Assyrian Discoveries;* Rawlinson's *Ancient Monarchies;* Schrader's *Cuneiform Inscriptions and the Old Testament* (English by the Rev. O. C. Whitehouse); and Fried. Delitzsch's article in the *Calwer Bibellexicon*. [T. G. P.]

CALAMO'LALUS (A. Καλαμωλάλος, B. Καλαμωκάλος; *Cliomus*), 1 Esd. v. 22, a corrupt name, apparently agglomerated of ELAM and LOD (cp. *Speaker's Comm.* in loco). [G.]

CALAMUS, SWEET CANE. The Hebrew words *kĕnēh bôsem*, *kâneh hattôb*, קְנֵה בֹשֶׂם, קָנֶה הַטּוֹב (κάλαμος εὐώδης, κινάμωμον; *calamus*, *fistula;* Arabic قَنَاة, *kenah*), occur five times, and are translated in the A. V. and R. V. of Ex. xxx. 23, Cant. iv. 14, Ezek. xxvii. 19, by "calamus," and in Is. xliii. 24, Jer. vi. 20, by "sweet cane," the same substance being evidently intended in all cases. In Exodus it is named as one of the ingredients of the holy anointing oil; in Canticles, among sweet scents, where it is expressed by *kâneh* alone; in Isaiah and Jeremiah, as a precious offering purchased from a far country (*hattôb* in Jeremiah meaning sweet or good); and by Ezekiel it is enumerated among the commodities brought into the markets of Tyre: "Cassia and calamus (Heb. *kâneh*) were in thy market." The word *kâneh*, "reed"

Andropogon schoenanthus.

without the adjective, has been treated of under BULRUSH, q.v. In these passages no indigenous plant is intended, and we may therefore dismiss the speculations as to any fragrant plant from Lebanon, in which many writers have indulged. No aromatic reed has been found in Syria. From a comparison of the passages where it is mentioned, it is clear that *kĕnēh bôsem* was not a sweet cane like the species of sugar-cane, the sweet sorghum, once extensively cultivated at Jericho and in the Jordan valley; but an exotic aromatic cane, imported by the Phoenicians probably from the East. Bochart reasonably argues from its being mentioned in Exodus that it was probably an Arabian product (*Hieroz.* ii. 687). It was certainly the *κάλαμος ἀρωματικὸς* of the Greeks. But this does not bring us much nearer identification, since all we are told of it is that it came from India (Dioscorides, i. 17). And in this statement the Arabic author Abu 'l Fadli concurs. There are many aromatic reeds in India. Dr. Royle suggests *Andropogon aromaticus* from Central India. There is another species of lemon-grass, *Andropogon schoenanthus*, found both in India and Arabia, and which the writer once procured in Gilead, which affords a delicate aromatic perfume. [H. B. T.]

CAL'COL (כַּלְכֹּל; A. Χαλχάλ, in K. and Ch.; B. Χαλκαδ in K. and Χαλκὰ in Ch.; *Chalchal*, *Chalcol*), a man of Judah, son or descendant of Zerah (1 Ch. ii. 6). Probably identical [see DARDA] with CHALCOL (A. V.

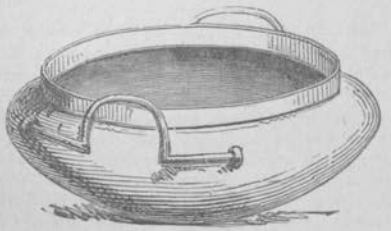
[e] Two of the latter are now in the British Museum [see the article ASSYRIA].

only; no difference in the Hebrew), son of Mahol, one of the four wise men whom Solomon excelled in wisdom (1 K. iv. 31, LXX. *v.* 27).

[G.] [F.]

CALDE'A, -EANS, -EES. [CHALDEA, &c.]

CALDRON. 1. דּוּד, probably from דּוּד, *boil*, akin to Arab. ﻏﻠﻰ, *to be moved*, as water in boiling; a pot or kettle; also a basket. 2. סִיר, a pot or kettle. 3. אַגְמוֹן, or אֲגַמּוֹן. 4. קְלַחַת, perhaps from the root קָלָה, in post-biblical Heb. = *to steam forth*; λέβης, χύτρα, ποδιστήρ; *lebes, olla*. A vessel for boiling flesh,



Bronze Caldron from Egyptian Thebes. (Brit. Mus.)

either for ceremonial or domestic use (1 Sam. ii. 14; 2 Ch. xxxv. 13; Job xli. 20; Ps. lviii. 9, A. V. and R. V. *pots*; Mic. iii. 3). [H. W. P.]

Assyrian Caldron. (Kouyunjik.)

CA'LEB (כָּלֵב, of uncertain meaning; Χάλεβ).

1. According to 1 Ch. ii. 9, 18, 19, 42, 50, the son of Hezron, the son of Pharez, the son of Judah, and the father of Hur by Ephrath or Ephratah, and consequently grandfather of Caleb the spy. His brothers, according to the same authority, were Jerahmeel and Ram; his wives Azubah, Jerioth, and Ephratah; and his concubines Ephah and Maachah (*vv.* 9, 42, 46, 48). But from the manifest corruption of the text in many parts of the chapter, from the name being written כְּלוּבַי [R. V. "Chelubai"] in *v.* 9 (which looks like a patronymic, from כְּלוּב, Chelub [1 Ch. iv. 11] the brother of Shuah), from the evident confusion between the two Calebs at *v.* 49, and from the non-appearance of this elder Caleb anywhere except in this genealogy, drawn up in Hezekiah's reign [AZARIAH, No. 13], it is impossible to speak with confidence of his relations, or even of his existence.

2. Son of Jephunneh, by which patronymic the illustrious spy is usually designated (Num. xiii. 6, and ten other places), with the addition of that of "the Kenezite" in Num. xxxii. 12 [R. V. "Kenizzite"], Josh. xiv. 6, 14. Caleb is first mentioned in the list of the rulers or princes (נְשִׂיאִים), called in the next verse רָאשִׁים, "heads," one from each tribe, who were sent to search the land of Canaan in the second year of the Exodus, where it may be noted that these נְשִׂיאִים or רָאשִׁים are all different from those named in Num. i. ii. vii. x. as princes or heads of the tribes of Israel, and consequently that the same title was given to the chiefs of families as to the chiefs of the whole tribe. Caleb was a נָשִׂיא or רֹאשׁ in the tribe of Judah, perhaps as chief of the family of the Hezronites, at the same time that Nahshon the son of Amminadab was prince of the whole tribe. He and Oshea or Joshua the son of Nun were the only two of the whole number who, on their return from Canaan to Kadesh-barnea, encouraged the people to enter in boldly to the land and take possession of it; for which act of faithfulness they narrowly escaped stoning at the hands of the infuriated people. In the plague that ensued, while the other ten spies perished, Caleb and Joshua alone were spared. Moreover, while it was announced to the congregation by Moses that, for this rebellious murmuring, all that had been numbered from twenty years old and upwards, except Joshua and Caleb, should perish in the wilderness, a special promise was made to Caleb the son of Jephunneh that he should survive to enter into the land which he had trodden upon, and that his seed should possess it. Accordingly, forty-five years afterwards, when some progress had been made in the conquest of the land, Caleb came to Joshua and reminded him of what had happened at Kadesh, and of the promise which Moses made to him with an oath. He added that, though he was now eighty-five years old, he was as strong as in the day when Moses sent him to spy out the land, and he claimed possession of the land of the Anakims, Kirjath-arba, or Hebron, and the neighbouring hill-country (Josh. xiv.). This was immediately granted to him, and the following chapter relates how he took possession of Hebron, driving out the three sons of Anak; and how he offered Achsah his daughter in marriage to whosoever would take Kirjath-sepher, *i.e.* Debir; and how when Othniel, his younger brother, had performed the feat, he not only gave him his daughter to wife, but with her the upper and nether springs of water which she asked for. After this we hear no more of Caleb, nor is the time of his death recorded. But we learn from Josh. xxi. 13, that in the distribution of cities out of the different tribes for the priests and Levites to dwell in, Hebron fell to the priests, the children of Aaron, of the family of Kohathites, and was also a city of refuge, while the surrounding territory continued to be the possession of Caleb, at least as late as the time of David (1 Sam. xxv. 3, xxx. 14).

But a very interesting question arises as to the birth and parentage of Caleb. He is, as we have seen, styled "the son of Jephunneh the Kenizzite," and his younger brother Othniel, afterwards the first Judge, is also called "the son of Kenaz" (Josh. xv. 17; Judg. i. 13, iii. 9, 11). On the other hand, the genealogy in 1 Ch. ii. makes no mention whatever of either Jephunneh or Kenaz, but represents Caleb, though obscurely, as being a descendant of Hezron and

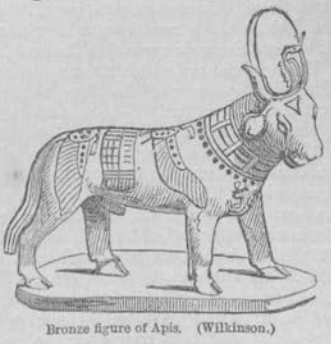
a son of Hur (see, too, ch. iv.). Again in Josh. xv. 13 we have this singular expression, "Unto Caleb the son of Jephunneh he gave a part [R. V. "portion"] *among the children of Judah*;" and in xiv. 14, the no less significant one, "Hebron became the inheritance of Caleb the son of Jephunneh the *Kenizzite*, because that he wholly followed the LORD, the *God of Israel*" [R. V.]. These variations are probably due to the different documents consulted (see Dillmann[2] on Num. xxxii. 12; Josh. xiv. 6): by combining them it becomes nearly certain that Caleb was a foreigner by birth; a proselyte, incorporated into the tribe of Judah, into which perhaps he or his ancestors had married, and one of the first-fruits of that Gentile harvest of which Jethro, Rahab, Ruth, Naaman, and many others were samples and signs. And this conjecture receives a most striking confirmation from the names in Caleb's family. For on turning to Gen. xxxvi. 11, 15, we find that *Kenaz* is an Edomitish name, the son of Eliphaz. Again, in 1 Ch. ii. 50, 52, among the sons of Caleb the son of Hur we find Shobal and half the Manahethites or sons of Manahath. But in Gen. xxxvi. 20–23, we are told that Shobal was the son of Seir the Horite, and that he was the father of Manahath. So, too, *Korah*, *Ithran*, *Elah* (1 Ch. ii., iv.), and perhaps Jephunneh, compared with Pinon, are all Edomitish names (1 Ch. i.; Gen. xxxvi.). We find, too, Temanites, or sons of Teman (1 Ch. i. 36), among the children of Ashur the son of Hezron (1 Ch. iv. 6). The finding thus whole families or tribes, apparently of foreign origin, incorporated into the tribes of Israel, seems further to supply us with an easy and natural solution of the difficulty with regard to the great numbers of the Israelites at the Exodus. The seed of Abraham had been multiplied by the accretion of proselytes, as well as by generation.

3. CALEB-EPHRATAH, according to the present text of 1 Ch. ii. 24, the name of a place where Hezron died. But no such place was ever heard of, and the composition of the name is a most improbable one. Nor could Hezron or his son have given any name to a place in Egypt, the land of their bondage, nor could Hezron have died, or his son have lived, elsewhere than in Egypt. The present text must therefore be corrupt, and the reading which Jerome's Hebrew Bible had, and which is preserved in the LXX. and Vulg., is probably the true one, viz. בָּא כָלֵב אֶפְרָתָה, "Caleb came in unto Ephratah." The whole information given seems to be that Hezron had two wives: the first, whose name is not given, the mother of Jerahmeel, Ram, and Caleb or Chelubai; the second, Abiah, the daughter of Machir, whom he married when sixty years old, and who bare him Segub and Ashur. Also that Caleb had two wives: Azubah, the first, the mother, according to Jerome's version, of Jerioth; and Ephratah, the second, the mother of Hur: and that this second marriage of Caleb did not take place till after Hezron's death. [A. C. H.]

On the other hand, Bertheau and Oettli, in their notes on this passage, fix the place in the neighbourhood of Ephratah or Bethlehem. Further, they query the correctness of the translation of the corrected text, and point out that it introduces a notice not in keeping with the text (see Wordsworth, note in loco). [F.]

CALEB. "The south of Caleb" is the portion of the Negeb (נֶגֶב) or "south country" of Palestine, occupied by Caleb and his descendants (1 Sam. xxx. 14). In the division of Canaan Joshua assigned the city and suburbs of Hebron to the priests, but the "field" of the city, that is the pasture and corn lands, together with the villages, were given to Caleb. The south, or Negeb, of Caleb is probably to be identified with the extensive basin or plain which lies between Hebron and Kurmul, the ancient Carmel of Judah, where Caleb's descendant Nabal had his possessions. [W. A. W.]

CALF (עֵגֶל, פָּר, which some see reproduced in the chief god of Palmyra, Aglibol, though this deity was represented in human form; μόσχος; δάμαλις). In Ex. xxxii. 4, we are told that Aaron, constrained by the people in the absence of Moses, made a molten calf of the golden earrings of the people, to represent the Elohim which brought Israel out of Egypt. (A young "bull" would be a better rendering, since the ancients never worshipped calves.) He is also said to have "fashioned it (the gold) with a graving-tool" (LXX. ἐν γραφίδι), but the word חֶרֶט may mean a *mould* (cp. 2 K. v. 23, A. V. and R. V. "bags;" LXX. θυλάκοις). Bochart (*Hieroz.* lib. ii. cap. xxxiv.), followed by Keil, Ewald, Kalisch, Gesenius, &c., explains it to mean "he placed the earrings in a bag," as Gideon did (Judg. viii. 24). Probably, however, it means that after the calf had been cast, Aaron ornamented it with the sculptured wings, feathers, and other marks, which were similarly represented on the statues of Apis, &c. (Wilkinson, i. 289). It does not seem likely that the earrings would have provided the enormous quantity of gold required for a *solid* figure. More probably (so Diestel and Baudissin) it was a wooden figure laminated with gold, a process which is known to have existed in Egypt. "A *gilded* ox covered with a pall" was an emblem of Osiris (Wilkinson, *Anc. Eg.* i. 278 [ed. 1878]).



Bronze figure of Apis. (Wilkinson.)

The legends about the calf are numerous. The suggestion is said by the Jews to have originated with certain Egyptian proselytes (Godwin's *Mos. and Aar.* iv. 5); Hur, the "desert's martyr," was killed for opposing it; Abu'lfeda says that all except 12,000 worshipped it; and that, when

made, it was magically animated. "The devil," says Jonathan, "got into the metal and fashioned it into a calf" (Lightfoot, *Works*, v. 398). Hence the Koran (*Sura*, vii. 146) calls it "a corporeal calf, made of their ornaments, *which lowed*." This was effected, not by Aaron (according to the Mohammedans), but by al Sâmeri, a chief Israelite, whose descendants still inhabit an island of the Arabian Gulf. He took a handful of dust from the footsteps of the horse of Gabriel, who rode at the head of the host, and threw it into the mouth of the calf, which immediately began to low (see Koran, *Sura*, vii. 146–148; xx. 81–96). No one is to be punished in hell more than forty days, being the number of days of the calf-worship (Sale's *Koran*, ed. Davenport, p. 7, note; and see Weil's *Legends*, p. 125). It was a Jewish proverb that "no punishment befalleth the Israelites in which there is not an ounce of this calf" (Godwin, *ubi supr.* See Hamburger, *R.E.* s. nn. "Aaron," "Kälberdienst").

To punish the apostasy Moses burnt the calf, and then grinding it to powder scattered it over the water, where, according to some, it produced in the drinkers effects similar to the water of jealousy (Num. v.). He probably adopted this course as the deadliest and most irreparable blow to their superstition (Jerome, *Ep.* 128; Plut. *de Is.* p. 362), or as an allegorical act (Job xv. 16), or with reference to an Egyptian custom (Herod. ii. 41; Pole, *Syn.* ad loc.). It has always been a difficulty to explain the *process* which he used; some account for it by his supposed knowledge of a forgotten art (such as was one of the boasts of alchemy) by which he could reduce gold to dust. Goguet (*Origine des Lois*) invokes the assistance of natron, which would have had the additional advantage of making the draught nauseous. Baumgarten endows the fire employed with miraculous properties. Bochart and Rosenmüller adopt the simpler and more natural view that he cut, ground, and filed the gold to powder, such as was used to sprinkle over the hair (Jos. *Ant.* viii. 7, § 3). There seems little doubt that טָחַן = κατακαίω, LXX. (Hävernick's *Introd. to the Pentat.* p. 292).

It has always been a question respecting this calf and those of Jeroboam, whether, I. the Jews intended them to represent some Egyptian god, or II. a mere cherubic symbol of Jehovah.

I. The arguments for the first supposition are: 1. The ready apostasy of the Jews to Egyptian superstition (Ezek. xx. 6–10; Acts vii. 39, and *passim*; Lactant. *Inst.* iv. 10). 2. The fact that they had been worshippers of Apis (Josh. xxiv. 14), and their extreme familiarity with his cultus (1 K. xi. 40). 3. The resemblance of the feast described in Ex. xxxii. 5, to the festival in honour of Apis (Suid. s. *v.* Ἄπιδες; Herod. iii. 28; Plut. *de Isid.* xx. 29; Rawlinson, *Herod.* ii. 423). Of the various sacred cows of Egypt, that of Isis, of Athor, and of the three kinds of sacred bulls, Apis (Osiris in Memphis), Basis, and Mnevis (see Strabo, xvii. 805; Aelian, *Hist. An.* xi. 10; Macrob. *Saturn.* i. 21), Sir G. Wilkinson fixes on the last as the prototype of the golden calf: "The offerings, dancings, and rejoicings practised on that occasion were doubtless in imitation of a ceremony they had witnessed in honour of Mnevis" (*Anc. Egypt.*, v. 197; cp. ii. 140 [1878]). It is observable that Philo uses the word ταῦρος as well as μόσχος for Aaron's calf, and in Rev. iv. 7 no doubt μόσχος means "a bull;" but Philo was entirely mistaken in supposing that it was a symbol of Typhon. The ox was worshipped from its utility in agriculture (Plut. *de Is.* 74), and was a symbol of the sun, and consecrated to him (Hom. *Od.* i. xii. &c.; Warburton, *Div. Leg.* iv. 3, 5). Thus among the Persians a bull is the symbol of Mithras, and Moloch was sometimes worshipped with an ox's head (Movers, *Phöniz.* i. 377; cp. Lact. *Instt.* iv. 10), and Bacchus is called βουγενής (Pausan. vi. 26). Hence it is almost universally found in Oriental and other mythologies. 4. The expression "an ox that eateth hay," &c. (Ps. cvi. 20, &c.), where some see an allusion to the Egyptian custom of bringing a bottle of hay when they consulted Apis (Godwin's *Mos. and Aar.* iv. 5). Yet these terms of scorn are rather due to the intense hatred of the Jews both to this idolatry and that of Jeroboam. Thus in Tob. i. 5 (see *Speaker's Comm.* note) we have one of Jeroboam's calves called contemptuously ἡ δάμαλις Βάαλ, although the calf-worship was wholly distinct from the Baal-worship introduced by Jezebel. In Jer. xlvi. 15 (A. V. "are thy valiant men [R. V. "strong ones"] swept away?") the LXX. has Ἄπις ὁ μόσχος σου ὁ ἐκλεκτός, and the true reading may be, "Hath Khaph (*i.e.* Apis) thy chosen one fled?" (Bochart, *Hieroz.* ii. 28, 6; Schleusner, *s. v.* Ἄπις; Ewald, Hitzig, &c.)

II. It seems to us more likely that in this calf-worship the Jews merely

> "*Likened their Maker* to the graved ox;"

or, in other words, adopted a well-understood cherubic emblem (1 Kings vii. 25, 29; Ezek. i. 10; x. 14; Rev. iv. 7). Reverence for domestic animals was common among pastoral peoples (W. R. Smith, i. 277, &c.), and calf-worship very common among Semitic races; and though it be matter of dispute whether or not it was common among the ancient Hebrews (see Diestel in Riehm's *HWB.* and Baudissin in Herzog, *RE.*² s. v. "Kalb, goldenes"), yet, 1. it is obvious that they were aware of this symbol, since Moses finds it unnecessary to describe it (Ex. xxv. 18–22). 2. Josephus seems to imply that the calf symbolised God (*Ant.* viii. 8, § 4). 3. Aaron in proclaiming the feast (Ex. xxxii. 5) distinctly calls it a feast to Jehovah, and speaks of the god as the visible representation of Him Who had led them out of Egypt. 4. Independent of the fact that the Egyptians only worshipped *live* animals, and that the images of the calf were probably used in processions only, it was extremely unlikely that they would so soon adopt a deity whom they had so recently seen humiliated by the judgments of Moses (Num. xxxiii. 4). 5. There was only *one* Apis, whereas Jeroboam erected *two* calves (but see Jahn, *Arch. Bibl.* § 464). 6. Jeroboam's well-understood political purpose was, not to introduce a new religion (1 Kings xii. 28, 32, 33; cp. 2 Kings iii. 2, 3), but to provide a different form of the old; and we can thus see the *reason* why *this* was the only form of idolatry into which Judah never fell, since she already possessed the archetypal emblems in the Temple. 7. It appears from 1 K. xxii. 6, &c. that the prophets of Israel, though sanctioning the calf-worship, still

regarded themselves, and were regarded, as "prophets *of Jehovah*." If these views be correct, the sin of Aaron and Jeroboam was a violation of the second commandment (*Bilderdienst*), and not so flagrant an apostasy as would be implied by a violation of the first (*Abgötterei*). The people however were little likely to draw these distinctions, and the sins of Aaron and Jeroboam rapidly culminated in grosser forms of idolatry (Amos v. 25, 26; Jer. ii. 28, xi. 13; 2 Kings xvii. 22, 23).

These arguments, out of many others, are adduced from the interesting treatise of Moncaeus, *Aaron Purgatus, sive de Vitulo Aureo* (*Critici Sacri*, ix.). The work is inhibited by the Church of Rome, and has been answered by Visorinus. A brief resumé of it may be found in Pole, *Syn.* ad Ex. xxxii., and in Watt's *Remnants of Time* (ad finem). For fuller accounts of the controversy, see Moebius, *Moscholatria*; Spencer, *de legg. Hebr.* iii. 4; Bochart, *Hieroz.* p. ii. c. xxxiv.; Selden, *de Diis Syris, Syntagma*, i. 4. [CHERUBIM.]

The Prophet Hosea is full of denunciations against the Northern worship of the calves (Hos. viii. 5, 6; x. 6), and mentions the curious custom of *kissing* them (xiii. 2). His change of Bethel into Bethaven *possibly* rose from contempt of this idolatry (but see BETHAVEN). The calf at Dan was carried away by Tiglath-pileser, and that of Bethel ten years after by his son Shalmaneser (2 K. xv. 29, xvii. 3; Prideaux, *Connexion*, i. 15).

Bochart thinks that the ridiculous story of Celsus about the Christian worship of an ass-headed deity called Θαφαβαὼθ ἢ Ὀνιήλ—a story, at the origin of which Tertullian (Ὀνοκοίτης, *Apol.* 16, *Ad Nat.* i. 14) could only guess—sprang from some misunderstanding of cherubic emblems (Minuc. Fel. *Apol.* ix.). But it is much more probable, as Origen conjectured, that the Christians were confounded with the absurd mystic *Ophiani* or other Gnostic sects which indulged in strange symbols (Tac. *Hist.* v. 4; Merivale, *Hist. of Emp.* vi. 564. See *Dict. of Christ. Ant.*, s. v. *Asinarii*).

In the expression "the calves of our lips" (Hos. xiv. 2; R. V. "*as* bullocks *the offering of* our lips"), the word "calves" is used metaphorically for victims or sacrifices, and the passage may mean "we will render to Thee sacrifices of our lips," that is, "the tribute of thanksgiving and praise" (see Dr. Pusey's note in loc.; utterances of thanksgiving instead of sacrifices of thank-offerings, *Speaker's Comm.* note; what was spiritual and not material, Orelli), or "we will offer to Thee the sacrifices which our lips have vowed." The LXX. render *καρπὸν τῶν χειλέων* (*i.e.* פְּרִי for פָּרִים), and is followed by the Syr. and Arab. Versions; cp. also Heb. xiii. 15: a rendering, inasmuch as the Heb. text is unquestionably harsh, preferred by many moderns (*QPB.*[3]). For allusions to the "fatted calf," see Gen. xviii. 21, Luke xv. 23, &c.: and on the custom of cutting up a calf, and "passing between the parts thereof" to ratify a covenant, see Jer. xxxiv. 18, 19; Gen. xv. 10, 17; Ephrem Syrus, i. 161; Hom. *Il.* iii. 208. [F. W. F.]

CALI'TAS (LXX. om.; *Calitas*), 1 Esd. ix. 48, a Levite who taught and explained the word of the Lord, and is called Kelita in Neh. viii. 7. If he be the same as the Calitas of *v.* 28, he was also one of the Levites who promised to repudiate his "strange wife." Dr. Swete, however, reproducing in the text Κῶνος, οὗτος Καλειταῖς, καὶ Παθαῖος, conjectures the right reading to have been καλεῖται Σκεπαθαῖος. [F.]

CALLIS'THENES (Καλλισθένης), a partisan of Nicanor, who was burnt by the Jews on the defeat of that general in revenge for his guilt in setting fire to "the sacred portals" (2 Macc. viii. 33). [B. F. W.]

CAL'NEH, or CAL'NO (כַּלְנֵה, כַּלְנוֹ; Χαλάννη, Χαλάνη; *Chalanne*), according to Gen. x. 10, one of the cities of Nimrod, mentioned with Babel, Erech, and Akkad, "in the land of Shinar." The identification of Calneh is very uncertain. The Targum of Jerusalem, Eusebius, Jerome, and Ephraim the Syrian make it to be Ctesiphon (Seleucia), beyond the Tigris, towards Elam. Others make it to be Niffer, a city which lay between the Euphrates and the Tigris, the Nipuru of the Assyrian and Babylonian inscriptions. Both these identifications, however, are mere guesses, and worthless. The Calneh of Gen. x. 10, and the Calno of Is. x. 9, where, according to the LXX., "the tower was built," remain as yet unidentified. With regard to the Calneh of Amos vi. 2 ("Pass ye to Calneh, and see; and from thence go ye to Hamath the great; then go down to Gath of the Philistines"), this is apparently a Syrian city, and is probably the same as the Kulnia of the Assyrian tribute-lists, where it is mentioned with Arpad, Carchemish, Hadrach, &c. Whether this is the same as the Kullanī of the geographical lists, is uncertain. This last-named is apparently the Kullani which was captured in the year 738 B.C. by Tiglath-pileser III. Prof. Fried. Delitzsch compares the Calneh of Amos with this city, and gives, as a possible identification, the modern Kullanhu, a ruined town about six miles from Arpad. It is therefore possible that the Kullanī or Kulnia of the Assyrian inscriptions, the Calno of Is. x. 9, and the Calneh of Amos vi. 2, are one and the same place. There seems to be a confusion of two names in the Old Testament. [T. G. P.]

CAL'PHI (ℵA. ὁ Χαλφεί; Jos. Χαψαῖος; *Calphi*), father of Judas, one of the two captains (ἄρχοντες) of Jonathan's army who remained firm at the battle of Gennesar (1 Macc. xi. 70). [B. F. W.]

CALVARY (κρανίον; Syr. *Karkaptha; Calvaria*; R. V. *the skull*), a word occurring in the A. V. only in Luke xxiii. 33, and there no proper name (cp. the French word *Chaumont* [Renan, *Vie de Jésus*, p. 269]), but arising from the translators having literally adopted the word *calvaria*, i.e. a bare skull, the Latin word by which the κρανίον of the Evangelists is rendered in the Vulgate; κρανίον again being nothing but the Greek interpretation of the Hebrew GOLGOTHA.

Κρανίον is used by each of the four Evangelists in describing the place of the Crucifixion, and is in every case translated in the Vulg. *calvaria*; and in every case but that in St. Luke the A. V. has "skull." Dean Stanley has not omitted to notice this (*S. & P.* p. 460, note), and

to call attention to the fact that the popular expression "Mount Calvary" is not warranted by any statement in the accounts of the place of our Lord's Crucifixion. There is no mention of a mount in either of the narratives. The association of "mount" with the place of Crucifixion is of early origin; the Bordeaux Pilgrim has (*Itin. Hiero.*) "monticulus Golgotha," and this expression was probably current at an earlier period. [CRUCIFIXION; GOLGOTHA; JERUSALEM.] [G.] [W.]

CAMEL. Under this head we shall consider the Hebrew words *gâmâl, bêcher* or *bichrâh*, and *chirchârôth*. As to the *achashterânim*[a] in Esth. viii. 10, erroneously translated "camels" by the A. V., see MULE (note).

1. *Gâmâl* (גָּמָל; κάμηλος; *camelus*) is the common Hebrew term to express the genus "camel," irrespective of any difference of species, age, or breed: it occurs in numerous passages of the O. T., and is in all probability derived from a root[b] which signifies "to carry." It has been preserved with scarcely any alteration in Arabic, Greek, and all the languages of modern Europe. It gave its name to the third letter of the Hebrew alphabet, which in its original form was a rude outline of the shape of the camel. The first mention of camels occurs in Gen. xii. 16, as among the presents which Pharaoh bestowed upon Abram when he was in Egypt. It is clear from this passage that camels were early known to the Egyptians (see also Ex. ix. 3), though no representation of this animal has yet been discovered on the monuments (Wilkinson, *Anc. Egypt.* i. 234 [1878]. In *PSBA.* xii. 81–84, Houghton adduces one or two Egyptian words which denote with much probability the camel). The camel has been from the earliest times the most important beast of burden amongst Oriental nations. The Ethiopians had "camels in abundance" (2 Ch. xiv. 15); the queen of Sheba came to Jerusalem "with camels that bare spices and gold and precious stones" (1 K. x. 2); the men of Kedar and of Hazor possessed camels (Jer. xlix. 29, 32); David took away the camels from the Geshurites and the Amalekites (1 Sam. xxvii. 9, xxx. 17); forty camels' burden of good things were sent to Elisha by Benhadad king of Syria from Damascus (2 K. viii. 9); the Ishmaelites trafficked with Egypt in the precious gums of Gilead, carried on the backs of camels (Gen. xxxvii. 25). It was especially in the regions east and south of Palestine that camels were most numerous, as they are to this day. The Reubenites in their war with the Hagarites, the Arabs of the western Belka, took of their camels 50,000 (1 Ch. v. 21), and the powerful tribe of the Beni Sakk'r, who now inhabit that region, boast of 100,000 camels. The Midianites and the Amalekites possessed camels "as the sand by the sea-side for multitude" (Judg. vii. 12). Job had 3,000 camels before his affliction (Job i. 3), and 6,000 afterwards (xlii. 12). And in the picture given by Isaiah of the universal triumph of Christ's Church in the latter days, the wild sons of the desert are described as coming in with their camels: "The multitude of camels shall cover thee, the dromedaries of Midian and Ephah" (lx. 6).

David had a special officer to take charge of the royal camels, Obil, the Ishmaelite (1 Ch. xxvii. 30), whose charge probably pastured in his own native deserts, then under David's sway. On the return from the Babylonian Captivity, only 435 camels were possessed by the whole congregation (Neh. vii. 69).

The camel was used for riding (Gen. xxiv. 64; 1 Sam. xxx. 17), as a beast of burden generally (Gen. xxxvii. 25; 1 K. x. 2; 2 K. viii. 9, &c.), and for draught purposes (Is. xxi. 7: see also Suetonius, *Neron.* c. 11[c]). From 1 Sam. xxx. 17 we learn that camels were used in war: compare also Pliny (*N. H.* viii. 18), Xenophon (*Cyrop.* vii. 1, 27), Herodotus (i. 80, vii. 86), and Livy (xxxvii. 40). It is to the mixed nature of the forces of the Persian army that Isaiah is probably alluding in his description of the fall of Babylon (Is. xxi. 7).

The employment of the camel for draught is, however, less frequent than as a beast of burden. In Arabia and North Africa, indeed, the camel is still ordinarily yoked to the plough, but in Syria this service is almost exclusively performed by the ox and the ass. Though Isaiah (xxi. 7) speaks of "a chariot [so R. V. marg., but in text "a troop"] of camels," he is probably referring to a Persian, not a Jewish custom, as he is describing the composition of the Median army, whose camels would be the Bactrian two-humped species. The camel is not now attached to carriages on wheels, and its anatomical structure does not adapt it so much for draught as for burdens. "They will carry their treasures upon the *bunches* of camels" (Is. xxx. 6). The great strength of the camel does not lie in the propelling power of the shoulder, but in the sustaining power of the back, especially of the hump, called above "the bunch." To enable the camel to receive its load, by a special provision of nature it is formed to kneel down whenever it desires to rest or to drink (Gen. xxiv. 12), and it also prefers feeding in this posture. This habit of kneeling down is not merely the result of training; it is the natural posture of repose, as is shown also by the callosities on the joints of the legs, and especially by that on the breast, which serves as a pedestal to support the body.

We read of "camel's furniture" (Gen. xxxi. 34) and "ornaments" (Judg. viii. 21; R. V. "crescents"). The former, in which Rachel hid the images stolen from her father, is a huge wooden framework or saddle upon and round the hump, over which carpet and woollen cloth is fastened. On the top of the pile, men sit cross-legged, but women and children are carried in cages or light wooden framework, slung as panniers on either side of the saddle. The riding camels are frequently decorated with bands of bright coloured cloth or leather, on which are stitched cowrie shells, little bells, and sometimes silver crescent-shaped

[a] אַחַשְׁתְּרָנִים. See *QPB.*[3] The R. V. of the latter part of this verse is very different from the A. V.

[b] גָּמַל = Arab. *hamala*, "to carry," according to Gesenius and others. [But cp. Sansk. *kramêla* and Assyr. *gam-mal*. The term appears to be a loan word both in the Aryan and Semitic languages (= hump-backed?).—C. J. B.]

[c] "Commisit etiam camelorum quadrigas."

ornaments ("ornaments like the moon," Judg. viii. 21).[a] To this day these crescent-shaped ornaments are used, so thickly studded as to jingle at every step. The camel is never guided by a bit, but simply by a halter attached to a noose round the nose. Nothing more is needed, for the camels always follow in line, though the halter of the leader is frequently held by a mounted horseman who directs the whole caravan. Cf. Statius, *Thebaid.* ix. 687: "Niveo lunata monilia dente."

The camel is by no means an amiable animal, and its owner never seems to form any attachment to his beast, nor the animal to reciprocate kindness in any degree. I never found one camel valued above his fellow for intelligence or affection. A traveller always makes a friend of his horse, most certainly of his ass, sometimes of his mule, but never of his camel. I have made a journey in Africa for three months with the same camels, but never succeeded in eliciting the slightest token of recognition in one of them, or of a friendly disposition for kindness shown. Dr. Robinson gives the following very faithful account of the camel:—"Admirably adapted to the desert regions which are their home, they yet constitute one of the evils which travelling in the desert brings with it. Their long, slow, rolling or rocking gait, although not at first very unpleasant, becomes exceedingly fatiguing, so that I have often been more exhausted in riding five-and-twenty miles on a camel than in travelling fifty upon horseback. Yet without them, how could such journeys be performed at all? But their home is the desert, and they were made, in the wisdom of the Creator, to be the carriers of the desert. The coarse and prickly shrubs of the waste are to them most delicious food, and even of them they eat but little. So few are the wants of their nature, that their power of going without food, as well as without water, is wonderful. They never appear to tire, but commonly march as freshly at evening as in the morning . . . If they once begin to fail, they soon lie down and die. Thus, two camels of our train died between Suez and Akabah, which a few hours before had been travelling with full loads. In all our journey to Wâdy Musa, the camels fed only upon shrubs, and never tasted grain of any kind, although once we had them loaded for thirty-six hours, during all which time they browsed only for one hour. Their well-known habit of lying down upon the breast to receive their burdens . . . is an admirable adaptation of nature to their destiny as carriers . . . Hardly less wonderful is the adaptation of their broad-cushioned feet to the arid sands and gravelly soil, which it is their lot chiefly to traverse. The camel in very many respects is not unlike the sheep. They are silly timid animals; gregarious, and when alarmed, like sheep, they run and huddle all together. They are commonly represented as patient, but, if so, it is the patience of stupidity. They are rather exceedingly impatient, and utter loud cries of indignation when receiving their loads, and not seldom on being made to kneel down. They are also obstinate, and frequently vicious; and the attempt to urge them forward is often very much like trying to drive sheep the way they do not choose to go. The cry of the camel resembles, in a degree, the hollow bleating of the sheep; sometimes it is like the howling of neat cattle, or the hoarse squeal of the swine. But the Arabs heed not their cries, nor does the poor animal find much mercy at their hands. Heavy and galling loads and meagre fare are his appointed portion, and God has hardened him to them. The camels of the Fellahîn (husbandmen) appear to have an easier lot; they are mostly large, fat, and strong, while those of the Bedouin in the deserts are comparatively thin and slender. The singular power of the camel to go without water seems also to be of the same nature as that of the sheep, at least in its manifestation, though in a far greater degree. The dew and the juice of grass and herbs are sufficient for them in ordinary cases, though, when the pasturage has become dry, the Arabs water their flocks every two days and their camels every three. The longest trial to which we subjected our camels with respect to water was from Cairo to Suez, four days; yet some of them did not drink even then, although they had only the driest fodder. But at all times the camel eats and drinks little; he is a cold-blooded, heavy, sullen animal, having little feeling and little susceptibility for pain. Thistles and briars and thorns he crops and chews with more avidity than the softest green fodder; nor does he seem to feel pain from blows or pricks unless they are very violent.

"There is nothing graceful or sprightly in any camel, old or young; all is misshapen, ungainly, and awkward. The young have nothing frisky or playful, but in all their movements are as staid and sober as their dams. In this respect how unlike the lamb!

"As the carriers of the East, 'the ships of the desert,' another important quality of the camel is his surefootedness. I was surprised to find them travelling with so much ease and safety up and down the most rugged mountain passes. They do not choose their way with the like sagacity as the mule or even as the horses, but they tread much more surely and safely, and never either slip or stumble . . . The sounds by which the Arabs govern their camels are very few and very guttural. The signal for kneeling is not unlike a gentle snore, and is made by throwing the breath strongly against the palate, but not through the nose. That for stopping is a sort of a guttural clucking which I never could master" (*Robinson's Researches*, ii. pp. 208–210).

The provision of nature by which the camel is enabled to subsist so long without a fresh supply of water, consists in the large development of the honeycomb network, or tissue of cells, which lines the first stomach, and which receives and retains the water taken into the stomach after the natural thirst has been allayed. These honeycomb cells become largely dilated to receive the water.

The camel is not a swift animal. On good ground it will keep up a pace, when laden, of three miles an hour; but its average speed, taking into account rough or uneven ground and hills, does not exceed two and a half miles

[a] שַׂהֲרֹנִים. Compare also Is. iii. 18, "Round tires like the moon," A. V.; "crescents," R. V. The LXX. has μηνίσκοι, Vulg. *lunalae*.

an hour, which is the ordinary calculation for travelling in the East. But this pace it will maintain for many consecutive hours. The dromedary, or finely-bred swift camel, will keep up eight or ten miles an hour when lightly mounted.

Camel's flesh was forbidden as food to the Israelites (Lev. xi. 4; Deut. xiv. 7), because, though the camel "cheweth the cud, it divideth not the hoof." As the camel does not *fully divide the hoof*, the anterior parts only being cleft, it was excluded by the very terms of the definition. The flesh of the camel is now eaten by all Moslems without scruple. It is coarse and dry, much inferior to beef, though commonly used by the Bedawee. Among the Syrians, only the very poorest think of cooking it.

The same distinction was observed as regards sacrifice. The Israelites were forbidden to sacrifice the camel; among the Arabs it was a common offering (W. R. Smith, *The Religion of the Semites*, i. 201).

The milk is very largely used wherever the camel exists, and is excellent. It is rich and strong, but not very sweet. It was esteemed from the earliest times (Aristot. *Hist. Anim.* vi. 25, § 1; Pliny, *N. H.* xi. 41, xxviii. 9). Among Jacob's gifts to Esau were "thirty milch camels with their colts" (Gen. xxxii. 15), גְּמַלִּים מֵינִיקוֹת, lit. "camels giving suck." The milk which Jael offered Sisera would probably be camel's milk, as in camels consisted the wealth of the Kenites, and the prohibition of the flesh to the Jews did not extend to the milk. The milk is ordinarily at once soured and curdled, in which state it is most nourishing and refreshing. The curds are salted, immediately squeezed into a sort of incipient cheese, and are eaten in this state. Butter is also made from the new milk poured into a leather bottle and beaten with a stick.

John the Baptist had "his raiment of camel's hair" (Matt. iii. 4; Mark i. 6), and it seems probable that Elijah was clad in a similar garment (Calmet, *Dict. Frag.* No. cccxx.; Rosenmüll. *Schol. ad* Is. xx. 2). The hair of the camel, especially the coarse woolly tufts about the hump and back, is sometimes torn off, but more generally, as we have observed, closely shorn in spring, and is woven into a coarse thick fabric by the Arab women. It is with this material that the "black tents of Kedar" are generally covered, as it is much thicker and stouter than woollen stuff. It is very harsh and rough to the touch, and thus the Baptist's dress was in accordance with the austerity of his life. There is also a soft fabric made of the carefully selected under-wool of the camel, but this is a costly luxury, dearer than the finest cloth of sheep's wool (see Aelian, *Nat. Hist.* xvii. 34).

Ezekiel (xxv. 5) declares that Rabbah shall be a "stable for camels, and the children of Ammon a couching place for flocks" (R. V.). The ruins in this country are places of resort for the Bedawee where they pasture their camels and their sheep. See "Illustrations of Scripture," in vol. ii. pt. ix. of *Good Words*.

2. *Bêcer, bicrâh* (בֶּכֶר, בִּכְרָה; LXX. κάμηλος in Is. lx. 6; in Jer. ii. 23, strangely ὀψέ; δρομεὺς in Verss. of Aq., Theod., and Sym.; *dromedarius, cursor*). The Hebrew words occur only in the two passages above named, where the A. V. and R. V. read "dromedary," and no doubt correctly. The dromedary is not a distinct species, but merely a finer race, differing from the camel of the caravan as a race-horse does from a cart-horse. It is taller, more slender, and generally, but not always, of a lighter colour. The hump is smaller and the shoulders broader than in the common camel. It is distinguished in Arabia as the *Heirie*, and a still finer and taller race is possessed by the Touareg of the Sahara, and known as *Mahari*. It is intolerant of cold, and never thrives near the coast. Dromedaries, when pressed, can accomplish eighty miles in a day.

Isaiah, foretelling the conversion of the Gentiles, says, "The multitude of camels shall cover thee, the dromedaries of Midian and Ephah." In Jeremiah God expostulates with Israel for her wickedness, and compares her to a swift *bicrâh* "traversing her ways." Bochart (*Hieroz.* i. 15 sq.) contends that the Hebrew word is indicative only of a difference in age, and adduces the authority of the Arabic *becra* in support of his opinion that a young camel is signified by the term. Gesenius follows Bochart, and (*Comment. ad Jes.* lx. 6) answers the objections of Rosenmüller, who (*Not. ad* Bochart, *Hieroz.* l. c.) argues in favour of the "dromedary." Gesenius's remarks are commented on again by Rosenmüller in his *Bibl. Naturgesch.* ii. 21. The Versions support the rendering dromedary, as does also the epithet "swift," applied to the *bicrâh* in Jeremiah; while on the other hand the term is used in the Arabic[e] to denote "a young camel." Oedmann, commenting on the Hebrew word, makes the following observation:—"'The multitude of *camels* shall cover thee, the *dromedaries* of Midian,' &c.—a weak distinction if *bicrîm* means only young camels in opposition to old ones" (*Verm. Sam.*), but most moderns accept the rendering "young camel" (cp. R. V. marg.).

3. As to the *chirchârôth* (כִּרְכָּרוֹת) of Is. lxvi. 20, which the LXX. interpret σκιάδια, the Vulg. *carrucae*, and the A. V. and R. V. "swift beasts," there is some difference of opinion. The explanation is not satisfactory which is given by Bochart (*Hieroz.* i. 25), following some of the Rabbis, and adopted by Rosenmüller, Gesenius, Lee, and others, that "dromedaries" are meant. According to those who sanction this rendering, the word (which occurs only in Isaiah, *l. c.*) is derived from the root כָּרַר, "to leap," "to gallop;" but the idea involved is surely inapplicable to the jolting trot of a camel. The old Versions moreover are opposed to such an explanation. We prefer, with Michaelis (*Suppl. ad Lex. Heb.* No. 1210) and Parkhurst (*s. v.*), to understand by *chirchârôth* "panniers" or "baskets" carried on the backs of camels or mules, and to refer the word to its unreduplicated form in Gen. xxxi. 34.[f] The *shaded*

[e] بِكْر, "a young camel," up to the age of nine years (Lane, *Arab. Lex.* i. 240).

[f] כַּר, *i.e.* "the camel's saddle," with a kind of canopy over it. See Jahn (*Arch. Bibl.* p. 54, Upham's translation): "Sometimes they travel in a covered vehicle which is secured on the back of a camel, and answers the

vehicles of the LXX. are to be seen to this day in the environs of every Eastern city, where the ladies are carried in light chairs slung on either side of a camel or mule, with a framework over

Assyrians loading a Camel. (Kouyunjik.)

them, covered with very light canvas or white calico.

There is no trace of any wild original of the camels, nor any clue to the period when it was first reduced to servitude by man. The only camels known to exist in the world in a feral state are a few in the Marisma, near the mouth of the Guadalquivir in Spain, and in the Canarian island of Fuerteventura, the descendants of some turned loose there many years ago, like the wild horses of South America.

Arabian Camel.

The camel is probably a native of Central or Southern Asia, as the bones of fossil species have been found in the tertiary remains of the Himalayan region. The camel of Arabia, Africa,

Bactrian or Two-humped Camels on Assyrian monuments. (Layard.)

and Syria is *Camelus dromedarius*. The only other species, *Camelus bactrianus*, which is depicted on the Assyrian monuments, is never used in Western Asia or Africa, and was probably unknown to the Jews before the Babylonian captivity. It extends through Persia, Central Asia, Tartary, and China, and can sustain extreme cold, but has not the powers of endurance of the one-humped camel. The camel belongs to the family *Camelidae*, order *Ruminantia*.

The camel, as may be readily conceived, is the subject amongst Orientals of many proverbial expressions; see many cited by Bochart (*Hieroz.* i. 30), *e.g.* "Men are like camels; not one in a hundred is a dromedary." And from the Talmud, "There are many old camels which carry the skins of young ones to be sold;" "The camel went to seek horns, and lost his ears."

Two proverbs relating to camels are used by our Lord: "It is easier for a camel to go through the eye of a needle, than for a rich man to enter into the kingdom of God" (Matt.

Bactrian Camel.

xix. 24); "Ye blind guides, which strain out the gnat and swallow the camel" (Matt. xxiii. 24, R. V.). In both the force of the hyperbole is in its

---

purpose of a small house." In this sense the word may be referred to the Arabic كور "sella camelina, *aliis*, cum apparatu suo" (Freytag, *s. v.*). [But the name כרכרות is probably to be explained by Hebrew כרכר, "sallit," or Arabic وكر, "subsultim incessit camela."—C. J. B.]

magnitude, and there is no occasion either to explain away or amend the text, in the former passage, which simply means that the entrance of the rich man into heaven without Divine grace or assistance is impossible. [W. H.] [H. B. T.]

CA'MON (קָמוֹן, Ges. perhaps = *stability*; B. Ῥαμνών, A. Ῥαμμώ; Jos. Καμῶν; *Camon*; R. V. *Kamon*), the place in which JAIR the Judge was buried (Judg. x. 5). The few notices of Jair which we possess have all reference to the country E. of Jordan, and there is therefore no reason against accepting the statement of Josephus (*Ant.* v. 7, § 6) that Camon was a city of Gilead. In support of this is the mention by Polybius (v. 70, § 12) of a Camoun (Καμοῦν) in company with Pella and other trans-Jordanic places (Reland, p. 679). The name has not yet been recovered on the E. of Jordan. Eusebius (*OS.*[2] p. 271, 65) identifies it with Καμμανά, Jerome (*OS.*[2] p. 144, 18) with Cimona, CYAMON, in the plain of Esdraelon. [G.] [W.]

CAMP. [ENCAMPMENTS.]

CAMPHIRE (כֹּפֶר,[a] *côpher*; κύπρος; *cyprus*, *Cyprus*). There can be no doubt that "camphire," A. V., is an incorrect rendering of the Hebrew term, which occurs in the sense of some aromatic substance only in Cant. i. 14, iv. 13: the margin in both passages has "cypress," giving the form but not the signification of the Greek word. The R. V. rightly renders it "henna flowers." *Camphire*, or, as it is now generally written, *camphor*, is a product of a tree

Lawsonia alba.

largely cultivated in the island of Formosa, the *Camphora officinarum*, of the nat. order *Lauraceae*. There is another tree, the *Dryobalanops aromatica* of Sumatra, which also yields camphor; but it is improbable that the substance secreted by either of these trees was known to the ancients.

From the expression "cluster of *côpher* in the vineyards of Engedi," in Cant. i. 14, the Chaldee Version reads "bunches of grapes." Several Versions retain the Hebrew word. The substance really denoted by *côpher* is the κύπρος of Dioscorides, Theophrastus, &c., and the *cypros* of Pliny, *i.e.* the *Lawsonia alba* of botanists, the *henna* of Arabian naturalists. So R. Ben Melek (Cant. i. 14): "The cluster of côpher is that which the Arabs call al-henna" (see Celsius, *Hierob.* i. 223). Although there is some discrepancy in the descriptions given by the Greek and Latin writers of the cypros-plant, yet their accounts are on the whole sufficiently exact to enable us to refer it to the henna-plant. The Arabic authors Avicenna and Serapion also identify their *henna* with the *cypros* of Dioscorides and Galen (Royle in Kitto's *Bibl. Cycl.* art. *Kopher*).

"The κύπρος," says Sprengel (*Comment. on Dioscor.* i. 124), "is the *Lawsonia alba*, Lam., of which *L. inermis* and *spinosa*, Linn., are synonyms; it is the *côpher* of the Hebrews and the *henna* of the Arabs, a plant of great note throughout the East to this day, both on account of its fragrance and of the dye which its leaves yield for the hair." In a note Sprengel adds that the inhabitants of Nubia call the henna-plant *Khofreh*; he refers to Delisle (*Flor. Aegyp.* p. 12). Hasselquist (*Trav.* p. 246, Lond. 1766), speaking of this plant, says, "The leaves are pulverised and made into a paste with water; the Egyptians bind this paste on the nails of their hands and feet, and keep it on all night: this gives them a deep yellow [red?], which is greatly admired by Eastern nations. The stain cannot be removed by soap, and the colour lasts for three or four weeks before there is occasion to renew it. The custom is so ancient in Egypt that I have seen the nails of the mummies dyed in this manner." Sonnini (*Voyage*, i. 297) says that the women are fond of decorating themselves with the flowers of the henna-plant; that they take them in their hand and perfume their bosoms with them. Compare with this Cant. i. 13: see also Mariti (*Trav.* i. 29); Prosper Alpinus (*de Plant. Aegyp.* c. 13); Pliny (*H. N.* xii. 24), who says that a good kind grows near Ascalon; Oedmann (*Verm. Sam.* i. c. 7, and vi. 102), who satisfactorily answers Michaelis's conjecture (*Supp. ad Lex. Heb.* ii. 1205) that "palm-flowers" or "dates" are intended; Rosenmüller (*Bib. Bot.* p. 133) and Wilkinson (*Anc. Egypt.* ii. 345 [1878]).

Some have supposed that the expression rendered by the A. V. and R. V. "pare her nails"[b] (Deut. xxi. 12) has reference to the custom of staining them with henna-dye; but it is very improbable that there is any such allusion, for the captive woman was ordered to shave her head, a mark of mourning: such a meaning therefore as the one proposed is quite out of place (see Rosenmüller, *Schol. ad* Deut. xxi. 12; *Speaker's Comm.*; Dillmann[2] in loco). Not

[a] Perhaps from כָּפַר, *oblevit*: "Quia mulieres in oriente ungues *oblinunt*" (Simon. *Lex.* s. v.). Cf. Arabic كَفَر, *pix*, and the Syriac ܟܦܪ. The Greek κύπρος is the same word as the Hebrew.

[b] וְעָשְׂתָה אֶת־צִפָּרְנֶיהָ; lit. "and she shall do her nails." Onkelos and Saadias understand the expression to denote "letting her nails grow," as a sign of grief. The Hebrew "*do* her nails," however, must surely express more than "letting them alone."

only the nails of the hands and the feet, but the hair and beard, were also dyed with henna, and even sometimes the manes and tails of horses and asses were similarly treated.

The *Lawsonia alba*, or henna-plant, grows in Egypt, Arabia, and Northern India. In Palestine it is found only in the tropical nooks by the Dead Sea, at Engedi on the west side, in the Safieh, and at Zara, near the mouth of the Callirrhoë on the eastern shore. It is probable that the tree was introduced and cultivated in these the only spots where it could flourish, and that the few existing shrubs are a lingering survival from ancient times. The existence of the camphire plant at Engedi is an interesting illustration of reference in Canticles. The flowers are white and grow in clusters and are very fragrant. The whole shrub is from four to six feet high. The fullest description is that given by Sonnini. The *Lawsonia alba*, the only known species, belongs to the natural order *Lythraceae*. [W. H.] [H. B. T.]

CA'NA OF GALILEE, once CANA IN GALILEE (Κανᾶ τῆς Γαλιλαίας; Syriac-Pesh. *Katna*, ܩܢܐ, *Cana Galilaeae*), a village or town memorable as the scene of Christ's first miracle (John ii. 1, 11; iv. 46), as well as of a subsequent one (iv. 46, 54), and also as the native place of the Apostle Nathanael (xxi. 2). The four passages quoted—all, it will be observed, from St. John—are the only ones in which the name occurs. No one of them affords any clue to the situation of Cana. All we can gather is, that it was not far from Capernaum (John ii. 12; iv. 46), and also on higher ground, since our Lord went down (κατέβη) from the one to the other (ii. 12).

A difference of opinion appears to have arisen at a very early period with regard to the site of Cana of Galilee; sometimes it has been placed at *Kefr Kenna*, sometimes at *Kâna el-Jelîl*, or *Kh. Kâna*. The former, which is the site according to modern tradition, is a small village pleasantly situated on the side of a hill, not quite 3½ miles N.E. of Nazareth. It contains a church in which some stone troughs and large earthenware jars are shown as the "waterpots" of the miracle; and there is a fine spring from which the water for the miracle was

Cana of Galilee. (Laborde.)

brought (Mislin, iii. 443–6; *PEF. Mem.* i. 363; Guérin, *Galilée*, i. 168–182). Antoninus (570 A.D.) found two jars; Willibald (721 A.D.) only one.

In the time of the Crusades the six jars were brought to France, where one of them is said still to exist in the Musée d'Angers (see M. Didron's Essays in the *Annales Archéologiques*, xi. 5; xiii. 2). Another is exhibited amongst the famous relics in the Church of St. Miguel at Oviedo (Ford, *Hbk. of Spain*, p. 388). The couch (of the Lord) mentioned by Antoninus (iv.) appears to have been recently found in the ruins of a church on the site of Elateia in Phocis (*Bull. de Corresp. Hellénique*, 1885, pp. 28–42).

The rival site, *Kh. Kâna*, is on a spur of *Jebel Kâna*, which forms part of the range of hills north of the large plain of *el-Buttauf*; it is at the mouth of *W. Jefat*, not far from the site of Jotapata, and about 8 miles N. of Nazareth. The ruins, part ancient, part Arab, cover a small *mamelon* and run some distance up the hill-side; there are many rock-hewn tombs and cisterns, and a small pool; but no spring (Guérin, *Galilée*, i. 474–6; Wilson, *MS. Notes*). The village still bears the name of *Kâna el-Jelîl* (قنا الجليل), a name which is in every respect the exact representative of the Hebrew original—as *Kenna*, كفر كنّا, is widely different from it—and it is in this fact that the chief strength of the argument in favour of the northern Cana seems to reside. The notices of Josephus do not assist us in fixing the site: the Cana of *Vit.* 16 is probably *Kâna el-Jelîl* on the edge of the great plain of *Asochis* (cp. *Vit.* 40) and near Jotapata, but there is nothing to connect it or the Canas of *Vit.* 70, *Ant.* xiii. 15, § 1, and *B. J.* i. 17, § 5, with

the scene of the miracle. Eusebius (*OS.*² p. 271, 50), who is followed by Jerome (*OS.*² p. 144, 3), identifies the Cana of the N. T. with the Kanah of Asher; and from this we may perhaps infer that, in his day, no tradition was attached to the rival sites: if he refers to either, it must be to *Kâna el-Jelîl*, as *Kefr Kenna* could not have been in Asher, and would probably have been described as near Nazareth or Diocaesarea. Cana was visited by St. Paula (xvii.), but its position is not indicated; Theodosius (530 A.D.) makes it 5 miles from Diocaesarea, the exact distance of *Kâna el-Jelîl* from *Seffûrieh*; whilst Antoninus Martyr (*Itin.* 4) says that it was 3 miles from Diocaesarea, and that he bathed in a fountain there, thus clearly placing it at *Kefr Kenna*. Willibald went from Nazareth to Cana, where he spent one day, and thence to Tabor; he indicates neither place nor position, and his words would apply as well to one site as to the other. Of the mediaeval writers, Saewulf, Brocardus, Fetellus, Marinus Sanutus, Breydenbach, Anselm and Adrichomius, place Cana at *Kâna el-Jelîl*; Phocas and John of Würzburg at *Kefr Kenna*. Quaresimus mentions both sites, but decides in favour of the latter, and this tradition was not disturbed until Dr. Robinson brought forward the claims of *Kâna el-Jelîl* (Rob. ii. 346–9; iii. 108, with the note on De Saulcy). Dr. Robinson is followed by Thompson, Ritter, Sepp, Socin, Renan, and Stanley; whilst Tristram, Guérin, De Saulcy, Porter, Hep. Dixon, and Conder are in favour of *Kefr Kenna*. A third possible site of Cana has been indicated by Conder (*PEF. Mem.* i. 288) in *'Ain Kânah*, on the road between *Reineh* and Tabor. The Gospel history is not affected by the different opinions as to the site. [G.] [W.]

CA'NAAN (כְּנַעַן [=C'naan; cp. the Greek name Χνᾶ, as mentioned below]; Χανάαν; Jos. Χανάανος; *Chanaan*). **1.** The fourth son of Ham (Gen. x. 6; 1 Ch. i. 8; cp. Jos. *Ant.* i. 6, § 4), the progenitor of the Phoenicians ("Zidon") and of the various nations who before the Israelite conquest peopled the sea-coast of Palestine, and generally the whole of the country westward of the Jordan (Gen. x. 15; 1 Ch. i. 13). [CANAAN, LAND OF; CANAANITES.] In the ancient narrative of Gen. ix. 20–27, a curse is pronounced on Canaan for the unfilial and irreverential conduct of Ham. In this curse Canaan is simply his father's representative. To the Hebrews the historical representative of Ham was Canaan (cp. Dillmann[5] in loco).

2. The name "Canaan" is sometimes employed for the country itself—more generally styled "the land of C." It is so in Zeph. ii. 5; and we also find "language of C." (Is. xix. 18), "wars of C." (Judg. iii. 1), "inhabitants of C." (Ex. xv. 15), "king of C." (Judg. iv. 2, 23, 24; v. 19), "daughters of C." (Gen. xxviii. 1, 6, 8; xxxvi. 2), "kingdoms of C." (Ps. cxxv. 11). In addition to the above the word occurs in several passages where it is concealed in the A. V. by being translated. These are: Is. xxiii. 8, "traffickers," and xxiii. 11, "the merchant city" (Gesenius, "Jehovah gab Befehl über Canaan"); Hos. xii. 7, "he is a merchant" (Ewald, "Kanáan halt trugerische Wage"); Zeph. i. 11, "merchant-people" (Ewald, "dass alle Canaaniter sind dahin")[a]. [G.] [W.]

CA'NAAN, THE LAND OF (אֶרֶץ כְּנַעַן, from a root כָּנַע, signifying "to be low:" see 2 Ch. xxviii. 19 and Job xl. 12, amongst other passages in which the verb is used), a name denoting the country west of the Jordan and Dead Sea, and between those waters and the Mediterranean; specially opposed to the "land of Gilead,"—that is, the high table-land on the east of the Jordan. Thus: "Our little ones and our wives shall be here in the cities of Gilead. . . . but we will pass over armed into the land of Canaan" (Num. xxxii. 26–32; see xxxiii. 51): "Phinehas . . . returned from the children of Reuben and from the children of Gad, out of the land of Gilead, unto the land of Canaan, to the children of Israel" (Josh. xxii. 32, R. V.: see also Gen. xii. 5, xxiii. 2, 19, xxxi. 18, xxxiii. 18, xxxv. 6, xxxvii. 1, xlviii. 3, 7, xlix. 30; Num. xiii. 2, 17, xxxiii. 40, 51; Josh. xiv. 1, xxi. 2; Judg. xxi. 12). True, the district to which the name of "low land" is thus applied contained many very elevated spots:—Shechem (Gen. xxxiii. 18), Hebron (xxiii. 19), Bethel (xxxv. 6), Bethlehem (xlviii. 7), Shiloh (Josh. xxi. 2; Judg. xxi. 12), which are all stated to be in the "land of Canaan." But high as the level of much of the country west of the Jordan undoubtedly is, there are several things which must always have prevented, as they still prevent, it from leaving an impression of elevation. These are: (1) that remarkable, wide, maritime plain over which the eye ranges for miles from the central hills,—a feature of the country which cannot be overlooked by the most casual observer, and which impresses itself most indelibly on the recollection; (2) the still deeper and still more remarkable and impressive hollow of the Jordan valley, a view into which may be commanded from almost any of the heights of Central Palestine; (3) the almost constant presence of the long high line of the mountains east of the Jordan, which from their distance have the effect more of an enormous cliff than of a mountain range—looking down on the more broken and isolated hills of Canaan; and (4) the "highland" of Lebanon, and Antilebanon, with the snow-clad peak of Hermon, furnishing a constant standard of height before which everything is dwarfed. [See Dillmann[5] and Delitzsch (1887) on Gen. x. 6.—S. R. D.]

The word "Canaanite" was used in the O. T. in two senses, a broader and a narrower, which will be most conveniently examined under that head; but this does not appear to be the case with "Canaan," at least in the older cases of its occurrence. It is only in later notices, such as Is. xxiii. 11 (A. V. "the merchant city;" R. V. "Canaan"), Zeph. ii. 5, and Matt. xv. 22, that we find it applied to the low maritime plains of Philistia and Phoenicia (cp. Mark vii. 26). In the same manner it was by the Greeks that the name Χνᾶ, *C'na*, was used for Phoenicia, *i.e.* the sea-side plain north of the "Tyrian ladder" (see the extract in Reland, p. 7, and Gesenius, *Thes.* p. 696), and by the

[a] The R. V. has "Canaan" in Is. xxiii. 11 and Zeph. i. 11; and "traffickers" in Is. xxiii. 8 and Hos. xii. 7.

later Phoenicians both of Phoenicia proper and of the Punic colonies in Africa (see the coin of Laodicea ad Lib. and the testimony of Augustine, both quoted by Gesenius, *l. c.*). The LXX. translators had learnt to apply this meaning to the word, and in two cases they render the Hebrew words given above by *χώρα τῶν Φοινίκων* (Ex. xvi. 35; Josh. v. 12, cp. v. 1), as they do "Canaanites" by *Φοινίκες*.

It is indeed possible that Canaan was the native name of Phoenicia, and that it was afterwards extended to denote the whole of Palestine, which was inhabited by a kindred population (cp. De Goeje, referred to by Cheyne in *Encycl. Brit.*[9] s. n. "Canaan"). Sidon, the oldest Phoenician city, was the name of the first-born of Canaan (Gen. x. 15), and in Is. xxiii. 11 the word Canaan is used in its primitive sense.

The name Canaan does not appear to have been known to the Assyrians, who called the whole country *mat-martu* or *mat-aḫarri*, the "west-land"; but it occurs in the Egyptian inscriptions as Kanana. [G.] [W.]

CANAAN, LANGUAGE OF, Is. xix. 8; *i.e.* Hebrew.

CA'NAANITE, THE (Rec. T. *ὁ Καναίτης*, A. *Κανανείτης*; Lachm. with B C, *ὁ Κανανᾶιος*, D. in Matt. *Χαναναῖος*; *Chananeus*; R. V. *the Cananaean*; R. V. marg. *the zealot*), the designation of the Apostle SIMON, otherwise known as "Simon Zelotes." It occurs in Matt. x. 4; Mark iii. 18.

The word does not signify a descendant of Canaan, that being in the Greek both of the LXX. and the N. T. *Χαναναῖος* = כְּנַעֲנִי (cp. Matt. xv. 22 with Mark vii. 26). Nor does it signify, as has been suggested, a native of Kana, since that would probably be *Καναίτης*. But it comes from a Chaldee or Syriac word, קַנָּאָן, *Kanneân*, or ܩܢܢܝܐ, *Kenânâyâh*, by which the Jewish sect or faction of "the Zealots"—so prominent in the last days of Jerusalem—was designated (see Buxtorf, *Lex.* s. v.). This Syriac word is the reading of the Peshitto Version. The Greek equivalent of *Kanneân* is *Ζηλωτής*, *Zelotes*, and this St. Luke (vi. 15; Acts i. 13) has correctly preserved. St. Matthew and St. Mark, on the other hand, have literally transferred the Syriac word, as the LXX. translators did frequently before them. There is no necessity to suppose, as Dean Cureton did (*Nitrian Rec.* lxxxvii.), that they mistook the word for ܟܢܥܢܝ = *Χαναναῖος*, a Canaanite or descendant of Canaan. The Evangelists could hardly commit such an error, whatever subsequent transcribers of their works may have done. But that this meaning was afterwards attached to the word is plain from the readings of the Codex Bezae (D) and the Vulgate, as given above, and from the notice quoted from Coteler in the note to Winer's article (*RWB.* p. 463). The spelling of the A. V. has doubtless led many to the same conclusion; and it has wisely been altered in R. V. to "Cananaean." [G.] [W.]

CA'NAANITES, THE (הַכְּנַעֲנִי, *i.e.* accurately according to Hebrew usage—Gesen. *Heb. Gram.* § 107—"the Canaanite;" but in the A. V. with few exceptions rendered as plural, and therefore indistinguishable from כְּנַעֲנִים, which also, but very frequently, occurs: *Χαναναῖος*, *Φοίνιξ*,[a] Ex. vi. 15, cp. Josh. v. 1; *Chananeus*), a word used in two senses:—1, a tribe which inhabited a particular locality of the land west of the Jordan before the conquest (see reff. in Riehm, *HWB.* s. n. "Canaaniter"); and 2, in a wider sense, the people who inhabited generally the whole of that country.

1. The tribe of "the Canaanites" only—the dwellers in the lowland. The whole of the country west of Jordan was a "lowland" as compared with the loftier and more extended tracts on the north and east; but there was a part of this western country which was still more emphatically a "lowland." *a.* These were the plains lying between the shore of the Mediterranean and the foot of the hills of Benjamin, Judah, and Ephraim—the plain of Philistia on the south—that of Sharon between Jaffa and Carmel—the great plain of Esdraelon in the rear of the bay of Akka; and lastly, the plain of Phoenicia, containing Tyre, Sidon, and all the other cities of that nation. *b.* But separated entirely from these was the still lower region of the Jordan Valley or Arabah, the modern *Ghôr*, a region which extended in length from the sea of Cinneroth (Gennesareth) to the south of the Dead Sea about 120 miles, with a width of from 8 to 14. The climate of these sunken regions—especially of the valley of the Jordan—is so peculiar that it is natural to find them the special possession of one tribe. "Amalek"—so runs one of the earliest and most precise statements in the ancient records of Scripture—"Amalek dwelleth in the land of the South; and the Hittite, and the Jebusite, and the Amorite, dwell in the mountains: and the Canaanite dwelleth by the sea, and along by the side of Jordan" (Num. xiii. 29, R. V.). This describes the division of the country a few years only before the conquest. But there had been little or no variation for centuries. In the notice which purports to be the earliest of all, the seats of the Canaanite tribe—as distinguished from the sister tribes of Zidon, the Hittites, Amorites, and the other descendants of Canaan—are given as on the sea-shore from Zidon to Gaza, and in the Jordan valley to Sodom, Gomorrah, and Lasha (afterwards Callirhoë), on the shore of the present Dead Sea (Gen. x. 18–20). In Josh. xi. 3—at a time when the Israelites were actually in the western country—this is expressed more broadly. "The Canaanite on the east and the west" is carefully distinguished from the Amorite who held "the mountain" in the centre of the country. In Josh. xiii. 2, 3, we are told with more detail that "all the 'circles' (גְּלִילוֹת) of the Philistines . . . from Sihor (the *Wady el-'Arish*) unto Ekron northward, is counted to the Canaanite." Later still, the Canaanites are still dwelling in the upper part of the Jordan Valley—Bethshean; in the plain of Esdraelon—Taanach, Ibleam, and Megiddo; in the plain of Sharon—Dor; and also in the plain of Phoenicia—Accho and Zidon. Here were collected the chariots which formed a prominent part of their armies

[a] Eupolemus (Euseb. *Pr. Ev.* ix. 17) calls the people of Sodom, &c., Phoenicians, and in Deut. iii. 9 the LXX. have *Φοίνικες* for Zidonians.

(Judg. i. 19, iv. 3; Josh. xvii. 16), and which could indeed be driven nowhere but in these level lowlands (Stanley, *S. & P.* p. 134).

The plains which thus appear to have been in possession of the Canaanites especially so called, were not only of great extent, but they were also the richest and most important parts of the country; and it is not unlikely that this was one of the reasons for the name of "Canaanite" being

2. Applied as a general name for the non-Israelite inhabitants of the land, as we have already seen was the case with "Canaan."

Instances of this are, Gen. xii. 6; Num. xxi. 3—where the name is applied to dwellers in the south, who in xiii. 29 are called Amalekites; Judg. i. 10—with which cp. Gen. xiv. 13 and xiii. 18, and Josh. x. 5, where Hebron, the highest land in Palestine, is stated to be Amorite; and Gen. xiii. 12, where the "land of Canaan" is distinguished from the Jordan valley itself. See also Gen. xxiv. 3, 37, cp. xxviii. 2, 6; Ex. xiii. 11, cp. *v.* 5. But in many of its occurrences it is difficult to know in which category to place the word. Thus in Gen. l. 11: if the floor of Atad was at Beth-hogla, close to the west side of the Jordan, "the Canaanites" must be intended in the narrower and stricter sense; but the expression "inhabitants of the land" appears as if intended to be more general. Again, in Gen. x. 18, 19, where the present writer believes the tribe to be intended, Gesenius and most moderns take it to apply to the whole of the Canaanite nations. But in these and other similar instances, allowance must surely be made for the different dates at which the various records thus compared were composed. And besides this, it is difficult to imagine what accurate knowledge the Israelites can have possessed of a set of petty nations, from whom they had been entirely removed for four hundred years, and with whom they were now again brought into contact only that they might exterminate them as soon as possible. And before we can solve such questions we also ought to know more than we do of the usages and circumstances of people who differed not only from ourselves, but also possibly in a material degree from the Orientals of the present day. The tribe who possessed the ancient city of Hebron, besides being, as shown above, called interchangeably Canaanites and Amorites, are in a third passage (Gen. xxiii.) called the children of Heth or Hittites (cp. also xxvii. 46 with xxviii. 1, 6). The Canaanites who were dwelling in the land of the south when the Israelites made their attack on it may have been driven to these higher and more barren grounds by some other tribes, possibly by the Philistines who displaced the Avvites, also dwellers in the low country (Deut. ii. 23).

The Canaanites were a settled people in an advanced stage of civilisation. They possessed fortresses with lofty walls, horses trained to war, chariots of iron, treasures of gold and silver, and great agricultural and pastoral wealth. Amongst the spoil taken by Thothmes III. after the battle of Megiddo were an ark of gold, a statue of silver, gold rings, cups, and vases, tables and seats of ivory and cedar inlaid with gold, chariots plated with gold and silver, bronze armour, incense, wine, honey, corn, horses, cattle, goats, &c. (*Records of the Past*, ii. 42–58). If they were, as most moderns think (cp. Kautzsch in Riehm's *HWB.*; Cheyne, *Encycl. Brit.*[9] s. n.; Pietschmann, *Gesch. d. Phönizier*, p. 98, &c.), Phoenicians, they were given to commerce; and thus the name became in later times an occasional synonym for a merchant (Job xli. 6; Prov. xxxi. 24; cp. Is. xxiii. 8, 11; Hos. xii. 7; Zeph. i. 11. See Kenrick, *Phoen.* p. 232).

Of the language of the Canaanites little can be said.[b] On the one hand, being—if the genealogy of Gen. x. be right—Hamites, there must have developed in the course of time a severance between their language and that of the Israelites who were descendants of Shem. On the other hand is the fact that Abram and Jacob shortly after their entrance to the country seem able to hold converse with them, and also that the names of Canaanite persons and places which we possess are Hebrew. Such are Melchizedek, Hamor, Shechem, Sisera . . . Ephrath, and also a great number of the names of places. But we know that the Egyptian and Assyrian names have been materially altered in their adoption into Hebrew records, either by translation into Hebrew equivalents, or from the impossibility of accurately rendering the sounds of one language by those of another. The modern Arabs have adopted the Hebrew names of places as nearly as would admit of their having a meaning in Arabic, though that meaning may be widely different from that of the Hebrew name. Examples of this are *Beit 'Ûr*, *Beit Lahm*, *Bir es-Seba'*, which mean respectively, "house of the eye," "house of flesh," "well of the lion," while the Hebrew names which these have superseded meant "house of caves," "house of bread," "well of the oath." May not a similar process have taken place when the Hebrews took possession of the Canaanite towns, and "called the lands after their own names"? (For an examination of this interesting but obscure subject, see Gesenius, *Hebr. Spr.* 223–25.)

The "Nethinim," or servants of the Temple [hieroduli; see *Babylonian Record*, ii. 67], seem to have originated in the dedication of captives taken in war from the petty states surrounding the Israelites. [NETHINIM.] If this was the case, and if they were maintained in number from similar sources, there must be many non-Israelite names in the lists of their families which we possess in Ezra ii. 43–54; Neh. vii. 46–56. Several of the names in these catalogues—such as Sisera, Mehunim, Nephushim—are the same as those which we know to be foreign, and doubtless others would be found on examination.

This is perhaps the proper place for noticing the various shapes under which the formula for designating the nations to be expelled by the Israelites is given in the various Books.

1. Six nations: the Canaanites, Hittites, Amorites, Perizzites, Hivites, and Jebusites. This is the usual form, and, with some variation in the order of the names, it is found in Ex. iii. 8, 17, xxiii. 23, xxxiii. 2, xxxiv. 11; Deut. xx. 17; Josh. ix. 1, xii. 8; Judg. iii. 5. In Ex. xiii. 5,

[b] See reff. in MV.[10] p. xxii.; Socin in *Encyclop. Brit.*[9] s. n. "Phoenicia;" Pietschmann, *Gesch. d. Phönizier*, p. 97, n. 2.

the same names are given with the omission of the Perizzites.

2. With the addition of the Girgashites: making up the mystic number *seven* (Deut. vii. 1; Josh. iii. 10, xxiv. 11). The Girgashites are retained and the Hivites omitted in Neh. ix. 8 (cp. Ezra ix. 1).

3. In Ex. xxiii. 28 we find the Canaanite, the Hittite, and the Hivite.

4. The list of ten nations in Gen. xv. 19–21 includes some on the east of Jordan, and probably some on the south of Palestine.

5. In 1 K. ix. 20 the Canaanites are omitted from the list. [G.] [W.]

[On these lists cp. Budde, *Die Bibl. Urgeschichte*, p. 344 sq.—S. R. D.]

CANDA'CE (Κανδάκη; *Candace*. Kanta-ki is the true spelling according to Brugsch, *Hist. of Egypt*, ii. 282), queen of the Ethiopians (Acts viii. 27). The name is common to a series of queens ("quod nomen multis iam annis ad reginas transiit:" Plin. *H. N.* vi. 35). An earlier Candace attacked Upper Egypt, B.C. 22, and was repulsed by C. Petronius with a small Roman force, who took her palace (βασιλεῖον) at Napata (Gebel Barkal). The capital of the kingdom of the Candaces, however, appears at this time to have been Meroe, lying further to the south (Plin. *H. N.* l. c.). This name (Meroe) has caused some confusion. The early designation of Ethiopia proper was Meroe (Miluhhi in the Assyrian Inscriptions. See Rawlinson, *Ancient Egypt*, xxv.). But this name seems to have been applied at different times to (1) Napata (modern Merawi, under Gebel Barkal), its original capital; (2) the whole land between the Atbara and the Blue Nile, known as the island of Meroe; (3) the town of Meroe, situated in the so-called island of the same name, some distance above the confluence of the Atbara. This site, near Assur, was first identified by Cailliaud (see his *Voyage à Méroé*, c. xxx., and plates of the Pyramids. See also Duncker's *Hist. Antiq.* ch. i. note).

Strabo describes the Candace of his time as a masculine woman who had lost an eye. There were also kings of Ethiopia, but they were cloistered and deified like former Mikados of Japan. Compare the kings of the Sabaeans described by Agatharchides (Müller, *Geog. Gr.* i. 189). Strabo seems to imply that the regal power was exercised by the queens (Strab. xvii. i. 54). Eusebius (*H. E.* ii. 1) says that the government of Ethiopia by queens continued to his time. Bion of Soli, in his *Ethiopica*, says, "The Ethiopians do not make known (ἐκφαίνουσι) the fathers of their kings, but keep a tradition (παραδιδόασι) that they are sons of the Sun, and the mother of each king they call Candace" (Müller, *Fragm. Hist. Graec.* iv. p. 351). This testimony to succession in the female line agrees with a vast mass of evidence, ancient and modern, as to that and the adjacent parts of Africa from the Nile to the Red Sea. For the custom in Arabia, see W. R. Smith's *Kinship and Marriage in Early Arabia*. [E. R. B.]

CANDLESTICK (מְנוֹרָה; λυχνία τοῦ φωτός, 1 Macc. i. 21; ὁ ἀθάνατος—λεγόμενος λύχνος καὶ καιόμενος ἀδιαλείπτως ἐν τῷ ναῷ, Diod. Sic. *ap.* Schleusn. *Thes. s. v.*), which Moses was commanded to make for the Tabernacle, is described in Ex. xxv. 31–37, xxxvii. 17–24. It is called in Lev. xxiv. 4, "the pure," and in Ecclus. xxvi. 19, "the holy candlestick." With its various appurtenances (mentioned below) it required a talent of "pure gold," and it was not *moulded*, but "of beaten work" (τορευτή). Josephus, however, says (*Ant.* iii. 6, § 7) that it was of *cast* gold (κεχωνευμένη), and hollow. From its golden base (יָרֵךְ, βάσις, Joseph.), which, according to the Jews, was three feet high (Winer, *Leuchter*), sprang a main shaft or reed (קָנֶה); "and spread itself into as many branches as there are planets, including the sun. It terminated in seven heads all in one row, all standing parallel to one another, one by one, in imitation of the number of the planets" (Whiston's *Joseph.* ubi supra). As the description given in Ex. is not very clear, we abbreviate Lightfoot's explanation of it:—"The foot of it was gold, from which went up a shaft straight, which was the middle light. Near the foot was a golden dish wrought almondwise; and a little above that a golden knop, and above that a golden flower. Then two branches, one on each side, bowed, and coming up as high as the middle shaft. On each of them were three golden cups placed almondwise on sharp, scollop-shell fashion; above which was a golden knop, a golden flower, and the socket. Above the branches on the middle shaft was a golden boss, above which rose two shafts more; above the coming out of these was another boss, and two more shafts, and then on the shaft upwards were three golden scollop-cups, a knop, and a flower: so that the heads of the branches stood on equal height" (*Works*, ii. 399, ed. Pitman). Calmet remarks that "the number seven might remind them of the sabbath:" we have seen that Josephus gives it a somewhat Egyptian reference to the number of the planets, but elsewhere (*B. J.* vii. 5, § 5) he assigns to the seven branches a merely general reference, as τῆς παρὰ τοῖς Ἰουδαίοις ἑβδομάδος τὴν τιμὴν ἐμφανίζοντες. The whole weight of the candlestick was 100 minae; its height was, according to the Rabbis, 5 feet, and the breadth or distance between the exterior branches 3½ feet (Jahn, *Arch. Bibl.* § 329; cp. Hamburger, *RE.* s. v. "Leuchter"). It has been calculated to have been worth 5076*l.* exclusive of workmanship.

According to Josephus, the ornaments on the shaft and branches were seventy in number, and this was a notion in which the Jews with their peculiar reverence for that number would readily coincide; but it seems difficult from the description in Exodus to confirm the statement. On the main shaft (called "the candlestick," in Ex. xxv. 34) there are said to be "four cups made like almond blossoms, the knops thereof and the flowers thereof," which would make twelve of these ornaments in all; and as on each of the six branches there were (see R. V. of *v.* 33) three bowls, three knops, and three flowers, the entire number of such figures on the candlestick would be sixty-six. The word translated "bowl" in the A. V., "cup" in the R. V., is גָּבִיעַ, κρατήρ, for which Josephus (*l. c.*) has κρατηρίδια καὶ ῥοίσκοι. It is said to have been almond-shaped (מְשֻׁקָּד, ἐκτετυπωμένοι καρυίσκοις), by which the blossom of the almond is probably intended. The word כַּפְתּוֹר is variously rendered "knop"

(A. V. and R. V.), "pommel" (Geddes), *σφαιρωτήρ* (LXX.), *spherula* (Vulg.), "apple" (Arabic and other Versions); and to this some apply the *βολσκοι*, and not (as is more natural) the *σφαίρια* of Josephus. The third term is פֶּרַח, "a bud," *κρίνα* (LXX. and Joseph.), which from an old gloss seems to be put for any *ἄνθος εὐωδιάζον, κρίνοις ὅμοιον*. From the fact that it was expressly made "after the pattern shown in the mount," many have endeavoured to find a symbolical meaning in these ornaments, especially Meyer and Bähr (*Symbol.* i. 416 sq.). Generally it was "a type of preaching" (Godwyn's *Moses and Aaron*, ii. 1) or of "the light of the law" (Lightfoot, *l. c.*; Hamburger). Similarly candlesticks are made types of the Spirit, of the Church, of witnesses, &c. (cp. Zech. iv.; Rev. ii. 5, xi. 4, &c.; Wemyss, *Clav. Symbol.* s. v.)

The candlestick was placed on the south side [symbolical of the light or sunny region of heaven; cp. דָּרוֹם] of the first apartment of the Tabernacle, opposite the table of shewbread, which it was intended to illumine, in an oblique position (*γοξῶς*), so that the lamps looked to the east and south (Jos. *Ant.* ii. 6, § 7; Ex. xxv. 37); hence the central was called "the western" lamp, according to some, though others render it "the evening lamp," and say that *it* alone burned perpetually (Ex. xxvii. 20, 21), the others not being lit during the day, although the Holy Place was dark (Ex. xxx. 8; 1 Macc. iv. 50). In 1 Sam. iii. 2 we have the expression "ere the lamp of God went out in the temple of the Lord;" and this, taken in connexion with 1 Ch. xiii. 11 and Lev. xxiv. 2, 3, would seem to imply that "always" and "continually" merely mean *tempore constituto*, i.e. by night; especially as Aaron is said to have dressed the lamps every morning and lighted them every evening. Rabbi Kimchi (in loco) says that the other lamps often went out at night, but "they always found the *western* lamp burning." They were each supplied with cotton, and half a log of the purest olive-oil (about two wine-glasses), which was sufficient to keep them burning during a long night (Winer).

The priest in the morning trimmed the lamps with golden snuffers (מַלְקָחַיִם; *ἐπαρυστῆρες*; *forcipes*; "tongs"), and carried away the snuff in golden dishes (מַחְתּוֹת; *ὑποθέματα*; *acerrae*, Ex. xxv. 38). When carried about, the candlestick was covered with "a cloth of blue," and put with its appendages in badger-skin bags, which were supported on a bar (Num. iv. 9).

In Solomon's Temple, instead of this candlestick (or besides it, as the Rabbis say, for what became of it we do not know), there were ten golden candlesticks similarly embossed, five on the right and five on the left (1 K. vii. 49; 2 Ch. iv 7). These are said to have formed a sort of railing before the vail, and to have been connected by golden chains, *under* which, on the Day of Atonement, the high-priest crept. They were taken to Babylon (Jer. lii. 19).

In the Temple of Zerubbabel there was again a single candlestick (1 Macc. i. 23, iv. 49). It was taken from the Herodian Temple by Titus, and carried in triumph immediately before the conqueror (Joseph. *B. J.* vii. 5, § 5). The description given of its *κίονι* and *λεπτοὶ καυλίσκοι* by Josephus, agrees only tolerably with the deeply interesting sculpture on the Arch of Titus; but he drops a hint that it was not

Candlestick. (From Arch of Titus.)

identical with the one used in the Temple, saying (possibly in allusion to the fantastic griffins, &c., sculptured on the pediment, which are so much worn that it is difficult to make them out), *τὸ ἔργον ἐξήλλακτο τῆς κατὰ τὴν ἡμετέραν χρῆσιν συνηθείας*: where see Whiston's note. Hence Jahn (*Hebr. Com.* § clix.) says that the candlestick carried in the triumph was "*somewhat different from the golden candlestick of the Temple.*" These questions are examined in Reland's treatise *De Spoliis Templi Hierosol. in Arcu Titiano conspicuis.* The *general* accuracy of the sculpture is undoubted (Prideaux, *Con.* i. 166).

After the triumph the candlestick was deposited in the temple of Peace, and according to one story fell into the Tiber from the Milvian bridge during the flight of Maxentius from Constantine, Oct. 28, 312 A.D.; but it probably was among the spoils transferred, at the end of 400 years, from Rome to Carthage by Genseric, A.D. 455 (Gibbon, iii. 291). It was recovered by Belisarius, once more carried in triumph to Constantinople, "and then respectfully deposited in the Christian church of Jerusalem" (Id. iv. 24), A.D. 533. It has never been heard of since.

When our Lord cried, "I am the Light of the World" (John viii. 12), the allusion was probably suggested by the two large golden chandeliers, lighted in the court of the women during the Feast of Tabernacles, which illuminated all Jerusalem (Wetstein, *ad loc.*), or perhaps to the lighting of this colossal candlestick, "the more remarkable in the profound darkness of an Oriental town" (Stanley, *S. & P.* p. 420). These lamps were, moreover, images of the pillar of light which had guided the people in the wilderness; and to this do the words of our Lord finally refer. "Light" was also one of the titles of the Messiah (cp. Isa. xlii. 6, xlix. 6; Luke i. 78, 79. See *Speaker's Comm.* on John viii. 12). [F. W. F.]

CANE. [CALAMUS.]

CANKERWORM (יֶלֶק; βροῦχος; *bruchus*). The Heb. term *yelek* signifies "the licker," that which licks up the grass of the field; and from its position in the Prophet Joel's description of the locust, it probably is not any particular species, but the larva or caterpillar stage, in which the locust is even more destructive than in its mature or winged state. After the winged locusts have passed on, the young larvae appear and consume all that has escaped the former. Then they in turn assume their wings, in the words of Nahum (iii. 16), "*The cankerworm throweth off* (*spoileth*, A. V. and R. V.) its scales and *fleeth away*." The term is translated by the A. V. *caterpiller* [R. V. "cankerworm"] in Ps. cv. 34, and Jer. li. 14, 27; *cankerworm* in Joel i. 4, ii. 25; Nah. iii. 15, 16. [LOCUST.] [H. B. T.]

CAN'NEH (כַּנֵּה, one Cod. כַּלְנֵה; Τ'. Χαναά, A. -αν; *Chene*), Ezek. xxvii. 23. [CALNEH.]

CANON OF SCRIPTURE, THE, may be generally described as "the collection of Books which forms the original and authoritative written rule of the faith and practice of the Christian Church." Starting from this definition, it will be the object of the present article to examine shortly: I. The original meaning of the term; II. The Jewish Canon of the Old Testament Scriptures as to (α) its formation, and (β) contents; III. The Christian Canon of the Old; and IV. of the New Testament.

I. *The use of the word Canon.*—The word Canon (Κανών, akin to קָנֶה [cp. Gesen. *Thes.* s. v.], κάνη, κάννα, *cana* [*canalis*, *channel*], *cane*, *cannon*) in classical Greek is (1) properly a *straight rod*, as the rod of a shield, or that used in weaving (*liciatorium*), or a carpenter's rule. (2) The last usage offers an easy transition to the metaphorical use of the word for a *testing rule* in ethics (cp. Arist. *Eth. Nic.* iii. 4, 5; v. 10, 7), or in art (the *Canon* of Polycletus; Luc. *de Salt.* p. 946 B.), or in language (the *Canons* of Grammar). The varied gift of tongues, according to the ancient interpretation of Acts ii. 7, was regarded as the "canon" or test which determined the direction of the labours of the several Apostles (Severian. *ap.* Cram. *Cat. in Act.* ii. 7, δίδοται ἑκάστῳ γλῶσσα καθάπερ κανών). Chronological tables were called κανόνες χρονικοί (Plut. *Sol.* 27), and the summary of a book was called κανών, as giving the "rule," as it were, of its composition. The Alexandrine grammarians applied the word in this sense to the great "classical" writers, who were styled "the rule" (ὁ Κανών), or the perfect model of style and language. (3) But in addition to these active meanings the word was also used passively for a measured space (at Olympia), and, in later times, for a fixed tax (Du Cange, s. v. *Canon*).

The ecclesiastical usage of the word offers a complete parallel to the classical. It occurs in the LXX. in its literal sense (Judith xiii. 6, and apparently also in the obscure rendering of Mic. vii. 4), and again as a translation of קָו in Aquila (Job xxxviii. 5 and Ps. xix. 5).[a] In the N. T. it is found in two places in St. Paul's Epistles (Gal. vi. 16; 2 Cor. x. 13–16), and in the second place the transition from an active to a passive sense is worthy of notice. In patristic writings the word is commonly used both as a rule in the widest sense, and especially in the phrases "the rule of the Church," "the rule of faith," "the rule of truth" (ὁ κανὼν τῆς ἐκκλησίας, ὁ κανὼν τῆς ἀληθείας, ὁ κανὼν τῆς πίστεως; and so also κανὼν ἐκκλησιαστικός, and ὁ κανὼν simply). This rule was regarded either as the abstract, ideal standard, embodied only in the life and action of the Church; or, again, as the concrete, definite creed, which set forth the facts from which that life sprang (*regula*: Tertull. *de Virg. vel.* 1). In the fourth century, when the practice of the Church was further systematised, the decisions of synods were styled "Canons," and the discipline by which ministers were bound was technically "the Rule," and those who were thus bound were styled *Canonici* ("Canons"). In the phrase "the canon (*i.e.* fixed part) of the mass," from which the popular sense of "canonize" is derived, the passive sense again prevailed.

As applied to Scripture the derivatives of κανὼν are used long before the simple word. The Latin translation of Origen speaks of *Scripturae Canonicae* (*de Princ.* iv. 33), *libri regulares* (*Comm. in Matt.* § 117), *canonizatae Scripturae* and *libri canonizati* (id. § 28). In another place the phrase *haberi in Canone* (*Prol. in Cant.* sub fine) occurs, but probably only as a translation of κανονίζεσθαι, which is used in this and cognate senses in Athanasius (*Ep. Fest.*), the Laodicene Canons (ἀκανόνιστα, *Can.* lix.), and later writers. This circumstance seems to show that the title "Canonical" was first given to writings in the sense of "admitted by the rule," and not as "*forming part of* and *giving* the rule." It is true that an ambiguity thus attaches to the word, which may mean only "publicly used in the Church;" but such an ambiguity may find many parallels, and usage tended to remove it.[b] The spirit of Christendom recognised the Books which truly expressed its essence; and in lapse of time, when that spirit was deadened by later overgrowths of superstition, the written "Rule" occupied the place and received the name of that vital "Rule" by which it was first stamped with authority (ὁ κανὼν τῆς ἀληθείας αἱ θεῖαι γραφαί, Isid. Pelus. *Ep.* cxiv.; cp. Aug. *de doctr. Chr.* ii. 12 [viii.]; and as a contrast *Anon.* ap. Euseb. *H. E.* v. 28, 13).

[a] The metaphorical sense appears in 4 Maccabees, a late work of Alexandrian origin (vii. 21, ὁ τῆς φιλοσοφίας κανών). An instance of this usage appears also in Josephus (*Antiq. Jud.* x. 49).

[b] Credner accepts the popular interpretation, as if canonical were equivalent to "having the force of law," and supposes that *scripturae legis*, a phrase occurring in the time of the persecution of Diocletian, represents γραφαὶ κανόνος, which however does not, so far as I know, occur anywhere (*Zur Gesch. d. Kan.* p. 67). The terms *canonical* and *canonize* are probably of Alexandrine origin; but there is not the slightest evidence for connecting the "canon" of classical authors with the "canon" of Scripture, notwithstanding the tempting analogy. If it could be shown that ὁ κανὼν was used at an early period for the *list* of sacred Books, then it would be the simplest interpretation to take κανονίζεσθαι in the sense of "being entered on the list." [On the meaning of κανών, cp. F. C. Baur, *Die Bedeutung des Wortes* Κανών, in Hilgenfeld's *Zeitschr. f. wiss. Theol.* 1858, i. 141–150, and Westcott *On the Canon of the N. T.*, Appendix A.]

The first direct application of the term κανὼν to the Scriptures seems to be in the verses of Amphilochius (c. 380 A.D.), who concludes his well-known Catalogue of the Scriptures with the words οὗτος ἀψευδέστατος κανὼν ἂν εἴη τῶν θεοπνεύστων γραφῶν, where the word indicates the rule by which the contents of the Bible must be determined, and thus secondarily an index of the constituent Books. Among Latin writers the word is commonly found from the time of Jerome (*Prol. Gal. in libr. Reg.*: "Tobias et Judith *non sunt in Canone*") and Augustine (*de Civ.* xvii. 24: "perpauci ea scripserunt quae *auctoritatem Canonis* obtinerent;" id. xviii. 38, "*inveniuntur in Canone*"), and their usage of the word, which is wider than that of Greek writers, is the source of its modern acceptation.

The uncanonical books were described simply as "those without," or "those uncanonized" (ἀκανόνιστα, *Conc. Laod.* lix.). The Apocryphal books, which were supposed to occupy an intermediate position, were called "books read" (ἀναγιγνωσκόμενα, Athan. *Ep. Fest.*), or "ecclesiastical" (*ecclesiastici*, Rufin. *in Symb. Apost.* § 38), though the latter title was also applied to the canonical Scriptures (Leont. *l. c. infr.*). The canonical Books (Leont. *de Sect.* ii. τὰ κανονιζόμενα βιβλία) were also called "Books of the Testament" (ἐνδιάθηκα βιβλία), and Jerome styled the whole collection by the striking name of "the holy library" (*Bibliotheca sancta*), which happily expresses the unity and variety of the Bible (Credner, *Zur Gesch. d. Kan.* § 1; *Hist. of Canon of N. T.* App. D).

II. (*a*) *The formation of the Jewish Canon.*[c]—The history of the Jewish Canon in the earliest times is beset with the greatest difficulties. Before the period of the Exile only faint traces occur of the solemn preservation and use of sacred Books. According to the command of Moses, the "Book of the Law" was "put in (R. V. *by*) the side of the ark" (Deut. xxxi. 25 ff.), but not *in* it (1 K. viii. 9; cp. Joseph. *Ant.* iii. 1, § 7, v. 1, § 17); and thus in the reign of Josiah, Hilkiah is said to have "found the Book of the Law in the house of the Lord" (2 K. xxii. 8; cp. 2 Ch. xxxiv. 14). This "Book of the Law," which, in addition to the direct precepts (Ex. xxiv. 7), contained general exhortations (Deut. xxviii. 61) and historical narratives (Ex. xvii. 14), was further increased by the records of Joshua (*Josh.* xxiv. 26), and probably by other writings (1 Sam. x. 25), though it is impossible to determine their contents.[d] At a subsequent time collections of proverbs were made (Prov. xxv. 1), and the later Prophets (especially Jeremiah; cp. Kueper, *Jerem. Libror. ss. interp. et vindex*, Berol. 1837) were familiar with the writings of their predecessors, a circumstance which may naturally be connected with the training of "the prophetic schools." It perhaps marks a further step in the formation of the Canon when "the Book of the Lord" is mentioned by Isaiah as a general collection of sacred teaching (xxxiv. 16; cp. xxix. 18), at once familiar and authoritative; but it is unlikely that any definite collection either of "the Psalms" or of "the Prophets" existed before the Captivity. At that time Zechariah speaks of "the Law" and "the former Prophets" as in some measure co-ordinate (Zech. vii. 12); and Daniel refers to "*the Books*" (Dan. ix. 2, הַסְּפָרִים) in a manner which seems to mark the prophetic writings as already collected into a whole. Even after the Captivity the history of the Canon, like all Jewish history up to the date of the Maccabees, is wrapt in great obscurity. Faint traditions alone remain to interpret results which are found realised when the darkness is first cleared away. Popular belief assigned to Ezra and "the great synagogue" the task of collecting and promulgating the Scriptures as part of their work in organising the Jewish Church. Doubts have been thrown upon this belief (Rau, *De Synag. magnâ*, 1726; Kuenen, *Over de Mannen der Groote Synagoge*, Amst. 1876; Wellhausen-Bleek, *Einleitung in d. A. T.* § 246, 1886; cp. Ewald, *Hist. of Isr.* [Eng. tr.] v. pp. 168–170), and it is difficult to answer them, from the scantiness of the evidence which can be adduced; but the belief is in every way consistent with the history of Judaism and with the internal evidence of the Books themselves [see Wright (C. H. H.), *The Book of Koheleth*, Excursus iii. p. 475, "The Men of the great Synagogue"]. The later embellishments of the tradition, which represent Ezra as the second author of all the Books [2 ESDRAS], or define more exactly the nature of his work, can only be accepted as signs of the universal belief in his labours, and ought not to cast discredit upon the simple fact that the foundation of the present Canon is due to him. Nor can it be supposed that the work was completed at once; so that the account (2 Macc. ii. 13) which assigns a collection of Books to Nehemiah is in itself a confirmation of the general truth of the gradual formation of the Canon during the Persian period. The work of Nehemiah is not described as initiatory or final. The tradition omits all mention of the Law, which may be supposed to have assumed its final shape under Ezra, but says that Nehemiah "gathered together the [writings] concerning the kings and Prophets, and the [writings] of David, and letters of kings concerning offerings," while "founding a library" (καταβαλλόμενος βιβλιοθήκην ἐπισυνήγαγε τὰ περὶ τῶν βασιλέων καὶ προφητῶν καὶ τὰ τοῦ Δαυὶδ καὶ ἐπιστολὰς βασιλέων περὶ ἀναθεμάτων: 2 Macc. *l. c.*). The various classes of Books were thus completed in succession; and

[c] [So far as the history of the formation of the Jewish Canon is affected by the results of recent criticism upon the structure of the Books of the O. T., the reader will find the views of the more advanced school represented in Robertson Smith's *The O. T. in the Jewish Church*, Edinb. 1881; Wellhausen's *Hist. of Israel*, Edinb. 1886; Wellhausen-Bleek's *Einleitung in d. A. T.* Berl. 1886; Kuenen's *Hexateuch*, transl. Lond. 1886; Stade, *Gesch. d. V. Israels*, 1888. For a more moderate statement of the probable issue of the controversy, see Dillmann, *Hexateuch* (*Kurzgef. exeget. Hdb.*), Bd. iii. 591–690, Leipz. 1886; Baudissin, *Heutige Stand. d. A. Tlicher Wissensch.* Giessen, 1885; Delitzsch, *Genesis*, transl. Edinb. vol. i. Introd. 1888; Kittel, *Gesch. d. Israels*, Bd. i. Gotha, 1888; Driver, *Critical Study of O. T.* (*Cont. Rev.* Feb. 1890).]

[d] According to some (Fabric. *Cod. Pseudep. V. T.* i. 1113), this collection of sacred Books was preserved by Jeremiah at the destruction of the Temple (cp. 2 Macc. ii. 4 f.); according to others, it was consumed together with the ark (Epiph. *de Mens. et Pond.* cap. iv. p. 162). In 2 K. xxii. 8 sq., 2 Ch. xxxiv. 14 sq., mention is made only of *the Law*.

this view harmonises with what must have been the natural development of the Jewish faith after the Return. The constitution of the Church and the formation of the Canon were both from their nature gradually and mutually dependent. The construction of an ecclesiastical polity involved the practical determination of the divine rule of truth, though, as in the parallel case of the Christian Scriptures, open persecution first gave a clear and distinct expression to the implicit faith.

The persecution of Antiochus (B.C. 168) was for the Old Testament what the persecution of Diocletian was for the New, the final crisis which stamped the sacred writings with their peculiar character. The king sought out "the Books of the Law" (*τὰ βιβλία τοῦ νόμου*, 1 Macc. i. 56) and burnt them; and the possession of a "book of the covenant" (*βιβλίον διαθήκης*) was a capital crime (Joseph. *Ant.* xii. 5, § 4, *ἠφανίζετο εἴπου βίβλος εὑρεθείη ἱερὰ καὶ νόμος*). According to the common tradition, this proscription of "the Law" led to the public use of the writings of the Prophets; and without discussing the accuracy of this belief, it is evident that the general effect of such a persecution would be to direct the attention of the people more closely to the Books which they connected with the original foundation of their faith. And this was in fact the result of the great trial. After the Maccabaean persecution the history of the formation of the Canon is merged in the history of its contents.[e] The Bible appears from that time as a whole, though it was natural that the several parts were not yet placed on an equal footing, nor regarded universally and in every respect with equal reverence[f] (cp. Zunz, *D. Gottesd. Vortr. d. Jud.* pp. 14, 25, &c.).

But while the combined evidence of tradition and of the general course of Jewish history leads to the conclusion that the Canon in its present shape was formed gradually during a lengthened interval, beginning with Ezra and extending through the whole (Neh. xii. 11, 22) of the Persian period (B.C. 458–332) and even beyond it, when the cessation of the prophetic gift[g] pointed out the necessity and defined the limits of the collection, it is of the utmost importance to notice that the collection was peculiar in character and circumscribed in contents. All the evidence which can be obtained, though it is confessedly scanty, tends to show that it is false, both in theory and fact, to describe the O. T. as "all the relics of the Hebraeo-Chaldaic literature up to a certain epoch" (De Wette, *Einl.* § 8), if the phrase is intended to refer to the time when the Canon was completed. The epilogue of Ecclesiastes (xii. 11 sq.) speaks of an extensive literature, with which the teaching of Wisdom is contrasted, and "weariness of the flesh" is described as the result of the study bestowed upon it. It is impossible that these "many writings" can have perished in the interval between the composition of Ecclesiastes and the time of the conclusion of the Jewish Canon. The Apocrypha includes several fragments which must be referred to the Persian period, or to the yet later generation which saw the last writings added to the sacred collection (Buxtorf, *Tiberias*, 10 f.; Hottinger, *Thes. Phil.*; Hengstenberg, *Beiträge*, i.; Hävernick, *Einl.* i.; Oehler, art. *Kanon d. A. T.* in Herzog's *Encyklop.*).

(*β*) *The contents of the Jewish Canon.*—The first notice of the O. T. as consisting of distinct and definite parts occurs in the prologue to the Greek translation of the Wisdom of Sirach (Ecclesiasticus). The date of this is disputed [ECCLESIASTICUS; JESUS SON OF SIRACH]; but if we admit the later date (*c.* B.C. 131), it falls in with what has been said on the effect of the Antiochian persecution. After that event "the Law, the Prophecies, and the remainder of the Books" are mentioned as integral sections of a completed whole (*ὁ νόμος, καὶ αἱ προφητεῖαι, καὶ τὰ λοιπὰ τῶν βιβλίων*), and the phrase which designates the last class suggests no reason for supposing that that was still indefinite and open to additions. A like threefold classification is used for describing the entire O. T. in the Gospel of St. Luke (xxiv. 44, *ἐν τῷ νόμῳ Μωϋσέως καὶ προφήταις καὶ ψαλμοῖς*; cp. Acts xxviii. 23), and appears again in a passage of Philo, where the Therapeutae are said to find their true food in "laws and oracles uttered by prophets, and hymns and (*τὰ ἄλλα*) the other [books?] by which knowledge and piety are increased and perfected" (Philo, *de vita cont.* 3).[h] [BIBLE.]

The triple division of the O. T. is itself not a mere accidental or arbitrary arrangement, but a reflexion of the different stages of religious development through which the Jewish nation passed. The Law is the foundation of the whole revelation, the special discipline by which a chosen race was trained from a savage wilfulness to the accomplishment of its divine work. The Prophets portray the struggles of the same people when they came into closer connexion with the kingdoms of the world, and were led to look for the inward antitypes of the outward precepts. The Hagiographa carry the divine lesson yet further, and show its working in the various phases of individual life, and in relation to the great problems of thought and feeling, which present themselves by a necessary law in the later stages of civilisation (cp. Oehler, art. *Kanon*, in Herzog's *Encyklop.* p. 253; *Theol. of O. T.* vol. i. p. 17 [Clark, Edinb.]).

The general contents of these three classes still, however, remain to be determined. JOSEPHUS,

[e] The reference to the work of Judas Maccabaeus in 2 Macc. ii. 14, *ὡσαύτως δὲ καὶ Ἰούδας τὰ διαπεπτωκότα διὰ τὸν πόλεμον τὸν γεγονότα ἡμῖν ἐπισυνήγαγε πάντα καὶ ἔστι παρ' ἡμῖν*, appears from the connexion to refer in particular to his care with regard to the restitution of the copies of the sacred writings which were "lost" (*διαπεπτωκότα*). It is of importance to notice that the work was a *restoration*, and not a *new collection*.

[f] Yet the distinction between the three degrees of inspiration which were applied by Abarbanel (Keil, *Einl.* § 158, 6) to the three classes of writings is unknown to the early Rabbis.

[g] After Malachi, according to the Jewish tradition (Vitringa, *Obs. Sacr.* vi. 6; *ap.* Keil, *l.* c.).

[h] [The genuineness of this treatise, commonly known as "De vita contemplativa" (*περὶ βίου θεωρητικοῦ*), is much disputed. It is found among the writings ascribed to Philo, but recent criticism assigns it to the 3rd cent. A.D. The arguments are fully stated by Lucius (*Die Therapeuten und ihre Stellung in der Geschichte der Askese, eine kritische Untersuchung der Schrift "de vita contemplativa,"* Strassburg, 1879). Cp. Schürer, *Geschichte des Jüdischen Volkes,*[2] ii. 863.]

the earliest direct witness on the subject, enumerates twenty Books "which are justly believed to be divine" (*τὰ δικαίως θεῖα πεπιστευμένα*): five Books of Moses, thirteen of the Prophets, extending to the reign of Artaxerxes (i.e. *Esther*, according to Josephus),[i] and four which contain hymns and directions for life (Joseph. *c. Apion.* i. 8). Still there is some ambiguity in this enumeration, for in order to make up the numbers it is necessary either to rank Job among the Prophets, or to exclude one Book, and in that case probably Ecclesiastes, from the Hagiographa. The former alternative is the more probable, for it is worthy of special notice that Josephus regards primarily the historic character of the Prophets (*τὰ κατ' αὐτοὺς πραχθέντα συνέγραψαν*), a circumstance which explains his deviation from the common arrangement in regard to the later annals (1 and 2 Ch., Ezra, Neh.), and Daniel and Job, though he is silent as to the latter in his narrative (cp. Orig. *ap.* Euseb. *H. E.* vi. 25). The later history, he adds, has also been written in detail, but the records have not been esteemed worthy of the same credit, "because the accurate succession of the Prophets was not preserved in their case" (*διὰ τὸ μὴ γενέσθαι τὴν τῶν προφητῶν ἀκριβῆ διαδοχήν*). "But what faith we place in our own Scriptures (*γράμμασιν*) is seen in our conduct. They have suffered no addition, diminution, or change. From our infancy we learn to regard them as decrees of God (*Θεοῦ δόγματα*); we observe them, and if need be we gladly die for them" (*c. Apion.* i. 8; cp. Euseb. *H. E.* iii. 10).

In these words Josephus clearly expresses not his own private opinion, nor the opinion of his sect, the Pharisees, but the general opinion of his countrymen. The popular belief that the Sadducees received only the Books of Moses (Pseudo-Tertull. *Adversus omn. haer.* cap. 1, and in almost the same words Hieron. *Adv. Luciferianos*, c. 23 [Vallarsi, ii. 197], *in Matth.* xxii. 31 [Vallarsi, vii. 181]; Origen, *c. Cels.* i. 49, *in Matth.* tom. xvii. 35 [ed. Lommatzsch, iv. 166, 169]) rests on no sufficient authority; and if they had done so, Josephus could not have failed to notice the fact in his account of the different sects [SADDUCEES].[j] In the traditions of the Talmud, on the other hand, Gamaliel is represented as using passages from the Prophets and the Hagiographa in his controversies with them, and they reply with quotations from the same sources without scruple or objection (cp. Eichhorn, *Einl.* § 35; Lightfoot, *Horae Hebr. et Talm.* ii. 616; C. F. Schmid, *Enarr. Sent. Fl. Josephi de Libris V. T.* 1777; G. Güldenapfel, *Dissert. Josephi de Sadd. Can. Sent. exhibens*, 1804).

The casual quotations of Josephus agree with his express Canon. With the exception of Prov., Eccles., and Cant., which furnished no materials for his work, and Job, which, even if historical, offered no point of contact with other history, he uses all the other Books either as divinely inspired writings (5 Moses, Is., Jer., Ezek., Dan., xii. Proph.), or as authoritative sources of truth.

The writings of the N. T. completely confirm the testimony of Josephus. Coincidences of language show that the Apostles were familiar with several of the Apocryphal books (Bleek, *Ueber d. Stellung d. Apokr. u. s. w.* in *Stud. u. Krit.* 1853, pp. 267 ff.);[k] but they do not contain one authoritative or direct quotation from them, while, with the exception of Judges, Eccles., Cant., Esther, Ezra, and Nehemiah, every other Book in the Hebrew Canon is used either for illustration or proof.[l]

Several of the early Fathers describe the contents of the Hebrew Canon in terms which generally agree with the results already obtained. MELITO of Sardis (*c.* 179 A.D.) in a journey to the East made the question of the exact number and order of "the Books of the *Old* Testament" a subject of special inquiry, to satisfy the wishes of a friend (Euseb. *H. E.* iv. 26). He gives the result in the following form: the Books are, 5 Moses ... Jos., Jud., Ruth, 4 K., 2 Ch., Ps., Prov. (*Σαλομῶνος Παροιμίαι ἡ καὶ Σοφία*), Eccles., Cant., Job, Is., Jer., xii. Proph., Dan., Ezek., Esd. The arrangement is peculiar, and the Books of Nehemiah and Esther are wanting. The former is without doubt included in the general title "Esdras," and it has been conjectured (Eichhorn, *Einl.* § 52; cp. Routh, *Rel. Sacr.* i. 136) that Esther may have formed part of the same collection of records of the history after the Exile.[m] The testimony of ORIGEN labours under a similar difficulty. According to the present Greek text (*ap.* Euseb. *H. E.* vi. 25; *in Ps.* i. *Philoc.* 3; cp. *Selecta*). in enumerating the twenty-two Books "which the *Hebrews* hand down as included in the Testament (*ἐνδιαθήκους*)," he omits the Book of the twelve minor Prophets,

[i] The limit fixed by Josephus marks the period to which the prophetic history extended, and not, as is commonly said, the date at which the O. T. Canon was itself finally closed.

[j] In *Ant.* xiii. 10, § 6, Josephus simply says that the Sadducees rejected the *precepts* which were not contained in the laws of Moses (*ἅπερ οὐκ ἀναγέγραπται ἐν τοῖς Μωϋσέως νόμοις*), but derived only from tradition (*τὰ ἐκ παραδόσεως*, opposed to *τὰ γεγραμμένα*). The statement has no connexion whatever with the other *writings* of the Canon.

The Canon of the SAMARITANS was confined to the Pentateuch, not so much from their hostility to the Jews, as from their undue exaltation of the Law (Keil, *Einl.* § 218).

[k] The chief passages which Bleek quotes, after Stier and Nitzsch, are James i. 19 || Sirach v. 11; 1 Pet. i. 6, 7 || Wisd. iii. 3–7; Heb. xi. 34, 35 || 2 Macc. vi. 18—vii. 42; Heb. i. 3 || Wisd. vii. 26, &c.; Rom. i. 20–32 || Wisd. xiii.–xv.; Rom. ix. 21 || Wisd. xv. 7; Eph. vi. 13–17 || Wisd. v. 18–20. But it is obvious that if these passages prove satisfactorily that the Apostolic writers were *acquainted* with the Apocryphal books, they indicate with equal clearness that their *silence* with regard to them cannot have been purely accidental. An earlier criticism of the alleged coincidences is given in Cosin's *Canon of Scripture*, §§ 35 sq.

[l] Some passages are quoted in the N. T. which are not found in the canonical Books. The most important of these is that from the prophecies of Enoch [ENOCH, BOOK OF] (Jude 17). Others have been found in Luke xi. 49–51; John vii. 38; James iv. 5, 6; 1 Cor. ii. 9; but these are more or less questionable.

[m] Hody (*de Bibl. text.* p. 646) quotes a singular note, falsely attributed to Athanasius, who likewise omits Esther. "Sunt etiam ex antiquis Hebraeis qui Esther admittant, atque ut numerus idem (22) servetur, cum *Judicibus* copularunt." The book is wanting also in the *Synops. S. Script.*, *Gregor. Naz.*, *Amphilochius*, *Nicephorus Callistus*, &c.

and adds "the *letter*" to the Book of Jeremiah and Lamentations (Ἱερεμίας σὺν Θρήνοις καὶ τῇ ἐπιστολῇ ἐν ἑνί). The number is thus imperfect, and the Latin Version of Rufinus has rightly preserved the Book of the twelve Prophets in the catalogue, placing it after Canticles and before the greater Prophets, a strange position which can hardly have been due to an arbitrary insertion (cf. Hil. *Prol. in Ps.* 15).[a] The addition of "the *letter*" to Jeremiah is inexplicable except on the assumption that it was an error springing naturally from the habitual use of the LXX., in which the Books are united, for there is not the slightest trace that this late apocryphal fragment [BARUCH, BOOK OF] ever formed part of the Jewish Canon. The statement of JEROME is clear and complete. After noticing the coincidence of the twenty-two Books of the Hebrew Bible with the number of the Hebrew letters, and of the five double letters with the five "double Books" (*i.e.* 1–2 Sam., 1–2 Kings, 1–2 Chronicles, Ezra–Nehemiah, Jeremiah–Lamentation), he gives the contents of the Law, the Prophets, and the Hagiographa, in exact accordance with the Hebrew authorities, placing Daniel in the last class; and adding that whatever is without the number of these must be placed among the Apocrypha:—"Hic prologus Script. quasi galeatum principium omnibus libris quos de Hebraeo vertimus in Latinum, convenire potest, ut scire valeamus, quidquid extra hos est, inter Apocrypha esse ponendum" (Hieron. *Prol. Gal.*). The statement of the *Talmud* is in many respects so remarkable that it must be transcribed entire. "But who wrote [the Books of the Bible]? Moses wrote his own Book, ? the Pentateuch, *the section about Baluam* and Job. Joshua wrote his own Book and the eight [last] verses of the Pentateuch. Samuel wrote his own Book, the Book of Judges and Ruth. David wrote the Book of Psalms [of which however some were composed] by the ten venerable elders: Adam, the first man, Melchizedek, Abraham, Moses, Haman, Jeduthun, Asaph, and the three sons of Korah. Jeremiah wrote his own Book, the Books of Kings and Lamentations. Hezekiah and his friends [reduced to writing] the Books contained in the Memorial word IaMSCHaK, *i.e.* Isaiah, Proverbs, Canticles, Ecclesiastes. The men of the Great Synagogue [reduced to writing] the Books contained in the memorial letter KaNDaG, *i.e.* Ezekiel, the twelve lesser Prophets, Daniel, and Esther. Ezra wrote his own Book, and brought down the genealogies of the Books of Chronicles to his own times .... Who brought the remainder of the Books [of Chronicles] to a close? Nehemiah the son of Hachalijah" (*Baba Bathra*, f. 14 b. Cp. G. H. Marx, *Traditio rabbinorum veterrima*, Lips. 1884).

In spite of the comparatively late date (*c.* A.D. 500), from which this tradition is derived, it is evidently in essence the earliest description of the work of Ezra and the Great Synagogue which has been preserved. The details must be tested by other evidence, but the general description of the growth of the Jewish Canon bears every mark of probability. The early fables as to the work of Ezra [2 ESDRAS; see above] are a natural corruption of this original belief, and after a time entirely supplanted it; but as it stands in the great collection of the teaching of the Hebrew Schools, it bears witness to the authority of the complete Canon, and at the same time recognises its gradual formation in accordance with the independent results of internal evidence.

The later Jewish Catalogues threw little light upon the Canon. They generally reckon twenty-two Books, equal in number to the letters of the Hebrew alphabet, five of the Law, eight of the Prophets (Josh., Judg., and Ruth, 1–2 Sam., 1–2 K., Is., Jer. and Lam., Ezek., 12 Proph.), and nine of the Hagiographa (Hieron. *Prol. in Reg.*). The last number was more commonly increased to eleven by the distinct enumeration of the Books of Ruth and Lamentation ("the 24 Books," עשרים ואַרבעה), and in that case it was supposed that the *Yod* was thrice repeated in reverence for the sacred name (Hody, *de Bibl. text.* p. 644; Eichhorn, *Einl.* § 6). In Hebrew MSS., and in the early editions of the O. T., the arrangement of the later Books offers great variations (Hody, *l. c.*, gives a large collection), but they generally agree in reckoning all separately except the Books of Ezra and Nehemiah [c] (Buxtorf, Hottinger, Heng-

[a] Origen expressly excludes 1 Macc. from the Canon (ἔξω δὲ τούτων ἐστὶ τὰ Μακκ.), although written in Hebrew. Bertholdt's statement to the contrary is incorrect (*Einl.* § 31), although Keil (*de Auct. Can. Libb. Macc.* 67) maintains the same opinion.

[c] Notwithstanding the unanimous judgment of later writers, there are traces of the existence of doubts among the first Jewish doctors as to some Books. Thus in the Mishna (*Jad.* 3, 5) a discussion is recorded as to Cant. and Eccles. whether they "soil the hands"; and a difference as to the latter Book existed between the great schools of Hillel and Shammai. ["To soil the hands" is an expression that has often been misinterpreted. The Jewish doctors, in order to protect the sacred Books from irreverent usage, appear to have laid down a special rule, by which ceremonial uncleanness was contracted in the contact of hands or food with the Jewish Scriptures. It thus became necessary to determine which writings "soiled" or defiled the hands. To say of a Jewish book that it soiled the hands, so far from being depreciatory, was equivalent to recognising its place in the Jewish Canon. See Ginsburg's *Song of Songs*, p. 3, note, 1857, and *Coheleth*, pp. 13–15, 1861.] The same doubts as to Eccles. are repeated in another form in the Talmud (*Sabb.* f. 30, 2), where it is said that the book would have been concealed (גְּנָזָן) but for the quotations at the beginning and the end. Cp. Hieron. *Comm. in Eccles.* s. f.: "Aiunt Hebraei cum inter caetera scripta Salomonis quae antiquata sunt nec in memoria duraverunt, et hic liber obliterandus videretur, eo quod vanas Dei assereret creaturas ... ex hoc uno capitulo (xii.) meruisse auctoritatem ...." Parallel passages are quoted in the notes on the passage, and by Bleek, *Stud. u. Krit.* 1853, pp. 322 sq. The doubts as to Esther have been already noticed. The gravity of these doubts may fairly be measured by the vigour of assertion with which the Jews defended its canonicity. Cp. Jer. Talm. *Megilla*, i. 7 (p. 70[d]). Rabbi Jochanan said, "The Prophets and the Hagiographa will become obsolete, but the five Books of the Law will never become obsolete." Rabbi Simeon, the son of Lakish, said, "Nay; the Megillah (roll) of Esther and the Halacoth will never become obsolete." So also Maimon. *Hilchoth Megilla*, ii. 18, "All the Books of the Prophets and all the Hagiographa will become obsolete in the days of the Messiah, save only the Megillah (roll) of Esther. Lo! that shall stand like the five-fifths of the Law." (Quoted in Herzog-Plitt, *Encyk.* art. KANON.) The Jewish objections to the canonicity of such Books as Esth., Eccles., Cant. do not seem to have been founded

stenberg, Hävernick, *ll. cc.*; Zunz, *Gottesd. Vorträge d. Juden*).

So far, then, it has been shown that the Hebrew Canon was uniform and coincident with our own;[p] but while the Palestinian Jews combined to preserve the strict limits of the old prophetic writings, the Alexandrine Jews allowed themselves greater freedom. Their ecclesiastical constitution was less definite, and the same influences which created among them an independent literature disinclined them to regard with marked veneration more than the Law itself. The idea of a Canon was foreign to their habits; and the fact that they possessed the sacred Books not merely in a translation, but in a translation made at different times, without any unity of plan and without any uniformity of execution, necessarily weakened that traditional feeling of their real connexion which existed in Palestine. Translations of later books were made (1 Macc., Ecclus., Baruch, &c.), and new ones were written (2 Macc., Wisd.), which were reckoned in the sum of their religious literature, and probably placed on an equal footing with the Hagiographa in common esteem. But this was not the result of any express judgment on their worth, but a natural consequence of the popular belief in the doctrine of a living Word which deprived the prophetic writings of part of their distinctive value. So far as an authoritative Canon existed in Egypt, it is probable that it was the same as that of Palestine. In the absence of distinct evidence to the contrary this is most likely, and positive indications of the fact are not wanting. The translator of the Wisdom of Sirach uses the same phrase (ὁ νόμος καὶ οἱ προφῆται καὶ τὰ ἄλλα βιβλία) in speaking of his grandfather's biblical studies in Palestine, and of his own in Egypt (cp. Eichhorn, *Einl.* § 22), and he could hardly have done so had the Bible been different in the two places. The evidence of PHILO, if less direct, is still more conclusive. His language shows that he was acquainted with the Apocryphal books, and yet he does not make a single quotation from them (Hornemann, *Observ. ad illustr. doctr. de Can. V. T. ex Philone*, pp. 28, 29, *ap.* Eichhorn, *Einl.* § 26), though they offered much that was favourable to his views. On the other hand, in addition to the Law, he quotes all the Books of "the Prophets," and the Psalms and Proverbs, from the Hagiographa, and several of them (Is., Jer., Hos., Zech., Ps., Prov.) with clear assertions of their "prophetic" or inspired character. Of the remaining Hagiographa (Neh., Ruth, Lam., 1–2 Ch., Dan., Eccles., Cant.) he makes no mention, but the first three may have been attached, as often in Hebrew usage, to other Books (Ezra, Judg., Jer.), so that four writings alone are entirely unattested by him (cp. Hornemann, *l. c.*). A further trace of the identity of the Alexandrine Canon with the Palestinian is found in the Apocalypse of Esdras [2 ESDRAS], where "twenty-four open books" are specially distinguished from the mass of esoteric writings which were dictated to Ezra by inspiration (2 Esd. xiv. 44 sq.). [APOCRYPHA.]

From the combination of this evidence there can be no reasonable doubt that at the beginning of the Christian era the Jews had only one Canon of the Sacred writings, defined distinctly in Palestine, and admitted, though with a less definite apprehension of its peculiar characteristics, by the Hellenizing Jews of the Dispersion, and that this Canon was recognised, as far as can be determined, by our Lord and His Apostles. But, on the other hand, the connexion of other religious books with the Greek translation of the O. T., and their common use in Egypt, was already opening the way for an extension of the original Canon, and assigning an authority to later writings which they did not derive from ecclesiastical sanction.

III. *The History of the Christian Canon of the Old Testament.*—The history of the Old Testament Canon among Christian writers exhibits the natural issue of the currency of the LXX., enlarged as it had been by apocryphal additions. In proportion as the Fathers were more or less absolutely dependent on that Version for their knowledge of the Old Testament Scriptures, they gradually lost in common practice the sense of the difference between the Books of the Hebrew Canon and the Apocrypha. The custom of individuals grew into the custom of the Church; and the public use of the Apocryphal books obliterated in popular regard the characteristic marks of their origin and value, which could only be discovered by the scholar. But the custom of the Church was not fixed in an absolute judgment. It might seem as if the great leaders of the Christian Body shrank by a wise forethought from a work for which they were unfitted; for by acquirements and constitution they were little capable of solving a problem which must at last depend on historical data. And this remark must be applied to the details of patristic evidence on the contents of the Canon. Their habit must be distinguished from their judgment. The want of critical tact which allowed them to use the most obviously pseudonymous works (2 Esdras, Enoch) as genuine productions of their supposed authors, or as "divine Scripture," greatly diminishes the value of casual and isolated testimonies to single Books. In such cases the form as well as the fact of the attestation requires to be examined, and after this the combined witness of different Churches can alone suffice to stamp a Book with ecclesiastical authority.

The confusion which was necessarily introduced by the use of the LXX. was further increased when the Western Church rose in importance. The LXX. itself was the original

upon any historical basis, but upon the character and contents of the Books, and the possibility of their variance with the traditional interpretation of the Law (see Fuerst, *Kanon des A. T.* 148 sq.; Zahn, *Gesch. d. N. T. Kan.* 123 sq.).

A series of references to the Apocryphal books from Jewish writers has been made by Hottinger (*Thes. Philol.* 1659), and collected and reprinted by Wordsworth (*On the Canon of the Scriptures*, App. C). Cp. also the valuable notices in Zunz, *D. Gottesd. Vortr. d. Jud.* pp. 126 sq.

[p] The dream of a second and third revision of the Jewish canon in the times of Eleazer and Hillel, by which the Apocryphal books were ratified (Genebrard), rests on no basis whatever. The supposition that the Jews rejected the Apocrypha after our Lord's coming (Card. Perron) is equally unfounded. Cosin, *Canon of Scripture*, §§ 23, 25.

of the Old Latin, and the recollection of the original distinction between the constituent Books of the Bible became more and more difficult in the Version of a Version; and at the same time the Hebrew Church dwindled down to an obscure sect, and the intercourse between the Churches of the East and West grew less intimate. The impulse which instigated Melito in the second century to seek in "the East" an "accurate" account of "the Books of the Old Testament," gradually lost its force as the Jewish nation and literature were further withdrawn from the circle of Christian knowledge. The Old Latin Version converted use popularly into belief, and the investigations of Jerome were unable to counteract the feeling which had gained strength silently, without any distinct and authoritative sanction. Yet one important, though obscure, protest was made against the growing error. The Nazarenes, the relics of the Hebrew Church, in addition to the New Testament "made use of the Old Testament, as the Jews" (Epiph. *Haer* xxix. 7). They had "the whole Law, and the Prophets, and the Hagiographa so called; that is, the poetical Books, and the Kings, and Chronicles and Esther, and all the other Books in Hebrew" (Epiph. *l. c.*: παρ' αὐτοῖς γὰρ πᾶς ὁ νόμος καὶ οἱ προφῆται καὶ τὰ γραφεῖα λεγόμενα, φημὶ δὲ τὰ στιχήρη, καὶ αἱ Βασιλεῖαι καὶ Παραλειπόμενα, καὶ Αἴσθηρ καὶ τἄλλα πάντα Ἑβραϊκῶς ἀναγινώσκεται). And in connexion with this fact, it is worthy of remark that JUSTIN MARTYR, who drew his knowledge of Christianity from Palestine, makes no use of the Apocryphal writings in any of his works.

From what has been said, it is evident that the history of the Christian Canon is to be sought in the first instance from definite catalogues and not from isolated quotations. But even this evidence is incomplete and unsatisfactory. A comparison of the table (No. I., p. 506) of the chief extant Catalogues will show how few of them are really independent; and the later transcriptions are commonly of no value, as they do not appear to have been made with any critical appreciation of their distinctive worth.

These Catalogues evidently fall into two great classes, Hebrew and Latin; and the former, again, exhibits three distinct varieties, which are to be traced to the three original sources from which the Catalogues were derived. The first may be called the pure Hebrew Canon, which is that of the Church of England (the *Talmud, Jerome, Joan. Damasc.*). The second differs from this by the *omission* of the Book of Esther (*Melito* [*Athan.*], *Syn. S. Script., Greg. Naz., Amphiloch., Leont., Niceph., Callist.*). The third differs by the *addition* of Baruch, or "the Letter" (*Origen, Athanas., Cyr. Hieros.* [*Concil. Laod.*], *Hil. Pictav.*). The omission of Esther may mark a real variation in the opinion of the Jewish Church [ESTHER], but the addition of Baruch is probably due to the place which it occupied in direct connexion with Jeremiah, not only in the Greek and Latin translations, but perhaps also in some copies of the Hebrew text [BARUCH, BOOK OF]. This is rendered more likely by the converse fact that the Lamentations and Baruch are not distinctly enumerated by many writers who certainly received both Books. During the first four centuries this Hebrew Canon is the only one which is distinctly recognised, and it is supported by the combined authority of those Fathers whose critical judgment is entitled to the greatest weight. In the meantime, however, as has been already noticed, the common usage of the early Fathers was influenced by the position which the Apocryphal books occupied in the current Versions, and they quoted them frequently as Scripture, when they were not led to refer to the judgment of antiquity. The table (No. II., p. 508) will show the extent and character of this partial testimony to the disputed books.

These casual testimonies are, however, of comparatively slight value, and are, in many cases, opposed to the deliberate judgment of the authors from whom they are quoted. The real divergence as to the contents of the Old Testament Canon is to be traced to AUGUSTINE, whose wavering and uncertain language on the point furnishes abundant materials for controversy. By education and character he occupied a position more than usually unfavourable for historical criticism, and yet his overpowering influence, when it fell in with ordinary usage, gave consistency and strength to the opinion which he appeared to advocate, for it may be reasonably doubted whether he differed intentionally from Jerome except in language. In a famous passage (*de Doctr. Christ.* ii. 8 [13]) he enumerates the Books which are contained in "the whole Canon of Scripture," and includes among them the Apocryphal books without any clear mark of distinction. This general statement is further confirmed by two other passages, in which it is argued that he draws a distinction between the Jewish and Christian Canons, and refers the authority of the Apocryphal books to the judgment of the Christian Church. In the first passage he speaks of the Maccabaean history as not "found in the Sacred Scriptures which are called canonical, but in others, among which are also the books of the Maccabees, which the Church, and not the Jews, holds for canonical, on account of the marvellous sufferings of the martyrs [recorded in them]" ("quorum supputatio temporum non in Scripturis Sanctis, quae Canonicae appellantur, sed in aliis invenitur, in *quibus* sunt et Machabaeorum libri, quos non Judaei, sed ecclesia pro Canonicis habet," *de Civ.* xviii. 36). In the other passage he speaks of the books of the Maccabees as "received (*recepta*) by the Church, not without profit, if they be read with sobriety" (*c. Gaud.* i. 38). But it will be noticed that in each case a distinction is drawn between the "Ecclesiastical" and properly "Canonical" books. In the second case he expressly lowers the authority of the books of the Maccabees by remarking that "the Jews have them not like the Law, the Psalms, and the Prophets to which the Lord gives His witness" (Aug. *l. c.*). And the original catalogue is equally qualified by an introduction which distinguishes between the authority of Books which are received by all and by some of the Churches; and, again, between those which are received by Churches of great or of small weight (*de Doctr. Chr.* ii. 8 [12]), so that the list which immediately follows must be interpreted by

No. I.—CHRISTIAN CATALOGUES OF THE BOOKS OF THE OLD TESTAMENT.

The list extends only to such books as are disputed. Of the signs, * indicates that the book is expressly reckoned as *Holy Scripture*: † that it is placed expressly in a *second* rank: ? that it is mentioned with *doubt*. A blank marks the silence of the author as to the book in question.

NOTES ON TABLE No. I.

[1] The evidence against the authenticity of this Canon, as an original part of the collection, is decisive, in spite of the defence of Bickell (*Stud. u. Krit.* iii. 611 sq.), as the present writer has shown at length in another place (*Hist. of N. T. Canon*, iv. 498 sq.). The Canon recurs in the *Capitular. Aquisgran.* c. xx., with the omission of *Baruch* and *Lamentations*.

[2] The same Canon appears in Conc. Hipp. *Can.* xxxvi. The Greek version of the Canon omits the books of Maccabees; and the history of the Council itself is very obscure. Cp. Cosin. § 82.

[3] This Canon mentions *three* books of the Maccabees. *Judith* is not found in some MSS.; and generally it may be observed that the published text of the Conciliar Canons needs a thorough revision. Ecclesiasticus is thus mentioned: ἔξωθεν δὲ προσιστορείσθω ὑμῖν μανθάνειν ὑμῶν τοὺς νέους τὴν σοφίαν τοῦ πολυμαθοῦς Σειράχ. Cp. *Constit. Apost.* ii. 57.

The Canons of Laodicea, Carthage, and the Apostolic Canons, were all ratified in the Quini-Sextine Council, *Can.* 2.

[4] Ἱερεμίας σὺν Θρήνοις καὶ ἐπιστολῇ ἐν ἑνί. Origen expressly says that this catalogue is ὡς Ἑβραῖοι παραδιδόασι, and begins with the words: εἰσὶ δὲ αἱ εἴκοσι δύο βίβλοι κατ' Ἑβραίους αἵδε. He quotes several of the Apocryphal books as Scripture, as will be seen below; and in his Letter to Africanus defends the interpolated Greek text of Daniel and the other O. T. Books, on the ground of their public use (*Ep. ad Afric.* § 3 sq.). The whole of this last passage is of the deepest interest, and places in the clearest light the influence which the LXX. exercised on common opinion.

this rule. In confirmation of this view of Augustine's special regard for the Hebrew Canon, it may be further urged that he appeals to the Jews, "the librarians of the Christians," as possessing "all the writings in which Christ was prophesied of" (*in* Ps. xl., Ps. lvi.), and to "the Law, the Psalms, and the Prophets," which were supported by the witness of the Jews (*c. Gaud.* l. c.), as including "all the canonical authorities of the Sacred Books" (*de unit. Eccles.* 16), which, as he says in another place (*de Civ.* xv. 23, 4), "were preserved in the Temple of the Hebrew people by the care of the successive priests." But on the other hand Augustine frequently uses passages from the Apocryphal books as co-ordinate with Scripture, and practically disregards the rules of distinction between the various classes of Sacred writings which he had himself laid down. He stood on the extreme verge of the age of independent learning, and follows at one time the conclusions of criticism, at another the prescriptions of habit, which from his date grew more and more powerful.

The enlarged Canon of Augustine, which was, as it will be seen, wholly unsupported by any Greek authority, was adopted at the Council of CARTHAGE (A.C. 397?), though with a reservation (Can. 47, *De confirmando isto Canone transmarina ecclesia consulatur*), and afterwards published in the decretals which bear the name of INNOCENT, DAMASUS, and GELASIUS (cp. Credner, *Zur Gesch. d. Kan.* 151 sq.); and it recurs in many later writers. But nevertheless a continuous succession of the more learned Fathers in the West maintained the distinctive authority of the Hebrew Canon up to the period of the Reformation. In the 6th century PRIMASIUS (*Comm. in Apoc.* iv. Cosin, § 92?), in the 7th GREGORY THE GREAT (*Moral.* xix. 21, p. 622), in the 8th BEDE (*in Apoc.* iv.?), in the 9th ALCUIN (*ap.* Hody, 654; yet see *Carm.* vi. vii.), in the 10th RADULPHUS FLAV. (*in Levit.* xiv.; Hody, 655), in the 12th PETER OF CLUNY (*Ep. c. Petr.*; Hody, *l. c.*), HUGO DE S. VICTOIRE (*de Script.* 6), and JOHN OF SALISBURY (Hody, 656; Cosin, § 130), in the 13th HUGO CARDINALIS (Hody, 656), in the 14th NICHOLAS LIRANUS (Hody, p. 657; Cosin, § 146), WICLIF (? cp. Hody, 658), and OCCAM (Hody, p. 657; Cosin, § 147), in the 15th THOMAS ANGLICUS (Cosin, § 150), and THOMAS DE WALDEN (Id. § 151), in the 16th Card. XIMENES (*Ed. Compl. Pref.*), SIXTUS SENENSIS (*Biblioth.* i. 1), and Card. CAJETAN (Hody, p. 662; Cosin, § 173), repeat with approval the decision of Jerome, and draw a clear line between the Canonical and Apocryphal books (Cosin, *Scholastical History of the Canon*; Reuss, *Die Gesch. d. heiligen Schriften d. N. T.*, ed. 2, § 328).

NOTES ON TABLE No. I.—*continued.*

[5] Athanasius closes his whole catalogue with the words: ταῦτα πηγαί τοῦ σωτηρίου...ἐν τούτοις μόνοις τὸ τῆς εὐσεβίας διδασκαλεῖον εὐαγγελίζεται. μηδεὶς τούτοις ἐπιβαλλέτω· μηδὲ τούτων ἀφαιρείσθω τι ..... ἐστὶν καὶ ἕτερα βιβλία τούτων ἔξωθεν, οὐ κανονιζόμενα μὲν τετυπώμενα δὲ παρὰ τῶν πατέρων ἀναγινώσκεσθαι τοῖς ἄρτι προσερχομένοις καὶ βουλομένοις κατηχεῖσθαι τὸν τῆς εὐσεβείας λόγον.

[6] The list of the Apocryphal books is prefaced by a clause nearly identical with that in Athanasius. In a second enumeration (Credner, *Gesch. d. Kanon*, p. 144), *three* books of the *Maccabees* and *Susanna* are enumerated among the ἀντιλεγόμενα.

[7] The Apocryphal books are headed: καὶ ὅσαι ἀντιλέγονται τῆς παλαιᾶς αὗταί εἰσιν. *Susanna* (i.e. Add. to Daniel) is reckoned among them.

[8] The catalogue ends with the words: πάσας ἔχεις. εἴ τις δὲ τούτων ἐκτὸς οὐκ ἐν γνησίοις.

[9] The verses occur under the name of Gregory of Nazianzus, but are generally referred to Amphilochius. Of Esther he says: τούτοις προσεγκρίνουσι τὴν Ἐσθήρ τινες. He concludes: οὗτος ἀψευδέστατος Κανὼν ἂν εἴη τῶν θεοπνεύστων γραφῶν.

[10] Epiphanius adds of Wisdom and Ecclus.: χρήσιμοι μὲν εἰσὶ καὶ ὠφέλιμοι, ἀλλ' εἰς ἀριθμὸν ῥητῶν οὐκ ἀναφέρονται, διὸ οὐδε ... ἐν τῇ τῆς διαθήκης κιβωτῷ [ἀνετέθησαν]. The same catalogue is repeated *de Mens.* p. 186. In another place (*adv. Haer.* lxxvi. p. 941), he speaks of the teaching contained in "the xxii. Books" of the Old Test. in the New Test., and then ἐν ταῖς Σοφίαις, Σολομῶντός τε φημὶ καὶ υἱοῦ Σιρὰχ καὶ πάσαις ἁπλῶς θείαις γραφαῖς. In a third catalogue (*adv. Haer.* v. p. 19) he adds the letters of *Baruch* and Jeremiah (which he elsewhere specially notices as wanting in the Hebrew, *de Mens.* p. 163), and speaks of Wisdom and Ecclus. as ἐν ἀμφιλέκτῳ (among the Jews), χωρὶς ἄλλων τινῶν βιβλίων ἐναποκρύφων. Cp. *adv. Haer.* xxix. p. 122.

[11] Leont. *l. c.*: ταῦτά ἐστι τὰ κανονιζόμενα βιβλία ἐν τῇ ἐκκλησίᾳ καὶ παλαιὰ καὶ νέα, ὧν τὰ παλαιὰ πάντα δέχονται οἱ Ἑβραῖοι.

[12] Joan. Damasc. *l. c.* ἡ σοφία τοῦ Σολομῶντος καὶ ἡ Σοφία τοῦ Ἰησοῦ .... ἐνάρετοι μὲν καὶ καλαὶ ἀλλ' οὐκ ἀριθμοῦνται, οὐδὲ ἔκειντο ἐν τῇ κιβωτῷ.

[13] "Quibus nonnulli adjiciunt Esther, Judith, et Tobit. ἐκτὸς δὲ τούτων τῆς γραφῆς ἅπαν νόθον" (Hody, *l. c.*).

[14] Hilar. *l. c.*: "Quibusdam autem visum est additis Tobia et Judith xxiv. libros secundum numerum graecarum litterarum connumerare ...."

[15] Hieron. *l. c.*: "Quicquid extra hos [the Books of the Hebrew Canon] est, inter apocrypha ponendum. Igitur *Sapientia*, quae vulgo Salomonis inscribitur, et *Jesu filii Sirach* liber, et *Judith* et *Tobias* et *Pastor* non sunt in canone. *Macchabaeorum* primum librum Hebraicum reperi: secundus Graecus est .... Cp. *Prol. in Libros Salom. ad Chrom. et Heliod.* Fertur et Πανάρετος, *Jesu filii Sirach* liber, et alius ψευδεπίγραφος, qui *Sapientia Salomonis* inscribitur .... Sicut ergo *Judith* et *Tobit*, et *Macchabaeorum* libros legit quidem ecclesia, sed inter canonicos non recipit, sic et haec duo volumina legit ad aedificationem plebis, non ad auctoritatem ecclesiasticorum dogmatum confirmandam. Cp. Prologos in *Dan., Hierem., Tobit, Judith, Jonam*; *Ep. ad Paulinum*, liii." Hence at the close of Esther one very ancient MS., quoted by Martianay on the place, adds: "Hucusque completum est Vet. Test. id est, omnes canonicae Scripturae ... quas transtulit Hieronymus .... de Hebraicâ veritate .... caeterae vero Scripturae, quae non sunt canonicae, sed dicuntur ecclesiasticae, istae sunt, id est ...." giving the list contained in *Prol. Galat.*

[16] After giving the Hebrew Canon and the received Canon of N. T., Rufinus says: "Sciendum tamen est, quod et alii libri sunt, qui non canonici sed *ecclesiastici* a majoribus appellati sunt, id est, *Sapientia*, quae dicitur *Solomonis*, et alia *Sapientia* quae dicitur *filii Sirach* .... ejusdem vero ordinis libellus est *Tobiae* et *Judith* et *Machabaeorum* libri .... Quae omnia legi quidem in ecclesiis voluerunt, non tamen proferri ad auctoritatem ex his fidei confirmandam. Caeteras vero Scripturas *apocryphas* nominarunt, quas in ecclesiis legi noluerunt."

[17] See below.

[18] Cassiodorus gives also, however, with marks of high respect, the catalogue of Jerome. Cp. Cosin, § 89.

[19] Isidorus, like Cassiodorus, gives the catalogue of Jerome, as well as that of Augustine. Cp. Cosin, § 103.

[1] The quotations in brackets are doubtful either as to the reference, or as to the character assigned to the book quoted.

Up to the date of the COUNCIL OF TRENT, the Romanists allow that the question of the Canon was open, but one of the first labours of that assembly was to circumscribe a freedom which the growth of literature seemed to render perilous.[q] The decree of the Council "on the Canonical Scriptures," which was made at the fourth session (April 8th, 1546), at which about fifty-three representatives were present, pronounced the enlarged Canon, including the Apocryphal books, to be deserving in all its parts of "equal veneration" (*pari pietatis affectu*), and added a list of books "to prevent the possibility of doubt" (*ne cui dubitatio suboriri possit*). This hasty and peremptory decree, unlike in its form to any catalogue before published, was closed by a solemn anathema against all who should "not receive the entire books with all their parts as sacred and canonical" ("Si quis autem libros ipsos integros cum omnibus suis partibus, prout in ecclesia catholica legi consueverunt et in veteri vulgata Latina editione habentur, pro sacris et canonicis non susceperit . . . anathema esto," *Conc. Trid. Sess.* iv.). This decree was not, however, passed without opposition (Sarpi, 139 sq., ed. 1655, though Pallavacino denies this); and in spite of the absolute terms in which it is expressed, later Romanists have sought to find a method of escaping from the definite equalisation of the two classes of Sacred writings by a forced interpretation of the subsidiary clauses. Du Pin (*Dissert. prelim.* i. 1), Lamy (*App. Bibl.* ii. 5), and Jahn (*Einl. in d. Göttl. Bücher d. A. T.*, i. 140–143) endeavoured to establish two classes of proto-Canonical, and deutero-Canonical books, attributing to the first a dogmatic, and to the second only an ethical authority. But such a classification, however true it may be, is obviously at variance with the terms of the Tridentine decision, and has found comparatively little favour among Romish writers (cp. [Herbst] Welte, *Einl.* ii. 1 sq.; Kaulen,[2] *Einl. in d. heilige Schrift.* i. 14, &c.).

The Reformed Churches unanimously agreed in confirming the Hebrew Canon of Jerome, and refused to allow any dogmatic authority to the Apocryphal books, but the form in which this judgment was expressed varied considerably in the different confessions. The Lutheran formularies contain no definite article on the subject, but the note which Luther placed in the front of his German translation of the Apocrypha (ed. 1534) is an adequate declaration of the later judgment of the Communion: "Apocrypha, that is books which are not placed on an equal footing (*nicht gleich gehalten*) with Holy Scripture, and yet are profitable and good for reading." This general view was further expanded in the special prefaces to the separate books in which Luther freely criticised their individual worth, and wholly rejected 3 and 4 Esdras as unworthy of translation. At an earlier period Carlstadt (1520) published a critical essay, *De canonicis scripturis libellus* (reprinted in Credner, *Zur Gesch. d. Kan.* pp. 291 sq.), in which he followed the Hebrew division of the Canonical Books into three ranks, and added Wisd., Ecclus., Judith, Tobit, 1 and 2 Macc., as Hagiographa, though not included in the Hebrew collection, while he rejected the remainder of the Apocrypha with considerable parts of Daniel as "utterly apocryphal" (*plane apocryphi*; Credn. pp. 389, 410 sq.).

The Calvinistic Churches generally treated the question with more precision, and introduced into their symbolic documents a distinction between the "Canonical" and "Apocryphal," or "Ecclesiastical" books. The Gallican Confession (1561), after an enumeration of the Hieronymian Canon (*Art.* 3), adds (*Art.* 4) "that the other ecclesiastical books are useful, yet not such that any article of faith could be established out of them" (*quo* [sc. *Spiritu Sancto*] *suggerente docemur, illos* [sc. *libros Canonicos*] *ab aliis libris ecclesiasticis discernere, qui, ut sint utiles, non sunt tamen ejusmodi, ut ex iis constituti possit aliquis fidei articulus*). The Belgic Confession (1561?) contains a similar enumeration of the Canonical Books (*Art.* 4), and allows their public use by the Church, but denies to them all independent authority in matters of faith (*Art.* 6). The later Helvetic Confession (1562, Bullinger) notices the distinction between the Canonical and Apocryphal books without pronouncing any judgment on the question (Niemeyer, *Libr. Symb. Eccles. Ref.* p. 468). The Westminster Confession (*Art.* 3) places the Apocryphal books on a level with other human writings, and concedes to them no other authority in the Church.

The English Church (*Art.* 6) appeals directly to the opinion of St. Jerome, and concedes to the Apocryphal books (including [1571] 4 Esdras and The Prayer of Manasses)[r] a use "for example of life and instruction of manners," but not for the establishment of doctrine; and a similar decision is given in the Irish Articles of 1615 (Hardwick, *l. c.*, 341 sq.). The original English Articles of 1552 contained no catalogue (*Art.* 5) of the contents of "Holy Scripture," and no mention of the Apocrypha, although the Tridentine decree (1546) might seem to have rendered this necessary. The example of foreign Churches may have led to the addition upon the later revision.

The expressed opinion of the later Greek Church on the Canon of Scripture has been modified in some cases by the circumstances under which the declaration was made. The "Confession" of Cyril Lucar, who was most favourably disposed towards the Protestant Churches, confirms the Laodicene Catalogue, and marks the Apocryphal books as not possessing the same divine authority as those whose canonicity is unquestioned (Kimmel, *Libri Symbolici Eccles. Or.* i. p. 42, *τὸ κῦρος παρὰ τοῦ παναγίου πνεύματος οὐκ ἔχουσιν ὡς τὰ κυρίως καὶ ἀναμφιβόλως κανονικὰ βιβλία*). In this judgment Cyril Lucar was followed by his friend Metrophanes Critopulus, in whose confession a complete list of the Books of the Hebrew Canon is given (Kimmel, ii. pp. 105 sq.), while some value is assigned to the Apocryphal books (*ἀποβλήτους οὐχ ἡγούμεθα*) in consideration of their

[q] The history of the Catalogue published at the Council of Florence (1441) is obscure (Cosin, §§ 159 f.), and it was probably limited to the determination of books for *Ecclesiastical* use (Reuss, § 325).

[r] The Latin copy of 1562 includes only 2-3 Esd., Wisd., Ecclus., Tobit, Jud., 1-2 Macc. (Hardwick, *Hist. of Art.* p. 275).

ethical value; and the detailed decision of Metrophanes is quoted with approval in the "Orthodox Teaching" of Platon. Metropolitan of Moscow (ed. Athens, 1836, p. 59). The "Orthodox Confession" simply refers the subject of Scripture to the Church (Kimmel, p. 159, ἡ ἐκκλησία ἔχει τὴν ἐξουσίαν . . . νὰ δοκιμάζῃ τὰς γραφάς; cp. p. 123). On the other hand, the Synod at Jerusalem, held in 1672, "against the Calvinists," which is commonly said to have been led by Romish influence (yet cp. Kimmel, p. lxxxviii.), pronounced that the books which Cyril Lucar "ignorantly or maliciously called apocryphal," are "canonical and Holy Scripture," on the authority of the testimony of the ancient Church ([Kimmel,] Weissenborn, *Dosith. Confess.* pp. 467 sq.). The Constantinopolitan Synod, which was held in the same year, notices the difference existing between the Apostolic, Laodicene, and Carthaginian Catalogues, and appears to distinguish the Apocryphal books as not wholly to be rejected (ὅσα μέντοι τῶν τῆς παλαίας διαθήκης βιβλίων τῇ ἀναριθμήσει τῶν ἁγιογράφων οὐ συμπεριλαμβάνεται . . . οὐκ ἀπόβλητα τυγχάνουσι διόλου). The authorised Russian Catechism (*The Doctrine of the Russian Church*, &c., by Rev. W. Blackmore, Aberd., 1845, pp. 37 sq.) distinctly quotes and defends the Hebrew Canon on the authority of the Greek Fathers, and repeats the judgment of Athanasius on the usefulness of the Apocryphal books as a preparatory study in the Bible; and there can be no doubt but that the current of Greek opinion, in accordance with the unanimous agreement of the ancient Greek Catalogues, coincides with this judgment. [The officially-printed Russian Bibles contain the Apocryphal books, with a note to the effect that they are taken from the Greek Version or are not found in the Hebrew text.]

The history of the Syrian Canon of the O. T. is involved in great obscurity from the scantiness of the evidence which can be brought to bear upon it. The Peshitto was made, in the first instance, directly from the Hebrew, and consequently adhered to the Hebrew Canon;[a] but as the LXX. was used afterwards in revising the Version, so many of the Apocryphal books were translated from the Greek at an early period, and added to the original collection (Assem. *Bibl. Orient.* i. 71). Yet this change was only made gradually. In the time of Ephrem (*c.* A.D. 370) the Apocryphal additions to Daniel were yet wanting, and his commentaries were confined to the Books of the Hebrew Canon, though he was acquainted with the Apocrypha (Lardner, *Credibility*, &c., iv. pp. 427 sq.; see Lengerke, *Daniel*, p. cxii.). The later Syrian writers do not throw much light upon the question. Gregory Bar-Hebraeus, in his short commentary on Scripture, treats of the Books in the following order (Assem. *Bibl. Orient.* ii. 282): the Pentateuch, Josh., Judg., 1 & 2 Sam., Ps., 1 & 2 K., Prov., *Eccles.*, Eccles., Cant., *Wisd.*, Ruth, *Hist. Sus.*, Job, Is., 12 Proph., Jer., Lam., Ezek., Dan., *Bel*, 4 Gosp., Acts . . . 14 Epist. of St. Paul, omitting 1 & 2 Ch., Ezra, Neh., Esther, *Tobit*, 1 & 2 *Macc.*, *Judith*, (*Baruch*?), *Apocalypse*, Epist. *James*, 1 Pet., 1 John.

In the Scriptural Vocabulary of Jacob of Edessa (Assem. *l. c.* p. 499), the order and number of the books commented upon is somewhat different: Pent., Jos., Jud., Job, 1 & 2 Sam., David (i.e. Ps.), 1 & 2 K., Is., 12 Proph., Jer., Lam., *Baruch*, Ezek., Dan., Prov., *Wisd.*, Cant., Ruth, Esth., *Judith*, *Ecclus.*, Acts, Epist. *James*, 1 Pet., 1 John, 14 Epist. of St. Paul, 4 Gosp., omitting 1 & 2 Ch., Ezra, Neh., Eccles., *Tobit*, 1 & 2 *Macc.*, *Apoc.* (comp. Assem. *Bibl. Orient.* iii. 4 *not.*).

The Catalogue of Ebed-Jesu (Assem. *Bibl. Orient.*, iii. 5 sq.) is rather a general survey of all the Hebrew and Christian literature with which he was acquainted (Catalogus librorum omnium Ecclesiasticorum) than a Canon of Scripture. After enumerating the Books of the Hebrew Canon, together with *Ecclus.*, *Wisd.*, *Judith*, *Add. to Dan.*, and *Baruch*, he adds, without any break, "the traditions of the Elders" (Mishnah), the works of Josephus, including the Fables of Aesop which were popularly ascribed to him, and at the end mentions the "book of *Tobias and Tobit*." In the like manner, after enumerating the 4 Gosp., Acts., 3 Cath. Epist. and 14 Epist. of St. Paul, he passes at once to the Diatessaron of Tatian, and the writings of "the disciples of the Apostles." Little dependence, however, can be placed on these lists, as they rest on no critical foundation, and it is known from other sources that varieties of opinion on the subject of the Canon existed in the Syrian Church (Assem. *Bibl. Orient.* iii. 6 *not.*).

One testimony, however, which derives its origin from the Syrian Church, is specially worthy of notice. Junilius, an African Bishop of the 6th century, has preserved a full and interesting account of the teaching of Paulus, a Persian, on Holy Scripture, who was educated at Nisibis, where "the Divine Law was regularly explained by public masters," as a branch of common education (Junil. *De part. leg. Praef.*). He divides the Books of the Bible into two classes, those of "perfect," and those of "mean" authority. The first class includes all the Books of the Hebrew Canon with the exception of 1 & 2 Ch., Job, Canticles, and Esther, and with the addition of *Ecclesiasticus*. The second class consists of Chronicles (2), Job, Esdras (2), *Judith*, Esther, and *Maccabees* (2), which are added by "very many" (*plurimi*) to the Canonical Books. The remaining books are pronounced to be of no authority, and of these Canticles and Wisdom are said to be added by "some" (*quidam*) to the Canon. The classification as it stands is not without difficulties, but it deserves more attention than it has received (cp. Hody, p. 653; Gallandi, *Biblioth.* xii. 79 sq. [Westcott's *Canon of the N. T.*, App. D., v.]).

The Armenian Canon, so far as it can be ascertained from editions, follows that of the LXX., but it is of no critical authority; and a similar remark applies to the Aethiopian Canon, though it is more easy in this case to trace the changes through which it has passed (Dillmann,

[a] [A doubt has been raised whether the Books of Chronicles were originally included in the O. T. Canon of this Version. The peculiarities of the translation seem to place these Books in a separate class from the others; and it has been pointed out that the Nestorians and some of the Monophysites did not include the Books of Chronicles, Ezra, Nehemiah, and Esther in their Canon. See Nöldeke, *Die alttest. Literatur*, p. 263.]

Ueber d. Aeth. Kan., in Ewald's *Jahrbuch*, 1853, pp. 144 sq.).

In addition to the books already quoted under the heads for which they are specially valuable, some still remain to be noticed. C. F. Schmid, *Hist. ant. et vindic. Can. S. Vet. et Nov. Test.*, Lips. 1775. [H. Corrodi], *Versuch einer Beleuchtung . . . d. Bibl. Kanons*, Halle, 1792; Movers, *Loci quidam Hist. Can. V. T. illustrati*, Breslau, 1842. The great work of Hody (*De biblior. text.*, Oxon. 1735) contains a rich store of materials, though even this is not free from minor errors. Stuart's *Critical History and Defence of the Old Test. Canon*, London, 1849, is rather an apology than a history. Zöckler, *Hdb. d. theol. Wissensch.* Nordl. 1885; Herzog, *RE.*[2] art. *Kanon* (O. T. by Strack); cp. also De Wette-Schrader's *Einleit.* Berlin, 1869; Nöldeke, *Die alttest. Literatur*, Leipz. 1868; Diestel, *Gesch. d. A. T. in d. christl. Kirche*, Jena, 1869; Keil's *Einleit.* Frank. a. M. 1873; S. Davidson's *The Canon of the Bible*, London, 1877; Bleek-Wellhausen's *Einleit.* Berlin, 1886; W. Robertson Smith, *The O. T. in the Jewish Church*, Edinb. 1881; Reuss, *Gesch. d. A. T.*[2], Braunschw. 1890; Kaulen, *Einleit. in d. A. T.*, Freiburg, 1881; Fuerst's *Kanon des A. T.*, 1868; Bloch, *Alt-Hebraische Literatur*, 1876; Westcott's *Bible in the Church*, 1885; Schürer, *Gesch. d. Jüd. Volkes*, ii. Leipz. 1886; Buhl, *Kanon u. Text d. A. T.*, Leipz. 1891.

IV. *The History of the Canon of the New Testament.*—The history of the Canon of the N. T. presents a remarkable analogy to that of the Canon of the O. T. The beginnings of both Canons are obscure from the circumstances under which they arose: both grew silently under the guidance of an inward instinct rather than by the force of an external authority; both were connected with other religious literature by a series of books which claimed a partial and questionable authority; both gained definiteness in times of persecution. The chief difference lies in the general consent with which all the Churches of the West have joined in ratifying one Canon of the N. T., while they are divided as to the position of the O. T. Apocrypha.

The history of the N. T. Canon may be conveniently divided into three periods. The first extends to the time of Hegesippus (*c.* A.D. 170), and includes the era of the separate circulation and gradual collection of the Apostolic writings. The second is closed by the persecution of Diocletian (A.D. 303), and marks the separation of the sacred writings from the remaining Ecclesiastical literature. The third may be defined by the third Council of Carthage (A.D. 397), in which a catalogue of the Books of Scripture was formally ratified by conciliar authority. The first is characteristically a period of tradition, the second of speculation, the third of authority; and it is not difficult to trace the features of the successive ages in the course of the history of the Canon.

1. *The History of the Canon of the New Testament to* 170 A.D.—The writings of the N. T. themselves contain little more than faint, and perhaps unconscious, intimations of the position which they were destined to occupy. The mission of the Apostles was essentially one of preaching and not of writing: of founding a present Church and not of legislating for a future one. The "word" is essentially one of "hearing," "received," and "handed down," a "message," a "proclamation." Written instruction was in each particular case only occasional and fragmentary; and the completeness of the entire collection of the incidental records thus formed is one of the most striking proofs of the Providential power which guided the natural development of the Church. The prevailing method of interpreting the O. T., and the peculiar position which the first Christians occupied, as standing upon the verge of "the coming age" (*αἰών*), seemed to preclude the necessity and even the use of a "New Testament." Yet even thus, though there is nothing to indicate that the Apostles regarded their written remains as likely to preserve a perfect exhibition of the sum of Christian truth, coordinate with the Law and the Prophets, they claim for their writings a public use (1 Thess. v. 27; Col. iv. 16; Rev. xii. 18) and an authoritative power (1 Tim. iv. 1 ff.; 2 Thess. iii. 6, 14; Rev. xxii. 19); and at the time when 2 Peter was written, which on any supposition is an extremely early writing, the Epistles of St. Paul were placed in significant connexion with "the other Scriptures"[1] (*τὰς λοιπὰς γραφάς*, not *τὰς ἄλλας γραφάς*).

The transition from the Apostolic to the sub-Apostolic age is essentially abrupt and striking. An age of conservatism succeeds an age of creation; but in feeling and general character the period which followed the working of the Apostles seems to have been a faithful reflection of that which they moulded. The remains of the literature to which it gave birth, which are wholly Greek, are singularly scanty and limited in range, merely a few Letters and "Apologies." As yet writing among Christians was, as a general rule, the result of a pressing necessity and not of choice; and under such circumstances it is vain to expect either a distinct consciousness of the necessity of a written Canon, or any clear testimony as to its limits.

The writings of the Apostolic Fathers (*c.* 70–120 A.D.) are all occasional. They sprang out of peculiar circumstances, and offered little scope for quotation. At the same time, the Apostolic tradition was still fresh in the memories of men, and the need of written Gospels was not yet made evident by the corruption of the oral narrative. As a consequence of this, the testimony of the Apostolic Fathers is chiefly important as proving the general currency of such outlines of history and types of doctrine as are preserved in our Canon. They show in this way that the Canonical Books offer an adequate explanation of the belief of the next age, and must therefore represent completely the earlier teaching on which that was based. In three places, however, in which it was natural to look for a more distinct reference, Clement (*Ep.* 47), Ignatius (*ad Eph.* 12), and Polycarp (*Ep.* 3) refer to Apostolic Epistles written to those whom they were themselves addressing. The casual coincidences of the writings of the Apo-

[1] The late tradition commonly quoted from Photius *Biblioth.* 254) to show that St. John completed the Canon refers only to the Gospels: *τοὺς τόμους οἱ ἀνέγραφον διαφόροις γλώσσαις τὰ σωτήρια τοῦ δεσπότου πάθη τε καὶ θαύματα καὶ διδάγματα . . . . διέταξε τε καὶ συνδιήρθρωσε . . . .*

stolic Fathers with the language of the Epistles are much more extensive. With the exception of the Epistles of *Jude*, 2 *Peter*, and 2–3 *John*,[w] with which no coincidences occur, and 1–2 Thessalonians, [Colossians,] Titus, and Philemon, with which the coincidences are very questionable,[x] all the other Epistles were clearly known, and used by them; but still they are not quoted with the formulas which preface citations from the O. T. (*ἡ γραφὴ λέγει, γέγραπται*, &c.),[y] nor is the famous phrase of Ignatius (*ad Philad.* 5, *προσφυγὼν τῷ εὐαγγελίῳ ὡς σαρκὶ Ἰησοῦ καὶ τοῖς ἀποστόλοις ὡς πρεσβυτερίῳ ἐκκλησίας*) sufficient to prove the existence of a collection of Apostolic records as distinct from the sum of Apostolic teaching. The coincidences with the Gospels on the other hand both in fact and substance are numerous and interesting, but such as cannot be referred to the exclusive use of our present written Gospels. Such a use would have been alien from the character of the age and inconsistent with the influence of a historical tradition. The details of the life of Christ were still too fresh to be sought for only in fixed records; and even where memory was less active, long habit interposed a barrier to the recognition of new Scriptures. The sense of the infinite depth and paramount authority of the O. T. was too powerful even among Gentile converts to require or to admit of the immediate addition of supplementary books. But the sense of the peculiar position which the Apostles occupied, as the original inspired teachers of the Christian Church, was already making itself felt in the sub-Apostolic age; and by a remarkable agreement Clement (*ad Cor.* i. 7, 47), Polycarp (*ad Phil.* iii.), Ignatius (*ad Rom.* iv.), and Barnabas (c. i.) draw a clear line between themselves and their predecessors, from whom they were not separated by any lengthened intervals of time. As the need for a definite standard of Christian truth became more pressing, so was the character of those in whose writings it was to be sought more distinctly apprehended. ['The Teaching of the Twelve Apostles' (*Διδαχὴ τῶν δώδεκα ἀποστόλων*), which possibly belongs to the Apostolic or sub-Apostolic age, borrows freely from St. Matthew's Gospel, and contains language which suggests the composer's acquaintance with St. Luke and St. John. Coincidences of diction with 1 Cor., 1 Pet., and *Jude* seem very probable; those that have been claimed with Eph., 2 *Pet.*, *Apoc.*, though possible, are less likely. The phrases (c. viii. 2) *ὡς ἐκέλευσεν ὁ κύριος ἐν τῷ εὐαγγελίῳ αὐτοῦ*, (c. xi. 3) *κατὰ τὸ δόγμα τοῦ εὐαγγελίου*, (c. xv. 3, 4) *ὡς ἔχετε ἐν τῷ εὐαγγελίῳ*, deserve comparison with the words of Ignatius (*ad Phil.* 5) quoted above, and clearly presuppose acquaintance with a recognised body of Evangelic tradition. For fuller information upon this document, which was first published by Bryennius in 1883, see Harnack (*Text u. Untersuch.* 1884), and C. Taylor's *The Teaching of the Twelve Apostles*, Camb. 1889; cp. Zahn, *Gesch. d. Ntl. Kanons*, pp. 363 sq.; Salmon, *Introd. to N. T.*, pp. 601–618.]

The next period (120–170 A.D.), which may be fitly termed the age of the Apologists, carries the history of the formation of the Canon one step further. The facts of the life of Christ acquired a fresh importance in controversy with Jew and Gentile. The oral tradition, which still remained in the former age, was dying away, and a variety of written documents claimed to occupy its place. Then it was that the Canonical Gospels were definitely separated from the mass of similar narratives in virtue of their outward claims, which had remained, as it were, in abeyance during the period of tradition. The need did not create but recognised them. Without doubt and without controversy, they occupied at once the position which they have always retained as the fourfold Apostolic record of the Saviour's ministry. Other narratives remained current for some time, which were either interpolated forms of the Canonical Books (*The Gospel according to the Hebrews*, &c.), or independent traditions (*The Gospel according to the Egyptians*, &c.), and exercised more or less influence upon the form of popular quotations, and perhaps in some cases upon the text of the Canonical Gospels; but where the question of authority was raised, the four Gospels were ratified by universal consent. The testimony of JUSTIN MARTYR († c. 148 A.D.) is in this respect most important. An impartial examination of his Evangelic references, if conducted with due reference to his general manner of quotation, to possible variations of reading, and to the nature of his subject, which excluded express citations from Christian books, shows that they were derived certainly in the main, probably exclusively, from our Synoptic Gospels, and that each Gospel is distinctly recognised by him (*Dial. c. Tryph.* § 103, p. 331 D, *ἐν γὰρ τοῖς ἀπομνημονεύμασιν ἃ φημὶ ὑπὸ τῶν ἀποστόλων* [SS. Matthew, John] *αὐτοῦ καὶ τῶν ἐκείνοις παρακολουθησάντων* [SS. Mark, Luke] *συντετάχθαι* .... Cp. *Dial.* c. 49 with Matt. xvii. 13; *Dial.* c. 106 with Mark iii. 16, 17; *Dial.* c. 105 with Luke xxiii. 46). The references of Justin to St. John are less decided (cp. *Apol.* i. 61; *Dial.* 63, 123, 56, &c.; Otto, in Illgen's *Zeitschrift*, u. s. w. 1841, pp. 77 sq., 1843, pp. 34 sq.); and of the other Books of the N. T. he mentions the *Apocalypse* only by name (*Dial.* c. 81), and offers some coincidences of language with the Pauline Epistles.

The evidence of PAPIAS (*c.* 140–150 A.D.) is nearly contemporary with that of Justin, but goes back to a still earlier generation (*ὁ πρεσβύτερος ἔλεγε*). In spite of the various questions which have been raised as to the interpretation of the fragments of his 'Exposition of the Oracles of the Lord' (*Λογίων κυριακῶν ἐξή-*

[w] The titles of the disputed books of the N. T. are italicised throughout, for convenience of reference.

[x] [But see Lightfoot, 1 *Ep.* Clem. Rom. xi. (cp. 2 Pet. ii. 6–9), *Ep.* Polyc. iii. (cp. 2 Pet. iii. 15), xi. (cp. 2 Thess. i. 4, iii. 15), *Ep.* Ignat. *Eph.* x. (cp. Col. i. 23).]

[y] An exception to this statement occurs in the Ep. of Barnabas (c. iv.), where the reading of Cod. Sinaiticus, *ὡς γέγραπται*, confirming the Latin translation, "sicut scriptum est," offers the earliest example of a quotation made from the N. T. with the formula of citation from Scripture. In the Greek text of Polycarp there are no marks of direct quotation. The Latin translation, which reads (where the Greek MS. is wanting) in chap. xi. "sicut Paulus docet," and in chap. xii. "ut his scripturis dictum est," probably represents a less accurate text (cp. Westcott, *Canon of the N. T.* p. 52, 1881).

γησις) preserved by Eusebius (*H. E.* iii. 39), it seems on every account most reasonable to conclude that Papias was acquainted with our present Gospels of St. Matthew and St. Mark, the former of which he connected with an earlier Hebrew original (ἡρμήνευσε). It seems probable, though the evidence is not conclusive, that he was acquainted with the Gospel of St. John. No adverse conclusion can be drawn from Eusebius' silence as to express testimonies of Papias to the Gospel of St. John (Westcott, *Can. N. T.* p. 76 n.). One prefatory note to a 9th cent. MS. of St. John (Vatican) preserves a tradition that Papias was both "the beloved disciple of St. John" and acted as his amanuensis. The testimony, though not otherwise of much value, seems to connect Papias with the Apostle St. John. Papias was acquainted with the former Epistles of St. John and St. Peter (Euseb. *H. E.* iii. 24), and the *Apocalypse* (*Frag.* viii.).[a] [See art. PAPIAS by Salmon in *Dict. Chr. Biog.*; Bp. Lightfoot, *Essays on Sup. Relig.* chs. v. vi.]

Meanwhile the Apostolic writings were taken by various mystical teachers as the foundation of strange schemes of speculation, which are popularly confounded together under the general title of Gnosticism, whether Gentile or Jewish in their origin. In the earliest fragments of Gnostic writers which remain there are traces of the use of the Gospels of St. Matthew and St. John, and of 1 Corinthians (Ἀπόφασις μεγάλη [Simon M.] *ap.* Hippol. *adv. Haer.* vi. 16; 9, 13); and the Apocalypse was attributed by a confusion not difficult of explanation to Cerinthus (Epiph. *Haer.* li. 3). In other Gnostic (Ophite) writings a little later there are references to St. Matthew, St. Luke, St. John, Romans, 1–2 Corinthians, Galatians, Ephesians, *Hebrews*, *Apocalypse* (*Hist. of N. T. Canon*, p. 283); and the Clementine Homilies contain clear coincidences with all the Gospels (*Hom.* xix. 20, St. Mark; *Hom.* xix. 22, St. John). It is, indeed, in the fragments of a Gnostic writer, Basilides (*c.* 125 A.D.), that the writings of the N. T. are found quoted for the first time in the same manner as those of the O. T. (Basil. *ap.* Hipp. *adv. Haer.* pp. 238, γέγραπται; 240, ἡ γραφή, &c.). A Gnostic, Heracleon, was the first known commentator on the Christian Scriptures. And the history of another Gnostic, Marcion, furnishes the first distinct evidence of a Canon of the N. T. (*Hist. of N. T. Canon*, pp. 312–319). [The Diatessaron of Tatian (see *Dict. of Christ. Biog.* s. n.), the pupil of Justin Martyr, is the earliest express testimony to the existence of "a fourfold Gospel." Tatian's object (cp. the Armenian version of Ephraem the Syrian's Exposition of Tatian's Harmony, with Latin translation by Moesinger, 1876) was to produce a single connected life of our Lord drawn from the Four Gospels, and opening with John i. 1. Such an abridgment could only imply the recognised authority of the Four Gospels at a considerably earlier date.]

The need of a definite Canon must have made itself felt during the course of the Gnostic controversy. The common records of the life of Christ may be supposed to have been first fixed in the discussions with external adversaries. The standard of apostolic teaching was determined when the Church itself was rent with internal divisions. The Canon of MARCION (*c.* 140 A.D.) contained both elements, a Gospel ("The Gospel of Christ") which was a mutilated recension of St. Luke, and an "Apostle" or Apostolicon, which contained ten Epistles of St. Paul—the only true Apostle in Marcion's judgment—excluding the Pastoral Epistles, and that to the *Hebrews* (Tert. *adv. Marc.* v.; Epiph. *adv. Haer.* xlii.). The narrow limits of this Canon were a necessary consequence of Marcion's belief and position, but it offers a clear witness to the fact that apostolic *writings* were thus early regarded as a complete original rule of doctrine. Nor is there any evidence to show that he regarded the Books which he rejected as unauthentic. The conduct of other heretical teachers who professed to admit the authority of all the Apostles proves the converse; for they generally defended their tenets by forced interpretations, and not by denying the authority of the common records. And while the first traces of the recognition of the divine inspiration and collective unity of the Canon come from them, it cannot be supposed, without inverting the whole history of Christianity, that they gave a model to the Catholic Church, and did not themselves simply perpetuate the belief and custom which had grown up within it.

The close of this period of the history of the N. T. Canon is marked by the existence of two important testimonies to the N. T. as a whole. Hitherto the evidence has been in the main fragmentary and occasional; but the MURATORIAN CANON in the West, and the PESHITTO in the East, deal with the collection of Christian Scriptures as such. The first is a fragment, apparently translated from the Greek, and yet of Roman origin, mutilated both at the beginning and the end, and written, from internal evidence, about 170 A.D. It commences with a clear reference to St. Mark's Gospel, and then passes on to St. Luke as the *third*, St. John, the Acts, *thirteen* Epistles of St. Paul. The First Epistle of St. John is quoted in the text; and then afterwards it is said that "the Epistle of *Jude* and *two Epistles* of the *John* mentioned above (*superscripti:* or "which bear the name of John" *superscriptae*) are reckoned among the Catholic [Epistles] (MS. *Catholica*, i.e. Ecclesia?)." "We receive moreover the *Apocalypses* of John and Peter only, which [latter] some of our body will not have read in the Church"[a] Thus the catalogue omits of the Books received at present the *Epistle of James*, the *Epistle to the Hebrews*, and 2 *Peter*, while it notices the partial reception of the *Revelation of Peter*. The Canon of the Peshitto forms a remarkable complement to this catalogue. It includes the four Gospels and the Acts, *fourteen*

[a] A fragment of Papias' Commentary on the *Apocalypse* is preserved in the Commentary published by Cramer, *Cat. in Apoc.* p. 360, which is not noticed by Routh. [It is to be observed that Fragment xi. of Routh, which has been sometimes quoted to show Papias' acquaintance with the Gospel of St. John, proves to be the work of a Papias who lived in the 11th century. See Lightfoot's *Gal.* 1866, p. 265, note.]

[a] We have given what appears to be the meaning of the corrupt text of the passage. It would be out of place to discuss all the disputed points here; cp. *Hist. of N. T. Canon*, pp. 242 sq., and the references there given.

Epistles of St. Paul, 1 John, 1 Peter, and *James*, omitting *Jude*, 2 *Peter*, 2–3 *John*, and the *Apocalypse;* and this Canon was preserved in the Syrian Churches as long as they had an independent literature (Ebed Jesu † 1318 A.D. *ap.* Assem. *Bibl. Or.* iii. pp. 3 sq.). Up to this point, therefore, 2 *Peter* is the only Book of the N. T. which is not recognised as an apostolic and authoritative writing; and in this result the evidence from casual quotations coincides exactly with the enumeration in the two express catalogues.

2. *The History of the Canon of the N. T. from* 170 A.D. *to* 303 A.D.—The second period of the history of the Canon is marked by an entire change in the literary character of the Church. From the close of the second century Christian writers take the foremost place intellectually as well as morally; and the powerful influence of the Alexandrine Church widened the range of Catholic thought, and checked the spread of speculative heresies. From the first the common elements of the Roman and Syrian Canons, noticed in the last section, form a Canon of acknowledged Books, regarded as a whole, authoritative and inspired, and coordinate with the O. T. Each of these points is proved by the testimony of contemporary Fathers who represent the Churches of Asia Minor, Alexandria, and North Africa. IRENAEUS, who was connected by direct succession with St. John (Euseb. *H. E.* v. 20), speaks of the Scriptures as a whole, without distinction of the Old or New Testament, as "perfect, inasmuch as they were uttered by the Word of God and His Spirit" (*adv. Haer.* ii. 28, 2). "There could not be," he elsewhere argues, "more than four Gospels or fewer" (*adv. Haer.* iii. 11, 8 sq.). CLEMENT of ALEXANDRIA, again, marks "the Apostle" (ὁ ἀπόστολος, *Strom.* vii. 3, § 14; sometimes ἀπόστολοι) as a collection definite as "the Gospel," and combines them "as Scriptures of the Lord" with the Law and the Prophets (*Strom.* vi. 11, § 88) as "ratified by the authority of one Almighty power" (*Strom.* iv. 1, § 2). TERTULLIAN notices particularly the introduction of the word *Testament* for the earlier word *Instrument*, as applied to the dispensation and the record (*adv. Marc.* iv. 1), and appeals to the *New Testament*, as made up of the "Gospels" and "Apostles" (*adv. Prax.* 15). This comprehensive testimony extends to the four Gospels, the Acts, 1 Peter, 1 John, thirteen Epistles of St. Paul, and the *Apocalypse;* and, with the exception of the Apocalypse, no one of these Books was ever afterwards rejected or questioned till modern times.[b]

But this important agreement as to the principal contents of the Canon left several points still undecided. The East and West, as was seen in the last section, severally received some Books which were not universally accepted. So far the error lay in defect; but in other cases apocryphal or unapostolic books obtained a partial sanction or a popular use, before they finally passed into oblivion. Both these phenomena, however, were limited in time and range, and admit of explanation from the internal character of the Books in question. The examination of the claims of the separate writings belongs to special introductions; but the subjoined table (No. III.) will give a general idea of the extent and nature of the historic evidence which bears upon them.

This table might be much extended by the insertion of isolated testimonies of less considerable writers. Generally, however, it may be said that of the "disputed" Books of the N. T. the *Apocalypse* was received by all the writers of the period, with the single exception of Dionysius of Alexandria [and in his case it is to be observed that the *apostolic* authorship, rather than the *canonicity* of the book, is the subject of his criticism (Dion. *ap.* Euseb. *H. E.* vii. 25)]; and the *Epistle to the Hebrews*, by the Churches of Alexandria, Asia (?) and Syria, but not by those of Africa and Rome. The Epistles of *St. James* and *St. Jude*, on the other hand, were little used, and the *Second Ep. of St. Peter* was barely known.

But while the evidence for the formation of the Canon is much more copious during this period than during that which preceded, it is essentially of the same kind. It is the evidence of use and not of inquiry. The Canon was fixed in ordinary practice, and doubts were resolved by custom and not by criticism. Old feelings and beliefs were perpetuated by a living tradition; and if this habit of mind was unfavourable to the permanent solution of difficulties, it gives fresh force to the claims of the acknowledged Books, which are attested by the witness of every division of the Church (ORIGEN, CYPRIAN, METHODIUS), for it is difficult to conceive how such unanimity could have arisen except from the original weight of apostolical authority. For it will be observed that the evidence in favour of the acknowledged Books as a whole is at once clear and concordant from all sides as soon as the Christian literature is independent and considerable. The Canon preceded the literature, and was not determined by it.

3. *The History of the N. T. Canon from* A.D. 303–397.—The persecution of Diocletian was directed in a great measure against the Christian writings (Lact. *Instit.* v. 2; *de mort. persec.* 16). The influence of the Scriptures was already so great and so notorious, that the surest method of destroying the faith seemed to be the destruction of the records on which it was supported. The plan of the emperor was in part successful. Some were found who obtained protection by the surrender of the Sacred Books, and at a later time the question of the re-admission of these "traitors" (*traditores*), as they were emphatically called, created a schism in the Church. The Donatists, who maintained the sterner judgment on their crime, may be regarded as maintaining in its strictest integrity the popular judgment in Africa on the contents of the Canon of Scripture which was the occasion of the dissension; and St. Augustine allows that they held in common with the Catholics the same "Canonical Scriptures," and were alike "bound by the authority of both Testaments" (August. *c. Cresc.* i. 31, 57; *Ep.* 129, 3). The only doubt which can be raised as to the integrity of the Donatist Canon arises from the uncertain language which St. Augustine himself uses as to the Epistle to the Hebrews, which the Donatists

[b] The Manichees offer no real exception to the truth of this remark. Cp. Beausobre, *Hist. de Manich.* i. sq., 297 sq.

[1] The sign ‖ marks a verbal coincidence: * a direct quotation: ? an expression of doubt: ( ) an uncertain reference: † a clear rejection: [ ] that the evidence is suspicious, or inconclusive as to the authority assigned to the book.

may also have countenanced. But, however this may have been, the complete Canon of the N. T., as commonly received at present, was ratified at the third COUNCIL OF CARTHAGE (A.D. 397),[c] and from that time was accepted throughout the Latin Church (JEROME, INNOCENT, RUFINUS, PHILASTRIUS), though occasional doubts as to the Epistle to the Hebrews still remained[d] (Isid. Hisp. *Proem.* §§ 85–109).

Meanwhile the Syrian Churches, faithful to the conservative spirit of the East, still retained the Canon of the Peshitto. CHRYSOSTOM († 407 A.D.), THEODORE of MOPSUESTIA († 429 A.D.), and THEODORET, who represent the Church of Antioch, furnish no evidence in support of the Epistles of *Jude*, 2 *Peter*, 2–3 *John*, or the *Apocalypse*. JUNILIUS, in his account of the public teaching at Nisibis, places the Epistles of *James*, *Jude*, 2–3 *John*, 2 *Peter* in a second class, and mentions the doubts which existed in the East as to the *Apocalypse*. And though EPHREM SYRUS was acquainted with the *Apocalypse* (*Opp. Syr.* ii. p. 332 C.), yet his genuine Syrian works exhibit no habitual use of the Books which were not contained in the Syrian Canon; a fact which must throw some discredit upon the frequent quotations from them, which occur in those writings which are only preserved in a Greek translation. [The Greek writings bearing the name of Ephrem are of very doubtful origin. Many of them are clearly spurious: others have been interpolated (see Herzog, *RE.*[2] iv. 257).]

The Churches of Asia Minor seem to have occupied a mean position as to the Canon between the East and West. With the exception of the *Apocalypse*, they received generally all the Books of the N. T. as contained in the African Canon, but this is definitely excluded from the Catalogue of GREGORY of NAZIANZUS († *c.* 389 A.D.), and pronounced "spurious" (*νόθον*) on the authority of "the majority" (*οἱ πλείους*), in that of AMPHILOCHIUS (*c.* 380 A.D.), while it is passed over in silence in the Laodicene Catalogue, which, even if it has no right to its canonical position, yet belongs to the period and country with which it is commonly connected. The same Canon, with the same omission of the *Apocalypse*, is given by CYRIL of JERUSALEM († 386 A.D.); though EPIPHANIUS, who was his fellow-countryman and contemporary, confirms the Western Canon, while he notices the doubts which were entertained as to the *Apocalypse*. These doubts prevailed in the Church of Constantinople, and the *Apocalypse* does not seem to have been recognised there down to a late period, though in other respects the Constantinopolitan Canon was complete and pure (NICEPHORUS, PHOTIUS, OECUMENIUS, THEOPHYLACT, † *c.* 1077 A.D.).

The well-known Festal Letter of ATHANASIUS († 373 A.D.) bears witness to the Alexandrine Canon. This contains a clear and positive list of the Books of the N. T. as they are received at present; and the judgment of Athanasius is confirmed by the practice of his successor CYRIL.

One important Catalogue yet remains to be mentioned. After noticing in separate places the origin and use of the Gospels and Epistles, EUSEBIUS sums up in a famous passage the results of his inquiry into the evidence on the apostolic Books furnished by the writings of the three first centuries (*H. E.* iii. 25). His testimony is by no means free from difficulties, nor in all points obviously consistent, but his last statement must be used to fix the interpretation of the former and more cursory notices. In the first class of *acknowledged* Books (*ὁμολογούμενα*) he places the four Gospels, the Epistles of St. Paul (i.e. *fourteen*, *H. E.* iii. 3), 1 John, 1 Peter, and (*εἴ γε φανείη*), in case its *authenticity* is admitted (such seems to be his meaning), the *Apocalypse*. The second class of *disputed* Books (*ἀντιλεγόμενα*) he subdivides into two parts, the first consisting of such as were generally known and recognised (*γνώριμα τοῖς πολλοῖς*), including the Epistles of *James*, *Jude*, 2 *Peter*, 2–3 *John*; and the second of those which he pronounces spurious (*νόθα*), that is, which were either unauthentic or unapostolic, as the Acts of Paul, the Shepherd, the Apocalypse of Peter, the *Apocalypse* of John (if not a work of the Apostle), and according to some the Gospel according to the Hebrews. These two great classes contain all the Books which had received ecclesiastical sanction, and were in common distinguished from a third class of *heretical forgeries* (*e.g.* the Gospels of Thomas, Peter, Matthias, &c.).

One point in the testimony of Eusebius is particularly deserving of notice. The evidence in favour of the apostolic authority of 2 *Peter* which can be derived from the existing writings of the first three centuries is extremely slender; but Eusebius, who possessed more copious materials, describes it as "generally well known;" and this circumstance alone suggests the necessity of remembering that the early Catalogues rest on evidence no longer available for us. In other respects the classification of Eusebius is a fair summary of the results which follow from the examination of the extant ante-Nicene literature (see Wace and Schaff's ed. of Eus. *H. E.* [1890] in loco).

The evidence of later writers is little more than the repetition or combination of the testimonies already quoted. An examination of Table No. IV., which includes the most important *Catalogues* of the writings of the N. T., will convey a clear summary of much that has been said, and supply the most important omissions.

At the era of the Reformation the question of the N. T. Canon became again a subject of great though partial interest. The hasty decree of the Council of Trent, which affirmed the authority of all the Books commonly received, called out

[c] The enumeration of the Pauline Epistles marks the doubt which had existed as to the Hebrews: "Epistolae Pauli Apostoli xiii.; ejusdem ad Hebraeos una." In the Council of Hippo (*Can.* 36) the phrase is simply "xiv Epistles of St. Paul." Generally it may be observed that the doubt was in many, if not in most, cases as to the *authorship*, and not as to the *canonicity* of the letter. Cp. Hieron. *Ep. ad Dard.* 129, § 3.

[d] The MSS. of the Vulgate from the 6th century downwards very frequently contain the apocryphal Epistle to the Laodiceans among the Pauline Epistles, generally after the Epistle to the Colossians, but also in other places, without any mark of suspicion. See this Epistle, with apparatus criticus, printed in Bp. Lightfoot's *Colossians*, pp. 287 sq., and Westcott's *Canon of the N. T.*, Appendix E. Cp. Anger, *Der Laodicenerbrief*, Leips. 1843, pp. 142 sq. The Greek title in G (not F), προς Λαοδικησας αρχεται επιστολη, is apparently only a reproduction of the Latin title given in the Latin (*g*) of the same (Graeco-Latin) MS. *ad laudicenses incipit Epistola.*

[1] The omission of the *Apocalypse* is frequently explained by the expressed object of the Catalogue, as a list of books for public ecclesiastical use: ὅσα δεῖ βιβλία ἀναγινώσκεσθαι, compared with the former canon: ὅτι οὐ δεῖ ἰδιωτικοὺς ψαλμοὺς λέγεσθαι ἐν τῇ ἐκκλησίᾳ, κ.τ.λ. Yet cp. the Catalogue of Cyril.

[2] The Catalogue adds likewise the apostolical Constitutions (διαταγαὶ . . . ἐν ὀκτω βιβλίοις) for esoteric use. When the Catalogue was confirmed in the Quinisextine Council (Can. 2), the Constitutions were excluded on the ground of corruptions; but no notice was taken of the Epistles of Clement, both of which, as is well known, are found at the end of the Cod. Alex., and are mentioned in the index before the general summary of books; which again is followed by the titles of the Apocryphal Psalms of Solomon.

[3] He adds also "the apostolic Canons," and, according to one MS., the two Epistles of Clement.

[4] The other chief passages in Eusebius are, *H. E.* iii. 3, 24; ii. 23. His object in the passage quoted is ἀνακεφαλαιώσασθαι τὰς δηλωθείσας τῆς καινῆς διαθήκης γραφάς.

[5] The list concludes with the words, τὰ δὲ λοιπὰ πάντα ἔξω κείσθω ἐν δευτέρῳ· καὶ ὅσα μὲν ἐν ἐκκλησίᾳ μὴ ἀναγινώσκεται, ταῦτα μηδὲ κατὰ σαυτὸν ἀναγίνωσκε καθὼς ἤκουσας . . . .

[6] At the end of the list Athanasius says (cp. above), μηδεὶς τούτοις ἐπιβαλλέτω, μηδὲ τούτων ἀφαιρείσθω τι.

[7] Amphiloch. *l. c.*:—

τινὲς δὲ φασι τὴν πρὸς Ἑβραίους νόθον,
οὐκ εὖ λέγοντες· γνησία γὰρ ἡ χάρις.
εἶεν· τί λοιπόν; καθολικῶν ἐπιστολῶν
τινὲς μὲν ἕπτα φασίν, οἱ δὲ τρεῖς μόνον
χρῆναι δέχεσθαι, τὴν Ἰακώβου μίαν
μίαν δὲ Πέτρου, τὴν τ' Ἰωάννου μίαν.
τὴν δ' Ἀποκάλυψιν τὴν Ἰωάννου πάλιν
τινὲς μὲν ἐγκρίνουσιν, οἱ πλείους δέ γε
νόθον λέγουσιν. Οὗτος ἀψευδέστατος
Κανὼν ἂν εἴη τῶν θεοπνεύστων γραφῶν.

[8] This Canon, which agrees with that of the Peshitto, is fully supported by the casual evidence of the quotations which occur in Chrysostom's works. The quotation from 2 Peter, which is found in *Hom. in Joann.* 34 (33), tom. viii. p. 230 (ed. Par.), stands alone. Suidas' assertion (s. v. Ἰωάννης) that he received "the *Apocalypse* and *three Epistles of St. John*" is not supported by any other evidence.

[9] Nicephorus adds to the disputed books "the Gospel according to the Hebrews." In one MS. the *Apocalypse* of St. John is placed also among the Apocryphal books (Credner, *ut supr.* p. 122).

the opposition of controversialists, who quoted and enforced the early doubts. ERASMUS with characteristic moderation denied the apostolic origin of the *Epistle to the Hebrews*, 2 *Peter*, and the *Apocalypse*, but left their canonical authority unquestioned (*Praef. ad Antilegom.*). LUTHER, on the other hand, with bold self-reliance, created a purely subjective standard for the canonicity of the Scriptures in the character of their "teaching of Christ;" and while he placed the Gospel and First Epistle of St. John, the Epistles of St. Paul to the Romans, Galatians, Ephesians, and the First Epistle of St. Peter, in the first rank as containing the "kernel of Christianity," he set aside the *Epistle to the Hebrews*, *St. Jude*, *St. James*, and the *Apocalypse*, at the end of his Version, and spoke of them and the remaining Antilegomena with varying degrees of disrespect, though he did not separate 2 *Peter* and 2–3 *John* from the other Epistles (cp. Landerer, art. *Kanon* in Herzog, *RE.*[1] pp. 295 sq., and Romberg, *Die Lehre Luther's von der hl. Schrift*, 1867). The doubts which Luther rested mainly on internal evidence were variously extended by some of his followers (MELANCHTHON, *Centur. Magdeb.*, FLACIUS, GERHARD: cp. Reuss, § 334); and especially with a polemical aim against the Romish Church by CHEMNITZ (*Exam. Conc. Trid.* i. 73). But while the tendency of the Lutheran writers was to place the Antilegomena on a lower stage of authority, their views received no direct sanction in any of the Lutheran symbolic books which admit the "prophetic and apostolic writings of the Old and New Testaments," as a whole, without further classification or detail. The doubts as to the Antilegomena of the N. T. were not confined to the Lutherans. CARLSTADT, who was originally a friend of Luther and afterwards professor at Zürich, endeavoured to bring back the question to a critical discussion of evidence, and placed the Antilegomena in a third class "on account of the controversy as to the books, or rather (*ut certius loquar*) as to their authors" (*De Con. Script.* pp. 410–12, ed. Credn.). CALVIN, while he denied the Pauline authorship of the *Epistle to the Hebrews*, and at least questioned the authenticity of 2 *Peter*, did not set aside their canonicity (*Praef. ad Hebr.*; *ad* 2 *Petr.*); and he notices the doubts as to *St. James* and *St. Jude* only to dismiss them.

The language of the Articles of the Church of England with regard to the N. T. is remarkable. In the Articles of 1552 no list of the Books of Scripture is given; but in the Elizabethan Articles (1562, 1571) a definition of Holy Scripture is given as "the Canonical Books of the Old and New Testament, *of whose authority was never any doubt in the Church*" (Art. vi.) This definition is followed by an enumeration of the Books of the O. T. and of the Apocrypha; and then it is said summarily, without a detailed catalogue, "all the Books of the N. T., as they are commonly received, we do receive and account them for Canonical (*pro Canonicis habemus*)." A distinction thus remains between the "Canonical" Books and such "Canonical Books as have never been doubted in the Church;" and it seems impossible to avoid the conclusion that the framers of the Articles intended to leave a freedom of judgment on a point on which the greatest of the continental Reformers, and even of Romish scholars (Sixtus Sen. *Biblioth. S.* ii. 1; Cajetan, *Praef. ad Epp. ad Hebr.*, *Jac.*, 2–3 *John*, *Jud.*), were divided. The omission cannot have arisen solely from the fact that the Article in question was framed with reference to the Church of Rome, with which the Church of England was agreed on the N. T. Canon; for all the other Protestant confessions which contain any list of Books, give a list of the Books of the New as well as of the Old Testament (*Conf. Belg.* 4; *Conf. Gall.* 3; *Conf. Fid.* 1). But if this licence is rightly conceded by the Anglican Articles, the great writers of the Church of England have not availed themselves of it. The early commentators on the Articles take little (Burnet) or no notice (Beveridge) of the doubts as to the Antilegomena; and the chief controversialists of the Reformation accepted the full Canon with emphatic avowal (Whitaker, *Disp. on Scripture*, cxiv. p. 105; Fulke's *Defence of Eng. Trans.*, p. 8; Jewel, *Defence of Apol.* ii. 9, 1).

The judgment of the Greek Church in the case of the O. T. was seen to be little more than a reflection of the opinion of the West. The difference between the Roman and Reformed Churches on the N. T. was less marked; and the two conflicting Greek confessions confirm in general terms, without any distinct enumeration of Books, the popular Canon of the N. T. (*Cyr. Luc. Conf.* i. p. 42; *Dosith. Confess.* i. p. 467). The confession of METROPHANES gives a complete list of the Books; and compares their number—thirty-three—with the years of the Saviour's life, that "not even the number of the Sacred Books might be devoid of a divine mystery" (Metroph. *Critop. Conf.* ii. 105, ed. Kimm. et Weissenb.). At present, as was already the case at the close of the 17th cent. (Leo Allatius, *ap.* Fabric. *Bibl. Graec.* v. App. p. 38), the Antilegomena are reckoned by the Greek Church as equal in Canonical authority in all respects with the remaining Books (*Catechism, l. c.* supr.).

The assaults which have been made, especially

NOTES TO TABLE No. IV.—*continued.*

[10] This catalogue, which excludes the *Epistle to the Hebrews* and the *Apocalypse* ("statutum est nihil aliud legi in ecclesia debere catholica nisi . . . . et Pauli *tredecim* epistolas et septem alias . . . ."), is followed by a section in which Philastrius speaks of "other [heretics] who assert that the *Epistle to the Hebrews* is not Paul's" (*Haer.* 89). And in another place (*Haer.* 60) he reckons it as heresy to deny the authenticity of the Gospel and *Apocalypse* of St. John. The different statements seem to be the result of careless compilation.

[11] This catalogue is described as "secundum antiquam translationem," and stands parallel with those of Jerome and Augustine. The enumeration of the Catholic Epistles is somewhat ambiguous, but I believe that it includes only three Epistles: Epistolae Petri ad gentes, *Jacobi*, Johannis ad Parthos. The insertion of *Judae* after *gentes* seems to have been a typographical error, for the present writer has not found the reading in any one of four MSS. which he has examined.

[12] In another place (*De eccles. Offic.* i. 12) Isidore mentions without condemning the doubts which existed as to the *Epistle to the Hebrews*, *James*, 2–3 *John*, 2 *Peter*, but not as to *Jude*.

during the present century, upon the authenticity of the separate Books of the Old and New Testaments belong to the special articles. The general course which they have taken is simple and natural. Semler (*Untersuch. d. Kan.* 1771–5) first led the way towards the later subjective criticism, though he rightly connected the formation of the Canon with the formation of the Catholic Church, but without any clear recognition of the providential power which wrought in both. Next followed a series of special essays in which the several Books were discussed individually with little regard to the place which they occupy in the whole collection (Schleiermacher, Bretschneider, De Wette, &c.). At last an ideal view of the early history of Christianity was used as the standard by which the Books were to be tried, and the Books were regarded as results of typical forms of doctrine and not the sources of them (F. C. Baur, Schwegler, Zeller). All true sense of historic evidence was thus lost. The growth of the Church was left without explanation, and the original relations and organic unity of the N. T. were disregarded.

For the later period of the history of the N. T. Canon, from the close of the 2nd century, the great work of Lardner (*Credibility of the Gospel History*, Works i.—vi., ed. Kippis, 1788) furnishes ample and trustworthy materials. For the earlier period his criticism is necessarily imperfect, and requires to be combined with the results of later inquiries. Kirchhofer's collection of the original passages which bear on the history of the Canon (*Quellensammlung, u. s. w.*, Zürich, 1844) is useful and fairly complete, but frequently inaccurate. The writings of F. C. Baur and his followers often contain very valuable hints as to the characteristics of the several Books in relation to later teaching, however perverse their conclusions may be. In opposition to them Thiersch has vindicated, perhaps with an excess of zeal, but yet in the main rightly, the position of the apostolic writings in relation to the first age (*Versuch zur Herstellung, u. s. w.*, Erlangen, 1845; and *Erwiederung, u. s. w.*, Erlang., 1846). The section of Reuss on the subject (*Die Gesch. d. heil. Schriften N. T.*, 2te Aufl., Braunschw. 1853), the articles on "the Canon" by Landerer (Herzog, *RE.*[1] s. v.), Holtzmann (Schenkel's *Bib. Lex.* 1871), Wold-Schmidt (Herzog, *RE.*[2] 1880), contain valuable summaries of the evidence. Other references and a fuller discussion of the chief points are given by the author of this article in *On the Canon of the N. T.*, 5th ed., London, 1881.

To the above authorities should be added Credner, *Gesch. d. Ntl. Kanons*, ed. G. Volkmar, Berlin, 1860; Hilgenfeld, *Der Kanon u. d. Kritik d. N. T.*, Halle, 1863; S. Davidson's *Canon of the Bible*, Lond. 1877; Sanday, *Authorship of the Fourth Gospel*, Lond. 1872, and *Gospels in the Second Cent.* Lond. 1876; Charteris, *Canonicity*, Edinburgh, 1880; Ed. Reuss, *Hist. of the Canon of the Holy Scriptures in the Christian Church*, translated, Edinburgh, 1884; Salmon's *Introd. to the N. T.*, Lond. 1886; Bp. Lightfoot's *Essays on Supernat. Religion*, Lond. 1889; Zahn, *Gesch. d. Ntl. Kanons*, Leipzig, 1ter Bnd., 1te Hälfte, 1888, 2ter Bnd. 1889. [B. F. W.] [R.]

CANOPY (κωνωπεῖον; *conopeum*; Judith x. 21, xiii. 9, xvi. 19). The canopy of Holofernes is the only one mentioned, although, perhaps, from the "pillars" of the litter [BED] described in Cant: iii. 10, it may be argued that its equipage would include a canopy. It probably retained the mosquito nets or curtains in which the name originated, although its description (Judith x. 21) betrays luxury and display rather than such simple usefulness. Varro (*R. R.* ii. 10, 8) uses *quae in conopeis jacent* of languid women very much as ἀναπανόμενος . . . ἐν τῷ κωνωπείῳ (*l. c.*) describes the position of a luxurious general (for further classical illustration, see *Dict. of Gk. and Rom. Ant.*, art. CONOPEUM). It might possibly be asked, Why Judith, whose business was to escape without delay, should have taken the trouble to pull down the canopy on the body of Holofernes? Probably it was an instance of the Hebrew notion that blood should be instantly covered (cp. 2 Sam. xx. 12; Lev. xvii. 13) [BLOOD]; and for this purpose the light bedding of Syria was inadequate. [BED.] Tent furniture also is naturally lighter, even when most luxurious, than that of a palace; and thus a woman's hand might unfix it from the pillars without much difficulty. Another view which takes the κωνωπεῖον to mean strictly the mosquito-net itself (see *Speaker's Comm.* on Judith xi. 21) would make the act a simple and easy one. She simply took the gorgeous (x. 21) mosquito-net from the pillars as a trophy. This bed with its canopy is represented as assigned specially from among the spoil to Judith, and by her dedicated (Judith xvi. 19). [H. H.]

CANTICLES (or THE SONG OF SOLOMON).

1. *Title.*—In the Hebrew this remarkable work is described as שיר השירים אשר לשלמה, that is, "the most lovely song of Solomon." Whether the title implies that the song was written by Solomon, or that it only refers to him, is a matter of small importance, for the most superficial acquaintance with the history of the titles of the Psalms and other Books of the Old Testament is sufficient to indicate the lateness of the tradition which they contain. In the three principal Versions of the Canticles —namely, the Septuagint, Vulgate, and Syriac— the titles are respectively Ἆσμα ἀσμάτων ὅ ἐστι Σαλωμών, Canticum Canticorum Salamonis, ܫܝܪܬܐ ܕܫܝܪܝܢ ܕܠܫܠܡܘܢ, that is, "The Wisdom of Wisdoms of Solomon, the book which is called in Hebrew Song of Songs, or the Hymn of Hymns." This last title is written as it appears in the printed copies of the Syriac Old Testament, but the manuscripts present certain variations, among which may be specially noticed that which is found in the facsimile of the Ambrosian Codex recently published by M. Ceriani, where it stands ܫܝܪܬܐ ܕܫܝܪܝܢ ܕܗܝ ܫܒܚܬܐ ܕܫܠܡܘܢ, that is, "The Hymns

of Hymns of Solomon, son of David, the king of Israel; that is, the Songs of Songs which is called in Hebrew 'Sharath Sharin.'" From the arbitrary character of the variations in the Syriac texts we may infer that the first verse as it stands in the Hebrew and the Septuagint was regarded by the venerable Syrian translator as a title (as it is by the Vulgate), and that the translators and copyists allowed themselves considerable latitude in expressing their own theories about the origin of the Book, as they did with regard to the titles of the Psalms. The Targum on Canticles being a very diffuse allegorical paraphrase, and of late authorship, is not of the same critical value here as it is in the Pentateuch and Prophets. The title however, as usually printed, is as follows: שירין ותושבחון די אמר שלמה נביא מלכא דישראל ברוח נבואה קדם ריבון כל עלמא יהוה. From these passages it appears that the principal Versions regarded the first verse to imply that Solomon himself was the author of the work.

2. *Language and Diction.*—A careful analysis of the language and diction of the work is most disappointing. However, the following results may be obtained:—A large number of words occur in Canticles which are ἅπαξ λεγόμενα. As many of these will be required for another purpose in § 38 below, those only are here given which are not cited there. The total number of these words is between fifty and sixty, so that the first phenomenon that we have to deal with is the remarkable fact that in a work consisting of 117 short verses, no less than fifty or sixty ἅπαξ λεγόμενα occur, or, in other words, that in every third verse at least we may expect to find a word that does not occur elsewhere in the whole range of Biblical Hebrew. Perhaps this may be accounted for by the fact that Canticles is the only specimen of dramatic or idyllic Hebrew poetry that remains to us, and perhaps the peculiarity of the circumstances and persons who form the subject of the book may give some reason for the singular language which is employed. But let it be remembered that the mere presence of the ἅπαξ λεγόμενα proves nothing whatever as to the date of the Book.

3. We might expect considerable assistance in explaining this phenomenon by comparing the words used in Canticles with those which are employed by Hebrew writers whose age has been ascertained, or is at least regarded by many as well known. But here we are startled at the frequency with which words occur, that are generally supposed to be characteristic either of the earliest or of the latest period of the Hebrew language. Of the rare words (not ἅπαξ λεγόμενα) which occur in it, some are to be found elsewhere only in the Book of Job, as, for instance, קפץ, רפד, שוף, לבב (in sense of leaping), אבים, עשת, or in Proverbs as, ערב, נשיקות, or in Proverbs and Psalms as, נאוה, or in Psalms and Isaiah as, חמה, ארה, נפת (perhaps Job also). השׂגיח. Then the rare words עלף and דודאים are elsewhere found in Genesis only, while such words as, רקה, צמה, תימרות remind us of Joel, Isaiah, and Judges respectively. Meanwhile such words as שׁשׁ (marble), מדרנה, מנעול, ערוגות, פרדס occur only in late Hebrew (that is, if Ecclesiastes, like Ezekiel, Nehemiah, and Esther is late). Turn where we will, we have to face the fact that for every late word that we can allege, another can be adduced on the other side which is early. The absence of ו consecutive except in vi. 9 may perhaps be taken as a mark of late date; or the universal presence of ש shortened from אשר may be adduced as indicating late authorship; but the latter is now generally acknowledged to be a dialectic peculiarity. May not the peculiar dialect of the work perhaps account for the absence of ו consecutive?

4. Dr. Graetz produces certain Greek words which in his opinion bring the composition of the Book down to the Macedonian period. The instances that he takes are מזג, כפר, תלפיות, אפריון, which he identifies with *μισγεῖν*, *κύπρος*, *τηλῶπις*, *φορεῖον*. The well-known preposition עם he identifies with *ἅμα*, while in iv. 13, 14 he alters the second נרדים into ורדים, so as to obtain another Greek word, which he assumes to be *ῥόδον*.* Dismissing this as purely conjectural, and remembering the speakers who use the words אפריון and מזג (see § 38), we may observe that D. Kimchi (*Sepḥ. Shor.* p. 596) found no difficulty in explaining אפריון; and מזג, though ἅπαξ λεγόμενον in Hebrew, is known to us in the forms סאון and מזיג, and is perhaps only a dialectic variation of מסך. In the case of *κύπρος* it should be noticed that the article itself was foreign, and that the name may have travelled with it, so that the presence of כפר as a Hebrew word need not astonish us any more than the English use of Otto, Elixir, Dragoman, and others. Dr. Graetz's seventh word דנול is certainly "without analogy" in Hebrew, but it is a bold step to infer at once that it is a Graecism, and = *σημειωτός*, founded on the basis of דגל = *σημεῖον*.

5. But it might be expected that if language alone does not enable us to decide the age of the Book, the ideas contained in it will help us to some considerable extent. Let it be remembered, however, that we know very little of the ideas and habits of the Hebrew people which would characterise them at one period more than another. How could we do so, when the records of them from the earliest times till perhaps the century before Christ are so very sparse, and even these were not written with a view of giving a chronicle, still less a history, of Israel? In all cases when we construct our histories of Israel a vast amount of the matter must be purely conjectural. The simplest proof of this is to be found in the variations that may be noticed in all the principal modern histories of Israel that have been written.

6. Dr. Graetz, however, in his instructive Commentary, discovers various signs of Greek modes of life to which he finds references in the Canticles. Such are (1) the use of the litter (אפריון), and he cites passages from Athenaeus

* The word ורך, it is true, is common in Syriac, Chaldee, and Arabic, but does not occur in Biblical Hebrew.

and Polybius to prove that the φορεῖον was used at Athens in the time of the tyrant Aristion or Athenion, and by Antiochus Epiphanes at Alexandria (Polyb. xxxi. 3). But luxurious habits crept in among the Jewish people during their periods of greatest prosperity, such as the reigns of Solomon or Uzziah (see Is. i.–ix.). (2) Whether the early Jewish court was in the habit of sitting or lying down at meals is almost as difficult a problem to solve as the meaning of the word מסב (i. 12), upon which Dr. Graetz bases his argument that here we have a reference to the Triclinium. (3) The point about the bride and bridegroom, which of them wore the crown, is very obscure. The word for crown here is עטרה, and in the only other passage where the word occurs it refers to the royal and not the bridal crown. Nor does the more frequent word עטרת ever mean the bridal crown, unless Ezek. xxiii. 42 be pressed, and here the prophet refers to Sabean and not to Israelite customs. The verb עטר is used in all other passages where it occurs in a metaphorical sense. It is doubtful how far any references to Jer. ii. 2 or Is. lxi. 10 are really of any value with regard to the point raised on this passage. (4) The institution of police (iii. 3, v. 7, השמרים הסובבים בעיר) is considered by Dr. Graetz as indicating the Macedonian times, because then the περίπολοι were introduced into Greece. But the early history of police both in Greece and Rome is a very obscure point. Perhaps they may have existed at an early period. And, after all, does what took place in Greece bear very much upon what occurred in Palestine? If men like Solomon, Ahaz, and Hezekiah were advanced enough in civilization to make arrangements with regard to the water supply of Jerusalem (a subject which is not yet perfectly understood even in our own country), may it be beyond the region of possibility to suppose that some precautions were taken by them and their successors for preserving the public peace? (5) Marble pillars are first mentioned in Esth. i. 6 and 1 Ch. xxix. 2. (6) The תפוחים (ii. 3, 5) are the Symbolic Greek μῆλα. (7) The βέλη ἔρωτος are to be found in רשפיה רשפי אש (viii. 6). It may be questioned whether anything definite would be proved even if the assumptions in the last three numbers were correct. It is true that cedar was the favourite ornamental material employed by the Hebrews, but marble may have been used without difficulty in a period when commerce was extended. The references to the Symbolic apples and the darts of love appear to us to be far-fetched and irrelevant. We shall presently return to this subject, and point out certain ideas which appear to us to exhibit the only period which indicates the historic background of the work.

7. *Form of the Book.*—As we have observed above (§ 2), the form of this work is unique in the Holy Scriptures. Even to an English reader it is apparent that we are here brought face to face with a short work written in an idyllic and dramatic form. We are far from suggesting that the composition was actually intended for stage representation. Probably M. Renan is correct (p. 80) when he states that in all the Jewish history till the time of Herod, there is no trace of a theatre at Jerusalem, not even at the times when the habits of the city were most profane. When we say that the form is dramatic, we mean that the same form is to be noticed here which is met with in Psalm xxiv. and Isaiah lxiii. The style is idyllic as well as dramatic, because it deals with the subjects of rural life. It is more highly dramatic than Psalm xxiv. and Isaiah lxiii. because more characters are introduced, and the dialogue is carried out to a greater extent. This, in fact, gives to Canticles the unique position which it occupies in the Canonical Books.

8. The dramatic character, we noticed, is obvious to any English reader who observes that (1) certain phrases constantly recur, e.g. "I charge you . . . that ye stir not up . . . love till she pleases," ii. 7, iii. 5 (cp. v. 8), viii. 4; or again the questions "Who is this," &c., repeated iii. 6, vi. 10, viii. 5, which seem to mark certain leading divisions in the Book, where a chorus or a choragus is brought before the reader's notice, indicating to him the exact position of affairs at the peculiar juncture. (2) A dialogue is carried on sometimes between two individuals, as i. 9–ii. 7, where it is obvious from ii. 2, 3, that the two principal characters are male and female. See also iv. 1–v. 1, where again it is obvious that the hero and heroine of the drama are brought before us (cp. vii. 6–viii. 3). (3) Sometimes again the dialogue is between a chorus and one of the principal characters. Such is the case in i. 1–8, and more distinctly so in v. 9–vi. 3, vi. 10–vii. 5.

9. To anyone, however, who is slightly acquainted with Hebrew, this is quite apparent from the prefixes and suffixes of the verbs and nouns which indicate the gender of the speaker or the person addressed. Thus it is obvious that i. 9, 15 is spoken to a female and i. 16 to a male. These passages will enable the reader to discover which character is speaking at almost any time. For it will be noticed that the words "my love," "my beloved," which constantly recur throughout the work, indicate the language of the hero and the heroine respectively. Thus "my love" (רעיתי) occurs ii. 2, iv. 1, 7, vi. 4, in the mouth of the male, and in ii. 10, 13, v. 2, where, with marvellous knowledge of human nature, the author makes the heroine quote her lover's language and the favourite epithets by which he designates her. On the other hand, she always speaks of the hero as her beloved (דוד), *e.g.* ii. 3 and nearly twenty other places, or else as "he whom my soul loveth" (שאהבה נפשי), as i. 7, iii. 1–4.

10. But while the heroine has two epithets which she applies to her beloved, it appears that he has a term of endearment which in one peculiar section of the Book, and there only, he applies to her who has become his bride. This is the phrase "My sister, my bride" (אחותי כלה), iv. 9–12, v. 1, or "bride," iv. 8, 11, while on one occasion the bride puts into his mouth the word my "sister" when she imagines him to be addressing her. These facts are sufficient to bring with some clearness the general outlines of the dialogue before the English reader.

11. There are passages, however, where it is not so easy to distinguish the *dramatis personae* of the dialogue. These are iii. 1–5, v. 1–7,

viii. 5–14. The best sense is given by ascribing the first two passages to a Chorus of Virgins (who are called Daughters of Jerusalem), who are constantly in the background while the heroine is narrating her dream, and by supposing that at the end of her narrative she addresses the chorus who, in v. 9, reply to her and join with her in the search for the beloved. In viii. 5–14, especially in *v.* 9, one or more new characters are introduced who have been generally identified with the brother or brothers of the bride.

12. We are now in a position at which we can discover the names of the principal characters. The hero is Solomon, though the bride only once addresses him by name, *i.e.* viii. 12. Others mention him as a character in the drama, as iii. 7, 9, 11; viii. 11. The heroine is not known to us by name: she is once indeed mentioned as "The Shulamite," vi. 13; but it will not be inconvenient to call her Sulamith, a name to which she may be entitled after the labours of Delitzsch, Noack, and many others.

13. The following is a brief outline of the plot of the drama. The scene opens at the royal palace in Jerusalem (iv. 8 is no obstacle to this view). All that art can lend to promote luxury and magnificence is presented to us. "The three score queens" (vi. 8) are present, singing the praises of king Solomon, and the æstheticism of his court. Meanwhile there was standing among them a girl of dark complexion (i. 5, 6), plainly dressed (i. 11), who is looked upon with considerable contempt by the queens (i. 6), and can only obtain a sneering answer (i. 8) to a simple question (i. 7) which the love and imagination of a simple rustic heart dictated. This is Sulamith, a native of Northern Palestine, as her language and ideas lead us to infer. Her father is dead, it appears, for she only mentions her mother (i. 6, viii. 2), a little sister (viii. 8), and her brothers (to whom probably the language in viii. 9 is ascribed), of whom she complains that they had not been quite kind in their treatment of her (i. 6) during her youth.

14. While the poor girl is in tears at the rebuff which her simplicity has received, Solomon is supposed to enter (i. 9). It will be readily seen that the dialogue between him and Sulamith is continued up to ii. 5, where she appears to be so carried away by the intensity of her feelings, as to faint with emotion, and to be able only to murmur a few words (ii. 6) as Solomon gently lays her down in a place of rest. The Chorus of Virgins (ii. 7) addressing the Queens, and charging them not to disturb Sulamith's repose, brings the first scene to a close.

15. The second scene (ii. 8–iii. 5) is most easily understood by supposing Sulamith to continue in the state of trance to which she had been brought in the former scene. None but the Chorus of Virgins are present, and they move in the background as far as possible. Sulamith fancies herself at home, and though surrounded, as she is, by all the pomp and glory of Solomon, yet imagines herself to be with him at her country home. It is to be noted (as we observed above, § 9) that she puts Solomon's favourite expressions into his mouth—"my love," "my fair one," "my dove." These, and the words "in our land" (ii. 12), are sufficient to show that she fancied that imagination only had carried her into Jerusalem. The language of the chorus (iii. 5) is in itself sufficient to show that the actual scene is not laid in North Palestine. But as to Sulamith, so convinced is she of the reality of her old home being present to her, that she actually breaks out into one of the local vintagers' songs (ii. 15), which she had sung when placed as a child by her brothers to watch (i. 6) the vineyards. It must be observed that the Beloved is never absent from her thoughts. The tune and words of her charming Spring-song (ii. 15) bring back the thoughts of him, and half awake half asleep she fancies at one time that he is lost (iii. 1), at another that he is found again (iii. 4). But in her *fancy* it is to her mother's cottage that she brings him (iii. 4).

16. The third scene represents to us the first arrival of Sulamith at Jerusalem, an event which of course had preceded what was narrated in the two previous scenes. Such a dislocation of the action might be considered sufficient to upset the dramatical hypothesis which we adopt, but it must be remembered that this is the only piece of Hebrew poetry which we have of the sort, and that it is unscientific to apply to it the principles of dramatic criticism which we have derived from studying ancient and modern European plays. All that we have a right to infer is that the order of events was as much neglected in the Hebrew drama as it was in Hebrew history. In the latter, the chronological order of events gives way to the importance of them as seen from the writer's point of view. The order is one of subject-matter, or of magnitude, rather than of time. Similarly in this drama. The starting-point of it is that Sulamith is at Jerusalem. How she was brought to Jerusalem was a point of minor importance reserved for the third scene.

17. In iii. 6–v. 1 we are first introduced to a large crowd in Jerusalem, standing at some point whence they could observe the approach of the royal palanquin as it drew near by the road that came from the north. One speaker from the crowd (iii. 6) observes the clouds of incense which thickened the air around the king and his bride. A second (vv. 7, 8) notices the palanquin and the guard of mighty men which moved alongside of it. A third (vv. 9, 10) remarks upon the beauty of the carriage itself, and the presents that had been made by the Daughters of Jerusalem. Suddenly a fourth voice — probably that of a herald — announces the near approach of the royal train, and calls upon the daughters of Zion to go forth and meet their king. At iv. 1 we must suppose that Solomon and Sulamith have entered the palace. In iv. 1–5, 7–15, he speaks of her praises, while in *vv.* 6, 16 she appears to deprecate his flattery, and to confess her unworthiness of being honoured with such particular marks of the favour of one who was so great and so noble. This is the only way in which the two verses spoken by Sulamith can be explained, when read in their connexion with the words of Solomon which immediately follow. And by this time we must suppose that the marriage procession has entered into the banqueting hall. The king enters with his bride, and calls upon the guests (v. 1) to partake of the marriage feast. It is in this scene only that Solomon addresses Sulamith

as his "sister bride," or "his bride." Nor should it be forgotten that in this scene alone we read of Solomon's invitation to her to exchange her residence in the north for one at Jerusalem.

18. The fourth scene extends from v. 2 to vi. 9. It appears that Sulamith is represented here, as in scene 2, to be in a state of trance (*v.* 2), and in her half-conscious condition to have imagined that she had rejected her Beloved's proffered love for the sake of avoiding a slight personal inconvenience (*v.* 3). She soon regretted what she had done: she sought her Beloved, and called for him, but it was all in vain. She found him not; he gave no answer. She describes the troubles which she endured as she went in search of him, and calls upon the queens, who stood around her, to aid her in her search for the Beloved. She describes him to them (*vv.* 10–16) in language so vivid and so plaintive, that the queens promise "to seek him with her." She has almost relapsed into her former state of unconsciousness (vi. 2, 3) when (*vv.* 4–9) the Beloved is found. These are the last words in the poem that are ascribed to Solomon (except vii. 6–9 a, and the very ambiguous passage, viii. 5 b, viii. 13), and in them must be noted the solemn manner (*vv.* 8, 9) in which the king renounces the splendour and sensuality of his court, and professes himself to be contented for the future with the love of the one whom he addresses as "his dove, the undefiled one, the only one of her mother."

19. If the scene which we have just considered is of great importance in its bearing upon the interpretation of the work, the fifth scene is certainly of equal weight. The conversion of Solomon has been hitherto represented as being effected by the means of Sulamith. We now find that the queens who in i. 6 had treated her with scorn, and in i. 8 had ironically called her the "fairest among women," היפה בנשים, are gradually becoming lost in their admiration of her. In v. 9, vi. 1, they use in earnest the same title which they had applied to her with bitter sarcasm in the first scene: while in vi. 10, 13 a, 13 c–vii. 5, they hardly know how to find words to express their admiration of her: and, finally (vii. 1), they address her as the "prince's daughter," בת נדיב. They appear to be included in Sulamith's invitation (vii. 11), and give up their court life for the sake of the joys of the country. Thus the great curse of Solomon's court (1 K. xi. 1–8) has been removed through the simplicity and deep spirituality of the rustic Sulamith, which has won over the king and his great ladies. As the scene approaches to a conclusion Sulamith is once again introduced, expressing her burning love for Solomon, and begging him to return with her to her own home (vii. 9 b–viii. 3). The end of the scene is marked by the address of the Chorus of Virgins to the Daughters of Jerusalem, which has already been noticed.

20. The last scene opens in North Palestine. The Chorus and Daughters of Jerusalem are within the courtyard of the residence of Sulamith's mother at Shunem (the place described ii. 9), and they see the Bride and her Beloved approaching (viii. 5 a). Solomon points out the places which he could associate with different facts in Sulamith's history, — the apple-tree where he first told her of his love, and the cottage where she was born.[b] She replies to him (*vv.* 6, 7) in language which shows the intense depth of her spiritual perceptions. In *v.* 8 she mentions her sister, trusting that something will be done for her, and is answered with rustic rudeness by her brothers (*v.* 9), that they will take sufficient care of her. Sulamith replies (*v.* 10) enigmatically, and gently reproves her brothers for their former neglect of herself, implying that she had always been her own protectress. In *vv.* 11, 12, she recommends her brothers to Solomon for some mark of his favour, and apparently desires that they may be appointed keepers of his vineyards. The words (viii. 13) are probably the language of Solomon asking her to sing. She complies with the request, and in the last verse of the Book expresses a hope that he will spend his life upon the mountains. Thus the end of the story appears to be that Solomon and all his court retire to the country, and that they are perfectly happy in the enjoyment of the sweet air, and in the contemplation of the objects of nature.

21. *Interpretation.*—A key to the interpretation of the Book is to be found, we believe, in what has been said respecting the form of it. It appears that the object of the Song of Solomon is to depict the conversion of that monarch and his corrupt court through the influence of the simple-minded but profound Sulamith. The prophetic author desired to divert the mind of Solomon from sensual and anti-theocratic opinions, by leading him to rustic pursuits, in which his gigantic intellect would find ample scope for self-development.

22. This view is rendered more probable by an examination of the progress which may be discovered in the different *dramatis personae*. We have already noticed the change which takes place in the "Daughters of Jerusalem." At the commencement of the drama their language was sensuous. They were perfectly ignorant of the fact that the king was the shepherd of his people, and mocked Sulamith (i. 8) for her simplicity in supposing that there was no other profession in life except that of a shepherd. At last, however (vi. 11, &c.), we observe that they had a real admiration for Sulamith, and offered their assistance to her as she started in pursuit of her lost Beloved.

23. In Solomon himself we can notice a great development of character. We can observe this even in the language which he uses when addressing Sulamith. At first he calls her simply "my love" (רעיתי; cp. Revised Version); and this appellation is used by him during the addresses which are put in his mouth from i. 9 to iv. 5. The word, however, means no more than "friend" (LXX. ἡ πλησίον μου, Vulg. *proxima mea*, Syr. ܩܪܝܒܬܝ), and conveys no such impression as the colloquial English phrase "my love." However, suddenly, at iv. 9, she becomes "the Sister, the Spouse," and Solomon becomes conscious of the higher relation in which Sulamith stands to him; and though,

[b] It must be remarked that the Masoretic vowels suppose a man to be addressed, but how the words can be understood if uttered by Sulamith has never been explained. We have read עזרתיך, &c., with the Syriac Version and Delitzsch.

once again, vi. 4, she becomes "his love," yet in vii. 6 he is forced to find a new name for her, "O love for delights" (אהבה בתענוגים), so completely does he fail to find any words to express the marvellous influence which she had acquired over him.

24. Nor is it merely in the names which he applies to Sulamith that we discover this remarkably artistic change in the description of Solomon's feelings; the very language which he uses towards her exhibits the change of his views, and his gradual appreciation of her charms. For it will be observed that the language which he uses when first he begins to sing her praises is almost, if not decidedly, sensuous (see especially i. 9–11, 15; iv. 1–5). The change is to be noticed in the scene which extends from iii. 6 to v. 1. Here, and especially in iv. 7–15, the intellectual qualities of Sulamith appear to be the special objects of his praise. The king is gradually catching her spirit, and we find, as the story progresses, that he is simply overcome, he can say nothing, he is utterly bewildered at his bride's glowing character. Accordingly, in his subsequent speech (vii. 7–10 a) he is unable to find words to express his wonder at her charms. This indeed is a point which has been too much overlooked, but yet it appears to have a very important position in enabling us to understand the meaning of the work.

25. It appears that there is a development in the character of Sulamith as well. The girl is evidently aware of her humble position when she makes her first appearance (see i. 5, 7, 12). Though surrounded with the glory of Solomon's court, she appears to be uninfluenced by what she sees around her. She is quite content to remain as she was brought up, amidst all the beauties of nature (i. 16, 17). But it is amazing to see how conscious she is of the greatness of Solomon. She is simply stricken to the earth; she faints and withers before his majesty. There can be no doubt that this is the result of design on the part of the author, and that some key to the interpretation of the work is to be found in that sense of unworthiness which Sulamith so frequently professes.

26. During the second scene Sulamith and the Chorus are alone brought before the reader, and it would be unreasonable to expect in it any special signs of development of character. But we cannot fail to notice the remarkable way in which she cites the words and the language of the Beloved (ii. 10 b–14), to notice her thoughts of home (ii. 12), and to see how she recurs to the happy home which she hopes to enjoy with him, as she sings the Spring-song (ii. 15); and in ii. 16 reverts to her old idea that everybody who has anything to do must be a shepherd, because she knows no higher occupation in life than that.

27. In the next scene we notice nothing but increased love for the Beloved, and a reference to the "mother," which points again to Sulamith's longing for home. This scene is very interesting, indicating, as it does, the humble attitude which Sulamith always bears to Solomon. She is introduced to our notice only for a short while; and it appears that the words iv. 6, 16 are in each case references to her own unworthiness to receive the Beloved, or to the preparation which her "garden" requires before it can be fit to receive a visit from him.

28. The same progress in Sulamith's character is to be noticed in the two following scenes. The Beloved had come to the garden (vi. 2) which she had prepared for him (iv. 16). He had come at a time when it was inconvenient for her to receive him. The consequences of this are manifested in her increased love for him. She dares not face him at first, but becomes the second time a suppliant of the "Daughters of Jerusalem," and begs them to convey her message to him. Subsequently (vii. 10–viii. 2) she invites him to leave the court, and to retire into the country, concluding with language (viii. 6, 7) which shows the depth of character which the author ascribes to her. The love which she feels towards her Beloved is indissoluble; neither death nor the grave can destroy it.

29. This development in the characters of the three principal *dramatis personæ* brought before us,—namely, Sulamith, Solomon, and the Daughters of Jerusalem,—make our supposition highly probable that the Book was written (for what Book of Holy Scripture was written without some immediate object?) with the intention of the conversion of Solomon. Some prophet who was charged with the reform of Solomon's corrupt court, conveyed the warning to him in this marvellous Book. In other words, this semi-pastoral yet dramatic poem was one of the means by which Jehovah sought to recall the apostate Jedidiah (2 Sam. xii. 25) to a true sense of his position.

30. But that this view rests upon something more than conjecture is borne out by two simple considerations. (1) The Song of Solomon, like the Book of Esther, has no mention of the name of God.[c] To what purpose was the name of God omitted, unless that the omission of the sacred name might appeal to the person to whom the work is addressed? Could a stronger ground be alleged for inducing the king to forsake false gods and idolatrous rites, than the picture which has just been set before us? He is delicately reminded of his own sins. He is refuted by his own arguments. The way of repentance is pointed out to him. Accordingly we find no reference whatever to Jehovah, to religion, to sacrifices, or to anything of the kind. (2) The same intention on the part of the writer may be noticed in the language of Solomon himself. We have already dwelt upon the importance of the third scene in its relation to the exegesis of the work. We may remark that after this scene neither Solomon nor Sulamith speak of anything except the simplest objects of nature. They have both risen to a conception of what real love is. In this they are lost, and henceforth art and luxury cease to hold any charm over them. Their satisfaction lies in each other, and they spend their lives in the contemplation of the works of God in nature.

31. But is there no further meaning in the Book? Here we are brought to face the most difficult question that can be raised in connexion

[c] The obscure word שלהבתיה is the only possible instance to the contrary, but observe the Syriac ܫܠܗܒܬܝܗ.

with the Canticles. We may ask the question in a slightly different form. Is the interpretation of Canticles literal or allegorical? Roughly speaking, this question deals with the whole history of the interpretation of the Book. The interpretation which we have given is literal; that is, we have attempted to find circumstances in the life of Solomon which are the *raison d'être* of the Book. But we believe that there is a deeper meaning in it. We find a distinct Messianic element, but before stating it we must make two general observations. (1) It does not follow that because a certain portion of a prophecy is Messianic, the whole is such. For instance, in Psalm xxii. there are many things which are applicable to the sufferings of David, many which are not. These last, which to save inconvenience we will call "the collateral matter" of the prophecy, apply distinctly to the Messiah. Or, if we may take another illustration, there can be no doubt, from Isaiah vii.–ix., that a child named Immanuel actually lived in the days of the prophet, who in fact was his father, and that a certain portion of the prophecy was fulfilled in the person of this child. But there remains the collateral matter, which cannot be explained as applying in any sense to Isaiah's son, but does apply definitely to the Messiah. (2) What we have stated with regard to prophecy applies with equal force to typology. For instance, because a certain character in Holy Scripture is a type or picture of the Messiah, it does not follow that he is such in all the lineaments of the picture. Take the cases of Joseph and David, which are most probably admitted as typical of Christ by all those who recognise the Messianic element in Psalm xxii. or Isaiah vii.–ix. It does not follow that because Joseph and David were figures of Christ in one particular sense, they must have been so in every respect. It would be as irreverent to explain Gen. xli. 41–43 of the Messiah, as to suppose that certain acts of David are Messianic types.

32. Applying these principles to the Canticles, it is not necessary to suppose that Solomon is a type of Jehovah or Christ in all respects, or that in Sulamith we are to look for never-failing traces of the Synagogue, of the Christian Church, or of the Christian soul. Some of the language which is ascribed to Solomon is inconsistent with any such hypothesis. But we maintain that there are at least two Messianic pictures in the Canticles. There is (1) the conversion of Solomon and the ladies of his court through the instrumentality of Sulamith. Could we have a more distinct representation of the final triumph of the Church of Christ over the powers and principles of this world? Sulamith was the humble instrument in the hands of God through whom the apostate Solomon was converted; in the greatness of the task which she performed and in the divine character of her mission she is the type of greater things to come. (2) So with regard to Solomon, it would be irreverent to explain every word ascribed to him in this Book as though it were the utterance of Jehovah or of the Christ. However, in that burning love which existed between him and Sulamith, a love which we must remember was mutual, we cannot fail to notice a figure of that love which each individual soul, and the Church collectively, possesses towards the Author and Finisher of her faith. Further than this we dare not allegorise; but in this we see enough to excite our wonder and our longings for further search. Those who would see what has been discovered in the Canticles by men who spent their time in prayer and meditation, should read the eighty-six sermons of St. Bernard on the Book, and the forty-eight sermons by Gillebert, which were commenced with the object of completing what St. Bernard left unfinished at his death. The Commentary on Canticles, by the late Dr. Littledale, 1869, places the allegorical interpretation within a short compass. See also Gietmann in Cornely's *Cursus*, &c. 1891.

33. We must not forget, however, that the interpretation of the Book must depend in a great measure upon the number of *dramatis personæ* which are introduced. The explanation which we have ventured to give is based entirely upon the hypothesis that there are only two principal characters in the drama. But are we sure that there is not a third, or even a fourth? Some expositors discover not only the features of king Solomon, but also those of a rival, a shepherd, a man of Sulamith's own position in life, to whom her heart had been given before she was forced into attendance at the king's court. This has been rightly called the "Shepherd hypothesis" by Mr. Kingsbury (the careful and learned writer of the *Speaker's Commentary* on the Canticles, 1873), and we must briefly examine what arguments are introduced in favour of it. This hypothesis is thus enunciated by Dr. Ginsburg: "This song records the real history of a humble but virtuous woman, who, after being espoused to a man of like humble circumstances, had been tempted in a most alluring manner to abandon him, and to transfer her affections to one of the wisest and richest of men, but who successfully resisted all temptations, remained faithful to her espousals, and was ultimately rewarded for her virtue." [a]

34. It will be noticed that, according to the scheme of arrangement which we gave above, thirty verses and two half-verses were assigned to Solomon. Of these the "Shepherd" claims one half-verse, *i.e.* viii. 5 b, and fifteen whole verses. He is also credited with the thrice-repeated refrain, ii. 7, iii. 5, viii. 4. Of the verses ascribed to him, one only has any importance in its bearing upon the hypothesis, namely viii. 5 b. It may reasonably be asked, how could Solomon have known various circumstances connected with Sulamith's home? And to us the answer seems very unsatisfactory which assumes that the king had wandered to that spot during one of his hunting expeditions in the North of Palestine. We have followed Dr. Delitzsch (*Hohelied*, 1875, p. 126), reading ילדתך, חבלתך, אמך, עוררתיך on the ground of the great difficulty that there is in putting such a word as עוררתיך into the mouth of Sulamith.

35. But if we examine the whole Song with the Shepherd hypothesis to guide us, we shall find that in the dialogue with Solomon (for such it is allowed to be) Sulamith replies to him in language which is really intended for

[a] *The Song of Songs, with a Commentary*, &c., 1857, p. 11. Similarly M. Renan in *La Cantique des Cantiques*, 4th ed., 1879, p. 100; and with some modifications Dr. S. Oettli, *Das Hohelied*, 1889, and others.

the Shepherd. For instance, is the "Well-beloved" (i. 13) different from the "King" who was mentioned in the preceding verse? Is it not strange that the Shepherd (ii. 2) should apply the same rare word to Sulamith (רעיתי) which is always employed by Solomon? Passing over the three refrains, which we have ventured to ascribe to a Chorus of Virgins, we come to the long passage iv. 8–v. 1. There is considerable difficulty in explaining this upon the Shepherd hypothesis. It is admitted that iv. 7 is spoken by Solomon, and that the scene is laid in his palace. It is somewhat odd to find the king permitting a rival to ask his wife (for such she is supposed to be) to make what in plain English would be called an elopement with him. Still less do we see how the Shepherd (v. 1) could invite his friends to eat and drink with him in Solomon's palace. It may be urged that the appearance of the words כלה and אחותי כלה in this scene alone support the idea that another than Solomon is speaking; but then we must remember that Solomon had just entered publicly into Jerusalem as the husband of Sulamith: why then should he not publicly call her his wife? Or if we take vi. 8, 9; here the Shepherd is standing outside the palace, and makes this sarcastic reference to what is going on within, so as to "destroy the effect" of Solomon's remarks (vi. 4–7). But we think it highly probable that, if the Shepherd had ventured into such close proximity to the King, one of the sixty mighty men (iii. 7) would not have allowed him to live long enough to make his last request (viii. 13). Again the passage i. 7 is declared to put the hypothesis on a sure footing; but, as we observed above (§ 22), we have no reason to believe that Sulamith knew that Solomon had any other profession except that of a shepherd; or, as Mr. Kingsbury well puts it, "she speaks figuratively of the 'Son of David,' as David called the Holy One of Israel 'my Shepherd.'" And a conclusive argument against the literal interpretation of the passage is the spiritual character of much of the language of Sulamith, *e.g.* i. 12, 13, ii. 17, iv. 6, v. 5, &c., where a literal explanation is impossible. After a careful analysis of the work we cannot help differing from those who have supported the Shepherd hypothesis in any form whatever.

36. The Fragmentary hypothesis, in accordance with which the Book is supposed to be a collection of various unconnected poems, may be said to be obsolete. It was maintained with great learning by E. J. Magnus, *Krit. Bearbeitung*, &c., *des Hohen Liedes Salomo's*, Halle, 1842.

37. *Further Considerations respecting the Language and Style.*—According to our scheme of arrangement, seventy verses and three half-verses are ascribed to Sulamith, thirty whole and two half-verses to Solomon, while the remaining thirteen and a half verses are distributed among the Daughters of Jerusalem, the Chorus of Virgins, the crowd at Jerusalem, and Sulamith's brothers. It will be observed that a large preponderance of the remarkable words, forms, and constructions is used by Sulamith. Not only is she acquainted with various objects of nature not mentioned by the others (those which are peculiar to Canticles are marked with an asterisk), such as כפר*, ברותים*, חבצלת, פנים*, תאנה, תור, אילות, צבאות, אישישות, מרקחים*, עורב, פז, מור עבר, ישעלים*, סמדר*, דודאים*, אנוז, שן, ספירים*, תרשיש (the objects mentioned by Solomon and the others are more common except ברכם* and עפרים), but the localities with which she is familiar are comparatively few. Besides Lebanon, which is known to Solomon and the Daughters of Jerusalem also, she speaks only of Engedi, Sharon, Bether, and Baal-Hamon, the last three of which were in the North of Palestine. Solomon mentions Gilead, Amana, Shenir, Hermon, Tirzah; and the Daughters of Jerusalem refer to Heshbon, Damascus, and Bath-Rabbim, betraying an acquaintance with Eastern Palestine, and reminding us of 1 K. xi. 1, 5, 7.

38. Of the words peculiar to Canticles Solomon uses the following: רעיה (used by Sulamith ii. 10, 13, when citing Solomon's language), תור (a necklace), מתאמים, רחצים, גליץ, חרוצים, מדבר (in this sense), תלפיות, לבב, צַוָּארון, גל, שלחים, סנסן, נדנל. The Daughters of Jerusalem also have a peculiar vocabulary, *e.g.* מתרפק, דלה, מזג, אמן, חמוק, אימה נדגלות. The crowd, as we should expect, introduce some curious words, such as אבקה, רצוף, רפידה, אחזי, אפריון, חרב. But the diction of Sulamith is overwhelmed with anomalies. We take a sample from the first nineteen verses which are allotted to her: נטר, שחרחרת (a provincialism for נצר, which is the form used by her brothers, viii. 9), איכה for איה, חרך, כתל, נצנים, סתו, זמיר and חנט (in this sense). To this may be added a pleonastic construction, כרמי שלי, i. 6, viii. 12 (cp. מטתו שלשלמה, iii. 7); the pronoun after the finite verb, קמתי אני, v. 5, פתחתי אני, v. 6; and the forms שְׁוּקים, iii. 2, קְוּצות, v. 2, 11 (reminding us of יְשׁוּרים, Hos. xii. 12). The above lists might be considerably augmented, but a sufficient number of words has been given to show that there are forms of speech ascribed by the author to Sulamith, which, like the places that she knows best, are to be looked for in the North of Palestine. In some respects her diction resembles Syriac rather than pure Hebrew.

39. *Age and Date of Composition.*—We have endeavoured to show above (§ 3, &c.) that the age of the Canticles cannot be determined from the language and diction; though Gesenius,* it is true, maintained that on account of "Chaldaisms" the Book must have been written shortly after the return from the Exile. Again, such words as פרדס and אפריון have been claimed as indicating a Persian or even a Greek period of authorship. But as our knowledge of the different Semitic dialects prevalent in Palestine from the 10th century B.C. onwards is very slight, we prefer to discover what indications of date are betrayed by the author himself apart from the language.

* *Gesch. d. Heb. Spr.* p. 27.

40. We believe that very distinct traces of the period of Solomon are to be found. For instance i. 9 refers distinctly to the horse trade between Egypt and Palestine of which we read in 1 K. x. 28, 29; 2 Ch. i. 16, 17. At no other time (not even at the date of Is. xxx. xxxi.) are we aware of any such trade in Israel. We have already noticed the familiarity with Eastern Palestine which is exhibited by the Daughters of Jerusalem. This again points to the date of Solomon. There is no reference to a divided kingdom, but Israel is looked upon as one entire power (iii. 7). It is true that Jerusalem and Tirzah are mentioned together in vi. 4, but this does not prove, as M. Renan thinks it does (pp. 95, 96), that at the time of the composition of the Book the author had the northern and southern capitals before him. The references to Gilead (iv. 1), Heshbon, and Bath Rabbim (vii. 5), all point to a time when Eastern and Western Palestine formed one empire. Now we have every reason to believe that the trans-Jordanic possessions of Israel revolted at the time of the great schism. Consequently we are led to infer that the Song was written previously to the times of Rehoboam. But another indication of the date is given to us in some of the ideas of the Book. We know that Solomon's was an encyclopaedic age (1 K. iv. 29–34), and assuredly in no portion of Scripture consisting of 117 consecutive verses do we find so many names of animals and plants as we do here. It appears that Sulamith mentions no less than forty objects of nature or art, of which Solomon or others mention fourteen. Solomon himself, in his small number of verses, mentions twenty. So that we must admit that upon the average we may expect to find in every other verse the mention of something which was known to be an object of research in Solomon's time. In fact the references to gardens, parks, fruit, trees, fish-ponds, within the compass of so few verses, can only be accounted for on the hypothesis that one was living who "spake of trees, . . . of beasts, of fowls, of creeping things, and of fishes" (1 K. iv. 33). In other words, we are led to place the composition of the Book in the most prosperous days of Solomon, and consider that this is highly probable, notwithstanding the difference in numbers that has been noticed between Cant. vi. 8 and 1 K. xi. 3.

41. The name of the author, however, must remain a secret. The Solomonic authorship, as we observed (§ 1), cannot be proved from the title. We have not a sufficient amount of Solomon's writings to enable us to form an idea of his style. There are, without doubt, many coincidences in thought and language between the Canticles and the Proverbs (see Keil's *Introduction to the O. T.* § 124, 4), but, unfortunately, all are not agreed as to which proverbs are due to Solomon and which are not. Again, it is true that Solomon is recorded to have written 1005 songs, but there is an unwarrantable assumption in maintaining that this was one of them. We do not venture to speculate upon the name of the author; but an intellectual age such as Solomon's, which possessed a Nathan, or an Ahijah of Shiloh, was surely capable of giving birth to an author who could have produced this striking work.

42. *Canonicity.*—Little can be added on this subject to what was stated in the first edition. The Canticles have been rejected by private individuals on subjective not on external grounds. The fact that it exists in the Greek Versions, and that it is cited in the Talmud Babli (*Bab. Bathr.* 14 b) as canonical, is sufficient to establish the canonicity of it. The well-known passage in the Mishna (ידים, iii. 5) is sufficient to show the uniformity of Jewish tradition. See further Delitzsch, *Comm.* pp. 14, 15; Dr. Ginsburg, § ii.

43. *Versions of the Canticles.* — We have already stated that the three principal Versions are the Septuagint, the Syriac, and the Latin. (For an account of the Targum on Canticles, see TARGUM.) Of these the Syriac is by far the best translation.

44. (1.) The Greek Version is, upon the whole, a careful and faithful rendering. At times the translator goes out of his way for the sake of preserving a literal version. See i. 8, 14; ii. 11; iii. 6, 11; iv. 7; v. 5, 6, 16; vi. 8, 9; vii. 5; viii. 12. There are occasions where he has made a few additions: i. 4, *εἰς ὀσμὴν μύρων σου*; ii. 10, *περιστερά μου* (as in *v.* 13); ii. 14, *σου* before *περιστερά*; iii. 2, *καὶ* before *ζητήσω*; v. 2, *ἐπὶ τὴν θύραν* after *κρούει*; v. 8, after 'Ιερουσαλὴμ he adds *ἐν ταῖς δυνάμεσι καὶ ἐν ταῖς ἰσχύσεσι τοῦ ἀγροῦ*, as he does in viii. 4, so as to agree with ii. 7. In vi. 11 [10], after *ῥοαὶ* he adds *ἐκεῖ δώσω τοὺς μαστούς μου σοί* (from vii. 13). In vii. 11, *ἡ ἐρχομένη* is inserted before *ὡς χόροι*; vii. 5 [4], *ὡς* before *λίμναι*.

45. The omissions are very few, being chiefly confined to particles. Exceptions must be noticed in עבר, v. 6, and לכי לך, ii. 10, which he translates by *περιστερά*, having already rendered לך by *ἐλθέ*, which he read לכי as in ii. 13.

46. There are certain variations which must be regarded either as errors or as the result of misapprehension. Such are *μαστοὶ* for דודים, i. 2, 4, &c.; *εἵλκυσάν σε*, i. 4; *μύροις*, ii. 5; *ἱματίων*, iv. 10 (where the source of error is discoverable from *v.* 11); *ἀρώματά μου*, iv. 16; *ὡμοιώθης*, vii. 7; *καὶ εἰς ταμεῖον τῆς συλλαβούσης με*, viii. 2 (where the equivalent תלמדני points out how the error arose); *λελευκανθισμένη*, viii. 5; *ὁ καθήμενος*, viii. 13.

47. That the translator intended to be honest appears from the transliterations which he employs, *e.g.* *θαλπιώθ*, iv. 4; *ἀλώθ* (some copies have *ἀλωή*), iv. 14; *κεφάζ*, v. 11 (should we read *καὶ φάζ*? see Hippol. *Fragm.* xxv. on Daniel, and cp. v. 15); *θαρσίς*, v. 14; *Ναδάβ*, vii. 2. Apparently being uncertain of the meaning of the Hebrew words, he preferred to leave his translation ambiguous.

48. Perhaps indications of a different Hebrew text are given in the following passages: i. 3, הביאני . . . דגלו; ii. 4, וריח שמניך מכל שמנים; iv. 1, שגנבלו, 4, תלו, 8, אתי; vii. 9, . . . שפתי ישנים; viii. 2, רמוני, 6, שלהבותיה. The division of chapters and verses is different from what we find in the received Hebrew text. Thus i. 4 the difficult word משכני is put into *v.* 3 and translated *εἵλκυσάν σε*; so again chapter v. begins with the middle of iv. 16, and v. 17 with vi. 1. In vi. 11 there is a different division

of the verse, and it is not plain what the translator meant; and finally vii. 1 *a* is transferred to the end of vi. 11.

49. The following passages deserve special study: i. 7, 8, 11, 12, 16 (obscure); ii. 1 (he avoids the proper name as ii. 17, iv. 8, vi. 3), 8, 9, 12, 14; iii. 6, 10; iv. 1 (*σιώπησις*, Syr. ܣܠܘܬܐ, used metaphorically for veil as in v. 3), 9, 12, 13, 15; v. 1, 5, 11, 12, 14; vi. 8 (*νεανίδες* = עלמות), 12; vii. 9; viii. 1, 4 (*ἐὰν* = מה, but cp. ii. 7, iii. 5), 7, 9. These will present to the reader the most important passages; and probably after having studied this Version he will not assent to Dr. Noack's conjecture (*Hohelied*, pp. 37, 38), that it was undertaken on the occasion of the marriage of Alexander Balas with Cleopatra; still less will he approve of the arbitrary, and (if we understand it correctly) faulty Hebrew-Roman text which he prints.

50. (2.) The main difficulty with regard to the Syriac Version is the text itself. A careful collation of Lee's text with the facsimile of the Ambrosian MS. lately edited by Dr. Ceriani, and the Bodleian MSS. Pocock 391, Bod. Or. 141, will exhibit a large number of variants, certainly not less than sixty. In fact, till the various Syriac codices have been collated, one of the most precious *subsidia critica* to the Old Testament text will be comparatively valueless. The omissions in this Version of the Canticles are very slight, and for the most part confined to particles; but in some MSS. even these do not exist. The additions are of the same nature, except perhaps in vii. 4, ܕܢܟܝ ܕܚܫܒܘܢ, which is repeated from iv. 5, as LXX. It is hard to distinguish accurately between the occasional paraphrases which the translator gives, and indications of a different Hebrew text lying before him. The following, however, appears to us to be approximately correct.

51. *Paraphrases*:—i. 2, ܡܛܥܡܢ ܕܡܢ ܦܘܡܗ ܓܝܪ ܛܒܝܢ ܡܠܟ ܡܚܒܝܟ, 6; ܐܠ ܬܬܚܙܝ ܕܫܚܝܪܐ ܐܢܐ ܕܫܠܡܐ ܐܢܐ ܠܟ ܕܫܠܡ ܐܢܐ ܠܟ, 16, ܕܫܠܡ ܐܢܐ ܠܟ ii. 12, ܙܡܝܪ = ܙܡܝܪܐ; 13, ܕܡܫܟܢ ܫܟܝܢܬܗ ܒܝܢ ܐܝܠܢܐ ܘܒܝܢ ܐܝܠܢܐ; 17, ܕܡܫܟܢ = בתר: iii. 6, ܕܡܫܟܢ ܠܗ (for אבקת רוכל); 9, ܕܡܢ ܐܦܪܝܢ = אפריון: iv. 4, ܕܡܢ ܕܠܦܟ = תלפיות; 10, ܕܕܕ *bis* for דודיך (but only here and vii. 13): v. 12, ܕܡܫ ܕܢܬܒ for כתם פז; ܡܟܫܠܗ = תלתלים; 13 (some MSS. ܕܢܢܝ), ܡܟܢ ܕܢܢܝ; 15, ܕܡܠ ܕܡܠܐ = ממלאים בתרשיש; 16, ܡܪܐܗ = מראהו: vi. 3, ܕܨ ܕܨ = תרצה; ܕܓܠ = נדגלות, but the same word is rendered ܕܓܠ (some MSS. ܕܓܠ) in *v.* 9: viii. 1, ܐܡܐ ܐܡܟ ܕܝ = יונק; 6, ܫܕܝ ܐܡܝ ܘܟܡܨ ܕܡܟܡܨ = ריטפיה ריטפי איט וישלהביתה.

52. Different readings are suggested in the following passages:—i. 3, הדרך: ii. 1, כחבצלת (unless ܐܢ was corrupted into ܐܡܝ, which is most unlikely); 4, דגלו and הביאני (that is, if the point is to be trusted): iv. 4, the order is inverted which the translator is usually most careful to preserve, and he seems to have read צוארך מבצר צמתן במגדל דויד In iv. 6 he reads ܐܠܟ (or ܥܠ), *i.e.* לכי לך instead of אלך לי. Verse 11, after the first three words, probably was written כל דביש וחלב תחת שפתיך. It is not easy to account for vii. 1, ܒܢܫܐ ܐܡܝ ܡܝ:ܠܐ ܐܡܝ ܡܝ ܠܐ ܕܡܟܥܡ, probably the words are a paraphrase of the very hard passage: vii. 7 indicates that in the copy before him the translator did not find the words separated from each other. He read בַּת תַּעֲנוּגִים instead of בַּתְּעֲנוּגִים: viii. 11 we find ܕܡܟ ܫܥܝ for ܐܠܟ ܒܥܠܡ, and lastly v. 13 ܐܠܟ ܒܥܠܡ ܕܡܟ ܕܡܟ, *i.e.* היושבים בגנים ומקשיבים לקולך.

53. (3.) The Latin Version of St. Jerome is an important witness to the condition of the Hebrew text in the 4th century. It is entirely independent of the LXX., and suggests one or two important readings. The additions (such as ii. 10, v. 2, vi. 4, viii. 2, 6), like the omissions (ii. 11, 12, v. 6, vii. 6, 13), are very slight, and consist almost entirely of particles. We find one double translation (viii. 6), where "deliciis affluens, innixa," corresponds to the one Hebrew word מתרפקת. Proper names are translated as iv. 6, "collem thuris" for גבעת הלבנון; vii. 5, "quae sunt in porta filiae multitudinis," על שער בת רבים; viii. 11, "in ea quae habet populos," בבעל המון. Various readings of small importance are suggested: iii. 9, אחזו; iv. 8, אתי, *bis*; v. 12, רחוצת, and possibly מאז, viii. 10. The following passages are worthy of notice: i. 7, 14; iii. 10; iv. 1 (comp. iv. 3, vi. 7), 8; v. 5 (note the important alteration in the division of the verse); vi. 12; vii. 6; viii. 6 (obscure).

It is an interesting fact to mention that the Canticles have been translated into various English dialects,—Cornish, Cumberland, Dorset, Durham, Lancashire, and Westmoreland. A very few copies were printed in 1859 by Mr. George Barclay, 28 Castle Street, Leicester Square.

54. Metrical Versions of the Canticles have been frequently made, and amongst others may be mentioned one by Rev. William Moore, M.A. of Magdalen College, Oxford, published in

a volume of poems entitled *Lost Chords*, Messrs. Parker & Co., Oxford, 1889.

55. *Literature bearing upon the Canticles.*— To the exhaustive lists which will be found in the Introduction to Dr. Ginsburg's *Commentary*, and in Kuenen, *Hist. Crit. Onderzoek*, vol. iii. pp. 377–399, may be added the following:— (1.) *The Conversion of Solomon*, by John Dove, D.D., London, 1613. The writer proves to his own satisfaction that the soul of Solomon was finally saved, that the earlier verses in the Canticles are the King's prayers for reconciliation with God through Christ. He considers the rest of the Book to consist of dialogues between the Church and Christ. (2.) Dr. O. Zöckler, *Das H. Lied*, Bielefeld und Leipzig, 1868. He considers Solomon to be the author, whose love towards Sulamith is typical of the communion between Christ and His Church. This work has been translated into English by Dr. W. H. Green, with additions by the editor, and is published in a useful form by Messrs. T. and T. Clark of Edinburgh. (3.) Ludwig Noack, *Tharraquah und Sunamith*, Leipzig, 1869. He considers the reference to be to Samaria and Tirhakah. (4.) Dr. H. Graetz, *Schir ha-Schirim übersetzt*, Wien, 1871. We have already referred at length to this highly valuable work. (5.) The late Dr. Franz Delitzsch, *Das Lied der Lieder*, Leipzig, 1875. This is by far the most valuable modern book on the Canticles, and has been translated into English in Clark's Foreign Theological Library. (6.) *Le Cantique des Cantiques*, par E. Renan, 4me éd., Paris, 1879. M. Renan adopts the "Shepherd hypothesis." (7.) E. Reuss, *Le Cantique des Cantiques*, Paris, 1879. We find a striking sentence, p. 88, "Embarras sans fin! Plus le texte est clair, plus on y trouve d'énigmes." The introduction contains a valuable synopsis of criticisms, pp. 24–41, and the work, like all that comes from the pen of the learned scholar, is of a highly interesting character. (8.) A. Raabe, *Das Buch Ruth und das Hohelied*, Leipzig, 1879. This work contains a Glossary of the words contained in the two Books given in the title, followed by a brief notice of some peculiar grammatical forms, and a transliteration of the Hebrew text into what the author conceives to be the original language. The vehicle of transliteration is, unfortunately, the italic character. A few notes are added, which are not void of interest. (9.) Dr. C. Kossowicz, Petersburg, 1879. Latin notes, containing some interesting matter, followed by an "Archetypum" in unpointed Hebrew characters. The treatment of the Book, especially chap. iv. 8–v. 8, is erroneous in our judgment, and the learned writer is evidently sceptical as to the correctness of his view. See p. 17, note 48. (10.) Special mention must be made of the useful work by Dr. Salfeld, *Das H. L. Salomo's bei den Jüdischen Erklären des Mittelalters*, Berlin, 1879. In this are classified the different Jewish interpretations, haggadistic, philosophical, mystical, &c. These are followed by an appendix consisting of fourteen extracts from MSS. of various writers illustrative of the different interpretations. A list of the Jewish commentators on the Canticles from the 9th to the 16th century concludes the work. (11.) Commentary and Translation by Dr. J. G. Stickel, Berlin, 1888. According to him, there is a twofold drama, the loves of Sulamith and Solomon, to which the loves of a shepherd and shepherdess are parallel. He maintains the antiquity of the Book, and his discussions pp. 107–147 are very suggestive. (12.) Prof. S. Oettli, *Das Hohelied* (in the *Kurzgefasster Kommentar*, now being edited by Dr. Strack and Dr. Zöckler, 1889); is a very useful work, developing the hypothesis of Dr. Stickel. He divides the work into fifteen different scenes, consisting of dialogues between Sulamith, the court-ladies, Solomon, and Sulamith's friend. He considers the Book to have been written (p. 170) in the first half of the 10th century B.C. The whole locality of the action is ascribed by him to North Palestine. The notes contain a vast amount of information within a small compass. We are unable to agree with him so far as to reject the "King-hypothesis" (p. 157). Of English commentaries we have already referred to (13) Mr. Kingsbury's, in the *Speaker's Comm.* (14.) To this may be added a short and popular Commentary in the SPCK. series by the Rev. E. P. Eddrup, of a very unpretending but instructive kind. The articles on *Hohelied* by Diestel in Schenkel's *Bibellexicon*, and by Orelli in Herzog's *RE.*[2] are worthy of study. There is also an article on *Canticles* in the new edition (9th) of the *Encyclopaedia Britannica*, by Prof. W. R. Smith. To those who are interested in the Arabic versions of the Bible we recommend a paper on Saadiah's version of Canticles by Dr. Adalb. Merx, Heidelberg, 1882. [H. D.]

CAPERNAUM (Rec. T. Καπερναούμ; Lachm. Tisch., Treg., Westcott and Hort, and Gebhardt, with BNDZ., &c. Καφαρναούμ, as if כפר נחום, "village of Nachum;" Syriac Nitr. ܟܦܪ ܢܚܘܡ, Pesh. ܟܦܪ ܢܚܘܡ; *Capharnaum*), a name with which all are familiar as that of the scene of many acts and incidents in the life of Christ. There is no mention of Capernaum in the O. T. or Apocrypha, but the passage Is. ix. 1 (in Heb., viii. 23) is applied to it by St. Matthew. The word *Caphar* in the name perhaps indicates that the place was of late foundation. [CAPHAR.]

The few notices of its situation in the N. T. are not sufficient to enable us to determine its exact position. It was on the western shore of the Sea of Galilee (*τὴν παραθαλασσίαν*, Matt. iv. 13; cp. John vi. 24), and, if recent discoveries are to be trusted (Cureton's *Nitrian Rec.* John vi. 17), was of sufficient importance to give to that sea, in whole or in part, the name of the "lake of Capernaum." This was the case also with Tiberias, at the other extremity of the lake (cp. John vi. 1, "the sea of Galilee which is the sea of Tiberias"). It was in, or near, the "land of Gennesaret" (Matt. xiv. 34, compared with John vi. 17, 21, 24); that is, the rich, busy plain on the west shore of the lake, which we know from the descriptions of Josephus and from other sources to have been at that time one of the most prosperous and crowded districts in all Palestine. [GENNESARETH.] Being on the shore, Capernaum was lower than Nazareth and Cana of Galilee, from which the road to it was one of descent (John ii. 12; Luke iv. 31), a mode of speech which would apply to the general level of the spot even if our Lord's expression "exalted

unto heaven" (ὑψωθήσῃ, Matt. xi. 23) had any reference to height of position in the town itself. It was of sufficient size to be always called a "city" (πόλις, Matt. ix. 1; Mark i. 33); had its own synagogue, in which our Lord frequently taught (John vi. 59; Mark i. 21; Luke iv. 33, 38)—a synagogue built by the centurion of the detachment of Roman soldiers which appears to have been quartered in the place[a] (Luke vii. 1, cp. v. 8; Matt. viii. 8). But, besides the garrison, there was also a customs-station, where the dues were gathered both by stationary (Matt. ix. 9; Mark ii. 14; Luke v. 27) and by itinerant (Matt. xvii. 24) officers. If the "way of the sea" was the great road from Damascus to the south (Ritter, *Jordan*, p. 271), the duties may have been levied not only on the fish and other commerce of the lake, but on the caravans of merchandise passing to Galilee and Judaea. On the other hand, the duties may have been city tolls, of the nature of *octroi*, which would naturally be collected at the city gate; or custom dues on merchandise passing from Galilee to Ituraea by way of Bethsaida-Julias.

The only interest attaching to Capernaum is as the residence of our Lord and His Apostles, the scene of so many miracles and "gracious words." At Nazareth He was "brought up," but Capernaum was emphatically His "own city" (Matt. ix. 1, cp. with Mark ii. 1). It was when He returned thither that He is said to have been "at home" (Mark ii. 1; such is the force of ἐν οἴκῳ—A. V. "in the house"). Here He chose the Evangelist St. Matthew or Levi (Matt. ix. 9). The brothers Simon-Peter and Andrew belonged to Capernaum (Mark i. 29), and it is perhaps allowable to imagine that it

Capernaum. *Tell Hûm.* (From a photograph.)

was on the sea-beach below the town (for, doubtless, like true Orientals, these two fishermen kept close to home), while Jesus was "walking" there, before "great multitudes" had learned to "gather together unto Him," that they heard the quiet call which was to make them forsake all and follow Him (Mark i. 16, 17; cp. v. 28). It was here that Christ worked the miracle on the centurion's servant (Matt. viii. 5; Luke vii. 1), on Simon's wife's mother (Matt. viii. 14; Mark i. 30; Luke iv. 38), on the paralytic (Matt. ix. 1; Mark ii. 1; Luke v. 18), and on the man afflicted with an unclean spirit (Mark i. 23; Luke iv. 33). The son of the nobleman (John iv. 46) was, though resident at Capernaum, healed by words which appear to have been spoken in Cana of Galilee. At Capernaum occurred the incident of the child (Mark ix. 33; Matt. xviii. 1; cp. xvii. 24); and in the synagogue there was spoken the wonderful discourse of John vi. (see v. 59).

The doom which our Lord pronounced against Capernaum has been remarkably fulfilled. In the present day no ecclesiastical tradition even ventures to fix its site; and the contest between the rival claims of the two most probable spots is one of the hottest in sacred topography. Fortunately nothing hangs on the decision. The spots in dispute are: 1. *Khurbet Minyeh*, a series of mounds, covering no very large extent of ground, and containing the remains of no important building. The ruins take their name from an old *khân*, a short distance to the north, and are situated close upon the sea-shore at the

[a] The fact of a Roman having built the synagogue has been thought by some an argument against the prosperity of the town.

north-eastern extremity of the plain of Gennesareth (now *el-Ghuweir*). Not far from the mounds, and close to the water-line of the lake, is a large spring surrounded by vegetation and overshadowed by a fig-tree which gives it its name—*'Ain et-Tin* (the spring of the fig-tree). About 2¼ miles S.W. of *Khân Minyeh* is another large spring, called the "Round Fountain," which is rather more than half a mile from the lake, to which it sends a considerable stream with fish.

2. The other claimant, *Tell Hûm*, is 2¼ miles N.E. of *Khân Minyeh*. The ruins of the ancient town are situated on the shore of the lake, and cover a space half a mile long and a quarter wide; the most important are those of a synagogue, and of a remarkable tomb to the north of it. In striking contrast to the black basalt walls of the surrounding houses, the synagogue was built of white limestone (*Recovery of Jerusalem*, pp. 343–6). About 2½ miles further is the point at which the Jordan enters the north of the lake.

The arguments in favour of *Khân Minyeh* will be found in Robinson (ii. 403–4; iii. 344–358). They are chiefly founded on Josephus's account of his visit to Capharnome, which Dr. R. would identify with the mounds near the khan, and on the testimonies of successive travellers from Arculfus to Quaresimus, whose notices Dr. R. interprets — often, it must be confessed, not without difficulty—in reference to *Khân Minyeh*. The fountain Capharnaum, which Josephus elsewhere mentions (*B. J.* iii. 10, § 8) in a very emphatic manner as a chief source of the water of the plain of Gennesareth and as abounding with fish, Dr. R. believes to be the *Ain et-Tin*. But the large fountain of *'Ain et-Tûbigah*, from which water was carried into the plain by an aqueduct constructed with great skill, certainly answers better to Josephus's account than a spring so close to the shore, and possessing such a slight head of water as *'Ain et-Tin*. The claim of *Khân Minyeh* is also supported by Conder (*Tent Work in Palestine*, ii. 182–190), Macgregor, Merrill, and Sepp.

The arguments in favour of *Tell Hûm* are: the statements of Jerome that Capernaum was 2 miles from Chorazin, a distance agreeing exactly with that between *Tell Hûm* and *Kerâzeh*, now generally accepted as Chorazin; and of Theodosius (p. 28), who gives the distance of Capernaum from Magdala as twice that of Tiberias from the same place, which corresponds with the relative positions of *Tubariyeh*, *Mejdel*, and *Tell Hûm;* the extent and character of the ruins; the statements of Josephus; and the name, which is maintained to be a relic of the Hebrew original — Caphar having given place to *Tell*. The arguments are fully given by Sir C. Wilson (*Recovery of Jerusalem*, pp. 375–387); Dr. Wilson (*Lands of the Bible*, ii. 139–149); Thomson (*Land and the Book*, pp. 352–6); Bonar (pp. 437–41); Ritter (*Jordan*, pp. 335–43); Furrer (Schenkel's *Bib. Lex.* iii. 495); and Guérin (*Galilée*, i. 226–39). Renan, Socin, Schaff, Tristram, and Hepworth Dixon, are also in favour of *Tell Hûm*. For a good general description of the district, see Stanley, *S. & P.* ch. x.

The Talmuds (*Shir-ha-Shirim*, iii. 18; and Tal. Jer. *Thrumoth*, xi. 7) mention a *Caphar Tanhûm*, *Tanhûmin*, or *Tchûmin*, which are probably variations of *Caphar Nahûm*, and to be identified with *Tell Hûm*, a name that may itself have been derived, by the change of a letter, from *Tanhûm*. The *Caphar Ahim* mentioned with Chorazin (Tal. Bab. *Menakhoth*, 85*a*) as famous for its corn is also possibly the same place (Neubauer, *Géog. du Talmud*, pp. 220–1). [G.] [W.]

CA'PHAR (כָּפַר, from a root signifying "to cover," Ges. p. 707), one of the numerous words employed in the Bible to denote a village or collection of dwellings smaller than a city (*Ir*). Dean Stanley proposed to render it by "hamlet" (*S. and P.*, App. § 85), to distinguish it from Chavvah, Chatzer, Benoteh, and other similar words. As an appellative it is found only three times: 1 Ch. xxvii. 25; Cant. vii. 11, and 1 Sam. vi. 18 (in the last pointed *Copher*, כֹּפֶר); but in neither is there anything to enable us to attach any special force to the word.

In names of places it occurs in CHEPHAR-AMMONAI, CHEPHIRAH, CAPHAR-SALAMA. But the number of places compounded therewith mentioned in the Talmuds shows that the name became a much commoner one at a time subsequent to the Biblical history. In later Latin Caphar is frequently corrupted to Para, as Para-Dagon, &c. (Reland, *Pal.* p. 356). In Arabic *Kefr* is in frequent use (see the Index to Robinson, ii., iii.). To us its chief interest arises from its forming a part of the name of CAPERNAUM, *i.e.* Caphar-nahum. [G.] [W.]

CA'PHAR-SA'LAMA (Χαφαρσαλαμά; A. Χαρφαρσαραμά; *Capharsalama*), a place (κώμη, Jos. *Ant.* xii. 10, § 4) at which a battle was fought between Judas Maccabaeus and Nicanor (1 Macc. vii. 31). From the fugitives having taken refuge in the "city of David," it would appear to have been near Jerusalem. Is it not possible that it was Siloam, the Arabic name of which is *Kefr Selwân*? Ewald places it north of Ramla on the Samaritan boundary (*Gesch.* iv. 368, note), but no certain traces of it seem to have been yet found. [G.] [W.]

CAPHEN'ATHA (Χαφεναθά; *Caphetetha*), a place apparently close to and on the east side of Jerusalem, which was repaired by Jonathan Maccabaeus (1 Macc. xii. 37). The name is derived by Lightfoot from *Caphnioth*, the Talmudic word for unripe figs. If this be correct, there is a remarkable correspondence between the name Caphenatha and those of Bethany (house of dates), Bethphage (house of figs), and of the Mount of Olives itself, on which the three were situated — all testifying to the ancient fruitfulness of the place. [G.] [W.]

CAPHI'RA (A. Καφιρά, B. Πειρά; Vulg. [3 Esd.] has nothing corresponding to it), 1 Esd. v. 19. [CEPHIRAH.]

CAPHTHO'RIM (כַּפְתֹרִים; B. omits, A. Χαφοριείμ; *Caphtorim*). 1 Ch. i. 12. [CAPHTOR.]

CAPH'TOR (כַּפְתּוֹר; Καππαδοκία; *Cappadocia*), *gent.* CAPHTO'RIM (כַּפְתֹרִים; Γαφτοριείμ, X- or Καφτοριείμ; *Caphtorim*, *Cappadoces*), a country (אִי כַּפְתּוֹר) whence the Philistines

migrated to Palestine (Deut. ii. 23; Jer. xlvii. 4; Amos ix. 7), the term Caphtorim being once used (Deut. *l. c.*) to designate the Philistines. In the Noachian list, the list of the Mizraites closes with "Casluhim (out of whom came Philistim [R.V. "whence went forth the Philistines"]), and Caphtorim" (Gen. x. 14; 1 Ch. i. 12). It has been conjectured that a transposition has here occurred, and that the mention of the Philistine migration should follow the word Caphtorim (see *QPB.*[3]), but there is no ancient evidence in favour of the conjecture. The LXX. of Gen. x. 14 follows the sequence of the Hebrew, limiting the Philistines to the Casluhim as source. [R. S. P.]

The Egyptian records mention a race which can only be the people of Caphtor. The name of *Kefa*, *Kefth*, *Keft* occurs frequently in the Egyptian inscriptions, but not before the reign of Thothmes III. (18th dyn., 1600 B.C.). It remained uncertain what nation was meant by that name until the discovery of the trilingual inscription of Canopus, where *Keft* is mentioned (*l. g.*) between Syria and Cyprus, and translated by *Φοινική*, Phoenicia.

In the famous picture of the tribute of four races to Thothmes III. which is found in the tomb of Rekhmara at Thebes, the second line is described as the offerings *of the chiefs of Kefa and of the islands of the sea*. The men are like the Egyptians in type and colour; they have not all their hair dressed alike; they all wear ornamented kilts and high boots; but we cannot say with certainty whether they are the men of Kefa or from the islands. Their tribute consists of beautiful vases of gold, electrum, silver, bronze and glass, some adorned with inlaid work in glass and precious stones. They also bring short swords and an elephant's tusk (Wilkinson, *Anc. Egypt.* 2nd ed. Pl. II. a).

In the annals of Thothmes III. mention is made of the ships of *Keft*, which carry timber for the palaces of the king, and also of a silver jug of the fabric of the *Kefa*. In the great tablet, which is an eulogy on the reign of Thothmes III., *Kefa* appears in connexion with *Asebi* (Cyprus) in the following line: *I come and I give thee to conquer the western land. Kefa and Asebi fear thee.* It is only two lines further that we find the inhabitants of the islands of the sea who are distinct from the people of Kefa (Birch, *On a historical Tablet of the reign of Thothmes III.*). It is remarkable that here as well as in the inscription of the tomb of Rekhmara, the king citing the Asiatic nations has adopted the Assyrian orientation, and speaks of the Kefa as being in the *west*. As *Kefa*, *Keft*, means in Egyptian the *back part*, Brugsch considers this word as being the translation of the Semitic אחר (*i.e.* אחרון, western), the Assyrian *aḫarru*, the Egyptian transcription of which is *Kharu*. Thus Kefa and Kharu would be the Egyptian and the Semitic word meaning *those from behind, the Western, the Phoenicians* (Brugsch, *Altaeg. Volkestafel*, pp. 32, 38). It may be objected that in the picture of the tomb of Rekhmara the type of the Kefa is different from that of the *Kharu* (Wilk. *Anc. Egypt.* i. 391); but apart from what has been said before, that we are not at all sure that the men represented are not the people of the islands, in two other instances where the Kefa occur, in the reign of Amenophis III., their type is that of the Asiatics of Syria (Leps. *Denkm.* iii. 63 a, 88). Besides, the site of the land of *Khar* corresponds exactly to Kefa; it is said in a papyrus to extend from the Egyptian city of Zar (Kantarah) to the north of the Syrian coast; and the ships of Khar brought to Egypt chariots, harness, and timber of different kinds (Chabas, *Études sur l'Antiquité historique*, p. 128).

Although in the inscription of Canopus *Keft* is translated by Phoenicia, it is not probable that it had such a definite sense in the time of Thothmes III. *The western* is a vague name, which applies at first to the population of the Phoenician coast, but which may have extended further west. Phoenicia proper in the time of Thothmes III. is called *Zahi*. Kefa may refer also to some of the maritime settlements of the Phoenicians: that is why it is often connected either with Cyprus or with the islands of the Mediterranean.

Ebers, insisting on the connexion which existed between the Eastern Delta and the nations of Palestine, thinks that, in the 10th chapter of Genesis, Caphtor must be considered as a part of Egypt, which was inhabited by Phoenicians. It is certain that even under the last Pharaohs the eastern part of the Delta was occupied by a foreign population; but as far as we can trace the Kefa in the inscriptions, they are always mentioned as inhabiting a foreign country. [E. N.]

At first sight it seems as if the Biblical references to Caphtor and the Caphtorim were irreconcilable with the Egyptian information as to Kefa and Keft. In both sources the people appear to occupy the western Mediterranean: in both, they have a Palestinian settlement; in the Bible this is Philistia, with the Egyptians it is ultimately defined as Phoenicia, for which, be it however remembered, there is no Hebrew name. In the Bible the maritime country of Caphtor, inland or coastland, is far away enough to make the Philistine migration a wonder: in the Egyptian records the link originally seems unbroken between Phoenicia and the insular settlements. Added to this is the difficulty of supposing the Philistines and Phoenicians to have been of the same stock, the warlike landsmen, and the maritime merchants whose ships were carriers for the Egyptians.

It must be remembered that the Biblical geography rests on that archaic document the tenth chapter of Genesis, and may well be older than the Egyptian nomenclature of the 18th dynasty. Names may have moved with migrations. Witness the examples in Greek history, as the Locri and Cumae, the colony of Asiatic Cyme, or, in later times, the Littus Saxonicum and primitive Saxony. The Hebrews spoke of the older settlement: the latest Egyptians transferred its name to the Phoenician coastland, perhaps including the Hebrew settlement of the Philistines. It is noteworthy that the name of that settlement in Hebrew was extended in the Greek period so as to include Canaan; Philistia becoming Palestine.

The cognate origin of the Philistines and Phoenicians seems at first contrary to our notions of the two nations. Markedly dissimilar, they show common qualities of a not less marked kind. The alliances of cities, the government by kings and magistrates or senates, the love of

gain shown in Phoenician commerce and Philistine mercenary service, roughness of character, and skill as smiths, are typical of political, moral, and artistic characteristics rarely found in absolutely distinct races. Differences in pursuits, the warlike tendency of the Philistines and the dislike of war among the Phoenicians, except for distinct commercial gain, the pastoral life as contrasted with that of maritime trade, may be due in part to mixture with different races, in part to the effect of territorial conditions.

If then we may look for the Biblical Caphtor in the Mediterranean, what evidence is there for its situation? Some have found this in the name כְּרֵתִי, Cherethites, used of the southern Philistines (1 Sam. xxx. 14; cp. Ezek. xxv. 16; Zeph. ii. 5), where the LXX. and Syr. read Cretans. The Cherethites formed part of David's bodyguard, with the Pelethites, probably another Philistine tribe. [CHERETHITES AND PELETHITES.] If both are Gentile names, Pelethites must be cognate to Philistines. The similarity of Cherethites to Crete has induced critics to accept the LXX. rendering and conjecture Crete to be Caphtor. If Caphtor was an island, as Cyprus can scarcely be Caphtor, owing to the Egyptian names being different, Crete is a probable identification. It may at least be considered as having been a primitive settlement of the Caphtorim. The character of the Cretans presents curious links with both Phoenicians and Philistines. They stand apart from Greek history and politics, with their separate states uniting by "syncretism" against a common foe, like Phoenicians and Philistines. Their ancient renown for artistic skill, commemorated by the name of Daedalus, their later imitative power, shown in the coins of the 5th century B.C., their early seafaring activity, are strikingly Phoenician. And the discoveries in the Cave of Zeus on Mount Ida show that there must have been Phoenician settlements in the island in the 10th cent. B.C. Yet the Cretan love of war and readiness for mercenary service recall the Philistines. In religion the myth of Europa and the sacrifices to the Minotaur connect the Cretans with Phoenicia, the cultus of a fish-god at Itanus with the Philistine worship of Dagon.

We may therefore infer that the Philistines and Phoenicians were cognate and of that Ethiopian race which extended from Southern Arabia through Ethiopia to Egypt and the Mediterranean south coast and islands, more and more modified by mixture with other races as it stretched north and west; that one of its earliest settlements was in Crete, perhaps the biblical Caphtor; and that the Philistine migration was a subsequent eastward movement of the race. Whether the Pelesatu were the Philistines, and whether their southern movement in the time of Ramses III. in B.C. 1200 was the Philistine migration, must be discussed later. [PHILISTINES.] [R. S. P.]

CAPHTO'RIMS (כַּפְתֹרִים; *οἱ Καππάδοκες*; *Cappadoces*). Deut. ii. 23. [W. A. W.]

CAPPADO'CIA (*Καππαδοκία*). This eastern district of Asia Minor is interesting in reference to New Testament history only from the mention of its Jewish residents among the hearers of St. Peter's first sermon (Acts ii. 9), and its Christian residents among the readers of St. Peter's first Epistle (1 Pet. i. 1). The Jewish community in this region, doubtless, formed the nucleus of the Christian: and the former may probably be traced to the first introduction of Jewish colonists into Asia Minor by Seleucus (Joseph. *Ant.* xii. 3, § 4). The Roman period, through the growth of large cities and the construction of roads, would afford increased facilities for the spread both of Judaism and Christianity. It should be observed that Cappadocia was easily approached from the direction of Palestine and Syria, by means of the pass called the Cilician Gates, which led up through the Taurus from the low coast of Cilicia, and that it was connected, at least under the later Emperors, by good roads with the district beyond the Euphrates.

The range of Mount Taurus and the upper course of the Euphrates may safely be mentioned in general terms as natural boundaries of Cappadocia on the south and east. Its geographical limits on the west and north were variable. In early times the name reached as far northwards as the Euxine Sea. The region of Cappadocia, viewed in this extent, constituted two satrapies under the Persians, and afterwards two independent monarchies. One was Cappadocia on the Pontus, the other Cappadocia near the Taurus. Here we have the germ of the two Roman provinces of Pontus and Cappadocia. [PONTUS.] Several of the monarchs who reigned in Cappadocia Proper bore the name of Ariarathes. One of them is mentioned in 1 Macc. xv. 22. The last of these monarchs was called Archelaus (see Joseph. *Ant.* xvi. 4, § 6). He was treacherously treated by the Emperor Tiberius, who reduced his kingdom to a province A.D. 17. This is the position in which the country stood during the time of St. Peter's apostolic work.

Cappadocia is an elevated table-land intersected by mountain-chains. It seems always to have been deficient in wood; but it was a good grain country, and it was particularly famous for grazing. Its Roman metropolis, afterwards both the birthplace and episcopal see of St. Basil, was Caesarea (now *Kaisariyeh*), formerly Mazaca, situated near Mount Argaeus, the highest mountain in Asia Minor. Some of its other cities were equally celebrated in ecclesiastical history, especially Nyssa, Nazianzus, Samosata, and Tyana. The native Cappadocians seem originally to have belonged to the Syrian, or, more probably, to the Hittite stock: and since Ptolemy (v. 6) places the cities of Iconium and Derbe within the limits of this region, we may possibly obtain from this circumstance some light on "the speech of Lycaonia," Acts xiv. 11 [LYCAONIA]. See Hamilton's *Researches*, and Texier's *Asie Mineure;* also *Dict. of Gr. and Rom. Geog.*, art. CAPPADOCIA. [J. S. H.] [W.]

CAPTAIN. As a purely military title captain answers to שַׁר in the Hebrew army, and *χιλίαρχος* (*tribunus*) in the Roman. [ARMY.] The "captain of the guard" [a] (*στρατοπεδάρχης*) in Acts xxviii.

[a] The word is absent from all the principal MSS., is not recognised by the Syriac and Vulgate Versions, and is omitted by critical editors. Discussion as to the identification of this "captain of the guard" with Burrus Afranius is therefore, however interesting in

16 corresponds to the *tribunus legionis*. (2.) קָצִין, which is occasionally rendered *captain*, applies sometimes to a military (Josh. x. 24; Judg. xi. 6, 11; Is. xxii. 3; Dan. xi. 18), sometimes to a civil command (*e.g.* Is. i. 10, iii. 6): its radical sense is *division*, and hence *decision* without reference to the means employed: the term illustrates the double office of the שֹׁפֵט. (3.) The "captain of the Temple" (στρατηγὸς τοῦ ἱεροῦ) mentioned by St. Luke (xxii. 4; Acts iv. 1, v. 24) in connexion with the priests, was not a military officer, but one who superintended the guard of priests and Levites who kept watch by night in the Temple. The office appears to have existed from an early date; the "priests that kept the door" (2 K. xii. 9, xxv. 18) are described by Josephus (*Ant.* x. 8, § 5) as τοὺς φυλάσσοντας τὸ ἱερὸν ἡγεμόνας: a notice occurs in 2 Macc. iii. 4 of a προστάτης τοῦ ἱεροῦ; this officer is styled στρατηγὸς by Josephus (*Ant.* xx. 6, § 2; *B. J.* vi. 5, § 3), and in the Mishna (*Middoth*, i. § 2) אִישׁ הַר הַבַּיִת, "the captain of the mountain of the Temple;" his duty, as described in the place last quoted, was to visit the posts during the night, and see that the sentries were doing their duty. (4.) The term ἄρχηγος, rendered "*captain*" (Heb. ii. 10), has no reference whatever to a military office. [W. L. B.] [F.]

CAPTIVITIES OF THE JEWS. The bondage of Israel in Egypt, and their subjugation at different times by the Philistines and other nations, are sometimes included under the above title; and the Jews themselves, perhaps with reference to Daniel's vision (ch. vii.), reckon their national captivities as four—the Babylonian, Median, Grecian, and Roman (Eisenmenger, *Entdecktes Judenthum*, i. 748). But the present article is confined to the forcible deportation of the Jews from their native land, and their forcible detention, under the Assyrian or Babylonian kings.

The kingdom of Israel was invaded by three or four successive kings of Assyria. Pul (generally identified with Tiglath-pileser III., *Records of the Past*, N. S. i. 17; Schrader, *Keilinschr. Bibliothek*, ii. 2, n. 1) imposed a tribute in B.C. 771 (*al.* 738) upon Menahem (1 Ch. v. 26 and 2 K. xv. 19); and carried away in B.C. 740 (*al.* 734) the trans-Jordanic tribes (1 Ch. v. 26) and the inhabitants of Galilee (2 K. xv. 29, cp. Is. ix. 1), to Assyria (Schrader, *KB.* ii. 25, &c.). Shalmaneser invaded (2 K. xvii. 3) the kingdom which remained to Hoshea; and his successor, Sargon (cp. Is. xx. 1), after the siege of Samaria had lasted two years, took the city (B.C. 722), and carried Israel away into Assyria (cp. Schrader, *KB.* ii. 43). The cities of Samaria were gradually occupied by people sent from Babylon, Cuthah, Ava, Hamath, and Sepharvaim, who brought with them the worship of their own native deities; and Halah, Habor, Hara, and the river of Gozan became the seats of the exiled Israelites.

Sennacherib B.C. 701 is stated (see the Taylor-cylinder, *Records of the Past*, O. S. i. pp. 38–9; Schrader, *KAT.*² pp. 292–3, *KB.* ii. 81, &c.) to have carried into Assyria 200,150 captives from the Jewish cities which he took (cp. 2 K. xviii. 13). Nebuchadnezzar, in the first half of his reign, B.C. 606–562, repeatedly invaded Judaea, besieged Jerusalem, carried away the inhabitants to Babylon, and destroyed the city and Temple. Two distinct deportations are mentioned in 2 K. xxiv. 14 (including 10,000 persons) and xxv. 11; one in 2 Ch. xxxvi. 20; three in Jer. lii. 28, 29, including 4,600 persons, and one in Dan. i. 3. The two principal deportations were, (1) that which took place B.C. 597, when Jehoiachin with all the nobles, soldiers, and artificers were carried away; and (2) that which followed the destruction of the Temple and the capture of Zedekiah B.C. 586. The three which Jeremiah mentions may have been the contributions of a particular class or district to the general captivity; or they may have taken place, under the orders of Nebuchadnezzar, before or after the two principal deportations. The captivity of certain selected children B.C. 607, mentioned by Daniel, who was one of them, occurred when Nebuchadnezzar was colleague of his father Nabopolassar, a year before he reigned alone. The captivity of Ezekiel dates from B.C. 598, when that prophet, like Mordecai the uncle of Esther (ii. 6), accompanied Jehoiachin.

We know nothing, except by inference from the Book of Tobit, of the religious or social state of the Israelitish exiles in Assyria. Doubtless the constant policy of seventeen successive kings had effectually estranged the people from that religion which centered in the Temple, and had reduced the number of faithful men below the 7000 who were revealed for the consolation of Elijah. Some priests at least were among them (2 K. xvii. 28; cp. Edersheim, *Bible Hist.* iv. 117), though it is not certain that these were of the tribe of Levi (1 K. xii. 31). The people had been nurtured for 250 years in idolatry in their own land, where they departed not (2 K. xvii. 22) from the sins of Jeroboam, notwithstanding the proximity of the Temple, and the succession of inspired prophets (2 K. xvii. 13) among them. Deprived of these checks on their natural inclinations (2 K. xvii. 15), torn from their native soil, destitute of a hereditary king, they probably became more and more closely assimilated to their heathen neighbours in Media. And when, after the lapse of more than a century, they were joined B.C. 598 by the first exiles from Jerusalem, very few families probably retained sufficient faith in the God of their fathers to appreciate and follow the instruction of Ezekiel. But whether they were many or few, their genealogies were probably lost, a fusion of them with the Jews took place, Israel ceasing to envy Judah (Is. xi. 13); and Ezekiel may have seen his own symbolical prophecy (xxxvii. 15–19) partly fulfilled.

The captive Jews were probably prostrated at first by their great calamity, till the glorious vision of Ezekiel in the 5th year of the Captivity revived and reunited them. The wishes of their conqueror were satisfied when he had displayed his power by transporting them into another land, and gratified his pride by inscribing on the walls of the royal palace his victorious progress and the number of his captives. He could not have designed to increase the population of Babylon, for he sent Baby-

itself, unnecessary (see note in *Speaker's Comm.*, and Abbot in *D. B.* Amer. ed.). [F.]

lonian colonists into Samaria. One political end certainly was attained—the more easy government of a people separated from local traditions and associations (see Gesenius on Is. xxxvi. 16, and cp. Gen. xlvii. 21). It was also a great advantage to the Assyrian king to remove from the Egyptian border of his empire a people who were notoriously well-affected towards Egypt. The captives were treated not as slaves but as colonists. There was nothing to hinder a Jew from rising to the highest eminence in the state (Dan. ii. 48), or holding the most confidential office near the person of the king (Neh. i. 11; Tob. i. 13, 22). The advice of Jeremiah (xxix. 5, &c.) was generally followed. The exiles increased in numbers and in wealth. They observed the Mosaic law (Esth. iii. 8; Tob. xiv. 9). They kept up distinctions of rank among themselves (Ezek. xx. 1). And though the assertion in the Talmud is unsupported by proof that they assigned thus early to one of their countrymen the title of Head of the Captivity (or, captain of the people, 2 Esd. v. 16), it is certain that they at least preserved their genealogical tables, and were at no loss to tell who was the rightful heir to David's throne. They had neither place nor time of national gathering, no Temple; and they offered no sacrifice. But the rite of circumcision and their laws respecting food, &c. were observed; their priests were with them (Jer. xxix. 1); and possibly the practice of erecting synagogues in every city (Acts xv. 21) was begun by the Jews in the Babylonian Captivity.

The Captivity is not without contemporaneous literature. In the apocryphal Book of Tobit, which is generally believed to be a mixture of poetical fiction with historical facts recorded by a contemporary, we have a picture of the inner life of a family of the tribe of Naphtali, among the captives whom Shalmaneser brought to Nineveh. The apocryphal Book of Baruch seems, in Sir A.H. Layard's opinion, to have been written by one whose eyes, like those of Ezekiel, were familiar with the gigantic forms of Assyrian sculpture. Several of the Psalms appear to express the sentiments of Jews who were either partakers or witnesses of the Assyrian captivity. Ewald assigns to this period Pss. xlii., xliii., lxxxiv., xvii., xvi., xlix., xxii., xxv., xxxviii., lxxxviii., xl., lxix., cix., li., lxxi., xxv., xxxiv., lxxxii., xiv., cxx., cxxi., cxxiii., cxxx., cxxxi. And in Ps. lxxx. we seem to have the words of an Israelite, dwelling perhaps in Judaea (2 Ch. xv. 9, xxxi. 6), who had seen the departure of his countrymen to Assyria: and in Ps. cxxxvii. an outpouring of the first intense feelings of a Jewish exile in Babylon. But it is from the three great Prophets, Jeremiah, Ezekiel, and Daniel, that we learn most of the condition of the children of the Captivity. The distant warnings of Jeremiah, advising and cheering them, followed them into Assyria. There, for a few years, they had no prophet guide; till suddenly the vision of Ezekiel at CHEBAR assured them that the glory which filled the Temple at Jerusalem was not hopelessly withdrawn from the outcast people of God. As Jeremiah warned them of coming woe, so Ezekiel taught them how to bear that which was come upon them. And when he died, after passing at least 27 years (Ezek. xxix. 17) in captivity, Daniel survived, it is thought, even beyond the Return; and though his high station and ascetic life probably secluded him from frequent familiar intercourse with his people, he filled the place of chief interpreter of God's will to Israel, and gave the most conspicuous example of devotion and obedience to His laws.

The Babylonian Captivity was brought to a close by the decree (Ezra i. 2) of Cyrus B.C. 536, and the return of a portion of the nation under Sheshbazzar or Zerubbabel B.C. 535, Ezra B.C. 458, and Nehemiah B.C. 445. The number who returned upon the decree of B.C. 536 was 42,360, besides servants. Among them about 30,000 are specified (cp. Ezra ii. and Neh. vii.) as belonging to the tribes of Judah, Benjamin, and Levi. It has been inferred (Prideaux, *anno* 536) that the remaining 12,000 belonged to the tribes of Israel (cp. Ezra vi. 17). And from the fact that out of the 24 courses of priests only 4 returned (Ezra ii. 36), it has been inferred that the whole number of exiles who chose to continue in Assyria was about six times the number of those who returned. Those who remained (Esth. viii. 9, 11), and kept up their national distinctions, were known as The Dispersion (John vii. 35; 1 Pet. i. 1; James i. 1): and they served a great purpose in diffusing a knowledge of the true God, and in affording a point for the commencement of the efforts of the Evangelists of the Christian faith (cp. Edersheim, *Life, &c. of Jesus*, i., chs. i. ii.).

Many attempts have been made to discover the ten tribes existing as a distinct community. Josephus (*Ant.* xi. 5, § 2) believed that in his day they dwelt in large multitudes, somewhere beyond the Euphrates, in Arsareth, according to the author of 2 Esd. xiii. 45. Rabbinical traditions and fables, committed to writing in the Middle Ages, assert the same fact (Lightfoot, *Hor. Hebr.* in 1 Cor. xiv. Appendix), with many marvellous amplifications (Eisenmenger, *Ent. Jud.* vol. ii., ch. x.; Jahn, *Hebrew Commonwealth*, App. bk. vi.). The imagination of Christian writers has sought them in the neighbourhood of their last recorded habitation: Jewish features have been traced in the Affghan tribes: rumours are heard to this day of a Jewish colony at the foot of the Himalayas: the Black Jews of Malabar claim affinity with them: elaborate attempts have been made to identify them recently with the Nestorians, and in the 17th century with the Indians of North America. But though history bears no witness of their present distinct existence, it enables us to track the footsteps of the departing race in four directions after the time of the Captivity. (1.) Some returned and mixed with the Jews (Luke ii. 36; Phil. iii. 5, &c.). (2.) Some were left in Samaria, mingled with the Samaritans (Ezra vi. 21; John iv. 12), and became bitter enemies of the Jews. (3.) Many remained in Assyria, and mixing with the Jews formed colonies throughout the East, and were recognised as an integral part of the Dispersion (see Acts ii. 9, xxvi. 7; Buchanan's *Christian Researches*, p. 212), for whom, probably ever since the days of Ezra, that plaintive prayer, the tenth of the Shemoneh Esre, has been daily offered, "Sound the great trumpet for our deliverance, lift up a banner for the gathering of our exiles, and unite us all together from the

four ends of the earth." (4.) Most, probably, apostatized in Assyria, as Prideaux (*anno* 677) supposes, and adopted the usages and idolatry of the nations among whom they were planted, and became wholly swallowed up in them. Dissertations on the Ten Tribes have been written by Calmet, *Commentaire Littéral*, vols. iii. and vi.; by Witsius, *Aegyptiaca;* by J. D. Michaelis, and by Neubauer, *Jewish Quarterly Review*, i. [1888–9].

The Captivity was a period of change in the vernacular language of the Jews (see Neh. viii. 8) and in the national character. The Jews who returned were remarkably free from the old sin of idolatry: a great spiritual renovation, in accordance with the divine promise (Ezek. xxxvi. 24–28), was wrought in them. A new and deep feeling of reverence for the letter of the Law and for the person of Moses was probably a result of the religious service which was performed in the synagogues. A new impulse of commercial enterprise and activity was implanted in them, and developed in the days of the Dispersion (see James iv. 13). [W. T. B.] [F.]

CARABA'SION (B. Καραβασειών, A. -ιων; *Marimoth*), a corrupt name (1 Esd. ix. 34) to which it is difficult to find anything corresponding in the Hebrew text of Erza x. 33, &c. The conjecture that it may be a rendering of the Vat. text καὶ Ῥαβασιὼν is not supported by the true reading of that text. [F.]

CARBUNCLE. The representative in the A. V. of the Hebrew words *'ekdâch* and *bâr'kath* or *bâreketh.*

1. *'Ekdâch* (אֶקְדָּח; λίθος κρύσταλλου; λίθος γλυφῆς, Sym., Theod.; λ. τρηπτανισμοῦ, Aq.; *lapides sculpti*) occurs only in Is. liv. 12 in the description of the beauties of the new Jerusalem: "I will make thy windows of agates [R. V. "thy pinnacles of rubies"] and thy gates of carbuncles" (cp. Tob. xiii. 16, 17, and Rev. xxi. 18–21)—"general images," as Lowth (*Notes on Is.* l. c.) has remarked, "to express beauty, magnificence, purity, strength, and solidity, agreeably to the ideas of the Eastern nations." The translators of the A. V., having in mind the etymology of the Hebrew word,[a] render it "carbuncle;" but as many precious stones have the quality of "shining like fire," it is obvious that such an interpretation is very doubtful. Symmachus, referring the word to a Chaldee signification of the root, viz. "to bore," understands "sculptured stones," whence the Vulg. *lapides sculpti* (see Rosenmüller, *Schol. ad Jes.* liv. 13). Perhaps the term may be a general one to denote any *bright sparkling gem;* but as it occurs only once, without any collateral evidence to aid us, it is impossible to determine the real meaning of the word.

2. *Bâr'kath, bâreketh* (בָּרְקַת, בָּרֶקֶת;[b] σμάραγδος, κεραύνιος, Sym.; *smaragdus*), the third stone in the first row of the sacerdotal breastplate (Ex. xxviii. 17; xxxix. 10), also one of the mineral treasures of the king of Tyre (Ezek. xxviii. 13). Braun (*de Vestit. Sacerd. Heb.* p. 652, Amst. 1680) supposes with much probability that the smaragdus or emerald is the precious stone signified. This view is supported by the LXX. (which always gives σμάραγδος as the representative of the *bâr'kath*), the Vulgate, and Josephus (*Ant.* iii. 7, § 5). Pliny (xxxvii. 5) speaks in terms of the warmest admiration of the smaragdus, and enumerates twelve kinds, but it is probable that some of them are malachites or glass. It is certain that the smaragdus which, according to Theophrastus (*Fr.* ii. 24, ed. Schneider), was sent as a present from the king of Babylon into Egypt, and which, as Egyptian chronicles relate, was four cubits long by three wide, must have been made of some other material than emerald; but σμάραγδος is used by Theophrastus to denote the emerald. "This gem," he says, "is very rare and of a small size . . . It has some peculiar properties, for it renders water of the same colour with itself. . . . It soothes the eyes, and people wear seals of this stone in order that they may look at them."[c] Mr. King (*Antique Gems*, p. 30) is of opinion that the smaragdi of Pliny may be confined to the green ruby and the true emerald. Braun believes that the Greek σμάραγδος, μάραγδος is etymologically allied to the Hebrew term, and Kalisch (on Ex. xxviii. 17) is inclined to this opinion: see also Gesenius, *Heb. et Ch. Lex.* s. v. בָּרְקַת. Some, however, believe the Greek word to be a corruption of the Sanskrit *smarakata*, and that both the gem and its name were imported from Bactria into Europe, while others hold that the Sanskrit term came from the West. See Mr. King's valuable remarks on the Smaragdus, *Antique Gems*, pp. 30–37. [W. H.] [H. B. T.]

CAR'CAS (כַּרְכַּס; *Charchas.* In the place of this name T.[7] reads Θαραβᾶ, ℵ.* Θαβάζ), the seventh of the seven "chamberlains" (*i.e.* eunuchs, סָרִיסִים) of king Ahasuerus (Esth. i. 10). The name has been compared with the Pers. *Kargas* or Zend *Kahrkâça* = *severe* (Ges. *Thes.* p. 713) or *vulture* (MV.[11] s. n.); but its etymology is quite a matter of conjecture. [G.] [F.]

CAR'CHAMIS, 1 Esd. i. 25, A. V. ed. 1611 (B. Χαρκαμύς, A. Καλχαμύς; *Charcamis*), a city on the Euphrates. [CARCHEMISH.] [F.]

CARCHEMISH (כַּרְכְּמִישׁ; *Charcamis*). The site of Carchemish, the ancient capital of the Hittites, has been placed sometimes at Circesium, sometimes at Mabug or Membij, and by Nöldeke near Kal'at Nejm. By the help of the Assyrian inscriptions, however, Messrs. Skene and George Smith were enabled to identify it with the ruins of Jerablûs or Hierapolis (called Jerabîs by Pococke and Sachau, and identified with Europus or Oropus by Hoffmann), which lie on the western bank of the Euphrates, between Birejik or Bir—the Birtu, "fortress," of the Assyrian monuments—and the junction of the Sajur and Euphrates. Excavations on

[a] From קָדַח, "to burn." Cp. the Arabic قَدَحَ, "extundere instituit ignem ex igniario" (Freytag, *Lex. Arab.* s. v.).

[b] From בָּרַק, "to send forth lightning," "to flash."

[c] The smaragdus of Cyprus, however, of which Theophrastus speaks, is the copper emerald, *Chrysocolla;* which he seems himself to have suspected.

the site have brought to light Hittite sculptures and inscriptions, some of which are now in the British Museum. Carchemish was called Gargamis by the Assyrians, Karkamesh by the Egyptians, while Stephanus Byzantinus states that Oropus (Ὥρωπος) was originally named Telmessus. It commanded the most important ford across the Euphrates on the high-road from Mesopotamia into Syria, and was therefore strongly fortified by the Hittite tribes when they descended from the highlands of Cappadocia and occupied part of the territory of the Semitic Arameans. Like Kadesh on the Orontes, the southern Hittite capital, Carchemish also took part in the wars with Egypt in the time of the 18th and 19th dynasties. In B.C. 1130 the Assyrian king Tiglath-pileser I. wasted the country up to the walls of Carchemish, and killed the *reem* or wild ox in the district facing it on the eastern bank of the Euphrates. Assur-natsir-pal received tribute from Sangara, the king of Carchemish, who, after unsuccessfully contending with Shalmaneser II. in B.C. 858, purchased peace by the offer of one-third of a gold talent, one and a sixth talent of silver, 30 talents of bronze, 100 talents of iron, 20 talents of white and purple cloth, 5 thrones, 500 oxen, 5000 sheep, and the daughters of himself and 100 of his nobles. The Assyrian king further imposed a yearly tribute of a maneh of gold, a talent of silver and 2 talents of white and purple cloth, and occupied Pethor, a few miles south of Carchemish, on the eastern bank of the Sajur, where it falls into the Euphrates. Carchemish was taken by Sargon in B.C. 717, and its last king, Pisiris, put to death. Henceforth it became the seat of an Assyrian satrap, and its position on the great caravan road gave it so important a commercial influence as to cause "the maneh of Carchemish" to become a standard weight. Like Kadesh, Carchemish was regarded as a sacred city on account of the temple of the Asiatic goddess [see ATARGATIS] which stood in it. In the Greek period both the temple and the traditions connected with it were transferred to Bambykê or Mabog, now *Membij*, which henceforth was known as Hierapolis. Membij, however, had no existence in the Assyrian epoch. After the Roman age the site of Carchemish was deserted. The meaning of the name is unknown. Carchemish is only twice mentioned in the Bible (2 Ch. xxxv. 20 [LXX. om.]; Jer. xlvi. 2 [T. Χαρμεὶς]), on the occasion of the battle which took place under its walls between Nebuchadnezzar and Pharaoh Necho (B.C. 605) and which decided the fate of Western Asia. [A. H. S.]

CARE'AH (קָרֵחַ = *bald-head;* BA. Καρήθ; *Caree*), father of Johanan (2 K. xxv. 23), elsewhere in the A.V. spelt KAREAH. [G.]

CA'RIA (Καρία), the southern part of the region which in the N. T. is called ASIA, and the south-western part of the peninsula of Asia Minor. In the Roman times the name of Caria was probably less used than previously. At an earlier period we find it mentioned as a separate district (1 Macc. xv. 23). At that time (B.C. 139) it was in the enjoyment of the privilege of freedom, granted by the Romans. A little before it had been assigned by them to Rhodes, and a little later it was incorporated in the province of Asia. From the context it appears that many Jews were resident in Caria. The cities where they lived were probably Halicarnassus (*ib.*), Cnidus (*ib.*; cp. Acts xxvii. 7), and Miletus (Acts xx. 15–38). Off the coast of Caria were the islands PATMOS, COS, RHODES (*Dict. of Gr. and Rom. Geog.*, art. CARIA). [J. S. H.]

CARMA'NIANS (*Carmonii*). The inhabitants of Carmania [*Kirman*], a province of Asia on the north side of the Persian Gulf, to the west of Gedrosia (2 Esd. xv. 30). They are described by Strabo (xv. p. 727) as a warlike race, worshipping Ares alone of all the gods, to whom they sacrifice an ass. None of them married till he had cut off the head of an enemy and presented it to the king, who placed it on his palace, having first cut out the tongue, which was chopped up into small pieces and mixed with meal; and in this condition, after being tasted by the king, was given to the warrior who brought it and to his family to eat. Nearchus says that most of the customs of the Carmanians, and their language, were Persian and Median. Arrian gives the same testimony (*Ind.* 38), adding that they used the same order of battle as the Persians. The events obscurely shadowed forth in 2 Esd. are thought to have been the conquests of the Sassanidae and their conflicts with the Roman generals (see *Speaker's Comm.* in loco). [G.] [F.]

CAR'ME (B. Χαρμή; *Caree*), 1 Esd. v. 25. [HARIM.] [G.]

CAR'MEL. Nearly always with the definite article, הַכַּרְמֶל, *i.e.* "the park," or "the well-wooded place." **1.** (ὁ Καρμήλος; *Carmel, Carmelus, Charmel.* In Kings, generally "Mount C." הַר הַכַּרְמֶל; ὄρος τὸ Καρμήλιον: in the Prophets, "Carmel.") A mountain which forms one of the most striking and characteristic features of the country of Palestine. As if to accentuate more distinctly the bay which forms the one indentation in the coast, this noble ridge, the only headland of lower and central Palestine, forms its southern boundary running out with a bold bluff promontory all but into the very waves of the Mediterranean. From this point it stretches in a nearly straight line, bearing about S.E., for a little more than twelve miles, when it terminates suddenly by a bluff somewhat corresponding to its western end, breaking down abruptly into the hills of *Jenin* and Samaria which form at that part the central mass of the country.

Carmel thus stands as a wall between the maritime plain of Sharon on the south-west, and the more inland expanse of Esdraelon on the north-east. Towards the former the slopes or spurs, by which the central ridge descends, are gradual; but on the north side the gradients are more sudden, in many places descending almost by precipices to the Kishon, which runs at the foot of the mountain in a direction generally parallel to the central axis.

The mountain is formed of hard grey limestone, belonging to the chalk series, with nodules and veins of flint. As usual in limestone formations it abounds in caves ("more than 2000," Mislin, ii. 46), often of great length and extremely tortuous. At the west end are found chalk and

tertiary breccia formed of fragments of chalk and flint (Russegger, in Ritter, *Pal.* p. 712; there are also beds of nummulitic limestone). On the north-east of the mount, beyond the *Nahr el-Mukutt'a*, plutonic rocks appear, breaking through the deposited strata and forming the beginning of the basalt formation which runs through the Plain of Esdraelon to Tabor and the Sea of Galilee (Ritter, pp. 712–13). The round stones, known by the names of "Lapides Judaici" and "Elijah's melons," are the bodies known to geologists as "geodes." Their exterior is chert or flint of a lightish brown colour; the interior hollow, and lined with crystals of quartz or chalcedony. They are of the form, and often the size, of the large water-melons of the East. Formerly they were easily obtained, but are now very rarely found (Seetzen, ii. 131–4; Parkinson's *Organic Remains*, i. 322, 451). The "olives" are commoner. They are the fossil spines of a kind of echinus (*Cidaris glandifera*) frequent in these strata, and in size and shape are exactly like the fruit (Parkinson, iii. 45). The "apples" are probably the shells of the *cidaris* itself. For the legend of the origin of these "fruits," and the position of the "field" or "garden" of Elijah in which they are found, see Mislin, ii. 64–5.[a]

In form Carmel is a tolerably continuous ridge, at the W. end about 470[b] feet and the E. about 1600 feet above the sea. The highest part is some four miles from the east end, at the village of *'Esfia*, which is 1742 feet above the sea. In appearance Carmel still maintains the character which there is no reason to doubt was the origin of its name. It is still clothed with the same "excellency" of "wood," which supplied the prophets of Israel and Judah alike

Mount Carmel. (From a photograph.)

with one of their most favourite illustrations (Is. xxxiii. 9; Mic. vii. 14). Modern travellers delight to describe its "rocky dells with deep jungles of copse"—its "shrubberies thicker than any others in central Palestine" (Stanley, MS.)—its "impenetrable brushwood of oaks and other evergreens, tenanted in the wilder parts by a profusion of game and wild animals" (Porter, *Handb.*), but in other places bright with "hollyhocks, jasmine, and various flowering creepers" (Van de Velde). "There is not a flower," says the last-named traveller, "that I have seen in Galilee, or on the plains along the coast, that I do not find here on Carmel . . . still the fragrant, lovely mountain that it was of old" (i. 317–8). "The whole mountain side was dressed with blossoms and flowering shrubs and fragrant herbs" (Martineau, p. 539). See also Schubert (*Reise i. d. Md.* iii. 212), and Conder (*Tent Work in Pal.* i. ch. 6, especially pp. 172, 179). The roebuck is mentioned (p. 173) amongst the animals found on Carmel.

Carmel fell within the lot of the tribe of Asher (Josh. xix. 26), which was extended as far south as Dor (*Tantûra*), probably to give the Asherites a share of the rich corn-growing plain of Sharon. The king of "Jokneam of Carmel" was one of the Canaanite chiefs who fell before the arms of Joshua (xii. 22). These are the earliest notices which we possess of the name. There is not in them a hint of any sanctity as attaching to the mount. But

[a] The legend is sometimes told of Lazarus (Seetzen, *Reisen*, 1854, ii. 134).

[b] The cupola of the convent is 556 ft. above the sea. For the general form of the ridge, see *PEF.* Map of Western Palestine, sheet V.

taking into account the known propensity of the early inhabitants of Palestine to convert "high places" into sanctuaries—the prominence of Carmel—the fact that an altar of Jehovah did exist there before the introduction of Baal worship into the kingdom (1 K. xviii. 30)—Elijah's choice of the place for the assembly of the people, such assemblies being commonly held at holy places—and the custom, which appears to have been prevalent, of resorting thither on new-moon and sabbath (2 K. iv. 23)—taking these into account, there seem to be grounds for believing that from very early times it was considered as a sacred spot. In later times we know that its reputation was not confined to Palestine. Pythagoras was led to it by that reputation; such is the express statement of his biographer Iamblichus, who himself visited the mountain; Vespasian too came thither to consult—so we are told by Tacitus with that mixture of fact and fable which marks all the heathen notices of Palestine—the oracle of the god whose name was the same as that of the mountain itself; an oracle without image or temple—"ara tantum et reverentia" (*Dict. of Anc. Geogr.*, "Carmelus").

But that which has made the name of Carmel most familiar to the modern world is its intimate connexion with the history of the two great prophets of Israel—Elijah and Elisha. The fiery zeal of the one, the healing tenderness of the other, are both inseparably connected in our minds with this mountain. Here Elijah brought back Israel to allegiance to Jehovah, and slew the prophets of the foreign and false god; here at his entreaty were consumed the successive "fifties" of the royal guard; but here, on the other hand, Elisha received the visit of the bereaved mother whose son he was soon to restore to her arms (2 K. iv. 25, &c.).

The first of these three events, without doubt, took place at the eastern end of the ridge. In fact it is difficult to find another site, the actual name of which has not been preserved, in which every particular is so minutely fulfilled as in this. The tradition preserved in the convent, and among the Druses of the neighbouring villages—the names of the places—the distance from Jezreel—the nature of the locality—the presence of the never-failing spring—all are in its favour. The identification was made by two travellers almost at the same time—Van de Velde in 1852, and Dean Stanley in 1853. This interesting site cannot be better described than in the words of the latter traveller:—

"The tradition is unusually trustworthy: it is perhaps the only case in Palestine in which the recollection of an alleged event has been actually retained in the native Arabic nomenclature. Many names of towns have been so preserved, but here is no town, only a shapeless ruin, yet the spot has a name—*El-Maharrakah*—'the burning,' or 'the sacrifice.' The Druses come here from a distance to perform a yearly sacrifice; and, though it is possible that this practice may have originated the name, it is more probable that the practice itself arose from an earlier tradition. . . . But be the tradition good or bad, the localities adapt themselves to the event in almost every particular. The summit thus marked out is the extreme eastern point of the range, commanding the last view of the sea behind, and the first view of the great plain in front. . . . There on the highest ridge of the mountain may well have stood on its sacred 'high-place' the altar of Jehovah which Jezebel had cast down. Close beneath, on a wide upland sweep, under the shade of ancient olives and round a well[c] of water, said to be perennial, and which may therefore have escaped the general drought, and have been able to furnish water for the trenches round the altar, must have been ranged on one side the king and people with the 850 prophets of Baal and Astarte, and on the other the solitary and commanding figure of the prophet of Jehovah. Full before them opened the whole plain of Esdraelon: the city of Jezreel, with Ahab's palace and Jezebel's temple, distinctly visible: in the nearer foreground, immediately under the base of the mountain, was clearly seen the winding bed of the Kishon." To this may be added that a knoll is pointed out between the ridge and the plain, bearing the name of *Tell Kasis*,[d] "the hill of the Priests," and that the modern name of the Kishon is *Nahr el-Mukutta'*, "the river of slaughter." "The closing scene still remains. From the slaughter by the side of the Kishon the king went up to the glades of Carmel to join in the sacrificial feast. And Elijah too ascended to the 'top of the mountain,' and there with his face on the earth remained rapt in prayer, while his servant mounted to the highest point of all, whence there is a wide view of the blue reach of the Mediterranean, over the western shoulder of the ridge. . . . Seven times the servant climbed and looked, and seven times there was nothing. . . . At last out of the far horizon there rose a little cloud,[e] and it grew in the deepening shades of evening till the whole sky was overcast, and the forests of Carmel shook in the welcome sound of the mighty winds, which in eastern regions precede a coming tempest" (*Sinai and Palestine*, pp. 353–6. See also Conder, *Tent Work in Pal.* i. 169–71).

There is good reason to believe that a later incident in the life of the same great prophet took place on Carmel. This was when he "caused fire to come down from heaven" and consume the two "fifties" of the guard which Ahaziah had despatched to take him prisoner, for having stopped his messengers to Baalzebub the god of Ekron (2 K. i. 9–15). [See ELIJAH.] In this narrative our Version, as is too frequently the case, conceals the force of the original by imperfect translation. "A hill" (*v.* 9, R. V.) should be "the hill" (הַכַּרְמֶל), the word always used for Carmel, and, in connexion with Elijah, for Carmel only, with the exception of Sinai, which of course cannot be intended here. Josephus (*Ant.* ix. 2, § 1), with equal force, has ἐπὶ τῆς κορυφῆς τοῦ ὄρους.

---

[c] Josephus distinctly says that the water was obtained from the neighbouring well: ἀπὸ τῆς κρήνης (*Ant.* viii. 13, § 5).

[d] But this knoll appears to be too far off (*PEF.* Map of Western Pal., sheet v.).

[e] This cloud is treated in the formularies of the Roman Catholic Church as a type of the Virgin Mary (see Mislin, ii. p. 45, and *Breviarium Rom.* July 16).

The tradition in the present convent is, that Elijah and Elisha both resided on the mountain, and a cave is actually shown under the high altar of the church as that of Elijah. There is nothing in the Scripture to sanction such a statement with regard to Elijah; but in the case of Elisha, the tradition may rest on better grounds. After the ascent of Elijah, Elisha went to Mount Carmel (2 K. ii. 25), though only for a time; but he was again there at the Shunammite's visit (iv. 25), and that at a time when no festival, no "new moon or sabbath" (*v.* 23), required his presence.

This is the last mention of Carmel as the scene of any event in the sacred history. Its sanctity no doubt remained, but it is its richness and its prominence—"Tabor among the mountains; Carmel by the sea"—which appear to have taken hold of the poets of the nation, both of Israel and Judah, and their references to it are frequent and characteristic (Cant. vii. 5; Is. xxxv. 2, xxxvii. 24; Jer. xlvi. 18, l. 19; Amos i. 2, ix. 3; Mic. vii. 14; Nah. i. 4).[1]

Carmel has derived its modern name from the great prophet; *Mâr Elyâs* is the common designation, *Kŭrmul* being occasionally, but only seldom, heard. It is also the usual name of the convent, though dedicated "in honorem BB. Virginis Mariae."

Dean Stanley has pointed out (*S. and P.* p. 352) that it is not any connexion with Elijah that gives the convent its interest to the western world, but the celebrated order of the Barefooted Carmelite Friars, that has sprung from it, and carried its name into Europe. The order is said in the traditions of the Latin Church to have originated with Elijah himself (St. John of Jerus. quoted in Mislin, ii. 49), but the convent was founded by St. Louis, and its French origin is still shown by the practice of unfurling the French flag on various occasions. Edward I. of England was a brother of the order, and one of its most famous generals was Simon Stocks of Kent (see the extracts in Wilson's *Lands*, &c., ii. 246. For the convent and the singular legends connecting Mount Carmel with the Virgin Mary and our Lord, see Mislin, ii. 47–50). By Napoleon it was used as a hospital during the siege of Acre, and after his retreat was destroyed by the Arabs. At the time of the visit of Irby and Mangles (1817) only one friar remained there (Irby, p. 60), in 1883 there were 18 (Wetzer u. Welte, *Kirch. Lex.*[2] s. n.).

2. Χερμέλ in Josh.; τὸ Κάρμηλον in Sam.; *Charmel, Carmelus.* A town in the mountainous country of Judah (Josh. xv. 55), familiar to us as the residence of Nabal (1 Sam. xxv. 2, 5, 7, 40), and the native place of David's favourite wife, "Abigail the Carmelitess" (1 Sam. xxvii. 3; 1 Ch. iii. 1). This was doubtless the Carmel at which Saul set up a "place" (יָד, *i.e.* a monument or trophy, literally a "hand;" cp. 2 Sam. xviii. 18, where the same word is used) after his victory over Amalek (1 Sam. xv. 12). And this Carmel, and not the northern mount, must have been the spot at which king Uzziah had his vineyards (2 Ch. xxvi. 10). In the time of Eusebius and Jerome it was the seat of a Roman garrison (*OS.*[2] pp. 144, 31; 271, 76). The place appears in the wars of the Crusades, having been held by king Amalrich against Saladin in 1172. The ruins of the town, now *Kurmul*, still remain at ten miles below Hebron in a slightly S.E. direction, close to those of *Main* (Maon), *Zif* (Ziph), and other places named with Carmel in Josh. xv. 55. They are described both by Robinson (i. 494–8) and by Van de Velde (ii. 77–79), and appear to be of great extent. Conspicuous among them is a castle of great strength, in the walls of which is still to be seen massive masonry of ancient date. There is also a very fine and large reservoir. This is mentioned in the account of king Amalrich's occupation of the place, and now gives the castle its name of *Kasr el-Birkeh* (Van de Velde, ii. 78; *PEF. Mem.* iii. 312, 372). [G.] [W.]

CAR'MELITE (הַכַּרְמְלִי: B. Καρμήλιος [in 1 Sam. xxx. 5, 2 Sam. ii. 2, xxiii. 35; Χαρμαδαί in 1 Ch. xi. 37]; A. Καρμηλίτης in 2 Sam. ii. 2, Καρμηλί in 1 Ch. xi. 37, -ιος in 1 Sam. xxx. 5, 2 Sam. xxiii. 35: *Carmeli, de Carmelo, Carmelites*). A native of Carmel in the mountains of Judah. The term is applied to Nabal (1 Sam. xxx. 5; 2 Sam. ii. 2, iii. 3) and to Hezrai, or Hezro, one of David's guard (2 Sam. xxiii. 35; 1 Ch. xi. 37). In 2 Sam. iii. 3 the LXX. must have read הַכַּרְמְלִית, "Carmelitess." [W. A. W.]

CAR'MELITESS (הַכַּרְמְלִית; Καρμήλιος, Καρμήλια; *Carmeli, Carmelitis*). A woman of Carmel in Judah: used only of Abigail, the favourite wife of David (1 Sam. xxvii. 3; 1 Ch. iii. 1). In the former passage both LXX. and Vulg. appear to have read הַכַּרְמְלִי, "Carmelite." [W. A. W.]

CAR'MI (כַּרְמִי, Ges. = *a vine-dresser*; A. Χαρμί, B. -μει; *Charmi*). **1.** A man of the tribe of Judah, father of Achan, the "troubler of Israel" (Josh. vii. 1, 18 [BA. om.]; 1 Ch. ii. 7), according to the first two passages the son of Zabdi or Zimri. [ZABDI.] In 1 Ch. iv. 1 the name is given as that of a "son of Judah;" but the same person is probably intended; because (1) no son of Judah of that name is elsewhere mentioned; and (2) because, out of the five names who in this passage are said to be "sons" of Judah, none but Pharez are strictly in that relation to him. Hezron is the second generation, Hur the fourth, and Shobal the sixth.

2. B. Χαρμεί, A. -μι; *Charmi.* The fourth son of Reuben, progenitor of the family of THE CARMITES (הַכַּרְמִי: Gen. xlvi. 9; Ex. vi. 14; Num. xxvi. 6; 1 Ch. v. 3). [G.] [W.]

CAR'MITES, THE (הַכַּרְמִי; A. ὁ Χαρμί, B. ὁ Χαρμεί; *Charmitae*). A branch of the tribe of Reuben, descended from CARMI 2 (Num. xxvi. 6). [W. A. W.]

CARNA'IM (T.[7] Καρναίν, A. Καρνείν; א. in 1 Macc. v. 26, Καρναιδ; *Carnaïm*), a large and fortified city in the country east of Jordan —"the land of Galaad;" containing a "temple"

[1] In Is. xvi. 10, the word rightly rendered in the A. V. as an appellative, "plentiful (R. V. "fruitful") field," is in the Vulgate *de Carmelo*; see Jerome, *Com. ad loc.*

(τὸ τέμενος ἐν Κ.). It was besieged and taken by Judas Maccabaeus (1 Macc. v. 26, 43, 44). The place is called CARNION (τὸ Καρνίον) in 2 Macc. xii. 21, 26, and the temple the ATARGATEION (τὸ Ἀταργατεῖον). It is identified with ASHTEROTH-KARNAIM. [G.] [W.]

CARNI'ON. [CARNAIM.]

CARPENTER. [HANDICRAFT.]

CAR'PUS (Κάρπος), a Christian at Troas, with whom St. Paul states that he left a cloak, books, and parchments (2 Tim. iv. 13); on which of his journeys it is uncertain, but probably in passing through Asia Minor after his first captivity, for the last time before his martyrdom at Rome. Nothing certain is known of him. According to Hippolytus, Carpus was bishop of Berytus in Thrace, called *Berrhoea* in the *Synopsis de Vita et Morte Prophetarum*, which passes under the name of Dorotheus of Tyre. [E. R. B.]

CARRIAGE. This word occurs eleven times, twice in the margin and the remainder in the text of the A. V., and it may be useful to remind the reader that in none of these does it bear its modern sense, but signifies what we now call "baggage." The Hebrew words so rendered are three. 1. כְּלִי, *c'li*, generally translated "stuff" or "vessels." It is like the Greek word σκεῦος; and in its numerous applications perhaps answers most nearly to the English word "things." This word, rendered "carriage" (R. V. "baggage"), occurs in 1 Sam. xvii. 22—"David left his 'baggage' in the hands of the keeper of the 'baggage;'" also Is. x. 28—"At Michmash he hath left his 'baggage.'"

2. כְּבוּדָה, *Cebudah*, "heavy matters" (R. V. "goods"), Judg. xviii. 21 only, though perhaps the word may bear a signification of "preciousness," which is sometimes attached to the root, and may allude to the newly acquired treasures of the Danites (LXX. A. τὴν κτῆσιν τὴν ἔνδοξον).

3. The word rendered "carriages" in Is. xlvi. 1 should, it would appear (Ges. *Thes.* 917 *b*; *Jesaia*, ii. 101), be "your burdens" (R. V. "the things that ye carried about").

4. In the N. T., Acts xxi. 15, "we took up our carriages" is the rendering of ἐπισκευασάμενοι, and here also the meaning is simply, as in R. V., "baggage" (Jer. *praeparati*).

5. But in the margin of 1 Sam. xvii. 20, and xxvi. 5, 7—and there only—"carriage" is employed in the sense of a wagon or cart; the "place of the carriage" answering to "trench" in the text. The R. V. translates "place of the wagons," and in marg. *barricade*. The Hebrew word is מַעְגָּל, from עֲגָלָה, a wagon, and the allusion is to the circle of wagons which surrounded the encampment (Ges. *Thes.* 989).

6. In Judith ii. 17 and iii. 10, the original word is ἀπαρτία, *i.e.* the effects or baggage of the army.

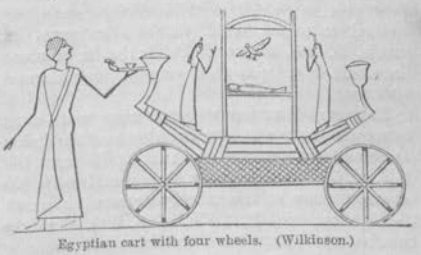
7. In 1 Macc. ix. 35, 39, it is ἀποσκευή, elsewhere rendered "stuff" and "baggage."

For carriages in the modern sense, see CART; CHARIOT. [G.] [W.]

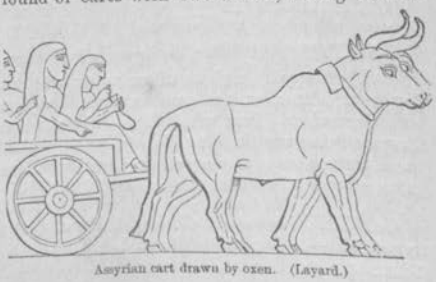
CART (עֲגָלָה; ἅμαξα; *plaustrum*; also rendered "wagon," Gen. xlv. 19, 27; Num. vii. 3, 7, 8: from עָגַל, *to roll*, Ges.), a vehicle drawn by cattle (2 Sam. vi. 6), to be distinguished from the chariot drawn by horses. [CHARIOT.] Carts and wagons were either open or covered (Num. vii. 3), and were used for conveyance of persons (Gen. xlv. 19), burdens (1 Sam. vi. 7, 8), or produce (Amos ii. 13). At the present time very few roads exist in Syria and Palestine and the neighbouring countries, and wheel-carriages for any purpose except conveyance of agricultural produce are all but unknown; and though modern usage has introduced European carriages drawn by horses into Egypt, they were unknown there also in times comparatively recent (Stanley, *S. and P.* p. 135; Porter, *Damascus*, i. 339; Lynch, *Narrative*, pp. 75, 84; Niebuhr, *Voyage*, i. 123; Layard, *Nin.* ii. 75; Mrs. Poole, *Englishwoman in Egypt*, 2nd series, p. 77). The only cart used in Western Asia has two wheels of solid wood (Olearius, *Travels*, 418; Sir R. Porter, *Travels*, ii. 533).

Egyptian cart with two wheels. (Wilkinson.)

For the machine used for threshing in Egypt and Syria, see THRESHING. But in the monuments of ancient Egypt representations are found of carts with two wheels, having four or six spokes, used for carrying produce, and of one used for religious purposes having four wheels



Egyptian cart with four wheels. (Wilkinson.)



Assyrian cart drawn by oxen. (Layard.)

with eight spokes. A bas-relief at Nineveh represents a cart having two wheels with eight spokes, drawn by oxen, conveying female captives; and others represent carts captured from enemies with captives, and also some used in carrying timber and other articles (Layard, *Nin.* ii. 396; *Nin. & Bab.* pp. 134, 447, 583; *Mon. of Bab.* pt. ii. pll. 12, 17). Four-wheeled carriages are said by Pliny (*N. H.* vii. 56) to have been invented by the Phrygians (Wilkinson *Anc. Egypt.* i. 384, 385; ii. 39, 47 [1878]) The cart used in India for conveying goods,

Modern Indian cart.

called Suggar or Hackeri, has two wheels, in the former case of solid wood, in the latter with spokes. They are drawn by oxen harnessed to a pole (Capper, *India*, pp. 346, 352). [H. W. P.]

CARVING. 1. מְקֻלַּעַת, *carved work in relief*, from קָלַע, *to carve;* in pl. מְקֻלָּעוֹת, *carved figures.* 2. חֲרֹשֶׁת, from חָרַשׁ, *to carve* = χαράσσω. 3. מְחֻקָּה, participle in Pual of (חָקָה not used) חָקַק, *to cut, delineate: engraved*, or *carved* (*work*), 1 K. vi. 35. 4. פִּתּוּחַ, *carved work*, from פָּתַח, *to open*, applied to metal, 1 K. vii. 36; to gems, Ex. xxviii. 9, 36; to wood, Ps. lxxiv. 6; to stone, Zech. iii. 9; γλυφή, γλύμμα, ἐγκολαπτόν; *caelatura.*

The arts of carving and engraving were much in request in the construction both of the Tabernacle and the Temple (Ex. xxxi. 2, 5, xxxv. 33; 1 K. vi. 18, 35; Ps. lxxiv. 6), as well as in the ornamentation of the priestly dresses (Ex. xxviii. 9–36; Zech. iii. 9; 2 Ch. ii. 6, 14). In Solomon's time Huram the Phoenician had the chief care of this as of the larger architectural works. [H. W. P.]

CASEMENT. [LATTICE.]

CASIPH'IA (כַּסְפְּיָא; ἐν ἀργυρίῳ τοῦ τόπου [2 Esd.]; *Chaspia*), a place of unknown site not far from Ahava, on the road between Babylon and Jerusalem (Ezra viii. 17). Neither the Caspiae Pylae nor the city *Kaswîn*, with which some writers have attempted to identify it, are situated upon this route (Ges. *Thes.* 703). [F.]

CAS'LEU (Χασελεῦ; *Casleu*), 1 Macc. i. 54; iv. 52, 59;—2 Macc. i. 9, 18; x. 5. [CHISLEU; MONTHS.]

CAS'LUHIM (כַּסְלֻחִים; A. Χασμωνιείμ, E. Χαλοείμ; *Chasluim*), Gen. x. 14, a Mizraite tribe mentioned as the source geographically of the Philistines, who are elsewhere called emigrants from Caphtor. No satisfactory identification has yet been found for this name, which has not been discovered in the hieroglyphic inscriptions. The names of *Casius Mons* and *Casiotis* may have preserved the first syllable of the word. The Casluhim would then have been settled along the coast of Lake Serbonis, between Pelusium and Rhinocorura (El Areesh). The meaning of the name of Casluhim seems to have been quite forgotten at the time of the LXX. The word Χασμωνιείμ has been compared by Ebers (*Aegypten und die Bücher Moses*, p. 120 sq.) to the Egyptian *hesmen*, which means "salt," or rather "nitre," and would thus indicate a population dealing in salt and living on salt fish. But it is hardly possible to admit this explanation, which is not in accordance with the geographical character of the Noachian list. [E. N.]

CAS'PHON (T.[7] Χασφών, A. Χασφώθ; *Casbon*), 1 Macc. v. 36. [CASPHOR.]

CAS'PHOR (T.[7] Χασφώρ, A. Κασφώρ, א. Κασφώ; *Casphor*), one of the fortified cities in the "land of Galaad" (1 Macc. v. 26), in which the Jews took refuge from the Ammonites under Timotheus (cp. *v.* 6), and which with other cities was taken by Judas Maccabaeus (v. 36). In the latter passage the name is given as CASPHON, and in 2 Macc. xii. 13 as CASPIS, if indeed the same place is referred to, which is not quite clear (see Ewald, iv. 359 note). Josephus gives the name of this place as Casphoma, Χάσφωμα (*Ant.* xii. 8, § 3). [G.] [W.]

CAS'PIS (T.[7] Κάσπιν, A. Κασπείν; *Casphin*), a strongly fortified city—whether east or west of Jordan is not plain—having near it a lake (λίμνη) two stadia in breadth. It was taken by Judas Maccabaeus with great slaughter (2 Macc. xii. 13, 16). The parallel history of the First Book of Maccabees mentions a city named CASPHOR or CASPHON, with which Caspis may be identical (see *Speaker's Comm.* in loco)—but the narratives differ materially. [G.] [W.]

CAS'SIA. The representative in the A. V. of the Hebrew words *kiddâh* and *ketzîôth*.

1. *Kiddâh* (קִדָּה;[a] λίρις; *casia*, *stacte*) occurs in Ex. xxx. 24, as one of the ingredients in the composition of the "oil of holy ointment;" and in Ezek. xxvii. 19, where "bright iron, cassia, and calamus" are mentioned as articles of merchandise brought by Dan and Javan to the market of Tyre. There can be no doubt that the A. V. is correct in the translation of the Hebrew word, though there is considerable variety of reading in the old Versions.

The cassia-tree is a native of Southern India, and especially of Ceylon, where it is still largely cultivated for its bark. It is known to botanists as *Cinnamomum cassium*, belonging to the family *Lauraceae*, of which our Sweet Bay (*Laurus nobilis*) is an European representative. It is nearly related to the true cinnamon (*Cinna-*

[a] From קָדַד; Arab. قَدَّ, "to cleave," "to tear lengthwise;" so called from the splitting of the bark.

momum zeylonicum), and is a small shrubby tree, distinguished from the cinnamon by having obtuse, oblong lanceolate leaves, instead of terminating in an acute point, like the other. The leaf of the cassia, when bitten, has a cinnamon flavour; that of the cinnamon has a clove flavour. The cassia of commerce is obtained by making longitudinal incisions in the branches, when the bark peels off, and in drying rolls up in the form of a pipe. Cassia is cultivated in India and many of the Eastern islands, Java, and others, but is never found in Arabia or Egypt, whither it must always have been imported from the far East. The mention of cassia in Exodus is perhaps the earliest direct evidence extant of commerce between India and Egypt. But it seems to have been procured through Southern Arabia, and hence was sometimes supposed to be a native of that country. The LXX. and Josephus (*Ant.* iii. 8, § 3) have *iris*, i.e. some species of *flag*, perhaps the *Iris florentina*, which has an aromatic root-stock. Symmachus and the Vulg. (in Ezek. *l. c.*) read *stacte*, "liquid myrrh." The Arabic Versions of Saadias and Erpenius conjecture *costus* [so R. V. marg. of Ex. *l. c.*], which Dr. Royle (Kitto's *Cyc.*, art. "Ketzioth") identifies with *Aucklandia costus*, to which he refers not the *kiddâh*, but the *ketzîôth* of the Hebrew Scriptures (see below). The Chaldee and Syriac, with most of the European Versions, understand *cassia* by *kiddâh:* they are followed by Gesenius, Simon, Fürst, Lee, and all the lexicographers. The Greek word, which is first used by Herodotus (ii. 86), who says (iii. 110) that the Arabians procured it from a shallow lake in their country, is limited to the Eastern product. Dioscorides mentions several kinds of cassia, and says that they are produced in Spicy Arabia (i. ch. xii.). One kind is known by the name of *mosyletis*, or, according to Galen (*de Theriac. ad Pis.* p. 108), of *mosyllos*, from the ancient city and promontory Mosyllon, on the coast of Africa and the sea of Babel Mandeb, not far from the modern Cape Guardafui (Sprengel, *Annot. ad Dioscor.* i. ch. xii.). Will not this throw some light on Ezek. xxvii. 19, where it will be observed that, instead of the rendering "going to and fro" in the text of the A. V., the margin has *Meuzal*? "Dan and Javan (and) Meuzal traded in thy markets with cassia, calamus," &c. The cassia would be brought from India to Meuzal, and from thence exported to Tyre and other countries under the name of *Meuzalitis*, or Meuzal cassia.[b]

2. *Ketzîôth* (קְצִיעֹת;[c] κασία; *casia*), only in Ps. xlv. 8, "All thy garments smell of myrrh, aloes, and cassia." This word is generally supposed to be another term for cassia: the old Versions are in favour of this interpretation, as well as the etymology of the Hebrew word. The Arabic reads *Salicha*,[d] which, from its description by Abu'l Fadli and Avicenna (Celsius, *Hierob.* ii. 364–5), evidently denotes some cassia-yielding tree. Dr. Royle suggests (see above) that *ketzîôth* is identical in meaning and in form with the Arab *cust*, *kust*, *cusht*, *kusht*,[e] whence is probably derived the *costus* of the Greeks and Romans. Dioscorides (i. 15) enumerates three kinds of *costus*,—an Arabian, Indian, and Syrian sort. The *koost* of India, called by Europeans *Indian orris*, is the root of *Aucklandia costus*, a plant of the composite order, family *Cynarocephalae*, or Artichoke section, grown chiefly in Cashmere, but well known throughout India, the root of which has a pungent aromatic odour, and is largely used in the composition of incense. There is no reason, however, why we should abandon the explanation of the old Versions, and depart from the satisfactory etymological evidence afforded by the Hebrew term to the doubtful question of identity between it and the Arabic *koost*. The confusion among ancient writers as to the different kinds of cassia and cinnamon is not to be wondered at; they were known only as the imported products of distant countries, and the trees themselves were as little known as the tea-plant, until recently, among ourselves. [W. H.] [H. B. T.]

CASTLE. [FORTIFICATIONS.]

CAS'TOR AND POL'LUX, the Dioscuri (Διοσκοῦροι, Acts xxviii. 11). For the mythology of these two heroes, the twin-sons of Jupiter and Leda, we must refer to the *Dict. of Biog. and Mythol.* We have here to do with them only so far as they were connected with seafaring life. They were regarded as the tutelary divinities (θεοὶ σωτῆρες) of sailors. They appeared in heaven as the constellation of *Gemini*. Immediately on shipboard they were recognised in the phosphoric lights, called by modern Italian sailors *the fires of St. Elmo*, which play about the masts and the sails ("In magna tempestate apparent quasi stellae velo insidentes: adjuvari se tunc periclitantes existimant Pollucis et Castoris numine," Senec. *Nat. Quaest.* i. 1; cp. Plin. ii. 37). Hence the frequent allusions of Roman poets to these divinities in connexion with navigation (see especially Hor. *Carm.* i. 3, 2, "fratres Helenae, lucida sidera," and iv. 8, 31). As the ship mentioned here by St. Luke was from Alexandria, it may be worth while to notice that Castor and Pollux were specially honoured in the neighbouring district of Cyrenaica (*Schol.* Pind. *Pyth.* v. 6). In Catull. iv. 27, we have distinct mention of a boat dedicated to them. See also lxviii. 65. In art these divinities were sometimes represented simply as stars hovering over a ship, but more

[b] The country of the Mosylii was in the Cinnamomophora regio, and not far from Aromata Emporium, and the author of the Periplus particularises cassia amongst the exports of the same coast (Tennent, *Ceylon*, i. 600, note). As to מְאוּזָל, see Bochart, *Geog. Sac.* pp. i. ch. ii. 21, Rosenmüller, *Schol. ad Ezek.* l. c., and M.V.[11] who identify it with Sanaa, in Arabia. [The R. V. does not favour the conjecture in the text. It renders Ezek. xxvii. 19, "Vedan and Javan traded with yarn for thy wares," and in the marg. mentions the rendering of some ancient Versions *from Uzal* instead of "with yarn," a rendering adopted by most moderns, *QPB*[3].—F.]

[c] From the root קָצַע, Arab. قطع, "to lop off," "to scrape," "to peel."

[d] سليخة, from the root سلخ, *detraxit*, quasi cortex detractus.

[e] قسط, *costus*, i. e. radicis aromaticae Indicae et Arabicae species, Kam. Dj. See Freytag.

frequently as young men on horseback, with conical caps, and stars above them (see the coins of Rhegium, a city of Bruttii, at which St.

Silver coin of Bruttii. Obv.: Heads of Castor and Pollux to right. Rev.: Castor and Pollux mounted, advancing to right. In the exergue BPETTIΩN.

Paul touched on the voyage in question, *v.* 13). Such figures were probably painted or sculptured at the bow of the ship (hence *παράσημον*; see *Dict. of Gr. and Rom. Antiq.* art. INSIGNE). This custom was very frequent in ancient shipbuilding. Herodotus says (iii. 37) that the Phoenicians used to place the figures of deities at the bow of their vessels. Virgil (*Aen.* x. 209) and Ovid (*Trist.* i. 10, 2) supply us with illustrations of the practice; and Cyril of Alexandria (Cramer's *Catena, ad* l. c.) says that such was always the Alexandrian method of ornamenting each side of the prow. [SHIP.] [J. S. H.]

CATS (*οἱ αἴλουροι*; *cattae*[a]). This word occurs only in Baruch vi. 22, in the passage which sets forth the vanity of the Babylonish idols: "Upon their bodies and heads sit bats, swallows, and birds, and the cats also." The Greek *αἴλουρος*, as used by Aristotle, has more particular reference to the wild cat (*Felis catus*, &c.). Herodotus, in the well-known passage (ii. 66) which treats of the cats of Egypt, uses *αἴλουρος* to denote the domestic animal; similarly Cicero (*Tusc.* v. 27, 78) employs *felis;* but both Greek and Latin words are used to denote other animals, apparently some kinds of marten (*Martes*). The Israelites, from their intimate connexion with Egypt, must have been familiar with the cat, but we have no evidence that they ever domesticated it, and the passage in Baruch seems to point to wild cats. Nor, except in connexion with Egypt, do we find in classic writers any allusion to the domestic cat, now as world-wide in its distribution as the dog, and as common in Palestine as elsewhere.

The domestic cat of the ancient Egyptians is generally admitted to be identical with the *Felis maniculata* (Rüppell) of Nubia, and with our own domestic animal. *Felis maniculata* is also the wild cat of Syria, and is especially common among ruins in Eastern Palestine. *Felis chaus* is also common among woods and thickets, especially by the Jordan, but it resembles a small lynx rather than a cat.

The Egyptians, it is well known, paid an absurd reverence to the cat; it was deemed a capital offence to kill one; when a cat died it was embalmed and buried at Bubastis, the city sacred to the moon, of which divinity the cat was reckoned a symbol (Herod. ii. 66; Wilkinson, *Anc. Egypt.* i. 246 [1878]; Jablonski, *Pant. Aegypt.* ii. 66, &c.; Diod. Sic. i. 83). The cat was allowed to accompany the Egyptian fowler, but it was doubtless for the sake of a share in the booty, and not for the benefit of the fowler. Without laying much stress on the want of sufficient sagacity for retrieving purposes, we cannot believe that the cat could ever have been trained to go into the water, to which it has a very strong aversion.[b] See the woodcuts in Wilkinson (*Anc. Egypt*, i. pp. 236, 237 [1878]), where the fowler is in a boat accompanied by his cat. As to צִיִּים, which Bochart takes to mean *wild cats*, see BEAST, WILD. The cat belongs to the family *Felidae*, order *Carnivora*. [W. H.] [H. B. T.]

CATERPILLAR. [LOCUST.]

CATERPILLER. The representative in the A. V. of the Hebrew words *châsîl* and *yelek*.

1. *Châsîl* (חָסִיל; *ἀκρίς*, *βροῦχος*, *ἐρυσίβη*; *rubigo, bruchus, aerugo*). The Hebrew word occurs in 1 K. viii. 37; 2 Ch. vi. 28; Ps. lxxviii. 46; Is. xxxiii. 4; Joel i. 4: it is evident from the inconsistency of the two most important old Versions in their renderings of this word, that nothing is to be learnt from them. The word denotes the "consumer;" and from its signification, and from its being always mentioned along with the locust, it may probably denote that noxious insect in its proper or larva stages, at which period of its existence it is more destructive than at any other time. [See LOCUST.]

2. *Yelek*, יֶלֶק (Ps. cv. 34; Jer. li. 14, 27); *i.e.* "the licker." In other passages the word is rendered "cankerworm." From the signification of its name, and from the position in the passage from Joel (ch. i.) immediately after the locust, it may represent not any particular species, but the larva or caterpiller state of the insect in which it is more destructive than when fully developed. The larvae appear after the winged locusts have left, and lick up everything that has escaped the former. [H. B. T.]

CATHU'A (B. Κουά, A. Καθουά; *Canna*), 1 Esd. v. 30; one of the heads of the servants of the Temple who returned with Zerubbabel from the Captivity. The name apparently answering to it in the Hebrew text of Ezra ii. 43 is GIDDEL. [F.]

CATTLE. The various words which express cattle are as numerous in Hebrew as in English, though not always exactly synonymous. For the etymology and exact signification of these names, see BULL. In this article we may consider the subject of horned cattle generally. Cattle were more important in the agricultural economy of the Jews than even among ourselves, among whom the horse has for many purposes been substituted. They ploughed the land, they trod out the corn, they carried in the crops, they drew carts and waggons. Their

[a] The word *Catta* occurs once only in classical Latin, viz. in Martial, *Epig.* xiii. 69; but that some *bird* is intended is beyond a doubt. Greeks and Romans do not appear to have kept domestic cats.

[b] Even to a proverb:—

"Catus amat pisces, sed non vult tingere plantam."

"Letting, I dare not wait upon I would,
Like the poor cat i' the adage."—*Macbeth*, i. 7.

See Trench's *Lessons in Proverbs*, p. 149.

employment in these various ways is constantly referred to in Scripture, and it is needless to quote passages. Equally important was the produce of the herds. Excepting for sacrifices or on very special occasions, horned cattle were not ordinarily used as food; for, as is still the case in Eastern countries, flesh meat, especially beef, was not eaten save at religious festivals, or at special feasts, to do honour to a guest, or to celebrate a public or private anniversary (cp. W. R. Smith, *The Religion of the Semites*, i. 277 sq.). On such occasions a bull calf was generally selected. "Abraham ran unto the herd, and fetched a calf tender and good" (Gen. xvii. 7). "Thou hast killed for him the fatted calf" (Luke xv. 30). Naturally the value of oxen for draught restricted their use as food. But the produce of the herd—milk, butter, and cheese—formed as important articles of diet then as now. "They brought ... butter, and sheep, and cheese of kine for David and for the people that were with him to eat" (2 Sam. xvii. 29). During the journeyings in the wilderness, the people were forbidden to slay their cattle except for sacrifices, and these only before the Tabernacle. This was not only to prevent idolatrous sacrifices, as explained in Lev. xvii. 7, but also (see *Speaker's Comm.* i. *l.*) to bear witness to the sanctity of life, acknowledging that the animal belonged to Jehovah, and that its flesh was received back as His gift. The injunction had the further effect of securing the preservation of the flocks and herds for future use when they had entered the Land of Promise. But especially important was the use of cattle in sacrifice, where they were offered from the earliest times by the richer worshippers, as by Abraham (Gen. xv. 9). At the dedication of the Temple Solomon offered hecatombs of 22,000 oxen (1 Kings viii. 63). At its purification by Hezekiah 600 were sacrificed (2 Ch. xxix. 33), and at its second cleansing by Josiah 500 (2 Ch. xxxv. 9).

There are several provisions in the Law of Moses for the protection of cattle. "Doth God take care for oxen?" "Thou shalt not muzzle the ox when he treadeth out the corn" (Deut. xxv. 4), an injunction twice quoted by St. Paul. So the rest of the Sabbath is enjoined, "that thine ox and thine ass may rest" (Ex. xxiii. 12).

The greater part of Central Palestine is wholly unsuited for grazing horned cattle, which were turned loose on the open wilds during a great part of the year, the wilderness of Judaea and the south country being treated as commons are with us; each village or town having its recognised landmarks, within which it was the herdsman's duty to keep his cattle. The herds roamed in a half-wild state till winter approached. Such were the bulls of Bashan in the wild pastoral region east of Jordan. But when required for table and in winter, they were brought under cover. The provision for Solomon's court for each day was ten fat (*i.e.* stall-fed) oxen, and twenty oxen out of the pastures (1 Kings iv. 23). Stalled cattle are often referred to, as when Amos rebukes the luxury of his times, the princes of Samaria eating the "calves out of the midst of the stall" (Amos vi. 4). "Better is a dinner of herbs where love is, than a stalled ox and hatred therewith" (Prov. xv. 17). The word אֲבוּסִים, often translated "fatted" cattle, is literally "cattle of the stall." The custom of thus keeping up cattle is alluded to by our Lord, "Doth not each one of you on the Sabbath loose his ox or his ass from the stall and lead him away to watering?" (Luke xiii. 15.) Barley straw was the fare of these oxen, for hay, as we understand it, is never made in the East.

There are several provisions in the Mosaic law for cases of injury by a bull goring man or animal; and as under our own laws the owner of an animal known to be dangerous is held responsible, so by the Jewish, if he had been warned beforehand and had neglected to keep in the animal, he had to ransom his own life or to lose it, in case of fatal injury inflicted by the beast, which was also to be slain and its flesh not eaten (Ex. xxi. 28–36). The semi-wild cattle in the plains and forests are in the habit of gathering in a circle round any strange object, and are easily irritated into charging it. This habit is alluded to in Ps. xxii. 12, "Many bulls have compassed me: strong bulls of Bashan have beset me round."

Horned cattle are now restricted to those districts where fresh pasture can be found throughout the year, and where water is easily attainable. In the Sinaitic Peninsula, even in those parts where not only camels but sheep, goats, and horses are kept, neat cattle are unknown. In the hill-country of Judaea and in the Judaean wilderness, they are never seen. In Central Western Palestine, from Hebron to the Lebanon, they are rare, except on the plains of Dothan, Shechem, and Esdraelon. The pastures are few and burnt up in summer, and the agriculture of the terraced hills is not adapted for their use. Goats supply the milk and butter of this hill-country; and beef and veal are unknown delicacies. But in the southern wilderness of Judah, on the downs and wide prairies south and east of Beersheba, and in the Philistian plain, horned cattle of a small and coarse race are numerous. They are not used for agriculture, but simply for their milk. In the plains of Sharon, Acre, Esdraelon, and Phoenicia, a much larger and finer race, from which the southern cattle have probably degenerated, is found, and employed in the tillage of these rich corn-plains. North of Esdraelon, in all the richer parts of Galilee, we may frequently see a larger and finer breed of cattle, known in the country as the Armenian ox, light coloured, like the Tuscan cattle, but which appear to be identical with the best race on the banks of the Nile, and which are depicted on the ancient Egyptian monuments. This race is also found round Damascus and in Northern Syria. East of Jordan, neat cattle form the principal wealth both of the nomads and of the villagers. They are a small race, like that of the maritime plains, but generally black; and as the numerous forests of this region preserve the herbage from the sun throughout the year, the milch kine afford a constant supply of milk. In the Jordan valley, and especially in the upper part near Lake Huleh (the waters of Merom), are herds of another species, the Indian buffalo (*Bos bubalus*, L.), quite distinct from *Bos taurus*, the common ox. These huge ungainly creatures, which can only thrive in swamps, where they

wallow, buried up to the back in water or mud, have been by many modern writers erroneously identified with the bulls of Bashan. They are, however, a comparatively recent introduction, having been imported through Persia from India, and were unknown to the Israelites.

In the bone caves of the Lebanon I discovered the teeth and bones of two extinct species of the ox tribe, belonging probably to *Bos primigenitus*, the aurochs or unicorn, and *Bison priscus*. [See UNICORN.] [H. B. T.]

CAULS (שְׁבָכִים; ἐμπλόκια; *torques*). The A. V. and R. V. give in the margin "networks." The Old English word "caul" denoted a netted cap worn by women. Compare Chaucer (*Wyf of Bathes Tale*, C. T., l. 6599):

> "Let se, which is the proudest of hem alle,
> That werith on a coverchief or a *calle*."

The Hebrew word *shĕbîsîm*, thus rendered in Is. iii. 18, is, like many others which occur in the same passage, the subject of much dispute. It occurs but once, and its root is not elsewhere found in Hebrew. The Rabbinical commentators connect it with שָׁבַץ, *shibbêts*, rendered "embroider" in Ex. xxviii. 39, but properly "to work in squares, make checker-work." So Kimchi (*Lex.* s. v.) explains *shĕbîsîm* as "the name of garments wrought in checker-work." Rashi says that they are "a kind of network to adorn the head." Abarbanel is more full: he describes them as "head-dresses, made of silk or gold thread, with which the women bound their heads about, and they were of checker-work." The word occurs again in the Mishna (*Celim*, xxviii. 10), but nothing can possibly be inferred from the passage itself, and the explanations of the commentators do not throw much light upon it. It there appears to be used as part of a network worn as a head-dress by women. Bartenora says that it was "a figure which they made upon the network for ornament, standing in front of it and going round from one ear to the other." Beyond the fact that the *shĕbîsîm* were head-dresses or ornaments of the head-dress of Hebrew ladies, nothing certain can be said to be known about them.

Schroeder (*de Vest. Mul.*, cap. ii.) conjectured that they were medallions worn on the necklace, and identified *shĕbîsîm* with the Arab. شَمِيسَة, *shomaiseh*, the diminutive of شَمْس, *shams*, the sun, which is applied to denote the sun-shaped ornaments worn by Arab women about their necks. But to this Gesenius very properly objects (*Jes.* i. p. 209), as well as to the explanation of Jahn (*Archäol.* i. 2, 139), who renders the word "gauze veils."

The Versions give but little assistance. The LXX. render ἐμπλόκια "plaited work," to which κοσύμβους, "fringes," appears to have been added originally as a gloss, and afterwards to have crept into the text. Aquila has τελαμῶνας, "belts." The Targum merely adopts the Hebrew word without translating it, and the Syriac and Arabic vaguely render it "their ornaments." [W. A. W.]

CAUSEY (Fr. *chaussée*). Prov. xv. 19 (A. V. marg.; R. V. "highway," text); 1 Ch. xxvi. 16, 18 (ed. 1611), a raised or paved way (מְסִלָּה). Of this word causeway, which replaced it in 1 Ch., is a corruption (Eastwood and Wright's *Bible Wordbook*, p. 90). See *D. B.* Amer. ed. [F.]

CAUSEWAY. [CAUSEY.]

CAVE (מְעָרָה; σπήλαιον; *spelunca*; in A. V. Is. ii. 19, *hole*; Jer. vii. 11, *den*; Josh. xiii. 4, literatim, *Mearah*; *Maara*, Vulg.). I. The chalky limestone of which the rocks of Syria and Palestine chiefly consist presents, as is the case in all limestone formations, a vast number of caverns and natural fissures, many of which have also been artificially enlarged and adapted to various purposes both of shelter and defence (Kitto, *Phys. Geogr. of Pal.* p. 72). This circumstance has also given occasion to the use of so large a number of words as are employed in the Scriptures to denote caves, holes, and fissures, some of them giving names to the towns and places and their neighbourhood. Out of them, besides No. I., may be selected the following:—

II. חוֹר or חֹר (Ges.), *a hole*; usually τρώγλη, and *caverna*. From this come, (*a*) חֹרִי, *dweller in caves*, the name of the Horites of Mount Seir, *Wâdy Ghoeyer*, expelled by the Edomites, probably alluded to by Job, a Troglodyte race spoken of by Strabo (Gen. xiv. 6, xxxvi. 21; Deut. ii. 12; Job xxx. 6; Strab. i. 42, xvi. 775–776; Burckhardt, *Syria*, p. 410; Robinson, ii. 69, 157; Stanley, *S. and P.* pp. 68–71). [HORITES.] (*b*) חֹרָן, *land of caverns* (Ezek. xlvii. 16, 18; Burckhardt, *Syria*, pp. 110, 286); Αὐρανῖτις, LXX.; *Auran*, Vulg. [HAURAN.] (*c*) בֵּית־חֹרוֹן, *house of caverns*, the two towns of Beth-horon (Josh. xvi. 3, 5). [BETH-HORON.] (*d*) חֹרֹנַיִם, *two caverns*, the town Horonaim (Is. xv. 5). [HORONAIM.]

III. חֲגָוִים, *places of refuge in rocks* (Ges.) for birds (Cant. ii. 14); σκέπη; *foramina petrae*, Obad. *v.* 3; ὀπαί; *scissurae petrarum*; A. V. and R. V. *clefts*.

IV. מְנָהָרָה; τρυμαλία; *antrum*; A. V. and R. V. *den*; a ravine through which water flows (Ges. *Thes.* p. 858), Judg. vi. 2.

The caves of Syria and Palestine are still used, either occasionally or permanently, as habitations; as at *Anâb*, near *Szalt*, Ramoth-Gilead (Buckingham, *Travels in Syria*, p. 62). The shepherds near Hebron leave their villages in the summer to dwell in caves and ruins, in order to be nearer to their flocks and fields (Robinson, i. 212; *PEFQy. Statement*, 1872, p. 176). Many caves are used as places of shelter both for the shepherds and their flocks, and are farther protected by "sheep-cotes," formed by a rough wall of stones built up in front of the entrance (Thomson, *Land and Book*, p. 603). Almost all the habitations at *Om-keis*, Gadara, are caves (Burckhardt, p. 273). An extensive system of caves exists at *Beit Jibrîn*, Eleutheropolis, in Judah, which has served for residence or concealment, though now disused (Robinson, ii. 53); and another between Bethlehem and Hebron (Irby and Mangles, p. 103).

The most remarkable caves noticed in Scripture are:—1. The one in which Lot is said to have dwelt after the destruction of Sodom (Gen. xix. 30). 2. The cave of Machpelah (*ib.*

xxiii. 17). 3. Cave of Makkedah (Josh. x. 16). 4. The cleft* in the rock Etam, in which Samson dwelt (Judg. xv. 11). 5. Cave of Adullam (1 Sam. xxii. 1; 2 Sam. xxiii. 13–16). 6. Cave of Engedi (1 Sam. xxiv. 3). 7. Obadiah's cave (1 K. xviii. 4). 8. Elijah's cave, and also the "clift" of Moses in Horeb (Ex. xxxiii. 22; 1 K. xix. 9). 9, 10. The rock sepulchres of Lazarus and of our Lord (John xi. 38; Matt. xxvii. 60). Of these, as regards the O. T., the site of Machpelah may be regarded as certain; the sites of Adullam, Engedi, Etam, and Makkedah as highly probable; of the cave of Lot and of the cave in Horeb, nothing more than their locality in a general sense can be affirmed; and to that of Obadiah no clue can be given, except that it must have been somewhere in the northern region of Palestine, in which many instances of caves fit for his purpose might be pointed out (Joseph. *Ant.* vi. 12, 3; Jerome, *de Situ et Nom.* iii. 871 [150]; Reland, p. 885; Robinson, i. 103, 500, ii. 28, 79; Stanley, *Sinai and Pal.* pp. 149, 211, 296; Conder, *Tent Life*, ii. 156, 159; *Heth and Moab*, p. 150; Burckhardt, *Syria*, p. 608; Irby and Mangles, *Trav.* p. 93; Lynch, *Narr.* p. 234; *PEFQy. Statement*, 1871, p. 91, 1881, p. 40; *Survey of West Palestine*, ii. 411, iii. 337, 367; Victoria Institute, *Journ. of Trans.* xxi. § 82. See also ADULLAM, &c.).

Besides these special caves, frequent mention is made in O. T. of caves as places of refuge. In the time of Gideon the Israelites took refuge from the Midianites in caves and strongholds, such as abound in the mountain region of Manasseh (Judg. vi. 2), and in the early days of Saul they fled from the Philistines into "holes;" a description to which the scene of Jonathan's conflict, *Mŭkhmâs* (Michmash), sufficiently answers (1 Sam. xiii. 6, xiv. 5).

And so too the caves of Palestine have afforded refuge to the inhabitants during the earthquakes by which the country has from time to time been visited. This was the case in 1837, when *Safed* was destroyed; and to this the Prophet Isaiah probably alludes in language describing a divine visitation (*Is.* ii. 10, 19, 21. Cp. Irby and Mangles, p. 89; Robinson, i. 440, ii. 422).

But Adullam is not the only cave, nor were its tenants the only instances of banditti making the caves of Palestine their accustomed haunt. Josephus (*Ant.* xiv. 15, § 5) relates the manner in which, by order of Herod, a cave occupied by robbers, or rather insurgents, was attacked by soldiers let down from above in chests and baskets, from which they dragged forth the inmates with hooks, and killed or thrust them down the precipices; or, setting fire to their stores of fuel, destroyed them by suffocation. These caves are said to have been in Galilee, not far from Sepphoris; and are probably the same as those which Josephus himself, in providing for the defence of Galilee, fortified near Gennesaret, which elsewhere he calls the caves of Arbela (*B. J.* i. 16, §§ 2–4, ii. 20, § 6; *Vit.* § 37). Bacchides, the general of Demetrius, in his expedition against Judaea, encamped at Messaloth, near Arbela, and reduced to submission the occupants of the caves (*Ant.* xii. 11, § 1; 1 Macc. ix. 2). Messaloth is probably מְסִלּוֹת, *steps*, or *terraces* (cp. 2 Ch. ix. 11; Ges.). The Messaloth of the Book of Maccabees and the robber-caves of Arbela are thus probably identical, and are the same as the fortified cavern near *Mejdjdel* (Magdala), called *Kŭlat Ibn M'an*, or Pigeon's Castle, mentioned by several travellers. They are said by Burckhardt to be capable of containing 600 men (Reland, pp. 358, 575; Burckhardt, *Syria*, p. 331; Irby and Mangles, p. 91; *Survey of West Pal.* i. 411; Robinson, ii. 398; Räumer, 108. Cp Hos. x. 14). [BETH-ARBEL.]

Josephus also speaks of the robber-inhabitants of Trachonitis, who lived in large caverns, presenting no prominence above ground, but widely extended below (*Ant.* xv. 10, § 1). These banditti annoyed much the trade with Damascus, but were put down by Herod. Strabo alludes very distinctly to this in his description of Trachonitis, and describes one of the caverns as capable of holding 4,000 men (Strabo, xvi. 756; Räumer, p. 68; Jolliffe, *Travels in Pal.* i. 197).

Lastly, it was the caves which lie beneath and around so many of the Jewish cities that formed the last hiding-places of the Jewish leaders in the war with the Romans. Josephus himself relates the story of his own concealment in the caves of Jotapata; and after the capture of Jerusalem, John of Gischala, Simon, and many other Jews, endeavoured to conceal themselves in the caverns beneath the city; whilst in some of them great spoil and vast numbers of dead bodies were found of those who had perished during the siege by hunger or from wounds (Joseph. *B. J.* iii. 8, § 1; vi. 9, § 4).

The rock dwellings and temples of Petra are described in a separate article.

Natural cavities in the rock were and are frequently used as cisterns for water, and as places of imprisonment (Is. xxiv. 22; Ezek xxxii. 23; Zech. ix. 11) [CISTERN; PRISON]; also as stalls for horses and for granaries (Irby and Mangles, p. 146). No use, however, of rock caverns more strikingly connects the modern usages of Palestine and the adjacent regions with their ancient history than the employment of them as burial-places. The rocky soil of so large a portion of the Holy Land almost forbids interment, excepting in cavities either natural or hewn from the rock. The dwelling of the demoniac among the tombs is thus explained by the rock caverns abounding near the Sea of Galilee (Jolliffe, i. 36). Accordingly numerous sites are shown in Palestine and adjacent lands of (so-called) sepulchres of saints and heroes of the Old and New Testaments, venerated both by Christians and Mohammedans (*Early Travels*, p. 36; Stanley, p. 148). Among these may be mentioned the cave of Machpelah, the tomb of Aaron on Mount Hor, of Joseph, and of Rachel, as those for which every probability of identity in site at least may be claimed (Irby and Mangles, p. 134; Robinson, i. 218, 219, ii. 275–287, &c.). More questionable are the sites of the tombs of Elisha, Obadiah, and John the Baptist, at Samaria; of Habakkuk at *Jebâtha* (Gabatha), of Micah near *Kcila;* and of Deborah, Rebekah's nurse, at Bethel (Stanley, pp. 143, 149; Reland, pp. 722, 698, 981; Rob. ii. 304). The questions so much debated relating to the tombs in and near Jerusalem and Bethany will be found treated under those heads, as also that of the tombs of the Maccabees at Modin (*Survey*

* מְעָרָה, from עָרַר, *to divide;* LXX. τρυμαλία; Vulg. *specus;* A. V. *top.* See Ges.

of West Pal. ii. 349). But whatever value may belong to the connexion of the names of Judges, Kings, or Prophets, with the very remarkable rock-tombs near Jerusalem, there can be no doubt that the caves bearing these names are sepulchral caverns enlarged and embellished by art. The sides of the valley of Jehoshaphat are studded with caves, many of which are inhabited by Arab families (Sandys, p. 188; Maundrell, p 446; Robinson, i. 241, 349, 364; Bartlett, *Walks about Jerusalem*, p. 117). It is no doubt the vast number of caves throughout the country, together with, perhaps, as Maundrell remarks, the taste for hermit life which prevailed in the 5th and 6th centuries of the Christian era, which has placed the sites of so many important events in caves and grottoes; *e.g.* the birth of the Virgin, the Annunciation, the Salutation, the birth of the Baptist and of our Lord, the scene of the Agony, of St. Peter's denial, the composition of the Apostles' Creed, the Transfiguration (Shaw, pt. ii. c. 1; Maundrell, *E. T.* p. 479); and the like causes have created a traditionary cave-site for the altar of Elijah on Mount Carmel, and peopled its sides, as well as those of Mount Tabor, with hermit inhabitants (1 K. xviii. 19; Amos ix. 3. Cp. Irby and Mangles, p. 60; Reland, p. 329; Winer, s. v. *Carmel;* Sir J. Maundeville, *Travels*, p. 31; Sandys, p. 203; Maundrell, *E. T.* p. 478; Jahn, *Arch. Bibl.* p. 9; Stanley, p. 353; Kitto, *Phys. Geogr.* pp. 30, 31; Van Egmont, *Travels*, ii. 5–7). [H. W. P.]

CEDAR (אֶרֶז, *erez;* κέδρος; *cedrus;* Arab. أَرْز, *arz*, "pine" (Lane). [The word is a primitive, and is found in all the Semitic languages except Assyrian, which has *erinu*.—C. J. B.] The word is invariably rendered *cedrus* and cedar in the Vulg., A. V., and R. V., and there can be no doubt but that in most instances, and always when in connexion, expressed or understood, with Lebanon, it means distinctively the cedar of Lebanon, *Cedrus Libani*, "the firmly-rooted and strong tree," as its derivation implies, κατ' ἐξοχήν, the firmest and grandest of all the conifers. Occasionally, as will be seen below, the word is used, as is the Arabic equivalent at the present day, for the pine-trees generically. Many characteristics of the cedar are mentioned in Scripture: the passages are too numerous for quotation. Among prophets and poets it is a favourite emblem for whatever is grand and magnificent. "The glory of Lebanon" (Is. xxxv. 2, lx. 13); "The trees of the Lord, the cedars of Lebanon which He hath planted" (Ps. civ. 16); "The righteous shall grow like a cedar in Lebanon" (Ps. xcii. 12); "The cedars of Lebanon that are high and lifted up" (Is. ii. 13); "The Assyrian was a cedar on Lebanon, with fair branches, and with a shadowing shroud, and of an high stature, and his top was among the thick boughs. All the fowls of heaven made their nests in his boughs" (Ezek. xxxi. 3, 6); "The Amorite, whose height was like the height of the cedars" (Amos ii. 9).

With peculiar appositeness, its wide-spreading branches, so unlike those of any other pine, are the model of the "spreading abroad," the constant growth of the righteous man; his boughs are multiplied, become fair, thick, overshadowing in length and multitude (Ezek. xvii. 23). Its fresh resinous fragrance is noticed. "The smell of thy garments is like the smell of Lebanon" (Cant. iv. 11). It was the prince of trees. It was to the vegetable what the lion was to the animal world. From the cedar downwards extended the botanical knowledge of Solomon. To the cedar upwards is the destruction of the trees in the parable of Jotham. "Howl, fir tree, for the cedar is fallen" (Zech. xi. 2). The lesser fir-tree is bidden as a humble follower to bewail the fall of its mighty chief. It was the crowning insolence of the proud boast of Sennacherib, "I am come up to the height of the mountains, to the sides of Lebanon, and I will cut down the tall cedars thereof" (Is. xxxvii. 24). Of all presumption the most outrageous was the proposal of the thistle to ally itself with the cedar (2 K. xiv. 9). Everyone who has seen the far-famed group above the Kadisha must recognise the force of the majestic imagery of the prophets. With their gnarled and contorted stems and their scaly bark, with their massive branches spreading their foliage rather in layers than in flakes, with their dark green leaves, shot with silver in the sunlight, as they stand a lovely group in the stupendous mountain amphitheatre—those trees assert their title to be the monarchs of the forest.

The cedar of Lebanon was the principal timber employed by David and Solomon in their buildings, both in the Temple and in palaces. "The house of the forest of Lebanon" was so named from the number of cedar pillars and the cedar beams and roof (1 K. vii. 2). The cedar of Lebanon also supplied the timber for the Second Temple of Zerubbabel (Ezra iii. 7). For this Temple, as well as for that of Solomon, the trees were felled and shipped from Tripoli and Gebal (*Jebeil*) by the Phoenician artisans, "the men of Tyre and Sidon." Cedar was also used by Herod for the roof of his Temple (Joseph. *B. J.* v. 5, § 2). The roof of the Rotunda of the Church of the Holy Sepulchre, destroyed by fire in A.D. 1508, was constructed of cedar; and so also was that of the Church of the Virgin at Bethlehem. But this latter was restored by the Crusaders, and the material of the present roof appears to be English oak (Williams, *Holy City*, ii. 202; Quaresim. *Eluc. Terr. Sanct.* vi. 12; Tobler, *Bethlehem*, pp. 110, 112).

Pliny speaks of the cedar of Crete, Africa, and Syria as being much esteemed and imperishable. In Egypt and Syria ships were built of cedar, and in Cyprus a tree was cut down 120 feet long. The durability of cedar was proved, he says, by the cedar roof of the temple of Diana at Ephesus which lasted 400 years. At Utica, the beams made of Numidian cedar of a temple of Apollo had lasted 1178 years. Vitruvius speaks of the antiseptic properties of the oil of cedar and also of juniper (Pliny, *Hist. Nat.* xiii. 5, xvi. 40; Vitruv. ii. 9; Joseph. *Ant.* viii. 5, § 2). It may be and has been objected that the timber of the cedar has no commercial value now, and is in no repute as a building material. It is true that the English grown cedar supplies an inferior quality of deal, but the well-ripened old tree in its native climate yields a fine-grained sound wood. Timber in the dry climate of Syria will last for centuries longer than in our moist insular atmosphere:

and we have ourselves taken out pieces of acacia wood (*shittim*) used for bratticing wells in the wilderness of Judaea, as sound as when they were placed there more than 2,000 years ago. No other tree will meet the conditions of the problem. The only difficulty that deserves notice is the mention of the cedar by Ezekiel (xxvii. 5) as used for ships' masts. According to our ideas, the pine would be more adapted for this purpose, but we have ourselves seen many a cedar-tree in the Taurid mountains which would supply admirable masts even for our far larger shipping. Even were this not so, it is quite possible that the fir-trees brought from Lebanon might be spoken of as cedars. The cedar-trees when crowded grow as straight poles as do our Scotch firs. It is scarcely necessary to quote the many untenable surmises of writers unacquainted with the country as to what the *erez* might be. The Deodara has been suggested—a variety of cedar confined to the Himalayas; the Scotch fir (*Pinus sylvestris*), which does not exist in the East, but which is represented by *Pinus halepensis*. This is the conjecture of Celsius, generally well informed. Others have preferred *Thuja articulata*, the Sandara tree, with a valuable timber, found in Turkey and Africa, but not in Syria. As to the arguments from the name *arz* being elsewhere applied by the Arabs to other conifers, it may be replied that it is only thus applied in regions where the cedar is not found, and that this argument might include the larch of Western Europe, to which the Moors gave the name *el arz*, changed by the Spaniards into *alerce*, and by ourselves into *larch*. The three principal conifers of Lebanon are *Cedrus Libani*, *Pinus halepensis*, and *Juniperus excelsa*, and it is very possible that on the coast and by the timber-merchants the wood of all was indiscriminately spoken of as *erez*.

In two passages, and two only—Lev. xiv. 4; Num. xix. 6—*erez* cannot designate the cedar of Lebanon, for in the wilderness the cedar of Lebanon would be unattainable, and no cedar exists in Arabia. Here probably one of the junipers, whose wood has a strong resinous perfume, is intended. *Juniperus oxycedrus* is not uncommon in Arabia Petraea, and its wood was anciently burnt as a perfume, especially at funerals (Plin. *Hist. Nat.* xiii. 1, 5; Ovid, *Fast.* ii. 558; Hom. *Od.* v. 60). Pliny speaks of it as a cedar, though it is hardly larger than a bush; whence its specific name of *oxycedrus*.

Besides the celebrated grove of cedars above the Kadisha, nearly 7,000 feet above the sea, it was for centuries believed that none others existed in Lebanon. It is now, however, well known that groves, clumps, and even whole tracts of cedar still remain scattered over various parts of Lebanon, but chiefly in the most inaccessible districts of the south, though more generally on the northern and almost unvisited slopes. We ourselves have discovered several, and at least nine distinct localities are now ascertained, some of them containing many thousand trees, and with an abundant succession of young saplings springing up round them. These sufficiently indicate that in former ages the whole Lebanon region may have been one vast cedar forest, a mine of timber treasure, which seemed inexhaustible to the Phoenician woodcutters, who drew thence for successive centuries their supplies for the ship-building of the then whole world. But no one ever replanted a cedar, and the goats which browsed in the clearings ate down the young seedlings, till, if the north of Lebanon were as well peopled as the southern and central districts, the cedar might have suffered the same hircine extermination as has been the fate of the ebony of St. Helena, and of many another rare insular tree. The cedars remain now just in the districts where the physical obstacles to their transport to the coast are insurmountable; and the famous cedar grove far away in the recesses of the mountains, and almost inaccessible, is but a surviving outlier of what was, in the days of David, the grand characteristic of the whole range. It is curious that there is no trace of the cedar on Hermon or Antilebanon. But it is found abundantly all through the Taurid, even to its southern spurs, and magnificent forests run down the slopes to the neighbourhood of Marash and Samosata.

There are but three true cedars known, the present species, *Cedrus atlantica* and *C. deodara*. The Atlantic cedar is found on Mount Atlas, and is barely, if at all, distinguishable from the cedars of Lebanon and the Taurid. Some of the old trees at Teniet-el-Haad, 6,000 feet above the sea, equal those of Kadisha in size and grandeur. The Deodar, though more distinct in its habit, is by many united to these as merely a variety of the Lebanon cedar. It is less tolerant of our climate, and has not been found beyond the Himalayas and their neighbouring ranges. Its timber bears the same character as the cedar of old. In the temple of Kunawar, supposed to be from 600 to 800 years old, Major Madden states that the cedar beams are sound. Pieces from a bridge in Cashmere the same writer found to be only slightly decayed, though they had been exposed to the action of water for 400 years. The limits of the Deodar appear to be from 4,000 to 12,000 feet. All the cedars grow rapidly and live long. Sir J. D. Hooker calculates the age of the cedars of the grove to be 800 years, from the rate of growth of the cedars at Chelsea. From the rings in a branch, one of the older trees might be 2,500 years old; but this, he observes, is no doubt widely far from the mark. Still an immense antiquity must be assigned to some of them.

The cedar wood of modern commerce, used for pencils, &c., is the wood of a very different tree, the *Juniperus bermudiana*, of the warmer parts of North America.

Sir J. D. Hooker has favoured us with the following valuable communication relative to the true cedars of Lebanon:—"The grove is at the very upper part of the valley of the Kadisha, about fifteen miles from the sea, 6000 feet above that level, and their position is moreover above that of all other arboreous vegetation. The valley here is very broad, open, and shallow, and the grove forms a mere speck on its flat floor. The mountains rise above them on the N.E. and S. in steep stony slopes, without precipices, gorges, ravines, or any other picturesque features whatever. Nothing can be more dreary than the whole surrounding landscape. To the W. the scenery abruptly changes, the valley suddenly contracts to a gorge, and becomes a

rocky ravine of the most picturesque description, with villages, groves, and convents perched on its flanks, base, and summits, recalling Switzerland vividly and accurately. At the time of my visit (October 1860) the flanks of the valley about the cedars were perfectly arid, and of a pale yellow red; and the view of this great red area, perhaps two or three miles across, with the minute patch of cedar grove, seen from above and at a distance of ten miles or so, was most singular. I can give you no idea of what a speck the grove is in the yawning hollow. I have said the floor of the valley is flat and broad; but, on nearer inspection, the cedars are found to be confined to a small portion of a range of low stony hills of rounded outlines, and perhaps 60 to 100 feet above the plain, which sweep across the valley. These hills are, I believe, old moraines, deposited by glaciers that once debouched on to the plain from the surrounding tops of Lebanon. I have many reasons for believing this, as also for supposing that their formation dates from the glacial epoch." *

Since the visit of Sir J. D. Hooker, the cedar grove has been carefully enclosed by Rustem Pasha, the late enlightened governor of the Lebanon, and there is every prospect of an abundant succession of trees to supply the places of the failing patriarchs. [H. B. T.]

CE'DRON. 1. (ἡ Κεδρών; A. 1 Macc. xv. 39, Καιδρόν; *v.* 41, Κεδρώ; 1 Macc. xv. 39, 41, *Gedor*, but *Cedron*, ed. 1590, as in xvi. 9), a place fortified by Cendebaeus under the orders of king Antiochus (Sidetes), as a station from which to command the roads of Judaea (1 Macc. xv. 39, 41; xvi. 9). It was not far from Jamnia (*Yebnah*), or from Azotus (Ashdod), and had a winter-torrent or wady (χειμάῤῥους), on the eastward of it, which the army of the Maccabees had to cross before Cendebaeus could be attacked (xvi. 5). These conditions are well fulfilled in the modern place *Katrah*, which lies on the maritime plain below the river *Rûbîn*, and three miles south-west of *'Akir*, Ekron (*PEF. Mem.* ii. 410). Schwarz (p. 119) gives the modern name as *Kadrûn;* but this wants confirmation. Ewald (*Gesch.* iv. 390, note) suggests *Tell Turmus*, five or six miles further south.

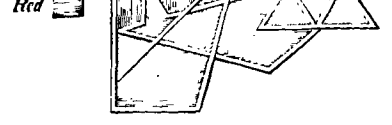
2. In this form is given in the N. T. the name of the brook Kidron (נַחַל קִדְרוֹן = "the black torrent"), in the ravine below the eastern wall of Jerusalem (John xviii. 1, only). Beyond it was the garden of Gethsemane. Lachmann, with A S Δ, has χειμάῤῥους τοῦ Κεδρών; but the Rec. Text, with B C L and most of the uncials, has τῶν Κέδρων, *i.e.* "the brook of the cedars" (Westcott and Hort; so, too, the LXX. in 2 Sam. xv. 23). Other MSS., as ℵ, D, have the name even so far corrupted as τοῦ κεδροῦ, *cedri*, and τῶν δένδρων. In English the name is often erroneously read (like Cephas, Cenchreae, Chuza, &c.) with a soft C; but it is unnecessary to point out that it has no connexion with "Cedar." [KIDRON.] [G.] [W.]

CEI'LAN (Κιλάν; *Ciaso*). Sons of Ceilan and Azetas, according to 1 Esd. v. 15, returned with Zorobabel from Babylon. There are no names corresponding to these in the lists of Ezra or Nehemiah. [W. A. W.]

CEILING (or CIELING; see Way, *Promptuarium parvulorum*, p. 65), סְפָן, from סָפַן (ἐκοιλοστάθμησε, 1 K. vi. 9), *to cover with rafters* (Ges.; Schleusner, *Lex. V. T.* κοιλοστ.), or שְׁחִי (Ezek. xli. 16), *a plank*. The descriptions of Scripture (1 K. vi. 9, 15, vii. 3; 2 Ch. iii. 5, 9; Jer. xxii. 14; Hag. i. 4), and of Josephus (*Ant.* viii. 3, §§ 2–9, xv. 11, § 5), show that the ceilings of the Temple and the palaces of the Jewish kings were formed of cedar planks applied to the beams or joints crossing from wall to wall, probably with sunk panels (φατνώματα), edged and ornamented with gold, and carved with incised or other patterns (βαθυξύλφις γλυφαῖς), sometimes painted (Jer. xxii. 14).

It is probable that both Egyptian and Assyrian models were, in this as in other branches of architectural construction, followed before the Roman period. [ARCHITECTURE.] The construction and designs of Assyrian ceilings in the more important buildings can only be conjectured (Layard, *Nineveh*, ii. 265, 289), but the proportions in the walls themselves answer in a great degree to those mentioned in Scripture (*Nin. and Bab.* p. 642; Fergusson, *History of Architecture*, i. 174–177). Examples, however, are extant, of Egyptian ceilings in stucco painted with devices, of a date much earlier than that of Solomon's Temple. Of these devices the principal are the guilloche, the chevron, and the scroll. Some are painted in blue with stars, and others bear representations of birds and other emblems (Wilkinson, *Anc. Egypt.* ii. 290 [1878]; Maspéro, *L'Archéologie Égyptienne*, p. 162 sq.). The excessive use of vermilion and other glaring colours in Roman house-painting, of which Vitruvius at a later date complains (vii. 5), may have been introduced from Egypt, whence also came in all probability the taste for vermilion painting shown in Jehoiakim's palace (Jer. xxii. 14; Amos iii. 15; Wilkinson, i. 19). See also the descriptions given by Athenaeus of the tent of Ptolemy Philadelphus and the ship of Philopator (v. 25 [196], 39 [206]), and of the so-called sepulchres of the kings of Syria near Tyre (Hasselquist, p. 165).

The panel work in ceilings, which has been described, is found in Oriental and North African dwellings of late and modern times.

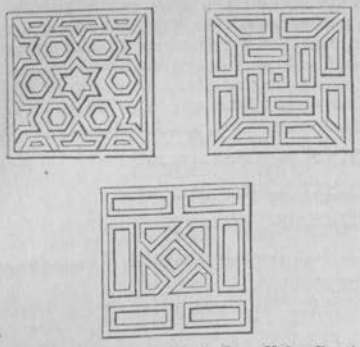


Panelled ceiling from house in Cairo. (Lane, *Modern Egyptians.*)

Shaw describes the ceilings of Moorish houses in Barbary as of wainscot, either "very artfully

* See Sir J. D. Hooker's paper "On the Cedars of Lebanon, Taurus, &c." in the *Nat. Hist Review*, No. 5, p. 11.

painted, or else thrown into a variety of panels, with gilded mouldings and scrolls of the Korân intermixed" (*Travels*, p. 208). Mr. Porter describes the ceilings of houses at Damascus as delicately painted, and in the more ancient

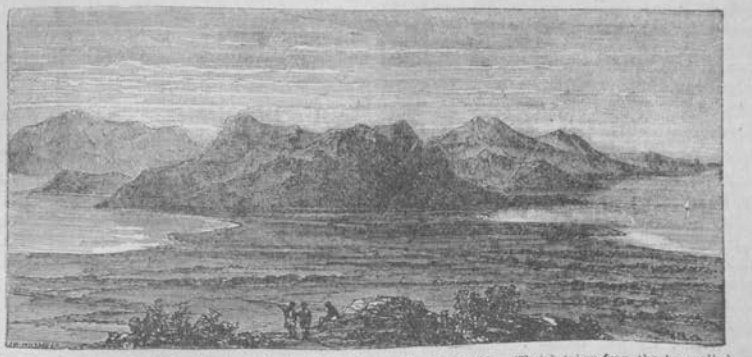


Panelled ceiling from house in Cairo.' (Lane, *Modern Egyptians.*)

houses with "arabesques encompassing panels of blue, on which are inscribed verses and chapters of the Koran in Arabic. Also a tomb at Palmyra, with a stone ceiling beautifully panelled and painted" (*Damascus*, i. 34, 37, 57, 60, 232: cp. Deut. vi. 9; also Lane's *Mod. Egypt.* i. 37, 38). Many of the rooms in the Palace of the Moors at the Alhambra were ceiled and ornamented with the richest geometrical patterns. These still remain, and restorations of them may be seen at the Alhambra Court of the Crystal Palace. The ancient Egyptians used coloured tiles in their buildings (Athen. v. 206; Wilkinson, ii. 288, 292 [1878]). The like taste is observed by Chardin to have prevailed in Persia, and he mentions beautiful specimens of mosaic, arabesque, and inlaid wood-work in ceilings at Ispahân, at Koom in the mosque of Fatima, and at Ardevil. These ceilings were constructed on the ground and hoisted to their position by machinery (Chardin, *Voyage*, ii. 434, iv. 126, viii. 40, pl. 39; Olearius, p. 241). [H. W. P.]

CELOSYRIA. [COELESYRIA.]

CEN'CHREA (accurately CENCHREAE, Κεγχρεαί), the eastern harbour of Corinth (*i.e.* its harbour on the Saronic Gulf) and the emporium of its trade with the Asiatic shores of the Mediterranean, just as Lechaeum (*Lutráki*) on the



Cenchrea, Isthmus of Corinth, showing both the Corinthian and Saronic Gulfs. (Sketch taken from the Acropolis.)

Corinthian Gulf connected it with Italy and the west. A line of walls extended from the citadel of Corinth to Lechaeum, and thus the pass of Cenchreae was of peculiar military importance in reference to the approach along the Isthmus from Northern Greece to the Morea. [CORINTH.]

St. Paul sailed from Cenchreae (Acts xviii. 18) on his return to Syria from his second missionary journey; and when he wrote his Epistle to the Romans in the course of the third journey, an organized Church seems to have been formed here (Rom. xvi. 1. See PHOEBE). The first Bishop of this Church is said (*Apost. Const.* vii. 46) to have been named Lucius, and to have been appointed by St. Paul.

The distance of Cenchreae from Corinth was seventy stadia or about nine miles. Pausanias (ii. 3) describes the road as having tombs and a grove of cypresses by the wayside. The modern village of *Kikries* retains the ancient name, which is conjectured by Dr. Sibthorpe to be derived from the millet (κέγκρι), which still grows there (Walpole's *Travels*, p. 41). Some traces of the moles of the port are still visible (see Leake's *Morea*, iii. pp. 233–235). The following coin exhibits the port exactly as it is described by Pausanias (ii. 2, § 3), with a temple at the extremity of each mole, and a statue of

Æ

Colonial Coin of Corinth. On the obverse the head of Antoninus Pius: on the reverse the port of Cenchreae, with C. L. I. COR.—that is, COLONIA LAVS IVLIA CORINTHVS.

Neptune on a rock between them. There is also a Corinthian coin of the time of Hadrian, on which the harbours Lechaeum and Cenchreae are represented as nymphs turned opposite ways, each holding a rudder. The same two harbours are referred to on other coins representing Isthmus as a young male figure, standing and holding two rudders (*Journ. of Hellenic Studies*, vi. 63, 64). [J. S. H.] [J. E. S.]

CENDEBE'US (accurately **CENDEBAEUS**, Κενδεβαῖος), a general left by Antiochus VII. in command of the sea-board of Palestine (1 Macc. xv. 38 sq.) after the defeat of Tryphon B.C. 138. He fortified Kedron and harassed the Jews for some time, but was afterwards defeated by Judas and John, the sons of Simon Maccabaeus, with great loss (1 Macc. xvi. 1–10). [ANTIOCHUS VII.] [B. F. W.]

CENSER (מַחְתָּה and מִקְטֶרֶת; in LXX. mostly πυρεῖον, but also θυίσκη and θυμιατήριον; *thuribulum*). The former of the Hebrew words (from חָתָה, *to seize* or *lay hold of*, especially of fire) seems used generally for any instrument to seize or hold burning coals, or to receive ashes, &c., such as the appendages of the brazen Altar and golden candlestick mentioned in Ex. xxv. 38, xxxvii. 23, in which senses it seems rendered by the LXX. by ἐπαρυστρίς, ἐπαρυτῆρ, or perhaps ὑπόθεμα. "Censer," however, generally bears the limited meaning which properly belongs to the second Hebrew word, found only in the later Books (*e.g.* 2 Ch. xxvi. 19; Ezek. viii. 11, from קָטַר, to burn incense), that, viz. of a small portable vessel of metal fitted to receive burning coals from the Altar, and on which the incense for burning was sprinkled by the priest to whose office this exclusively belonged, who bore it in his hand, and with whose personal share in the most solemn ritual duties it was thus in close and vivid connexion (2 Ch. xxvi. 18; Luke i. 9). Thus "Korah and his company" were bidden to take "censers" (מַחְתֹּת), with which in emulation of Aaron and his sons they had perhaps provided themselves[a] (cp. Ezek. viii. 11); and Moses tells Aaron to take "*the* censer" (not *a* as in A. V.; R. V. "thy," Num. xvi. 46 [Heb., xvii. 11]), *i.e.* that of the sanctuary, or that of the high-priest, to stay the plague by atonement. The only distinct precepts regarding the use of the censer are found in Num iv. 14, where among the vessels of the golden Altar, *i.e.* of incense, "censers" are reckoned; and in Lev. xvi. 12, where we find that the high-priest was to carry it into the most holy place within the veil, where the "incense" was to be "put on the fire," *i.e.* on the coals in the censer, "before the Lord." This must have been on the Day of Atonement, for then only was that place entered. Solomon prepared "censers of pure gold" as part of the same furniture (1 K. vii. 50; 2 Ch. iv. 22). Possibly their general use may be explained by the imagery of Rev. viii. 3, 4,[b] and may have been to take up coals from the brazen Altar, and convey the incense while burning to the "golden Altar," or "Altar of incense," on which it was to be offered morning and evening (Ex. xxx. 7, 8). So Uzziah, when he was intending "to burn incense upon the altar of incense," took "a censer in his hand" (2 Ch. xxvi. 16, 19). The Mishna (*Joma*, iv. 4) mentions a silver censer which had a handle, and which was fetched from some chamber where such utensils were kept (*ib.* v. 1, and Barthenora's comment); it was used to gather the coals from the altar, which were then transferred to a golden censer. On the great Day of Atonement, however, a golden one of finer standard (*Tamid*, v. 5) was used throughout.[c] In Ugolini, vol. xi., a collection of authorities on the subject will be found; Sonneschmid, *de Thym. Sanct.* is referred to by Winer, *s. v.* Rauchfass. [H. H.]

[a] Gesenius, *s. v.* מַחְתָּה, seems to prefer the general meaning of a fire-pan in this passage; but, from Num. xvi. 17, it was probably the same fashion of thing as that used by Aaron in the priestly function. Nor, as the rebellion was evidently a deliberately concerted movement, is there any difficulty in supposing the amount of preparation suggested in the text.

[b] The word for censer here is λιβανωτής, from the λίβανος of Matt. ii. 11; in Rev. v. 8, φιάλας is used apparently to mean the same vessel.

[c] The word θυμιατήριον, rendered "censer" in Heb. ix. 4, probably means the "Altar of incense." [ALTAR; INCENSE.]

CENSUS. [NUMBERING.]

CENTURION. [ARMY.]

CE'PHAS. [PETER.]

CE'RAS (Κηράς; *Cariae*), 1 Esd. v. 29. [KEROS.]

CE'SAR. A. V. ed. 1611. [CAESAR.]

CESAREA. A. V. ed. 1611. [CAESAREA.]

CE'TAB (Κητάβ; *Cetha*), 1 Esd. v. 30. There is no name corresponding with this in the lists of Ezra and Nehemiah.

CHABRIS (Χάβρις; Vulg. omits), the son of Gothoniel (ὁ τοῦ Γ.), one of the three "rulers" (ἄρχοντες) or "ancients" (πρεσβύτεροι) of Bethulia, in the time of Judith (Judith vi. 15, viii. 10, x. 6).

CHA'DIAS. "They of Chadias (B. *oi* Χαδιασαί, A. Χαδ'ασαί; *Enocadics*) and Ammidoi," according to 1 Esd. v. 20, returned from Babylon with Zorobabel. Fritzsche (*Exeg. Hdb.* in loco) identifies it with Kedesh (Josh. xv. 23). There are no corresponding names in the lists of Ezra and Nehemiah. [W. A. W.]

CHAE'REAS, 2 Macc. x. 32, 37. [CHEREAS.]

CHAFF (מֹץ, חֲשִׁישׁ, תֶּבֶן; Chald. שׂוּר; χνοῦς, ἄχυρον; *stipula, pulvis, favilla*). The Heb. words rendered *chaff* in A. V. have all different meanings: חֲשִׁישׁ = fodder, and occurs twice only in O. T., viz. Is. v. 24, xxxiii. 11. The root חָשַׁשׁ is not used. Possibly the Sanscrit *kaksch* = *hay* is the same word (Bopp. *Gloss.* p. 41); the Arabic حشيش, *hashīsh*, is also applied to all cut herbage. Hay, as we understand it, is not made or stored in the East; but stalled cattle and horses are fed on straw and fodder cut green, or dried and withered according to the season. Whether fresh or dry, this is called *hashish*.

מוֹץ or מֹץ is chaff separated by winnowing from the grain—the husk of the wheat. The carrying away of chaff by the wind is an ordinary scriptural image of the destruction of the wicked, and of their powerlessness to resist God's judgments (Is. xvii. 13; Hos. xiii. 3; Zeph. ii. 2). The root of the word is מוּץ, *to press out, as of milk*; whence its second meaning, *to separate*.

תֶּבֶן is rendered correctly *straw* in Ex. v. 7, 10, 11, &c., but stubble in Job xxi. 18. In Ex. v. 12, we read קַשׁ לַתֶּבֶן, *stubble for straw*; so that it is not the same as stubble. Straw was cut into short portions, and mixed with the mud of which bricks were made to give it consistency. In 1 K. iv. 28, mention is made of a mixed fodder for horses and camels of barley and תֶּבֶן, such as the Arabs call *tibn* to this day. The derivation of the word is doubtful. Dietrich (see MV.[11] *s. n.*) connects it with תָּבַן, *to bruise*; Gesenius was of opinion that תֶּבֶן was for תִּבְנָה, from root בָּנָה, *to build*, in reference to edifices of bricks made with straw; but Roediger prefers to connect it with בִּין, which properly implies a separation and division of parts, and is thence transferred to the mental power of discernment; so that תֶּבֶן signifies properly anything cut into small parts (Ges. *Thes.* p. 1492).

The remarkable discovery of the Storehouse or Treasure-city at Sukkut, or Thuku, in Lower Egypt (Succoth, Ex. xii. 37), the temple of Pe-tum (Pithom, Ex. i. 11), which was the sacred enclosure within the civil city, has cast a vivid light on the use of straw and stubble mentioned in Exodus. The lower part of the walls are formed of dried bricks with chopped straw (*teben*). Above these reeds and waterweeds chopped (the *kash* or stubble of the A. V.) have been employed; while the upper tiers have been dried without either stubble or straw.

The Chaldaic word עוּר occurs but once, in Dan. ii. 35, and has the same meaning as the Heb. מוֹץ, *chaff*. It is connected with the Syr. ܥܘܿܢܳܐ and Arab. عُوَار, *i.e.* a small bit of chaff, or a mote. [W. D.] [H. B. T.]

CHAIN. Chains were used, 1. as badges of office; 2. for ornament; 3. for confining prisoners. 1. The gold chain (רְבִיד) placed about Joseph's neck (Gen. xli. 42), and that promised to Daniel (Dan. v. 7, named הַמְנִיכָא, Keri), are instances of the first use. In Egypt it was one of the *insignia* of a judge, who wore an image of Truth attached to it (Wilkinson's *Anc. Egypt.* ii. 205 [1878]); it was also worn by the prime minister. In Persia it was considered not only a mark of royal favour (Xen. *Anab.* i. 2, § 27), but a token of investiture (Dan. *l. c.*; Morier's *Second Journey*, p. 93). In Ezek. xvi. 11, the chain is mentioned as the symbol of sovereignty. 2. Chains for ornamental purposes were worn by men as well as women in many countries both of Europe and Asia (for Egypt, cp. Wilkinson, ii. 339), and probably this was the case among the Hebrews (Prov. i. 9). The necklace (עֲנָק) consisted of pearls, corals, &c., threaded on a string; the beads were called חֲרוּזִים, from חָרַז, *to perforate* (Cant. i. 10, A. V. "chains," where the words *of gold* are interpolated; R. V. "strings of jewels"). Besides the necklace, other chains were worn (Judith x. 4), hanging down as far as the waist, or even lower. Some were adorned with pieces of metal, shaped in the form of the moon, named שַׁהֲרֹנִים (*μήνισκοι*, LXX.; *lunulae*, Vulg.; "round tires like the moon," A. V., "the crescents," R. V.; Is. iii. 18); a similar ornament, the *hilāl*, still exists in Egypt (Lane's *Modern Egyptians*, App. A). The Midianites adorned the necks of their camels with it (Judg. viii. 21, 26); the Arabs still use a similar ornament (Wellsted, i. 301). To other chains were suspended various trinkets — as scent-bottles, בָּתֵּי הַנֶּפֶשׁ ("tablets," marg. *houses of the souls*, A. V.; "the perfume-boxes," R. V.; Is. iii. 20), and hand-mirrors, גִּלְיוֹנִים (Is. iii. 23). *Step-chains*, צְעָדוֹת ("tinkling ornaments," A. V., "anklets," R. V.), were attached to the anklerings, which shortened the step and produced a mincing gait (Is. iii. 16, 18). 3. The means adopted for confining prisoners among the Jews were fetters similar to our handcuffs, נְחשָׁתַיִם (lit. *two brasses*, as though made in halves), fastened on the wrists and ankles, and attached to each other by a chain (Judg. xvi. 21; 2 Sam. iii. 34; 2 K. xxv. 7; Jer. xxxix. 7). Among the Romans, the prisoner was handcuffed to one, and occasionally to two guards—the handcuff on the one being attached to that on the other by a chain (Acts xii. 6, 7; xxi. 33;—*Dict. of Gr. and Rom. Ant.*, art. CATENA). [W. L. B.] [F.]

CHALCEDONY (*χαλκηδών*; *calcedonius*). only in Rev. xxi. 19, where it is mentioned as being the stone which garnished the third foundation of the heavenly Jerusalem. The name is applied in modern mineralogy to one of the varieties of agate: specimens of this subspecies of quartz, when of a pearly or wax-like lustre and of great translucency, are known by the name of chalcedony, sometimes popularly called "white carnelian."* There is also a stalactitic form found occasionally in cavities. There can, however, be little doubt that the stone to which Theophrastus (*de Lapid.* § 25) refers, as being found in the island opposite Chalcedon and used as a solder, must have been the green transparent carbonate of copper, or our copper emerald. It is by no means easy to determine the mineral indicated by Pliny (*H. N.* xxxvii. 5); the white agate is mentioned by him (*H. N.* xxxvii. 10) as one of the numerous varieties of *Achates* (Agate), under the names *Cerachates* and *Leucachates*. The *Chalcedonius* was so called from Chalcedon, and was obtained from the copper mines there: it was a small stone and of no great value; it is described by Pliny as resembling the green and blue tints which are seen on a peacock's tail, or on a pigeon's neck. Mr. King (*Antique Gems*, p. 8) says it was a kind of inferior emerald, as Pliny understood it. [W. H.] [H. B. T.]

CHALCOL, 1 K. iv. 31. [CALCOL.]

CHALDE'A, CHALDAE'A (כַּשְׂדִּים; also, more correctly, אֶרֶץ כַּשְׂדִּים, "the land of the Chaldaeans:" ἡ Χαλδαία; *Chaldaea:* Assyr.

* "Our calcedony being often opalescent—*i.e.* having something of Pliny's 'Carbunculorum ignes' in it—got confounded with the Carchedonius or Punic carbuncle of a pale colour, and this again with his green Chalcedonius. Καρχηδόνιος and Καλχηδόνιος are continually interchanged in MSS. Marbodus already understood it of our calcedony, as shown by his 'Pallensque Chalcedonius ignis habet effigiem.'"—C. W. KING.

Mât Kaldu [*Kaldi, Kalda*], "the land of Chaldaea"), properly only the middle portion of Babylonia, apparently the tract immediately south and east of the city of Babylon, having on the N.W. the district called Kar-Dunîaš, on the S.E. Bît-Yâkîn and Tâmtim (the latter a district on the shores of the Persian Gulf), on the N.E. Sutu and Yatbur, and on the S.W. the Syrian Desert. After the time of Jeremiah, however, the name was extended, and made to include the whole of Babylonia; namely, the districts of Sumir and Akkad (N.E. and S.W. Babylonia), following and taking in the whole district between the Tigris and the Euphrates, as far as the Persian Gulf, and extending on the S.E. beyond the banks of the Tigris so as to include the tract of marshland on the S.W. borders of Elam. In its more extended meaning, its boundaries were the same as those of Babylonia, —Assyria and the Kassites on the N. and N.E., the Syrian desert and the Persian Gulf on the S., Elam on the E., and Syria on the W. Its extreme length (nearly N.E. and S.W.) would be about 400 miles, and its average width about 100 miles. [See BABEL, BABYLONIA.]

The meaning of the name Kasdim or Chaldaeans has often been discussed, and the explanation which may be regarded as the most satisfactory is that which connects the Hebrew form with the Assyrian root *kašādu*, "to conquer," whence (by the common change of *š*, through *r*, into *l* before a dental) the word *Kaldu*, the form from which the Greek Χαλδαῖα comes. The Hebrews seem to have borrowed the word at a very early period, for the form *Kašdu* has not yet been found in the wedge-writing. The absence of this last-named form, however, is probably to be explained by the fact, that besides the root *kašādu* the Assyrians possessed also the root *kalādu*, with the same meaning; and they probably considered that the name Kaldu came rather from the latter than the former. The name is supposed to have originated from the warlike nature of the Chaldaean tribes inhabiting Babylonia (see CHALDEANS, 1). [T. G. P.]

CHALDE'ANS or CHALDEES (כַּשְׂדִּים; Χαλδαῖοι; *Chaldnei*; Assyr. *Kaldâa, Kaldû*).

1. (In the original and limited sense.) The Chaldeans formed a cluster of tribes, each governed by its own chief or petty king, and situated immediately to the south of the city of Babylon (see CHALDEA). It seems not at all unlikely that the early Chaldaeans were so called on account of their warlike nature (see CHALDEA). The Babylonians proper hardly mention them in their records as a nationality; but the Assyrians often record encounters with them, and from this we may infer that they sometimes gave the Assyrians a great deal of trouble, for they seem to have been most persevering in resisting the Assyrian invasions of Babylonia. In the Assyrian records Chaldea (*mât Kaldu*) first makes its appearance about 880 B.C., being mentioned in the annals of Aššur-naṣir-apli or Assurnasirpal. Shalmaneser, his son, attacked the Chaldaeans, and compelled Adinu, of the tribe of Dakkuru or Dakuru, one of their chiefs, to give tribute. Tiglath-pileser also attacked many Chaldaean chiefs (Balasu "son of Dakkuru" among the number); and from other passages in the Assyrian records we learn also that Chaldea, in its restricted sense, was governed by a great many petty kings. Judging from what Sennacherib says about them, they were often to be found as mercenaries, and he classes them with the wandering Arabs and Arameans who used to enter the service of foreign states. Sennacherib himself, in his Babylonian expeditions, often came into contact with them. It is not at all unlikely that both Nergal-ušēzib (Regebelos) and Mušēzib-Marduk (Mesesimordakos), kings of Babylon, each of whom seems to have borne the name of Šûzub (from the Chald. שֵׁיזֵב; cp. the name מְשֵׁיזָבְאֵל), were, as implied by Sennacherib, Chaldeans. (When a Chaldaean chief became king of Babylon, he seems to have adopted a name in the court-Babylonian or Assyrian language.) The Chaldaeans were also among those who obeyed the call of Šamaš-sum-ukîn or Saosduchinos, king of Babylon, when he revolted against the overlordship of his brother Assurbanipal, king of Assyria. On the whole, the warlike nature attributed in the Bible to the Chaldaeans, is well borne out by the inscriptions of Assyria and Babylonia. The house of Dakkuru, mentioned above, seems to have been the chief tribe.

From their character of warriors, which they shared with the Aramaeans, the Chaldaeans probably belonged to the more energetic portion of the population of Babylonia, the Babylonians proper being rather traders than warriors. Hence it probably was, that the Chaldaean tribes of Babylonia—who seem to have given more than one king to the country; and who, in later times, probably formed, with the Aramaeans, the backbone of the Babylonian army—were regarded by the nations around as the chief race of the country, and the whole of Babylonia probably obtained the name of Chaldea (by which it has been known since the time of Jeremiah) in this way.

Judging from one or two of the proper names met with in the Assyrian and Babylonian records, it seems probable that the Chaldaeans proper spoke a language closely akin to, if not exactly the same as, the Chaldaean of the books of Daniel, Ezra, and Nehemiah. The names which illustrate this best are those of Dakuru or Dakkuru and his descendant Adinu. Of the latter name the Hebrew equivalent would probably be עֵדֶן, whilst the former seems certainly to be from the root זכר, Chald. דכר, both having the common change from sibilant (*z*) to dental (*d*), which is met with also in Aramaean or Syriac.

2. (In its extended meaning.) The inhabitants of the land of which Babylon was the capital, and which is generally designated by the name of Babylonia, corresponding with the *mât Bâbili* of the Assyrians and Babylonians, and including Sumer or Shinar, Akkad (*Uri*), Kar-Dunîaš, Chaldea (*mât Kaldi*), *mât Tâmtim* ("the land of the sea"), *bît Yâkîn*, &c., &c. (see BABYLON, the country). These so-called Chaldaeans, though Semites for the most part, probably had originally but little Chaldaean blood in them. Their language was closely allied to Hebrew, and any words of Chaldaean form that it may have had in later times are probably due to the preponderating influence which the Chaldaean tribes inhabiting the

district south of Babylon had gained in the country (see above). The so-called Chaldaeans (= Babylonians) were in fact of the same race as the Assyrians, and spoke the same language. [BABYLON (the country); ASSYRIA.]

3. (In its derived meaning.) The Book of Daniel (ch. ii. 2, 10; iv. 4, &c.), Curtius, Strabo, and Diodorus understood *astrologers* by the word Chaldaean. This use of the name probably arises from the fact, that from ancient times Babylonia (= Chaldea) was the home of astrology, and remained so even after the downfall of the late-Babylonian monarchy. It is also not unlikely that their special reputation as astrologers rests upon a kind of pun, the word Chaldaean (probably restricted to the class of astrologers) being often written, in Babylonian and Assyrian, with the characters  (*amelu*) *Gal-du* (*gal*= "great," and *du*, "to make"); a group which could be understood to mean, in the old Akkadian language, "doer of great (things)." As has been stated above, the Chaldaeans proper (that is, in the original restricted sense of the word) spoke a Semitic dialect closely akin to, if not exactly the same as, the Chaldaean of the Book of Daniel and elsewhere; but the mother-tongue of the Chaldaean *astrologers* was apparently ordinary Semitic Babylonian. With regard to any special knowledge or science that they may have had, it does not appear from the ancient Babylonian or Assyrian monuments that they shone in that respect with greater lustre than any of the other classes of *dupšarrūti* or scribes. They nevertheless had a certain reputation, and it was apparently one of this class whom Sennacherib raised to the throne of Babylon, and of whom he speaks as "Bêl-ibnî, the son of the Galdu (Kaldu), of the stem of Šu-ana (the city of Babylon), who as a little child had grown up in my palace." This king, who is the Belibos of the Canon of Ptolemy, ruled over Babylonia for three years; at the end of which time (699 B.C.) he was deposed by the power which had raised him to the throne, and replaced by Aššur-nadin-šum (Aparanadios), Sennacherib's own son. It is probable that this learned class was located principally at Babylon, and future excavations in Babylonia will probably bring to light many additional facts concerning them. [T. G. P.]

CHALDEE or CHALDAIC LANGUAGE. [SHEMITIC LANGUAGES, § 14, &c.]

CHALDEE VERSIONS. [VERSIONS, ANCIENT (TARGUM).]

CHALDEES. [CHALDEANS.]

CHALK STONES (אַבְנֵי־גִר; *κονία*; *calx*, *lapides cineris*) occurs only in Is. xxvii. 9, "He maketh all the stones of the altar as chalkstones that are beaten in sunder," A. V. and R. V. The word signifies literally *stones of lime*. גִּר is from an unused root, גִּיר, "to boil up," in reference to the heating of lime when slaked.

In Dan. v. 5 the noun גִּירָה is translated "plaister," A. V. and R. V. The Arabic word جير, *g'ayyār*, "quicklime," is identical, and from the root جار, "to boil." Lime has been most abundantly used in Palestine from the very earliest times; and the cement of the most ancient remains is, for fineness, impenetrability and hardness, unsurpassed. The conditions of the country would always encourage the use of mortar. Timber is and always has been scarce, while the whole region, with some insignificant exceptions, is one mass of limestone, jurassic in the lower parts, but on the hills frequently covered, save when denuded, by eocene chalk. Here and there are basaltic streams, adjacent to which we sometimes find metamorphic limestone. The chalk and stone are both extremely friable, and in preparing lime a wheel like that of an oil press has been used from ancient times to pulverize the stone, before it is put into the kiln. The only fuel used is brushwood and thistle stalks, and the kiln is simply a saucer-shaped hollow in the ground about 4 feet deep, into which the fuel and crushed limestone are spread in alternate layers, then kindled, and the whole covered with earth or sods, as in the manufacture of charcoal, but with a draught hole in the centre. This is alluded to Is. xxxiii. 12: "The people shall be as the burnings of lime: as thorns cut up shall they be burned in the fire." One of the chief uses of this fine lime was to plaster the inside of the subterranean cisterns which honeycomb the whole land, especially the hill-country. The storage system, by which these cisterns were fed, consisted also of narrow cement gutters about six inches in diameter running along the edge of each terrace, and conveying the water into the cisterns. The innumerable sepulchres hewn out of the rocks and hillsides were likewise carefully plastered. In all these the cement, often more than 3,000 years old, remains hard, perfect, and impenetrable by moisture. [H. B. T.]

CHAMBER, UPPER. [HOUSE.]

CHAMBERLAIN (*οἰκονόμος*; *arcarius*). Erastus, "the *chamberlain*" (R. V. "treasurer") of the city of Corinth, was one of those whose salutations to the Roman Christians are given at the end of the Ep. addressed to them (Rom. xvi. 23). The office which he held was apparently that of public treasurer, or *arcarius*, as the Vulgate renders his title. These *arcarii* were inferior magistrates, who had the charge of the public chest (*arca publica*), and were under the authority of the senate. They kept the accounts of the public revenues. In the Glossary of Philoxenus the word *οἰκονόμος* is explained *ὁ ἐπὶ τῆς δημοσίας τραπέζης*, and in the Pandects the term *arcarius* is applied to any one who attends to public or private money. It is, as Grotius remarks, one of those words which have been transferred from the house to the state. In old glosses quoted by Suicer (*Thesaur.*) we find *arcarius* explained by *ὑποδεκτὴς χρυσοῦ*, and in accordance with this the translators of the Geneva Version have placed "receiver" in the margin. Erasmus interpreted the word *quaestor aerarii*. St. Ambrose thought that the office of the oeconomus principally consisted in regulating the prices of the markets, and hence Pancirollus was erroneously led to interpret the term of the aedile. Theophylact rendered it *ὁ διοικητής, ὁ προνοητὴς τῆς πόλεως Κορίνθου*, and is followed by Beza, who gives *procurator*.

In an inscription in the *Marm. Oxon.* (p. 85, ed. 1732), we find Νείλῳ οἰκονόμῳ Ἀσίας: and in another, mention is made of Miletus, who was oeconomus of Smyrna (Ins. xxx. p. 26; see Prideaux's note, p. 477). Another in Gruter (p. mxci. 7, ed. Scaliger, 1616) contains the name of "Secundus *Arkarius* Reipublicae Amerinorum;" but the one which bears most upon our point is given by Orellius (No. 2821), and mentions the "*arcarius* provinciae Achaiae." For further information see Reinesius, *Syntagm. Inscr.* p. 431; La Cerda, *Advers. Sacr.* cap. 56; Elsner, *Obs. Sacr.* ii. p. 68; and a note by Reinesius to the *Marmora Oxoniensia*, p. 515, ed. 1732.

Our translators had good reason for rendering οἰκονόμος by "chamberlain." In Stow's *Survey of London* (bk. v. p. 162, ed. Strype) it is said of the Chamberlain of the city of London: "His office may be termed a publick treasury, collecting the customs, monies, and yearly revenues, and all other payments belonging to the corporation of the city."

The office held by Blastus, "the king's *chamberlain*" (τὸν ἐπὶ τοῦ κοιτῶνος τοῦ βασιλέως), was entirely different from that above mentioned (Acts xii. 20). It was a post of honour which involved great intimacy and influence with the king. The margin of our Version gives "that was over the king's bedchamber," the office thus corresponding to that of the *praefectus cubiculo* (Suet. *Dom.* 16).

For CHAMBERLAIN as used in the O. T., see EUNUCH. [W. A. W.]

CHAMELEON (כֹּחַ, *côach*; χαμαιλέων; *chamaeleon*). The Hebrew word which signifies "strength" occurs in the sense of some kind of unclean animal in Lev. xi. 30; the A. V. follows the LXX. and Vulg. The R. V. renders it "the land-crocodile." Various other interpretations of the word have been given, for which see Bochart (*Hieroz.* ii. 493). There seems to be no reason, etymological or other, for the rendering "chameleon," a lizard pre-eminently feeble rather than strong, and whose skeleton-like body affords absolutely no flesh that could be eaten. It is more probable that the chameleon is intended by the Hebrew תִּנְשֶׁמֶת, *tinshemeth* (Lev. xi. 30, A. V. "mole," R. V. "chameleon"), where the context seems to imply some lizard, while the etymology, "the breather," may refer to this lizard, supposed by the ancients to live upon air.

The present word is referred by Bochart and others to the Arabic *el waral*, i.e. the lizard, of which there are two species, distinguished as *waral el bahr* and *waral el 'ard*, "the water lizard" and "the land lizard." These huge lizards, the most powerful of their class, are found in Africa, especially in Egypt, and also in the region round the Dead Sea, and in the southern wilderness. The former (*Monitor Niloticus*) is rare in Southern Palestine, and is distinguished from the other by a high keel running along the whole length of its tail. It is in the habit of searching for and devouring crocodiles' eggs, on which account it was reverenced by the ancient Egyptians, and is often found sculptured on their gems (Forsk. *Descr. Anim.* p. 13; Hasselquist, *Travels*, p. 221).

The land Monitor, *Psammosaurus scincus*, "the land-crocodile" of the R. V., attains nearly the same size, four or five feet in length, has a long muzzle and sharp-pointed teeth, and is common in all the sandy districts of Southern Palestine and the Sinaitic desert. It also devours crocodiles' eggs. Both species are carnivorous, feeding on small lizards and jerboas, and are eaten by the Arabs. [H. B. T.]

CHAMOIS (זֶמֶר, *zemer*; καμηλοπάρδαλις; *camelopardalus*). In the list of animals allowed for food (Deut. xiv. 5) mention is made of the *zemer*. The etymology points to some leaping animal, and is identical with the Arabic زمر, *zamar*, "to spring." The creature intended cannot be the chamois of A. V. and R. V., as this is a central European antelope, unknown in any Bible lands. The LXX., Vulgate, and some other Versions are still further astray in rendering it "camelopard" or "giraffe," an inhabitant of the plains of Central Africa, and which could only be known to the Jews by specimens possibly brought into Egypt from Ethiopia, but which never could have been named as an article of food in the Levitical code, which only comprises the animals attainable in Palestine or the wilderness of the wanderings. Bochart (*Hieroz.* ii. 273) reasonably argues in favour of some ibex or wild goat [see Knobel-Dillmann on Lev. xi. 3], after showing the impossibility of the interpretation of the LXX. It is not likely to be the Ibex or wild goat of Sinai, which was and still is common in those countries, and is satisfactorily identified with the Hebrew יָעֵל, *yā'ēl*.

Col. H. Smith (in Kitto's *Cyc.*, art. *Zemer*) suggests that some mountain sheep is intended, and figures the *Kebsch* (*Ovis tragelaphus*), a wild sheep not uncommon, he says, in the Mokattam rocks near Cairo, and found also, though now very rarely, in Sinai; it is not improbable that this

Aoudad Sheep.

is the animal denoted, for the names of the other ruminants mentioned in the catalogue of beasts allowed for food are, for the most part, identifiable with other wild animals of the Bible lands, and there can be no doubt that the *Kebsch* or

Aoudad was known to the Israelites; again, Col. Smith's suggestion has partly the sanction of the Syriac Version, which reads as the equivalent of the Hebrew word, "a mountain goat."

Many species of the wild mountain sheep are known, and are all looked upon by the Arabs as goats, which in form and habits they much resemble. The North African *Aoudad* (*Ovis tragelaphus*) inhabits the Atlas, and all the higher and more inaccessible North African ranges, and is not unfrequently figured on the monuments of Egypt. An allied species, the Mouflon (*Ovis musimon*), still exists in Corsica, Sardinia, and Cyprus, and the same or a closely allied form was formerly common in Spain, the Greek mountains, and across Circassia to Northern Persia, where it is said still to occur. The Arabians speak of the *Kebsch*, which is very probably identical with the *Aoudad*, as inhabiting the mountainous parts of Arabia; but though undoubtedly still existing, and formerly probably extending to the Lebanon, no naturalist has yet secured a specimen for comparison. The true wild goat (*Capra aegagrus*) is still found in the Taurid range, and I have procured it near Aintab, on the northern frontier of Syria, where it is looked on as a *Kebsch*. It is very possible that both these species are included under *zemer*. [H. B. T.]

CHAMPIAN, CHAMPION, old forms for *champaign* in A. V. 1611 ed. Deut. xi. 30 (R. V. "Arabah"); Ezek. xxxvii. 2, marg. Cp. *B. D.* Amer. ed. [F.]

CHA'NAAN (Χαναάν), the manner in which the word CANAAN is spelt in the A. V. of the Apocrypha and N. T. (cp. Charran for Haran, &c.). Judith v. 3, 9, 10; Bar. iii. 22; Sus. 56; 1 Macc. ix. 37; Acts vii. 11, xiii. 19 (R. V. "Canaan").

CHANAANITE for CANAANITE, Judith v. 16. [W. A. W.]

CHANEL-BONE, Job xxxi. 22, marg. A. V. An old term for the collar-bone. See Eastwood and Wright's *Bible Word-Book*, s. n. Cp. *D. B.* Amer. ed. [F]

CHANNUNE'US (Χανουναῖος; *Chananaeus*), 1 Esd. viii. 48 [LXX. v. 47]. This answers to Merari, if to anything, in the parallel list of Ezra (viii. 19). [W. A. W.]

CHA'NOCH, Gen. iv. 17. A form of Enoch, more nearly approaching to the Hebrew. Cp. *D. B.* Amer. ed. [F.]

CHAPEL, the A. V. rendering of מִקְדָּשׁ in Amos vii 13 (R. V. "sanctuary;" ἁγίασμα; *sanctificatio*). The term is applied not to any definite temple or shrine, but to Bethel itself, which Jeroboam II. had filled with idolatry. In the *D. B.* Amer. ed., it is suggested that the rendering, which is as old as the Bishops' Bible, arose from an idea that the king had a private place of worship in Bethel. In 1 Macc. i. 47, 2 Macc. x. 2, xi. 3, "chapel" is applied to places of idol and heathen worship. [F.]

CHAPITER. 1. כֹּתֶרֶת, in pl. כֹּתָרוֹת, from כָּתַר, *to surround*; ἐπιθέμα; *capitellum*. 2. צָפָה, from צָפָה, *to draw out* (Ges. *Thes.*); αἱ κεφαλαί; *capita*. The upper member of a pillar—the same word which is now in use in the slightly different form of "capital"; also possibly a roll moulding at the top of a building or work of art, as in the case (1) of the pillars of the Tabernacle and Temple, and of the two pillars called especially Jachin and Boaz; and (2) of the lavers belonging to the Temple (Ex. xxxviii. 17; 1 K. vii. 27, 31, 38). As to the form and dimensions of the former, see TABERNACLE, TEMPLE, BOAZ; and of the latter, LAVER. (3) The word רֹאשׁ, *rôsh* = head, is also occasionally rendered "chapiter," as in the description of the Tabernacle, Ex. xxxvi. 38, xxxviii. 17, 19, 28; but in the account of the Temple it is rendered by A. V. and R. V. "top," 1 K. vii. 16, &c. [H. W. P.]

CHARAATH'ALAR (B. Χαρααθαλάν, A. Χαρα 'Αθαλαρ; *Carmellam*), 1 Esd. v. 36. The place-names "Cherub, Addan, and Immer," in the lists of Ezra and Nehemiah, are here perverted into "Charaathalar leading them, and Aalar" (see *Speaker's Comm.* l. c.). [W. A. W.]

CHAR'ACA (εἰς τὸν Χάρακα [? Χάραξ]; *in Characa*), a place mentioned only in 2 Macc. xii. 17, and there so obscurely that nothing can be certainly inferred as to its position. It was on the east of Jordan, being inhabited by the Jews called "Tubieni," or of "Tobie" [TOB], who were in Gilead (cp. 1 Macc. v. 9, 13); it was apparently in the same part of the country as Carnion (ASHTEROTH-KARNAIM), 2 Macc. xii. 18, 21, 26; and it was 750 furlongs (*i.e.* over 92 miles) from the city Caspis; but where the last place was situated, or in which direction Charax was with regard to it, there is no clue. Ewald (*Gesch.* iv. 359 n) places it to the extreme east, and identifies it with RAPHON; but it was more probably in the district immediately south of the *Nahr Yarmûk*. The only name now known on the east of Jordan which recalls Charax is *Kerak*, the ancient Kir-Moab, on the south-east of the Dead Sea, which in post-biblical times was called Χαράκωβα and Μωβουχάραξ (see the quotations in Reland, p. 705); this, however, is too far to the south. The Syriac Peshitto has כרכא, *Carca*, which suggests KARKOR (Judg. viii. 10). See *Speaker's Comm.* on 2 Macc. *l. c.* [G.] [W.]

CHARA'SHIM, THE VALLEY OF (גֵּיא חֲרָשִׁים, "ravine of craftsmen;" B. 'Αγεαδδαείρ, A. γῆς Ρασείμ, ὅτι τέκτονες ἦσαν; *vallis artificum*; R. V., in 1 Ch. iv. 14, Ge-harashim [marg.: *the valley of craftsmen*]; in Neh. xi. 35, אֹנוֹ A. om., א$^{c.a\ mg\ inf}$ Γηαρασίμ; A. V. and R. V. "the valley of craftsmen" [marg. *Ge-ha-harashim*]), a place mentioned twice,—1 Ch. iv. 14, as having been founded or settled by Joab, a man of the tribe of Judah and family of Othniel; and Neh. xi. 35, as being reinhabited by Benjamites after the Captivity. Its mention by Nehemiah with Neballat, Lod (Lydda), Ono (*Kefr 'Ana*), &c., fixes its position as in the swelling ground at the back of the plain of Sharon, east of Jaffa. A trace of the name may perhaps be retained in *Kh. Hirsha*, a ruin east of *Yâlo* (*PEF. Mem.* iii. 36). The Talmud (as quoted by Schwarz, p. 135) reports the valley of Charashim to consist of Lod and Ono,

which lay therein. Whether Joab the son of Seraiah is the same person as the son of Zeruiah will be best examined under the name JOAB. [G.] [W.]

CHAR'CHAMIS (B. Χαρκαμύς, A. Καλχαμύς; *Charcamis*), 1 Esd. i. 25 (LXX. v. 23). The ed. of 1611 (with most editions) reads Carchamis. [CARCHEMISH.] [F.]

CHAR'CHEMISH (כַּרְכְּמִישׁ; LXX. omits; *Charcamis*), 2 Ch. xxxv. 20. [CARCHEMISH.]

CHAR'CUS (B. Βαχούς, A. Βαρχουέ; *Barcus*), 1 Esd. v. 32. Corrupted from BARKOS, the corresponding name in the parallel lists of Ezra (ii. 53) and Nehemiah (vii. 55)—possibly by a change of ב into כ. In *D. B.* Amer. ed. it is suggested that the translators of the A. V. got their reading of the name from the Aldine ed. (Χαρκούς). In the edition of 1611 the name is spelt "Chareus." [F.]

CHAREA (A. Χαρέα, B. om.; *Caree*), 1 Esd. v. 32. [HARSHA.]

CHARGER (1. קְעָרָה, from a root signifying hollowness; τρυβλίον, κοτύλη; *ucetabulum*; rendered "dish" by A. V. and R. V. in Ex. xxv 29, xxxvii. 16, and Num. iv. 7. 2. אֲגַרְטָל; ψυκτήρ; *phiala*; only found in Ezra i. 9), a shallow vessel for receiving water or blood, also for presenting offerings of fine flour with oil (Num. viii. 79; cp. Ges. *Thes.* p. 22). The English word "charger," or that on which anything is laid, comes from the French *charger* (still used of guns) and the old English charge, *i.e.* to load. Cp. Eastwood and Wright, *Bible Word-Book*, s. n. The "chargers" mentioned in Numbers are said to have been of silver, and to have weighed each 130 shekels, or 65 oz. (Hussey, *Anc. Weights*, c. ix. p. 190).

The daughter of Herodias brought the head of St. John the Baptist in a charger, ἐπὶ πίνακι (Matt. xiv. 8); probably a trencher or platter, as Hom. *Od.* i 141:

> δαιτρὸς δὲ κρειῶν πίνακας παρέθηκεν ἀείρας παντοίων.

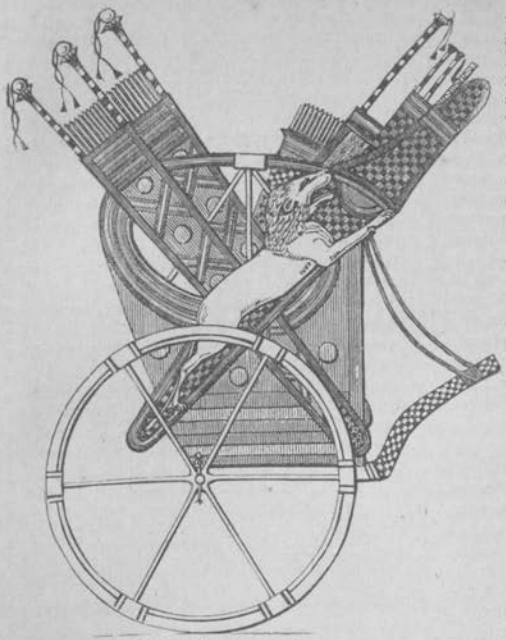
Cp. πίναξ, Luke xi. 39, A. V. and R. V. "platter;" and Luke i. 63, πινακίδιον, R. V. "a writing-tablet." [BASIN.] [H. W. P.]

CHARGES, Acts xxi. 24. "Be at charges with [R. V. "for"] them," *i.e.* Bear the expense of their offerings. The word comes, like CHARGER, from the French *charger*, to load; hence something laid upon a man, cost or expense. [F.]

CHARIOT. 1. רֶכֶב, from רָכַב, *to ride*; ἅρμα; *currus*: sometimes including the horses (2 Sam. viii. 4; x. 18). 2. רֶכֶב, a chariot or horse (Ps. civ. 3). 3. מֶרְכָּב, m. from same root as (1), a chariot, litter, or seat (Lev. xv. 9, Cant. iii. 10). 4. מֶרְכָּבָה, f. 5. עֲגָלָה, from עָגַל, *roll* (Ps. xlvi. 10, θυρεός; *scutum*). 6. אַפִּרְיוֹן. Cant. iii. 9; φορεῖον; *ferculum*. (Between 1–4 there is similarity in signification.) A vehicle used either for warlike or peaceful purposes, but most commonly the former. Of the latter use the following only are probable instances, (1) as regards the Israelites, 1 K. xviii. 44, (2) as regards other nations, Gen. xli. 43, xlvi. 29; 2 K. v. 9; Acts viii. 28.

The earliest mention of chariots in Scripture is in Egypt, where Joseph, as a mark of distinction, was placed in Pharaoh's second chariot (Gen. xli. 43), and later when he went in his own chariot to meet his father on his entrance into Egypt from Canaan (xlvi. 29). In the funeral procession of Jacob chariots also formed a part, possibly by way of escort or as a guard of honour (l. 9). The next mention of Egyptian chariots is for a warlike purpose (Ex. xiv. 7). In this point of view chariots among some nations of antiquity, as elephants among others, may be regarded as filling the place of heavy artillery in modern times, so that the military power of a nation might be estimated by the number of its chariots. Thus Pharaoh in pursuing Israel took with him 600 chariots. The Canaanites of the valleys of Palestine were enabled to resist the Israelites successfully in consequence of the number of their chariots of iron, *i.e.* perhaps armed with iron scythes (Ges. *s. v.*; Josh. xvii. 18; Judg. i. 19). Jabin, king of Canaan, had 900 chariots (Judg. iv. 3). The Philistines in Saul's time had 30,000, a number which, like the 32,000 mentioned below, can hardly be correct, and is probably due to a corrupt reading of the text (1 Sam. xiii. 5, שְׁלֹשִׁם for שְׁלֹשִׁים, so LXX. [Luc.] and Pesh., cp. Driver, *Notes on the Heb. text of the BB. of Sam.*, in loco. The LXX. [B.] and Joseph. [*Ant.* vi. 6, § 1] agree with the Heb.; Josephus adds 300,000 infantry). David took from Hadadezer king of Zobah 1000 chariots (2 Sam. viii. 4), and from the Syrians a little later 700 (x. 18), who in order to recover their ground collected 32,000 chariots (1 Ch. xix. 7). The Hittites are said in an Egyptian poem to have brought into the field 3,500 chariots in a contest with Rameses II. B.C. 1361 (Conder, *Heth and Moab*, c. i. p. 20). Up to the time of David the Israelites possessed few if any chariots, partly no doubt in consequence of the theocratic prohibition against multiplying horses, for fear of intercourse with Egypt, and the regal despotism implied in the possession of them (Deut. xvii. 16; 1 Sam. viii. 11, 12). But to some extent David (2 Sam. viii. 4), and in a much greater degree Solomon, broke through the prohibition from seeing the necessity of placing his kingdom, under its altered circumstances, on a footing of military equality or superiority towards other nations. He raised, therefore, and maintained a force of 1400 chariots (1 K. x. 25) by taxation on certain cities, agreeably to Eastern custom in such matters (1 K. ix. 19, x. 25; Xen. *Anab.* i. 4, 9). The chariots themselves and also the horses were imported chiefly from Egypt, and the cost of each chariot was 600 shekels of silver, and of each horse 150 (1 K. x. 29). [SHEKEL.] From this time chariots were regarded as among the most important arms of war, though the supplies of them and of horses appear to have been still mainly drawn from Egypt (1 K. xxii. 34; 2 K. ix. 16, 21, xiii. 7, 14, xviii. 24, xxiii. 30; Is. xxxi. 1). The prophets also allude frequently to chariots as typical of power (Ps. xx. 7, civ. 3; Jer. li. 21; Zech. vi. 1).

Chariots also of other nations are mentioned, as of Assyria (2 K. xix. 23; Ezek. xxiii. 24), Syria (2 Sam. viii. 4, and 2 K. vi. 14, 15), and Persia (Is. xxiii. 6, 7). Antiochus Eupator is said to have had 300 chariots armed with scythes (2 Macc. xiii. 2).



An Egyptian war-chariot, with bow-cases and complete furniture. (Wilkinson.)

In the N. T., the only mention made of a chariot except in Rev. ix. 9 is in the case of the Ethiopian or Abyssinian eunuch of Queen Candace, who is described as sitting in his chariot reading (Acts viii. 28, 29, 38).

Jewish chariots were no doubt imitated from Egyptian models, if not actually imported from Egypt. The following description of Egyptian chariots is taken from Sir G. Wilkinson. They appear to have come into use not earlier than the 18th dynasty (B.C. 1530). The war chariot, from which the chariot used in peace did not essentially differ, was extremely simple in its construction. It consisted, as appears both from Egyptian paintings and reliefs, as well as from an actual specimen preserved at Florence, of a nearly semicircular wooden frame with straightened sides, having the hinder part resting on the axle-tree of a pair of wheels, and supporting a rail of wood or ivory attached to the frame by leathern thongs and one wooden upright in front. The floor of the car was made of rope network, intending to give a more springy footing to the occupants. The car was mounted from the back, which was open, and the sides were strengthened and ornamented with leather and metal binding. Attached to the off or right-hand side, and crossing each other diagonally, were the bow-case and, inclining backwards, the quiver and spear-case. If two persons were in the chariot, a second bow-case was added. The wheels, of which there were two, had six spokes: those of peace chariots had sometimes four, fastened to the axle by a linch-pin secured by a thong. There were no traces: but the horses, which were often of different colours, wore only a breast-band and girths which were attached to the saddle, together with head

Egyptian princes in their chariot. (Wilkinson.)

furniture consisting of cheek pieces, throat-lash, head-stall, and straps across the forehead and nose. A bearing-rein was fastened to a ring or hook in front of the saddle, and the driving-reins passed through other rings on each side of both horses. From the central point of the saddle rose a short stem of metal, ending in a knob, whether for use or mere ornament is not certain. The driver stood on the off-side, and in discharging his arrow hung his whip from the wrist. In some instances the king is represented alone in his chariot with the reins fastened round his body, thus using his weapons with his hands at liberty. Most commonly two

persons, and sometimes three, rode in the chariot, of whom the third was employed to carry the state umbrella (1 K. xxii. 34; 2 K. ix. 20, 24; Acts viii. 38). A second chariot usually accompanied the king to battle, to be used in case of necessity (2 Ch. xxxv. 24; 1 Esd. i. 31).

On peaceable occasions the Egyptian gentleman sometimes drove alone in his chariot, attended by servants on foot. The horses wore housings to protect them from heat and insects. For royal personages and women of rank an umbrella was carried by a bearer, or fixed upright in the chariot. Sometimes mules were driven instead of horses, and in travelling sometimes oxen, but for travelling purposes the sides of the chariot appear to have been closed. One instance occurs of a four-wheeled car, which, like the τετράκυκλος ἅμαξα (Herod. ii. 63), was used for religious purposes. [CART.] The processes of manufacture of chariots and harness are fully illustrated by existing sculptures, in which also are represented the chariots used by neighbouring nations (Wilkinson, *Anc. Egypt.* i. 368, 386; ii. 75, 76 [1878]). Recent examination of Egyptian papyrus records has brought to light an account of a journey performed in the 14th century B.C. by an Egyptian mohar, either a tax-gatherer or court-messenger, in a chariot attended by his servant. The journey appears to have begun from a place near Aleppo, and the travellers in its course passed near the Sea of Galilee, and finally returned to Egypt by way of Joppa. They travelled chiefly over the more level parts of the country, but an accident is described as happening to the chariot in descending a ravine (*Survey of West. Pal.* vol. iv. pp. 163, 165; Conder, *Heth and Moab*, p. 100).

The earlier Assyrian war-chariot and harness did not differ essentially from the Egyptian.

Assyrian chariot. (Layard.)

Two or three persons stood in the car, but the driver is sometimes represented as standing on the near side, whilst a third warrior in the chariot held a shield to protect the archer in discharging his arrow. The car appears to have had closed sides. The war-chariot wheels had six spokes; the state or peace chariot eight or more, and a third person in state-processions carried the royal umbrella. A third horse, like the Greek παρήορος, was generally attached (Layard, *Nineveh*, ii. 350).

In later times the third horse was laid aside, the wheels were made higher, and had eight spokes: and the front of the car, to which the quiver was removed from its former side position, was made square instead of round. The cars were more highly ornamented, panelled, inlaid with valuable woods and metals, and painted. The embroidered housings in which in earlier times the horses were clothed were laid aside, and plumes and tassels used to decorate their necks and foreheads (Layard, *Nineveh*, ii. 353, 356; *Nineveh and Babylon*, pp. 341, 587, 603, 618; *Mon. of Nin.* 2nd series, pl. 24; Ezek. xxvii. 20).

The Persian chariot, as appears from the sculptures at Persepolis, and also at Kouyunjik, shows great similarity to the Assyrian; but the procession represented at the former place contains a chariot or car with wheels of twelve spokes, while from the sculptures at the latter it appears that the Elamites, or Persians, besides chariots containing two persons which were sometimes drawn by four horses, used a kind of cart drawn by a single mule or more, consisting of a stage on high wheels capable of holding five or six persons, of whom the driver sat on a low stool, with his legs hanging on each side of the pole. Xenophon mentions one, perhaps only a state-chariot, with four poles and eight horses. Chariots drawn by asses, *i.e.* perhaps mules, and also by camels, are mentioned by Isaiah (Is. xxi. 7, xxii. 6; Ezek. xxiii. 24; Xen. *Cyrop.* iv. 3, 1 and 2, § 22, vi. 4, 2; Niebuhr, *Voyage*, ii. 105; Chardin, *Voyage*, viii. 257, pl. lix.; Layard, *Nin. & Bab.* pp. 447–449; Olearius, *Travels*, p. 302).

Assyrian chariot. (Layard.)

Chariots armed with scythes (ἅρματα δρεπανηφορα, Xen. *Anab.* i. 7, § 10) may perhaps be intended by the "chariots of iron" of the Canaanites; they are mentioned as used by Ninus, B.C. *c.* 2000 (Diod. Sic. ii. 5, quoting from Ctesias. *Ctes. fr.* p. 395), as part of the equipment of Antiochus (2 Macc. xiii. 2) and of Darius (Diod. Sic. xvii. 53; Appian, *Syr.* 32).

Among the parts of wheeled-carriages mentioned in the A. V. are: 1. the Wheels, אוֹפַנַּיִם, ἄξονες, *rotae;* also גַּלְגַּלִּים; τροχοί, *rotae.* 2. Spokes, חִשֻּׁרִים, *radii.* 3. Naves, גַּבִּים; *modioli.* 4. Felloes, חִשֻּׁקִים; νῶτοι; *apsides.* 5. Axles, יְדוֹת; ἀξεῖρες; *axes.* To put the horses to the carriage, אָסַר; ζεῦξαι; *jungere;* and once (Mic. i. 13), רָתַם.

The Persian custom of sacrificing horses to the Sun (Xen. *Cyrop.* viii. 3, 12) seems to have led to offerings of chariots and horses to the same object of worship by the Jewish monarchs who fell into idolatry (2 K. xxiii. 11; Ezek. viii. 17; P. della Valle, xv. § ii. p. 255; Winer, *Wagen*). [H. W. P.]

CHARMER, Deut. xviii. 11; Ps. lviii. 5; Is. xix. 3. [DIVINATION; ENCHANTMENTS; SERPENT-CHARMING.]

CHAR'MIS (B. Χαρμίς, A. Χαλμεῖς; *Charmi*), son of Melchiel, one of the three "ancients" (πρεσβύτεροι) or "rulers" (ἄρχοντες) of Bethulia (Judith vi. 15, viii. 10, x. 6). [W. A. W.]

CHAR'RAN (Χαρράν; *Charan*), Acts vii. 2, 4. [HARAN.]

CHASE. [HUNTING.]

CHAS'EBA (Χασεβά; *Caseba*), one of the "servants of the Temple" (1 Esd. v. 31). There is no name corresponding to it in the lists of Ezra and Nehemiah (cp. *Speaker's Comm.* in loco). [W. A. W.]

CHA'VAH, Gen. iii. 20 marg.; a form of Eve more nearly approaching the original Hebrew. Cp. *D. B.* Amer. ed. [F.]

CHAWS, A. V. ed. 1611, Ezek. xxix. 4, xxxviii. 4; considered in *D. B.* Amer. ed. an old form of "jaws" (R. V.). [F.]

CHE'BAR (כְּבָר; Χοβάρ; *Chobar*), a river in the "land of the Chaldeans" (Ezek. i. 3), on the banks of which the exiles, who had been carried away by Nebuchadnezzar with Jehoiachin, lived; and where Ezekiel saw his earlier visions (Ezek. i. 1, 3, iii. 15, 23, x. 15, 22, xliii. 3). One of the towns where the Jews dwelt, and which was situated on the banks of this river, was called Tel-abib (equivalent to *Til-abubi*, "the mound of the storm" or "of the flood," according to Fried. Delitzsch). It is commonly regarded as the same as the Habor (Heb. חָבוֹר, Assyr. *Ḫabur*), the river of Gozan, to which a portion of the Israelites was removed by the Assyrians (2 K. xvii. 6). This, however, is incorrect, the two names being in reality very dissimilar; and, in addition to this, it is now generally acknowledged that the Habor of the Bible is the modern Khabour, the Greek Ἀβόρρας (O. T. Ἀβὼρ and Χαβώρ), a river which joins the Euphrates near the site of the ancient Circesium, quite beyond the boundary of Chaldea, taken in the usual sense of the O. T. The Chebar of Ezekiel was certainly within Babylonia, and some of those who have located it there have argued that it is the *Nahr Malcha*, or Royal Canal of Nebuchadnezzar, the *greatest* of all the cuttings of Mesopotamia (cp. כָּבֵד, *kaber*, "great"). This canal, however, is apparently the *Nâr-šarri* of the monuments, and this makes its identification with the Chebar a little doubtful.* Notwithstanding the numerous lists of old Babylonian rivers and canals which exist in Assyrian and Babylonian literature, the name of the Chebar has not yet been found in the native records. The etymology which connects the word Chebar with the common Semitic root כבר, "to be great," is most likely correct, though it is probably more to the width or to the depth of the river, or canal, than to its length that the name refers. The Greek form Χοβὰρ seems to point to some such form as *Kubaru* in Babylonian. Compare the word *kuburru*, which seems to be a synonym of *sêru*, "supreme." [T. G. P.]

CHE'BEL (חֶבֶל), one of the singular topographical terms in which the ancient Hebrew language abounded, and which give so much force and precision to its records. The ordinary meaning of the word *Chebel* is a "rope" or "cord;" and in this sense it frequently occurs both literally (as in R. V. of Josh. ii. 15, "cord;" 1 K. xx. 31, "ropes;" Is. xxxiii. 23, "tacklings;" Amos vii. 17, "line") and metaphorically (see Eccles. xii. 6; Is. v. 18; Hos. xi. 4). From this it has passed—with a curious correspondence to our own modes of speech—to denote a body of men, a "band" (as in Ps. cxix. 61). In 1 Sam. x. 5, 10, our word "string" would not be inappropriate to the circumstances—"a string of prophets coming down from the high place." Further, it is found in other metaphorical senses, arising out of its original meaning (see Job xviii. 10; Ps. xviii. 4; Jer. xiii. 21). From the idea of a measuring-line (Mic. ii. 5), it has come to mean a "portion" or "allotment" (see 1 Ch. xvi. 18; Ps. cv. 11; Ezek. xlvii. 13). It is the word used in the familiar passage "the *lines** are fallen unto me in pleasant places" (Ps. xvi. 6). But in its topographical sense, as meaning a "tract" or "district," we find it always attached to the region of Argob, which is invariably designated by this, and by no other term (Deut. iii. 4, 13, 14; 1 K. iv. 13). It has been already shown how exactly applicable it is to the circumstances of the case. [ARGOB.] But in addition to the observations there made, the reader should be referred to the report of Mr. C. C. Graham, who in *Cambridge Essays*, 1858, abundantly confirms the statements of his predecessors as to the abrupt definiteness of the boundary of the district. No clue is afforded as to the reason of this definite localization of the term Chebel; but a comparison of the fact that Argob was taken possession of by Manasseh —a part of the great tribe of Joseph—with the use of this word by that tribe, and by Joshua in his retort, in the very early and characteristic fragment, Josh. xvii. 5, 14 (A. V. "portion"), prompts the suggestion that it may have been a provincialism in use amongst that large and independent part of Israel. Should this be thought untenable, its application to the "rocky shore" of Argob may be illustrated and justified by its use (Zeph. ii. 5–7; A. V. "coast") for the "coast line" of the Mediterranean along Philistia. In connexion with the sea-shore it is also employed in Josh. xix. 29. [ARGOB.]

The words used for *Chebel* in the older Versions are σχοίνισμα, περίμετρον, περίχωρον; *regio*, *funiculus*.

Ewald (*Gesch.* vi. 204, note) seems to derive "Oblias," the title by which St. James was distinguished (Euseb. *E. S.* ii. 23), from חבל and עם = חֹבְלָעֵם. [G.] [W.]

* *It is nevertheless not impossible that this river or canal may have been known by two names.*

* The use of the word in this sense in our own idiomatic expression—"hard lines"—will not be forgotten. Other correspondences between *Chebel* as applied to measurement, and our own words "rod" and "chain," and also "cord," as applied in the provinces and colonies to solid measures of wood, &c., are obvious.

CHEDORLA'OMER (כְּדָרְלָעֹמֶר; Χοδολλογομόρ; *Chodorlahomor*), a king of Elam, in the time of Abraham, who, with three other subordinate princes of Babylonia and the neighbouring region, carried on two campaigns in Palestine, where the kings of Sodom, Gomorrah, and other cities were reduced to servitude. For twelve years he retained his hold over them; in the thirteenth they rebelled; in the next year, however, he and his allies marched upon their country, and, after defeating many neighbouring tribes, encountered the five kings of the plain in the vale of Siddim. He completely routed them; slew the kings of Sodom and Gomorrah, and carried away much spoil, together with the family of Lot. A rescue, however, was effected by Abraham upon hearing of the captivity of his nephew (Gen. xiv. 17). Recent Assyriological discoveries have shown that there is nothing improbable in a Babylonian conquest of Palestine in the time of Abraham, as critics once urged. At a much earlier period Sargon I. of Accad, who reigned B.C. 3800, not only erected a monument on the Syrian coast, but crossed over into Cyprus, where a seal-cylinder bearing the name of his son and successor, Naram-Sin, has been found (*TSBA.* v. 2). The name of Kudur-Laomer is formed in accordance with other Elamite names. Lagamar, also written Lagamal,—on Susian bricks, Lagameri,—was an Elamite deity, afterwards adopted by the Babylonians, and Kudur, "servant," appears as the first element of many Elamite names. We learn from Assur-bani-pal that the Elamite king Kudur-nankhundi had carried away from Erech to Susa an image of the goddess Nana 1635 years before his own recovery of it; that is to say, B.C. 2280. Recently discovered dynastic tables make Khammu-ragas king of Babylon at this date (B.C. 2290–2235). Now Khammu-ragas first made Babylon the capital of the whole country by conquering Southern Babylonia or Sumir (Shinar), governed at that time by Rim-Agu, also known as Erim-Agu or Eriv-Aku, "minister of the Moon-god." Rim-Agu had originally fixed the seat of his power at Larsa (now Senkereh); from this centre he had extended his sway over all northern and southern Babylonia, with the exception of Babylon itself and the district immediately surrounding it. It was the overthrow of Rim-Agu which secured to Khammu-ragas the sovereignty of Chaldaea. Rim-Agu or Eriv-Aku calls himself the son of Kudur-Mabug, "the lord of Yavutbal," or Elam, and "the father of Palestine," from which we may infer that the rule of Rim-Agu in Babylonia was due to the conquest of the country by his father, and also that Kudur-Mabug claimed dominion over Palestine. Bricks of Rim-Agu prove that he reigned at Larsa during his father's lifetime, and that Kudur-Mabug thus exercised the same suzerainty over Babylonia that Chedor-Laomer is represented as exercising in Genesis. Indeed it is difficult not to compare Eriv-Aku, king of Larsa, with the biblical Arioch, king of Ellasar. The names of Chedor-Laomer (Kudur-Lagamar) and Kudur-Mabug, however, are not the same, but it is possible that Chedorlaomer may have been the successor of Kudur-Mabug and the predecessor of Kudur-Nankhundi, the latter being the king of Elam who, according to an inscription of Khammu-ragas, assisted Rim-Agu in his final struggle against the king of Babylon. Dr. Hommel identifies Amraphel, king of Shinar or Sumir, with Sin-muballidh, the predecessor of Khammu-ragas, but this does not seem probable. We must see in Amraphel the king of Southern Babylonia whose overthrow brought with it the submission of that part of the country to Rim-Agu. [A. H. S.]

CHEESE is mentioned only three times in the Bible, and on each occasion under a different name in the Hebrew: (1.) גְּבִינָה, from גָּבַן, *to curdle* (Job x. 10), referred to, not historically, but by way of illustration: (2.) חֶמְאָה, from חָמַץ, *to cut* (*τρυφαλίδες τοῦ γάλακτος*, LXX.; *formellae casei*, Vulg., 1 Sam. xvii. 18); the Chaldee and Syriac give גּוּבְנָן; Hesychius explains *τρυφαλίδες* as *τμήματα τοῦ ἁπαλοῦ τυροῦ*: (3.) שְׁפוֹת בָּקָר, from שָׁפָה, *to scrape* (*Σαφὼθ βοῶν*, LXX.; *cheese of kine*, A.V. and R.V. 2 Sam. xvii. 29: the Vulgate, following Theodotion's rendering, *γαλαθηνὰ μοσχάρια*, gives *pinques vitulos*, guided by the position of the words after "sheep": the Targum and other Jewish authorities, however, identify the substance with those mentioned above). It is difficult to decide how far these terms correspond with our notion of *cheese*; for they simply express various degrees of coagulation. It may be observed that cheese is not at the present day common among the Bedouin Arabs, butter being decidedly preferred; but there is a substance, closely corresponding to those mentioned in 1 Sam. xvii., 2 Sam. xvii., consisting of coagulated butter-milk, which is dried until it becomes quite hard, and is then ground: the Arabs eat it mixed with butter (Burckhardt, *Notes on the Bedouins*, i. 60). In reference to this subject, it is noticeable that the ancients seem generally to have used either butter or cheese, but not both: thus the Greeks had in reality but one expression for the two, for *βούτυρον* = *βοῦς*, *τυρός*, "cheese of kine:" the Romans used cheese exclusively, while all nomad tribes preferred butter. On the distinction between cheese proper and coagulated milk, see Pliny, xi. 96. [W. L. B.]

CHELA'L (כֶּלָל, Ges. = *perfection*; LXX. 2 Esd. B. Χάηλ, A. Χαλήλ, N. Εδενεχ· Ηλ [coupling it with the preceding name]; *Chalal*), Ezra x. 30; one of those who had taken a "strange" wife. [W. A. W.] [F.]

CHELCI'AS (Χελκίας, *i.e.* חִלְקִיָּה, *the portion of the Lord*, HILKIAH; *Helcias*). **1.** The father of Susanna (*Hist. of Susanna*, *vv.* 2, 29, 63). Tradition (Hippol. *in Susann.* i. 689, ed. Migne) represents him as the brother of Jeremiah, and identical with the priest who found the copy of the Law in the time of Josiah (2 K. xxii. 8). [B. F. W.]

2. The ancestor of Baruch (Bar. i. 1).

3. The high-priest in the time of Isaiah (Bar. i. 7). [W. A. W.]

CHEL'LIANS, THE (Judith ii. 23). [CHELLUS.]

CHEL'LUH (כִּלְּוּהִי, Keri, כִּלְוֹהִי; Αν. Χελκειά; A. Χελία; *Chelium*), Ezra x. 35. One of the sons of Bani who had foreign wives.

CHEL'LUS (BA. Χελούς, ℵ. Χεσλούς; Vulg. omits), named amongst the places beyond (*i.e.* on the west of) Jordan to which Nabuchodonosor sent his summons (Judith i. 9). Except its mention with "Kades," there is no clue to its situation. Reland (*Pal.* p. 717) conjectures that it may be *Chalutza*, חֲלוּצָה, a place which, under the altered form of *Ehusa*, was well known to the Roman and Greek geographers (see *Speaker's Comm.* in loco). With this agrees the subsequent mention of the "land of the Chellians" (B. τῆς Χαλδαίων, ℵA. Χελεών; *terra Cellon*), "by the wilderness," to the south of whom were the children of Ishmael (Judith ii. 23). Volkmar (*Lüil. i. d. Apok.* i. 191) adopts the reading Χαλδαίων (B. and Syriac). [G.] [W.]

CHE'LOD (B. Χελεούλ, A. Χελεούδ, ℵ*. Χεσλαιουδά, ℵc.a Χελαιούδ; Old Lat. *Chelleuth*, Vulg. om.; Syr. *Chaldeans*). "Many nations of the sons of Chelod" were among those who obeyed the summons of Nebuchodonosor to his war with Arphaxad (Judith i. 6). The word is apparently corrupt. Simonis suggests Χάλων, perhaps Ctesiphon. Ewald conjectures it to be a nickname for the Syrians, "sons of the moles" חֹלֶד (*Gesch.* iv. 543). See other suggestions in *Speaker's Comm.* i. l. [G.] [F.]

CHELU'B (כְּלוּב, *bird-cage*). **1.** A man among the descendants of Judah, described as the brother of Shuah and the father of Mechir (1 Ch. iv. 11). In the LXX. the name is given as Caleb, Χαλέβ, the father of Ascha; the daughter of the well-known Caleb was Achsah; Vulg. *Caleb*.

2. A. Χελούβ, B. Χοβούδ; *Chelub*. Ezri the son of Chelub was "over them who did the work of the field for tillage of the ground," one of David's officers (1 Ch. xxvii. 26). [W. A. W.]

CHELU'BAI (כְּלוּבָי; A. ὁ Χαλέβ, B. ὁ Χαβέλ; *Calubi*), the son of Hezron, of one of the chief families of Judah. The name occurs in 1 Ch. ii. 9 only; and from a comparison of this passage with ii. 18 and 42, it would appear to be but another form of the name Caleb. It is worth noting that, while in this passage Jerahmeel is stated to be a brother of Chelubai, it appears from 1 Sam. xxvii. 10 that the Jerahmeelites were placed on the "south of Judah," where also were the possessions of the house of Caleb (Judg. i. 15; 1 Sam. xxv. 3, xxx. 14). In the Syriac Vers. the name is ܣܠܟܝ, *Salci*; probably a transcriber's error for ܟܠܒܝ, *Celubi* (Burrington, i. 209). [G.] [W.]

CHEMA'RIMS, THE (הַכְּמָרִים; *aruspices, aeditui*). This word only occurs in the text of the A. V. [R. V. "Chemarim"] in Zeph. i. 4 (T.[7] omits). In 2 K. xxiii. 5 (BA. οἱ Χωμαρείμ) it is rendered "idolatrous priests" (A. V. and R. V.), and in Hos. x. 5 [LXX. had a different reading] "priests" (A. V. and R. V.), and in both cases "Chemarim" is given in the margin. In Syriac the word ܟܡܪܐ, *cûmrô*, is used in Judg. xvii. 5, 12, of the priest of Micah, while in Is. lxi. 6 it denotes the priests of the true God, and in Heb. ii. 17 is applied to Christ Himself. The root in Syriac signifies "to be sad," and hence *cûmrô* is supposed to denote a mournful, ascetic person, and hence a priest or monk (cp. Arab. ابيل, *abil*, and Syr. ܐܒܝܠܐ, *abilô*, in the same sense). Kimchi derived כמרים from a root signifying "to be black," because the idolatrous priests wore black garments; and this is the signification adopted by most moderns (see *QPB.*[2] on Zeph. *l. c.*), the black-robed priest being taken as a term equivalent to an unlawful or non-levitical priest (see Keil on 2 K. *l. c.*). The word occurs in Nabatean Inscriptions (MV.[11]. Cp. *ZATW.* x. 169). In the Peshitto of Acts xix. 35, the feminine form of the word is used to render the Greek νεωκόρον, "a temple keeper." Compare the Vulg. *aeditui*, which is the translation of Chemarim in two passages. [W. A. W.] [F.]

CHEMO'SH (כְּמוֹשׁ; Χαμώς; *Chamos*), the Baal or Sun-god of the Moabites (Num. xxi. 29; 1 K. xi. 7; 2 K. xxiii. 13; Jer. xlviii. 7, 13, 46), whose worship was introduced into Judah by Solomon and abolished by Josiah. In Judg. xi. 24 Chemosh also appears as the supreme god of the Ammonites; but this is probably a false reading, since the title of the national deity of Ammon was Milcom or Malcham (Moloch), "the king" (1 K. xi. 7; 2 K. xxiii. 13; 2 Sam. xii. 30, *Heb. text*; Jer. xlix. 1, *Heb. text*). On the Moabite Stone (*Records of the Past*, N. S. ii. 200–3) Mesha speaks of Chemosh as if no other deity were recognised in the country, though the name of the god is once compounded with that of the male Ashtar (see ATARGATIS). The stone itself is stated to have been erected as "a stone of salvation" to Chemosh at Kirkhah, and the oppression of Moab by Israel is ascribed to the anger of Chemosh. Then "Chemosh had mercy" on it, and "said" to Mesha, "Go, take Nebo." Mesha accordingly shook off the Israelitish yoke, "killed all the warriors" of Ataroth "for the well-pleasing of Chemosh," and took from Nebo "the vessels of Yahveh (Jehovah) and offered them before Chemosh." Finally, "Chemosh drove out" Israel from Jahaz, and "said" to Mesha, "Go down, make war against Horonaim," which belonged to Edom. When regarded as the god of generation, Chemosh was known as Baal-Peor (Num. xxv.), as has been observed by Jerome (*Comm.* in Is. xv. 2). The Jewish legend that he was worshipped under the form of a black star is a mere invention. The name enters into composition with that of Chemosh-melech, the father of Mesha, as well as of Kamusu-nadbu, or Chemosh-nadab, who was king of Moab in the time of Sennacherib; but the etymology of it is uncertain. [A. H. S.]

CHENA'ANAH (כְּנַעֲנָה; B. Χανάαν, A. Χαναάν; *Chananah*; according to Gesen. fem. of CANAAN (כְּנַעַן), but this is doubtful). **1.** Son of Bilhan, son of Jediael, son of Benjamin, head of a Benjamite house (1 Ch. vii. 10), probably of the family of the Belaites. [BELA.]

2. Father, or ancestor, of Zedekiah, the false prophet who made him horns of iron, and encouraged Ahab to go up against Ramoth-gilead, and smote Micaiah on the cheek (1 K. xxii. 11 [B. Χαανά], 24; 2 Ch. xviii. 10 [A. Χαναανά], 23). He may be the same as 1. [A. C. H.]

CHENA'NI (כְּנָנִי, if *i. q.* כְּנַנְיָה = *Jehovah hath protected* or *set up*), one of the Levites who assisted at the solemn purification of the people under Ezra (Neh. ix. 4 only). The names Bani *and* Chenani (A. V., R. V., and Vulg.) are by א$^{c.a}$A. read *vioì Χανανί*, as if reading "sons of (בְּנֵי) Chenani"; B. omits. [F.]

CHENANI'AH (כְּנַנְיָהוּ, *Jehovah hath protected:* in 1 Ch. xv. 22, B. Κωνενιά, A. Χωνενία; in 1 Ch. xv. 27, B. Ἰεχονίας, א. Ελεχονίας, A. Χενενίας; in 1 Ch. xxvi. 29, B. Χωνενειά, A. Χωχενίας: *Chonenias*), chief of the Levites, when David carried the ark to Jerusalem (1 Ch. xv. 22; xxvi. 29. See R. V. and *QPB.*^{3} on these passages). In 1 Ch. xv. 27, his name is written כְּנַנְיָה. [F.]

CHEPHA'R-HAAMMO'NAI (כְּפַר הָעַמּוֹנִי, the *Ketib* of "hamlet of the Ammonites;" B. Κεφειρὰ καὶ Μονεί, A. Καφηραμμίν; *Villa Emona;* R. V. adopts the *Keri*, *Chephar-ammoni*), a place mentioned among the towns of Benjamin (Josh. xviii. 24). No certain trace of it has yet been discovered, but in its name is doubtless preserved the memory of an incursion of the Ammonites, possibly that mentioned in Judg. x. 9, up the steep ravines which lead from the Jordan valley to the highlands of Benjamin. Conder (MS. note) proposes to identify it with *Kh. Kefr 'Ana*, north of *Beitin* on the road to *Nâblus*. [G.] [W.]

CHEPHI'RAH (הַכְּפִירָה, with the definite article, except in the later Books,—"the hamlet:" B. Κεφειρά, A. Χεφ- [in Josh. ix.]; B. καὶ Φειρά, A. Χεφ- [in Josh. xviii.]: *Caphira* [Josh. ix.], *Caphara* [Josh. xviii.], *Cephira* [Ezra and Neh.]), one of the four cities of the Gibeonites (Josh. ix. 17 [LXX. *v.* 23]), and named afterwards among the towns of Benjamin, with Ramah, Beeroth, and Mizpeh (xviii. 26 [LXX. *v.* 27]). The men of Chephirah returned with Zerubbabel from Babylon (Ezra ii. 25, B. Καφειρά, A. -ι- [in 2 Esd.]; Neh. vii. 29, B. Καφειρά, A. Χαφιρά). The Samaritan Version of Gen. xiii. 3 renders Hai (Ai) by *Cephrah*, כפרה; but this cannot be Chephirah, since both Ai and it are mentioned together in Josh. ix. (cp. *v.* 3 with *v.* 17), and in the lists of Ezra and Nehemiah already quoted. Dr. Robinson seems to have discovered it under the scarcely altered name of *Kefireh*, in the mountain-country on the western side of Benjamin, about 1¾ miles north of *Kuryet el-'Enab* and nearly 5 miles east of *Yâlo* (Ajalon; Rob. iii. 146; *PEF. Mem.* iii. 103). [CAPHIRA.] [G.] [W.]

CHERA'N (כְּרָן, Dillmann[5] [Gen. *l. c.*] conjectures a connexion with כֶּבֶר, a *lamb* or *ram;* Χαρράν; *Charan*), one of the sons of Dishon (so A. V. and R. V., in accordance with the Mas. text of 1 Ch.; but the Hebrew of Gen. *l. c.* is Dishan), the Horite "duke" (Gen. xxxvi. 26; 1 Ch. i. 41). No name corresponding with this has yet been discovered amongst the tribes of Arabia. [F.]

CHE'REAS (Χαιρέας; *Chaereas*), a brother of Timotheus, the leader of the Ammonites against Judas Maccabaeus (1 Macc. v. 6), who held Gazara (Jazar, 1 Macc. v. 8), where he was slain on the capture of the fortress by the Jews (2 Macc. x. 32, 37). [B. F. W.]

CHERE'THIMS (כְּרֵתִים), Ezek. xxv. 16 (R. V. "Cherethites"; *Palaestini*). The plural form of the word elsewhere rendered CHERETHITES; which see. The Hebrew word occurs again in Zeph. ii. 5 (A. V. and R. V. "Cherethites"; *Philisthini*). In these passages the LXX. render Cretans (Κρῆτες). [F.]

CHE'RETHITES. The Negeb or South (district) of the Cherethites is mentioned in 1 Sam. xxx. 14; and if this district may be considered a part of the "land of the Philistines" (do. *v.* 16), the Cherethite was connected with, possibly a sub-tribe of, that nation. (In Ezek. xxv. 16, Zeph. ii. 5, the Vulg. renders it, or replaces it by, Philistines; see CHERETHIMS.) The name is very probably connected with Crete, and may represent the section of the Philistine race which passed from CAPHTOR into Philistia. The name is very frequently coupled with the Pelethites (כְּרֵתִי; וְהַפְּלֵתִי; Χερεθὶ καὶ Φελεθί; Σωματοφύλακες, Joseph. *Ant.* vii. 5, § 4; *Cerethi et Phelethi*), and represents that contingent of the tribe which together with the Pelethite (of unknown nationality; see Driver, *Notes on the Heb. Text of the BB. of Sam.* on 2 Sam. viii. 18, and reff.) formed the foreign body-guard of King David (2 Sam. viii. 18, xv. 18, xx. 7, 23; 1 K. i. 38, 44; 1 Ch. xviii. 17). Some have supposed that from this body (or rather that which succeeded it) were drawn the executioners (2 K. xi. 4) and couriers (1 K. xiv. 27). Similarly Potiphar was captain of the guard of Pharaoh, and also chief of the executioners (Gen. xxxvii. 36), as was Arioch, Nebuchadnezzar's officer (Dan. ii. 14). In the latter part of David's reign the Cherethites and Pelethites were commanded by Benaiah (2 Sam. viii. 18, xx. 23, xxiii. 23). [F.]

CHE'RITH, THE BROOK (נַחַל כְּרִית; χειμάῤῥους Χορράθ; *torrens Carith*), the torrent-bed or *wâdy*—to use the modern Arabic word which exactly answers to the Hebrew *Nachal*—by which Elijah hid himself during the early part of the three years' drought (1 K. xvii. 3, 5). No further mention of it is found in the Bible, and by Josephus (*Ant.* viii. 13, § 2) it is spoken of merely as χειμάῤῥους τις.

The position of the Cherith has been much disputed. The words of the passage unfortunately give no clue to it:—"Get thee hence (*i.e.* apparently from the spot where the interview with Ahab had taken place, and which may or may not be Samaria), and turn thee eastward (קָדְמָה), and hide thyself by the brook Cherith that is before (עַל פְּנֵי) Jordan" (R. V.). The expression "before (or facing) the Jordan," which occurs also in *v.* 5, seems simply to indicate that the stream in question ran into that river and not into either the Mediterranean or the Dead Sea. Josephus, as we have seen, does not name the torrent, and he says that Elijah went, not "eastward," but towards the south—εἰς τὰ πρὸς νότον μέρη. Eusebius and Jerome on the other hand (*ON.*^{2} pp. 147, 28; 290, 69)

place the Cherith on the east of the Jordan, where also Schwarz (p. 51) would identify it with a *Wâdy Alias*, opposite Bethshean. This is the *Wâdy el-Yâbis* (Jabesh), which Benj. Tudela says is a corruption of ואד אליאם (ii. 408: Asher). Antoninus Mart. (ch. ix.) places the valley east of Jordan, opposite Jericho; apparently identifying it with *W. Sh'aib* or *W. el-Kefrein*. The only other tradition on the subject is one mentioned by Marinus Sanutus in 1321; that it ran by Phasaelus, Herod's city in the Jordan valley. This would make it the *'Ain Fusâil*, which falls from the mountains of Ephraim into the *Ghôr*, south of *Kurn Surtabeh*, and about 15 miles above Jericho. This view is supported by Bachiene, and in our own time by Van de Velde (ii. 310). The spring of the brook is concealed under high cliffs and under the shade of a dense jungle (V. de Velde, *Memoir*, p. 339). Dr. Robinson, on the other hand, would find the name in the *Wâdy Kelt* (قلت), behind Jericho. The two names are, however, essentially unlike, and *Wâdy Kelt* lies far too much to the south.

The argument from probability is in favour of the Cherith being on the east of Jordan (see Mühlau in Riehm's *HWB.* s. n. *Crith*), of which Elijah was a native, and where he would be more out of Ahab's reach than in any of the recesses of the mountains of Ephraim or Benjamin. With increased knowledge of that part of the country, the name may possibly be discovered there. [G.] [W.]

CHERUB (כְּרוּב; *Cherub*), apparently a place in Babylonia from which some persons of doubtful extraction returned to Judaea with Zerubbabel (Ezra ii. 59, B. Χαρούς, A. Χερούβ [2 Esd.]; Neh. vii. 61, B. Χαρούβ, א[c.a]A. Χερ-). It is, however, quite uncertain whether a place or persons be meant (see Bertheau-Ryssel on Ezra, *l. c.*). In the parallel list of 1 Esd. v. 36 this name, with the next, Addan, seems to be corrupted to CHARAATHALAR. [W. A. W.] [F.]

CHERUB, CHERUBIM (כְּרוּב, plur. כְּרוּבִים, or, as mostly in Pentateuch, כְּרֻבִים; χερούβ, χερουβίμ). The symbolical figure so called was a composite creature-form, which finds a parallel in the religious insignia of

Fig. 1. The winged female Sphinx. (Wilkinson.)

Assyria, Egypt, and Persia, *e.g.* the sphinx, the winged bulls and lions of Nineveh, &c., a general prevalence which prevents the necessity of our regarding it as a mere adoption from the Egyptian ritual. In such forms (cp. the Chimaera of Greek and the Griffin of north-eastern fables) every imaginative people has sought to embody

Fig. 2. An Egyptian winged animal. (Wilkinson.)

its notions either of the attributes of Divine essence, or of the vast powers of nature which transcend that of man. In the various legends of Hercules the bull and the lion constantly appear as forms of hostile and evil power; and some of the Persian sculptures apparently represent evil genii under similar quasi-cherubic forms. Cherubim first enter the Bible record in Gen. iii. 24, attended by a "flaming sword;" where notice the article, "*the* cherubim" (R. V.). Stern and strict guardianship, prompt to avenge intrusion on the henceforth unapproachable scene of a higher spirituality, seems intended; "*the* cherubim" being known from the Tabernacle devices when Moses wrote, "*the* sword" being that of Num. xxii. 23, Josh. v. 13, although the symbolism is doubtless older than the Mosaic age. The Hebrew idea seems to limit the number of the cherubim. A pair (Ex. xxv. 18, &c.) were placed on the mercy-seat of the ark; a pair of colossal size[a] overshadowed it in Solomon's Temple with the canopy of their contiguously extended wings. To this, "under the shadow of Thy wings," in Ps. xvii. 8, xxxvi. 7, lxiii. 7, is probably an allusion. Ezek. i. 4–14 speaks of four,[b] and similarly the apocalyptic ζῷα (Rev. iv. 6) are four. They utter no voice, though one is "heard from above them," nor have dealings with men save to awe and repel; in short, they are nowhere developed into personality, unless we assume their identity with the apocalyptic ζῷα (Rev. v. 14; vi. 1). A "man clothed in linen" is introduced as a medium of communication between them and the Prophet, whereas for a similar office one of the Seraphim personally officiates; and these latter also "cry one to another." The cherubim are placed beneath the actual presence of Jehovah, Whose moving throne they appear to draw (Gen. iii. 24; Ezek. i. 5, 25, 26, x. 1, 2, 6, 7; Is. vi. 2, 3, 6). The expression, however, "the chariot (מֶרְכָּבָה) of the cherubim" (1 Ch. xxviii. 18), does not

[a] It is perhaps questionable whether the smaller cherubim on the mercy-seat were there in Solomon's Temple, as well as the colossal overshadowing ones. That they were on the ark when brought from Shiloh to the battle seems most likely; and it is hardly consistent with the reverential awe shown in the treatment of the ark, even by the enemy, to suppose that they could have been lost in the course of its wanderings [see ARK OF COVENANT]; still, the presence of the two pairs together seems hardly consistent and appropriate.

[b] The number four was one of those which were sacred among the Jews, like seven, and forty (Bähr, *De Symbol.*).

imply wheels, but the whole apparatus of ark and cherubim is probably so called in reference to its being carried on staves, and the words "chariot" and "cherubim" are in apposition. So a sedan might be called a "carriage," and כַּרְכֶּב is used for the body of a litter. See, however, Dorjen, *De Cherub. Sanct.* (ap. Ugolini, vol. viii.), where the opposite opinion is ably supported. The glory symbolizing that Presence which eye cannot see rests or rides on them, or one of them, thence dismounts to the Temple threshold, and then departs and mounts again (Ezek. x. 4, 18, cp. ix. 3; Ps. xviii. 10). There is in them an entire absence of human sympathy, and even on the mercy-seat they probably appeared not merely as admiring and wondering (1 Pet. i. 12), but as a vehicle of manifesting Deity, Whose Presence, in itself inaccessible, they at once proclaim and veil (Schultz, *Alt. Test. Theol.*[4] p. 321), and as guardians of the covenant and avengers of its breach. A single figure there might have suggested an idol, which two, especially when represented regarding something greater than themselves, would not do. They thus became subordinate, like the supporters to a shield, and are repeated, as it were the distinctive bearings of divine heraldry, —the mark, carved or wrought, everywhere on the house and furniture of God, alike in the tapestry of the Tabernacle, on the walls of the first Temple, and in Ezekiel's vision of the Temple renewed (Ex. xxvi. 31; 1 K. vi. 29, 35, vii. 29, 36; Ezek. xli. 18–20, 25).

Those on the ark were to be placed with wings stretched forth, one at each end of the mercy-seat, and to be made "of the mercy-seat," which Abarbenel (Spencer, *de leg. Heb. ritual.* iii. diss. v.) and others interpret of the same mass of gold with it, viz. wrought by hammering, not cast and then joined on. This seems doubtful, but from the word מִקְשָׁה the solidity of the metal may perhaps be inferred. They are called χερουβὶμ δοξῆς (Heb. ix. 5), as on them the glory, when visible, rested; but,

Fig. 3. Assyrian Gryphon. (Layard.)

whether thus visibly symbolized or not, a perpetual Presence of God is attributed to the Holy of Holies. They were anointed with the holy oil, like the ark itself, and the other sacred furniture. Their wings were to be stretched upwards, and their faces "towards each other and towards the mercy-seat." It is remarkable that with such precise directions as to their position, attitude, and material, nothing save that they were winged is said concerning their shape.

Was this shape already familiar, or kept designedly mysterious? From the fact that cherubim were blazoned on the doors, walls, curtains, &c. of the house, and from the detailed

Fig. 4. Assyrian winged Bull. (Layard, *Nin. and Bab.*)

description of shapes by Ezekiel, the latter notion might be thought absurd. But if the text of Ezekiel, and the carvings, &c., of the Temple had made them popular, Josephus could not possibly have said (*Ant.* viii. 3, § 3), τὰς δὲ χερουβεῖς οὐδεὶς ὁποῖαί τινες ἦσαν εἰπεῖν οὐδ' εἰκάσαι δύναται. It is also remarkable that Ezek. i. speaks of them as "living creatures" (חַיּוֹת, ζῶα), under mere animal forms. In x. 14 the remarkable expression, "the face of a cherub," is introduced, and the Prophet concludes by a reference to his former vision, and an identification of those creatures with the cherubim—v. 20, "I knew that they were cherubim." Familiarity with the colossal winged and human-headed bulls, &c., of Assyrian sculpture may have moulded the form in which the vision of Ezekiel was cast, just as Egyptian prototypes (fig. 7) may have suggested a symbolism to Moses for the Tabernacle. He probably develops into greater complexity under that influence what the older and simpler symbols involved. On the whole it seems likely that the word "cherub" meant not only the composite creature-form, of which the man, lion, ox, and eagle were the elements, but, further, some peculiar and mystical form, which Ezekiel, being a priest, would know and recognise as "the face of a CHERUB," κατ' ἐξοχήν, but which was kept secret from all others; and such probably were those on the ark, which, when it was moved, was always covered [ARK OF COVENANT], though those on the hangings and panels might be of the popular device.[e]

[e] The "cherubim, lions, and oxen," which ornamented certain utensils in the Temple (1 K. vii. 29), are probably all to be viewed as cherubic insignia, the former of composite form, the two latter of simple.

What this peculiar cherubic form was is perhaps an impenetrable mystery. It was probably believed popularly to be something of the bovine type (though in Ps. cvi. 20 the notion appears to be marked as degraded): so Spencer (*de leg. Hebr. rit.* iii. diss. 5) thinks that the ox was the *forma praecipua*, and quotes Grotius on Ex. xxv. 18; Bochart, *Hierozoic.* p. 87, ed. 1690. Hence the "golden calf." On the other hand we find "lions, *oxen, and* cherubim" on the "borders" (cp. 1 K. vii. 29). The symbolism of the visions of Ezekiel is more complex than that of the earlier Scriptures, and he certainly means in x. 14 that each composite creature-form had four faces, so as to look four ways at once; was four-sided[d] and four-winged, so as to move with instant rapidity in every direction without turning. Yet in his vision of the Temple this is again modified, and every cherub had *two* faces (xli. 18). But it is not necessary to import this into the simpler symbols of the Tabernacle and Temple, which were probably single-faced,[e] and with but one pair of wings. Ezekiel adds also the imagery of the wheels—a mechanical to the previous animal forms. We should remember, however, the wheels on the "borders" (1 K. vii. 30, 32, 33), on which cherubim form part of the ornamentation (*v.* 29). These are described as having "the work of a chariot wheel," and were probably merely for convenience of locomotion. This might typify inanimate nature revolving in a fixed course, informed by the spiritual power of God. The additional symbol of being "full of eyes" is one of obvious meaning, while the restless vivacity of the ζῶα in Rev. iv. 8 sets forth the same quality in Divine operations. Thus, instead of an *animus mundi* working mechanically, we have the nobler idea of a living God pervading all nature with ubiquitous consciousness; and the view of nature which we derive from the O. T. is thus defined as being in a higher than the purely mechanical sphere; for instance, the thunderstorm of Ps. xviii. 11 is a manifestation of Divine Presence and energy.

This mysterious form might well be the symbol of Him Whom none could behold and live. For as symbols of Divine attributes, *e.g.* omnipotence and omniscience, not as representations of actual beings (Clem. Alex. *Strom.* v. p. 241), the cherubim should be regarded.[f] Philo indeed assigns a varied signification to the cherubim: in one place he makes them allegories of the beneficent and avenging energies of God; in another, of the two hemispheres of the then astronomical system, one of which supported the planets and the other the fixed stars; elsewhere of power and goodness simply. They are symbolical in Gen. iii. 24, just as the serpent is a symbol in iii. 1–14, though functions and actions are attributed to each. When such symbolical forms have become conventional, the next step is to literalize them as concrete shapes of real beings. The ζῶα of Rev. iv. 6–8 are related both to the cherubim and to the seraphim of Is. vi., combining the symbols of both. They are not stern and unsympathising like the former, but invite the seer to "come and see;" nor, like the latter, do they cover their face (Is. vi. 2) from the Presence of Deity, or use their wings to speed on His errands, but, in a state of rest and praise, act as the *choregi* of the heavenly host. And here, too, symbolism ever sliding into realism, these have been diversely construed, *e.g* as the four evangelists, four archangels, &c.

Many etymological sources for the word כְּרוּב have been proposed. Two worth noticing are: (1) the Syriac ܟܪܘܒ, *great, strong* (Gesen. *s. v.*; comp. Philo, *de Profugis*, p. 465). The fact that all the symbols embody various forms of strength—the lion among wild and the ox among tame beasts, the eagle among birds, the man as supreme over all nature—is in favour of this. (2) The Syriac ܟܪܒ, *to plough*, i.e. *to cut into;* hence Arab. كرب, *sculpsit;* and here a doubt occurs whether in the active or passive sense, "that which ploughs" = the ox (comp. בָּקָר, "ox," from same word in Arab. "to plough"), which brings us to the *forma praecipua* of Spencer; or that which is carved = an image. In favour of the latter is the fact that כְּרוּב is rabbinical for "image" generically (Simonis, Bouget, and Pagninus, *Lexx.* s. v.), perhaps as the only image known to the Law, all others being deemed forbidden, but possibly also as containing the true germ of meaning.[g]

---

[d] Schoetgen, *ad Hor. Hebr. Apoc.* iv. 3, quotes *Pirke Rab. Eliezer*, "Ad quatuor pedes (throni) sunt quatuor animalia, quorum unum quodque quatuor facies et tot alas habet. Quando Deus loquitur ab oriente, tunc id fit inter duos cherubinos facie hominis; quando Deus loquitur a meridie, tunc id fit inter duos cherubinos facie leonis," &c.

[e] Bähr, *Symbolik*, vol. i. pp. 313–14 (whose entire remarks on this subject are valuable and often profound), inclines to think that the precise form varied within certain limits; *e.g.* the cherubic figure might have one, two, or four faces, two or four feet, one or two pair of wings, and might have the bovine or leonine type as its basis; the imagery being modified to suit the prominently intended attribute, and the highest forms of creature-being expressing best the highest attributes of the Creator. Thus he thinks the human form might indicate spirituality (p. 340. Cp. Grot. on Exod. xxv. 18, and Heb. ix. 5). Some useful hints as to the connexion of cherubic with other mythological forms may be found in Creuzer, *Symbol.* i. 441, 540.

[f] Keil, on the contrary (*Bibl. Archaeol.* § 19, 3), takes them to be images representing actual beings, the highest of spiritual orders, supreme, next to God Himself, over their hierarchy, as man is supreme over earthly creatures.

[g] The griffin of Northern fable watching the gold in the wilderness has (see above) been compared with the cherub, both as regards his composite form and his function as the guardian of a treasure. The "watchful dragon" of the Hesperides seems perhaps a fabulous reflex of the same, where possibly the "serpent" (δράκων) may, by a change not uncommon in myth, have taken the place of the "cherubim." The dragon and the bull have their place also in the legend of the golden fleece. There is a very near resemblance too between the names γρῦπ- (with ς affirmative) and כְּרוּב; and possibly an affinity between γρῦπ- and the Greek forms γλύπω, γλύφω, γράφω, γλαφυρός (cp. Germ. *graben*), all relating to carving, as between כְּרוּב and the Syriac and Arab. words signifying *aravit, sculpsit*, &c., as above. We have another form of the same root probably in κύρβις, the block or tablet on which the laws were *engraved*.

Assyriologists are still unable to decide whether or not Cherub be identical with *Kirûbu*, the occurrence of this latter word as a name for the winged bull being still a matter of dispute (see *ZA.* i. 68). Canon Cook refers the word "to an Egyptian root, which probably means to 'carve,' or at any rate 'shape'" (*Speaker's Comm.* on Gen. iii. 24, note C end). In *PSBA.* 1884, p. 193, is a speculation by Renouf on a word *χerefu* (phonetically = "lion-forms") found on some papyri, but not recognised in Egyptian vocabularies, which he views as the probable parent of a Coptic and a demotic word, each signifying "forms," and suggests that the Hebrew כְּרוּב may "be derived from the Egyptian *χeref*." Besides these opinions, wisdom or intelligence has been given by high authority as the true meaning of the name (Jerome on Is. vi. 2; so Philo, *de Vit. Mos.* 688, ὡς δ' ἂν Ἕλληνες εἴποιεν ἐπίγνωσις καὶ ἐπιστήμη πολλή; and Clem. Alex. *Strom.* v. 240, ἐθέλει δὲ τὸ ὄνομα ιὼν χερουβὶμ δηλοῦν αἴσθησιν πολλήν). The Rabbins gave the etymological explanation כרב, "equal to many"; Umbreit and others take the word "cherub" from רכב, "a chariot," by transposing the first two letters (Oehler, *Theol. of the O. T.*, i. p. 385, § 119, who refers to Riehm, *de Nat. et Ratione Symbol. Cherub.*).

Though the exact form of the cherubim is uncertain, they must have borne a general resemblance to the composite religious figures found upon the monuments of Egypt, Assyria, Babylonia, and Persia. The first two figures (p. 565) are winged creatures from the Egyptian monuments. The next two (p. 566) are taken from Assyrian sculptures. The winged Assyrian sphinx is elsewhere represented as engaged architecturally with the base of a column; it has thus analogy to the architectural cherubs of the sanctuary. Fig. 5 represents the griffin of Northern fable, as we see from the griffin found as an ornament in Scythian tombs, but drawn by Grecian artists. In the sacred boats or arks of the Egyptians, there are sometimes found two figures with extended wings, which remind us of the description of the cherubim "covering the mercy-seat with their wings, and their faces looking one to another" (Ex. xxv. 20). But these figures appear *within* the ark (fig. 6), and

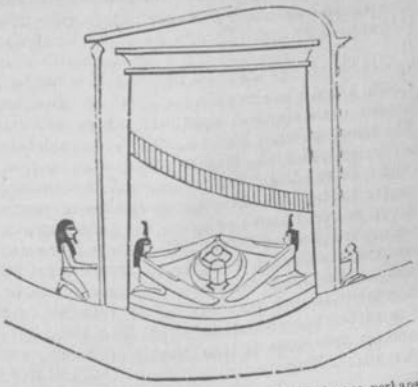


Fig. 6. A sacred Egyptian boat or ark, with two figures, perhaps resembling cherubim. (Wilkinson.)

probably represent inferior deities holding the symbol of the superior deity between them, which in the Mosaic type is significant by its absence. [H. H.]

Fig. 5. A Grecian griffin.

CHESA'LON (כֶּסְלוֹן, *strength, confidence*; B. Χασλών, A. Χασαλών; *Cheslon*), a place named as one of the landmarks on the west part of the north boundary of Judah, apparently situated on the shoulder (A. V. and R. V. "side") of Mount Jearim (Josh. xv. 10). The name does not, however, reappear in the list of towns of Judah later in the same chapter. Mount Jearim, the "Mount of Forests," has not necessarily any connexion with Kirjath-jearim, though the two were evidently, from their proximity in this statement of the boundary, not far apart. Chesalon was the next landmark to Beth-shemesh, and it is quite in accordance with this that Dr. Robinson has observed a modern village named *Kesla*, about six miles to the north-east of *'Ain Shems*, on the western mountains of Judah (Rob. ii. 30, note, iii. 154; *PEF. Mem.* iii. 25). Eusebius and Jerome, in the *Onomasticon*, mention a Chaslon, but they differ as to its situation, the former (*OS.*[2] p. 289, 47, s. n. Χαλαασών) placing it in Benjamin,[a] the latter (*OS.*[2] p. 147, 4) in Judah: both agree that it was a very large village in the neighbourhood of Jerusalem. The meaning of the name is thought by Stanley, like Chesulloth,

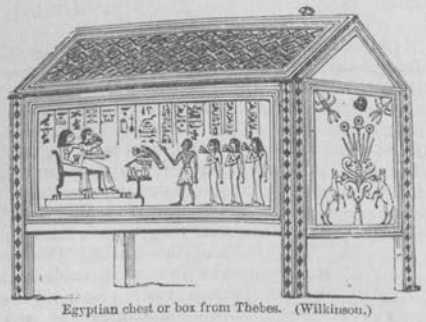
[a] Possibly referring to the village now *Beit Iksa*, between Jerusalem and *Neby Samwil*, and therefore in Benjamin.

to have reference to its situation on the "loins" of the mountain. [G.] [W.]

CHE'SED (כֶּשֶׂד; A. Χάσζαδ, *D.* Χάσαδ; *Cased*), fourth son of Nahor (Gen. xxii. 22). [CHALDEA.] [F.]

CHESI'L (כְּסִיל; B. Βαιθήλ; A. Χασείρ; *Cesil*), a town in the extreme south of Palestine, named with Hormah and Ziklag (Josh. xv. 30). The name does not occur again, and is evidently a corruption of the Masoretic text (see Driver, *Notes on the Heb. Text of the BB. of Samuel*, under 1 Sam. xxx. 27); but in the list of towns given out of Judah to Simeon, the name BETHUL occurs in place of it (xix. 4). This is confirmed by the reading of 1 Ch. iv. 30, BETHUEL; by that of the LXX. (B.) as given above; and by the mention in 1 Sam. xxx. 27 of a Bethel (not the better known Bethel, N. of Jerusalem, but) among the cities in the Negeb of Judah, not far from Ziklag. [G.] [W.]

CHEST. By this word are translated in the A. V. two distinct Hebrew terms: 1. אָרוֹן or אָרֹן, from ארה, to gather; κιβωτός; *gazophylacium*. This is invariably used for the ark of



Egyptian chest or box from Thebes. (Wilkinson.)

the Covenant, and, with two exceptions, for that only. It is instructive to be reminded that there is no connexion whatever between this word and that for the "ark" of Noah, and for the "ark" in which Moses was hid among the flags (both תֵּבָה, *Tebah*). The two exceptions alluded to are (*a*) the "coffin" (the ארנא of the Hauran inscriptions, Delitzsch [1887] in loco) in which the bones of Joseph were carried from Egypt (Gen. l. 26; rendered in the Targ. Ps.-Jon. in Hebrew letters by γλωσσόκομον; cp. John xii. 6), probably of stone, and containing the wooden chest (cp. Ebers in Riehm, *HWB.* s. n. 'Einbalsamiren'); and (*b*) the "chest" in which Jehoiada the priest collected the alms for the repairs of the Temple (2 K. xii. 9, 10; 2 Ch. xxiv. 8–11). Of the former the above woodcut is probably a near representation. 2. גִּנָּזִים, probably of Persian derivation ("treasuries" in Esther iii. 9, iv. 7; "chests" in Ezek. xxvii. 24). [G.] [W.]

CHESTNUT-TREE (עַרְמוֹן, *'armôn*; πλάτανος, ἐλάτη; *platanus*; "plane-tree," R. V.). Mention is made of the *'armôn* in Gen. xxx. 37, as one of the trees from which Jacob took rods in which "he pilled white strakes," to set them before Laban's flocks when they came to drink (see on this subject SHEEP); in Ezek. xxxi. 8, the *'armôn* is spoken of as one of the glories of Assyria. The tree really intended is the Oriental Plane, *Platanus orientalis*, so familiar in the London squares, and which must not be confounded with our common sycamore, often called a plane-tree, but which is really a maple, *Acer pseudo-platanus*. This rendering of plane-tree is supported by the LXX. (in Gen. *l. c.*), the Vulg., the Chaldee, with the Syriac and Arabic Versions (Celsius, *Hierob.* i. 513). The chestnut, though a native of the Caucasus and Western Asia, is only found in Palestine cultivated. The plane-tree is frequent by the sides of streams and in the plains, both on the coast and in the north of the country. It loves a rich soil in a low moist situation, and thus in Genesis is grouped with the willow and the poplar. On the Upper Jordan, on the banks of the Litany (Leontes), in the glens of Lebanon, and by the sides of the Orontes, it is abundant, and is a noble and beautiful tree. There are some grand old plane-trees in the streets of Damascus. One has its hollow trunk used as a dwelling; another which we measured is more than 40 feet in circumference, and a copious spring gushes up among its roots. Dr. Kitto (*Cyc.*, art. *Armôn*), in illustration of Ezek. (*l. c.*), says that "the planes of Assyria are of extraordinary size and beauty, in both respects exceeding even those of Palestine; it consists with our own experience, that one may travel far in Western Asia without meeting such trees, and so many together, as occur in the Chenar (plane) groves of Assyria and Media." The plane-trees of Persia are now and have been long held in the greatest veneration; with the Greeks also these trees were great favourites. Herodotus (vii. 31) tells a story of how Xerxes on his way to Sardis met with a plane-tree of exceeding beauty, to which he made an offering of golden ornaments.

The plane-tree belongs to the natural order *Platanaceae*, bearing catkins, with the flowers in clusters of rounded balls, pendulous on a common stalk, with palmate leaves of pale green colour. It sheds its bark as well as its leaves annually, and the trunk then appears white, whence its Hebrew name *'armôn*, "naked" (*i.e.* without bark). In Ecclus. xxiv. 14, Wisdom is compared to "a plane-tree by the water."

[W. H.] [H. B. T.]

CHESUL'LOTH (with the definite article, הַכְּסֻלּוֹת; B. Χασαλώθ, A. Ἀχασελώθ; *Casaloth*), one of the towns of Issachar, meaning (as some think) in Hebrew, "the loins" (Fr. *les flancs*), and therefore, perhaps, deriving its name from its situation on the slope of some mountain (Josh. xix. 18). It is named in the same group with Jezreel and Shunem (*Sôlam*), and is probably the same place as CHISLOTH-TABOR (*v.* 12. Cp. Dillmann,[2] *l. c.*). It is mentioned by Eusebius and Jerome, in the *Onomasticon*, under Ἀχεσέλωθ (*OS.*[2] p. 241, 58) and *Achaseluth* (*OS.*[2] p. 130, 24), and is said to be a village called Χασαλούς, *Chasalus*, 8 miles from Diocaesarea, in the plain near Mount Tabor. It is now *Iksâl*, 3 miles west of Tabor (*PEF. Mem.* iii. 385–7; Guérin, *Galilée*, i. 108); and is doubtless the Xaloth of Josephus (*B. J.* iii. 3, § 1). [G.] [W.]

CHETTIIM (Τ.? Χεττιείμ; ℵA. Χεττιείμ; *Chethim*) = Macedonia (1 Macc. i. 1). [CHITTIM.] [F.]

CHEZI'B (כְּזִיב; Sam. Cod. כזבה; Sam. Vers. כדובה; Χασβί; Vulg. [*quo nato parere ultra*] *cessavit*; cp. a similar translation by Aquila, in Jer. *Qu. Hebr.*), a name which occurs but once (Gen. xxxviii. 5). Judah was at Chezib when the Canaanitess Bathshua bare his third son Shelah. The other places named in this remarkable narrative are all in the low country of Judah, and therefore, in the absence of any specification of the position of Chezib, we may adopt the opinion of the interpreters, ancient and modern, who identify it with ACHZIB (אַכְזִיב). It is probably the Χασβί of Eusebius and Jerome (*OS.*[2] pp. 289, 37; 146, 18), and the name may perhaps be retained in *'Ain Kezbeh*, at *Beit Nettif*, 2½ miles from *'Aid el-Mâ* (Adullam. *PEF. Mem.* iii. 36). Probably identical with CHOZEBA. [G.] [W.]

CHI'DON (כִּידוֹן; LXX. B. om., A. Χειλών; Joseph. *Ant.* vii. 4, § 2, Χειδών; *Chidon*), the name which in 1 Ch. xiii. 9 is given to the threshing-floor (or to the owner of the threshing-floor) at which the accident to the ark, on its transport from Kirjath-jearim to Jerusalem, and the death of Uzzah took place. In the parallel account in 2 Sam. vi. 6 the name is given as NACHON. It has been debated whether these were two distinct names for the same spot, or whether the one was a corruption or alteration of the other (see Ges. *Thes.* p. 683; Simonis, *Onom.* pp. 339–40). Further, the Jewish tradition (Jerome, *Quaest. Heb.* on 1 Ch. xiii. 9)—irreconcilable with the topography—was that Chidon acquired its name from being the spot on which Joshua stood when he stretched out the *Chidon* (A. V. "spear," R. V. "javelin") towards Ai (Josh. viii. 18). All that can be affirmed is that it is a proper name, or some designation, which — attached to "threshing-floor"—constituted it a proper name (cp. Gen. l. 16, 17; 1 Sam. xix. 22), whether of owner or place (cp. Driver, *Notes on the Heb. Text of the BB. of Sam.*, under 2 Sam. vi. 6). [G.] [W.]

CHILDREN (בָּנִים; τέκνα, παιδία; *liberi, filii*. From the root בָּנָה, *to build*, are derived both בֵּן, *son*, as in Ben-jamin, &c., and בַּת, *daughter*, as in Bath-sheba. The Chald. בַּר, *son*, also occurs in O. T., and appears in N. T. in such words as Bar-nabas. Cognate words are the Arabic Beni, *sons*, in the sense of descendants, and Benât, *daughters*, Ges. pp. 215, 236; Shaw, *Travels*, Pref. p. 8). The blessing of offspring, but especially, and sometimes exclusively, of the male sex, is highly valued among all Eastern nations, while the absence of children is regarded as one of the severest deprivations. Women sometimes use charms and empirical means for the purpose of obtaining their wishes in this respect, a practice which may perhaps in some degree account for the teraphim stolen by Rachel from her father (Gen. xvi. 2, xxix. 32, xxx. 1, 24, xxxi. 19, 34; Deut. vii. 14; 1 Sam. i. 6, ii. 5, iv. 20; 2 Sam. vi. 23, xviii. 18; 2 K. iv. 14; Is. xlvii. 9; Jer. xx. 15, xxii. 30; Hos. ix. 14; Esth. v. 11; Ps. cxxvii. 3, 5; Eccles. vi. 3. Cp. Herod. i. 136; Strab. xv. 733; Drusius, *Prov. Ben-Sirac*, ap. *Cr. Sacr.* viii. 1887; Lane, *Mod. Eg.* i. 208, 240; Mrs. Poole, *Englishw. in Eg.* iii. 163; Niebuhr, *Descr. de l'Ar.* p. 67; Chardin, *Voy.* vii. 446; Russell, *Nubia*, p. 343; Thomson, *Land and Book*, p. 124). Childbirth is in the East usually, but not always, attended with little difficulty, and accomplished with little or no assistance (Gen. xxxv. 17, xxxviii. 28; Ex. i. 19; 1 Sam. iv. 19, 20; Burckhardt, *Notes on Bedouins*, i. 96; Harmer, *Obs.* iv. 425; Lady M. W. Montagu, *Letters*, ii. 217, 219, 222). As soon as the child was born, and the umbilical cord cut, it was washed in a bath, rubbed with salt, and wrapped in swaddling clothes. Arab mothers sometimes rub their children with earth, sand, or finely powdered salt (Ezek. xvi. 4; Job xxxviii. 9; Luke ii. 7; Burckhardt, *l. c.*; *PEFQy. St.* 1881, p. 301). On the eighth day the rite of circumcision in the case of a boy was performed, and a name given, sometimes, but not usually, the same as that of the father, and generally conveying some special meaning. Among Mohammedans, circumcision is most commonly delayed till the fifth, sixth, or even the fourteenth year (Gen. xxi. 4, xxix. 32, 35, xxx. 6, 24; Lev. xii. 3; Luke i. 59, ii. 21, and Lightfoot *ad loc.*; Spencer, *de Legg. Hebr.* v. 62; Strab. xvii. 824; Herod. ii. 36, 104; Burckhardt, *l. c.* i. 96; Lane, *Mod. Eg.* i. 87; Mrs. Poole, *Englishw. in Eg.* iii. 158; Niebuhr, *Descr.* p. 70). [CIRCUMCISION.] After the birth of a male child the mother was considered unclean for 7 + 33 days; if the child were a female, for double that period, 14 + 66 days. At the end of the time she was to make an offering of purification of a lamb as a burnt-offering, and a pigeon or turtle-dove as a sin-offering, or, in case of poverty, two doves or pigeons, one as a burnt-offering, the other as a sin-offering (Lev. vii. 1–8; Luke ii. 22). The period of nursing appears to have been sometimes prolonged to three years (Is. xlix. 15; 2 Macc. vii. 27. Cp. Livingstone, *Travels*, c. vi. p. 126; but Burckhardt was led to a different conclusion). The Mohammedan law enjoins mothers to suckle their children for two full years if possible (Lane, *Mod. Eg.* i. p. 83; Mrs. Poole, *Englishw. in Eg.* iii. p. 161). Nurses were employed in cases of necessity (Gen. xxiv. 59, xxxv. 8; Ex. ii. 9; 2 Sam. iv. 4; 2 K. xi. 2; 2 Ch. xxii. 11). The time of weaning was an occasion of rejoicing (Gen. xxi. 8). Arab children wear little or no clothing for four or five years: the young of both sexes are usually carried by the mothers on the hip or the shoulder, a custom to which allusion is made by Isaiah (Is. xlix. 22, lxvi. 12; Lane, *Mod. Eg.* i. 83). Both boys and girls in their early years, boys probably till their fifth year, were under the care of the women (Prov. xxxi. 1; Herod. i. 136; Strab. xv. 733; Niebuhr, *Descr.* p. 24). Afterwards the boys were taken by the father under his charge. Those in wealthy families had tutors or governors (אֹמְנִים, παιδαγωγοί), who were sometimes eunuchs (Num. xi. 12; 2 K. x. 1, 5; Is. xlix. 23; Gal. iii. 24; Esth. ii. 7; Joseph. *Vit.* 76; Lane, *Mod. Eg.* i. 83). Daughters usually remained in the women's apartments till marriage, or, among the poorer classes, were employed in household work (Lev. xxi. 9; Num. xii. 14; 1 Sam. ix. 11; Prov.

xxxi. 19, 23; Ecclus. vii. 25, xlii. 9; 2 Macc. iii. 19). The example, however, and authority of the mother were carefully upheld in the case of children of both sexes (Deut. xxi. 20; Prov. x. 1, xv. 20; 1 K. ii. 19). Boys of the lower classes at the present day are taught early to take sheep and goats to pasture, and to watch vineyards when the fruit is ripening, and girls to carry water in buckets on their heads (*PEFQy. St.* 1881, p. 301).

The firstborn male children were regarded as devoted to God, and were to be redeemed by an offering (Ex. xiii. 13; Num. xviii. 15; Luke ii. 22). Children devoted by special vow, as Samuel was, appear to have been brought up from very early years in a school or place of education near the Tabernacle or Temple (1 Sam. i. 24, 28). [EDUCATION.]

The authority of parents, especially the father, over children was very great, as was also the reverence enjoined by the Law to be paid to parents. The disobedient child, the striker or reviler of a parent, was liable to capital punishment, though not at the independent will of the parent. Children were liable to be taken as slaves in case of non-fulfilment of their duties, and were expected to perform menial offices for their parents, such as washing the feet, and to maintain them in poverty and old age. How this last obligation was evaded, see CORBAN. The like obedience is enjoined by the Gospel (Gen. xxxviii. 24; Lev. xix. 32, xxi. 9; Num. xii. 14; 1 K. ii. 19; 2 K. iv. 1; Neh. v. 5; Prov. x. 1, xv. 20, xix. 3; Drusius, *Quaest. Hebr.* ii. 63, ap. *Cr. Sacr.* viii. 1547; Col. iii. 20; Ephes. vi. 1; 1 Tim. i. 9: cp. Virg. *Aen.* vi. 609, and Servius *ad loc.*; Aristoph. *Ran.* 146; Plato, *Phaedo*, 144, *de Legg.* ix.).

The legal age was twelve, or even earlier in the case of a female, and thirteen for a male (Maimon. *de Pros.* c. v., ed. Prideaux, p. 167; Grotius and Calmet *on John* ix. 21).

The inheritance was divided equally between all the sons except the eldest, who received a double portion (Deut. xxi. 17; Gen. xxv. 31, xlix. 3; 1 Ch. v. 1, 2; Judg. xi. 2, 7). Daughters had by right no portion in the inheritance; but if a man had no son, his inheritance passed to his daughters, but they were forbidden to marry out of their father's tribe (Num. xxvii. 1, 8 xxxvi. 2, 8).

The term *sons* was applied also to the disciples and followers of the teachers of the various sects which arose after the Captivity (Lightfoot, *Hor. Heb.* on John xiii. 33; Luke xi. 45; John xvi. 16). [See SECTS; SCHOOLS; and SCHOOLS OF PROPHETS.] [H. W. P.]

CHIL'EAB. [ABIGAIL; DANIEL.]

CHIL'ION (כִּלְיוֹן, perhaps *wasting away* [but see Oettli in Strack u. Zöckler's *Kjff. Komm.* 'das B. Ruth,' Einleit. § 3]; B. Χελαιὼν and Κελ-; A. Χελεὼν and Χαι-; *Chelion*), the son of Elimelech and Naomi, and husband of Orpah (Ruth i. 2–5, iv. 6). He is described as an "Ephrathite (cp. Gen. xlviii. 7; Mic. v. 1) of Bethlehem-Judah;" Judah being added to distinguish this Bethlehem from the Bethlehem in Zebulon (Josh. xix. 15) [W. A. W.]

CHIL'MAD (כַּלְמַד; Χαρ. [? Carmania]; *Chelmad*), a place or country mentioned in conjunction with Sheba and Asshur (Ezek. xxvii. 23). Bochart found a similarity to it in Charmande, a town near the Euphrates between the Mascas and the Babylonian frontier (Xen. *Anab.* i. 5, § 10); but G. Smith (*TSBA.* 1872, p. 61) and Fried. Delitzsch (*Wo lag das Paradies*, p. 206) in *Kalwâdha* near Bagdad, to which Orelli (in Strack and Zöckler's *Kjff. Komm.* in loco) assents. Hitzig (*Comm. on Ezek.* l. c.), following Kimchi, does not consider it the name of a place at all, but alters the punctuation to כָּלְמֹד with the sense "Asshur was *as thy pupil* in commerce;" and with an alteration of this character Cornill (*Das Buch d. Proph. Ezechiel*, in loco) agrees, though he prefers to render "Assur must accommodate himself to thy market." [F.]

CHIM'HAM (כִּמְהָם; in 2 Sam. xix. 40, it is in the Hebrew text Chimhan, כִּמְהָן; and in the *Ketîb* of Jer. xli. 17, Chemôham, כִּמּוֹהָם: B. Χαμαάμ, A. Χαναάν; LXX. in Jer. [xlviii.] couples the name with another reading of the preceding noun, T.^{r} Γαβηρωχαμάα, א. Γηβαηρωχαμά; Jos. Ἀχίμανος: *Chamaam*), a follower, and probably a son (Josh. *Ant.* vii. 11, § 4; and cp. 1 K. ii. 7), of Barzillai the Gileadite, who returned from beyond Jordan with David (2 Sam. xix. 37, 38, 40; see Targum on Jer. xli. 17). David appears to have bestowed on him a possession at Bethlehem, on which, in later times, an inn or *Khân* (גֵּרוּת) was standing, well known as the starting-point for travellers from Jerusalem to Egypt (Jer. xli. 17). Josephus (*Ant.* x. 9, § 5) gives the name of this place as Μάνδρα. [G.] [W.]

CHIN'NERETH (כִּנֶּרֶת, in pause כִּנָּ֫רֶת; B. Κενερέθ, A. Χενερώθ; *Cenereth*), a fortified city in the tribe of Naphtali (Josh. xix. 35 only), of which no trace is found in later writers, and no remains by travellers. Whether it gave its name to, or received it from, the lake, which was possibly adjacent, is quite uncertain. The Talmud (Tal. Jer. *Megillah*, 70 *a*) renders the name by גְּנֹסַר, *Genosar* (or גִּנֵּיסַר, Γεννησάρ, 1 Macc. xi. 67), and praises the fertility of the plain of the same name. If this rendering be correct, Chinnereth was in or near Gennesaret, possibly at *Abû Shûsheh*, or on the heights above *Khân Minyeh*. By St. Jerome Chinnereth was identified with the later Tiberias (*OS.*^{2} p. 146, 28). This may have been from some tradition then existing; but it is more probable that Tiberias represents the Rakkath of Josh. xix. 35. The identification of Chinnereth with Tiberias is denied by Reland (p. 161), on the ground that Capernaum is said by St. Matthew (iv. 13) to have been on the very borders of Zebulun and Naphtali, and that Zebulun was to the south of Naphtali. But St. Matthew's expression will hardly bear this strict interpretation. The town, or the lake, appears to have given its name (slightly altered) to a district — "all CINNEROTH" (1 K. xv. 20. Cp. the suggested reading in Josh. xix. 34, *QPB.*^{3} in loco). In A. V. 1611 it is spelt "Cinnereth." [G.] [W.]

CHIN'NERETH, SEA OF (יָם כִּנֶּרֶת; in Num. B. ἡ θάλασσα Χενάρα, AF. Χενερέθ, in Josh. B. Χενερέθ, A. -ρώθ; *mare Cenereth*,

Num. xxxiv. 11; Josh. xiii. 27), the inland sea, which is most familiarly known to us as the "lake of Gennesareth." This is evident from the mode in which it is mentioned in various passages in the Pentateuch and Joshua — as being at the end of Jordan opposite to the "Sea of the Arabah," *i.e.* the Dead Sea; as having the Arabah or Ghor below it, &c. (Deut. iii. 17; Josh. xi. 2, xii. 3). In the two former of these passages the word "sea" is omitted; in the two latter it is in a plural form—"Chinneroth" (acc. Cinnaroth, כִּנָּרוֹת; and כִּנֶּרוֹת, Cinneroth, Vulg. Ceneroth). The word is by some derived from Cinnoor (*κιννύρα, cithara*, "a harp"), as if in allusion to the oval shape of the lake. But this, to say the least, is doubtful. It seems more likely that Cinnereth was an ancient Canaanite name existing long prior to the Israelite conquest, and, like other names, adopted by the Israelites into their language. The subsequent name "Gennesar" may have been derived from "Cinnereth" by a change of letters of a kind frequent enough in the East. [GENNESARETH.] [G.] [W.]

CHIN'NEROTH (כִּנֶּרוֹת, כִּנָּרוֹת: B. Κενερώθ, Χενέρεθ; A. Χενερεθθί, Χεννερέθ; F. (bis) Χενέρεθ: *Ceneroth*), Josh. xi. 2, xii. 3. [CHINNERETH.] In A. V. 1611 the name is spelt Cinneroth, as in 1 K. xv. 20. [F.]

CHI'OS (Χίος; *Chius*). The position of this island in reference to the neighbouring islands and coasts could hardly be better described than in the detailed account of St. Paul's return voyage from Troas to Caesarea (Acts xx., xxi.). Having come from Assos to Mitylene in Lesbos (xx. 14), he arrived the next day over against Chios (*v.* 15), the next day at Samos, and tarried at Trogyllium (*ib.*); and the following day at Miletus (*ib.*): thence he went by Cos and Rhodes to Patara (xxi. 1). [MITYLENE; SAMOS.] With this it is worth while to compare the account of Herod's voyage to join Marcus Agrippa in the Black Sea. We are told (Joseph. *Ant.* xvi. 2, § 2) that, after passing by Rhodes and Cos, he was detained some time by north winds at Chios, and sailed on to Mitylene, when the winds became more favourable. It appears that during this stay at Chios Herod gave very liberal sums towards the restoration of some public works which had suffered in the Mithridatic war. This island does not appear to have any other association with the Jews; nor is it specially mentioned in connexion with the first spread of Christianity by the Apostles. When St. Paul was there, on the occasion referred to, he did not land, but only passed the night at anchor. At that time Chios enjoyed the privilege of freedom (Plin. v. 38), and it is not certain that it ever was politically a part of the province of Asia, though it is separated from the mainland only by a strait of 5 miles. Its length is about 32 miles, and in breadth it varies from 8 to 18. Its outline is mountainous and bold; and it has always been celebrated for its beauty and fruitfulness. In recent times it has been too well known, under its modern name of *Scio*, for the dreadful sufferings of its inhabitants in the Greek war of independence. Chios is described by the older travellers, Thevenot, Tournefort, and Chandler (*Dict. of Gr. and Rom. Geog.*, art. CHIOS), and by Fustel de Coulanges, *Mém. sur l'île de Chios*: Arch. des Miss. v. pp. 92, 273 sq. (1856); Vaux, *Gk. Cities and Islands of Asia Min.*, p. 159. [J. S. H.] [J. E. S.]

CHISLEU. [MONTHS.]

CHIS'LON (כִּסְלֹן, *confidence, strength*; Χασλών; *Chaselon*), father of Elidad, the prince of the tribe of Benjamin, chosen to assist in the division of the land of Canaan among the tribes (Num. xxxiv. 21). [W. A. W.]

CHIS'LOTH-TA'BOR (כִּסְלֹת תָּבֹר, "loins of Tabor;" B. Χασελωθαίθ, A. Χασαλωθβαθώρ; *Ceseleth thabor*), a place to the border (גְּבוּל) of which reached the border of Zebulun (Josh. xix. 12). It is now the village *Iksâl*, three miles west of Mount Tabor; and is probably the same place as CHESULLOTH. Eusebius and Jerome mention it under the forms Χασελοὺς τοῦ Θαβώρ (*OS.*[2] p. 292, 64) and Chaselath Tabor (*OS.*[2] p. 147, 12). Josephus names a village Ξαλὼθ as in the great plain, *i.e.* of Esdraelon, and as one of the landmarks of lower Galilee (*B. J.* iii. 3, § 1; and see *Vita*, § 44): this is doubtless identical with Chisloth-Tabor and Chesulloth. [G.] [W.]

CHIT'TIM, KIT'TIM (כִּתִּים, כִּתִּיִים; Κήτιοι, Κίτιοι, Κητιείμ, Χεττιείμ; *Cetthim, Cethim*), one of the sons of Javan (Gen. x. 4; 1 Ch. i. 7; A. V. KITTIM), and closely related to the Dodanim or Rodanim, as well as to Elishah and Tarshish. Chittim is frequently noticed in Scripture: Balaam predicts that a fleet should thence proceed for the destruction of Assyria (Num. xxiv. 24, מִיַּד כִּתִּים, "from beside Chittim;" *venient in trieribus de Italia*, Vulg.): in Is. xxiii. 1, 12, it appears as the resort of the fleets of Tyre: in Jer. ii. 10, the "isles of Chittim" (אִיֵּי, i.e. *maritime districts*) are to the west, as Kedar to the east of Palestine: the Tyrians procured thence the cedar or BOX-WOOD, which they inlaid with ivory for the decks of their vessels (Ezek. xxvii. 6, בַּת־אַשֻּׁרִים, A. V. "the company of the Ashurites," but R. V. better [ivory, *the daughter of cedar*, i.e.] "inlaid in box-wood"): in Dan. xi. 30, "ships of Chittim" (*καὶ ἥξουσι Ῥωμαῖοι*; *Trieres et Romani*) advance to the south to meet the king of the north: at a later period we find Alexander the Great described as coming *ἐκ τῆς γῆς* Χεττιείμ (1 Macc. i. 1; A. V. CHETTIIM), and Perseus as Κιττιέων βασιλεύς (1 Macc. viii. 5; A. V. CITIMS). Josephus rightly explains Chittim as Cyprus, so named from the Phoenician settlement of Citium (*Χέθιμος δὲ Χέθιμα τὴν νῆσον ἔσχεν. Κύπρος αὕτη νῦν καλεῖται, Ant.* i. 6, § 1). Citium was the chief Phoenician town in the island, and its site is at present partly occupied by Larnaka. A considerable number of Phoenician inscriptions have been found there, and we learn from them that כתי (*Chitti*) was the native word for "a Citian." It was Melekyathon, king of Citium (B.C. 370), who caused the bilingual inscription (in Phoenician and Cypriote) to be engraved which was discovered by Mr. Hamilton Lang at Dali (Idalion), and furnished Mr. George Smith with the clue to the decipherment of the Cypriote syllabary.

Citium seems to have been the first of the Phoenician colonies in Cyprus, and hence it was that the whole island came to be called the island of the Chittim or "Citians" by the Phoenicians and their Hebrew neighbours. The Phoenician settlers, however, occupied only the eastern and southern portions of the island; Paphos, with its famous temple of Astartê, and the *ashêrah* or upright cone of stone which symbolised the goddess, being one of their towns. The rest of the island was for the most part inhabited by Greek colonists; hence the Assyrian name of it, Yavnan or Yânan, the island "of the Ionians." Yavnan is the Javan of the O. T. As early as B.C. 3750, Sargon I., of Accad, not only caused an image of himself to be sculptured on the shores of the Mediterranean, but also crossed over into Cyprus; and a Babylonian cylinder, bearing the name of his deified son and successor, Naram-Sin, has been found by General di Cesnola among the temple-treasures of Curium. In the 16th century B.C. Cyprus, under the name of Asebi or Asi, sent copper, lead, ivory, and chariots as tribute to the Egyptian Pharaoh, Thothmes III. Seven of its kings despatched ambassadors to Sargon II. in B.C. 709, and the Assyrian king caused a monolith (now in the Berlin Museum) to be erected at Citium. Esar-haddon also received tribute from ten of the Cyprian princes. The island was conquered by the Egyptian Amasis, and subsequently passed under the Persian yoke until Evagoras of Salamis revolted in B.C. 410. The name Chittim has no connexion with that of the חִתִּים, or Hittites, and the Greek spelling with X is erroneous. In Macc., Chittim evidently = *Macedonia*, and was perhaps more especially applied to that country from the apparent similarity of the name in the form Μακεττία, which was supposed = Μα and Κέτιοι, *the land of the Cetii*. The use of the term was extended yet farther so as to embrace Italy according to the LXX. (Dan.), and the Vulgate (Num. and Dan.), to which we may add the rendering of the Chaldee Targum, which gives אטליון (Italia) in 1 Ch. i. 7, and אפוליא (Apulia) in Ezek. xxvii. 6. The "ships of Chittim" in Daniel have been explained as *Macedonian*, which Popillius Laenas may have seized at Delos after the defeat of Perseus, and taken on his expedition to Egypt against Antiochus; but the assumption on which this interpretation rests is not borne out by the narrative (Liv. xliv. 29; xlv. 10), nor does there appear any difficulty in extending the term to Italy, as one of the lands in the far west with which the Hebrews were but little acquainted. [A. H. S.]

CHIUN (כִּיּוּן, Amos v. 26). The word occurs in a verse of which there are two very different renderings (see *QPB.*[2] in loco). The LXX. (τὸ ἄστρον τοῦ θεοῦ ὑμῶν Ῥαιφάν), Peshitto, and Vulg. (*imaginem idolorum vestrorum, sidus dei vestri*) do not consider Chiun a proper name, and in this they are followed by those who render (*e.g.* R.V. marg.) "the shrine (*al.* the pedestal) of your images," as if derived from כָּנָן. On the other hand, many consider Chiun to be the name of a deity worshipped by the Israelites in the desert, and, punctuating the name כִּיְוָן, identify him with the star Saturn, the principle of evil, whose Assyrian name was *Kewan* or *Kaiwanu* (Schrader, *KAT.*[2] pp. 442–3). [See REMPHAN.] [F.]

CHLOE (Χλόη, Greek female name meaning *verdure; Chloe*), a woman mentioned in 1 Cor. i. 11. It was by "those of Chloe" (τῶν Χλοῆς) that St. Paul had been informed of the divisions in the Church of Corinth. "Those of Chloe" were probably slaves or freedmen belonging to the household of a person of that name (cp. Rom. xvi. 10 and 11, and see ARISTOBULUS). Nothing is known of Chloe, and her residence either at Corinth or Ephesus is a matter of mere conjecture. [E. R. B.]

CHO'BA (BA. Χωβά, ℵ. Χαβά; Vulg. omits), a place mentioned in Judith iv. 4. The Syriac reads here "the kikkar" or circle of the Jordan. The place is not identified (see *Speaker's Comm.* in loco). [F.]

CHO'BAI (BA. Χωβαί, ℵ[1c] Χωβά; Vulg. omits) occurs in Judith xv. 4, 5. The name suggests Hobah (חוֹבָה, which is the reading of the Syriac), especially in connexion with the mention of Damascus in *v.* 5, but the distance from the probable site of Bethulia is too great. It is supposed by Reland (p. 721) to be the same as Coabis, a station given in the Peutinger Tables, as 12 Roman miles from Scythopolis, and 12 from Archelais; and it is now probably the ruin *el-Mekhubby*, near which is the cave *'Arâk el-Khubby*, on the old Roman road, 3 miles from *Tûbâs*, and 11 from *Beisân* (Scythopolis. See *PEF. Mem.* ii. 231, 243; Conder, *Hbk. to Bible*, p. 289). [W.]

CHOR-A'SHAN (כּוֹר־עָשָׁן). The true reading of the Heb. text is בּוֹר־עָשָׁן [cp. Driver, *Notes on the Heb. Text of the BB. of Sam.* in loco], which is recognised both in B. Βηρσάβεε, and in A. Βωρασάν; *in lacu Asan;* cp. R. V. marg. *Bor-ashan*), one of the places in which "David and his men were wont to haunt," and to his friends in which he sent presents of the plunder taken from the Amalekites (1 Sam. xxx. 30). The towns named in this catalogue are all south of Hebron, and Chorashan may therefore be identified with ASHAN of Simeon (Josh. xv. 42; xix. 7). This is, however, uncertain (cp. Dillmann[2] in loco). [G.] [W.]

CHORA'ZIN (Χοραζίν, Χοραζείν, Χοροζαΐν; *Corozain*), one of the cities in which our Lord's mighty works were done, but named only in His denunciation (Matt. xi. 21; Luke x. 13). In the time of Eusebius (*OS.*[2] p. 290, 77) it was stated to be deserted, and to be 2 (or 12, Euseb.) miles from Capernaum. Jerome describes it (*Comm. in Is.* ix. 1) as on the borders of the lake. It is mentioned in the Talmud (Tal. Bab. *Menahoth*, 85*a*) as celebrated for the fine quality of its wheat (see Neubauer, *Géog. du Talmud*, p. 220). The origin of the name is also very uncertain. Origen writes the name as χώρα Ζίν, *i.e.* the district of Zin; but this is obviously a mere fancy, and has no support from MSS. The only traveller who visited Chorazin, previous to the Crusaders, was Willibald (A.D. 723–6), who went from Tiberias to Magdalum and Capernaum, and thence to Bethsaida and Chorazin, "where our Lord healed the demoniac, and sent

the devil into a herd of swine." Willibald appears here to identify Chorazin with Gergesa, which lay on the eastern shore of the lake; and in this he is followed by the mediaeval geographers: see especially the map of Mar. Sanutus (1321). Chorazin is now *Kh. Kerâzeh*, 2½ miles north of *Tell Hûm*; the ruins are extensive, and especially interesting, as the place does not seem to have been occupied since the fourth century. The most important ruin is that of a synagogue, with Corinthian capitals and decorative details elaborately carved in hard black basalt (Wilson, *Recovy. of Jerusalem*, pp. 346–7; *PEF. Mem.* i. 400–2). [G.] [W.]

CHOSAME'US. [See SIMON CHOSAMAEUS.]

CHOZE'BA (כֹּזֵבָא; B. Χωχηθά, A. Χωζηβά; *viri mendacii*; R. V. *Cozeba*). The "men of Chozeba" are named (1 Ch. iv. 22) amongst the descendants of Shelah the son of Judah. The name does not reappear, but it is sufficiently like CHEZIB (and especially the reading of the Samaritan Codex of that name) to suggest that the two refer to the same place; that, namely, elsewhere called ACHZIB, at which place Shelah was born. (The Vulgate Version of this passage is worth notice.) Conder (*PEFQy. St.* 1875, p. 13) proposes to identify Chozeba with *Kh. Kûeizîba*, N.E. of *Hûlhûl*, in the hill-country of Judaea (*PEF. Mem.* iii. 358; Tristram, *Bible Places*, p. 68); but if it be the same as CHEZIB, it must have been in the low country of Judah (see CHESIB). [G.] [W.]

CHRIST. [JESUS.]

CHRISTIAN (Χριστιανός; *Christianus*). The disciples, we are told (Acts xi. 26), "were first called Christians at Antioch" on the Orontes, somewhere about A.D. 43. The name, and the place where it was conferred, are both significant. It is clear that the appellation "Christian" was one which, though eagerly adopted and gloried in by the early followers of Christ, could not have been imposed by themselves. They were known to each other as brethren of one family, as disciples of the same Master, as believers in the same faith, and as distinguished by the same endeavours after holiness and consecration of life; and so were called *brethren* (Acts xv. 1, 23; 1 Cor. vii. 12), *disciples* (Acts ix. 26, xi. 29), *believers* (Acts v. 14), *saints* (Rom. viii. 26, xv. 25). But the outer world could know nothing of the true force and significance of these terms, which were in a manner esoteric; it was necessary therefore that the followers of the new religion should have some distinctive title. To the contemptuous Jew they were Nazarenes and Galilaeans, names which carried with them the infamy and turbulence of the places whence they sprang, and from whence nothing good and no prophet might come (cp. John i. 46). The Jews could add nothing to the scorn which these names expressed, and had they endeavoured to do so they would not have defiled the glory of their Messiah by applying his title to those whom they could not but regard as the followers of a pretender. The name "Christian," then, which, in the only other cases where it appears in the N. T. (Acts xxvi. 28; 1 Pet. iv. 16; cp. Tac. *Ann.* xv. 44), is used contemptuously, could not have been applied by the early disciples to themselves, nor could it have come to them from their own nation the Jews; it must therefore have been imposed upon them by the Gentile world, and no place could have so appropriately given rise to it as Antioch, where the first Church was planted among the heathen. It was manifest by the preaching of the new teachers that they were distinct from the Jews, so distinct as to be remarked by the heathen themselves; and as no name was so frequently in their mouths as that of Christ,[a] the Messiah, the Anointed, the people of Antioch, ever on the alert for a jibe or mocking taunt, and taking Christ to be a proper name and not a title of honour, called his followers Χριστιανοί, Christians, the partisans of Christ; just as in the early struggles for the Empire we meet with the Caesariani, Pompeiani, and Octaviani. The Latin form of the name is what would be expected, for Antioch had long been a Roman city. Its inhabitants were celebrated for their wit and a propensity for conferring nicknames (Procop. *Pers.* ii. 8, p. 105). The Emperor Julian himself was not secure from their jests (Amm. Marc. xxii. 14). Apollonius of Tyana was driven from the city by the insults of the inhabitants (Philostr. *Vit. Apoll.* iii. 16). Their wit, however, was often harmless enough (Lucian, *De Saltat.* 76), and there is no reason to suppose that the name "Christian" of itself was intended as a term of scurrility or abuse, though it would naturally be used with contempt.

Suidas (*s. v.* Χριστιανοί) says the name was given in the reign of Claudius, when Peter appointed Evodius bishop of Antioch, and they who were formerly called Nazarenes and Galilaeans had their name changed to Christians. According to Malalas (*Chronog.* x.) it was changed by Evodius' himself, and William of Tyre (iv. 9) has a story that a synod was held at Antioch for the purpose. Ignatius, in the Epistle to the Magnesians (c. x.), regards the prophecy of Isaiah (lxii. 2, 12) as first fulfilled in Syria, when Peter and Paul founded the Church at Antioch. But reasons have already been given why the name did not originate within the Church.

Another form of the name is Χρηστιανοί, arising from a false etymology (Lact. iv. 7; Tertullian, *Apol.* c. 3; Suet. *Claud.* 25), by which it was derived from χρηστός. [W. A. W.]

CHRONICLES, FIRST AND SECOND BOOKS OF. I. *Title.*—Chronicles (in Heb. דִּבְרֵי הַיָּמִים; *verba dierum*, as Jerome translates it, and *sermones dierum*, as Hilar. Pictav. in Wolf, but rather *acta dierum*; journals or diaries, *i.e.* the record of the daily occurrences) is the name originally given to the record made by the appointed historiographers in the kingdoms of Israel and Judah. In the LXX. these Books are called Παραλειπομένων πρῶτον and δεύτερον, which is understood, after Jerome's explanation, as rightly recording one of their characteristics, viz. that they are supplementary to the Books of Kings. The Vulgate retains both the Hebrew and Greek name in Latin characters, Dibre jamim or hajamim, and Paralipomenon. The division of Chronicles into two Books is not

[a] "Christ," and not "Jesus," is the term most commonly applied to our Lord in the Epistles.

original any more than a similar division in the cases of the Books of Samuel and Kings. In all the old catalogues the Chronicles form but one out of the 22 (or 24 Talmud) Books of the O. T. canon. Jerome tells us (*ad Domnion. et Rogatian.*) that in his time they formed only one Book in the Hebrew MSS., but had been divided by the LXX. translators; and that for convenience, on account of their length, the Christian Churches of the West had adopted this division. In his Ep. to Paulinus, he thus further explains the name *Paralipomenon*, and eulogizes the Book: "Paralipomenon liber, id est Instrum. Vet. epitome, tantus ac talis est, ut absque illo si quis scientiam scripturarum sibi voluerit arrogare, seipsum irrideat. Per singula quippe nomina juncturasque verborum, et praetermissae in Regum libris tanguntur historiae, et innumerabiles explicantur Evangelii quaestiones." The name *Chronica*, or *Chronicorum liber*, which is given in some copies of the Vulgate, and from whence we derive our English name of "Chronicles," seems to be taken from Jerome's saying in his *Prologus Galeatus*, "Dibre hajamim, *i.e.* verba dierum: quod significantius *Chronicon* totius divinae historiae possumus appellare." It was possibly suggested to him by his having translated the *Chronica* of Eusebius into Latin. Later Latin writers have given to the Books the name of "*Ephemeridum* libri."

II. *Text and Language.*—The *text* of the Chronicles is in parts very corrupt, and has the appearance of having been copied from MSS. which were partly effaced by age or injury. Various readings of the names of persons and places are frequent, and the numbers are often justly open to suspicion. Jerome (*Praef. ad Paral.*) speaks of the Greek text as being hopelessly confused in his days, and assigns this as a reason why he made a new translation from the Hebrew. At the same time, these defects cannot be said seriously to affect the narratives in these Books. The lacunae in the text are not of any great length, and the ancient Versions make no important additions to the Hebrew (*Speaker's Comm.* § 8). As regards the *language* of these Books, as of Ezra, Nehemiah, Esther, the later Prophets, &c., it has a marked Aramaic colouring, and Gesenius says of them, that "as literary works, they are decidedly inferior to those of older date" (*Heb. Gramm.*[25] § 2, 7, ed. Kautsch, and reff. Cp. Bertheau,[2] *Komm. z. Chronik*, p. xvi. sq.). The chief Chaldaisms are the use of certain words not found in old Hebrew, as זָמַן, סוֹף, &c., or of words in a different sense, as עָנָה, אָמַר, &c., or of a different orthography, as דָּוִיד for דָּוִד, רוֹב for רַב, &c., and the interchange of א and ה at the end and at the beginning of words.

III. *Plan and Contents.*—One of the greatest difficulties connected with the Captivity and the return must have been the maintenance of that genealogical distribution of the lands which yet was a vital point of the Jewish economy. Accordingly it appears to have been one to which both Ezra and Nehemiah gave their earnest attention, as David, Hezekiah, and other kings had done before them. Another difficulty, intimately connected with the former, was the maintenance of the Temple services at Jerusalem. This could only be effected by the residence of the priests and Levites in Jerusalem in the order of their courses: and this residence was only practicable in case of the payment of the appointed tithes, first-fruits, and other offerings. Immediately these ceased the priests and Levites were obliged to disperse to their own villages to obtain a livelihood, and the Temple services were neglected. But then again the registers of the Levitical genealogies were necessary, in order that it might be known who were entitled to such and such allowances, as porters, as singers, as priests, and so on; because all these offices went by families; and again the payment of the tithes, first-fruits, &c., was dependent upon the different families of Israel being established each in his inheritance. Obviously therefore one of the most pressing wants of the Jewish community after their return from Babylon would be trusty genealogical records; and if there were any such in existence, the arrangement and publication of them would be one of the greatest services such a person as Ezra could confer. But further, not only had Zerubbabel (Ezra iii. v. vi.), and after him Ezra and Nehemiah (Ezra ii. viii.; Neh. vii. viii.), laboured most earnestly, in the teeth of immense difficulties, to restore the Temple and the public worship of God there to the condition it had been in under the kings of Judah; but it appears clearly from their policy, and from the language of the contemporary Prophets, Haggai and Zechariah, that they had it much at heart to re-infuse something of national life and spirit into the heart of the people, and to make them feel that they were still the inheritors of God's covenanted mercies, and that the Captivity had only temporarily interrupted, not dried up, the stream of God's favour to their nation. Now nothing could more effectually aid these pious and patriotic designs than setting before the people a compendious history of the kingdom of David, which should embrace a full account of its prosperity, should trace the sins which led to its overthrow, and, carrying the thread through the period of the Captivity, should continue it as it were unbroken on the other side; and those passages in their former history would be especially important which exhibited their greatest and best kings as engaged in building or restoring the Temple, in reforming all corruptions in religion, and zealously regulating the services of the house of God. As regards the kingdom of Israel or Samaria, seeing it had utterly and hopelessly passed away, and that the existing inhabitants were among the bitterest "adversaries of Judah and Benjamin," it would naturally engage very little of the compiler's attention.

These considerations explain exactly the plan and scope of that historical work which contains the two Books of Chronicles. The Books may be conveniently divided into four principal sections: (*a*) 1. i.–ix. (Genealogies); (*b*) x.–xxix. (Saul and David); (*c*) 2. i.–ix. (Solomon); (*d*) x.–xxxvi. (the Kings of Judah till the Babylonian Captivity). The first eight chapters give the genealogical divisions and settlements of the various tribes, the compiler informing us in ix. 1 of the disturbance of those settlements by the Babylonish Captivity, and, in the following verses, of the partial restoration of them at

the return from Babylon (*vv.* 2–24). That this list refers to the families who had returned from Babylon is clear, not only from the context, but from its re-insertion in Neh. xi. 3–22,[a] with additional matter evidently extracted from the public archives, and relating to times subsequent to the return from Babylon, extending to Neh. xii. 27, where Nehemiah's narrative is again resumed in continuance with Neh. xi. 2. Having thus shown the re-establishment of the returned families, each in their own inheritance according to the houses of their fathers, the compiler proceeds to the other part of his plan, which is to give a continuous history of the kingdom of Judah from David to his own times, introduced by the closing scene of Saul's life (ch. x.), which introduction is itself prefaced by a genealogy of the house of Saul (ix. 35–44), extracted from the genealogical tables drawn up in the reign of king Hezekiah, as is at once manifest by counting the thirteen or fourteen generations, from Jonathan to the sons of Azel inclusive, exactly corresponding to the fourteen from David to Hezekiah inclusive. This part of the plan extends from 1 Ch. ix. 35 to the end of the Book of Ezra. 1 Ch. xv.–xvii. xxii.–xxix.; 2 Ch. xiii.–xv. xxiv. xxvi. xxix.–xxxi. and xxxv. are among the passages wholly or in part peculiar to the Books of Chronicles.

As regards the *materials* used by him, and the *sources* of his information, they are not difficult to discover. The genealogies are obviously transcribed from some register, in which were preserved the genealogies of the tribes and families drawn up at different times. This appears from the very different ages at which different genealogies terminate, indicating of course the particular reign when each was drawn up. Thus *e.g.* the genealogy of the descendants of Sheshan (1 Ch. ii. 34–41) was drawn up in Hezekiah's reign, since, including Zabad, who lived in David's time, and Azariah in the time of Joash, it ends with a generation contemporary with Hezekiah [AZARIAH, No. 13]. The line of the high-priests (1 Ch. vi. 1–15) must have been drawn up during the Captivity; that in *vv.* 50–53 in the time of David or Solomon; those of Heman and Asaph, in the same chapter, in the time of David; that of the sons of Azel (1 Ch. viii. 38) in the time of Hezekiah; that of the sons of Zerubbabel (1 Ch. iii. 19–24) in the time of Ezra, and so on. The same wide divergence in the age of other materials embodied in the Books of Chronicles is also apparent. Thus the information in 1 Ch. i. concerning the kings of Edom before the reign of Saul, was obviously compiled from very ancient sources. The same may be said of the incident of the slaughter of the sons of Ephraim by the Gittites (1 Ch. vii. 21, viii. 13), and of the account of the sons of Shela, and their dominion in Moab (1 Ch. iv. 21, 22). The curious details concerning the Reubenites and Gadites in 1 Ch. v. must have been drawn from contemporary documents, embodied probably in the genealogical records of Jotham and Jeroboam, while other records used by the compiler are as late as after the return from Babylon, such as 1 Ch. ix. 2 sq.; 2 Ch. xxxvi. 20 sq.; and others, as Ezra ii. and iv. 6–23, are as late as the time of Artaxerxes and Nehemiah. Hence it is further manifest that the Books of Chronicles contain extracts from the writings of many different writers, which were extant at the time the compilation was made, and are by no means to be limited to documents already existing in the Canonical Books of Samuel and Kings. For the full account of the reign of David, he made copious extracts from the Books of Samuel the seer, Nathan the prophet, and Gad the seer (1 Ch. xxix. 29). For the reign of Solomon he copied from "the book of Nathan," from "the prophecy of Ahijah the Shilonite," and from "the visions of Iddo the seer" (2 Ch. ix. 29). Another work of Iddo, called "*the story* (or commentary, *Midrash*, מִדְרָשׁ) of the prophet Iddo," supplied an account of the acts, and the ways, and sayings of king Abijah (xiii. 22); while yet another book of Iddo concerning genealogies, with the book of the prophet Shemaiah, contained the acts of king Rehoboam (xii. 15). For later times the "Book of the kings of Israel and Judah"—a work not to be confounded with the canonical Books of Kings—is repeatedly cited (2 Ch. xxv. 26, xxvii. 7, xxxii. 32, xxxiii. 18, &c.), and "the sayings of the seers" (xxxiii. 19, reading חֹזִים with LXX. and R. V. marg.) or perhaps "of Hozai" (R. V.:—on this disputed reading see the *Comm.* in loco), and for the reigns of Uzziah and Hezekiah "the vision of the prophet Isaiah" (xxvi. 22, xxxii. 32). In other cases where no reference is made to any book as containing further information, it is probable that the whole account of such reign is transcribed. Besides the above-named works, there was also the public national record called סֵפֶר דִּבְרֵי הַיָּמִים, mentioned in Neh. xii. 23, from which doubtless the present Books took their name, and from which the genealogies and other matters in them were probably derived, and which are alluded to as having existed as early as the reign of David (1 Ch. xxvii. 24). These "Chronicles of David," דִּבְרֵי הַיָּמִים לַמֶּלֶךְ דָּוִיד, are probably the same as the דִּבְרֵי דָוִיד, above referred to, as written by Samuel, Nathan, and Gad. From this time the affairs of each king's reign were regularly recorded in a book called—*e.g.*, סֵפֶר דִּבְרֵי שְׁלֹמֹה, "the book of the acts of Solomon" (1 K. xi. 41)—by the name of the king, as before of David, but afterwards in both kingdoms by the general name of ס" ד" הַיָּמִים, as in the constantly recurring formula,—"Now the rest of the acts of (דִּבְרֵי) Rehoboam, Abijam, &c.; Jeroboam, Nadab, &c., are they not written in the book of the Chronicles of the kings of Judah" *or* "of Israel" (1 K. xiv. 29, xv. 7, &c.)? And this continues to the end of Jehoiakim's reign, as appears by 2 K. xxiv. 5; 2 Ch. xxxvi. 8. And it was probably from this common source that the passages in the Books of Samuel and Kings identical with the Books of Chronicles were derived. All these several works have perished, but the most important matters in them have been providentially preserved to us in the Chronicles (see a useful summary in *Speaker's Comm.* § 5).

As regards the closing chapter of 2 Ch. subsequent to *v.* 8, and the 1st ch. of Ezra, a comparison of them with the narrative of 2 K.

[a] Cp. also 1 Ch. ix. 19 with Ezra ii. 42, Neh. vii. 45.

xxiv. xxv. will lead to the conclusion that while the writer of the narrative in *Kings* lived in Judah and died under the dynasty of Nebuchadnezzar, the writer of the chapter in *Chronicles* lived at Babylon and survived till the commencement at least of the Persian dynasty. For this last writer gives no details of the reigns of Jehoiachin, or Zedekiah, or of the events in Judah subsequent to the burning of the Temple; but, only dwelling on the moral lessons connected with the destruction of Jerusalem, passes on quickly to relate the return from Captivity. Moreover, he seems to speak as one who had long been a subject of Nebuchadnezzar, calling him simply "King Nebuchadnezzar;" and by the repeated use of the expression "*brought him*, or *these*, to Babylon," rather encourages the idea that the writer was there himself. The first chapter of Ezra strongly confirms this view, for we have copious details, not likely to be known except to one at Babylon, of the decree, the presents made to the captives, the bringing out of the sacred vessels, the very name of the Chaldee treasurer, the number and weight of the vessels, and the Chaldee name of Zerubbabel; and in this chapter the writer speaks throughout of the captives *going up* to Jerusalem, and Sheshbazzar *taking* them up (הֶעֱלָה, as opposed to הֵבִיא). But with this clue we may advance a little further, and ask, who was there at Babylon, a Prophet, as the writer of sacred annals must be, an author, a subject of Nebuchadnezzar and his sons, and yet who survived to see the Persian dynasty, to whom we can with probability assign this narrative? Surely the answer will be Daniel. Who so likely to dwell on the sacred vessels taken by Nebuchadnezzar (Dan. v. 2, 23); who so likely to refer to the prophecy of Jeremiah (Dan. ix. 2); who so likely to bewail the stubbornness of the people, and their rejection of the Prophets (Dan. ix. 5–8); who so likely to possess the text of Cyrus's decree, to know and record the name of the treasurer (Dan. i. 3, 11); and to name Zerubbabel by his Chaldee name (Dan. i. 7)? Add to this, that Ezra i. exactly supplies the unaccountable gap between Dan. ix. and x. [EZRA], and may we not conclude with some confidence that as Jeremiah wrote the closing portion of the Book of Kings, so did Daniel write the corresponding portion in Chronicles, and down to the end of Ezra i.? Ezra perhaps brought this with him from Babylon, and made use of it to carry on the Jewish history from the point where the old Chronicles failed him.

[A. C. H.]

On many of the points considered in the previous paragraphs there is tolerable unanimity of opinion. It is otherwise with the questions of date, authorship, and trustworthiness.

IV. *Date and Authorship.*—Critics are unanimous upon one point only, viz. that the Chronicler lived after the Babylonian exile (2 Ch. xxxvi. 20–23), but how soon or how late after that event must be declared difficult to determine. Evidence is indeed adduced which is thought to point to a definite and *late* date. (*a*) The use of the word "daric" (אַדַּרְכֹנִים, 1 Ch. xxix. 7, R.V.; "drams," A.V. The word occurs again in Ezra viii. 27, and under the form דַּרְכְּמוֹן in Ezra ii. 69; Neh. vii. 70–72) in the history of David is affirmed to prove composition late in, or even after, the Persian period when the coin had been long in circulation. (*b*) A comparison between 1 Ch. ix. 1–34 and Neh. xi. 1–19 is thought to indicate that the time when Nehemiah was Tirshatha (*i.e.* B.C. 445) had long been passed. (*c*) The genealogy in 1 Ch. iii. 17–24 is considered to extend to the *eleventh* generation after Zerubbabel. (*d*) The title "king of Persia" applied to Cyrus (2 Ch. xxxvi. 22) is thought to be an explanatory title, not appropriate in the Persian period but in the Greek which followed it, when it was more necessary thus to distinguish him. But these indications of date, severally or cumulatively, hardly warrant positive deductions of a *late* date. (*a*) The word is Persian, and its occurrence indicates revision in the days of Persian supremacy, or the introduction into the text of a marginal money-equivalent, nothing more; but, on the other hand, its very occurrence places such revision or insertion at a date preceding the Greek period, when "talents" or "drachms" were in use and might have been expected (cp. 1 Macc. xi. 28; 2 Macc. iv. 19); (*b*) rests too much on one interpretation of a disputed verse (1 Ch. ix. 18), and upon a presumed superfluity of information had not the writer lived long after Nehemiah; (*c*) also depends upon one view of a very disputed passage—others finding *six* generations, and some only *three*—and upon a preference for the LXX. over the Masoretic text;[b] (*d*) this, as a matter of fact, is the only clear indication of date, but that *not* a late one. "King of Persia" is the title given to Cyrus by the cuneiform inscriptions contemporary with the fall of Babylon (CYRUS, p. 691, note *; cp. Schrader, *Keilinschriftl. Bibliothek*, iii. 2 Hälfte, pp. 130–1). Moreover, in the Books "Chronicles to Nehemiah" there is no absolute uniformity of designation for the kings. Cyrus and Artaxerxes are called "king of Babylon" (Ezra v. 13; Neh. xiii. 6) as well as "king of Persia;" and often the longer title is replaced by the simpler, "the king." Such variations, interesting in themselves, do but exhibit a faithful reproduction of any original memoirs before the composer or reviser.

It is, therefore, hardly possible to speak positively as to a *late* date if the indications (*a*) to (*c*) only are available, and if (*d*) be opposed to such an inference. Something more is needed; and therefore connected with the date is the question: Does "Chronicles" form one work with "Ezra-Nehemiah" written by Ezra; or, are "Chronicles, Ezra, Nehemiah" to be taken as one work, emanating from neither Ezra nor Nehemiah, but from some (otherwise) unknown writer, who had before him documents relative to the periods before and after the Exile, and sources incorporated into the works which bear those honoured names?

The former used to be the almost universally-received opinion. It rests upon the tradition of

[b] For an explanation of Zerubbabel's genealogy in 1 Ch. iii., see *Geneal. of our Lord*, by Lord A. Hervey, p. 97 sq. But even if this explanation is not accepted, there is no difficulty. The hand which added Neh. xii. 10, 11, 22, 23, might equally have added 1 Ch. iii. 22–24.—[A. C. H.]

the Jews,[c] and is still held by many scholars of repute. Of late years, however, the latter opinion has been steadily gaining ground. Undoubtedly there runs through the three Books a similarity of style and sentiment, and the characteristic use of materials and sources noted in § III. with reference to Chronicles is continued in the other Books (Keil, Movers, and Bertheau[2]). These and other facts therefore suggest a modification of the first opinion. The materials for "Chronicles" may well have been collected, and in part "written" by Ezra; but, later on, somewhere about the second half of the 4th century B.C. (cp. 1 Ch. iii. 18, &c.), the several Books of "Chronicles, Ezra, and Nehemiah" were revised and assumed their *present* form. The unknown reviser may have been a Levite with considerable musical likings. Most events are estimated from a Levitical point of view, and the writer had before him the Pentateuch in its complete and canonical form. Why or wherefore the compilers of the Hebrew Canon again separated these Books, and placed Chronicles *after* Ezra and Nehemiah in the Ketubim, has not been—*pace* those who have attempted it (*e.g.* Merx, p. 38; Kuenen, pp. 183–4)—satisfactorily explained.

V. *Trustworthiness.* — Does this conclusion militate against the trustworthiness and authenticity of the whole, or of its component parts? In this article the question has to be answered principally as it affects the "Books of Chronicles." Critics, who assign a *late* date to the work, affirm that the composer or reviser has presented a picture of pre-exilic history entirely coloured by the Judaism of his own post-exilic time. His object was to present to his contemporaries a mirror in which they might see reflected for their own edification the blessing of a religiousness ordered after strict Levitical models, and the punishment for deviation from it. The older records have therefore been purposely altered, and the story brought into conformity with the convictions and necessities of the writer's own time, so that the reader has not a true description of the earlier periods of Biblical history, but one to which have been transferred elements of a very much later date. Criticism of the Books conducted from this point of view compels those who maintain it to describe as unhistorical and untrustworthy (*a*) the sections in which parallels can be instituted between "Chronicles" and "Samuel and Kings," and (*b*) the sections in which the former is independent of the latter. Under this discipline such parallel accounts (*e.g.*) as those connected with the transfer of the Ark (2 Sam. vi. and 1 Ch. xiii.–xvi.), the numbering of Israel (2 Sam. xxiv. and 1 Ch. xxi.), the dedication of the Temple (1 K. iii. and 2 Ch. i.), Athaliah (2 K. xi. and 2 Ch. xxiii.), and the reformation of Josiah (2 K. xxiii. and 2 Ch. xxxiv.) are described as deliberately mutilated, widely differing, directly contradictory, intentionally distorted, or purposely invented; while the independent sections cannot be, in the main, considered historical on account of the fabulous character of the numbers, of statements considered psychologically and even doctrinally improbable (*e.g.* the repentance of Manasseh, 2 Ch. xxxiii.), and of the transference of late ideas to early periods. An examination of such criticisms would be beyond the province of this article, and belongs more appropriately to special Introductions and Commentaries. It is enough here to state that a dispassionate study of the Books by no means leads to the conclusions quoted. Critical analysis certainly renders clear a large and independent usage of documents by the compiler, but with an eclectic and, in that sense, idealising purpose, rather than with an intention which it is extremely difficult to distinguish from deception. Critics who do not limit almost exclusively the sources used by the compiler to the Canonical Books of Samuel and Kings in their present or in subsidiary forms, and are not fettered by the conclusion that (*e.g.*) the Chronicler's description of the Temple, the preparation for it, its after-cultus and official personages in the times of David, &c., were unknown till long after the Exile, cannot admit what is antecedently most improbable and is not accepted by some of the best scholars of the day. They can readily accept differences and modifications of events recorded; the expansion of speeches delivered by king, prophet, or priest; and the use of a syntax and vocabulary even dogmatically peculiar, without losing faith in the general trustworthiness of the writer, or in the honesty with which he worked.

VI. *Bibliography.*—The views of those who, for various reasons, reject "Chronicles" as untrustworthy are to be found in De Wette (in the earlier, but not in the later, editions of his *Einleitung*), Gramberg (*Die Chron. nach ihrem gesch. Charakter ... geprüft*, 1823), Graf (*Die Gesch. BB. d. A. T.*, 1866), Nöldeke (*Die A Tliche Literatur*, 1868), Wellhausen (*Proleg. to the Hist. of Israel* [pref. W. R. Smith], pp. 171–227; *Proleg. z. Gesch. Isr.*[3] pp. 175–235), Reuss (*Gesch. d. heil. Schriften d. A. T.*, 1881, §§ 420, &c.), and Kuenen-Weber (*Histor.-krit. Einl. in die BB. d. A. T.*, Erster Teil, Zweites Stück, 1890, §§ 28–35). The views of those who, differing in some not unimportant points, yet agree in accepting these Books as trustworthy, are stated by Keil (*Bibl. Comm. üb. das A. T.*, Fünfter Theil), Movers (*Krit. Untersuchungen üb. d. Bibl. Chron.* 1834), Bertheau (*Die BB. d. Chronik*[2]), Dillmann (in Herzog's *RE.*[2] art. "Chronik"), Strack (*Handb. d. theolog. Wissenschaften*,[3] i. 251, &c.), Rawlinson (in *Speaker's Commentary*), Ball (in *Cassell's Commentary*), W. R. Smith (*Encyclop. Britann.*[9] art. "Chronicles"), and Cornely (*Introd. Specialis in Histor. V. T. Libris*, ch. vi., 1887). [F.]

CHRONOLOGY. I. Introduction.—The object of this article is to indicate the present state of Biblical chronology. By this term we understand the technical and historical chronology of the Jews and their ancestors from the earliest times to the close of the New Testament Canon. The technical division must be discussed more fully than the historical, the details of which are treated in other articles. It may

[c] See the passage from the *Baba Bathra* quoted under Canon (p. 503, col. 1). It will be noticed that Ezra is there said to have brought "the genealogies down to his own time," and the words would seem to impose this limit upon his special work. Cp. Merx, *Traditio Rabb. veterrima de libris V.T. ordine atque origine*, p. 55 sq

close with the return from Babylon, the disputed matters of the period following being separately noticed under other heads.

The character of the inquiry may be made clearer by some remarks on the general nature of the subject. Formerly exactness was expected in the determination by the Biblical data of Hebrew chronology. Hence the positive schemes of the older chronologers. Their attitude was unreasonable. The character of the records forbids us to hope for a complete system based on them. The materials for technical chronology being scanty and mainly inferential, we can but raise on them a general structure which cannot be exact, though it may be approximately correct. With historical chronology it is far otherwise. The Bible does not give a complete history of the times to which it refers: in its historical portion it deals with special and detached periods, not connected by the use of an era, nor defined by the record of astronomical observations. The chronological information is therefore not absolutely continuous, nor definite; although, with the evident purpose of forming a connexion between the detached periods, it has sometimes a more continuous character than might have been expected. It might be supposed that the accuracy of the data would compensate in some degree for their scantiness and want of absolute continuity. It is a most important question at the outset whether all these data are original. Some must be, although perhaps not in their original form, but it is not unreasonable to suppose that those which afford a continuous chronology were in some cases added to the original documents. Certainly they were not treated by redactors with the respect shown to the rest of the text. They have suffered from designed alteration as well as from the errors of copyists. Designed alteration of numbers has only been detected in the genealogical lists of Abraham's ancestors in Genesis, in which the nature of the differences of the Hebrew, the Septuagint, and the Samaritan Pentateuch, is such as to indicate separate alteration by design in two of the three records. From this we may draw two inferences. Where three sets of data disagree we cannot be certain that any one is the original, and it is evident that at least two ancient bodies of redactors attached no final authority to the numbers. The object of these alterations has been either to lengthen or to shorten the chronology. With the same purpose alterations may have been made in the prominent large numbers in the Old Testament, which give the reckoning from period to period, as in the case of the 430 years in Ex. xii. 40 (cp. *Speaker's Comm.*, add. n.), where the Septuagint (B. Cp. Swete's ed.) and the Samaritan Version (see Knobel-Dillmann, *l. c.*) either insert a gloss, or preserve a clause dropped out of the Hebrew. Similarly the small numbers may have been altered, when forming part of a series within a period measured elsewhere, or the historical context may have been modified, but of this last there does not seem to be any clear instance. We must therefore carefully weigh independent evidence. In considering the evidence of the New Testament, we must bear in mind that the object of the Apostles was to teach religion, not chronology, and that a new reckoning would have scandalized their hearers. The evidence of the genealogies is an important element. Their weight is not so much injured by the discovery of designed alteration, of which the mention of the second Cainan is the only certain instance, as by the abundant indications of the errors of copyists. Their very nature makes them unsafe guides when unsupported, for a genealogy may be broken without being technically imperfect in the Semitic sense. When there is a general agreement of several contemporary genealogies, confirmed by the continuity of one of them, their evidence is invaluable, but this unfortunately is limited to a single period of disputed reckoning.

The Biblical information cannot, in the present state of criticism, be assumed to be correct in all cases of the periods to which it was formerly assigned. This difficulty will be noticed as it arises.

The discovery of collateral information from the Egyptian and Assyrian records affords a new set of data for Biblical chronology and a new means of testing the Biblical data. If we can fix the Exodus within fifty years on Egyptian evidence, we have an approximative date, and can compare the Hebrew evidence bearing on the same date. This is equally the case with the exact or approximative determination of some dates in later chronology by means of the Assyrian Eponym Canon.

II. TECHNICAL CHRONOLOGY.—The technical part of Hebrew chronology presents great difficulties. The Biblical information is, as already indicated, mainly inferential, but in many cases positive inferences may be drawn from it. Thus the exact character of every ordinary year cannot be fixed, but the general or mean character of the year may be determined. In this section we may use with more than ordinary confidence the Rabbinical information. The writers who afford it could scarcely be ill-informed in such matters. They lived near the times at which all the Jewish observances connected with the calendar were strictly observed in the country for which they were framed, and it has not been shown that they had any motive for misrepresentation. We can, however, make no good use of our materials if we do not know what character to expect in Hebrew technical chronology. There is no reason to look for any great change, either in the way of advance or decline, although it seems probable that the patriarchal division of time was somewhat ruder than that established in connexion with the Law, and that after the time of Moses until the establishment of the kingdom but little attention was paid to science. In endeavouring to ascertain how much scientific knowledge the patriarchs and their descendants are likely to have had, we must not expect the accuracy of modern science or the inaccuracy of modern ignorance. As to scientific knowledge necessary for the calendar, particularly that of astronomy, the cases of the Egyptians and the Babylonians and Assyrians afford us the highest level the Hebrews could have attained. The Hebrews, however, we must remember, had not the same advantage of being wholly settled, nor the same inducements derived from national religions connected with the heavenly bodies. The Arabs of the desert, from somewhat before the time of Mohammad—that is, so far as our knowledge of

them in this respect extends—to the present day, afford the best parallel. They have never been a mathematical people, nor given to chronological computation depending on astronomy, but have regulated their calendar by observation alone. It might have been expected that their observations would, from their constant recurrence, have acquired an extraordinary delicacy, and have gradually given place to computations; but this was not the case, and those observations are not now more accurate than the earlier ones must have been, nor has computation taken their place except by the publication of calendars of no strict legal authority. The same characteristics probably marked the scientific knowledge and practice of the Hebrews. We have no reason for supposing that they had attained, either by discovery or by the instruction of foreigners, to a high degree of mathematical knowledge or accuracy of chronological reckoning, at any period of their history. Probably they were always far below the Egyptians and the Babylonians and Assyrians. But there is sufficient evidence that they were not inattentive observers of the heavens in the allusions to stars and constellations as well-known objects sometimes connected with terrestrial seasons. We may therefore expect, in the case of the Hebrews, that wherever observation could take the place of computation it would be used, and that it would be but moderately accurate. If, for instance, as among the Muslims generally, a new moon were to be observed at any town, it would be known within two days when it might be first seen, and one of the clearest-sighted men of the place would ascend an eminence on the first of those days, to look for it. This would be done for centuries without any close average for computation being obtained, as the observations would not be kept on record. So too with star-risings and the equinoxes. These probable conclusions as to the importance of observation and its degree of accuracy must be kept in view throughout this section.

Before noticing the usual divisions of time we must discuss genealogies and generations.

Referring the reader to the article GENEALOGY for a fuller statement of the subject, it is only necessary here to speak of the Hebrew genealogies in their relation to chronology, with a view to determining their use. In spite of their importance to the people and the great attention bestowed upon them, the Hebrew lists are seen on a short examination not to be strictly genealogical, but lines of inheritance. Thus it is natural that they should sometimes be broken without being imperfect: a line could be carried up to a certain point, and then the remote founder of the family placed at the head, or the same could be done in the descending order. Looking a little more closely into the documents, we observe countries and tribes treated as individuals. Thus in the table of Gen. x. by the side of the names of individuals we have Mizraim in the dual for the double land of Egypt, or Mizrim "the Egyptians," for this is a mere question of the vowel-points, as the parent of "sons" each one of whom is a people named in the plural. The use of the terms of relationship is much broader in Semitic than in Aryan languages. A man may be the father of a remote descendant or even of a town; a son may be a remote descendant, a disciple, or even an inhabitant of a town. In the genealogies we do not find the broader uses after the division of the Promised Land save in cases where they could not confuse the line. The cause seems obvious: the descents became of the greatest importance to inheritance in the later period; in the earlier, the indication of a tribe would serve as well as a continuous list. Thus after the division of the land we may infer that there is not any break in a particular line of descent, except where the links dropped were perfectly well known. We may therefore separate the genealogies into two classes at the point of the division of the land. The earlier are probably in some cases of individuals only, but it cannot be proved that any one of them is absolutely complete. The most important, the pedigree of the nation, separates at Jacob. The lines of every one of his sons seem to be incomplete for the age of the sojourn. Neither the genealogy from Levi to Moses and his sons nor any parallel list, except the line of Joshua in its present form, can be reconciled with the term assigned to the sojourn in the Hebrew text, nor even with the shorter term of the Septuagint and Samaritan; nor again with the increase indicated by the statements of the number at the Exodus and the accordant numbers of the two censuses twice in the wilderness. Thus the chronological use of the genealogies begins with the division of the land. What that use is has been defined by the following canon: "What seems necessary to make them trustworthy measures of time is, either that they should have special internal marks of being complete, such as where the mother as well as the father is named, or some historical circumstance defines the several relationships, or that there should be several genealogies, all giving the same number of generations within the same termini." [GENEALOGY.] The second part of this canon, however, will only apply to portions of genealogies before the division of Canaan, notwithstanding their general agreement in the number of generations between Jacob and that period. This seems at first sight enough to make us distrust the use of genealogies altogether, but it must be remembered, that according to the view before expressed, which the historical character of the narrative seems absolutely to require, the use of genealogies to designate tribes and families ends, and the strict use of descents begins, exactly where the conditions of the nation render it necessary.

There is no distinct use in the Bible of generations as divisions of time, according to the method of Herodotus. Some indeed suppose that דּוֹר in Gen. xv. 16 is so used, holding it to mean an interval of 100 years (see Dillmann[3]), as it would do if it were a period of time corresponding to the fourth part of the 400 years of v. 13; but a century as the length of a generation nowhere appears in the lists. Probably the original use of the term in question is the period of the lives of a generation of men, and thus a century. The period from birth to birth is somewhat over thirty years, or three to a century. We observe this in the case of Joseph's descendants (Gen. l. 22, 23). It is noteworthy that almost all the numbers assigned to generations in the Hebrew text from Adam to Terah are

divisible by the ordinary estimate of a generation or are of that length, and that the longer generations of the Septuagint and the lengths of the lives in both text and Version are divisible by about the same term. [GENERATION.]

There is no evidence that the Hebrews had any division of time below the hour: with this we begin the inquiry into definite divisions of time.

Hour.—The hour is supposed to be mentioned in Daniel (iii. 6, 15; iv. 16, 30—A. V. 19, 33; v. 5), but in no one of these cases is it certain that a definite period of time is intended by שָׁעָה, שַׁעְתָּא, Chald. (see MV.[11]). The Egyptians divided the day and the night into hours like ourselves, from at least B.C. 1200 (see Lepsius, *Chronologie der Aeg.* i. p. 230). Probably therefore the Hebrews were acquainted with the hour from an early period, at least during the sojourn in Egypt. "The sun-dial of Ahaz" implies some division of the kind. In the N. T. we have the same division as the modern, the hours being reckoned from the beginning of the Jewish night and day. [HOURS.]

Day.—For the civil day of twenty-four hours we find in one place (Dan. viii. 14) the term עֶרֶב בֹּקֶר, "evening-morning," LXX. *νυχθήμερον* (also in 2 Cor. xi. 25, "a night and a day"). The A. V. renders עַד עֶרֶב בֹּקֶר אַלְפַּיִם וּשְׁלֹשׁ מֵאוֹת "unto two thousand and three hundred nights and days;" the R. V. prefers "evenings and mornings." The day is similarly described in Gen. i. as consisting of day and night in the natural sense, and each day of evening and morning in the civil sense, the word day יוֹם being then extended over the twenty-four hours. This word יוֹם is used in both senses elsewhere in the O. T., the natural day sometimes needing distinction to avoid vagueness, "three days and three nights" (Jon. ii. 1, E. V. i. 17; cp. Matt. xii. 40). The civil day began with night, as might perhaps be inferred from the use in Gen. i. In the passages last cited day perhaps necessarily comes first. The night, לַיִל, and thus the civil day, is generally held to have begun at sunset. Ideler, however, while admitting that this point of time was that of the beginning of the civil day among all nations who used a lunar reckoning, questions whether this was the practice of the Jews. He argues in favour of the beginning of deep night, reasoning that, for instance, in the ordaining of the Day of Atonement, on the tenth day of the seventh month, it is said, "in the ninth [day] of the month at even, from even unto even, shall ye celebrate (*lit.* rest) your Sabbath" (Lev. xxiii. 32). Here, if the civil day began at sunset, it would have been said that the observance should begin on the evening of the *tenth* day, or merely on that day, so that the word "evening," עֶרֶב, would mean the latter part of the afternoon. He cites, as probably supporting his view, the expression בֵּין הָעַרְבַּיִם, "between the two evenings," used of the time of offering the Passover and the daily evening-sacrifice (Ex. xii. 6; Num. ix. 3, xxviii. 4). The Pharisees, whom the present Jews follow, took it to be the time between the ninth and eleventh hours of the day, or our 3 and 5 P.M., but the Samaritans and Karaites supposed it to be the time between sunset and full darkness, particularly on account of the phrase בְּבוֹא הַשֶּׁמֶשׁ, "when the sun is setting," used in a parallel passage (Deut. xvi. 6; see Ideler, *Handbuch*, i. 482–4). From these passages we must infer that the time "between the two evenings" preceded the beginning of the civil day; that this day may have begun after sunset; but that, if the Samaritans and Karaites are right, it began with dark night. On the other hand, the term "between the two evenings" can scarcely be supposed to have originally indicated a long period: a special short period, not a point, the time of sunset, is shown to correspond to it. This is a natural division between the late afternoon when the sun is low, and the evening when his light has not wholly disappeared, the two evenings into which the natural evening would be cut by the commencement of the civil day, if it began at sunset. By this theory the two evenings would be the respective halves of the evening belonging to the ending and the beginning day. This is an early view, probably preserving the oldest, which ritualistic scruples would naturally have changed so as to extend the time. There is no difficulty in the command that the observance of so solemn a day as the Day of Atonement should commence somewhat before the true beginning of the civil day, for due preparation could thus be made for the sacrifices. It may be added that in Judaea, where the duration of twilight is very short, the most natural division of the day would be at sunset. Where there is a long twilight, nightfall acquires special importance.—The natural day, יוֹם (also used for the civil day), probably began at sunrise, unless the day was divided into hours, morning-twilight being included in the last watch of the night, according to the old division into three watches, as well as the new into four: some, however, made the morning-watch part of the day, in consonance with the supposed beginning of the civil day at nightfall.

Four natural periods, smaller than the civil day, are mentioned: these are עֶרֶב, evening, בֹּקֶר, morning, both frequently occurring, and the less usual צָהֳרַיִם, "the two lights," as though "double light," noon, or better noontide, and חֲצוֹת הַלַּיְלָה or —חֲצִי "half the night," midnight. Recollecting that the Hebrews were not an astronomical people, we may suppose that evening and morning were indefinite, and noontide and midnight much shorter periods rather than points of time.

The night was divided into watches, אַשְׁמֹרוֹת, sing. אַשְׁמֻרָה. In the O. T. two are expressly mentioned, and we can thus infer the existence of a third, the first watch of the night. The "beginning of the watches" רֹאשׁ אַשְׁמֹרוֹת (Lam. ii. 19) probably refers to the first watch, without absolutely designating it. The middle watch, הָאַשְׁמֻרֶת הַתִּיכוֹנָה, occurs in Judg. vii. 19, where the connexion of watches with military affairs is shown: "And Gideon and the hundred men that were with him came unto the outermost part of the camp in the beginning of the middle watch, when they had

but newly set the watch" (הַשְׁמִרִים; R. V.). The morning-watch, אַשְׁמֹרֶת הַבֹּקֶר, is mentioned in Ex. xiv. 24, in the narrative of the passage of the Red Sea, and in 1 Sam. xi. 11, in that of Saul's surprise of the Ammonites, when he relieved Jabesh-gilead. Some Rabbins held that there were four watches (Ideler, *Hdb.* i. p. 486). In the N. T. four night-watches are mentioned, which were probably adopted from the Romans in modification of the old system. All four occur together in Mark xiii. 35: *ὀψέ*, the "evening" watch; *μεσονύκτιον*, midnight; *ἀλεκτροφωνία*, the cock-crowing; and *πρωΐ*, the "morning" watch. [DAY; NIGHT; WATCHES OF NIGHT.]

Decad (עָשׂוֹר, *δεκάς*).—The Hebrews used the same term for a period of ten days (Gen. xxiv. 55) and for the last day of a decad, the tenth day of the month (Ex. xii. 5; Lev. xvi. 29). Dillmann, who refers to Ewald (*Alterthümer*,[2] p. 132), has collected instances of these two uses, and compared the Egyptian decad or third of the month (*Ueber das Kalendarwesen der Israeliten vor dem babylonische Exil: Monatsberichte Berl. Akad.* 1881, pp. 930, 931). Until we know more of the Canaanite calendar, we cannot here draw any inference of origin. See what is said below of Months and MONTH (separate art.).

Week (שָׁבוּעַ, a hebdomad).—The Hebrew week was a period of seven days ending with the Sabbath. It therefore could not have been a division of the month, which was strictly lunar, without an intercalary day or days; for the Sabbath was every seventh day, and weeks were counted on without any break. The mention together of Sabbaths and new-moons merely proves a similarity of observance of the day which closed the week and that which opened the month. The week of the ancients was of two kinds, a period of seven days or a quarter of the month. The week of seven days was the Semitic form. It was used with the Sabbath from remote times in Chaldaea, and was probably of Cushite origin. The Egyptians, however, were without the week, although they had a monthly and half-monthly festival. No doubt their lunar year was marked by the observance of the new and full moon of each lunation. The civil or vague year had twelve months of thirty days each, and at its close five epagunenae. Each month was divided into three decades, of which there were thirty-six in the year, which appears to have closed with a half-decade (Lepsius, *Chronologie der Aegypter*, p. 131 sq.; cp. p. 97). The Hebrew week therefore cannot have been adopted from Egypt: week and Sabbath alike were preserved from the patriarchal times. The days of the week, save the Sabbath, appear to have been unnamed. The mode of speaking of them is indicated in Gen. i. In Syriac the words ܫܒܥܐ, "seven days," equivalent to the Hebrew שָׁבוּעַ, a hebdomad, are superseded by the use of ܫܒܬܐ, &c., Sabbath, the Hebrew, שַׁבָּת, in the sense of week. The days are numbered ܚܕ ܫܒܬܐ, the first (day) of the week, ܩܕܡ ܫܒܬܐ, and so forth, Friday having the special name ܥܪܘܬܐ, "preparation (day)," *παρασκευή*, and the Sabbath ܫܒܬܐ. Thus *σάββατον*, "Sabbath," also signifies "week" in the N. T., and we find *μία σαββάτων*, followed by the Fathers (*μία, δευτέρα, . . . τῶν σαββάτων*), where the plural is difficult to account for.

Month (חֹדֶשׁ יָמִים, חֹדֶשׁ יָרֵחַ).—The earliest mention of months in the Bible is in the narrative of the Flood. These would seem to have been of 30 days each, the sum of 150 days apparently reaching from the seventeenth day of the second month (Gen. viii. 11) to the seventeenth of the seventh month. If the months were lunar, alternately of twenty-nine and thirty days, the sum would be a little deficient. Ewald has ingeniously conjectured that the year was lunar, comparing the date 2 m. 17 d. of one year with 2 m. 27 d. of the next (viii. 4), which including both limits gives a sum of 365 days, or a solar year; a period which, if the lunar year began about the autumnal equinox, would begin with the rainy season (Ewald, *Jahrb. d. bibl. Wissenschaft*, t. vii. p. 9, *ap.* Fr. Lenormant, *Les Origines*, i. 2nd ed., pp. 411, 412). It must be remembered, however, that there are positive indications of the use of the Chaldaeo-Babylonian year of 360 days in prophetic passages, and this year is more probably here intended. That the months from the Exodus, when the calendar appears to have been founded, or at least the beginning of the year changed, until the time of the Second Temple, when we have absolute knowledge of their character, were always lunar, appears from the command to observe new-moons, and from the unlikelihood of any change in the calendar. These lunar months have been supposed to have been always alternately of 29 and 30 days. Their average length would of course be a lunation, or a little (44 min.) over 29½ days, and therefore they would in general be alternately of 29 and 30 days; but if, as is highly probable, the beginning of each was strictly determined by observation, occasionally months might irregularly occur of 29 and 30 days. That observation was employed for this purpose is distinctly stated in the Babylonian Talmud of the practice of the time, when, however, a month was not allowed to be less than 29 days in length or more than 30. The first day of the month is called חֹדֶשׁ, "new moon;" LXX. *νεομηνία*. In speaking of the first day of a month a numeral was sometimes added to this word, as בַּחֹדֶשׁ הַשְּׁלִישִׁי . . . . בְּיוֹם הַזֶּה, "on the third new-moon . . . . on that day" (LXX. *τοῦ δὲ μηνὸς τοῦ τρίτου . . . τῇ ἡμέρᾳ ταύτῃ*; Ex. xix. 1). Thus the word came to mean "month," though in this sense it was sometimes qualified as חֹדֶשׁ יָמִים. The new-moon was kept as a sacred festival. [FESTIVALS.] In the Pentateuch, Joshua, Judges, and Ruth we find but one month mentioned by a special name, the rest being called according to their order. The month with a special name is the first חֹדֶשׁ הָאָבִיב (LXX. *μὴν τῶν νέων*), "the month of the Abib," "ears of corn," when the ears of corn were so forward that on the sixteenth day,

the second day of the Feast of Unleavened Bread, ripe ears, אָבִיב, could be offered (Lev. ii. 14; xxiii. 10, 11, 14). The similarity in sound of the name of the Egyptian eleventh month, in the Graeco-Egyptian form Epiphi, the Coptic ⲉⲡⲏⲡ, ⲉⲡⲏϕ, ⲉⲡⲏⲡⲓ, has suggested the derivation of the Hebrew Abib from this source, and has led to chronological inquiry as to the possible derivation of the Hebrew calendar from the Egyptian. The Egyptian name is derived from the tutelary divinity of the month Apet or Apet-heb (Brugsch, *Matériaux pour servir à la reconstruction du Calendrier des anc. Ég.* p. 53, pl. i.); and the original form was probably Pa-apet, whence Epiphi, as Apapus from Pepi. The interchange of the Egyptian letter *p* with the Hebrew ב is unlikely, and the Egyptian word does not offer any like sense so far as is known. Thus the idea of a derivation of the name from Egypt seems unlikely. In 1 K. three other names of months occur: Ziv, זִו, the second; אֵיתָנִים, the seventh; and בּוּל, the eighth. The sense of all these appears to be in relation to the seasons. The name of the second is the month *of* "blossom;" the seventh, which, like the first, takes the article, the month of "constant streams;" and that of the eighth the month of "rain." The time of blossom is true of Egypt and Palestine; that of constant streams, of Egypt, and not of Palestine; that of rain, of the Delta, and not of Palestine. It should be remarked that, rare as rain is south of the Delta, it falls in the Delta from October to March. The most rainy months are November and December. In the absence of meteorological observations made in the neighbourhood of Goshen, we cannot speak more precisely, but the indications are sufficient to justify the supposition that Bul, like the other three months named after the seasons, was named during the sojourn in Egypt. The very moderate rains of the Delta would give a sufficient characteristic, if each month was named from natural conditions. Of those names two, Bul and Ethanim (בל, אתנם), are found in the Phoenician inscriptions (MV.[11] s. nn.), and it has therefore been inferred that the Hebrews borrowed them from the usage of the country. These were solar months of thirty days, probably of a year of 365, which would agree with the use of the decad (Dillmann, *Ueber das Kalenderwesen der Israeliten: Monatsber. Berl. Akad.* p. 925 sq.). The origin cannot yet be determined. If the indications pointed to Egypt, the Canaanite calendar might have been framed in the Delta during the Hyksos-age: if they pointed to Canaan, the origin would be there localised. In the Books of the Bible written after the return from Babylon, the later nomenclature of the months, still in use, appears. It is almost identical with that of the Babylonians at the same period, and the origin affirmed by the Jews themselves is thus confirmed. [MONTHS.]

Year (שָׁנָה).—It has been noticed in the last section that the months used in the narrative of the Flood seem best to accord with the Chaldaeo-Babylonian year of 360 days, which is certainly used in prophetical passages in both Testaments. The time, times, and a half, of Daniel (vii. 25, xii. 7), where "time" means "year" (cp. xi. 13), cannot be doubted to be expressions equivalent to the 42 months of the Revelation (xi. 2, xiii. 5), and the 1260 days of the same Book (xi. 3, xii. 6) for $360 \times 3\frac{1}{2} = 1260$, and $30 \times 42 = 1260$. Whether the year thus employed is a year of days or a year of years, it is clear that we have here an indication of the use of the Chaldaean year of 360 days; and this, combined with the notices of time in the narrative of the Flood, leaves little doubt that the patriarchal year was of this duration, and was brought from Chaldaea by the Hebrews. In historical passages from the date of the Exodus downwards the year is lunar. Was the change made in Egypt, and at the time of the Exodus? At that time the Egyptians had three forms of year, the lunar year of 354 days, the vague year of 365, and the supposed sidereal year of $365\frac{1}{4}$. The account of the institution of the Passover may imply the institution of the calendar, but it may merely indicate the change of the beginning of the year (Ex. xii. 2); and as the Hebrews in after-times had two beginnings to the year, this is the more probable view. If so, we may reasonably conjecture that the rude lunar year of 360 days was abandoned during the sojourn under Egyptian influence for the fairly accurate lunar year of 354 days.—The characteristics of the year from the Exodus downwards can be clearly determined, though we cannot absolutely fix those of any single year. There can be no doubt that it was essentially tropical, as certain observances connected with the produce of the land were fixed to particular days. It is equally clear that the months were lunar, each beginning with a new moon. It would appear therefore that there must have been some mode of adjustment. To ascertain what this was, it is necessary first to decide when the year began. On the 16th day of the month Abib, as already mentioned, ripe ears of corn were to be offered as "the first of the first-fruits" of the harvest (Lev. ii. 14; xxiii. 10, 11). The reaping of the barley began the harvest (2 Sam. xxi. 9), the wheat following (Ruth ii. 23). Josephus states that the offering was of barley (*Ant.* iii. 10, § 5). It is therefore necessary to find when the barley becomes ripe in Palestine. According to the observation of travellers, the barley is ripe, in the warmest parts of the country, in the first days of April. The barley-harvest therefore begins about half a month after the vernal equinox, so that the year would begin at about that tropical point were it not divided into lunar months. We may conclude that the nearest new moon about or after the equinox, but not much before, would be chosen as the beginning of the year. Ideler, whom we have thus far followed on this question, concludes that the right new-moon was found by observation of the forwardness of the barley-crops in the warmer districts of the country (*Handbuch*, i. p. 490). There is however this difficulty, that the different times of barley-harvest in various parts would have been likely to cause confusion. It seems therefore possible that the Hebrews adopted the surer means of determining their new-year's day by observations of heliacal risings or similar stellar phenomena, known to mark the right time before

the barley-harvest. Certainly the ancient Egyptians and the Arabs used such means. The method of intercalation can only have been that which obtained after the Captivity, the addition of a thirteenth month, whenever the twelfth ended too long before the vernal equinox for the first-fruits of the harvest to be offered in the middle of the month following, and the similar offerings at the times appointed This method would be in accordance with the postponement of the celebration of the Passover, in the case of any one who was legally unclean, or journeying at a distance, for a whole month to the fourteenth day of the second month (Num. ix. 9–13), of which law we find Hezekiah availed himself for both the reasons allowed, because the priests were not sufficiently sanctified, and the people were not collected (2 Ch. xxx. 1–5, 15).

The later Jews had two beginnings to the year, or, as it is commonly but somewhat inaccurately said, two years. At the time of the second Temple, as Ideler admits, these two beginnings obtained, the seventh month of the civil reckoning being Abib, the first of the sacred. Hence it has been held, as already stated, that the institution at the time of the Exodus was merely a change of commencement, and not the introduction of a new year; and also that from this time there were two beginnings. The former opinion is at present hypothetical, and has been too much mixed up with the latter, for which there is some evidence. The strongest point in this evidence, although strangely unnoticed by Ideler as such, is the circumstance that the sabbatical and jubilee years began in the seventh month. That the jubilee year began in this month is distinctly stated, since its solemn proclamation was on the tenth day of the seventh month, the Day of Atonement (Lev. xxv. 9, 10); and as this year immediately followed a sabbatical year, that year must have begun in the same manner. As these were whole years, they must have begun on the first day of the month, the Day of Atonement standing in the same relation to the defining of the jubilee year, and perhaps to those of the sabbatical and civil years, as did the Passover to the sacred beginning, unless indeed the Feast of Ingathering took its place. It is clear that the civil reckoning would be most convenient, if not necessary, for the commencement of single years of total cessation from the labours of the field, as each year so beginning would comprise the whole round of field-labour from seed-time to harvest, and from harvest to vintage and ingathering of fruit. This is indeed plain from the injunction as to both sabbatical and jubilee years, apart from the mention of the Day of Atonement, unless we suppose, very unreasonably, that the injunction follows the order of the seasons of agriculture, but that the observance did not. It might seem at first sight that the seventh month was chosen, as itself of a kind of sabbatical character; but the seventh of twelve months would not be analogous to every seventh year. We can therefore come to no other conclusion but that for the labours of agriculture the year was held to begin with the seventh month, while the months were still counted from the sacred beginning in Abib. There are two expressions used with respect to the time of the celebration of the Feast of Ingathering on the fifteenth day of the seventh month, one of which leads to the conclusion at which we have just arrived, while the other is in accordance with it. The first of these speaks of this feast as בְּצֵאת הַשָּׁנָה, "in the going out" or "end of the year" (Ex. xxiii. 16), and the other, as תְּקוּפַת הַשָּׁנָה, "at the change [R. V. "end;" marg. Heb. *revolution*] of the year" (xxxiv. 22); a vague expression, but one consistent with a turning-point of a natural year. By the term תקופה the Rabbins denote the beginning of each of the four seasons into which their year is divided (Ideler, *Hdb.* i. pp. 550–551). Evidence in support of our conclusion is also afforded by the similar distinctive character of the first and seventh months in the calendar with respect to their observances. The one was distinguished by the Feast of Unleavened Bread, from the fifteenth to the twenty-first inclusive; the other, by that of Tabernacles, from the fifteenth to the twenty-second. The parallel is rendered closer by the circumstance that the first-fruits of the harvest were offered on the sixteenth day of the first month; similarly, the Feast of Tabernacles was also called the Feast of Ingathering, as a time of thanksgiving for the fruit-harvest, including the vintage. There is further evidence in the special sanctification, above that of the ordinary new moon, of the first day of the seventh month, which, in the ceremony of blowing trumpets, resembles the celebration of the beginning of the jubilee year on the Day of Atonement. That solemn annual rite seems also more appropriate to the beginning than to the middle of the year. On these grounds we hold that there were two beginnings of the year from the institution of the Calendar. Dr. Dillmann writes of the autumnal beginning of the year rather as a civil use than a calendric one, but he cites with caution the indications of Lev. xxiii. 24, the celebration of the Feast of trumpets, and of xxv. 9, that of the jubilee year (*Ueber der Kalenderwesen*, pp. 919–920). The probable coincidences in the later reigns of Judah with the Babylonian reckoning of Nebuchadnezzar's years, both years from spring (pp. 923–924), do not prove more than a late usage of vassal-kings. The earlier usage may have been of the autumnal beginning (cp. p. 920 sq.).

The question of the two beginnings of the year is somewhat confused by our unacquaintance with such usages. In Egypt, until lately, the Coptic Julian year was used by the Muslims for agricultural purposes, the Muslim lunar year for religious purposes; now the European Gregorian year is fast superseding the Coptic. We may more pointedly compare the beginnings of our civil and ecclesiastical years. [YEAR.]

Seasons.—The ancient Hebrews do not appear to have divided their year into fixed seasons. We find mention of the natural seasons: קַיִץ, "summer," and חֹרֶף, "winter," which are used for the whole year in the expression קַיִץ וְחֹרֶף, "summer and winter" (Ps. lxxiv. 17; Zech. xiv. 8; perhaps Gen. viii. 22). קַיִץ properly means the time of cutting fruits; חֹרֶף, the time of gathering fruits, or autumn. Their true senses are therefore rather summer and autumn than summer and winter. There can be no doubt, however, that they came to signify the two grand natural divisions

of the year, both from their use together, as the two seasons and from the mention together of "the winter house," בֵּית־הַחֹרֶף, and "the summer house," בֵּית־הַקַּיִץ (Amos iii. 15). The last evidence is the stronger, for the winter in Palestine is the time when a palace would be needed of different construction to the light summer pavilion; and in the only other passage in which the winter-house is mentioned, we read that Jehoiakim "sat in the winter-house in the ninth month;" that is, almost at mid-winter: "and [there was a fire] on the hearth burning before him" (Jer. xxxvi. 22). It is probable, however, that חֹרֶף, when used without reference to the year, as in Job xxix. 4, has its original signification. The phrase "cold and heat," קֹר וְחֹם, in Gen. viii. 22, is still more general, and cannot be held to mean more than the great alternations of temperature (cp. Ideler, *Handb.* i. p. 494). There are two agricultural seasons of a more definite character. These are זֶרַע "seed-time," and קָצִיר, "harvest." Ideler (*l. c.*) makes them equivalent to the foregoing seasons when similarly used together; but he has not proved this, and the passage he quotes (Gen. *l. c.*) cannot be held to afford any evidence of the kind, no two terms in it being proved to be strictly correspondent. [SEASONS.]

Festivals and Holy Days.—Besides the sabbaths and new moons, there were four great festivals and a fast in the Hebrew year before the Captivity: the Feast of the Passover, of Weeks, that of Trumpets, the Day of Atonement, and the Feast of Tabernacles. The Feast of the Passover, פֶּסַח, was properly only the time of the sacrifice and eating of the paschal lamb; that is, the evening, בֵּין הָעַרְבַּיִם, "between the two evenings" (Lev. xxiii. 5)—a phrase already considered—of the fourteenth day of the first month, and the night following,—the Feast of Unleavened Bread, חַג הַמַּצּוֹת, beginning on the morning of the fifteenth day of the month, and lasting seven days until the twenty-first inclusive. The fifteenth and twenty-first days of the month were sabbaths; that is, holy days. [PASSOVER.] The Feast of Weeks, חַג שָׁבֻעוֹת, or Pentecost, was kept at the close of seven weeks, counted from the day inclusive following the sixteenth of the first month. Hence its name means "the feast of seven weeks," as indeed it is cited in Tobit, *ἁγία ἑπτὰ ἑβδομάδων* (ii. 1). As the ears of barley, "the first of the first-fruits," were offered on the sixteenth day of the first month, so on this day thanksgiving was made for the blessings of the harvest with its first-fruits in the form of loaves of leavened bread made from the new flour: hence the names חַג הַקָּצִיר, Feast of Harvest, and יוֹם הַבִּכּוּרִים, Day of First-fruits.—The Feast of Trumpets, יוֹם תְּרוּעָה (lit. "of the sound of the trumpet"), also called שַׁבָּתוֹן זִכְרוֹן תְּרוּעָה, "a great sabbath of celebration by the sound of the trumpet," was the first day of the seventh month, the civil beginning of the year. The Day of Atonement, יוֹם הַכִּפֻּרִים, was the tenth day of the seventh month. It was a sabbath, therefore a holy day, and also a fast, the only one in the Hebrew year before the Captivity. Upon this day the high-priest made an offering of atonement for the nation.—The Feast of Tabernacles, חַג הַסֻּכּוֹת, was kept in the seventh month, from the fifteenth to the twenty-second days inclusive. Its chief days were the first and last, which were sabbaths. Its name was taken from the people dwelling in tabernacles, to commemorate the Exodus. It was otherwise called חַג הָאָסִיף, "the Feast of Ingathering," because it was also the occasion of thanksgiving for the end of the fruit-harvest, including the vintage. The small number and simplicity of these primitive Hebrew festivals and holy days are especially worthy of note. It is also observable that they are not of an astronomical character; and that when they are connected with nature it is as times of thanksgiving for the produce of field, garden, and vineyard. In later times several holy days were added. The most noteworthy are the Feast of Purim or "Lots," commemorating the deliverance of the Hebrews from Haman's plot; the Feast of the Dedication, recording the cleansing and dedication of the Temple by Judas Maccabaeus; and fasts on the anniversaries of great national calamities of the age of the Babylonish Captivity. These last were doubtless instituted during that period (cp. Zech. vii. 1–5). [FASTS and FESTIVALS.]

Sabbatical and Jubilee Years.[a]—The Sabbatical Year, שְׁנַת שַׁבָּתוֹן, "the year of entire rest," שְׁנַת הַשְּׁמִטָּה, "the year of remission," or שְׁמִטָּה alone, also called "a sabbath" and "a great sabbath," was an institution of strictly the same character as the sabbath, a year of rest, like the day of rest. As the day of rest has a side of physical necessity with reference to man, so the year has a side of physical necessity with reference to the earth. Every seventh year appears to be a very suitable time for the recurrence of a fallow year, on agricultural grounds. Besides the rest from the labours of the field and vineyard, there was to be in this year remission, temporary or absolute, of debts and obligations among the people. The sabbatical year must have begun at the civil commencement of the year, with the seventh month, as already shown. Although doubtless held to begin with the first day of the month, its beginning appears to have been kept at the Feast of Tabernacles (Deut. xxxi. 10), while that of the jubilee year was kept on the Day of Atonement. After the lapse of seven sabbatical periods, or forty-nine

[a] Those who hold that the whole system of the Sabbatical and Jubilee Years is of late introduction have to explain the occurrence of the principle in relation to the slavery of Hebrews (Ex. xxi. 2), and in the same particular as well as in the remission of debts in Deut. xv. 1–18, documents held to be respectively much earlier, and earlier than the part of the Law in which the more precise definition of the cyclical system is given. It should be borne in mind that if the laws in relation to the Sabbatical system were enforced, the slavery of Hebrews would be of necessity interrupted by the rest of the Sabbatical Year; on the other hand, that if the system were neglected the principle would defend the Hebrews' right. The liberty proclaimed at the beginning of the Jubilee Year has to do with inheritance, the reversion of the land to its former owners, and not with personal liberty. This is seen in the passage relating to the Hebrew hired servant in the Jubilee law (Lev. xxv. 39–41).

years, a year of jubilee was to be kept, immediately following the last sabbatical year. The jubilee year was called שְׁנַת הַיּוֹבֵל, "the year of the trumpet," or יוֹבֵל alone, the latter word meaning either the sound of the trumpet or the instrument itself, because the beginning of the year was to be announced on the Day of Atonement by sound of trumpet. It was similar to the sabbatical year in character, though doubtless yet more important. In the jubilee year debts were to be remitted, lands restored to their former owners, and Hebrew slaves set free. It is obvious from the terms of the enactment in Leviticus (xxv. 8–11) that this year was to follow every seventh sabbatical year, so that the opinion that it was identical with the seventh sabbatical year is untenable. There is a more difficult question as to the length of each jubilee period, some holding the jubilee year to have been intercalary, and the period therefore of fifty years, while others hold the sabbatical periods to have been continuous, the jubilee year beginning a sabbatical period and not standing between two such periods. According to Maimonides, the jubilee period was of fifty years, the fifty-first year beginning a new cycle. The same writer mentions a tradition that after the destruction of the first Temple only sabbatical years, and no jubilee years, were observed (Ideler, *Handbuch*, i. pp. 503, 504). The Jews in the first and second centuries B.C. certainly followed the system of continuous sabbatical periods: the tradition handed down by Maimonides may be an endeavour to explain away this evidence. The testimony of Josephus does not seem conclusive, though Ideler (*l. c.*) holds it to be so: the expression *ταῦτα πεντήκοντα μέν ἐστιν ἔτη τὰ πάντα* (*Ant.* iii. 12, § 3) cannot be held to prove absolutely that the jubilee year was not the first year of a sabbatical period instead of being intercalary.

It is important to ascertain as far as possible when the first sabbatical year after the entrance into Palestine ought to have been kept; whether the sabbatical and jubilee periods seem to have been continuous; and what positive record there is of any sabbatical or jubilee years having been observed. 1. It can scarcely be disputed that the first sabbatical year to be kept after the Israelites had entered Palestine was about the fourteenth (Jennings, *Jewish Antiquities*, bk. iii. cap. 9). It is possible that it might have been somewhat earlier or later; but the narrative will not admit of much latitude. 2. The institution seems to have been greatly neglected. It is said in Leviticus that in the desolation of the land she should enjoy the sabbaths which had not been kept (Lev. xxvi. 34, 35, 43). The seventy years' Captivity is also spoken of in 2 Ch. (xxxvi. 21) in like terms; but this may be on account of the number being itself sabbatical, ten times seven, which indeed seems to be indicated in the passage. In spite of neglect we may infer that any sabbatical and jubilee years kept from the time of Joshua until the destruction of the first Temple, would have been reckoned from the first one, but it may be questioned if any kept after the return from Babylon would be counted in the same manner: from the nature of the institution it is rather to be supposed that the reckoning would begin again after the re-occupation of the country. The recorded sabbatical years do not enable us to determine this problem, because we do not know the exact year of the first cultivation of the country by the returned exiles. The known dates of sabbatical years would make that next after the return to commence B.C. 528, and be current B.C. 527, which would make the first year of the period B.C. 534–3, which would not improbably be the first year of cultivation; but the sabbatical period being so short, this evidence is of little weight. Of course, both dates may be brought down seven years. 3. There is no positive evidence of any jubilee year having been kept. The dates of three sabbatical years have been preserved. These were current B.C. 163, 135, and 37, and therefore commenced about three months earlier, B.C. 164, 136, and 38 (Jos. *Ant.* xii. 9, § 5; xiii. 8, § 1; xiv. 16, § 2; xv. 1, § 2; *B. J.* i. 2, § 4; 1 Macc. vi. 49, 53).—The phrase *ἐν σαββάτῳ δευτεροπρώτῳ* (Luke vi. 1) has been explained as the first sabbath in the second year of the cycle. The year would be A.D. 29; and as the second year of a sabbatical period commenced in the autumn of A.D. 28, the harvest would have fallen in the spring of A.D. 29.

Eras.—There are indications of several historical eras having been used by the Hebrews, but our information is too scanty for any positive conclusions. Some of these possible eras may be merely reckonings employed by writers and not national eras; others from their reference to events of the highest importance to the whole people have the true character of eras, though they may not have had any lasting use. The era of the Seleucidae is here excepted as foreign.

1. The Exodus is used as an era in dating the foundation of Solomon's Temple (1 K. vi. 1). This is the only positive instance of the occurrence of this era. Ideler, indeed, supposes it to be so used in the Pentateuch, referring to Ex. xix. 1; Num. xxxiii. 38 (*Handbuch*, i. p. 507). Here, as elsewhere in the same part of the Bible, the beginning of the Exodus-year (*Regnal years*, &c.) is used as the point whence time is counted; but during the interval of which it formed the natural beginning it cannot be shown to have been an era, though it may have been, any more than the beginning or first year of a sovereign's reign is one. A reference to be conclusive must be after the conquest of Canaan.

2. The foundation of Solomon's Temple is conjectured by Ideler to have been an era (*Handb.* l. c.). The passages to which he refers (1 K. ix. 10; 2 Ch. viii. 1) merely speak of occurrences subsequent to the interval of twenty years occupied in the building of the Temple (seven years, 1 K. vi. 37) and Solomon's house (thirteen years, vii. 1).

3. The era once used by Ezekiel (i. 1, 2), beginning with the reform of Josiah in his eighteenth year.

4. The era of Jehoiachin's captivity is constantly used by Ezekiel. The earliest date is the fifth year (i. 2); and the latest, the twenty-seventh (xxix. 17). The Prophet generally gives the date without applying any distinctive term to the era. He speaks, however, of "the fifth year of king Jehoiachin's captivity" (i. 2), and "the

twelfth year of our captivity" (xxxiii. 21), the latter expression probably explaining his constant use of the era. The same reckoning is necessarily employed, though not as such, where the advancement of Jehoiachin in the thirty-seventh year of his captivity is mentioned (2 K. xxv. 27; Jer. lii. 31). We have no proof that this era was used save by those to whose captivity it referred. The first year was current B.C. 598, beginning in the spring of that year.—The beginning of the seventy years' Captivity does not appear to have been used as an era.—The return from Babylon also does not seem to be so used, though dated from (Ezra iii. 1, 8), like the Exodus in the Pentateuch. Daniel, Haggai, and Zechariah, date by the reigns of foreign kings.

5. The era of the Seleucidae is used in the First and Second Books of Maccabees.

6. The liberation of the Jews from the Syrian yoke B.C. 141 was commemorated by an era used in contracts and agreements (1 Macc. xiii. 41). The years 1 to 5 on the shekels assigned to Simon are probably dated by this era, although it is stated that the right of coining money with his own stamp was not conceded to him until two years later, B.C. 139, by Antiochus VII. (xv. 6). It may be supposed that Antiochus VII. confirmed privileges before granted by his brother Demetrius II. (cp. *v.* 5), or that he gave his sanction to money already issued. [MONEY; SHEKEL.] The era seems to have fallen into disuse.

Regnal Years, &c.—By the Hebrews regnal years appear to have been counted from the beginning of the year in which the king came to the throne, not from his accession. Thus, if a king came to the throne in the last month of one year, reigned through the next year, and died in the first month of the third year, we might have dates of his first, second, and third years, although he did not reign above thirteen or fourteen months. Any dates in the year of his accession before that event would be assigned to the last year of his predecessor, and any in the year of his death after it would be given to his successor's first year. The same principle applies to counting from eras or important events. The whole stated length of reigns and intervals roughly allows for this mode of reckoning.

III. HISTORICAL CHRONOLOGY.—The historical section of Hebrew chronology is not less difficult than the technical. The information in the Bible *is* rather direct than inferential, though there is important inferential evidence; and the present state of the numbers precludes absolute certainty in our deductions. For instance, where the Hebrew and LXX. differ, when we have decided, which we cannot always do, which form of a number has the preponderance of evidence in its favour, we cannot be sure that the original form of the number has been preserved. We may indeed doubt if the text originally contained numbers. There are also several gaps in series of smaller numbers which we cannot supply. When, therefore, we can compare several of these smaller numbers with a larger number, we are frequently prevented from applying a conclusive test by the deficiencies in the detailed series. The frequent occurrence of round numbers is a matter of minor importance, for, although when we have no other evidence, it forbids an exact determination, the variation of a few years cannot be balanced against great and apparently insoluble difficulties, like those of the primeval numbers in the Hebrew, LXX., and Samaritan Pentateuch. Until recently many critics considered that Hebrew chronology was indeterminable before the time of the building of Solomon's Temple. Recently doubts have been thrown on the numbers from that time until the Babylonian Captivity. However much these numbers may have suffered in the attempt to synchronise the lines of Israel and Judah, the theory that they inherently show an artificial system has signally failed. Dr. Adolf Kamphausen has successfully defended the numbers of the reigns of the kings against E. Krey and his followers (*Die Chronologie d. hebräischen Könige*, Bonn, 1883). Some have laid great stress on the frequent occurrence of the number 40, alleging that 40, its division 20 and multiple 80, as well as 70, are vague terms equivalent to "many," so that 40 or 70 years would mean no more than "many years." The number 40 is not always indefinite even when it would specially seem to be so. Thus the 40 years in the wilderness can be divided into two periods:—1. From the Exodus to the sending of the spies about a year and a quarter (1 yr. + 4 m.; Num. ix. 1, x. 11; cp. xiv. 29, 33, showing it was the second year, and xiii. 20, showing the time was about the fifth month Ab), the 40 days of search being included; 2. The time of wandering until the brook Zered was crossed 38 yrs. (Deut. ii. 14): making altogether 39 yrs. 4 m. This accords with the date of 40 yrs. 11 m. 1 d. of the address of Moses after the conquest of Sihon and Og (Deut. i. 3, 4), which was after the crossing of the brook Zered. So again David's reign of 40 years is divided into 7 yrs. 6 m. at Hebron and 33 yrs. in Jerusalem (2 Sam. ii. 11, v. 5; 1 Ch. iii. 4; but 1 K. ii. 11, 7 yrs., omitting the months, and 33). Thus we cannot hold all periods of 40 yrs. (and of course 80) to be vague. Another remarkable instance is the partial confirmation of the second of the three forties into which the life of Moses is divided. The reigns of Ramses II. the great oppressor, and his son the Pharaoh of the Exodus, are admitted to have lasted together about eighty-five years, and the Egyptian evidence shows that as one of the store cities (Ramses) was already built in the fifth year of Ramses II. the oppression had already begun in that year. We have therefore a maximum of 86 years and a minimum of 81, corresponding to the Biblical 80. On the whole it is, however, not possible to account for the numerous instances of 40, 20, and 80, especially where a series of such figures occurs in juxtaposition with another series of precise numbers as in the Book of Judges,[b] except by the hypothesis that the nearest round number is intended, unless indeed 40 mean merely "many" (cp. 1 Sam. xv. 7). It would rather seem as if the nearest round number was sometimes taken, but it does not follow that round numbers must be absolutely vague ones.—In the technical part of

[b] The periods of foreign rule are predominantly precise, so are the judges' periods, excluding those connected with times of rest. The four times of rest are 80 once, 40 three times.

the subject we have shown deference to the early Rabbinical authorities: here we place no reliance upon them. As to divisions of time connected with religious observances, they could scarcely be far wrong, in historical chronology they could hardly be right, their knowledge of foreign sources being limited and inexact. By comparing their later dates with the certain or approximative chronology of the time, we find such inaccuracy that we can scarcely hold they had any traditional information to guide them, unless indeed the true date of the Exodus had been traditionally preserved. Their violent treatment of later chronology may be due to an attempt to harmonise it with the interval from the Exodus, of which the earlier part was in their judgment fixed by a Biblical statement.—There are valuable foreign materials to aid us in discussing Hebrew chronology, principally the contemporary evidence of the Egyptian and Assyrian documents.

Biblical data.—The Biblical information may be examined under the main periods into which it may be separated, beginning with the earliest.

A. First Period, from Adam to Abram's departure from Haran.—All the numerical data for the chronology of this interval are found in two genealogical lists in Genesis, the first from Adam to Noah and his sons (Gen. v. 3 *ad fin.*), and the second from Shem to Abram (xi. 10–26), and in passages in the same Book (vii. 6, 11; viii. 13; ix. 28, 29; xi. 32; xii. 4). The parallel passages in 1 Ch. (i. 1–4, 24–27) and Luke (iii. 34–38) give no numbers. The Hebrew text, the LXX., and the Samaritan Pentateuch greatly differ, as may be seen in the following table, taken from the writer's *Genesis of the*

	Age of each when the next was born.			Years of each after the next was born.			Total length of the life of each.		
	Sept.	Heb.	Sam.	Sept.	Heb.	Sam.	Sept.	Heb.	Sam.
Adam	230	130		700	800		930	...	...
Seth	205	105		707	807		912	...	...
Enos	190	90		715	815		905	...	...
Cainan	170	70		740	840		910	...	...
Mahalaleel	165	65		730	830		895	...	...
Jared	162	...	62	800		785	962	...	847
Enoch	165	65		200	300		365	...	...
Methuselah	187	...	67	(782)	782	653	969	...	720
	167			802					
Lamech	188	182	53	565	595	600	753	777	653
Noah	502	...	...	448	...	...	950	...	...
Shem	100	...	...	500	...	...	600	...	...
	2264	1658	1309	This was "two years after the Flood."					
	2244								
Arphaxad	135	35	...	400	403	303	(535)	(438)	438
Cainan	130			330			(460)		
Salah	130	30	...	330	403	303	(460)	(433)	433
Eber	134	34	...	270	430	...	(404)	(464)	404
Peleg	130	30	...	209	...	109	(339)	(239)	239
Reu	132	32	...	207	...	107	(339)	(239)	239
Serug	130	30	...	200	...	100	(330)	(230)	230
Nahor	79	29	...	129	119	69	(208)	(148)	148
Terah	70	...	...	(135)	(135)	(75)	205	...	145
Abram leaves Haran	75	...	...						
	1145	365	1015						

Earth and of Man[2], with the addition of a various reading, the age of Abram when he left Haran, and parenthetic marks enclosing numbers not stated but obtained by computation from others. The advantage of the method of the table is that it clearly shows the differences and agreements of the three versions of the data. The dots indicate numbers agreeing with the LXX.

There is one difference which may be immediately disposed of, the excess of generations in the LXX. caused by the "second Cainan." The best chronologers are agreed in rejecting him as spurious. Probably his name was first inserted by a copyist in St. Luke's Gospel (iii. 36), and thence transferred to the LXX. [CAINAN.]

A rapid glance at the table shows that the Hebrew is exactly 100 years less than the LXX. in every generation but one before the period for which the longer generations are needed to leave time for the completion of lives before the Flood. In the age following the reduction is alone found in the Heb., the Sam. agreeing with the LXX. In the lengths of lives the Heb. and Sam. reduce the fourth, fifth, and sixth after Shem by 100 years, which is inconsistent with the lengths of the generations in the Sam. which remain unchanged.—In the Heb. the life of Lamech is apparently shortened to avoid the Flood; so also is the LXX., the numbers differing. In the Sam. the lives of Jared, Methuselah, and Lamech are all curtailed from the agreeing or nearly agreeing numbers of Heb. and LXX., and all three patriarchs die in the year of the Flood. In all Versions the generation of Noah is greatly in excess of the others, of course far more so in the Heb. and Sam. than in the LXX. Otherwise, if the generation were normal, several of Noah's ancestors, in the case of the Sam. every one, would have survived the Flood.—The proportion of generations to lives is fairly normal in the LXX.; in the Heb. less by a century, except where the LXX. numbers are rendered necessary

by the Flood and one other instance. The Sam. is inconsistent.

There can be no question that the LXX. gives the most satisfactory version of the data, but there are inherent difficulties. 1. The apparent reduction of the life of Lamech. 2. The apparent lengthening of the life of Noah. 3. The shortness of the lives of Peleg, Reu, and Serug, while the generations remain the same, though this is not sufficient to make the generations absolutely abnormal. Supposing that these difficulties may be explained, we find an improbability in the numbers themselves. These are hundreds and thirty and multiples of thirty, usually with a small excess, irregularities beginning with the generation which if shorter would leave the residue of the life to overlap the Flood (Methuselah's). The second figure is 3, 0, 9, 6, in twelve out of fourteen generations. The first seven generations after the Flood are 135, 134, 132, and (three times, omitting Cainan) 130. The lengths of lives present the same phenomena, but not to the same extent. It seems as if the units had been added to bring up the sums towards complete centuries; but they are always defective, as if converted from a shorter to a longer year. If we suppose that the original computation was in Chaldaeo-Babylonian years of 360 days, and was converted into years of 365¼ days, the sum from the birth of Arphaxad to that of Nahor is 801 years of the shorter duration. Similarly from Adam to the birth of Methuselah would be 1305 years. This is sufficiently near to warrant the conjecture that some change of this kind has been effected. The very artificial character of the numbers for generations and the less artificial lengths of the lives have led to the hypothesis that the generations are not original, and the lives alone are so; but this hypothesis seems unwarranted by the texture of the record: the two sets of numbers must stand or fall together. It is observable that both are wanting in the Chronicles, and it is therefore possible that in Genesis the numbers may be due to an ancient tradition. On this theory they would still be very early, and the peculiarity of their gradual diminution is one which marks some unknown mode of reckoning, which is much in favour of their originality, or at least great antiquity. On this subject see *Genesis of the Earth and of Man*,[2] pp. 142 sq.

A serious difficulty is raised by the idea that the numbers are cyclical, and the personages, for the most part, legendary. The artificial character of the generation numbers and Enoch's life of 365 years seems to lend some colour to this view, but it has failed in spite of the learning and ingenuity with which it has been advanced. The comparison with the Babylonian zodiacal periods, a cognate hypothesis, instituted by Lenormant, is most interesting but inconclusive. It would be easier to conjecture that as the Babylonians had a tradition of ten patriarchs or kings before the Flood, and as Taurus in their historical age originally marked the vernal equinox, it would be natural to them to connect the period of Aquarius with the Flood. Beyond this the points of agreement are slight. The idea that the patriarchs may be legendary does not wholly rest on the cyclical hypothesis or its modified zodiacal form: it claims in its support the parallelism of the genealogies of Seth and Cain.

Adam	
Seth	
Enos	
Cainan	Cain
Mahalaleel	Enoch
Jared	Irad (Γαϊδάδ, LXX.)
Enoch	Mehujael (Μαλελεήλ, LXX.)
Methuselah	Methusael
Lamech	Lamech
Noah	Three sons
Three sons.	

In these lists two names are identical, three very similar, and three unlike. All the similar names and an identical one are in the same places in the succession. In addition to this, Enos, the father of Cainan, is curiously parallel to Adam, the father of Cain. An endeavour to explain the relation of the two lists has been ingeniously made by Lenormant, who sees in the Cainite names contrasts to the Sethite ones, first favourable to the Sethites, and, when the general corruption of mankind extended to these, conversely unfavourable, but the evidence is insufficient. It is to be noted that the genealogy of Seth is in an Elohistic passage, that of Cain in a Jehovistic one. Are they two versions of one list, differing as versions of the same genealogy do in various parts of the Bible? In this case we have to account for the apparent identity of the lines, traced to different heads. To this difficulty no answer can yet be given, but that if the generations are in neither case wholly successive, some meeting-points may be thus indicated. Otherwise the knot is cut by the theory that the list of the Sethites is the original, and that of the Cainites founded upon it. But the characteristic nature of the incidents told of each line forbids this view. They are independent and contrasted. On the whole subject see Lenormant, *Les Origines*,[2] &c. i. 214 sq.

It has been shown that the LXX. numbers for the generations have the highest claim to be considered original, or at least the oldest form, though where two of three variants are shown to be corrupted we may reasonably doubt whether any one is genuine. Accepting, with this reserve, the numbers in question, we have to inquire if they are historical. As generations and lives they cannot be historical if ordinary years are intended. Is then the gradual reduction a difference in the periods employed rather than a reduction of human life?—in other words, are the years employed such in the ordinary senses?

It is obvious that all other records support the opinion of the physiologists that the maximum life of man little exceeds a century. The Egyptians appear to have fixed it as 110 years, the length of the life of Joseph, and their oldest document, the Proverbs of Ptah-hotep, dating about 3000 years B.C., mentions this sum as extreme old age. In Genesis, when the corruption of mankind is told, "when men began to multiply on the face of the earth," the duration of life was limited to 120 years (vi. 1–3). This admits of three explanations: (1) that this was the length of human life before the Flood; (2) that it was a reduction; (3) that it was a time of repentance allowed before the catastrophe. The first and second explanations seem

alone reasonable, and the first is the more probable, as the curtailment, if we accept the existing chronological scheme, would not have taken effect on all living people, but only on the latest born, and Noah would form an exception. Moreover, we are limited by physiology to the sum of 120 years. An antediluvian maximum of that sum would suit the modern conditions.

The idea that shorter periods than the ordinary years are used in the patriarchal genealogies is as old as St. Augustine. It is not without the support of Biblical evidence, though this is by no means conclusive.

1. The two beginnings of the Hebrew year suggest the idea of a patriarchal year of six months, which is perhaps favoured by the etymology of שָׁנָה, "year," for the radical sense is not so much "repetition" as "doing a second time." During the closing period of the patriarchal age, from Nahor to Amram, a reduction by one-half would make the narrative far easier to be understood historically. According to the ordinary reckoning Jacob was 77 years old when he went to Haran, 84 or 91 when Reuben his firstborn was born: 35½, 42, and 45½ are more likely sums. Abraham's age when leaving Haran was 75 (37½), Sarah's when taken by Pharaoh 67 (33½), by Abimelech 89 (44½). The ages of Abraham and Sarah at Isaac's birth, 100 (50) and 90 (45), do not, if reduced, weaken the language of the narrative. It is remarkable that the period of the sojourn is put at 430 years, and many chronologers compute it at 215, exactly the half on the data of the text. We believe the longer is the true period, but the result of the reduction is significant. The ordinary years seem to be employed throughout the story of Joseph. If two modes of reckoning are used, the 430 years could have been incorrectly halved.

2. A period of three months would be that of one of the natural seasons. We have no evidence that the Hebrews so divided the year before the Rabbinical age. The pagan Arabs had, however, besides the twelve months, four equal seasons, beginning, like the Hebrew civil year, at the autumnal equinox (see Lane, *Arab. Lex.* s. v. ربيع). Supposing that this reckoning was used in the period during which the ages are roughly double those of that next following, we should obtain a like result: the lives 460 (115) to 330 (82½), and the generations 135 (33¾) to 130 (32½), would be reduced to the figures required by physiology.

3. The still farther reduction to two months might be suggested by the six Arab seasons, beginning at the autumnal equinox (Lane, *Lex.* l. c.). If applied to the generations and lives before the Flood, including Shem's, 969 (161½) to 535 (88), and 230 (38⅜) to 167 (27⅞), with the exceptional generation of Noah, 500 (83⅓), the result is nearly the same.

It is argued against any hypothesis of this kind that the 600th year of Noah's life is treated as an ordinary year. Had there been a double use of years in the document, this might be a natural consequence. No doubt any explanation is fraught with difficulties, but in this case we must consider the difference of what occurs in a historical narrative and mere statements of intervals attached to names, and deductions from them. Thus the 600th year must be separated from the division of the year of the Flood. If however we consider each generation to have probably been of the same length as in history generally, we must suppose the generations not to have been consecutive as we do in the period of the sojourn in Egypt.

B. Second Period, from Abram's departure from Haran to the Exodus.—The length of this period is stated by St. Paul as 430 years from the promise to Abraham to the giving of the Law (Gal. iii. 17), the first event being held to be that recorded in Gen. xii. 45. The same number of years is given in Ex., where the Heb. reads: "Now the sojourning of the children of Israel who dwelt in Egypt [was] four hundred and thirty years. And it came to pass at the end of the four hundred and thirty years, even the selfsame day it came to pass, that all the hosts of the Lord went out from the land of Egypt" (xii. 40, 41). Here the Vat. LXX. adds after "in Egypt" the words "and in Canaan;" and the Alex. and Sam. add after "Canaan" "they and their fathers." Clearly we have here a growth of glosses. The promise to Abraham states that the sojourn or the oppression shall last 400 years. "Know of a surety that thy seed shall be a stranger in a land that is not their's, and *shall* serve *them*; and they shall afflict them four hundred years; and also that nation, whom they shall serve, will I judge: and afterward shall they come out with great substance . . . in the fourth generation (period?) they shall come hither again" (Gen. xv. 13, 14, 16). Josephus (*Ant.* ii. 15, 2) and the Targum of Pseudo-Jonathan accept the LXX. view: St. Stephen in the Acts (vii. 6) and Philo (*Quis rer. div. her.* § 54, p. 511) cite Gen. xv. 13; and Josephus follows the Heb. reckoning in other places (*Ant.* ii. 9, 1; *B. J.* v. 9, 4). In citing these differences of criticism, Bishop Lightfoot adds, "The difficulties which attend both systems of chronology need not be considered here, as they do not affect St. Paul's argument, and cannot have entered into his thoughts" (*Epistles of St. Paul, Galatians*, p. 140, note). Supposing however that St. Paul did not hold the current chronology, his argument would admit of his reasoning, "You concede the law was four hundred and thirty years after," without in any way vouching for the accuracy of the reckoning. The two reckonings could be reconciled on the theory of a different use of the term "year," but scholars are generally agreed that the long period of 430 years is needed for the growth of the Israelites from a family to a nation, and the circumstances of Egyptian history accord best with the chronological result. This important consequence follows, that the generations connected with this interval must be one, and all statements of the heads of families and as genealogies broken; for not one, even Joshua's from Ephraim [BERIAH], can be reconciled with the long period if consecutive. On the other hand, Jochebed, the mother of Moses, would not have been a daughter of Levi in a literal sense, and thus Amram would not have necessarily married his aunt, his father's "sister," but his kinswoman.

If then we take the period of 430 years for the sojourn in Egypt, we cannot carry our

chronology farther back. The periods of generations appear too long, and the theory that they should be reduced is not sufficiently strong to warrant our coming to any conclusion. During the sojourn the ages of Levi, Kohath, and Amram, 137, 133, 137 (Ex. vi. 16, 18, 20), seem to need reduction; those of Joseph, and still more those of Moses and Aaron, appear to be well made out. This difficulty, which looks like the effect of a partial redaction, may possibly apply to the age preceding the sojourn. The entry into Egypt must for the present be the starting-point of Hebrew chronology.

It is necessary here to notice the Egyptian evidence for the date of the Exodus. Egyptologists are now agreed that this event occurred in the reign of Merenptah or Menptah, fourth king of the Nineteenth Dynasty, and son and successor of Ramses II. This result has been reached by the following steps. [EGYPT, p. 886.]

It has been long held that the Exodus must have taken place in the period of the Eighteenth and Nineteenth Dynasties. Attention was drawn to the later line, and the king just mentioned, by an Egyptian tradition reported by Manetho as such,[c] by Chaeremon, Lysimachus, and Diodorus Siculus. Manetho and Chaeremon call the king Amenophis; and Lysimachus, Bocchoris.[d] Manetho makes his son Sethos also Ramesses, and thus identifies him with Merenptah, as may be seen by comparing the lists of Dynasties; Chaeremon gives the name Messenes, which may be a corruption of Rameses.

Two circumstances in the Bible narrative confirmed this view. The great oppressor is related to have built as store-cities Pithom and Rameses (Ex. i. 11). The name Rameses points to a king of that name who could be no other than Ramses II. The earlier Ramses I., his grandfather, had a short and unimportant reign. Ramses II. was a powerful king and great builder, and in the early part of his reign, before his fifth year, he founded a city called after himself, Pa-Ramses, "the abode of Ramses," in eastern Lower Egypt, near to if not within the Land of Goshen. The reign of Ramses II., nearly 67 years, or 62 after the latest date of the foundation of Pa-Ramses and that of his son —probably 19 or 20, certainly not much less— correspond, as 86 or 81, well to the period which the Bible allows from the heat of the oppression, the time apparently when Rameses was built, to the Exodus, about 80 years. No other two reigns make up this sum, and the two kings as portrayed by Egyptian documents resemble closely the Pharaoh of the Oppression and the Pharaoh of the Exodus, showing us in Ramses II. a stern and merciless oppressor, in Merenptah his weak shadow, self-important but irresolute.

A recent discovery completes the evidence. In the mound now called Tell-el-Maskhûtah, M. Naville has discovered the temple and magazines of the store-city Pithom, with as the earliest name that of Ramses II., evidently founder of the town as well as the temple. The identification with the Pithom of Exodus is rendered complete by the size of the bricks, and the prodigiously thick walls of the magazines, those bricks being of the dimensions used under Ramses II. [see M. Naville's *Memoir on Pithom*, 3rd ed. *Egypt Exploration Fund.* PITHOM; RAAMSES].

So far we have a historical synchronism. Is it also chronological? It must be admitted that Egyptian dates before the final establishment of Psammetichus I. are increasingly vague as we ascend. The reign of Shishak, however, must have begun about the middle of the 10th century, and there is a general agreement in placing the accession of Ramses II. about B.C. 1400. Dr. Brugsch indeed would date it earlier, but this is because he reckons reigns as generations, three to a century. If the reign of Ramses II. began about B.C. 1400, the Rabbinical date of the Exodus, B.C. 1314, would fall about the close of the reign of Merenptah.

C. Third Period, from the Exodus to the Foundation of Solomon's Temple.—In but one passage do we find the whole length of this period stated. It is that in which the foundation of the Temple is dated in the 480th (Heb.) or 440th (LXX.) year after the Exodus, in the fourth year of Solomon's reign (1 K. vi. 1). This period is inconsistent with the genealogies, which give on an average 410 years. David's exceptional genealogy, if continuous, would seem to give about 330 to 350 years at the outside; but it is possible that one or more generations may have been dropped, though this can scarcely be conjectured of the very consistent Levitical genealogies. It is true that we have to consider all genealogies from Jacob's sons to the Exodus as defective, but with the conquest of Canaan a different system may be reasonably conjectured. The period 480 or 440 seems again inconsistent with the separate numbers of the Book of Judges, with which it can alone be reconciled by making some judges contemporary or shortening the times of rest, which in the case of that following the Moabite servitude is warranted by the LXX. (40 for 80). Thus the period seems too long for the genealogies, and probably too short for the data of Judges. There are two detached statements which bear on this difficulty. Jephthah's message to the Ammonite king reckons 300 years from the time of the conquest of the Amorites to his own time (Judg. xi. 26). This suits the period in Kings best, allowing some latitude in the expression: it cannot be reconciled with the computation from the genealogies unless we conjecture 300 years to mean in the third century. St. Paul's 450 years, which is usually considered to define the period from the partition of Canaan to Samuel's judgeship, apparently inclusive, is ordinarily read as follows (A. V.): "And when He had destroyed seven nations in the land of Chanaan, He divided their land to them by lot. And after that He gave *unto them* judges about the space of four hundred and fifty years, until Samuel the prophet. And afterward they desired a king" (Acts xiii. 19–21). This is the reading of Cod. Claromont.; but the Sinaitic, Alex., Vat., and Ephr. rescr. read thus (R. V.), "He gave *them* their land for an inheritance, for about four hundred and fifty years; and after these things He gave *them* judges until," &c. This reading on

[c] ὑπὲρ ὧν δ' ὁ Μανεθὼν οὐκ ἐκ τῶν παρ' Αἰγυπτίοις γραμμάτων, ἀλλ' ὡς αὐτὸς ὡμολόγηκεν, ἐκ τῶν ἀδεσπότως μυθολογουμένων προστεθεικέν, κ. τ. λ.

[d] Bocchoris may be a corruption of Ba-en-ra, better represented by the Pheron of Herodotus.

such high manuscript authority makes the passage extremely obscure, and gives the period of years the air of a gloss introduced in the wrong place. If it is the term of the Judges, it is consistent with the long reckoning in vogue in the early centuries of the Christian era, and the remark of Dr. Lightfoot on St. Paul's use of the 430 years already cited might apply to it. On the whole we prefer the reckoning by genealogies as depending on a general but not complete consensus of evidence of a special kind, less likely than any other to suffer at the hands of copyists. It will be seen under the next head that the probable date of Solomon's accession is a little after B.C. 950, and in the examination of the Egyptian evidence for the date of the Exodus it has been shown that this event may probably be placed somewhat before B.C. 1300. This suggests the idea that the original number in Kings could have been 380.

D. Fourth Period, from the Foundation of Solomon's Temple to its destruction.—The chronology of this period was, until lately, held to be very nearly fixed, but the discovery of the Assyrian Eponymous Canon has led to a general opinion that it needs large correction. Nearly all scholars hold this Canon to be continuous, Dr. Oppert among Assyriologists standing alone in the contrary view.

Formerly, although the data of the Books of Kings were accepted, the difficulty of constructing a system from the coincident years of the kings of Israel and Judah was met by conjectures of an arbitrary kind. The usual expedient was the insertion of two interregna, the first of eleven years after Jeroboam II., the second of nine years after Pekah. Another expedient was to add ten years to the reign of Jeroboam II. Dr. Schrader in his *Die Keilinschriften und das alte Testament* (Eng. trans. by Professor Whitehouse) compares the Hebrew data with those of the Canon in the following table, to which a column is here added, giving the Hebrew dates as modified by the omission of the interregna.

From the Monuments.	In the Bible. [with interregna]	In the Bible. [without]
Ahab: 854 (battle at Karkar)	918–897 (time of reign)	898–876
Jehu: 842 (payment of Tribute)	884–856	864–837
*Azariah (Uzziah): 742–740 (in these years at war with Tiglath-pileser)	809–758	
Menahem: 738 (payment of tribute)	771–761	762–752
Pekah: 734 (conquered by Tiglath-pileser)	758–738 (?)	749–729
*?Hoshea: 728 (last year of Tiglath-pileser in which Hoshea must have paid him tribute)	729–722	
722 (fall of Samaria)	722 (fall of Samaria).	
Hezekiah: 701 (Sennacherib's expedition)	714 (Sennacherib's expedition).	
Manasseh: 681–673 (in this interval he must have paid tribute to Esarhaddon)	696–642 (time of reign).	
668 (667?) (tribute to Assurbanipal); c. 647	(See *KAT.*² pp. 465–6).	

The Assyrian dates render necessary several changes in the Hebrew sums, and the correspondences of the two lines in Kings no longer agree. But there are internal difficulties in these correspondences which may induce reasonable doubt whether they are part of the original text, or, if so, unaltered. These are the three dates of the accession of Jehoram of Israel (2 K. i. 17, iii. 1, viii. 16), the date of the accession of Uzziah in the 27th year of Jeroboam II. (xv. 1), the date of Hoshea's accession in the 20th year of Jotham (*v.* 30); whereas according to both Kings (*v.* 30) and 2 Chron. (xxvii. 1) Jotham's whole reign is stated to have been 16 years. Dr. Adolf Kamphausen (*Die Chronologie der hebräischen Könige*, Bonn, 1883) has endeavoured to construct a chronology of this period on the comparison of the lengths of reigns with the Assyrian data. He makes six changes in the Hebrew reigns (two Israelite,—Menahem, Pekah; and four of Judah,—Amaziah, Azariah, Ahaz, Manasseh), in three of which instances 10 years, all in Judah (Amaziah, Azariah, Manasseh), are struck out. Further he counts 15 of Jotham's 16 years to him as regent. Lastly he puts the battle of Karkar (B.C. 854) in the reign of Jehoram (B.C. 854–843), although Ahab is mentioned in the Assyrian documents (cp. pp. 32, 43, note 13). It is quite evident, notwithstanding the very able character of the essay, that the results cannot be fully accepted.* Though the chronological difficulties are as yet insoluble, the historical synchronisms are in no way affected. If the reckoning be modified, the story of the relations of Israel, Judah, Syria, and Assyria, would remain practically untouched. In one instance the narrative seems to suit the change suggested in Dr. Kamphausen's reckoning. The story of the capture of Samaria and of the captivity of Israel is given before the reign of Hezekiah is spoken of, and during the narrative of that reign the capture of Samaria is repeated in brief (cp. 1 K. xviii. 9–12 with xvii. 3 sq.). Again, the history of Hezekiah's reign in 2 Ch. implies that on his accession Israel was without a king (xxx. 1, 5, 6, 10, 11; xxxi. 1), and that they were but a remnant (xxx. 6). Again the length of Isaiah's prophetic career, from Uzziah to at least the 14th year of Hezekiah, would according to the old reckoning be at the shortest 46 years, and that of Hosea from Jeroboam II. to Hezekiah at least 44. These minimum lengths would be reduced to about 39 and 25 years.

It is thus obvious that, if we accept the Assyrian Canon as continuous, we must admit that the sums of some reigns must be changed, and that the correspondences of the two lines of Israel and Judah in many cases cannot be correct in their present form. Farther the chronology presents internal difficulties which cannot be explained without arbitrary hypotheses. Were

* The translator of Dr. Schrader's *Cuneiform Inscriptions and the Old Testament* (Prof. Whitehouse) gives a useful note with Dr. Kamphausen's table, and some slight modifications suggested (ii. 320 sq.).

the correspondences added to harmonise two independent books? The Chronicles present but one statement of correspondence in years: Abijah 1 = Jeroboam I. 18 (2 Ch. xiii. 1). In other cases the beginning of the history of a reign in Chronicles reads like a shorter form of that in Kings. The difference is the absence of the clause of correspondence and a slight variety in the form of the rest of the statement.

In attempting to measure the length of the interval from the foundation of Solomon's Temple to its destruction, the earliest fixed date which can be synchronised with a regnal year is that of the fall of Samaria, B.C. 722–721, in the 9th year counted from Hoshea's accession. The earliest fixed date is that of the battle of Karkar, B.C. 854, late in Ahab's reign, the year not being known. The reigns of the kings of Israel to Ahab inclusive are apparently 78 years; those of the kings of Judah to 8 years after that date, 86, the synchronism of Ahab's death with Jehoshaphat's 17th year suiting the history. The Israelite sum is 84 years, but the correspondences reduce it to 78, which with seven Israelite reigns reckoned as of complete years could easily be. The sum of 86 years for four reigns in Judah is near the usual average and that afforded by the whole series. Taking the date B.C. *c.* 850 for Ahab's death, and adding 78 years, we obtain B.C. *c.* 928 for the separation of the two kingdoms, and for Solomon's accession B.C. *c.* 968.

The date of the building of Solomon's Temple would thus be B.C. *c.* 965; that of its destruction is B.C. 586, making the interval about 382 years. This period corresponds to 18 generations, giving an average of 23 years, and to 19 reigns, if we omit Athaliah, Jehoahaz, and Jehoiachin, or an average of 22 years. It seems obvious that this reckoning cannot be reduced, and the Assyrian Canon does not admit of its being extended, unless in the period before Ahab's death, and then but little extension is likely. It is to be hoped that the discovery of the exact date of Shishak's reign may aid in determining this question. [See ISRAEL, KINGDOM OF; and JUDAH, KINGDOM OF.]

E. Fifth Period, from the Destruction of Solomon's Temple to the return from Babylon.—The determination of the length of this period depends on the date of the return. The decree of Cyrus was promulgated in the 1st year of his reign at Babylon, B.C. 538: the return, a matter needing much time, may well have occupied one or two years. With it closed the 70 years' Captivity, which is reckoned from the 1st year of Nebuchadnezzar and the 4th of Jehoiakim. Ptolemy's Canon allows 66 years for this interval, which is near enough to a round period of 70 years. [R. S. P.]

CHRYSOLITE (χρυσόλιθος; *chrysolithus*), one of the precious stones in the foundation of the heavenly Jerusalem (Rev. xxi. 20). It has been already stated [BERYL] that the chrysolite of the ancients is identical with the modern Oriental topaz, the *tarshish* of the Hebrew Bible[a]; and there is much reason for believing that the *topaz* is the stone indicated by the χρυσόλιθος of St. John's vision. [See BERYL.] [W. H.]

CHRYSOPRASUS (A. V.), -SE (R. V.) (χρυσόπρασος; *chrysoprase*) occurs only in Rev. xxi. 20 as one of the precious stones mentioned in St. John's vision. In Ezek. xxvii. 16, the A. V. "agate" is rendered in the marg. *chrysoprase*, and by R. V. "rubies"; in Ezek. xxviii. 13 the A. V. and R. V. (text) "emerald" is marginally rendered by the former *chrysoprase*, and by the latter *carbuncle*. The chrysoprase of the ancients[a] is by some supposed to be identical with the stone now so called, viz. the apple or leek-green variety of agate, which owes its colour to oxide of nickel. This stone at present is found only in Silesia; but Mr. King (*Antique Gems*, p. 59, note) says that the true chrysoprase is sometimes found in antique Egyptian jewellery set alternately with bits of lapis-lazuli; it is not improbable, therefore, that this is the stone which was the tenth in the walls of the heavenly Jerusalem. [W. H.] [H. B. T.]

CHUB (כּוּב, *Chub*, Ezek. xxx. 5) is mentioned only once in Scripture in a passage referring to Egypt, where the translations differ considerably. The name does not occur in the LXX.; and it is doubtful whether the Greek Λίβυες, Libyans, indicating לוּב, known only by the plural לוּבִים, must be taken as its equivalent. Some manuscripts have the variant כְּנוּב, *Chenub*, which might be compared to the Egyptian *keneb* or *gheneb* جنوب, which in the statistical tablet of Thothmes III. is the collective name for the nations of the South, the Ethiopians and the Negroes (Brugsch, *Die aegyptische Völkertafel*, p. 45). [E. N.]

CHUN (כּוּן; A. ἐκ τῶν ἐκλεκτῶν πόλεων [πολέμων, B.]; Joseph. Μάχωνι; *Chun*), a city of Hadadezer, king of Zobah, which David spoiled (1 Ch. xviii. 8), called Berothah in the parallel passage (2 Sam. viii. 8). [BEROTHAH.]

CHURCH (ἐκκλησία).—I. The derivation of the word Church is uncertain. It is found in the Teutonic and Slavonian languages (Anglo-Saxon, *Circ*, *Circe*, *Cyric*, *Cyricea*; English, *Church*; Scottish, *Kirk*; German, *Kirche*; Swedish, *Kyrka*; Danish, *Kyrke*; Icelandic, *Kyrkia*; Dutch, *Karke*; Swiss, *Kirche*; Frisian, *Tzierk*; Bohemian, *Cyrkew*; Polish, *Cerkiew*; Russian, *Zerkow*), and answers to the derivatives of ἐκκλησία, which are found naturally in the Romance languages (French, *Église*; Italian, *Chiesa*; old Vaudois, *Gleisa*; Spanish, *Iglesia*), and by foreign importation elsewhere (Gothic, *Aik-klêsjô*; Hungarian, *Egyhaz*; Gaelic, *Eaglais*; Welsh, *Eglwys*; Cornish, *Eglos*). The word "church" is generally said to be derived from the Greek κυριακόν (Walafrid Strabo, *De Rebus Ecclesiast.* c. 7; Suicer, *s. v.* κυριακόν; Glossarium, *s. v.* "Dominicum"; Casaubon, *Exercit.*

[a] Epiphanius, in his *Twelve Stones of the Rationale*, has got "Chrysolite, by some called chrysophyllus, of a golden colour, and found close to the walls of Babylon." Pliny makes several varieties of this name; his first is doubtless the Oriental topaz.—C. W. KING.

[a] That of Solinus (lv.) exactly agrees with our Indian chrysolite: "Chrysoprasos quoque ex auro et porraceo mixtam lucem trahentes aeque beryllorum generi adjudicaverunt."

Baron. xiii. § xviii.; Hooker, *Eccl. Pol.* v. ch. xiii. 1; Pearson, *On the Creed*, Art. ix.; Beveridge, *On the Thirty-Nine Articles*, Art. xix.; Wordsworth, *Theophilus Anglicanus*, c. 1; Gieseler, *Eccles. History*, c. 1; Trench, *Study of Words*, p. 75); but the derivation has been too hastily assumed. The arguments in its favour are the following: (1) a similarity of sound; (2) the statement of Walafrid Strabo; (3) the fact that the word κυριακὸν was undoubtedly used by Greek ecclesiastics in the sense of "a church," as proved by a reference to the Canons of the Council of Ancyra (Can. xiv.), of Neocaesarea (Can. v., xiii.), of Laodicea (Can. xxviii.), and of the Council in Trullo (Can. lxxiv.), to Maximin's Edict (in Euseb. *Hist. Eccl.* ix. 10), to Eusebius' Oration in praise of Constantine (c. xviii.), to the *Apostolical Constitutions* (ii. 59), to Cyril of Jerusalem (*Catech.* xviii.), and to a similar use of "Dominicum" by Cyprian, Jerome, Ruffinus, &c. (4) The possibility of its having passed as a theological term from the Greek into the Teutonic and Slavonian languages. (5) The analogous meaning and derivation of the Ethiopic word for Church, which signifies "the house of Christ." On the other hand, it requires little acquaintance with philology to know that (1) similarity of sound proves nothing, and is capable of raising only the barest presumption. (2) A mediaeval writer's guess at an etymology is probably founded wholly on similarity of sound, and is as worthless as the derivations with which St. Augustine's works are disfigured (Moroni derives *Chiesa* from κυριακὸν in his *Dizionario Storico ecclesiastico*, because there is some likeness of sound in the two words, though *Chiesa* is evidently only a modification of the word *ecclesia*, and has nothing to do etymologically with κυριακόν; and Walafrid Strabo derives the words *vater*, *mutter*, from the Greek through the Latin, *herr* from *heros*, *moner* and *monath* from μήνη, in the same breath as *kirche* from κυριακόν). (3) Although κυριακὸν is found, signifying "a church," it is no more the common term used by Greeks, than "Dominicum" is the common term used by Latins. It is therefore very unlikely that it should have been adopted by the Greek missionaries and teachers, and adopted by them so decidedly as to be thrust into a foreign language. (4) Nor is there any probable way pointed out by which the importation was effected. Walafrid Strabo indeed (*loc. cit.*) attributes it, not obscurely, so far as the Teutonic tongues are concerned, to Ulfilas; and following him, Trench says (*loc. cit.*): "These Goths, the first converted to the Christian faith, the first therefore that had a Christian vocabulary, lent the word in their turn to the other German tribes, among others to our Anglo-Saxon forefathers." Had it been so introduced, Ulfilas' "peaceful and populous colony of shepherds and herdsmen on the pastures below Mount Haemus" (Milman, i. 272) could never have affected the language of the whole Teutonic race in all its dialects. But as a matter of fact we find that the word employed by Ulfilas in his version of the Scriptures is not any derivative of κυριακόν; but, as we should have expected, *aikklêsjô* (Rom. xvi. 23; 1 Cor. xvi. 19 *et passim*). This theory therefore falls to the ground, and with it any attempt at showing the way in which the word passed across into the Teutonic languages. No special hypothesis has been brought forward to account for its admission into the Slavonic tongues, and it is enough to say that, unless we have evidence to the contrary, we are justified in assuming that the Greek missionaries in the 9th century did not adopt a term in their intercourse with strangers, which they hardly, if at all, used in ordinary conversation amongst themselves. (5) Further, there is no reason why the word should have passed into these two languages rather than into Latin. The Roman Church was in its origin a Greek community, and it introduced the Greek word for Church into the Latin tongue; but this word was not *cyriacum*, it was *ecclesia*; and the same influence would no doubt have introduced the same word into the northern languages, had it introduced any word at all. (6) Finally, it is hard to find examples of a Greek word being adopted into the Teutonic dialects, except through the medium of Latin. On the whole, this etymology must be abandoned. It is strange that Strabo should have imposed it on the world so long. It is difficult to say what is to be substituted. There was probably some word which, in the language from which the Teutonic and Slavonic are descended, designated the old heathen places of religious assembly; and this word, having taken different forms in different dialects, was adopted by the Christian missionaries. It was probably connected with the Latin *circus*, *circulus*, and with the Greek κύκλος, possibly also with the Welsh *cylch*, *cyl*, *cylchle*, or *cacr*. Lipsius, who was the first to reject the received tradition, was probably right in his suggestion that the word arose from the circular form of the ancient temples. "Credo et a circo Kirck nostrum esse, quia veterum templa instar Circi rotunda" (*Epist. ad Belgas*, Cent. iii. Ep. 44).

II. The word ἐκκλησία is no doubt derived from ἐκκαλεῖν, and in accordance with its derivation it originally meant an assembly called out by the magistrate, or by legitimate authority. This is the ordinary classical sense of the word. But it throws no light on the nature of the institution so designated in the N. T. For to the writers of the N. T. the word had lost its primary signification, and was either used generally for any meeting (Acts xix. 32), or, more particularly, it denoted (1) the religious assemblies of the Jews (Deut. iv. 10, xviii. 16, *ap.* LXX.); (2) the whole assembly or congregation of the Israelitish people (Acts vii. 38; Heb. ii. 12; Ps. xxii. 22; Deut. xxxi. 30, *ap.* LXX.). It was in this last sense, in which it answered to קְהַל יִשְׂרָאֵל, that the word was adopted and applied by the writers of the N. T. to the Christian congregation. The word ἐκκλησία, therefore, does not carry us back further than the Jewish Church. It implies a resemblance and correspondence between the old Jewish Church and the recently established Christian Church, but nothing more. Its etymological sense having been already lost when adopted by and for Christians, is only misleading if pressed too far. The chief difference between the words "ecclesia" and "church" would probably consist in this, that "ecclesia" primarily signified the Christian body, and secondarily the place of assembly,

while the first signification of "church" was the place of assembly, which imparted its name to the body of worshippers.

III. *The Church as described in the Gospels.*—The word occurs only twice. Each time in St. Matthew's Gospel (Matt. xvi. 18, "On this rock will I build My Church;" xviii. 17, "Tell it unto the Church"). In every *other* case it is spoken of as "the kingdom of heaven" by St. Matthew, and as "the kingdom of God" by St. Mark and St. Luke. St. Mark, St. Luke, and St. John never use the expression "kingdom of heaven." St. John once uses the phrase "kingdom of God" (iii. 3). St. Matthew occasionally speaks of "the kingdom of God" (vi. 33, xxi. 31, 43), and sometimes simply of "the kingdom" (iv. 23, xiii. 19, xxiv. 14). In xiii. 41 and xvi. 28, it is "the Son of Man's kingdom." In xx. 21, "Thy kingdom," *i.e.* Christ's. In the one Gospel of St. Matthew the Church is spoken of no less than thirty-six times as "the kingdom." Other descriptions or titles are hardly found in the Evangelists. It is Christ's household (Matt. x. 25), the salt and light of the world (v. 13, 15), Christ's flock (Matt. xxvi. 31; John x. 1); its members are the branches growing on Christ the Vine (John xv.): but the general description of it, not metaphorically but directly, is, that it is a kingdom. In Matt. xvi. 19, "the kingdom of heaven" is formally, as elsewhere virtually, identified with ἐκκλησία. From the Gospels, then, we learn that Christ was about to establish His heavenly kingdom on earth, which was to be the substitute for the Jewish Church and kingdom, now doomed to destruction (Matt. xxi. 43). Some of the qualities of this kingdom are illustrated by the parables of the tares, the mustard seed, the leaven, the hid treasure, the pearl, the draw-net: the spiritual laws and principles by which it is to be governed, by the parables of the talents, the husbandmen, the wedding feast, and the ten virgins. It is not of this world, though in it (John xviii. 36). It is to embrace all the nations of the earth (Matt. xxviii. 19). The means of entrance into it is Baptism (Matt. xxviii. 19). The conditions of belonging to it are faith (Mark xvi. 16) and obedience (Matt. xxviii. 20). Participation in the Holy Supper is its perpetual token of membership, and the means of supporting the life of its members (Matt. xxvi. 26; John vi. 51; 1 Cor. xi. 26). Its members are given to Christ by the Father out of the world, and sent by Christ into the world; they are sanctified by the truth (John xvii. 19); and they are to live in love and unity, cognizable by the external world (John xiii. 34, xvii. 23). It is to be established on the Rock of Christ's Divinity, as confessed by Peter, the representative (for the moment) of the Apostles (Matt. xvi. 18). It is to have authority in spiritual cases (Matt. xviii. 17). It is never to be deprived of Christ's Presence and protection (xxviii. 20), and never to be overthrown by the power of hell (xviii. 19).

IV. *The Church as described in the Acts and in the Epistles; its Origin, Nature, Constitution, Doctrines, and Growth.*—From the Gospels we learn little in the way of detail as to the kingdom which was to be established. It was in the great forty days which intervened between the Resurrection and the Ascension that our Lord explained specifically to His Apostles "the things pertaining to the kingdom of God" (Acts i. 3); that is, His future Church.

Its Origin.—The removal of Christ from the earth had left His followers a shattered company, with no bond of external or internal cohesion except the memory of the Master Whom they had lost, and the recollection of His injunctions to unity and love, together with the occasional glimpses of His Presence which were vouchsafed them. They continued together, meeting for prayer and supplication, and waiting for Christ's promise of the gift of the Holy Ghost. They numbered in all some 140 persons; namely, the eleven, the faithful women, the Lord's mother, His brethren, and 120 disciples. They had faith to believe that there was a work before them which they were about to be called to perform; and that they might be ready to do it, they filled up the number of the Twelve by the appointment of Matthias "to be a true witness" with the eleven "of the Resurrection." The Day of Pentecost is the birthday of the Christian Church. The Spirit, Who was then sent by the Son from the Father, and rested on each of the disciples, combined them once more into a whole—combined them as they never had before been combined, by an internal and spiritual bond of cohesion. Before they had been individual followers of Jesus; now they became His mystical body, animated by His Spirit. The nucleus was formed. Agglomeration and development would do the rest.

Its Nature.—St. Luke explains its nature by describing in narrative form the characteristics of the society formed by the union of the original 140 disciples with the 3,000 souls who were converted on the Day of Pentecost. "Then they that gladly received his word were baptized . . . and they continued stedfastly in the Apostles' teaching and fellowship, in the breaking of bread and the prayers" (Acts ii. 41, R. V.). Here we have indirectly exhibited the essential conditions of Church Communion. They are (1) Baptism, Baptism implying on the part of the recipient repentance and faith; (2) Apostolic Doctrine; (3) Fellowship with the Apostles; (4) the Lord's Supper; (5) Public Worship. Every requisite for church-membership is here enumerated not only for the apostolic days, but for future ages. The conditions are exclusive as well as inclusive, negative as well as positive. St. Luke's definition of the Church, then, would be the congregation of the baptized, in which the faith of the Apostles is maintained, communion with the Apostles is preserved, the Sacraments are duly administered, and public worship is kept up. The earliest definition (virtually) given of the Church is likewise the best. To this body St. Luke applies the name of "The Church" (the first time that the word is used as denoting an existing thing); and to it, constituted as it was, he states that there were daily added οἱ σωζόμενοι (ii. 47). By this expression he probably means those who "saved themselves from their untoward generation" (ii. 40), "added," however, "to the Church" not by their own mere volition, but "by the Lord," and so placed in a state of present salvation, become the elect people of God, sanctified by His Spirit, "delivered from the power of darkness and translated into

the kingdom of His dear Son" (Col. i. 13). St. Luke's treatise being historical, not dogmatical, he does not directly enter further into the essential nature of the Church. The community of goods, which he describes as being universal amongst the members of the infant society (ii. 44, iv. 32), is specially declared to be a voluntary practice (v. 4), not a necessary duty of Christians as such (cp. Acts ix. 36, 39; xi. 29).

From the illustrations adopted by St. Paul in his Epistles, we have additional light thrown upon the nature of the Church. Thus (Rom. xi. 17) the Christian Church is described as being a branch grafted on the already existing olive-tree, showing that it was no new creation, but a development of the institution which had flourished in the Patriarchal and in the Jewish Church. It is described (Rom. xii. 4; 1 Cor. xii. 12) as one body made up of many members with different offices, to exhibit the close cohesion which ought to exist between Christian and Christian; still more, it is described as the body of which Christ is the Head (Eph. i. 22), so that members of His Church are members of Christ's Body, of His Flesh, of His Bones (Eph. v. 23, 30; Col. i. 18, ii. 19), to show the close union between Christ and His people. Again, it is described as the Temple of God built upon the foundation-stone of Jesus Christ (1 Cor. iii. 11); and, by a slight change of metaphor, as the Temple in which God dwells by His Spirit, the Apostles and Prophets forming the foundation, and Jesus Christ the chief corner-stone, *i.e.* probably the foundation corner-stone (Eph. ii. 22). It is also the city of the saints and the household of God (Eph. ii. 19). The passage which is most illustrative of our subject in the Epistles is Eph. iv. 3–12: "Endeavouring to keep the unity of the Spirit in the bond of peace. There is one body and one Spirit, even as ye are called in one hope of your calling; one Lord, one faith, one Baptism, one God, and Father of all, Who is above all, and through all, and in you all." Here we see what it is that constitutes the unity of the Church in the mind of the Apostle: (1) unity of Headship, "one Lord;" (2) unity of belief, "one faith;" (3) unity of Sacraments, "one Baptism;" (4) unity of hope of eternal life, "one hope of your calling" (cp. Tit. i. 2); (5) unity of love, "unity of the Spirit in the bond of peace;" (6) unity of organisation, "one body;" (7) unity of ministry, "for the perfecting of the saints, for the work of the ministry, for the edification of the Body of Christ." The Church, then, at this period was a body of baptized men and women who believed in Jesus as the Christ and in the revelation made by Him; who were united by having the same faith, hope, and animating Spirit of love, the same Sacraments, the same spiritual invisible Head, and the same discipline.

What was *the Constitution of this body?*—On the evening of the Day of Pentecost, the 3140 members of which it consisted were (1) Apostles, (2) previous disciples, (3) converts. We never afterwards find any distinction drawn between the previous disciples and the later converts; but the Apostles throughout stand apart. Here, then, we find two classes, Apostles and converts—Teachers and taught. At this time the Church was not only morally but actually one congregation. Soon, however, its numbers grew so considerably that it was a physical impossibility that all its members should come together in one spot. It became, therefore, an aggregate of congregations. But its essential unity was not affected by the accidental necessity of meeting in separate rooms for public worship; the bond of cohesion was still the same. The Apostles, who had been closest to the Lord Jesus in His life on earth, would doubtless have formed the centres of the several congregations of listening believers; and besides attending at the Temple for the national Jewish prayer (Acts iii. 1), and for the purpose of preaching Christ (ii. 42), they would have gone round to "every house" where their converts assembled "teaching and preaching," and "breaking bread," and "distributing" the common goods "as each had need" (ii. 46; iv. 35; v. 42). Thus the Church continued for apparently some seven years, but at the end of that time "the number of disciples was" so greatly "multiplied" (Acts vi. 1) that the Twelve Apostles found themselves to be too few to carry out these works unaided. They thereupon for the first time exercised the powers of mission entrusted to them (John xx. 21), and, by laying their hands on the Seven who were recommended to them by the general body of Christians, they appointed them to fulfil the secular task of distributing the common stock, which they had themselves hitherto performed, retaining in their own hands the functions of praying, and preaching, and administering the Sacraments. It is a question which cannot be certainly answered, whether the office of these Seven is to be identified with that of the διάκονοι elsewhere found. They are not called "deacons" in Scripture, and it has been supposed by some that they were extraordinary officers appointed for the occasion to see that the Hellenistic widows had their fair share of the goods distributed amongst the poor believers; and that they had no successors in their office. If this be so, we have no account given us of the institution of the Diaconate: the Deacons, like the Presbyters, are found existing, but the circumstances under which they were brought into existence are not related. We incline, however, to the other hypothesis which makes the Seven the originals of the Deacons. Being found apt to teach, they were likewise invested, almost immediately after their appointment, with the power of preaching to the unconverted (vi. 10) and of baptizing (viii. 38). From this time, therefore, or from about this time, there existed in the Church—(1) the Apostles; (2) the Deacons and Evangelists; (3) the multitude of the faithful. We hear of no other Church-officer till the year 44, seven years after the appointment of the deacons. We find that there were then in the Church of Jerusalem officers named Presbyters (xi. 30) who were the assistants of James, the chief administrator of that Church (xii. 17). The circumstances of their first appointment are not recounted. No doubt they were similar to those under which the Deacons were appointed. As in the year 37 the Apostles found that the whole work of the ministry was too great for them, and they therefore placed a portion of it, viz. distributing alms to the brethren and preaching Christ to the heathen, on the deacons, so a few

years later they would have found that what they still retained was yet growing too burdensome, and consequently they devolved another portion of their ministerial authority on another order of men. The name of Presbyter or Elder implies that the men selected were of mature age. We gather incidentally that they were ordained by apostolic or other authority (xiv. 23, Tit. i. 5). We find them associated with the Apostles as distinguished from the main body of the Church (Acts xv. 2, 4), and again as standing between the Apostles and the brethren (xv. 23). Their office was to minister the grace of spiritual edification (see Ephes. iv. 11 in the *Speaker's Commentary*), by pasturing or feeding the Church of God (Acts xx. 28), by teaching (1 Tim. iii. 1, 2, v. 17; Tit. i. 9) and supervising the flocks over which the Holy Ghost had made them overseers or Bishops (Acts xx. 28; Phil. i. 1), and by praying with and for the members of their congregations (Jas. v. 14). Thus the Apostles would seem to have invested these Presbyters with the powers which they themselves exercised, excepting in respect to those functions which they discharged in relation to the general regimen of the whole Church as distinct from the several congregations which formed the whole body. These functions, by which they ministered the grace of government, they still reserved to themselves. By the year 44, therefore, there were in the Church of Jerusalem—(1) the Apostles holding the government of the whole body in their own hands; (2) Presbyters invested by the Apostles with authority for feeding and teaching men in each congregation; (3) Deacons or Evangelists similarly invested with the lesser power of preaching and of baptizing unbelievers, and of distributing the common goods among the brethren. The same order was established in the Gentile Churches founded by St. Paul, the only difference being that those who were called Presbyters in Jerusalem bore indifferently the name of Bishops (Phil. i. 1; 1 Tim. iii. 1, 2; Tit. i. 7) or of Presbyters (1 Tim. v. 17; Tit. i. 5) elsewhere.

It was in the Church of Jerusalem that another order of the ministry found its exemplar. The Apostles, we find, remained in Jerusalem (Acts viii. 1) or in the neighbourhood (viii. 14) till the persecution of Herod Agrippa in the year 44. The death of James the son of Zebedee, and the imprisonment and flight of Peter, were the signal for the dispersion of the Apostles. One remained behind—James the brother of the Lord, whom we identify with the Apostle, James the son of Alphaeus [JAMES]. He had not the same cause of dread as the rest. His Judaical asceticism and general character would have made him an object of popularity with his countrymen, and even with the pharisaical Herod. He remained unmolested, and from this time he is the acknowledged head of the Church of Jerusalem. A consideration of Acts xii. 17, xv. 13, 19; Gal. ii. 2, 9, 12; Acts xxi. 18, will remove all doubt on this head. Indeed, four years before Herod's persecution he had stood, it would seem, on a level with Peter (Gal. i. 18, 19; Acts ix. 27), and it has been thought that he received special instructions for the functions which he had to fulfil from the Lord Himself (1 Cor. xv. 7; Acts i. 3). Whatever his pre-eminence was, he appears to have borne no special title indicating it. The example of the Mother Church of Jerusalem was again followed by the Pauline Churches. Timothy and Titus had probably no distinctive title, but it is impossible to read the Epistles addressed to them without seeing that they had an authority superior to that of the ordinary Bishops or Priests with regard to whose conduct and ordination St. Paul gives them instruction (1 Tim. iii., v. 17, 19; Tit. i. 5). Thus, then, we see that where the Apostles were themselves able to superintend the Churches which they had founded, the Church-officers consisted of—(1) Apostles; (2) Bishops or Priests; (3) Deacons and Evangelists. When the Apostles were unable to give personal superintendence, they delegated that power which they had in common to one of themselves, as in Jerusalem, or to one in whom they had confidence, as at Ephesus and in Crete. As the Apostles died off, these apostolic delegates necessarily multiplied. By the end of the 1st century, when St. John was the only Apostle that now survived, they would have been established in every country, as Crete, and in every large town where there were several Bishops or Priests, such as the seven towns of Asia mentioned in the Book of Revelation. These superintendents appear to be addressed by St. John under the name of Angels (Rev. i.–iii.). With St. John's death the apostolic College was extinguished, and the apostolic delegates or Angels were left to fill their places in the government of the Church, not with the full power of the Apostles, but with authority which, though unrestricted in its own nature, was in practice exercised by each individual only within a limited district. In the next century we find that these officers bore the name of Bishops, while those who in the 1st century were called indifferently Presbyters or Bishops had now only the title of Presbyters. We conclude, therefore, that the title Bishop was gradually dropped by the second order of the ministry, and applied specifically to those who represented what James, Timothy, and Titus had been in the apostolic age. Theodoret says expressly, "The same persons were anciently called promiscuously both Bishops and Presbyters, whilst those who are now called Bishops were called Apostles; but shortly after, the name of Apostle was appropriated to such as were Apostles indeed, and then the name Bishop was given to those before called Apostles" (*Com. in 1 Tim.* iii. 1). There were therefore always three orders of the ministry in the Christian Church, but the name or title Bishop, which was in later times appropriated to the first order, was originally applied to the second order in common with that of Presbyter.

There are other names found in the Acts and in the Epistles which the light thrown backward by early ecclesiastical history shows us to have been the titles of those who exercised functions which were not destined to continue in the Church, but only belonging to it while it was being brought into being by help of miraculous agency. Such are prophets (Acts xiii. 1; Rom. xii. 6; 1 Cor. xii. 28; Eph. iv. 11), whose function was to proclaim and expound the Christian revelation, and to interpret God's will, especially as veiled in the Old Testament; and teachers (Acts xiii. 1; Rom. xii. 7), whose special work was to instruct those already admitted

into the fold, as contrasted with the Evangelists, who had primarily to instruct the heathen. Prophecy is one of the *extraordinary* χαρίσματα which were vouchsafed, and it is to be classed with the gifts of healing, of speaking with tongues, of interpretation of tongues, and discernment of spirits, the last of which was a power of distinguishing between the real and supposed possessors of spiritual gifts (1 Cor. xii.). Teaching (χάρισμα διδασκαλίας, Rom. xii. 6; 1 Cor. xii. 28) is one of the *ordinary* gifts, and is to be classed with the word of wisdom and the word of knowledge (1 Cor. xii. 8), perhaps with "faith" (ib. 9), with the gift of government (χάρισμα κυβερνήσεως, ib. 28), and with the gift of ministration (χάρισμα διακονίας or ἀντιλήψεως, Rom. xii. 6; 1 Cor. xii. 28). These χαρίσματα, whether extraordinary or ordinary, were "divided to every man as the Spirit willed," according to the individual character of each, and not officially. Those to whom the gifts of prophecy and teaching were vouchsafed were doubtless selected for the office of Presbyter;* those who had the gift of ministration, for the office of Deacon; those who had the gift of government, for the office of delegates and successors of the Apostles. In the Apostles themselves they all alike resided.

Its Doctrines.—These were found in the teaching of the Apostles, whether oral or written, and in the traditions and records of the teaching of the Master. But whereas some of the evangelic and apostolic statements were of less importance for the salvation of mankind than others (although all were equally true), the fundamental or necessary truths of Christianity were put together in the form of a Creed, in which every person to be admitted into the Church was bound to declare his belief by himself or by his representatives, before he was permitted to be baptized. This formula was the Baptismal Creed, which contained the essential doctrines of the Church in short compass, as the Holy Scriptures contained them diffusively. Of this Creed we have to this day a hardly changed form in what is commonly called the Apostles' Creed. The doctrines contained in it were as follows:—1. The doctrine of the existence of an Almighty God, Who created the heaven and the earth. 2. The doctrine of the Holy Trinity, involving the Fatherhood of God, the Sonship of Christ, and the Procession of the Holy Ghost. 3. The Incarnation of Christ, including His Conception by the Holy Ghost and His Birth of the Virgin Mary. 4. His Passion, Crucifixion, Death, and Burial. 5. His Ascension, Session at the Right Hand of God, and future Judgment. 6. God's forgiveness and acceptance of mankind. 7. A resurrection after death and eternal life. These were the chief dogmas of Revelation, and because the dogmas of Revelation also the dogmas of the Church. They formed a body of doctrines which might not be taken from or added to, although when assailed they might be more explicitly stated. Further truths, of the nature of corollaries, might be drawn from them, provided that such further truths were logically deduced and did not conflict with other truths resting on an equally good basis of logical deduction; for such truths were indeed connoted by the words of Scripture and the Baptismal Creed, if not directly stated in them. But no new truths, or supposed truths, could be added to the deposit, once for all delivered to the custody of the Church, on pain of anathema (Jude *v.* 3; 1 Tim. vi. 20; Gal. i. 6–9).

Its external Growth.—The 3,000 souls that were added to the Apostles and to the 120 brethren on the Day of Pentecost were increased daily by new converts (Acts ii. 47, v. 14). These converts were without exception Jews residing in Jerusalem, whether speaking Greek or Hebrew (vi. 1). After seven or eight years a step was made outwards. The persecution which followed the martyrdom of Stephen drove away the adherents of the new doctrines, with the exception of the Apostles, and "they that were scattered abroad went everywhere preaching the word" to the Jews of the Dispersion. Philip, in his capacity of Evangelist, preached Christ to the Samaritans, and admitted them into the Church by Baptism. In Philistia he made the first Gentile convert, but this act did not raise the question of the admission of the Gentiles, because the Ethiopian eunuch was already a proselyte (viii. 27), and probably a proselyte of Righteousness. Cornelius, the next Gentile convert, was a proselyte of the Gate (x. 2). The first purely Gentile convert that we hear of by name is Sergius Paulus (xiii. 7), but we are told that Cornelius' companions were Gentiles, and by their Baptism the admission of the Gentiles was decided by the agency of St. Peter, approved by the Apostles and Jewish Church (xi. 18), not, as might have been expected, by the agency of St. Paul. This great event took place after the peace caused by Caligula's persecution of the Jews, which occurred A.D. 40 (ix. 31), and more than a year before the famine, in the time of Claudius, A.D. 44 (xi. 26, 29). Galilee had already been evangelized as well as Judaea and Samaria, though the special agent in the work is not declared (ix. 31).

The history of the growth of the Gentile Church, so far as we know it, is identical with the history of St. Paul. In his three journeys he carried Christianity through the chief cities of Asia Minor and Greece. His method appears almost invariably to have been this: he presented himself on the Sabbath at the Jewish synagogue, and, having first preached the doctrine of a suffering Messiah, he next identified Jesus with the Messiah (xvii. 3). His arguments on the first head were listened to with patience by all, those on the second point wrought conviction in some (xvii. 4), but roused the rest to persecute him (xvii. 5). On finding his words rejected by the Jews, he turned from them to the Gentiles (xviii. 6, xxviii. 28). His captivity in Rome, A.D. 63–65, had the effect of forming a Church out of the Jewish and Greek residents in the imperial city, who seem to have

* It was thus that the class of Prophets and of Teachers, which existed under those names in the earliest times, would become merged in the order of Presbyters. The ministry which the earlier *Teaching of the Twelve Apostles* attributes to the Prophets (ch. xi.–xv.) is assigned by the later *Apostolical Constitutions* (bk. vii.) to Presbyters. The graces of Prophecy and Teaching would at once have indicated their possessors as men suitable for the permanent order of the Presbyterate.

been joined by a few Italians. His last journey may have spread the Gospel westward as far as Spain (Rom. xv. 28; Clemens, Eusebius, Jerome, Chrysostom). The death of James at Jerusalem and of Peter and Paul at Rome, A.D. 67, leaves one only of the Apostles presented distinctly to our view. In the year A.D. 70 Jerusalem was captured, and before St. John fell asleep, in A.D. 98, the Petrine and Pauline converts, the Churches of the circumcision and of the uncircumcision, had melted into one harmonious and accordant body, spreading in scattered congregations at the least from Babylon to Spain, and from Macedonia to Africa. How far Christian doctrine may have penetrated beyond these limits we do not know.

Its further Growth.—As this is not an ecclesiastical history, we can but glance at it. There were three great impulses which enlarged the borders of the Church. The first is that which began on the Day of Pentecost, and continued down to the conversion of Constantine. By this the Roman Empire was converted to Christ, and the Church was, speaking roughly, made conterminous with the civilized world. The second impulse gathered within her borders the hitherto barbarous nations formed by the Teutonic and Celtic tribes, thus winning, or, in spite of the overthrow of the Empire, retaining the countries of France, Scotland, Ireland, England, Lombardy, Germany, Denmark, Sweden, and Norway. The third impulse gathered in the Slavonian nations. The first of these impulses lasted to the 4th century, the second to the 9th century, the third (beginning before the second had ceased) to the 10th and 11th centuries. We do not reckon the Nestorian missionary efforts in the 7th century in Syria, Persia, India, and China, nor the post-Reformation exertions of the Jesuits in the East and West Indies, for these attempts have produced no permanent results. Nor again do we speak of the efforts now being made in Africa, India, Australia, and New Zealand, because it has not yet been proved whether they will be successful in bringing the natives of those countries within the fold of Christ.

V. *Alterations in its Constitution.*—We have said that ecclesiastical authority resided originally in the Apostles; next in the Apostles and the Deacons; then in the Apostles, the Presbyters, and the Deacons; then in the apostolic delegates, the Presbyters, and the Deacons; then in those who succeeded the apostolic delegates, the Presbyters, and the Deacons. And to these successors of the apostolic delegates came to be appropriated the title of Bishop, which was originally applied to Presbyters. At the commencement of the second century and thenceforwards Bishops, Presbyters, and Deacons are the officers of the Church wherever the Church existed. Ignatius' Epistles (in their unadulterated form) and the other records which are preserved to us are on this point decisive (see Pearson's *Vindiciae Ignatianae*, part ii. c. xiii. p. 534, ed. Churton; and Lightfoot's *S. Ignatius*, i. p. 375). Bishops were looked upon as Christ's Vicegerents (Cyprian, *Ep.* 55 [or 59] with Rigaltius' notes), and as having succeeded to the Apostles (Id. *Ep.* 69 [or 66] and 42 [or 45], Firmilian, Jerome), every Bishop's see being entitled a "sedes apostolica." They retained in their own hands authority over Presbyters, the function of ordination, and the general government of the Church, but with respect to each other they were equals whether their see was "at Rome or at Eugubium."

Within this equal college of Bishops there soon arose difference of rank though not of order. Below the city Bishops there sprang up a class of country Bishops (*chorepiscopi*), who were enabled to perform episcopal acts with the sanction of the city Bishops. Their position was ambiguous, and in the fifth century they began to decay and gradually died out.[b] Above the city Bishops there were, in the second century apparently, Metropolitans, and in the third, Patriarchs or Exarchs. The metropolitan was the chief Bishop in the civil division of the empire which was called a province (ἐπαρχία). His see was at the metropolis of the province, and he presided over his suffragans with authority similar to, but greater than, that which is exercised in their respective provinces by the two Archbishops in England. The authority of the patriarch or exarch extended over the still larger civil division of the empire which was called a dioecese. The ecclesiastical was framed in accordance with the exigencies and after the model of the civil polity. When Constantine, therefore, divided the empire into thirteen dioeceses, "each of which equalled the just measure of a powerful kingdom" (Gibbon, c. xviii.), the Church came to be distributed into thirteen (including the city and neighbourhood of Rome, fourteen) dioecesan, or, as we should say, national Churches. There was no external bond of government to hold these Churches together. They were independent self-ruled wholes, combined together into one greater whole by having one invisible Head and one animating Spirit, by maintaining the same faith, exercising the same discipline, and having as their chief officers Bishops, each one of whom had a potential jurisdiction throughout the whole of Christendom, though the exertion of that power was, as a matter of order, limited to a special see or province or diocese. The only authority which the Diocesan Churches recognised as capable of controlling their separate action, was that of an Oecumenical Council composed of delegates from each; and these Councils passed canon after canon forbidding the interference of the Bishop of any one dioecese, that is, district, or country, with the Bishop of any other dioecese. "Bishops outside a 'diocese' are not to invade the Churches across the borders, nor bring confusion into the Churches," says the second canon of the Council of Constantinople, "lest," says the eighth canon of the Council of Ephesus, "the pride of worldly power be introduced under cover of the priestly function, and by little and little we be deprived of the liberty which our Lord Jesus Christ, the deliverer of all men, has given us by His own

[b] An attempt was made to resuscitate this class in England, under the title of Suffragan Bishops, by the 26th Henry VIII. c. 14, by which twenty-six towns were named as the seats of Bishops, who were to be under the Bishops of the diocese in which they were situated. This Act, which had fallen into desuetude, was revived by Bishop Wordsworth of Lincoln, who consecrated a Bishop Suffragan of Nottingham in the year 1869, and his example has been followed by many other Bishops.

blood."[a] But there was a stronger power at work than any which could be controlled by canons. Rome and Constantinople were each the seats of imperial power, and symptoms soon began to appear that the patriarchs of the imperial cities were rival claimants of imperial power in the Church. Rome was in a better position for the struggle than Constantinople, for, besides having the prestige of being *Old* Rome, she was also of apostolic foundation. Constantinople could not boast an Apostle as her founder, and she was but *New* Rome. Still the imperial power was strong in the East when it had fallen in the West, and furthermore the Council of Chalcedon had so far dispensed with the canons and with precedent in respect to Constantinople as to grant the patriarch jurisdiction over three dioeceses, to establish a right of appeal to Constantinople from any part of the Church, and to confirm the decree of the second Council, which elevated the See of Constantinople above that of Alexandria and of Antioch. It was by the Pope of Constantinople that the first overt attempt at erecting a Monarchy was made; and by the Pope of Rome, in consequence, it was fiercely and indignantly denounced. John of Constantinople, said Gregory the Great, was destroying the patriarchal system of government (lib. v. 43; ix. 68); by assuming the profane appellation of Universal Bishop he was anticipating Antichrist (lib. vii. 27, 33), invading the rights of Christ, and imitating the devil (lib. v. 18). John of Constantinople failed. The successors of Gregory adopted as their own the claims which John had not been able to assert; and on the basis of the False Decretals of Isidore, and of Gratian's Decretum, Nicholas I., Gregory VII., and Innocent III. reared the structure of the Roman in place of the Constantinopolitan Papal Monarchy. From this time the federal character of the constitution of the Church was overthrown. In the West it became wholly despotic; and in the East, though the theory of aristocratical government was and is maintained, the still-cherished title of Oecumenical Patriarch indicates that it is weakness which has prevented Constantinople from erecting at least an Eastern, if she could not an Universal, Monarchy. In the 16th century a further change of constitution occurred. A great part of Europe revolted from the Western despotism. The Churches of England and Sweden returned to, or retained, the episcopal form of government after the model of the first centuries. In parts of Germany, of France, of Switzerland, and of Great Britain, a Presbyterian, or still less defined, form was adopted, while Rome tightened her hold on her yet remaining subjects, and by destroying all peculiarities of national liturgy and custom, and by depressing the order of Bishops except as interpreters of her decrees, converted that part of the Church over which she had sway into a jealous centralized absolutism.

VI. *The existing Church.*—Its members fall into three broadly-marked groups,—the Oriental Churches, the Latin Churches, the Teutonic Churches. The Oriental or Orthodox Greek Church consists of the Patriarchate of Constantinople with 127 sees, of Alexandria with 7 sees, of Antioch with 14 sees, of Jerusalem with 11 sees, of the Russian Church with 57 sees; besides which, there are in Cyprus 4 sees, in Austria 13 sees, in Montenegro 1 see, in Greece 40 sees, in Roumania 8 sees, in Bulgaria 13 sees. To these must be added—(1) The Assyrian or Nestorian Church, once spread from China to the Tigris, and from Lake Baikal to Cape Comorin, and ruled by twenty-five Metropolitans and a Patriarch possessing a plenitude of power equal to that of Innocent III. (Neale, *Eastern Church*, i. 143), but now shrunk to 13 sees. (2) The Christians of St. Thomas under the Bishop of Malabar. (3) The Syrian Jacobites, with 15 sees, under the Patriarch of Antioch, resident at Caramit or Diarbekir. (4) The Copts, with 16 sees, under the Coptic Patriarch of Egypt. (5) The Abyssinians, under the Abuna of Abyssinia; and (6) the Armenians, with 47 sees occupied by Bishops, under the Catholicos of all the Armenians residing at Etchmiadzin, and 43 vacant in consequence of persecution.

The Latin Churches are those of Italy with 270 sees, of Spain with 65, of France with 90, of Portugal with 22, of Belgium and Holland with 11, of Austria with 53, of Germany with 26, of Switzerland with 6. Besides these, the authority of the Roman See is acknowledged by 127 Asiatic Bishops, 12 African, 184 American, 84 European, and 23 Australian.

The Teutonic Churches consist of the Anglican communion, with 200 sees in Europe, Canada, the United States of America, the West Indies, Asia, Africa, Australia, and Oceanica; of the Old Catholic communion in Germany, Switzerland, and Holland, with 5 sees; of the Church of Sweden and Finland, with 14 sees; of Norway and Denmark, with 14 sees; of the Churches of Prussia, Holland, Scotland, and scattered congregations elsewhere.

The members of the Oriental Churches are supposed to number 80,000,000, of the Teutonic and Protestant Churches 98,000,000, of the Latin Churches 120,000,000, making a total of nearly 25 per cent. of the population of the globe.[d]

VII. *Definitions of the Church.*—The Greek Church gives the following:—"The Church is a divinely instituted community of men, united by the orthodox faith, the law of God, the hierarchy, and the Sacraments" (*Full Catechism of the Orthodox, Catholic, Eastern Church*; Moscow, 1839). The Latin Church defines it "the company of Christians knit together by the profession of the same faith and the communion of the same Sacraments, under the government of lawful pastors, and especially of the Roman Bishop as the only Vicar of Christ upon earth" (Bellarm. *de Eccl. Mil.* iii. 2; see also Devoti *Inst. Canon.* 1, § iv., Romae, 1818); the Church of England, "a congregation of faithful men in which the pure word of God is preached, and the Sacraments be duly ministered according to Christ's ordinance in all those things that of necessity are requisite to the same" (Art. xix.); the Lutheran Church, "a

[a] See Canons v., vi. of Nicaea; ii., iii., vi. of Constantinople; i., viii. of Ephesus; ix., xvii., xxvii., xxx., of Chalcedon.

[d] The Latin Church claims 200,000,000, counting as its members all the inhabitants of those countries in which the Roman Church is predominant, such as France, Spain, Italy, and South America.

congregation of saints in which the Gospel is rightly taught and the Sacraments rightly administered" (*Confessio Augustana*, 1631, Art. vii.); the Confessio Helvetica, "a congregation of faithful men called, or collected out of the world, the communion of all saints" (Art. xvii.); the Confessio Saxonica, "a congregation of men embracing the Gospel of Christ, and rightly using the Sacraments" (Art. xii.); the Confessio Belgica, "a true congregation, or assembly of all faithful Christians who look for the whole of their salvation from Jesus Christ alone, as being washed by His blood, and sanctified and sealed by His Spirit" (Art. xxvii.).

These definitions show the difficulty in which the different sections of the divided Church find themselves in framing a definition which will at once accord with the statements of Holy Scripture, and be applicable to the present state of the Christian world. We have seen that according to the Scriptural view the Church is a holy kingdom, established by God on earth, of which Christ is the invisible King; it is a divinely organised body, the members of which are knit together amongst themselves, and joined to Christ their Head, by the Holy Spirit, Who dwells in and animates it; it is a spiritual but visible society of men united by constant succession to those who were personally united to the Apostles, holding the same faith that the Apostles held, administering the same Sacraments, and like them forming separate, but only locally separate, assemblies, for the public worship of God. This is the Church according to the Divine intention. But as God permits men to mar the perfection of His designs in their behalf, and as men have both corrupted the doctrines and broken the unity of the Church, we must not expect to see the Church of Holy Scripture actually existing in its perfection on earth. It is not to be found, thus perfect, either in the collected fragments of Christendom, or still less in any one of these fragments; though it is possible that one of those fragments more than another may approach the scriptural and apostolic ideal, which existed only until sin, heresy, and schism had time sufficiently to develop themselves to do their work. It has been questioned by some whether Hooker, in his anxious desire after charity and liberality, has not founded his definition of the Church upon too wide a basis; but it is certain that he has pointed out the true principle on which the definition must be framed (*Eccl. Pol.* v. 68, 6). As in defining a man, he says, we pass by those qualities wherein one man excels another, and take only those essential properties whereby a man differs from creatures of other kinds, so in defining the Church, which is a technical name for the professors of the Christian religion, we must fix our attention solely on that which makes the Christian religion differ from the religions which are not Christian. This difference is constituted by the Christian religion having Jesus Christ, His revelation, and His precepts for the objects of its contemplations and the motive of its actions. The Church, therefore, consists of all who acknowledge the Lord Jesus Christ the blessed Saviour of mankind, who give credit to His Gospel, and who hold His Sacraments, the seals of eternal life, in honour. To go further, would be not to define the Church by that which makes it to be what it is, *i.e.* to declare the *being* of the Church, but to define it by accidents, which may conduce to its *well-being*, but do not touch its innermost nature. From this view of the Church the important consequence follows, that all the baptized belong to the visible Church, whatever be their divisions, crimes, misbeliefs, provided only they are not plain apostates, nor directly deny and utterly reject the Christian faith, so far as the same is professedly different from infidelity. "Heretics as touching those points of doctrine in which they fail; schismatics as touching the quarrels for which or the duties in which they divide themselves from their brethren; loose, licentious, and wicked persons, as touching their several offences or crimes, have all forsaken the true Church of God—the Church which is sound and sincere in the doctrine which they corrupt, the Church that keepeth the bond of unity which they violate, the Church that walketh in the laws of righteousness which they transgress, this very true Church of Christ they have left—howbeit, not altogether left nor forsaken simply the Church, upon the foundation of which they continue built notwithstanding these breaches, whereby they are *rent at the top* asunder" (Hooker, v. 68, 7).

VIII. *The Faith, Attributes, and Notes of the Church.*—The Nicene Creed is the especial and authoritative exponent of the Church's faith, having been adopted as such by the Oecumenical Councils of Nicaea and Constantinople, and ever afterwards regarded as the sacred summary of Christian doctrine. We have the Western form of the Creed, originally used as a Baptismal Creed, in that which is called the Creed of the Apostles — a name possibly derived from its having been the local Creed of Rome, which was the chief apostolic see of the West. An expansion of the same Creed, made in order to meet the Arian errors, is found in the Creed of St. Athanasius. The Confessions of Faith of the Synod of Bethlehem (A.D. 1672), of the Council of Trent (commonly known as Pope Pius IV.'s Creed, A.D. 1564), of the Synod of London (A.D. 1562), of Augsburg, Switzerland, Saxony, &c., stand on a lower level, as binding on the members of certain portions of the Church, and negativing certain prevalent errors or supposed errors, but not being the Church's Creeds. The *attributes* of the Church are drawn from the expressions of the Creeds. The Church is described as One, Holy, Catholic, Apostolic. Its Unity consists in having one object of worship (Ephes. iv. 6), one Head (Ephes. iv. 15), one body (Rom. xii. 5), one Spirit (Ephes. iv. 4), one faith (ib. 13), hope (ib. 12), love (1 Cor. xiii. 13); the same Sacraments (ib. x. 17), discipline, and worship (Acts ii. 42). Its Holiness depends on its Head and Spirit, the means of grace which it offers, and the holiness that it demands of its members (Ephes. iv. 24). Its Catholicity consists in its being composed of many national Churches, not confined as the Jewish Church to one country (Mark xvi. 15); in its enduring to the end of time (Matt. xxviii. 20); in its teaching the whole truth in contradistinction to partial aspects of it, and having at its disposal all the means of grace vouchsafed to man. Its Apostolicity, in being built on the foundation of the

Apostles (Ephes. ii. 20), and continuing in their doctrine and fellowship (Acts ii. 42). The *notes* of the Church are given by Bellarmine and theologians of his school, as being the title "Catholic," antiquity, succession, extent, papal succession, primitive doctrine, unity, sanctity, efficacy of doctrine, holiness of its authors, miracles, prophecy, confession of foes, unhappy end of opponents, temporal good-fortune (Bellarm. *Contr.* tom. ii. lib. iv. p. 1293; Ingoldst. 1580): by Dean Field as (1) the complete profession of the Christian faith; (2) the use of certain appointed ceremonies and Sacraments; (3) the union of men in their profession and in the use of these Sacraments under lawful pastors (*Of the Church*, bk. ii. c. ii. p. 65). It is evident that the notes by which the Church is supposed to be distinguished must differ according to the definition of the Church accepted by the theologian who assigns them, because the true notes of a thing must necessarily be the essential properties of that thing. But each theologian is likely to assume those particulars in which he believes his own branch or part of the Church to excel others as the notes of the Church Universal.

IX. *Distinctions.*—"For lack of diligent observing the differences first between the Church of God mystical and visible, then between the visible sound and corrupted, sometimes more sometimes less, the oversights are neither few nor light that have been committed" (Hooker, *Eccl. Pol.* iii. 1, 9). The word Church is employed to designate (1) the place in which Christians assemble to worship (possibly 1 Cor. xiv. 19); (2) a household of Christians (Col. iv. 15); (3) a congregation of Christians assembling from time to time for worship, but generally living apart from each other (Rom. xvi. 1); (4) a body of Christians living in one city assembling for worship in different congregations and at different times (1 Cor. i. 1); (5) a body of Christians residing in a district or country (1 Cor. xiii.); (6) the whole visible Church, including sound and unsound members, that is, all the baptized professors of Christianity, orthodox, heretical, and schismatical, moral or immoral; (7) the visible Church exclusive of the manifestly unsound members, that is, consisting of those who appear to be orthodox and pious; (8) the mystical or invisible Church, that is, the body of the elect known to God alone who are in very deed justified and sanctified, and never to be plucked out of their Saviour's hands, composed of the Church Triumphant and of some members of the Church Militant (John x. 28; Heb. xii. 22); (9) the Church Militant, that is, the Church in its warfare on earth—identical therefore with the Church visible; (10) the Church Triumphant, consisting of those who have passed from this world, expectant of glory now in Paradise, and to be glorified hereafter in heaven. The word may be fairly used in any of these senses; but it is plain that if it is employed by controversialists without a clear understanding in which sense it is used, inextricable confusion must arise. And such in fact has been the case.

X. *Literature.*—On the *Nature* of the Church the following books may be consulted:—*The Teaching of the Apostles*, ed. Bryennius; Constantinople, 1883. Cyprian, *De Unitate Ecclesiae*, Op. p. 75; Amst. 1700. Vincentius Lirinensis, *Commonitorium*, Vien. 1809; in English, Oxf. 1841. Cranmer, *Works*, i. 376, ii. 11; Cambr. 1843. Ridley, *Conference with Latimer*, p. 122; Cambr. 1843. Hooper, *Works*, ii. 41; Cambr. 1852. Becon, *Works*, i. 293, ii. 41; Cambr. 1843. Hooker, *Eccles. Polity*, iii. 1, v. 68, §§ 6 and 78; Oxf. 1863. Bellarmine, *De Conciliis et Ecclesia Disputat.* i. 1084; Ingolds. 1580. Casaubon, *Epistola ad Cardinalem Perronium*; Lond. 1875. CHURCHES, ROBBERS OF, Acts xix. 37; better (with R. V.) "robbers of temples" (*ἱεροσυλοί*). Dr. Hackett has pointed out that "churches," when the Authorized Version was made, denoted places of pagan as well as of Christian worship. This use of the word would not therefore have seemed at that time so incongruous as it does now (*D. B.* Amer. ed.). He refers to Trench, *The Authorized Version*, p. 42 (1859), for other examples of this wider usage in the older writers. [F.]

CHUSHAN-RISHATHA'IM (כּוּשַׁן רִשְׁעָתָיִם; Χουσαρσαθαΐμ; *Chusarsathaim*), a king of Mesopotamia (Aram-Naharaim) who oppressed Israel for eight years during the time of the Judges (Judg. iii. 8). The seat of his dominion was probably that district of Babylonia just north of Babylon, extending from the Euphrates to the boundary of Elam. As this name has not been, as yet, found in the cuneiform inscriptions, it is very likely that the king who bore it ruled over the wandering Arameans of Northern Babylonia; and who, the power of both Assyria and Babylonia being at this time at a very low ebb, made himself greatly feared in all the districts around. A great many Aramaean tribes are mentioned by Tiglath-pileser III., king of Assyria, in his annals. [T. G. P.]

CHU'SI (B. Χούς; A. Χουσεί; Vulg. omits), a place named only in Judith vii. 18, as near Ekrebel, and upon the brook Mochmur. In form Chusi is gentilic, and Movers (see *Speaker's Comm.* in loco) connected it with כּוּתִי, "Cuthite," i.e. Samaritans. It is now possibly *Kûzah*, a small village 5½ miles south of *Nâblus*, and about 5 miles west of *'Akrabeh*, Ekrebel. (*PEF. Mem.* ii. 285.) [W.]

CHU'ZA (properly **CHUZAS**), Χουζᾶς, the *ἐπίτροπος*, or house-steward of Herod (Antipas) whose wife Joanna (Ἰωάννα, יוֹחָנָה) became attached to that body of women who accompanied our Lord on His journeyings (Luke viii. 3); and, together with Mary Magdalen and Mary the *mother* of James, having come early to the sepulchre on the morning of the Resurrection, to bring spices and ointments to complete the burial, brought word to the Apostles that the Lord was risen (Luke xxiv. 10). [F.]

CIC'CAR (כִּכָּר). [JORDAN; TOPOGRAPHICAL TERMS.]

CILI'CIA (Κιλικία), a maritime province in the S.E. of Asia Minor, bordering on Pamphylia in the W., Lycaonia and Cappadocia in the N., and Syria in the E. Lofty mountain chains separate it from these provinces, Mons Amanus from Syria, and Antitaurus from Cappadocia: these barriers can be surmounted only by a few difficult passes; the former by the Portae Amanides at the head of the valley of the Pinarus, the latter by the Portae Ciliciae near

the sources of the Cydnus; towards the S. however an outlet was afforded between the Sinus Issicus and the spurs of Amanus for a road, which afterwards crossed the Portae Syriae in the direction of Antioch.* The sea-coast is rock-bound in the W., low and shelving in the E.; the chief rivers, Sarus, Cydnus, and Calycadnus, were inaccessible to vessels of any size from sand-bars formed at their mouths. The western portion of the province is intersected with the ridges of Antitaurus, and was denominated Trachaea, *rough*, in contradistinction to Pedias, the *level* district in the E. The latter portion was remarkable for its beauty and fertility, as well as for its luxurious climate: hence it became a favourite residence of the Greeks after its incorporation into the Macedonian empire, and its capital TARSUS was elevated into the seat of a celebrated school of philosophy. The connexion between the Jews and Cilicia dates from the time when it became part of the Syrian kingdom. Antiochus the Great is said to have introduced 2000 families of the Jews into Asia Minor, many of whom probably settled in Cilicia (Joseph. *Ant.* xii. 3, § 4). In the apostolic age they were still there in considerable numbers (Acts vi. 9). Cilician mercenaries, probably from Trachaea, served in the bodyguard of Alexander Jannaeus (Joseph. *Ant.* xiii. 13, § 5; *B. J.* i. 4, § 3). Josephus identified Cilicia with the Tarshish of Gen. x. 4: *Θαρσὸς δὲ Θαρσεῖς, οὕτως γὰρ ἐκαλεῖτο τὸ παλαιὸν ἡ Κιλικία* (*Ant.* i. 6, § 1). Cilicia was from its geographical position the high road between Syria and the West; it was also the native country of St. Paul; hence it was visited by him, firstly, soon after his conversion (Gal. i. 21; Acts ix. 30), on which occasion he probably founded the Church there; and again in his second apostolical journey, when he entered it on the side of Syria, and crossed Antitaurus by the Pylae Ciliciae into Lycaonia (Acts xv. 41). Cp. W. Barker's *Cilicia and its Governors*, 1853; T. Kotschy, *Reise in den cilicischen Taurus über Tarsus*, Gotha, 1858; Langlois, *Exploration archéologique de la Cilicie*, Paris, 1857, and *Voyage dans la Cilicie*, 1860; E. J. Davis, *Anatolica*, 1874, and *Life in Asiatic Turkey*, 1879; J. R. S. Sterrett, *Routes in Cilicia, Lycaonia, Isauria, Pisidia*, Archaeol. Inst. of Amer. iii. 1884–5, vi. 488. [W. L. B.] [J. E. S.]

CINNAMON (קִנָּמוֹן; *κινάμωμον*; *cinnamomum*), a well-known aromatic substance, the rind of the *Cinnamomum zeylonicum*, called *Korunda-gauhah* in Ceylon. It is mentioned in Ex. xxx. 23 as one of the component parts of the holy anointing oil, which Moses was commanded to prepare, in Prov. vii. 17 as a perfume for the bed, and in Cant. iv. 14 as one of the plants of the garden which is the image of the spouse. In Rev. xviii. 13 it is enumerated among the merchandise of the great Babylon. It was imported into Judaea by the Phoenicians or by the Arabians, and is now found in Sumatra, Borneo, China, &c., but chiefly, and of the best quality, in the S.W. part of Ceylon, where the soil is light and sandy, and the atmosphere *moist* with the prevalent southern winds. The stem and boughs of the cinnamon-tree are surrounded by a double rind, the exterior being whitish or grey, and almost inodorous and tasteless; but the inner one, which consists properly of two closely connected rinds, furnishes, if dried in the sun, that much-valued brown cinnamon which is imported to us in the shape of fine thin barks, eight or ten of which rolled one into the other form sometimes a quill. It is this inner rind which is called in Ex. xxx. 23, קִנְמֹן־בָּשֶׂם, "spicy cinnamon" (Kalisch *ad loc.*). From the coarser pieces oil of cinnamon is obtained, and a finer kind of oil is also got by boiling the ripe fruit of the tree. This last is used in the composition of incense, and diffuses a most delightful scent when burning.

Herodotus (iii. 111) ascribes to the Greek word *κιννάμωμον* a Phoenician, *i.e.* a Semitic origin. His words are: *ὄρνιθας δὲ λέγουσι μεγάλας φορέειν ταῦτα τὰ κάρφεα, τὰ ἡμεῖς ἀπὸ Φοινίκων μαθόντες κιννάμωμον καλέομεν.*

The reader is referred to Sir E. Tennent's *Ceylon* (i. 599) for much interesting information on the subject of the early history of the cinnamon plant; this writer believes that "the earliest knowledge of this substance possessed by the Western nations was derived from China, and that it first reached India and Phoenicia overland by way of Persia; at a later period when the Arabs, 'the merchants of Sheba,' competed for the trade of Tyre, and carried to her 'the chief of all spices' (Ezek. xxvii. 22), their supplies were drawn from their African possessions, and the cassia of the Troglodytic coast supplanted the cinnamon of the far East, and to a great extent excluded it from the market."

With regard to the origin of the word, it is probable that it is derived from the Persian *Cinnamon*, i.e. "Chinese amomum" (see Tennent in *l. c.*). Dr. Royle, however, conjectures that it is allied to the Cingalese *Cacynnama*, "sweet wood," or the Malagan *Kaimanis*. The brothers C. G. and Th. F. L. Nees von Esenbeck have published a valuable essay, "*De Cinnamomo disputatio*" (*Amoenitates botan. Bonnenses*, Fasc. i.; Bonnae, 1823, 4to), to which the reader is referred for additional information. [See also CASSIA.] [W. H.] [H. B. T.]

CIN'NEROTH, ALL (כָּל כִּנֶּרוֹת; B. *πᾶσαν τὴν Χεζράθ*, A. *Χενερέθ*; *universam Ceneroth*; R. V. *all Chinneroth*), a district named with the "land of Naphtali" and other northern places as having been laid waste by Benhadad king of Damascus, the ally of Asa king of Judah (1 K. xv. 20). It probably took its name from the adjacent city or lake of the same name (in other passages of the A. V. spelt CHINNEROTH); and was possibly the small enclosed district north of Tiberias, and by the side of the lake, afterwards known as "the plain of Gennesareth." The expression "All Cinneroth" is unusual, and may be compared with "All Bithron,"—probably, like this, a district and not a town. [G.] [W.]

CI'RAMA. The people of Cirama (B. *ἐκ Κειραμᾶς*, A. *Κιραμά*; *Gramas*) and Gabdes came up with Zorobabel from Babylon (1 Esd. v. 20). [RAMAH.] [F.]

CIRCUMCISION (מוּלָה; *περιτομή*; *circumcisio*) was peculiarly, though by no means

* Hence the close connexion which existed between Syria and Cilicia, as indicated in Acts xv. 23, 41; Gal. i. 21.

exclusively, a *Jewish* rite. It may conveniently be treated of, as practised: I. By the Jews; II. By other nations; and *III.* In its relation to Christianity.

I. *By the Jews.*—The *origin* of circumcision is still uncertain (see Bp. Harold Browne, *Speak. Comm.*, note A on Gen. xvii. 10. Cp. Dillmann,[3] *Genesis*, p. 254). Whether, however, an existing rite, as in the case of baptism, was used for the purpose, or whether it was then first instituted, it was enjoined upon Abraham by God, at the institution, and as the token, of the Covenant, into which He entered with him and his descendants (Gen. xvii.; cp. *διαθήκη περιτομῆς*, Acts vii. 8). It was thus made a necessary condition of Jewish nationality. Every male child was to be circumcised when eight days old on pain of death (Gen. xvii. 12, 14). Slaves, whether home-born or purchased, were to be circumcised (*vv.* 12, 13). The neglect of Moses to circumcise one of his children well-nigh brought upon him, as the culpable party, the threatened penalty of death (Ex. iv. 24–26). The conjecture of Calvin, that it was the younger of his two sons, and that he had abstained from circumcising him in consequence of the domestic strife caused by the circumcision of the elder child, seems probable. "Ego autem potius existimo, postquam in uno expertus fuerat domesticos sibi infensos, in secundo supersedisse, ut soceri vel uxoris indignationem vitaret." In some way, either by sudden and deadly sickness, or by some other visitation, "the Lord sought to kill him." It was only by promptly performing herself the rite, which Moses was probably too prostrate to perform (Hooker, *Eccl. Pol.* v. ch. lxii. § 20), that Zipporah averted the judgment, of which she rightly divined the cause, and won again, as a "bridegroom of blood," חֲתַן דָּמִים the husband, whom she thus a second time, as it were, made her own, by rescuing him from the jaws of death by the blood of her son. "Te veluti iterum sponsum acquirere cogor, sanguine filii mei profundendo" (Maurer).

The Mosaic Law adopted and incorporated into itself the patriarchal law of circumcision (John vii. 22). No foreigner could eat the Passover, unless all the males of his family were circumcised (Ex. xii. 48; cp. Num. ix. 14), so that he became in fact a Jew (cp. Esth. viii. 17, where in explanation of Heb. מִתְיַהֲדִים, "became Jews," the LXX. have, *περιετέμοντο καὶ Ἰουδάϊζον*). The strict rule of the eighth day was held to override, in this respect, the law of rest of the Sabbath (John vii. 23). The principle is distinctly recognised in the *Mishna* (*Sabb.* xix. 1). R. Akiva said: "Every work which can be done on the eve of the Sabbath, does not set aside the Sabbath; but circumcision, which cannot be done on the eve of the Sabbath [if the eve be the seventh day], sets aside the Sabbath" (Bp. Westcott in loco).

Various explanations have been given of the fact, that though the Israelites practised circumcision in Egypt, it was neglected entirely during their sojourn in the wilderness (Josh. v. 5). The most satisfactory account of the matter appears to be, that the nation, while bearing the punishment of disobedience in its prolonged wanderings, was regarded as under a temporary rejection by God, and was consequently prohibited from using the sign of the Covenant. This view is supported by the mention of their disobedience and its punishment, which, as though to give the reason for the omission of the rite, is immediately subjoined (*v.* 6). "Haec igitur causa notanda est, quod filii Israel vagati sint per desertum, donec tota illa gens aboleretur quae Deum sequi abnuerat: ex qua, meo judicio, colligere licet, in signum maledictionis vel rejectionis cessasse toto illo tempore circumcisionis usum" (Calv. in loco). The "forty years" (*v.* 6) will then be used as a round number for the more precise period (between 38 and 39 years), which had elapsed since the rebellion at Kadesh, and during which circumcision was in abeyance. And thus the prediction would be fulfilled, that the children of the murmurers, though they should eventually be brought in and know the land which their fathers had despised (Num. xiv. 31), should yet, by this temporary exclusion from the federal rite, as well as by sharing the privations of the desert, "bear the whoredoms" of their fathers (*v.* 33). The comment of Almighty God upon the transaction, as recorded by Joshua (*v.* 9). "This day have I rolled away the reproach of Egypt from you," is in harmony with this explanation of the passage. The "reproach of Egypt" is not that which the Egyptians regard as a reproach among themselves, *i.e.* uncircumcision, but the reproach cast upon the Jews by Egypt or the Egyptians, viz. the threatened taunt of their former masters that God had brought them into the wilderness to slay them (Ex. xxxii. 12; Num. xiv. 13–16; Deut. ix. 28), which, so long as they remained uncircumcised and wanderers in the desert for their sin, was in danger of falling upon them. Now that they were actually within the confines of the promised land, and had been solemnly received back again as a nation into covenant with God, that "reproach" was effectually and for ever "rolled away" (see Fairbairn, *Typology*, ii. Cp. also Keil and Dillmann[2] in loco).

Among the ancient Jews, as among other nations in early times, circumcision was performed with stone knives. [KNIFE.] The implement which Zipporah used, is simply called "a stone" (צֹר). The circumcision under Joshua was done with "knives of stone," חַרְבוֹת צֻרִים, Josh. v. 2, where the rendering, "sharp knives" (R. V. "knives of flint") cannot be maintained; for though צוּר חָרְבּוֹ means "the edge of his sword" (Ps. lxxxix. 44), yet there is no other example of that meaning of the word, and the fact that Joshua's knives were of stone is confirmed by the interesting addition of the LXX. in Josh. xxiv. 30: *ἐκεῖ ἔθηκαν μετ' αὐτοῦ εἰς τὸ μνῆμα εἰς ὃ ἔθαψαν αὐτὸν ἐκεῖ τὰς μαχαίρας τὰς πετρίνας, ἐν αἷς περιέτεμε τοὺς υἱοὺς Ἰσραὴλ ἐν Γαλγάλοις, κ.τ.λ.* The later Jews used iron or steel knives (see Maurer on Josh. v. 2). It has been thought that in early times the Egyptians used stone knives for circumcision, and that certain stone knives found in the tombs of Thebes were intended for the purpose. This, however, appears to be questionable (it is not mentioned in Wilkinson, *Anc. Egypt.* ii. 163–4 [1878]). The process was a painful one, at least to grown-up persons (Gen. xxxiv. 25; Josh. v. 8).

The fact that Abraham received a new name at the time of his circumcision (Gen. xvii. 5), and his having probably given Isaac his name when he circumcised him (ib. xxi. 3, 4), may have led to the custom, of which we have examples in the history of our Lord and His forerunner (Luke i. 59; ii. 21), of naming children at their circumcision.

II. *By other nations.*—The use of circumcision by other nations besides the Jews is to be gathered almost entirely from sources extraneous to the Bible. The rite has been found to prevail extensively both in ancient and modern times; and among some nations, as, for instance, the Abyssinians, Nubians, modern Egyptians, and Hottentots, a similar custom is said to be practised by both sexes (see the *Penny Cyclopaedia*, art. "Circumcision"). In the Bible, however, the rite is described as distinctively, if not exclusively, Jewish. Circumcision certainly belonged to the Jews as it did to no other people, by virtue of its Divine institution, of the religious privileges which were attached to it, and of the strict regulations which enforced its observance. Moreover, the O. T. history incidentally discloses the fact, that several of the nations with whom the Israelites came in contact were uncircumcised. One tribe of the Canaanites, the Hivites, were so, as appears from the story of Hamor and Shechem (Gen. xxxiv.). To the Philistines the epithet "uncircumcised" is constantly applied (Judg. xiv. 3, &c. Hence the force of the narrative, 1 Sam. xviii. 25–27). From the great unwillingness of Zipporah to allow her son to be circumcised (Ex. iv. 25) it would seem that the Midianites, though descended from Abraham by Keturah (Gen. xxv. 2), did not practise the rite. At the same time, the biblical references to the subject, when carefully examined, cannot be held definitely to affirm anything either way, as regards the circumcision or uncircumcision of the Egyptians and some other nations of antiquity. They do amount to a general division of mankind into two classes, circumcised and uncircumcised, *i.e.* Jews and Gentiles; but they do not necessarily exclude all Gentiles from the former class. It must also be remembered that the testimony of secular writers, as regards some, at least, of the nations who are said to have practised circumcision, is conflicting and uncertain. The origin of the custom amongst one large section of those Gentiles who follow it, is to be found in the biblical record of the circumcision of Ishmael (Gen. xvii. 25). Josephus relates that the Arabians circumcise after the thirteenth year, because Ishmael, the founder of their nation, was circumcised at that age (*Ant.* i. 12, § 2; see Lane's *Mod. Eg.* ch. ii.). Though Mohammed did not enjoin circumcision in the Koran, he was circumcised himself, according to the custom of his country; and circumcision is now as common amongst the Mohammedans as amongst the Jews.

Another passage in the Bible has been thought by some to speak of certain Gentile nations as circumcised. In Jer. ix. 25, 26 (Heb. 24, 25), whether we translate the confessedly difficult expression (כָּל־מוּל בְּעָרְלָה, v. 24) with A. V. "all them which are circumcised with the uncircumcised" (which, however, is grammatically doubtful); or with *Michaelis* and *Ewald*, "all the uncircumcised circumcised ones" (the passage being understood to describe the Egyptians, Jews, Edomites, Ammonites, and Moabites, as alike circumcised in flesh and uncircumcised in heart); or with R. V. "all them which are circumcised in *their* uncircumcision;" or whether we regard the best rendering to be, "I will punish every one that is circumcised in the manner or character of—*i.e.* as, or like—him that is uncircumcised" (cf. בְּבֶסֶף, Is. xlviii. 10; בְּצֶלֶם, Ps. xxxix. 7); at any rate, the next verse makes a plain distinction between two classes, of which "all the Gentiles" (כָּל־הַגּוֹיִם), including, generally, the Egyptians and others just named, were one, and the house of Israel was the other; the former being uncircumcised both in flesh and heart, the latter, though possessing the outward rite, yet destitute of the corresponding state of heart, and therefore to be visited as though uncircumcised. The difficulty then arises, that the Egyptians are called uncircumcised, whereas Herodotus and others state that they were circumcised. To meet this it has been alleged that those statements refer only to the priests and those initiated into the mysteries, so that the nation generally might still be spoken of as uncircumcised (Herod. ii. 36, 37, 104; and Wesseling and Bähr in loco. See, however, on the other side, Wilkinson, *Anc. Egypt.* [large ed.], c. xv., who says, that "if the law did not peremptorily require it for every individual, custom and public opinion tended to make it universal"). The testimony of Herodotus must no doubt be received with caution, especially as he asserts (ii. 104) that the "Syrians in Palestine" confessed to having received circumcision from the Egyptians, who, with the Colchians and Ethiopians, were the only nations that practised it originally. If he means by "Syrians" the Jews, the assertion, though it has been ably defended (see Spencer, *de Leg. Heb.*, i. 5, § 4), cannot be reconciled with Gen. xvii. and John vii. 22. Indeed, the very reverse has been suggested, viz. that Joseph introduced it into Egypt. "If it were previously unknown, no person was more likely than Joseph to have introduced it among the Egyptians; and this is possibly the true solution of an acknowledged difficulty." The first distinct representation of the rite is found on a monument of the 19th dynasty, long after the time of Joseph: two sons of Rameses II. are pictured as undergoing it (*Speak. Com.* vol. i. p. 480). If other Syrian tribes are intended by Herodotus, we have the contradiction of Josephus, who writes, "It is evident that no other of the Syrians that live in Palestine besides us alone are circumcised" (*Ant.* viii. 10, § 3. See Whiston's note there). Of the other nations mentioned by Jeremiah, the Moabites and Ammonites were descended from Lot, who had left Abraham before he received the rite of circumcision; and the Edomites cannot be shown to have been circumcised until they were compelled to be so by Hyrcanus (Joseph. *Ant.* xiii. 9, § 1). The terms, however, of Jeremiah's classification are, as has been said, *general*. They prepare the way for the N. T. usage, which unmistakably represents Jews and Gentiles respectively, as the circumcision and the uncircumcision (*περιτομὴ* and *ἀκροβυστία*, Rom. iii. 30, iv. 9; Ephes. ii. 11). The use by

Ezekiel of the word "uncircumcised" (xxviii. 10; xxxi. 18; xxxii. 19, 21, 25, 27) belongs to the same general way of describing the Gentiles, the impure heathen (cp. *οἱ βάρβαροι*, as employed by the Greeks). The subject is fully discussed by Michaelis (*Commentaries on the Laws of Moses*, iv. 3, clxxxiv.–clxxxvi.).

III. *In its relation to Christianity.*—As might have been expected, the Christian Church was called upon at an early stage in its history to take up a definite position with reference to circumcision. The question first assumed serious proportions at Antioch, where the peace of the Church was disturbed by Judaizing teachers who said to the Gentile converts, "Except ye be circumcised after the manner of Moses, ye cannot be saved" (Acts xv. 1). A reference of this question to "the Apostles and elders" at Jerusalem led to the clear and authoritative decision, that the Gentiles were entirely free from all obligation to undergo circumcision (*vv.* 22–29). The controversy was renewed some years later in Galatia, and called forth the Epistle of St. Paul, in which the earlier decision of the Apostles is emphatically, though independently, repeated and enforced. Neither to Jew nor Gentile is circumcision any longer of any religious or moral value (Gal. v. 6; vi. 15. Cp. 1 Cor. vii. 19). To undergo it, as if it were, is to sever oneself from Christ (Gal. v. 3, *περιτεμνομένῳ*). While, however, the Apostles thus resolutely forbade the imposition of the rite as necessary to salvation, they made no objection to its practice as a matter of sentiment or expediency. St. Paul, who would by no means consent to the demand, urged as it was with doctrinal significance and sinister intention, for Titus, who was a Greek, to be circumcised (Gal. ii. 3–5), yet on another occasion, true to his rule of becoming all things to all men in things indifferent, "took and circumcised" Timothy, who was of mixed extraction, to remove a prejudice against his preaching among the Jews (Acts xvi. 3).

In harmony with this view of the indifference of circumcision, in itself considered, is the advice given by St. Paul to the Corinthian Church. It was possible, by a surgical operation, for those who had been circumcised to obliterate the marks of the process and return to their natural condition (Celsus, *de re Medica*, vii. 25). Some of the Jews in the time of Antiochus Epiphanes, wishing to assimilate themselves to the heathen around them, built a gymnasium at Jerusalem, and that they might not be known to be Jews, when they appeared naked in the games, "made themselves uncircumcised" (1 Macc. i. 15, *ἐποίησαν ἑαυτοῖς ἀκροβυστίας*; *fecerunt sibi praeputia*. Cp. Joseph. *Ant.* xii. § 5, 1: *τὴν τῶν αἰδοίων περιτομὴν ἐπικαλύπτειν, κ.τ.λ.*; and see the essay of Groddeck in Schottgen's *Hor. Hebr.* ii.). Should Christian Jews, then, adopt this practice? Should they give this proof that they had broken entirely with Judaism? By no means, is the Apostle's reply. "Was any man called being circumcised? let him not become uncircumcised" (*μὴ ἐπισπάσθω*). On the other hand, he adds, "Hath any been called in uncircumcision? let him not be circumcised." And the reason for both injunctions is, that "circumcision is nothing, and uncircumcision is nothing; but the keeping of the commandments of God" (1 Cor. vii. 18, 19). The Abyssinian Christians are said still to practise circumcision as a national custom.

While, however, it thus dealt with the outward rite and with the false meaning that was sought to be put upon it, Christianity, as was no less certainly to be expected, seized upon and appropriated the true spiritual significance of circumcision. For this the way had been prepared in the O. T. Employed by Moses to describe his own physical inaptitude and natural slowness of speech (cp. Ex. vi. 12, 30 *with* iv. 10), the epithet "uncircumcised" is also applied by him and other O. T. writers to spiritual dulness and want of perception. "Uncircumcised ears" (Jer. vi. 10) and "uncircumcised hearts" (Lev. xxvi. 41) are spoken of (see also Deut. xxx. 6; Jer. iv. 4; and cp. Acts vii. 51: the idea being, according to Gesen. *Heb. Lex.* s. v. עָרַל, that lips, or heart, or ears were "closed as it were with the foreskin"). The more general idea of impurity seems pointed at in the words of Isaiah, "The uncircumcised and the unclean;" and in the provision that the fruit of newly-planted trees should be counted "uncircumcised" for the first three years, and not eaten till by consecration to God in the fourth year they had been made clean (Lev. xix. 23–25). In the N. T. the moral and spiritual idea is fully developed. Circumcision is declared to be "that of the heart, in the spirit and not in the letter" (Rom. ii. 29). While those who ascribed efficacy to the mere outward rite are contemptuously styled "the concision" (Philip. iii. 2, 3, *τὴν κατατομήν*, "the mutilation." "This circumcision which they vaunt, is in Christ only as the gashings and mutilations of the idolatrous heathen: cp. Gal. v. 12, *ὄφελον καὶ ἀποκόψονται*." Lightf. in *loco*), the title of the true "circumcision" is claimed for Christians, "who have put off the impurity of the heart and have put on Christ." They, though once dead "through the uncircumcision of their flesh," are now in Christ "circumcised with a circumcision not made with hands, in the circumcision of Christ" (Col. ii. 11, 13).

The view that the rite was designed to be significant of the production of a holy seed is maintained at length by Kurtz, *Hist. of the Old Coven.* § 58, i. 234; Fairbairn, *Typology*, i. 321. [T. T. P.]

CIS (Rec. T. Κίς; Westcott and Hort, Κεὶς; *Cis*), Acts xiii. 21. [KISH, 1.]

CI'SAI (Κισαῖος; *Cisi*), Esth. xi. 2. [KISH, 2.]

CISTERN (בּוֹר, from בָּאַר, *to dig* or *bore*, Gesen. p. 176; usually λάκκος; *cisterna* or *lacus*), a receptacle for water, either conducted from an external spring, or proceeding from rainfall.

The annual rainfalls of Jerusalem on an average of twelve years is not more than 16·25 inches, and the general dryness of the summer months between May and September, in Syria, and the scarcity of springs in many parts of the country, make it necessary to collect in reservoirs and cisterns the rain-water which falls in the intermediate period (Shaw, *Travels*, p. 335; St. Jerome, quoted by Harmer, i. 148; Robinson, i. 430; Kitto, *Phys. Geogr. of H. L.* pp. 302, 308;

Recovery of Jerus. p. 25; Sir C. Wilson, *Notes on Water Supply of Jerus.* p. 63). Thus the cistern is essentially distinguished from the living spring (עַיִן, *Ain*); but from the well (בְּאֵר, *Beer*), only in the fact that *Beer* is almost always used to denote a place ordinarily containing water rising on the spot, while בּוֹר, *Bór*, is often used for a dry pit, or one that may be left dry at pleasure (Stanley, *S. & P.* pp. 512, 514). [AIN.] The larger sort of public tanks or reservoirs, in Arabic, *Birkeh*, Heb. *Berecah*, are usually called in A. V. "pool," while for the smaller and more private it is convenient in the present article to reserve the name "cistern."

Both birkehs and cisterns are frequent throughout the whole of Syria and Palestine, and for the construction of them the rocky nature of the ground affords peculiar facilities either in original excavation, or by enlargement of natural cavities. Dr. Robinson remarks that the inhabitants of all the hill-country of Judah and Benjamin are in the habit of collecting water during the rainy season in tanks and cisterns, in the cities and fields, and along the high roads, for the sustenance of themselves and their flocks, and for the comfort of the passing traveller. Jerusalem, described by Strabo as well supplied with water, in a dry neighbourhood (xvi. p. 760), depends mainly for this upon its cisterns, of which almost every private house possesses one or more, excavated in the rock on which the city is built. Josephus (*B. J.* iv. 4, § 4) describes the abundant provision for water supply in the towers and fortresses of Jerusalem, a supply which has contributed greatly to its capacity for defence, while the dryness of the neighbourhood, verifying Strabo's expression τὴν κύκλῳ χώραν ἔχον λυπρὰν καὶ ἄνυδρον, has in all cases hindered the operations of besiegers. Thus Hezekiah stopped the supply of water outside the city in anticipation of the attack of Sennacherib (2 Ch. xxxii. 3, 4). The progress of Antiochus Sidetes, B.C. 134, was at first retarded by want of water, though this want was afterwards unexpectedly relieved (Joseph. *Ant.* xiii. 8, § 2; Clinton, iii. p. 331). Josephus imputes to Divine interposition the supply of water with which the army of Titus was furnished after suffering from want of it (*B. J.* v. 9, § 4). The Crusaders also, during the siege A.D. 1099, were harassed by extreme want of water while the besieged were fully supplied (Matth. Paris, *Hist.* pp. 46, 49, ed. Wat.). The defence of Masada by Joseph, brother of Herod, against Antigonus, was enabled to be prolonged, owing to an unexpected replenishing of the cisterns by a shower of rain (Joseph. *Ant.* xiv. 15, § 2), and in a subsequent passage he describes the cisterns and reservoirs by which that fortress was plentifully supplied with water, as he had previously done in the case of Jerusalem and Machaerus (*B. J.* iv. 4, § 4, 6, § 2; vii. 8, § 3). Benjamin of Tudela says that very little water is found at Jerusalem, but the inhabitants drink rain-water, which they collect in their houses (*Early Trav.*, p. 84). Cisterns, both at Jerusalem and in other parts of the country, may be divided into four classes: 1. The most ancient, and usually the smallest, consisting of excavations from the rock, and shaped like a full-bodied bottle, with a long neck and a small opening. 2. Larger excavations of a somewhat similar kind, supported below by rock-pillars left standing by the workmen. 3. Excavations in which the rock has been cut perpendicularly, and the opening covered by an arch with a mouth like an ordinary well. 4. The modern cisterns, built in the soil, and supplied by rain from roofs and terraces. Dr. Robinson describes four belonging to the house in which he resided. (1) 15×8×12 ft. in depth; (2) 8×4×15 ft.; (3) 10×10×15 ft.; (4) 30 × 30 × 20 ft. The cisterns have usually a round opening at the top, sometimes built up with stonework and furnished with a curb and wheel for the bucket (Sir C. Wilson, *Notes*, pp. 48, 53; Robinson, i. 324, 325). Cisterns of the first kind are common in all parts of the country, and when neglected became dangerous pitfalls. Sometimes the rock is cracked and the cistern is thus "broken" and useless (Jer. ii. 13, xviii. 13, xxxviii. 6; Thomson, *Land and the Book*, p. 287; *Survey of West. Pal.* iii. App. p. 441; *PEFQy. Stat.* 1872, p. 17; *Recovery of Jerus.* pp. 19, 23). When neglected cisterns become very foul, the water is very unwholesome (Wilson, pp. 17, 69).

Burckhardt mentions cisterns belonging to private houses, among other places, at Sermein near Aleppo (*Syria*, p. 121), El Bara in the Orontes valley (p. 132), Dhami and Missema in the Lejah (pp. 110, 112, 118), Tiberias (p. 331), Kerek in Moab (p. 377), Mount Tabor (p. 334). Of some at Hableh, near Gilgal, the dimensions are given by Robinson:—(1) 7 × 5 × 3 ft. deep. (2) Nearly the same as (1). (3) 12×9×8 ft. They have one or two steps to descend into them, as is the case with one near Gaza, now disused, described by Sandys as "a mighty cistern, filled only by the rain-water, and descended into by stairs of stone" (Sandys, p. 150; Robinson, ii. 39). Of those at Hableh, some were covered with flat stones resting on arches, some entirely open, and all evidently ancient (Robinson, iii. 137).

Empty cisterns were sometimes used as prisons and places of confinement. Joseph was cast into a "pit," בּוֹר (Gen. xxxvii. 22), and his "dungeon" in Egypt is called by the same name (xli. 14). Jeremiah was thrown into a miry though empty cistern, whose depth is indicated by the cords used to let him down. To this prison tradition has assigned a locality near the gate called Herod's Gate (Hasselquist, p. 140; Maundrell, *Early Trav.* p. 448). Vitruvius (viii. 7) describes the method in use in his day for constructing water tanks, but the native rock of Palestine usually superseded the necessity of more art in this work than is sufficient to excavate a basin of the required dimensions.

The city of Alexandria is supplied with water contained in arched cisterns supported by pillars, extending under a great part of the old city (Van Egmont, *Travels*, ii. 134). [POOL; WELL.]

[H. W. P.]

CITHERN is no doubt, on the whole, identical with the modern German Zither; and is, as its name indicates, a musical instrument of the guitar family. True, there are now points of considerable difference between the guitar and the Zither (cithern), both in shape and the nature of the strings, &c. These differences are, however, natural enough after hundreds of years of independent development of the two instru-

ments. Κιθάρα (guitar) and Zither resemble too closely one another in name not to have been originally the same.

Although the cithern is mentioned as having been one of the instruments used at the re-dedication of the Temple and Altar (1 Macc. iv. 54, . . . καὶ κιθάραις καὶ κινύραις, καὶ ἐν κυμβάλοις, κ. τ. λ.), it was an instrument, though probably known to the early Jews (HARP), not generally used by them.

Cithern makes its first appearance in the Hebrew Bible in the late and half-Aramaic Daniel, where it occurs, in one spelling or other, four times (iii. 5, 7, 10, 15). The origin of its peculiar construction is certainly not Greek, but Persian. The Greeks borrowed it from the Persians, in whose language *Se Tara* (cithern, *κιθάρα*, guitar) has a meaning ("three strings"). [S. M. S.-S.]

CITIES. 1. עָרִים, plur. of both עָר, *Ar*, and also עִיר, *Ir*, from עוּר, *to keep watch*—Ges. pp. 1004–5; once (Judg. x. 4) in plur. עֲיָרִים, for the sake of a play on the same word, plur. of עַיִר, *a young ass*; πόλεις; *civitates*, or *urbes*. 2. קִרְיַת, *Kirjath*; once in dual, קִרְיָתַיִם, *Kirjathaim* (Num. xxxii. 37), from קָרָה, *approach as an enemy*; prefixed to many names of towns on both sides of the Jordan existing before the conquest, as Kirjath-arba, probably the most ancient name for city, but seldom used in prose as a general name for town (Ges. p. 1236; Stanley, *S. & P.* App. § 80).

The classification of the human race into dwellers in towns and nomade wanderers (Gen. iv. 20, 22) seems to be intimated by the etymological sense of both words, *Ar* or *Ir*, and *Kirjath*, viz. as places of security against an enemy, distinguished from the unwalled village or hamlet, whose resistance is more easily overcome by the marauding tribes of the desert. This distinction is found actually existing in countries, as Persia and Arabia, in which the tent-dwellers are found, like the Rechabites, almost side by side with the dwellers in cities, sometimes even sojourning within them, but not amalgamated with the inhabitants, and in general making the desert their home, and, unlike the Rechabites, robbery their undissembled occupation (Judg. v. 7; Jer. xxxv. 9, 11; Fraser, *Persia*, pp. 366, 380; Malcolm, *Sketches of Persia*, pp. 147–156; Burckhardt, *Notes on Bedouins*, i. 157; Wellsted, *Travels in Arabia*, i. 335; Porter, *Damascus*, ii. 96, 181, 188; Vaux, *Nineveh and Persepolis*, c. ii. note A; Layard, *Nineveh*, ii. 272; *Nin. & Bab.* 141). [VILLAGES.]

The earliest notice in Scripture of city-building is that of Enoch, by Cain, in the land of his exile (נוֹד, *Nod*, Gen. iv. 17). At a period much later than this, when we read of the manner in which the earth was "overspread" by the descendants of Noah, we see that the races which came from Ham were planted in Egypt, in Syria, and in Chaldaea (Gen. x. 6, 9, 12). Later still we read of an Egyptian city, Zoan, whose foundation is said to have taken place seven years later than that of Hebron in Syria (Num. xiii. 22), *i.e.* quite as early as 2,080 B.C. And we also read that the Hebrews were employed by the Egyptians to build treasure-cities, Pithom and Raamses, during their time of bondage in that country, *i.e.* between 1700 and 1600 B.C. (Ex. i. 11). But there is evidence from monuments to show that cities were built in Egypt at least as early as 3,000 B.C. (Smith, *Hist. of World*, i. 85; Fergusson, *Hist. of Arch.* i. 89 sq.), but at a date not much later than this cities were built in Chaldaea, both Lower and Upper, and in Assyria, both by the Cushite and the Semitic races. The builder whose name is most conspicuous is Nimrod, son of Cush, the "mighty hunter," or conqueror of men, and the most prominent names among the cities are those of Babel and Nineveh (Gen. x. 8–12). Babel was probably the oldest in date; and perhaps Nineveh with its companions, Calah, Resen the "great city," and Rehoboth, though this word probably only denotes "streets" of some other city, was founded later by a race of Semitic origin, denoted by Asshur, son of Shem, who had moved upwards under the pressure of the Cushite settlers (Rawlinson, *Anc. Mon.* i. 15, 155). But we are told that the beginning of Nimrod's kingdom was not only in Babel, but in Erech, Accad, and Calneh, all in the land of Shinar. Of these names Accad may perhaps denote a people rather than a place, but those of Erech are in all probability connected with the extensive remains of a temple, within a large enclosure at Warka in Lower Chaldaea, of which the lowest courses of bricks bear the name of its founder, *Urukh*, and are of a date not much later than that assigned to Nimrod, about 2,300 B.C. Calneh is probably represented by Niffer, while to these three we may add a fourth, "Ur of the Chaldees," the original abode of Abraham, represented by the mass of brick ruins to which the Arabs have given the name of Mugheir, "mother of bitumen" (Loftus, *Chaldaea*, p. 131; Rawlinson, *Anc. Mon.* i. 153, 158; Smith, *Hist. of World*, i. 205; Pietro della Valle, *Viaggi*, ii. 844, 862). But there is good reason to believe that a race, whose descendants or successors were called Medes, of Semitic origin, occupied the region called Elam, or Susiana, quite as early as the time mentioned above, if not earlier, and that the seat of their government was at the place which either then or in later times obtained the name of Susa, and which thus has a claim to be regarded as one of the most ancient cities of the world (Gen. x. 22; Rawlinson, i. 160). When Chederlaomer, one of the early kings of Elam, but perhaps of Hamite origin, invaded Syria about 1946 B.C., he found there on its eastern side cities inhabited by Canaanites; and we know that at the same time, and even earlier than this, cities, as Damascus, Kirjath-arba (Hebron), and perhaps Sidon, had been built in other parts of the same region by other races of the same or kindred stock as the Canaanites (Gen. x. 19; xiv. 15, 18; xxiii. 2).

In course of time the settled inhabitants of Syria on both sides of the Jordan grew in power and in number of cities. In the kingdom of Sihon are many names of cities preserved to the present day; and in the kingdom of Og, in Bashan, were sixty "great cities with walls and brazen bars," besides unwalled villages; and also twenty-three cities in Gilead, which were occupied and perhaps partly rebuilt or fortified by the tribes on the east of Jordan (Num. xxi.

21, 32, 33, 35, xxxii. 1–3, 34, 42; Deut. iii. 4, 5, 14; Josh. xi. xiii.; 1 K. iv. 13; 1 Ch. ii. 22; Burckhardt, *Syria*, pp. 311, 457; Porter, *Damascus*, ii. 195, 196, 206, 259, 275).

On the west of Jordan, at the time of the occupation by the Hebrews, whilst 31 "royal" cities are enumerated (Josh. xii.), in the district assigned to Judah 125 "cities" with villages are reckoned (Josh. xv.); in Benjamin, 26; Simeon, 17; Zebulun, 12; Issachar, 16; Asher, 22; Naphtali, 19; Dan, 17 (Josh. xviii. xix.). But from some of these the possessors were not expelled till a late period, and Jerusalem itself was not captured till the time of David (2 Sam. v. 6–9).

From this time the Hebrews became a city-dwelling and an agricultural rather than a pastoral people. David enlarged Jerusalem, and Solomon, besides embellishing his capital, also built or rebuilt Tadmor, Palmyra, Gezer, Bethhoron, Hazor, and Megiddo, besides store-cities (2 Sam. v. 7, 9, 10; 1 K. ix. 15–18; 2 Ch. viii. 6). To Solomon also is ascribed by Eastern tradition the building of Persepolis (Chardin, *Voyage*, viii. 390; Mandelslo, i. 4; Kurân, c. xxxviii.).

The works of Jeroboam at Shechem (1 K. xii. 25; Judg. ix. 45), of Rehoboam (2 Ch. xi. 5–10), of Baasha at Rama, interrupted by Asa (1 K. xv. 17, 22), of Omri at Samaria (xvi. 24), the rebuilding of Jericho in the time of Ahab (xvi. 34), the works of Jehoshaphat (2 Ch. xvii. 12), of Jotham (2 Ch. xxvii. 4), the rebuilding of Jerusalem, and later still, the works of Herod and his family, belong to their respective articles.

Collections of houses in Syria for social habitation may be classed under three heads:—1, cities; 2, towns with citadels or towers for resort and defence; 3, unwalled villages. The cities may be assumed to have been in almost all cases "fenced cities," *i.e.* possessing a wall with towers and gates (Lev. xxv. 29; Deut. ix. 1; Josh. ii. 15, vi. 20; 1 Sam. xxiii. 7; 1 K. iv. 13; 2 K. vi. 26, vii. 3, xviii. 8, 13; Acts ix. 25). As it was a mark of conquest to break down a portion, at least, of the city-wall of the captured place, so the first care of the defenders, as in the case of the Jews after their return from Captivity, was to rebuild the fortifications (2 K. xiv. 13, 22; 2 Ch. xxvi. 2, 6, xxxiii. 14; Neh. iii. iv. vi. vii.; 1 Macc. iv. 60, 61, x. 45; Xen. *Hell.* ii. 2, § 15).

But around the city, especially in peaceable times, lay undefended suburbs (מִגְרָשִׁים, *περισπόρια, suburbana*, 1 Ch. vi. 57 sq.; Num. xxxv. 1–5; Josh. xxi.), to which the privileges of the city extended. The city thus became the citadel, while the population overflowed into the suburbs (1 Macc. xi. 61). The absence of walls as indicating security in peaceable times, combined with populousness, as was the case in the flourishing period of Egypt, is illustrated by the prophet Zechariah (ii. 4; 1 K. iv. 25; Martineau, *East. Life*, i. 306).

According to Eastern custom, special cities were appointed to furnish special supplies for the service of the state; cities of store, for chariots, for horsemen, for building purposes, and for provision for the royal table. Special governors for these and their surrounding districts were appointed by David and by Solomon (1 K. iv. 7, ix. 19; 1 Ch. xxvii. 25; 2 Ch. xvii. 12, xxi. 3; 1 Macc. x. 39; Xen. *Anab.* i. 4, § 10). To this practice our Lord alludes in His parable of the pounds, and it agrees with the theory of Hindoo government, which was to be conducted by lords of single townships, of 10, 100, or 1,000 towns (Luke xix. 17, 19; Elphinstone, *India*, c. ii. 39, and App. v. p. 485).

To the Levites forty-eight cities were assigned, distributed throughout the country, together with a certain amount of suburban ground, and out of these thirteen were specially reserved for the family of Aaron, nine in Judah and four in Benjamin, and six as refuge cities (Josh. xxi. 13, 42); but after the division of the kingdoms the Levites in Israel left their cities and resorted to Judah and Jerusalem (2 Ch. xi. 13, 14).

The internal government of Jewish cities was vested before the Captivity in a council of elders with judges, who were required to be priests: Josephus says, seven judges with two Levites as officers, *ὑπηρέται* (Deut. xxi. 5, 19, xvi. 18, xix. 17; Ruth iv. 2; Joseph. *Ant.* iv. 8, § 14). Under the kings a president or governor appears to have been appointed (1 K. xxii. 26; 2 Ch. xviii. 25); and judges were sent out on circuit, who referred matters of doubt to a council composed of priests, Levites, and elders, at Jerusalem (1 Ch. xxiii. 4, xxvi. 29; 2 Ch. xix. 5, 8, 10, 11). After the Captivity Ezra made similar arrangements for the appointment of judges (Ezra vii. 25). In the time of Josephus there appear to have been councils in the provincial towns, with presidents in each, under the direction of the great council at Jerusalem (Joseph. *Ant.* xiv. 9, § 4; *B. J.* ii. 21, § 3; *Vit.* 12, 13, 27, 34, 57, 61, 68, 74). [SANHEDRIN.]

In many Eastern cities much space is occupied by gardens, and thus the size of the city is much increased (Niebuhr, *Voyage*, ii. 172, 239; Conybeare and Howson, i. 96; *Eöthen*, p. 240). The vast extent of Nineveh and of Babylon may thus be in part accounted for (Jon. iv. 11; Diod. ii. 70; Quint. Curt. v. ch. i. 26; Chardin, *Voy.* vii. 273, 284; Porter, *Damascus*, i. 153; P. della Valle, ii. 33). In most Oriental cities the streets are extremely narrow, seldom allowing more than two loaded camels, or one camel and two foot passengers, to pass each other, though it is clear that some of the streets of Nineveh must have been wide enough for chariots to pass each other (Nah. ii. 4; Olearius, *Trav.* 294, 309; Burckhardt, *Trav. in Arabia*, i. 188; Buckingham, *Arab Tribes*, 330; Mrs. Poole, *Englishwoman in Egypt*, i. 141). The word for streets used by Nahum רְחֹבוֹת, from רָחַב, *broad*, *πλατεῖαι*, is used also of streets or broad places in Jerusalem (Prov. i. 20; Jer. v. 1, xxii. 4; Cant. iii. 2); and it may be remarked that the *πλατεῖαι* into which the sick were brought to receive the shadow of St. Peter (Acts v. 15) were more likely to be the ordinary streets than the special *piazze* of the city. It seems likely that the immense concourse which resorted to Jerusalem at the Feasts would necessitate wider streets than in other cities. Herod built in Antioch a wide street paved with stone, and having covered ways on each side. Agrippa II. paved Jerusalem with white stone (Joseph. *Ant.* xvi. 5, § 2, 3; xx. 9, § 7). The Straight street of Damascus is still clearly defined and recognisable (Irby and Mangles, v. 86; Robinson, iii. 454, 455).

In building Caesarea, Josephus says that Herod was careful to carry out the drainage effectually (Joseph. *Ant.* xv. 9, § 6). It seems probable that the internal commerce of Jewish cities was carried on as now by means of bazaars, for we read of the bakers' street (Jer. xxxvii. 21), and Josephus speaks of the wool market, the hardware market, a place of blacksmiths' shops, and the clothes-market, at Jerusalem (*B. J.* v. 8, § 1).

The open spaces (πλατεῖαι) near the gates of towns were in ancient times, as they are still, used as places of assembly by the elders, of holding courts by kings and judges, and of general resort by citizens (Gen. xxiii. 10; Ruth iv. 1; 2 Sam. xv. 2, xviii. 24; 2 K. vii. 1, 3, 20; 2 Ch. xviii. 9, xxxii. 6; Neh. viii. 13; Job xxix. 7; Prov. i. 21, viii. 2, 3; Jer. v. 1, xvii. 19; Matt. vi. 5; Luke xiii. 26). They were also used as places of public exposure by way of punishment (Jer. xx. 2; Amos v. 10).

The vices of populous cities are mentioned by the author of the Book of Proverbs (Prov. vii. 6–12; Luke vii. 37).

Prisons were under the kingly government, within the royal precinct (Gen. xxxix. 20; 1 K. xxii. 27; Jer. xxxii. 2; Neh. iii. 25; Acts xxi. 34, xxiii. 35).

Great pains were taken to supply both Jerusalem and other cities with water, both by tanks and cisterns for rain-water, and by reservoirs supplied by aqueducts from distant springs. Such was the fountain of Gihon, the aqueduct of Hezekiah (2 K. xx. 20; 2 Ch. xxxii. 30; Is. xxii. 9), and that of Solomon (Eccles. ii. 6), by which last water is still conveyed from near Bethlehem to Jerusalem (Maundrell, *Early Trav.* p. 457; Robinson, i. 347–8). Josephus also mentions an attempt made by Pilate to bring water to Jerusalem (*Ant.* xviii. 3, 2). [CONDUIT.]

Burial-places, except in special cases, were outside the city (Num. xix. 11, 16; Matt. viii. 28; Luke vii. 12; John xix. 41; Heb. xiii. 12). [H. W. P.]

CITIES OF REFUGE (עָרֵי הַמִּקְלָט, from קָלַט, *to contract*, Gesen. p. 1216; πόλεις τῶν φυγαδευτηρίων, φυγαδευτήρια, φυγαδεῖα; *oppida in fugitivorum auxilia, praesidia, separata; urbes fugitivorum*). Six Levitical cities were specially chosen as places of refuge for the involuntary homicide until released from banishment by the death of the high-priest (Num. xxxv. 6, 13, 15; Josh. xx. 2, 7, 9). [BLOOD, AVENGER OF.] There were three on each side of Jordan, *i.e.* three on the E. side only, until the country on the W. was subdued (Mishna, *Maccoth*, ii. 4). 1. On the E. side of Jordan—BEZER, in the tribe of Reuben, in the plains of Moab, said in the Gemara to be opposite to Hebron, not yet identified, but perhaps *Abu Ser*, west of Dibon (Deut. iv. 43; Josh. xx. 8, xxi. 36; 1 Macc. v. 26; Joseph. *Ant.* iv. 7, § 4; Reland, p. 662; Conder, *Heth and Moab*, p. 403). 2. RAMOTH-GILEAD, in the tribe of Gad, formerly supposed to be on or near the site of *es-Szalt* (Deut. iv. 43; Josh. xxi. 38; 1 K. xxii. 3; Reland, iii. p. 996; but more probably *Reimûn*, Conder, pp. 175, 404). 3. GOLAN, in Bashan, in the half-tribe of Manasseh, a town which doubtless gave its name to the district of Gaulonitis. *Jaulân* (Deut. iv. 43; Josh. xxi. 27; 1 Ch. vi. 71; Joseph. *Ant.* iv. 7, § 4; Reland, p. 815; Porter, *Damascus*, ii. 251, 254; Burckhardt, *Syria*, p. 286). 4. KEDESH, in Naphtali, *Kedes*, about 20 miles E.S.E. from Tyre, 12 S.S.W. from *Banias* (1 Ch. vi. 76; Robinson, ii. 439; Benj. of Tudela, *Early Trav.* p. 89). 5. SHECHEM, in Mount Ephraim, *Nâbulus* (Josh. xxi. 21; 1 Ch. vi. 67; 2 Ch. x. 1; Robinson, ii. 287, 288). 6. HEBRON, in Judah, *el-Khûlil*. The last two were royal cities, and the last sacerdotal also, inhabited by David, and fortified by Rehoboam (Josh. xxi. 13; 2 Sam. v. 5; 1 Ch. vi. 55, xxix. 27; 2 Ch. xi. 10; Robinson, i. 213, ii. 89).

The Gemara on *Maccoth* notices that the cities on each side of the Jordan were nearly opposite each other, in accordance with the direction to divide the land into three parts (Deut. xix. 2; Reland, iii. 662; Otho, *Lex. Rabb.* p. 52). Maimonides says that all the forty-eight Levitical cities had the privilege of asylum, but that the six refuge-cities were required to receive and lodge the homicide gratuitously, but this statement appears to be without foundation (Calmet, *in Num.* xxxv.; Selden, *de Jure Naturali*, iv. 2, p. 489; Carpzovius, or Goodwin, *Moses and Aaron*, p. 339).

Most of the Rabbinical refinements on the Law are stated under BLOOD, REVENGER OF. To them may be added the following. If the homicide committed a fresh act of manslaughter, he was to flee to another city; but if he were a Levite, to wander from city to city. An idea prevailed that when the Messiah came three more cities would be added; a misinterpretation, as it seems, of Deut. xix. 8, 9 (Lightfoot, *Cent. Chor.* clii. 208). The altar at Jerusalem, and, to some extent also, the city itself, possessed the privilege of asylum under similar restrictions; a privilege claimed, as regards the former, successfully by Adonijah, and in vain by Joab; accorded, as regards the city, to Shimei, but forfeited by him (1 K. i. 53; ii. 28, 33, 36, 46).

The directions respecting the refuge-cities present some difficulties in interpretation. The Levitical cities were to have a space of 1,000 cubits (about 583 yards) beyond the city wall for pasture and other purposes. Presently after, 2,000 cubits are ordered to be the suburb limit (Num. xxxv. 4, 5). The solution of the difficulty may be, either the 2,000 cubits are to be added to the 1,000 as "fields of the suburbs" (Lev. xxv. 34), as appears to have been the case in the gift to Caleb, which excluded the city of Hebron, but included the "fields and villages of the city" (Josh. xxi. 11, 12, Patrick; Carpzovius, *u. s.* p. 340; Reland, *Ant. Hebr.* p. 216), or the additional 2,000 cubits were a special gift to the refuge-cities, whilst the other Levitical cities had only 1,000 cubits for suburb. Calmet supposes the line of 2,000 cubits to be measured parallel, and the 1,000 perpendicular to the city wall; an explanation, however, which supposes all the cities to be of the same size (Calmet on *Numbers* xxxv. [On the whole subject, consult Dillmann².]).

The right of asylum possessed by many Greek and Roman towns, especially Ephesus, was in process of time much abused, and was curtailed

by Tiberius (Tac. *Ann.* iii. 60, 63). It was granted, under certain limitations, to churches by Christian emperors (Cod. i. tit. 12; Gibbon, c. xx. iii. 35, ed. Smith). Hence came the right of sanctuary possessed by so many churches in the Middle Ages (Hallam, *Middle Ages.* c. ix. pt. 1, vol. iii. 302, 11th ed.). [H. W. P.]

CIT'IMS (Κιτιέοι, A. Κιτιαῖοι; *Cetei*), 1 Macc. viii. 5. [CHITTIM.]

CITIZENSHIP (πολιτεία; *civitas*). The use of this term in Scripture has exclusive reference to the usages of the Roman empire; in the Hebrew commonwealth, which was framed on a basis of religious rather than of political privileges and distinctions, the idea of the commonwealth was merged in that of the congregation, to which every Hebrew, and even strangers under certain restrictions, were admitted. [CONGREGATION; STRANGERS.] The privilege of Roman citizenship was widely extended under the emperors; it was originally acquired in various ways, as by purchase (Acts xxii. 28; Cic. *ad Fam.* xiii. 36; Dio Cass. lx. 17), by military services (Cic. *pro Balb.* 22; Suet. *Aug.* 47), by favour (Tac. *Hist.* iii. 47), or by manumission. The right once obtained descended to a man's children (Acts xxii. 28). The Jews had rendered signal services to Julius Caesar in the Egyptian war (Joseph. *Ant.* xiv. 8, §§ 1, 2), and it is not improbable that many obtained the freedom of the city on that ground; certain it is that great numbers of Jews, who were Roman citizens, were scattered over Greece and Asia Minor (*Ant.* xiv. 10, §§ 13, 14). Among the privileges attached to citizenship, we may note that a man could not be bound or imprisoned without a formal trial (Acts xxii. 29), still less be scourged (Acts xvi. 37; Cic. *in Verr.* v. 63, 66); the simple assertion of citizenship was sufficient to deter a magistrate from such a step (Acts xxii. 25; Cic. *in Verr.* v. 62), as any infringement of the privilege was visited with severe punishment. A Jew could only plead exemption from such treatment before a Roman magistrate; he was still liable to it from Jewish authorities (2 Cor. xi. 24; Seld. *de Syn.* ii. 15, § 11). Another privilege attaching to citizenship was the appeal from a provincial tribunal to the emperor at Rome (Acts xxv. 11. Cp. Conybeare and Howson, *Life, &c., of St. Paul*, in loco). [W. L. B.]

CITRON. [APPLE-TREE.]

CLAU'DA (Κλαύδη, Acts xxvii. 16; called Gaudos by Mela and Pliny, Κλαῦδος by Ptolemy, and Κλαυδία in the *Stadiasmus Maris Magni*: it is still called *Clauda-nesa*, or *Gaudonesi*, by the Greeks, which the Italians have corrupted into *Gozzo*). This small island, unimportant in itself and in its history, is of very great geographical importance in reference to the removal of some of the difficulties connected with St. Paul's shipwreck at Melita. The position of Clauda is nearly due W. of Cape Matala on the S. coast of Crete [FAIR HAVENS], and nearly due S. of PHOENICE (see Ptol. iii. 17, § 1; *Stadiasm.* p. 496, ed. Gail). The ship was seized by the gale a little after passing Cape Matala, when on her way from Fair Havens to Phoenice (Acts xxvii. 12–17). The storm came down from the island (κατ' αὐτῆς, *v.* 14), and there was danger lest the ship should be driven into the African Syrtis (*v.* 17). It is added that she was driven to Clauda and ran under the lee of it (*v.* 16). We see at once that this is in harmony with, and confirmatory of, the arguments derivable from all the other geographical circumstances of the case (as well as from the etymology of the word Euroclydon or Euro-Aquilo), which lead us to the conclusion that the gale came from the N.E., or rather E.N.E. Under the lee of Clauda there would be smooth water, advantage of which was taken for the purpose of getting the boat on board, and making preparations for riding out the gale. [SHIP.] Smith, *Voy. and Shipwreck of St. Paul*,[2] pp. 92, 98, 253. [J. S. H.]

CLAU'DIA (Κλαυδία; *Claudia*), a Christian who sends greeting to Timothy in 2 Tim. iv. 21, and therefore probably an inhabitant of Rome. Martial (iv. 13) has an epigram on the marriage of Pudens and Claudia. Martial's Claudia is of British birth, and the wish to find an early connexion between Britain and Christianity has set ingenuity at work to identify the two pairs of names. The identification is too precarious to be given at length here, but see Alford, *Gk. Test.* Prolegg. to 2 Tim., Excurs. Bright (*Early Eng. Ch. Hist.*[2] p. 2) does not favour it. See art. PUDENS. [E. R. B.]

CLAU'DIUS (Κλαύδιος; *Claudius*), full name Tiberius Claudius Drusus Germanicus. He was the fourth Roman emperor, and reigned from 41 to 54 A.D. He was the son of Nero Claudius Drusus, and the nephew of the Emperor Tiberius. He was born A.D. 10 at Lugdunum (Lyons), in Gaul. A sickly childhood and harsh treatment had unfitted him for public employments, and he lived unnoticed till the murder of his nephew, the Emperor Caius. He was then raised to the throne by the soldiers. For the important part taken by Agrippa in his elevation, see Joseph. xix. § 2 and art. HEROD AGRIPPA. Duruy's estimate of the administration of Claudius is as follows: "In Rome wise measures and useful labours, in the provinces a liberal administration, in foreign affairs a firm policy recompensed by success." This Duruy justifies in detail (ed. Mahaffy, iv. pt. 1). It was however due, not to Claudius himself, but to the freedmen Pallas, Narcissus, and others into whose hands the administration had now fallen. The miseries and cruelties of the reign were in great measure the result of the profligacy of Messalina and the ambition and greed of Agrippina, successively the wives of Claudius during his government. But their power for evil lay of course in the weakness of the Emperor himself. He was poisoned by Agrippina to make way for the succession of her son Nero.

The points at which Claudius comes into contact with N. T. history are: (1) The famine which is said to have taken place in his reign (Acts xi. 28). The fulfilment of this prophecy is vouched for by Suetonius, who mentions "assiduae sterilitates" under Claudius (Suet. *Claud.* xviii.). Dio Cassius (lx. 11) records a famine at Rome in the first two years of Claudius, but this would be before the pre-

diction. There was a famine in Greece ("fames ingens in Hellade") in his 4th year (Euseb. *Chron. Arm.* ed. Schöne, ii. p. 152); and again at Rome in his 11th year (Tac. *Ann.* xii. 43. See Wieseler, *Chron. Apost.* p. 157, note). But the prophecy of Agabus, though loosely referring to "the whole world" (ὅλην τὴν οἰκουμένην: cp. Luke ii. 1 and Rev. iii. 10), probably had special reference to a famine in Judaea in the 4th year of Claudius. See art. AGABUS.

(2) The command given by him that all Jews should depart from Rome (Acts xviii. 2). Two corroborative statements are found in profane historians, which are however somewhat difficult to reconcile with each other. Dio Cassius says that Claudius did not expel the Jews, owing to the difficulty of carrying out such a measure without disturbance, considering their great numbers; but forbade their assembling together (Dio Cass. lx. ch. vi. 6). Suetonius on the other hand says, Claudius expelled the Jews, who were always causing disorders ("Judaeos impulsore Chresto assidue tumultuantes expulit," *Claud.* xxv.). The two may be fairly reconciled by keeping close to the account of St. Luke. The order was given, which is all Suetonius need mean by "expulit" (cp. the convincing parallel from Suet. *Tib.* xxxvi., about the "mathematici," quoted by Wieseler). It proved impossible to carry out the order; but meanwhile some Jews, among whom were Aquila and Prisca, had at once taken alarm and departed. Dio Cassius seems to place the event in the first year of Claudius, but does not really assign a date to it. It probably happened A.D. 52, when Agrippa was absent from Rome, and his influence in favour of the Jews was not felt. It would then coincide in time with the "senatus consultum" mentioned by Tacitus (*Ann.* xii. 52), which may relate to the same event. This also fell through in execution (*inritum*).

Another point remains to be noticed. If "Chresto" in Suet. *l. c.* stands for "Christo," then the cause of the Jewish disturbances was (as at Corinth and elsewhere) their disputes with the Christians, and Aquila and Prisca as Christians might naturally have to fly. Though Suetonius elsewhere (*Nero*, xvi.) spells Christianus rightly, he may here have followed a common pronunciation (cp. Tert. *Apol.* iii.) and meant Christ. With true Roman indifference he had informed himself so little about Christ, that he believed him to have been in Rome in person as

Claudius. (British Museum.)

the exciter (*impulsor*) of the strife, which was really occasioned by faith in His name. The other view is that Chrestus (not an unusual name) was some otherwise unknown Jew. But in that case "Chresto quodam" would have seemed more natural. See Wieseler, *Chron. Apost.* p. 120.

As to the general policy of Claudius towards the Jews, he first showed himself as a special patron of Agrippa I. He increased his territory by adding Judaea, Samaria, and certain districts in Lebanon (Jos. *Ant.* xix. 5, § 1). For his sake he favoured the Jewish worship (xx. 1, § 1), and gave his brother Herod the principality of Chalcis, and, later, the oversight of the Temple (xx. 1, § 3). At the beginning of his reign he treated the Jews in Asia with great mildness (xix. 5, § 2; xx. 1, § 2), but those of Palestine experienced much oppression from his officers (Tac. *Hist.* v. 4). [E. R. B.]

CLAU'DIUS LYS'IAS. [LYSIAS.]

CLAY (טִיט; πηλός; *humus* or *lutum*), a sedimentary earth, tough and plastic, arising from the disintegration of felspar and similar minerals, and always containing silica and alumina combined in variable proportions. As the sediment of water remaining in pits or in streets, the word is used frequently in the O. T. (*e.g.* Is. lvii. 20; Jer. xxxviii. 6; Ps. xviii. 42), and in the N. T. (πηλός, John ix. 6), for a mixture of sand or dust with spittle. It is also found in the sense of potter's clay (Is. xli. 25). The alluvial soils of Palestine would no doubt supply material for pottery, a manufacture which we know was, as it still is, carried on in the country (Jer. xviii. 2, 6; Thomson, *Land and Book*, p. 520), but the clay of Palestine, like that of Egypt, is probably more loam than clay (Birch, *Hist. of Pottery*, i. 55, 152). [POTTERY.] The word most commonly used for "potter's clay" is חֹמֶר (Ex. i. 14; Job iv. 19; Is. xxix. 16; Jer. xviii. 4, &c.). Bituminous shale, convertible into clay, is said to exist largely at the source of the Jordan, and near the Dead Sea. The great seat of the pottery of the present day in Palestine is Gaza, where are made the vessels in dark blue clay so frequently met with.

The use of clay in brick-making is described elsewhere. [BRICKS.]

Another use of clay was in sealing (Job xxxviii. 14). The bricks of Assyria and Egypt are most commonly found stamped either with a die or with marks made by the fingers of the maker. Wine jars in Egypt were sometimes sealed with clay; mummy-pits were sealed with the same substance, and remains of clay are still found adhering to the stone door-jambs. Our Lord's tomb may have been thus sealed (Matt. xxvii. 66), as also the earthen vessel containing the evidences of Jeremiah's purchase (Jer. xxxii. 14). So also in Assyria, at Kouyunjik, pieces of fine clay have been found bearing impressions of seals with Assyrian, Egyptian, and Phoenician devices. The seal used for public documents was rolled on the moist clay, and the tablet was then placed in the fire and baked. The practice of sealing doors with clay to facilitate detection in case of malpractice is still common in the East (Wilkinson, *Anc. Egypt.* i. 15, 48, ii. 364 [1878]; Layard, *N. and B.* pp. 153, 158, 608; Herod. ii. 38; Harmer, *Obs.* iv. 376.) [BRICKS; POTTERY; SEALS.] [H. W. P.]

CLEAN. [Unclean Meats; Uncleanness.]

CLEM'ENT (Κλήμης; *Clemens*), mentioned by St. Paul (Phil. iv. 3) as one of his fellow-labourers (*συνεργοί*). He is distinctly identified by Origen (*Comm. in Joann.* tom. vi. 36) with Clement of Rome, and through Eusebius (*H. E.* iii. 15) this view has been transmitted to later writers (for Clement of Rome, see *Dict. of Chr. Biog.*; Lightfoot's *Apost. Ff.*, "Clem. of Rome," i. 22).

Bp. Lightfoot considers that the probable dates of Clement's Epistle to the Corinthians (95 A.D.) and his death (*circ.* 110 A.D.) are adverse to this identification, and that the frequency of the name Clemens makes any inference from the name precarious. But his argument against it from the supposed domicile of this Clement at Philippi and of the other at Rome is doubtful. St. Paul's "fellow-labourers" seem as a class to have had no more permanent domicile than the Apostle himself. See Lightfoot, *Philippians*,[2] note p. 166. [E. R. B.]

CLE'OPAS (Κλεόπας; *Cleophas*), one of the two disciples to whom Jesus showed Himself as they went to Emmaus on the day of the Resurrection (cp. Mark xvi. 12). Nothing is known of him, but he has been conjecturally identified with Clopas (John xix. 25). See Cleophas and Alphaeus. [E. R. B.]

CLEOPA'TRA (Κλεοπάτρα), the name of numerous Egyptian princesses derived from the daughter of Antiochus III., who married Ptolemy V. Epiphanes, B.C. 193.

1. "The wife of Ptolemy" (Esth. xi. 1) was probably the granddaughter of Antiochus, and wife of Ptolemy VI. Philometor. [Ptolemy Philometor.]

2. A daughter of Ptolemy VI. Philometor and Cleopatra (1), who was married first to Alexander Balas B.C. 150 (1 Macc. x. 51), and afterwards given by her father to Demetrius Nicator when he invaded Syria (1 Macc. xi. 12; Joseph. *Ant.* xiii. 4, § 7). During the captivity of Demetrius in Parthia [Demetrius] Cleopatra married his brother Antiochus VII. Sidetes, and was probably privy to the murder of Demetrius on his return to Syria B.C. 125 (App. *Syr.* 68: yet see Joseph. *Ant.* xiii. 9, § 3; Just. xxxix. 1). She afterwards murdered Seleucus, her eldest son by Demetrius (App. *Syr.* 69); and then raised to the throne her other son by Demetrius,

Coin of Cleopatra and Antiochus VIII. Grypus.

Antiochus VIII. Grypus. But finding that he was unwilling to gratify her ambitious designs, she attempted to make away with him by offering him a cup of poison, but was compelled to drink it herself, B.C. 120 (Justin, xxxix. 2). The above coin represents on the obverse the heads of Cleopatra and her son Antiochus VIII. Grypus. [B. F. W.]

CLE'OPHAS (Κλωπᾶς; *Cleophas*). R. V. gives Clopas, which is undoubtedly right. The Cleophas of the A. V. represents the Vulgate, but not the Greek. Cleophas or Clopas is mentioned (John xix. 25) to distinguish Mary of Clopas (Μαριὰμ ἡ τοῦ Κλωπᾶ) from two other Marys mentioned in the same verse. This is generally understood to mean "the wife of Clopas" (sister according to Ewald). The form Clopas is confirmed by Euseb. *H. E.* iii. 11, who quotes the statement of Hegesippus that Clopas was brother of Joseph the husband of the Virgin, and father of Simeon, second Bishop of Jerusalem. Clopas has been identified with Alphaeus, father of James the Apostle. The two names are distinct, and are not duplicate forms (Lightfoot, *Gal.*[3] p. 260; and Wetzel, *Stud. Krit.* 1883, pp. 620–6, a very conclusive article); whether Clopas, like Alphaeus, be Aramaic, or whether it be a contraction from the Greek Cleopas and ultimately from Cleopatros. A strong argument against identification is that the Peshitto and the Jerus. Syriac Versions keep the two distinct.

But if, rejecting the identification of the names, we also refuse to identify Clopas the man with the man Alphaeus, we have the difficulty of adding another to the list of men who bore the name of James. If James the son of Alphaeus is *not* the son of Clopas, then we have to admit the existence of another James, son of Clopas and Mary, and known as "the little" (*ὁ μικρός*). At least this is necessary if we do not deny the almost certain identity of Mary of Clopas (John xix. 25) with Mary, mother of James "the little" and Joseph (Mark xv. 40). On the multiplication of persons bearing the same name, which seems the inevitable result of honest attempts to investigate the question, see Lightfoot, *Galatians*,[3] p. 261. For the literature of the question, see James. [E. R. B.]

CLOTHING. [Dress.]

CLOUD (עָנָן). The word נְשָׂאִים, so rendered in a few places, properly means "vapours," the less dense form of cloud which rises higher, and is often absorbed without falling in rain; Arab. نَشَاء and نَشْء. The word עָב, sometimes rendered "cloud," means merely "darkness," and is applied also to "a thicket" (Jer. iv. 29). The shelter given, and refreshment of rain promised, by clouds, give them their peculiar prominence in Oriental imagery, and the individual cloud in that ordinarily cloudless region becomes well defined, and is dwelt upon like the individual tree in the bare landscape (Stanley, *S. & P.* p. 140). Similarly, when a cloud appears, rain is ordinarily apprehended, and thus the "cloud without rain" becomes a proverb for the man of promise without performance (Prov. xvi. 15; Is. xviii. 4, xxv. 5; Jude 12; cp. Prov. xxv. 14). The cloud is of course a figure of transitoriness (Job xxx. 15; Hos. vi. 4), and of whatever intercepts divine favour or human supplication (Lam. ii. 1; iii. 44).

Being the least substantial of visible forms, undefined in shape, and unrestrained in position, it is the one amongst material things which suggests most easily spiritual being. Hence it is, so to speak, the recognised machinery by which supernatural appearances are introduced (Is. xix. 1; Ezek. i. 4; Rev. i. 7, and *passim*), or the veil between things visible and invisible; but, more especially, a mysterious or supernatural cloud is the symbolical seat of the Divine Presence Itself — the phenomenon of Deity vouchsafed by Jehovah to the Prophet, the priest, the king, or the people; so especially at the Transfiguration, Ascension, and gathering of the "vintage of wrath." Sometimes thick darkness, sometimes intense luminousness, often apparently, and especially by night, an actual fire (as in the descent of Jehovah on Sinai, Ex. xix. 18), is attributed to this glory-cloud (Deut. iv. 11; Ex. xxxiii. 22, 23; 2 Sam. xxii. 12, 13). In Ex. xl. 34–8, the Divine Presence takes visible possession of "the tent of the congregation," when Moses had "finished the work," and presents the appearance of a cloud "covering the tent" and "filling the Tabernacle"; and so subsequently the Temple (1 K. viii. 10, 11). In the former case "Moses was not able to enter;" in the latter "the priests could not stand to minister." The notion seems that of superhuman brightness which no eye could face. Such a bright cloud, at any rate at times, visited and rested on the mercy-seat (Ex. xxix. 42, 43; 1 K. viii. 11; 2 Ch. v. 14; Ezek. xliii. 4), and was by later writers named Shechinah. Thus the priests are cautioned not to "come at all times . . . within the vail," that they "die not, for" (it is added) "I will appear in *the* cloud upon the mercy-seat,"—the cloud being clearly that of the Presence mentioned above (Hofmann, *Schriftbeweis*, ii. 1, p. 361 sq., ed. 1). For the curious question which the Rabbis and others have raised concerning it, *e.g.* whether its light was created or not, or whether it was the actual "light" created on the "first day" (Gen. i. 3) or an emanation therefrom, cp. Buxtorf, *History of the Ark*, chs. xi.–xiv. (Ugolini, vol. vii.; Weber, *Altsynag. Palästin. Theologie*, § 39 and Index; Hamburger, *RE.* Abth. ii. s. n. "Schechina.")

[H. H.]

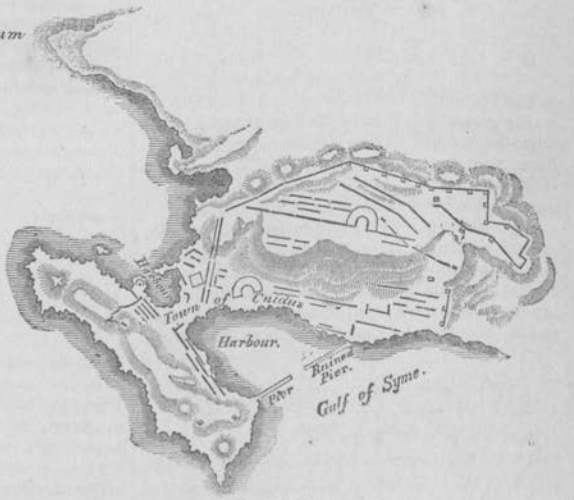
CLOUD, PILLAR OF (עַמּוּד הֶעָנָן). This was the active form of the symbolical glory-cloud, betokening God's Presence to lead His chosen host, or to inquire and visit offences, as the luminous cloud of the sanctuary exhibited the same under an aspect of repose. The cloud, which became a pillar when the host moved, seems to have rested at other times on the Tabernacle, whence God is said to have "come down *in* the pillar" (Ex. xxxiii. 9, 10; Num. xii. 5). It preceded the host, apparently resting on the ark which led the way (Ex. xiii. 21, xl. 36, &c.; Num. ix. 15–23, x. 34). So by night the cloud on the Tabernacle became fire, and the guiding pillar a pillar of fire. A note in the *Speaker's Commentary* on Ex. xiii. 21 mentions that "In an inscription of the Ancient Empire (of Egypt) an Egyptian general is compared to 'a flame streaming in advance of an army'; and that in a well-known papyrus (Anast. 1) the commander of an expedition is called 'a flame in the darkness at the head of his soldiers.'" A remarkable passage in Curtius (v. 2, § 7), descriptive of Alexander's army on the march, mentions a beacon hoisted on a pole from head-quarters as the signal for marching; *observabatur ignis noctu, fumus interdiu.* This was probably an adoption of an Eastern custom. Similarly the Persians used, as a conspicuous signal, an image of the sun enclosed in crystal (*ib.* iii. 3, § 9). Caravans are still known to use such beacons of fire and smoke; the cloudlessness and often stillness of the sky giving the smoke great density of volume and boldness of outline.

[H. H.]

CLOUTED. Josh. ix. 5; *i.e.* patched (see Lumby, s. n. in *Gloss. of Bible Words* in Eyre and Spottiswoode's *Variorum Teacher's Ed.* of the Bible). Cp. "clouts," *i.e.* patches or rags, in Jer. xxxviii. 11, 12.

[F.]

CNI'DUS (Κνίδος) is mentioned in 1 Macc. xv. 23 as one of the Greek cities which contained Jewish residents in the second century B.C., and in Acts xxvii. 7 as a harbour which was passed by St. Paul after leaving Myra, and before



Plan of Cnidus and Chart of adjoining coast.

running under the lee of Crete. It was a city of great consequence, situated at the extreme S.W. of the peninsula of Asia Minor [CARIA], on a promontory now called *Cape Crio*, which projects between the islands of Cos and Rhodes (see Acts xxi. 1). *Cape Crio* is in fact an island, so joined by an artificial causeway to the mainland as to form two harbours, one on the N.,

the other on the S. The latter was the larger, and its moles were noble constructions. All the remains of Cnidus show that it must have been a city of great magnificence. Few ancient cities have received such ample illustration from travels and engravings. We may refer to Beaufort's *Karamania*, Hamilton's *Researches*, and Texier's *Asie Mineure*, also Laborde, Leake, and Clarke, with the drawings in the *Ionian Antiquities*, published by the Dilettanti Society; the English *Admiralty Charts*, Nos. 1533, 1604; Newton's *Hist. of Discoveries at Cnidus* (1862–3), *Travels and Discoveries in the Levant*, ii. 167 (1865); Vaux, *Gk. Cities and Islands of Asia Min.* pp. 73–80. [J. S. H.] [J. E. S.]

COAL. In A. V. this word represents no less than five different Heb. words. 1. The first and most frequently used is *Gacheleth*, גַּחֶלֶת (ἄνθραξ, ἀνθακία; *pruna, carbo*), a live ember, burning fuel, as distinguished from פֶּחָם (Prov. xxvi. 21). It is written more fully in Ezek. x. 2, גַּחֲלֵי אֵשׁ, and in Ezek. i. 13, גַּחֲלֵי אֵשׁ בִּעֲרוֹת.

In 2 Sam. xxii. 9, 13, "coals of fire" are put metaphorically for the lightnings proceeding from God (Ps. xviii. 8, 12, 13; cxl. 10).

In Prov. xxv. 22, we have the proverbial expression, "Thou shalt heap coals of fire upon his head," which has been adopted by St. Paul in Rom. xii. 20, and by which is metaphorically expressed the burning shame and confusion which men must feel when their evil is requited by good. In Ps. cxx. 4, "coals" = burning brands of wood (not "juniper," but broom), to which the false tongue is compared (James iii. 6).

In 2 Sam. xiv. 7 the quenching of the live coal is used to indicate the threatened destruction of the single remaining branch of the family of the widow of Tekoah suborned by Joab; just as Lucian (*Tim.* § 3) uses the word ζώπυρον in the same connexion.

The root of גַּחֶלֶת is גָּחַל, which is possibly the same in meaning as the Arab. فحم, to light a fire, with the change of ל into מ.

2. *Pecham*, פֶּחָם (ἐσχάρα, ἄνθραξ; *carbo, pruna*). In Prov. xxvi. 21 this word clearly signifies *fuel* not *yet lighted*, as contrasted with the burning fuel to which it is to be added; but in Is. xliv. 12 and liv. 16, it means fuel lighted, having reference in both cases to smiths' work. It is derived from פֶּחָם; Arab. فحم, to be very black. (See below.)

3. *Rezeph*, or *Rizpah*, רִצָּפָה, רָצָף (ἄνθραξ; *calculus* in Is. vi. 6; but in 1 K. xix. 6, עֻגַת רְצָפִים is rendered by the LXX. ἐγκρυφίας ὀλυρίτης, and by the Vulg. *panis subcinericius*). In the narrative of Elijah's miraculous meal the word is used to describe the mode in which the cake was baked, viz. on a hot stone, as is still usual in the East. Cp. the Arab. رصف, a hot stone on which flesh is laid. רִצָּפָה, in Is. vi. 6, is rendered in A. V. "a live coal," but properly means "a hot stone" (R. V. marg.). The root is רָצַף, to lay stones together as a pavement.

4. רֶשֶׁף, in Hab. iii. 5, is rendered in A. V. (and R. V. marg.) "burning coals," and in A. V. margin *burning diseases;* in R. V. text, "fiery bolts." The former meaning is supported by Cant. viii. 6, the latter by Deut. xxxii. 24. According to the Rabbinical writers, רֶשֶׁף=רָצָף *pruna.*

5. *Shechor.* In Lam. iv. 8, חָשַׁךְ מִשְׁחוֹר תֹּאַרָם is rendered in A. V. and R. V. "their visage is blacker than a coal," or in the marg. (A. V. and R. V.) *darker than blackness.* שְׁחוֹר is found but this once, and signifies "to be black," from root שָׁחַר. The LXX. render it by ἀσβόλη, the Vulg. by *carbones.* In other forms the word is frequent, and Shihor is a usual name for the Nile. [SHIHOR.] [W. D.]

The fuel denoted by the Heb. words *gacheleth* (גַּחֶלֶת) and *pecham* (פֶּחָם) is charcoal, and not mineral coal. There is no evidence to show that the ancient Hebrews were acquainted with the substance we now denominate "coal;" indeed it seems pretty clear that the ancients generally used charcoal for their fuel; and although there is a passage in Theophrastus (Fr. ii. 61, ed. Schneider) from which we learn that fossil coal was found in Liguria and Elis, and used by "the smiths," yet its use must have been very limited. This coal was not what we understand by the term, but merely lignite, composed of fossilised vegetable matter, such as often occurs in geological formations much more recent than the true carboniferous strata. The houses of the ancient Greeks and Romans were without chimneys in our sense of the word (see this subject admirably discussed by Beckmann, *Hist. Invent.* i. 295). As the houses had merely an opening in the centre of the roof, the burning of "coal" would have made even their kitchens intolerable.

No true coal is found in Palestine, the geological formation of which is far too recent to afford any possibility of the coal measures being reached by any method now in man's possession. The whole of Syria, with the exception of the Jordan valley and the eastern volcanic districts, is cretaceous, answering to our greensand or neocomian, underlying the similar chalk or cretaceous formation of the lower eocene tertiaries. This latter covers the whole southern deserts, and also the tops of the central range running down from Lebanon to Hebron. Elsewhere it has been denuded by fluviatile action. Mixed with the limestone are here and there sandstone, marls, and clays. Of course no coal could be found in these formations. In the Jordan basin, from its northern to its southern extremities, are found large deposits of bitumen and bituminous shale, which might be used as fuel, but are all connected with the volcanic agencies formerly so active in the region. Lebanon and Hermon are scarcely, if at all, older than the triassic; the fossils being chiefly of the jurassic and oolite periods, and the superficial strata being often more recent. Consequently the only carboniferous deposits are some thin beds of lignite, almost valueless, apparently underlying the jurassic deposits.

The geology of Palestine has been examined by M. Lartet, in the splendid posthumous work of the Duc de Luynes, "*La Mer Morte;*" by Russegger, *Geognostische Karte des Libanon und Antilibanon;* by Tristram, *Land of Israel*, and *Land of Moab;* by Lynch, *United States' Exploring Expedition to the Dead Sea and the Jordan;* and by Hull, *Survey of Western Palestine* (PEF.). [H. B. T.]

COCK (ἀλέκτωρ; *gallus*). There appears to be but one reference to domestic poultry in the O. T., viz. 1 K. iv. 23; the passages where the LXX. and Vulg. (as in Prov. xxx. 31; Is. xxii. 17) read ἀλέκτωρ and *gallus* having no reference to that bird. In the N. T. the "cock" is mentioned in reference to St. Peter's denial of our Lord, and indirectly in the word ἀλεκτροφωνία (Matt. xxvi. 34; Mark xiv. 30, xiii. 35, &c.). At that period domestic poultry must have been as familiar and common as at present, from the various references to them, as when our Lord compares His tender love for Jerusalem to that of a hen for her brood (Luke xiii. 34). Though we have no knowledge of their first introduction into Palestine, it is not impossible that Solomon may have introduced them along with peacocks, coming as they do from the same region. בַּרְבָּרִים, *barburim*, 1 K. iv. 23, may refer to gallinaceous birds, though Gesenius (in loco) and Bochart (*Hieroz.* ii. 127) would render the word by "geese" or "swans." The latter are sometimes found in Palestine in winter, but too rarely ever to have been a regular article of food, while geese are only stragglers to the coast, and can scarcely be domesticated in so warm a climate. We should therefore prefer the ordinary rendering of "fowls." Poultry were common in Rome from the earliest times, and can certainly be traced in Greece before the Persian war. The Greek poet Pindar, living soon after the return from Babylon, mentions the cock; and the word Ἀλέκτωρ occurs in Homer as the name of a man, probably derived from the bird. Aristophanes calls the cock the Persian bird (*Aves*, 483). If, therefore, it were known so early further west, we may fairly infer that at the same time or at an earlier date it was domesticated in Palestine. No figures of our domestic poultry have been noticed among the antiquities of Egypt.

The original of our domestic fowl is from India, and the islands of the Eastern Archipelago; the jungle fowl (*Gallus ferrugineus*) of India and of most of the Malayan islands being hardly to be distinguished from our common gamecock. South India, Ceylon, and Java each possess distinct species (*Gallus sonneratti, G. stanleyi*, and *G. furcatus* respectively) which may have assisted by hybridization to modify some of our existing and ever-varying breeds. In India the domestication of the fowl goes back to the earliest known period.

The Mishna (*Baba Kama*, vii. 7) says that cocks were not kept at Jerusalem for fear of their polluting holy things. The statement is probably a fiction, for not only was the cock not unclean, but an instance is mentioned of a cock which was stoned by sentence of the Sanhedrin for having caused the death of a child. The Romans were devoted to cock-fighting, and took their birds with them everywhere. The Jews of Jerusalem keep poultry at the present day in great numbers, not only in their courtyard, but in the chambers of their houses, where they roost, aggravating the squalid appearance of a Jerusalem dwelling. [H. B. T.]

COCK-CROWING is spoken of as a definite period of the night in Mark xiii. 35: "Ye know not when the master of the house cometh, at even or at midnight, or at the *cock-crowing* or in the morning." The cock-crowing here spoken of is really the second cock-crowing, about an hour and a half before dawn. The first cock-crowing is at midnight, and there are in the East two subsequent times of crowing, about an hour and a half or two hours after midnight, and again just before the dawn. In our latitude, with the varying lengths of days and nights, the domestic fowls do not exercise their voices with the same regularity as in countries nearer the equator. On my first visit to Syria I was, for several successive nights, awakened three times by the sudden crowing of the cocks on the roof of the hotel. Arundell (*Discoveries in Asia Minor*) writes: "It has often been remarked, in illustration of Scripture, that in the Eastern countries the cocks crow in the night, but the regularity with which they keep what may be called the watches has not been perhaps sufficiently noticed. I will, however, confine myself to one, and that is between eleven and twelve o'clock. I have often heard the cocks of Smyrna crowing in full chorus at that time, and with scarcely the variation of a minute. The second cock-crowing is between one and two o'clock. Therefore, when our Lord says, 'In this night, before the cock crow twice,' the allusion was clearly to these seasons." The same regularity has been noticed in the domestic poultry of the South Sea Islands; so much so, that the natives of the New Hebrides mark the division of time in the night by the cock-crowing. In their language the midnight is "the little cock-crowing," 2 A.M. is "the great cock-crowing," and an hour before dawn is "the last cock-crowing." In explanation of the expression "the little cock-crowing," I have often noticed that in Syria frequently only one solitary cock disturbs the stillness about, or a little before, midnight, and he finds no response from his fellows, while two hours later all the birds in the neighbourhood at once join in discordant chorus. Dean Alford, therefore, correctly explains the slight difference in the wording of our Lord's warning to St. Peter as recorded by St. Matthew and St. Mark, "The *first* cock-crowing is at midnight; but inasmuch as few hear it,—when the word is used generally, we mean the *second* crowing, early in the morning before dawn." [H. B. T.]

COCKATRICE. A not very happy rendering by the A. V. of the Hebrew words *tsiph'ônî* (צִפְעֹנִי) and *tzepha'* (צֶפַע); R. V. "basilisk," marg. *adder*. See Prov. xxiii. 32, margin; Is. xi. 8, lix. 5; Jer. viii. 17. The cockatrice is a fabulous animal, concerning which absurd stories are told. Perhaps the great yellow viper, *Daboia xanthina*, is intended in the original. [ADDER.] [H. B. T.]

COCKLE (בָּאְשָׁה, *bo'shāh*; βάτος; *spina*) occurs only in Job xxxi. 40: "Let thistles grow

instead of wheat, and cockle instead of barley." The plural form of a Heb. noun, viz. בְּאֻשִׁים (*bĕushîm*), is found in Is. v. 2, 4, A. V. "wild grapes." Whatever it is, it must not be confounded with what is called the wild vine (*Vitis labrusca*), a North American plant, nor with the aconite, which is not found in Syria, but which is proposed by Celsius (*Hierob.* ii. 199). Hasselquist suggests (*Trav.* p. 290) the hoary nightshade, *Solanum villosum*, which is a troublesome vineyard weed in Palestine, bears berries, and is called by the Arabs *'inab ed di'b*, i.e. "wolf's grapes." Another suggestion, deduced from the derivation of the name from בָּאַשׁ, "to smell as carrion," is that it means some stinking weed. If the word be specific, and not general, it may well stand for the stinking arum, *Dracunculus vulgaris*, a common Palestine weed, with a horrible and disgusting odour; or, from the context of the word in Job, for the *bunt*, or stinking rust, *Uredo foetida*, which sometimes attacks barley, and has a scarcely less revolting smell than the arum. But if the term be general, it may allude to the troublesome grasses, such as the "tares" of N. T., *Lolium temulentum*, or darnel, which choke the corn, and also, if unchecked, the trailing vines. [H. B. T.]

COELESYRIA (Κοίλη Συρία; *Coelesyria*), "the *hollow* Syria," was (strictly speaking) the name given by the Greeks, after the time of Alexander, to the remarkable valley or hollow (κοιλία) which intervenes between Libanus and Anti-Libanus, stretching from lat 33° 20′ to 34° 40′, a distance of nearly a hundred miles. As applied to this region the word is strikingly descriptive. Dionysius the geographer well observes upon this, in the lines—

> Ἣν Κοίλην ἐνέπουσιν ἐπώνυμον, οὕνεκ' ἄρ' αὐτὴν
> Μεσσὴν καὶ χθαμαλὴν ὀρέων δύο πρῶνες ἔχουσιν.
> *Perieg.* 899, 900.

A modern traveller says, more particularly: "We finally looked down on the vast green and red valley—green from its yet unripe corn, red from its vineyards not yet verdant — which divides the range of Lebanon and Anti-Lebanon; the former reaching its highest point in the snowy crest to the north, behind which lie the Cedars; the latter, in the still more snowy crest of Hermon—the culmination of the range being thus in the one at the northern, in the other at the southern, extremity of the valley which they bound. The view of this great valley is chiefly remarkable as being *exactly to the eye what it is on maps*—the 'hollow' between the two mountain ranges of Syria. A screen through which the Leontes (*Litâny*) breaks out closes the south end of the plain. There is a similar screen at the north end, but too remote to be visible" (Stanley's *S. & P.* p. 407). The plain gradually rises towards its centre, near which, but a little on the southern declivity, stand the ruins of *Baalbek* or Heliopolis. In the immediate neighbourhood of Baalbek rise the two streams of the Orontes (*Nahr-el-Asy*) and the Litâny, which flowing in opposite directions, to the N.W. and the S.E., give freshness and fertility to the tract enclosed between the mountain ranges.

The term Coele-Syria was also used in a much wider sense. In the first place it was extended so as to include the inhabited tract to the east of the Anti-Libanus range, between it and the desert, in which stood the great city of Damascus; and then it was further carried on upon that side of Jordan, through Trachonitis and Peraea, to Idumaea and the borders of Egypt (Strab. xvi. § 21; Polyb. v. 80, § 3; Jos. *Ant.* i. 11, § 5). Ptolemy (v. 15) and Josephus (*Ant.* xiii. 13, § 2) even place Scythopolis in Coele-Syria, though it was upon the west side of Jordan; but they seem to limit its extent southwards to about lat. 31° 30′, or the country of the Ammonites (Ptol. v. 15; Joseph. i. 11). Ptolemy distinctly includes in it the Damascus country.

None of the divisions of Syria (*Aram*) in the Jewish Scriptures appear to correspond with the Coele-Syria of the Greeks; for there are no grounds for supposing, with Calmet (*Dict. of the Bible*, art. *Coelesyria*), that "Syria of Zobah" is Coele-Syria. Coele-Syria seems to have been included under the name of "Syria of Damascus" (אֲרַם־דַּמֶּשֶׂק), and to have formed a portion of that kingdom. [ARAM.] The only distinct reference to the region, as a separate tract of country, which the Jewish Scriptures contain, is probably that in Amos (i. 5), where "the inhabitants of the plain of Aven" (בִּקְעַת־אָוֶן, *Bikath-Aven*) are threatened, in conjunction with those of Damascus. *Bikath* is exactly such a plain as Coele-Syria (Stanley's *Palestine*, Append. p. 484); and the expression *Bikath-Aven*, "the plain of Vanity," would be well applied to the tract immediately around the great sanctuary of Baalbek. [AVEN.] In the Apocryphal Books there is frequent mention of Coele-[A. V. Celo-]Syria in a somewhat vague sense, nearly as an equivalent for Syria (1 Esd. ii. 17, 24, 27, iv. 48, vi. 29, vii. 1, viii. 67; 1 Macc. x. 69; 2 Macc. iii. 5, 8, iv. 4, viii. 8, x. 11). [G. R.]

COFFER (אֲרֹנָה, probably from רָנַן, *to be moved*; θέμα; *capsella*), a movable box hanging from the side of a cart (1 Sam. vi. 8, 11, 15). This word is found nowhere else, and in each of the above examples has the definite article, as if of some special significance, though not necessarily so (see Driver, *Notes on the Heb. Text of the BB. of Sam.* in loco). [H. W. P.]

CO'LA (B. Χωλά, A. Κωλά; א*. Vulg. om., but א$^{c.a}$ κεειλα), a place named with Chobai (Judith xv. 4, only); it is now, possibly, *Kh. Kâ'un* in the Jordan Valley, on the road from Chobai, *el-Mekhubby*, to Scythopolis. Simonis (*Onom.* p. 170) suggests Abelmecholah. [W.]

COLHO'ZEH (כָּל־חֹוזֶה; LXX. om.; *Cholhoza*), a man of the tribe of Judah in the time of Nehemiah (Neh. iii. 15, xi. 5). [W. A. W.]

CO'LIUS (Κώϊος, A. Κώλιος; *Colnis*), 1 Esd. ix. 23. [KELAIAH.] [W. A. W.]

COLLAR. For the proper sense of this term (נְטִיפוֹת), as it occurs in Judg. viii. 26 and in Is. iii. 18 (R. V. "pendants" in both passages. See Delitzsch on *Is. l. c.*), see EARRINGS. The rendering of כֶּפִי (*as the collar*) in Job xxx. 18 is supported by the LXX. (ὥσπερ τὸ περιστόμιον), the Vulg. (*quasi capitio*), R. V., and modern critics generally. [F.]

COLLEGE, THE (הַמִּשְׁנֶה; ἡ μασενά; *Secunda*). In 2 K. xxii. 14 it is said in the A. V. that Huldah the prophetess "dwelt in Jerusalem in the *college*," or, as the margin has it, "in the second part." The same part of the city is undoubtedly alluded *to* in Zeph. i. 10 (A. V. "the second [gate]"). In both passages R. V. reads "the second quarter," *i.e.* (see below) the lower city. Our translators derived their rendering "the college" from the Targum of Jonathan, which has "house of instruction," a schoolhouse supposed to have been in the neighbourhood of the Temple. This translation must have been based upon the meaning of the Hebrew *mishneh*, "repetition," which has been adopted by the Peshitto-Syriac, and the word was thus taken to denote a place for the repetition of the Law, or perhaps a place where copies of the Law were made (cp. Deut. xvii. 18; Josh. viii. 32). Rashi, after quoting the rendering of the Targum, says, "There is a gate in the [Temple] court, the name of which is the gate of Huldah in the treatise *Middoth* [i. 3], and some translate בַּמִּשְׁנֶה, without the wall, between the two walls, which was a second part (*mishneh*) to the city." The latter is substantially the opinion of the author of *Quaest. in Libr. Reg.* attributed to Jerome. Keil's explanation (*Comm.* on 1 K. *l. c.*), that the *Mishneh* was the "lower city," called by Josephus ἡ ἄλλη πόλις (*Ant.* xv. 11, § 5), and built on the hill Akra, is more definite than "a part of the city" preferred by Schwally (*ZATW.* x. 173). Ewald and Orelli (Zeph. i. 10) render it *Neustadt*, i.e. Bezetha, or New Town. [W. A. W.] [F.]

In the American edition of the *D. B.*, Dr. Conant has pointed out that the earlier stages of the English Version present a preference for the now generally accepted rendering. Thus Coverdale's Bible (1535) reads (in 2 K. *l. c.*) "the second porte;" Matthew's Bible (1537) "the second ward." Cranmer's Bible (1540) has in 2 K. "the house of the doctrine," but in the parallel passage in 2 Ch. "the second wall;" so also in both passages the Bishops' Bible. The Genevan Bible (1560) has in 2 K. and 2 Ch. "the college," with a marg. note on the former passage, "or, the house of doctrine, which was near to the Temple;" and this was the Version followed by King James' revisers (1611). [F.]

COLLOPS (פִּימָה = פַּאֲמָה, Job xv. 27; Olsh. *Lehrb. d. Heb. Sprache*, § 171a, *fat* or *fatness*). Eastwood and Wright (*Bible Handbook*, s.n.) affirm it to be a Yorkshire word still used, signifying lumps or slices of meat, and Lumby (*Glossary of Bible Words* in *Teacher's Bible*, s.n.) gives the same sense with references to the use of the word in *Piers Plowman* and North's *Plutarch*. [F.]

COLONY, a designation of Philippi, the celebrated city of Macedonia, in Acts xvi. 12. After the battle of Actium, Augustus assigned to his veterans those parts of Italy which had espoused the cause of Antony, and transported many of the expelled inhabitants to Philippi, Dyrrachium, and other cities (Dio Cass. li. 4). In this way Philippi was made a Roman colony with the "Jus Italicum" (cp. Dig. 50, tit. 15, s. 8), and accordingly we find it described as a "colonia" both in inscriptions and upon the coins of Augustus. The events which befell St. Paul at Philippi were directly connected with the privileges of the place as a Roman colony, and with his own privileges as a Roman citizen: see Conybeare and Howson (*Life and Epp. of St. Paul*, i. p. 312, orig. ed.), who develop these points at some length (Orelli, *Inscr.* 512, 3658, 3746, 4064; Rasche, iii. pt. 2, p. 1120). On the "Jus Italicum," see *Dict. of Ant.*, COLONIA and LATINITAS. [W. S.] [F.]

COLOURS. The terms relative to colour, occurring in the Bible, may be arranged in two classes, the first including those applied to the description of natural objects, the second those artificial mixtures which were employed in dyeing or painting. In an advanced state of art, such a distinction can hardly be said to exist; all the hues of nature have been successfully imitated by the artist; but among the Jews, who fell even below their contemporaries in the cultivation of the fine arts, and to whom painting was unknown until a late period, the knowledge of artificial colours was very restricted. Dyeing was the object to which the colours known to them were applied; so exclusively indeed were the ideas of the Jews limited to this application of colour, that the name of the dye was transferred without any addition to the material to which it was applied. The Jews were not, however, by any means insensible to the influence of colour; they attached definite ideas to the various tints, according to the use made of them in robes and vestments; and the subject exercises an important influence on the interpretation of certain portions of Scripture.

I. The natural colours noticed in the Bible are white, black, red, yellow, and green. It will be observed that only three of the prismatic colours are represented in this list; blue, indigo, violet, and orange are omitted. Of the three, *yellow* is very seldom noticed; it was apparently regarded as a shade of green, for the same term *greenish* (יְרַקְרַק; see MV.[11]) is applied to gold (Ps. lxviii. 13) and to the leprous spot (Lev. xiii. 49), and very probably the *golden* (צָהֹב) or *yellow* hue of the leprous hair (Lev. xiii. 30–32) differed little from the *greenish* spot on the garments or skin (Lev. xiii. 49). *Green* is frequently noticed, but an examination of the passages in which it occurs will show that the reference is seldom to colour. The Hebrew terms are *raanan* (רַעֲנָן) and *yarak* (יֶרֶק); the first of these applies to what is *vigorous* and *flourishing*; hence it is metaphorically employed as an image of prosperity (Job xv. 32; Pss. xxxvii. 35, lii. 8, xcii. 14; Jer. xi. 16, xvii. 8; Dan. iv. 4; Hos. xiv. 8); it is invariably employed wherever the expression "green tree" is used in connexion with idolatrous sacrifices, as though through its aged ever-greenness conveying the idea of a dense and lasting canopy to the worshippers (Deut. xii. 2 [cp. Dillmann[2]]; 2 K. xvi. 4); elsewhere it is used of that which is *fresh*, as oil (Ps. xcii. 10) and newly-plucked boughs (Cant. i. 16). The other term, *yarak*, has the radical signification of *putting forth leaves, sprouting* (Gesen. *Thesaur.* p. 632): it is used indiscriminately for all productions of the earth fit for food (Gen. i. 30, ix. 3; Ex. x. 15; Num. xxii. 4; Is. xv. 6; cp. χλωρός, Rev. viii. 7, ix. 4), and again

for all kinds of garden herbs (Deut. xi. 10; 1 K. xxi. 2; 2 K. xix. 26; Prov. xv. 17; Is. xxxvii. 27; contrast the restricted application of our *greens*); when applied to grass, it means specifically the *young, fresh grass* (דֶּשֶׁא, Ps. xxxvii. 2), which springs up in the desert (Job xxxix. 1). Elsewhere it describes the sickly yellowish hue of mildewed corn (Deut. xxviii. 22; 1 K. viii. 37; 2 Ch. vi. 28; Amos iv. 9; Hag. ii. 17); and lastly, it is used for the entire absence of colour produced by fear (Jer. xxx. 6; cp. χλωρός, *Il.* x. 376): hence χλωρὸς (Rev. vi. 8) describes the ghastly, livid hue of death. In other passages "green" is erroneously used in the A. V. for *white* (Gen. xxx. 37, R. V. "fresh"; Esth. i. 6, R. V. marg. *cotton*), *young* (Lev. ii. 14, xxiii. 14, R. V. "fresh"), *moist* (Judg. xvi. 7, 8, A. V. marg.; but R. V. gives in the marg.—as an alternative for the "green withes" of the text —*new bowstrings*). Thus it may be said that *green* is never used in the Bible to convey the impression of proper colour.

The only fundamental colour of which the Hebrews appear to have had a clear conception was *red;* and even this is not very often noticed. They had no scientific knowledge of colours, and such a passage as Rev. iv. 3 is not to be explained by assuming that the emerald represents *green*, the jasper *yellow*, and the sardine *red:* the idea intended to be conveyed by these images is rather that of *pure, brilliant, transparent* light. The emerald, for instance, was chiefly prized by the ancients for its *glittering, scintillating* qualities (αἰγλήεις, Orpheus, *de Lap.* p. 608), whence perhaps it derived its name (σμάραγδος, from μαρμαίρειν). The jasper is characterised by St. John himself (Rev. xxi. 11) as being crystal-clear (κρυσταλλίζων), and not as having a certain hue. The sardine may be compared with the amber of Ezek. i. 4, 27, or the burnished brass of Dan. x. 6, or again the fine brass, "as if burning in a furnace," of Rev. i. 15, each conveying the impression of the colour of fire in a state of pure incandescence. Similarly the beryl, or rather the *chrysolite* (the Hebrew *Tharsis*), may be selected by Daniel (x. 6) on account of its transparency. An exception may be made perhaps in regard to the sapphire, in so far as its hue answers to the deep blue of the firmament (Ex. xxiv. 10; cp. Ezek. i. 26, x. 1), but even in this case the pellucidity (לְבְנָה, omitted in A. V., Ex. xxiv. 10; R. V. marg. *bright*) or polish of the stone (cp. Lam. iv. 7) forms an important, if not the main, element in the comparison. The highest development of colour in the mind of the Hebrew evidently was *light*, and hence the predominance given to *white* as its representative (cp. the connexion between λευκὸς and *lux*). This feeling appears both in the more numerous allusions to it than to any other colour—in the variety of terms by which they discriminated the shades from a *pale, dull* tint (כֵּהָה, *blackish*, Lev. xiii. 21 sq.) up to the most brilliant splendour (זֹהַר, Ezek. viii. 2; Dan. xii. 3)—and in the comparisons by which they sought to heighten their ideas of it, an instance of which occurs in the three accounts of the Transfiguration, where the countenance and robes are described as like "the sun" and "the light" (Matt. xvii. 2), "shining, exceeding white as snow" (Mark ix. 3), "glistening" (Luke ix. 29). Snow is used eleven times in a similar way; the sun five times; wool four times; milk once. In some instances the point of the comparison is not so obvious, *e.g.* in Job xxxviii. 14 "they stand as a garment," in reference to the *white* colour of the Hebrew dress, and in Ps. lxviii. 13, where the glancing hues of the dove's plumage suggested an image of the brilliant effect of the *white* holyday costume. Next to white, *black*, or rather *dark*, holds the most prominent place, not only as its opposite, but also as representing the complexion of the Orientals. There were various shades of it, including the *brown* of the Nile water (whence its name, שִׁיחוֹר, Sihor)—the *reddish* tint of early dawn, to which the complexion of the bride is likened (Cant. vi. 10), as well as the *lurid* hue produced by a flight of locusts (Joel ii. 2)—and the darkness of blackness itself (Lam. iv. 8). As before, we have various heightening images, such as the tents of Kedar, a flock of goats, the raven (Cant. i. 5, iv. 1, v. 11), and sackcloth (Rev. vi. 12). *Red* was also a colour of which the Hebrews had a vivid conception: this may be attributed partly to the prevalence of that colour in the outward aspect of the countries and peoples with which they were familiar, as attested by the name Edom, and by the words *adamah* (earth) and *adam* (man), so termed either as being formed out of the red earth, or as being red in comparison with the fair colour of the Assyrians, and the black of the Aethiopians. Red was regarded as an element of personal beauty: cp. 1 Sam. xvi. 12; Cant. ii. 1, where the lily is the *red* one for which Syria was famed (Plin. xxi. 11); Cant. iv. 3, vi. 7, where the complexion is compared to the red fruit of the pomegranate; and Lam. iv. 7, where the hue of the skin is redder than coral (R.V. marg.; A. V. "rubies"), contrasting with the white of the *garments* before noticed. The three colours — white, black, and red—were sometimes intermixed in animals, and gave rise to the terms צָחֹר, "dappled" (A. V. "white"), probably white and red (Judg. v. 10; MV.[11]); עָקֹד, "ringstraked," either with white bands on the legs, or white-footed; נָקֹד, "speckled;" טָלֵא, "spotted," white and black; and lastly בָּרֹד, "piebald" (A. V. and R. V. "grisled"), the spots being larger than in the two former (Gen. xxx. 32, 35, xxxi. 10); the latter term is used of a horse (Zech. vi. 3, 6) with a symbolical meaning: Hengstenberg (*Christol.* in loc.) considers the colour itself to be unmeaning, and that the prophet has added the term strong (so R. V., אֲמֻצִּים; A. V. "bay") by way of explanation; Orelli (in Strack u. Zöckler's *Kzf. Komm.* in loco), on the contrary, is in favour of the opinion that some colour is intended. It remains for us now to notice the various terms applied to these three colours.

1. WHITE. The most common term is לָבָן, which is applied to such objects as milk (Gen. xlix. 12), manna (Ex. xvi. 31), snow (*Is.* i. 18), horses (Zech. i. 8), raiment (Eccles. ix. 8); and a cognate word expresses the colour of the moon (Is. xxiv. 23). צַח, *dazzling* white, is applied to the complexion (Cant. v. 10); חִוָּר, a term of a

later age, to snow (Dan. vii. 9 only), and to the paleness of shame (Is. xxix. 22, חָוַר); שִׁיב, to the hair alone. Another class of terms arises from the textures of a naturally white colour, as שֵׁשׁ and בּוּץ. These words appear to have been originally of foreign origin, but were connected by the Hebrews with roots in their own language descriptive of a white colour (Ges. *Thesaur.* pp. 190, 1384). Thus שֵׁשׁ was originally Egyptian (*schens*, cp. Dillmann on Exod. xxv. 4); בּוּץ was a later word, and represents rather the Syrian byssus (see MV.[11]). The terms were without doubt primarily applied to the material; but the idea of colour is also prominent, particularly in the description of the curtains of the Tabernacle (Ex. xxvi. 1) and of the priests' vestments (Ex. xxviii. 6). שֵׁשׁ is also applied to white marble (Esth. i. 6; Cant. v. 15); and a cognate word, שׁוֹשַׁנָּה, to the lily (Cant. ii. 16). In addition to these we meet with חוּר (*βύσσος*, Esth. i. 6, viii. 16), and כַּרְפַּס (*κάρπασος*; A. V. "green," R. V. "cotton," Esth. i. 6), also descriptive of white textures.

White was symbolical of innocence: hence the raiment of Angels (Mark xvi. 5; John xx. 12) and of glorified saints (Rev. xix. 8, 14) is white. It was also symbolical of joy (Eccles. ix. 8); and, lastly, of victory (Zech. vi. 3; Rev. vi. 2). In the Revelation the term λευκὸς is applied exclusively to what belongs to Jesus Christ (Wordsworth's *Apoc.* p. 105).

2. Black. The shades of this colour are expressed in the terms שְׁחֹר, applied to the hair (Lev. xiii. 31; Cant. v. 11); to the complexion (Cant. i. v.), particularly when affected with disease (Job xxx. 30); and to horses (Zech. vi. 2, 6): חוּם, lit. *scorched* (*φαιός*; A. V. "brown," R. V. "black," Gen. xxx. 32), applied to sheep; the word expresses the colour produced by the influence of the sun's rays: קָדַר, lit. *to be dirty*, applied to a complexion blackened by sorrow or disease (Job xxx. 30); to mourner's robes (Jer. viii. 21, xiv. 2; cp. *sordidae vestes*); to a clouded sky (1 K. xviii. 45); to night (Mic. iii. 6; Jer. iv. 28; Joel ii. 10, iii. 15); and to a turbid brook (whence possibly Kedron), particularly when rendered so by melted snow (Job vi. 16). Black, as being the opposite to white, is symbolical of evil (Zech. vi. 2, 6; Rev. vi. 5).

3. Red. אָדֹם is applied to blood (2 K. iii. 22); to a garment sprinkled with blood (Is. lxiii. 2); to a heifer (Num. xix. 2); to pottage made of lentiles (Gen. xxv. 30); to a horse (Zech. i. 8, vi. 2); to wine (Prov. xxiii. 31); and to the complexion (Gen. xxv. 25; Cant. v. 10; Lam. iv. 7). אַדְמֳדָם is a slight degree of red, *reddish*, and is applied to a leprous spot (Lev. xiii. 19, xiv. 37). שָׂרֹק, lit. *fox-coloured*, bay, is applied to a horse (A. V. "speckled," R. V. "sorrel"; Zech. i. 8), and to a species of vine bearing a purple grape (Is. v. 2, xvi. 8). The corresponding term in Greek is πυρρός, lit. *red as fire*. This colour was symbolical of bloodshed (Zech. vi. 2; Rev. vi. 4, xii. 3).

II. Artificial Colours. The art of extracting dyes, and of applying them to various textures, appears to have been known at a very early period. We read of scarlet thread at the time of Zarah's birth (Gen. xxxviii. 28); of blue and purple at the time of the Exodus (Ex. xxvi. 1). There is, however, no evidence to show that the Jews themselves were at that period acquainted with the art: the profession of the dyer is not noticed in the Bible, though it is referred to in the Talmud. They were probably indebted both to the Egyptians and the Phoenicians; to the latter for the dyes, and to the former for the mode of applying them. The purple dyes which they chiefly used were extracted by the Phoenicians (Ezek. xxvii. 16; Plin. ix. 60), and in certain districts of Asia Minor (Hom. *Il.* iv. 141), especially Thyatira (Acts xvi. 14). It does not appear that those particular colours were used in Egypt, the Egyptian colours being produced from various metallic and earthy substances (Wilkinson, *Anc. Egypt.* ii. 291, &c. [1878]). On the other hand, there was a remarkable similarity in the mode of dyeing in Egypt and Palestine, inasmuch as the colour was applied to the raw material, previous to the processes of spinning and weaving (Ex. xxxv. 25, xxxix. 3; Wilkinson, ii. 84, 85). The dyes consisted of purples, light and dark (the latter being the "blue" of the A. V.), and crimson ("scarlet," A. V.): vermilion was introduced at a late period.

1. Purple (אַרְגָּמָן; Chaldaic form, אַרְגְּוָנָא, Dan. v. 7, 16; *πορφύρα*; *purpura*). This colour was obtained from the secretion of a species of shell-fish (Plin. ix. 60), the *Murex trunculus* of Linnaeus, which was found in various parts of the Mediterranean Sea (hence called *πορφύρα θαλασσία*, 1 Macc. iv. 23), particularly on the coasts of Phoenicia (Strab. xvi. 757), Africa (Strab. xvii. 835), Laconia (Hor. *Od.* ii. 18, 7), and Asia Minor. The derivation of the Hebrew name is uncertain: it has been connected with the Sanscrit *râgaman*, "tinged with red" (cp. MV.[11]), but its occurrence in Assyrian under the form *ar-ga-man-nu* (Schrader, *KAT.*[2] p. 155) would seem to make a Semitic derivation more probable. The colouring matter was contained in a small vessel in the throat of the fish; and as the quantity mounted to only a single drop in each animal, the value of the dye was proportionately high: sometimes, however, the whole fish was crushed (Plin. ix. 60). It is difficult to state with precision the tint described under the Hebrew name. The Greek equivalent was, we know, applied with great latitude, not only to all colours extracted from the shell-fish, but even to other brilliant colours: thus, in John xix. 2, *ἱμάτιον πορφυροῦν* = *χλαμὺς κοκκίνη*, in Matt. xxvii. 28 (cp. Plin. ix. 62). The same may be said of the Latin *purpureus*. The Hebrew term seems to be applied in a similarly broad sense in Cant. vii. 5, where it either = *black* (cp. v. 11), or, possibly, *shining* with oil. Generally speaking, however, the tint must be considered as having been defined by the distinction between the purple *proper* and the other purple dye (A. V. "blue"), which was produced from another species of shell-fish. The latter was undoubtedly a dark violet tint, while the former had a light reddish tinge. Robes of a purple colour were worn by kings (Judg. viii. 26), and by the highest officers, civil and religious; thus Mordecai (Esth. viii. 15), Daniel (A. V. "scarlet," R. V. "purple," Dan. v. 7, 16, 29), and Andronicus, the deputy of Antiochus (2 Macc. iv. 38),

were invested with purple in token of the offices they held (cp. Xen. *Anab.* i. 5, § 8): so also Jonathan, as high-priest (1 Macc. x. 20, 64; xi. 58). They were also worn by the wealthy and luxurious (Jer. x. 9; Ezek. xxvii. 7; Luke xvi. 19; Rev. xvii. 4, xviii. 16). A similar value was attached to purple robes both by the Greeks (Hom. *Od.* xix. 225; Herod. iii. 22; Strab. xiv. 648) and by the Romans (Verg. *Georg.* ii. 495; Hor. *Ep.* 12, 21; Suet. *Caes.* 43; *Nero*, 32). Of the use of this and the other dyes in the textures of the Tabernacle, we shall presently speak.

2. BLUE (תְּכֵלֶת; *ὑάκινθος, ὑακίνθινος, ὁλοπόρφυρος*, Num. iv. 7; *hyacinthus, hyacinthinus*). This dye was procured from a species of shell-fish found on the coast of Phoenicia, and called by the Hebrews *Chilzon* (Targ. *Pseudo-Jon.*, in Deut. xxxiii. 19), and by modern naturalists *Helix Ianthina*. The derivation of the Hebrew name is uncertain; in Assyrian the word occurs as *takil-tu* (Schrader, *KAT.*² p. 155). The tint is best explained by the statements of Josephus (*Ant.* iii. 7, § 7) and Philo that it was emblematic of the sky, in which case it represents not the light blue of our Northern climate, but the deep dark hue of the Eastern sky (*ἀέρος δὲ σύμβολον ὑάκινθος, μέλας γὰρ οὗτος φύσει*, Phil. *Opp.* i. 536). The term adopted by the LXX. is applied by classical writers to a colour approaching to black (Hom. *Od.* vi. 231, xxiii. 158; Theoc. *Id.* 10, 28): the flower, whence the name was borrowed, being, as is well known, not the modern *hyacinth*, but of a dusky red colour (*ferrugineus*, Verg. *Georg.* iv. 183; *caelestis luminis hyacinthus*, Colum. ix. 4, 4). The A. V. (margin) has rightly described the tint in Esth. i. 6 as *violet*; the ordinary term *blue* (A.V. and R.V.) is incorrect: the Lutheran translation—in giving it *gelbe Seide* (yellow silk), and occasionally simply *Seide* (Ezek. xxiii. 6)—is still more incorrect. This colour was used in the same way as purple. Princes and nobles (Ezek. xxiii. 6; Ecclus. xl. 4), and the idols of Babylon (Jer. x. 9), were clothed in robes of this tint: the riband and the fringe of the Hebrew dress were ordered to be of this colour (Num. xv. 38): it was used in the tapestries of the Persians (Esth. i. 6). The effect of the colour is well described in Ezek. xxiii. 12, where such robes are termed לְבָשֵׁי מִכְלוֹל, *robes of perfection*, i.e. gorgeous robes. We may remark, in conclusion, that the LXX. treats the term תַּחַשׁ (A. V. "badger," R.V. "sealskin") as indicative of colour, and has translated it *ὑακίνθινος, ianthinus* (Ex. xxv. 5). [BADGER.]

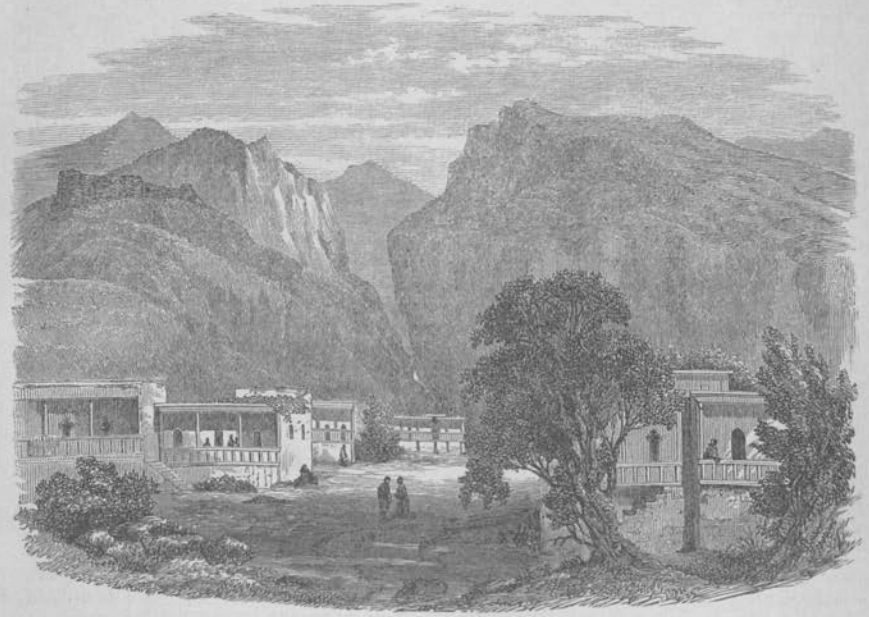
3. SCARLET (CRIMSON, Is. i. 18; Jer. iv. 30). The terms by which this colour is expressed in Hebrew vary; sometimes שָׁנִי simply is used, as in Gen. xxxviii. 28–30; sometimes תּוֹלַעַת שָׁנִי, as in Ex. xxv. 4; and sometimes תּוֹלַעַת simply, as in Is. i. 18. The word כַּרְמִיל (probably of Pers. etymology; see M.V.[11]; A. V. and R. V. "crimson;" 2 Ch. ii. 7, 14, iii. 14) was introduced at a late period, probably from Armenia, to express the same colour. The first of these terms (derived from שָׁנָה, *to shine*) expresses the *brilliancy* of the colour; the second, תּוֹלַעַת, the *worm*, or grub, whence the dye was procured, and which gave name to the colour occasionally without any addition, just as *vermilion* is derived from *vermiculus*. The LXX. generally renders it *κόκκινον*, occasionally with the addition of such terms as *κεκλωσμένον* (Ex. xxvi. 1), or *διανενησμένον* (Ex. xxviii. 8); the Vulgate has generally *coccinum*, occasionally *coccus bis tinctus* (Ex. xxviii. 8), apparently following the erroneous interpretation of Aquila and Symmachus, who render it *βίβαφος, double-dyed* (Ex. xxv. 4), as though from שָׁנָה, *to repeat*. The process of double-dyeing was, however, peculiar to the Tyrian purples (Plin. ix. 39). The dye was produced from an insect, somewhat resembling the cochineal, which is found in considerable quantities in Armenia and other Eastern countries. The Arabian name of the insect is *kermez* (whence *crimson*): the Linnaean name is *Coccus Ilicis*. It frequents the boughs of a species of *ilex*: on these it lays its eggs in groups, which become covered with a kind of down, so that they present the appearance of vegetable galls or excrescences from the tree itself, and are described as such by Pliny, xvi. 12. The dye is procured from the female grub alone, which, when alive, is about the size of a kernel of a cherry and of a dark amaranth colour, but when dead shrivels up to the size of a grain of wheat, and is covered with a bluish mould (Parrot's *Journey to Ararat*, p. 114). The general character of the colour is expressed by the Hebrew term חֲמוּץ (Is. lxiii. 1), lit. *sharp*, and hence dazzling (compare the expression *χρῶμα ὀξύ*), and by the Greek *λαμπρά* (Luke xxiii. 11), compared with *κοκκίνη* (Matt. xxvii. 28). The tint produced was *crimson* rather than scarlet. The only natural object to which it is applied in Scripture is to the lips, which are compared to a scarlet thread (Cant. iv. 3). Josephus considered it as symbolical of fire (*Ant.* iii. 7, § 7; cp. Phil. i. 536). Scarlet threads were selected as distinguishing marks from their brilliancy (Gen. xxxviii. 28; *Josh.* ii. 18, 21); and hence the colour is expressive of what is *excessive* or *glaring* (Is. i. 18). Scarlet robes were worn by the luxurious (2 Sam. i. 24; Prov. xxxi. 21; Jer. iv. 30; Lam. iv. 5; Rev. xvii. 4, xviii. 12, 16); it was also the appropriate hue of a warrior's dress from its similarity to blood (Nah. ii. 3; cf. Is. ix. 5), and was especially worn by officers in the Roman army (Plin. xxii. 3; Matt. xxvii. 28).

The three colours above described, purple, blue, and scarlet, together with white, were employed in the textures used for the curtains of the Tabernacle and for the sacred vestments of the priests. The four were used in combination in the outer curtains, the vail, the entrance-curtain (Ex. xxvi. 1, 31, 36), and the gate of the court (Ex. xxvii. 16); as also in the high-priest's ephod, girdle, and breast-plate (Ex. xxviii. 5, 6, 8, 15). The first three, to the exclusion of white, were used in the pomegranates about the hem of the high-priest's robe (Ex. xxviii. 33). The loops of the curtains (Ex. xxvi. 4), the lace of the high-priest's breastplate, the robe of the ephod, and the lace on his mitre were exclusively of blue (Ex. xxviii. 28, 31, 37). Cloths for wrapping the sacred utensils were either blue (Num. iv. 6), scarlet (*v.* 8), or purple (*v.* 13). Scarlet thread was specified in connexion

with the rites of cleansing the leper (Lev. xiv. 4, 6, 51), and of burning the red heifer (Num. xix. 6), apparently for the purpose of binding the hyssop to the cedar wood. The hangings for the court (Ex. xxvii. 9, xxxviii. 9), the coats, mitres, bonnets, and breeches of the priests were white (Ex. xxxix. 27, 28). The application of these colours to the service of the Tabernacle has led writers both in ancient and modern times to attach some symbolical meaning to them: reference has already been made to the statements of Philo and Josephus on this subject: the words of the latter are as follow: ἡ βύσσος τὴν γῆν ἀποσημαίνειν ἔοικε, διὰ τὸ ἐξ αὐτῆς ἀνεῖσθαι τὸ λίνον· ἥ τε πορφύρα τὴν θάλασσαν, τῷ τεφοινίχθαι τοῦ κόχλου τῷ αἵματι· τὸν δὲ ἀέρα βούλεται δηλοῦν ὁ ὑάκινθος· καὶ ὁ φοῖνιξ δ' ἂν εἴη τεκμήριον τοῦ πῦρος (*Ant.* iii. 7, § 7). The subject has been followed up with a great variety of interpretations, more or less probable. Without entering on a disquisition upon them, we will remark that it is unnecessary to assume that the colours were originally selected with such a view; their beauty and costliness are a sufficient explanation of the selection.

4. VERMILION (שָׁשֶׁר; μίλτος; *sinopis*). This was a pigment used in fresco paintings, either for drawing figures of idols on the walls of temples (Ezek. xxiii. 14), for colouring the idols themselves (Wisd. xiii. 14), or for decorating the walls and beams of houses (Jer. xxii. 14). The Greek term μίλτος is applied both to *minium*, red lead, and *rubrica*, red ochre; the Latin *sinopis* describes the best kind of ochre, which came from Sinope. Vermilion was a favourite colour among the Assyrians (Ezek. xxiii. 14), as is still attested by the sculptures of Nimroud and Khorsabad (Layard, ii. 303; Perrot et Chipiez, *Hist. de l'Art*, ii. 291 sq.; Babelon, *Manuel d'Archéologie Orientale*, p. 125 sq.; Riehm, *HWB.* s. v. "Farben"). [W. L. B.] [F.]

COLOS'SE (more properly COLOS'SAE, Κολοσσαί [Westcott and Hort], Col. i. 2. Κολασσαί, *Colassae*, is a form used by the Byzantine writers, and which perhaps represents the provincial mode of pronouncing the name. On coins and inscriptions, and in classical writers, we find Κολοσσαί. See Lightfoot[2] in loco, and COLOSSIANS, EPISTLE TO, § 1). A city in the upper part of the basin of the Maeander, on one of its affluents named the Lycus. Hierapolis and Laodicaea were in its immediate neighbourhood (Col. ii. 1, iv. 13, 15, 16; see Rev. i. 11, iii. 14). Colossae fell, as these other two cities rose, in importance. Herodotus (vii. 30) and Xenophon (*Anab.* i. 2, § 6) speak of it as a city of considerable consequence. Strabo (xii. p. 576) describes it as only a πόλισμα, not a πόλις; yet elsewhere (p. 578) he implies that it had some mercantile importance; and Pliny, in St. Paul's time, describes it (v. 41) as one of the "celeberrima oppida" of its district. Colossae was situated close to the great road which led from Ephesus to the Euphrates. Hence our impulse would be to conclude that St. Paul passed this way, and founded or confirmed the Colossian Church on his third missionary journey (Acts xviii. 23, xix. 1). He might also easily have visited Colossae during the prolonged stay at Ephesus, which immediately followed. The most competent commentators, however, agree in thinking that Col. ii. 1 proves that St. Paul had never been there, when the Epistle was written. Theodoret's argument that he must have visited Colossae on the journey just referred to, because he is said to have gone through the whole region of Phrygia, may be proved fallacious from geographical considerations: Colossae,



Colossae.

though ethnologically in Phrygia (Herod. *l. c.*; Xen. *l. c.*), was at this period politically in the province of Asia (see Rev. *l. c.*). That the Apostle hoped to visit the place on being delivered from his Roman imprisonment is clear from Philemon *v.* 22 (cp. Philip. ii. 24). Philemon and his slave Onesimus were dwellers in Colossae. So also were Archippus and Epaphras. From Col. i. 7, iv. 12, it has been naturally concluded that the latter Christian was the founder of the Colossian church (see Lightfoot on Col. iv. 12). [EPAPHRAS.] The worship of Angels mentioned by the Apostle (Col. ii. 18; see Lightfoot in loco and reff.) curiously reappears in Christian times in connexion with one of the topographical features of the place. A church in honour of the Archangel Michael was erected at the entrance of a chasm in consequence of a legend connected with an inundation (Hartley's *Researches in Greece*, p. 52), and there is good reason for identifying this chasm with one which is mentioned by Herodotus. This kind of superstition is mentioned by Theoderet as subsisting in his time; also by the Byzantine writer Nicetas Choniates, who was a native of this place, and who says that Colossae and Chonae were the same. The neighbourhood (visited by Pococke) was explored by Mr. Arundell (*Seven Churches*, p. 158; *Asia Minor*, ii. p. 160); but Mr. Hamilton was the first to determine the actual site of the ancient city, which is on the left bank of the Lycus about three miles from the modern village of *Chonas* (*Researches in A. M.* i. 508; *Dict. of Gk. and R. Geog.*, art. "Colossae;" Vaux, *Gk. Cities and Islands of Asia Min.* p. 142.) [J. S. H.] [W.]

COLOSSIANS, EPISTLE TO THE.

1. *Title.*—For this Epistle, as for the other books of the N. T., the rule holds goods that the simplest form of title is the oldest. There are however two ways of spelling the name, Κολοσσαί and Κολασσαί, Κολοσσαεῖς and Κολασσαεῖς. Of these the first is the older and is found on coins, &c., as long as the city had a coinage, *i.e.* down to the middle of the third century. The form in *a* predominates among later writers. Both forms appear in the MSS.; but while there is decisive authority (ℵ B D E F G L and others) for Κολοσσαῖς in i. 2 (*τοῖς ἐν* Κολοσσαῖς *ἁγίοις*), there is more fluctuation in the title of the Epistle. Here ℵ D E F and Latt. have Κολοσσαεῖς, while A B* K and some others give Κολασσαεῖς. As combinations with B are found on the whole to be superior to combinations with ℵ, the latter reading seems preferable; and, on internal grounds, it is certain that, if Κολοσσαῖς was read in the text, the title would be assimilated to it. We conclude therefore that St. Paul wrote "Colossae," but that the title which at a very early date was prefixed to the Epistle was "To the Colassians." It is probable that "Colassae" was a vernacular form which only gradually superseded the more correct usage, but which prevailed among the classes from which the Christians of the first two centuries were mostly taken. For an exhaustive discussion, see Lightfoot, *Col.* p. 17 n.; comp. Hort, *Introd.* p. 322. Lightfoot and Westcott and Hort print ΠΡΟΣ ΚΟΛΑΣΣΑΕΙΣ; Tischendorf, though admitting the higher authority of this spelling, retains ΚΟΛΟΣΣΑΕΙΣ out of conformity to i. 2.

2. *Authorship.*—There does not seem to have been any doubt in the ancient Church as to the Pauline authorship of the Epistle; and if the evidence that has come down to us is something short of conclusive, it is at least distinctly favourable to the traditional hypothesis. It is true that we have to wait until the Muratorian Fragment (*c.* 180 A.D.) and Irenaeus (180–190 A.D.) before the Epistle is definitely referred to by name; but much about the same date we find it acknowledged by Irenaeus in Gaul, by the Fragment at Rome, by Clement of Alexandria, and a little later by Tertullian in Africa. Marcion the Gnostic, who certainly included it among the ten Epistles which he accepted as St. Paul's, carries us back at least to A.D. 140, so that there is less reason to lay stress on the doubtful traces of its use than have been found in Clement of Rome, Barnabas, and Ignatius. Justin Martyr and Theophilus of Antioch both apply to our Lord the phrase *πρωτότοκος πάσης κτίσεως*, which in this complete form is probably a reminiscence of Col. i. 15, and not of Psalm lxxxix. 28, though an isolated phrase of this kind might possibly get into oral circulation without being directly derived from any written source. It is sufficient to say that as soon as we find traces of a collection of St. Paul's Epistles, the Epistle to the Colossians certainly had a place among them, and in no quarter of the ancient world does it appear that this place was questioned.

The first serious doubts as to the genuineness of the Epistle date from the second quarter of the present century, when there was a general sense of dissatisfaction with the traditional views of things, and when the critical methods which had led to marked results in classical literature came to be applied, with the daring if also with the extravagance of newly-asserted freedom, to the books of the N. T. Mayerhoff led the way (*d. Brief an die Kol. mit vornehml. Berücksicht. d. Pastoralbr. kritisch geprüft*, Berlin, 1838), with objections partly literary, partly drawn from supposed allusions to Cerinthian Gnosticism. These objections were placed upon a more philosophic basis by Baur and his Tübingen followers, who saw in the Epistles to the Colossians and Ephesians a stage in the process of transition from St. Paul to St. John, and also in the gradual reconciliation of Jewish with Gentile Christianity.

It cannot be said that the doubts which were thus felt were altogether without reason. If the four great Epistles (1 and 2 Cor., Gal., Rom.) are taken as the standard of Pauline composition, the Epistle to Colossians presents a real difference, both of conception and of style.

(1) *Difference of Conception.*—Stress is laid no longer, as in the previous Epistles, so much upon the method of salvation as upon its Author. If it would not be true to say that the doctrine of justification by faith retires into the background (see i. 14, 20, 21; ii. 14), it is at least not expressed in the old terms (*δικαιόω, δικαίωμα, δικαιοσύνη ἐκ πίστεως* are entirely wanting), and on the other hand the pre-existence, exaltation, and true Divinity of Christ are strongly emphasized. He is considered less in connexion with His redeeming work for man than in a high

transcendental sphere, as exercising supreme authority over the world of spirits. There are many references to Angels, who are classed in an organised hierarchy. Corresponding to these incursions into the transcendental region, there is required on the part of man *σοφία* rather than *πίστις*, and the Gospel itself is conceived as a *μυστήριον*. Besides, language is used which at first sight seems hardly consistent with the humility of the Apostle, when he speaks of himself as "filling up that which is lacking of the afflictions of Christ."

(2) *Difference of Style.*—This is felt both in the general impression left by the Epistle, and also on examination into the use of particular words. The sentences are not only long and involved, but heavy and cumbrous in their movement. There is none of that fiery interchange of question and answer which was so characteristic of the earlier group; no rapid and eager dialectic; no appeal to the O. T.; no pressing of the antagonist with dilemma after dilemma; no sudden and soaring flights of eloquence. The impetuosity, the quick play of light and shade, are gone, and in their stead we have a uniformity which is elevated indeed, but also rather laboured.

These general characteristics are reflected in the diction. The particles which give such rapidity and flexibility of movement to the earlier Epistles—*ἄρα, ἄρα οὖν, διό, διότι, γάρ*—are either wanting or rare. The catchwords of Pauline theology, not only the derivatives of *δίκαιος*, but a multitude of others—*ἀποκάλυψις, δοκιμάζειν* and its cognates, *καυχᾶσθαι* and its cognates, *καταργεῖν, κοινωνία, νόμος, πιστεύειν, σωτήρ, σωτηρία*—are absent. Their place is taken by elaborate compounds, such as *αἰσχρολογία, ἀνταναπληροῦν, δογματίζεσθαι, ἐθελοθρησκεία, εἰρηνοποιεῖν, ἐμβατεύειν, παρηγορία, πιθανολογία, πρωτεύειν, στερέωμα, συλαγώγειν, χειρόγραφον*: there are thirty-three of these *ἅπαξ λεγόμενα* in all. And besides these words that are peculiar to the Epistle, there are others that are infrequent in the older group: ten shared only with the Epistle to the Ephesians, including *ἀνθρωπάρεσκος, ἀπαλλοτριοῦσθαι, αὔξησις, ἀφή, ὀφθαλμοδουλεία*; and others that are rare in St. Paul's writings, of which the most characteristic would be *ἀποκρύπτειν, γενέα* (in the phrase *ἀπὸ τῶν αἰώνων καὶ ἀπὸ τῶν γενεῶν*), *οἰκονομία, συμβιβάζειν*.

Along with these phenomena, however, a dispassionate criticism could not but detect others of an opposite character. It was true that there were both thoughts and expressions that were wanting in the earlier Epistles, but it was equally true that there were many others that were common to those Epistles. The main lines of doctrine in Romans and Galatians were conspicuous also in Colossians: the idea of deliverance and reconciliation with God brought about through the death of Christ, in i. 14, 20, 21, ii. 14; and the idea of death to sin through union with Christ realised in Baptism, and followed by the moral *νέκρωσις* which is its corollary, in ii. 12, iii. 1 sq., 5 sq. The ideas of *σοφία* and *ἐπίγνωσις* had their counterpart in 1 Cor. ii. 6 sq. The condemnation of retrogression to the "rudiments of the world" and ceremonial observances was one of the main themes of the Epistle to the Galatians; and from the same Epistle might be easily paralleled the string of Christian graces in Col. iii. 12, 13.

And if a part of the vocabulary sounded novel, much of it also could not fail to be recognised as distinctly Pauline. No one, for instance, could read chs. i. 1–8, ii. 6–13, iii. 1–13, or the personal matter in ch. iv., without a sense of resemblance to the whole style and manner of St. Paul, too strong to be due to mere imitation. Still less was it possible to see any other hand than St. Paul's in that incomparable little Epistle to Philemon with which this to Colossians is so intimately connected.

Moved by these considerations, a third group of critics have tried to mediate between the two extremes of complete acceptance or complete rejection. Thus Ewald held that the substance of the Epistle was St. Paul's, but that its actual composition was handed over to Timothy. Weisse and Hitzig had recourse to a theory of extensive interpolation; a theory which was worked out on a most elaborate scale by Dr. H. J. Holtzmann, well known for his previous work on the Synoptic Gospels, in his *Kritik d. Epheser- und Kolosserbriefe*, Leipzig, 1872. Dr. Holtzmann maintains the presence in the Epistle of a genuine nucleus, which he believes to have been interpolated by the author of the (spurious) Epistle to the Ephesians. It cannot be said that this view has met, or is likely to meet, with much favour in England; but as it is based on a very close examination of the facts by a writer of great acumen, and as the hypothesis may possibly serve other purposes besides that for which it was intended, it may be worth while to indicate briefly the kind of outline that was assumed for the genuine Epistle. It was supposed to contain, roughly speaking, i. 1–5, 6a, 7, 8, 9a, a few words of 10, 13, a few words of 19 and 20, rather more of 21, 22, 23, the greater part of 25 and 29; chap. ii., 1, beginning of 2, greater part of 4, 5, 6, 7b, greater part of 8, some words of 9, 11, greater part of 12, 13 and 14, 16, 18b, 20, 21, 22a, 23b; chap. iii., 3, 12, 13, 17; chap. iv., greater part of 2–5, 6, 7, 8, 10, 11, much of 12, 13, 14, 18.

More recently a very friendly critic, Von Soden, in the *Jahrb. f. protestant. Theol.* for 1885 (p. 320 sq.; p. 497 sq.; p. 672 sq.), after a careful examination of the passages which Holtzmann regards as interpolations, has reduced them to much smaller dimensions, rejecting only i. 15–20, ii. 10, 15, 18b, as not the work of the Apostle. Von Soden's defence of the incriminated passages is worthy of all praise: the only wonder is that, having gone so far in re-vindicating these for St. Paul, he should stop short just where he does.* To draw a dividing line here it is necessary to strain out gnats with a very fine strainer indeed. The points of contact with admittedly Pauline teaching are so many, and the extensions of this which are involved so slight, that natural development and change of circumstances are quite enough to account for

* Pfleiderer aptly points out the inconsistency of separating passages which so closely resemble each other as i. 19 (regarded as not genuine) and ii. 9 (regarded as genuine), ii. 10 and 15 (not genuine), ii. 14 (genuine), ii. 18 (not genuine), ii. 23 (genuine), &c. (*Urchristenthum*, p. 683 n.)

them. On the other hand, such limited interpolation loses its *raison d'être*. It is not even attempted to show that it had any clear polemical purpose; and if it had, that purpose would not have been served at all effectively.

Yet a larger theory, such as Holtzmann's, is open to still more serious objections. The true answer to this is the detailed discussion, which is excellently conducted by Von Soden, of the passages rejected as spurious, together with the detailed testing of the reconstructed genuine Epistle. It was not difficult to show that this left abruptnesses and awkwardnesses of style and construction, quite as great as any supposed incoherence in the present text of the Epistle. But besides these detailed inquiries one or two general remarks may be made. (1.) There ought to be a clearer understanding as to the nature of the disproof of genuineness both in thought and in expression. It is not a sound method to take certain standard documents and to say all that cannot be paralleled out of these documents is interpolation. It is not to be supposed that a writer of so much originality as St. Paul would simply go on writing in a circle and repeating himself. The standard documents themselves have their ἅπαξ λεγόμενα; and ἅπαξ λεγόμενα are to be expected, especially with a difference of subject. The *onus probandi* certainly lies on the side of the critic, whose duty it is, as Von Soden rightly urges, not "to leave nothing but what is undoubtedly Pauline," but rather "to remove nothing but what is decidedly un-Pauline." There is a broad distinction between these two positions—a distinction which really covers the greater part of the matter in dispute. Holtzmann's criteria are altogether too narrow. (2.) A further point, which Holtzmann does not seem to have fully considered, is the nature of the relation which his theory presupposes between Colossians and Ephesians. In any case that relation raises a question about which we shall have something to say presently. If both Epistles proceed from St. Paul, the resemblance between them has an obvious cause. But on Holtzmann's theory this is what we have:—Into one letter (Colossians) the interpolator has introduced a clause here and a paragraph there; yet he also feels competent to write another letter (Ephesians) from the very beginning to complete his work. We should not have been so much surprised if the second letter had taken a new line and had dealt with new problems; but it is modelled upon the Colossian letter throughout: they are twin Epistles, with the closest likeness to each other. What strange parsimony and what strange prodigality of labour! Surely it would have been easy to make one letter do duty for both. A little more interpolation in Colossians, a few additional touches in Ephesians, would have been all that was wanted. (3.) There is yet a third point which, both here and elsewhere, ought to be borne in mind more fully than it has been. It must be granted in the abstract that the interpolation of ecclesiastical writings is a possibility. The Sibylline books, 4 Esdras, the longer Ignatian letters, the working up of the Didaché in the Apostolic Constitutions, Cyprian's treatise *De Unitate Ecclesiae*, are instances that readily occur to us. It must be conceded, too, that even within the limits of the N. T. interpolations are possible. The *pericopæ adulterae* and the moving of the waters in St. John, the last twelve verses of St. Mark, the eunuch's confession in the Acts, the phenomena of the later chapters of St. Luke, the apocryphal additions scattered throughout the Codex Bezae and its allies, the shifting place of the Doxology in Romans, are all examples in point. But the very existence of these analogies shows us that we must proceed carefully. We must not argue as if any and every document was upon the same footing: documents which rest on some one or two MSS., the oldest perhaps of the tenth century, and documents supported by MSS., Versions, and Fathers, the archetypes of which, if not the actual parchments, take us almost to the very threshold of the apostolic age. Discrimination is called for; and each class of books must be judged upon its own merits. In the case of the Historical Books it is not unreasonable to extend to one place a process which is seen from the MSS. in actual operation at another; but in the case of the Epistles there are no true analogies for dogmatic interpolation of the kind required by the hypotheses of Holtzmann and Von Soden. The phenomena referred to in the Epistle to the Romans are quite different. Such hypotheses therefore can only be received with extreme caution.

We have then to choose between a direct negative and a direct affirmative of St. Paul's authorship, and of these alternatives there can be little hesitation in preferring the latter. The differences from the earlier Epistles can be far more easily accounted for on this hypothesis than the essentially Pauline character of the Epistle on the other. A change of circumstances, acting on the singularly impressible character of St. Paul, will explain all that needs explanation. The Epistles of the third missionary journey were written at a time of great excitement. They were wrung from the Apostle in the heat of his conflict with enemies on the right hand and enemies on the left. They bear marks of high tension, of keen susceptibilities strongly roused. They betray not only a mental but a physical restlessness. "When I came to Troas . . . I had no relief for my spirit, because I found not Titus my brother: but taking my leave of them, I went forth into Macedonia." All this accords well with the vehement, impulsive, intensely personal tone of 2 Corinthians and Galatians, and the surge and swell of emotion had not subsided—it was only subsiding—in Romans.

The Epistles of the imprisonment were written under very different conditions. They were written, in a period of forced inaction, to Churches at a distance, one a Church which St. Paul had never seen. The problems with which the Apostle had to deal were in part apparently new problems. He met them with the fruits of his own reflection, a quiet and steady development of thought, and not with the weapons of a dialectic hammered out under the stress of fierce personal controversy. But even here, in an Epistle like Philippians, the old leaven breaks out, and the old vehemence of style is more than once resumed. Few writers have had a range and variety of style equal to St. Paul's, and there are few in whom the different phases

glide and pass into each other by more gradual and subtle transitions. If 2 Thessalonians leads on to Corinthians, and Galatians to Romans, then no less does Romans lead on to Philippians, and Philippians to Ephesians and Colossians. We shall see more fully how the peculiar element in this last Epistle is to be accounted for when we come to speak of the Colossian heresy and St. Paul's treatment of it.

Besides these considerations, it is possible that some reserve ought to be made in favour of such a theory as that put forward by Ewald. We do not know in what proportions St. Paul shared the work of composition with his amanuenses, and it is, to say the least, conceivable that more was left in these Epistles to Timothy than in the case of Romans to Tertius, or in the case of 1 Corinthians to Sosthenes. The arguments of Meyer (E. T., p. 247 sq.) against this supposition do not seem to be conclusive. It must, however, be confessed that we are drawing upon pure conjecture, where we can neither affirm nor deny with confidence. All we can say is that, if there is room in the unknown circumstances for other possibilities, there is room also for this, and it remains as an indefinite factor in the question. [For further remarks on the style of the Epistle and its relation to Ephesians, see below.]

3. *Date and Place.*—It is certain that the three Epistles—to Ephesians, Colossians, and Philemon—were all written about the same time and from the same place. They are connected together by a series of personal notices. (1.) Ephesians and Colossians both had the same bearer—Tychicus, and in both he was charged with the same commission, conveyed in almost identical terms (Ephes. vi. 21, 22 = Col. iv. 7, 8). There is a further connexion, if Dr. Lightfoot and others are right in supposing that the "Epistle from Laodicea" mentioned in Col. iv. 16 is really our "Ephesians." This view goes upon the assumption that the Epistle known to us by that name was originally a circular letter addressed to the Churches of Asia, of which Laodicea would be one. In that case it would appear that St. Paul desired the Colossians to acquaint themselves with the contents of the circular letter as well as with that specially addressed to themselves. The identification of the "Epistle from Laodicea" with Ephesians is of course conjectural, nor can it claim to be as yet generally accepted, but as a hypothesis it appears to give a simple and harmonious explanation of the facts, and so to possess as much probability as in the absence of direct attestation can be expected [see EPHESIANS, EPISTLE TO THE]. (2.) The links that connect Colossians with Philemon are, if not closer, at least more numerous. Here Timothy is joined with St. Paul in the address of both Epistles. Onesimus, who is the subject of the Epistle to Philemon, is the companion of Tychicus, who is to deliver that to Colossae (Col. iv. 9). Greetings are sent in both Epistles from the same persons—Aristarchus, Mark, Epaphras, Luke, Demas (Col. iv. 10, 12, 14 = Philem. *vv.* 23, 24). A special message is sent to Archippus in Philem. *v.* 2; and from Col. iv. 17 we gather that he held an official position in the Church at Colossae, or perhaps, as has been inferred from the context in which his name occurs, at Laodicea.

Putting all these various notices together, we conclude that St. Paul wrote and despatched three letters at the same time—a general letter to the leading Churches of Proconsular Asia (Ephesians), a letter addressed more directly to the particular circumstances of the Church at Colossae (Colossians), and a private letter dealing with the concerns of a single individual (Philemon).

What was the time in question? At what period in St. Paul's life do these three letters fall? The answer to this question depends upon a further point—the determination of the place from which they were written. We know that they were written during one of St. Paul's imprisonments (Col. iv. 3, 18; Philem. 1, 10, 13), and the choice lies between the two years during which he was detained at Caesarea (Acts xxiv. 27), or the similar period in which he was a prisoner at Rome (Acts xxviii. 30). Meyer and some others contend for the earlier of these two dates (*Ephesians*, E. T., pp. 18–21; *Colossians*, E. T., p. 241 sq.), but the arguments adduced are small and inconclusive, and it must be confessed that those upon the other side are hardly stronger. The real turning point in the discussion is the relation of these Epistles to the Epistle to Philippians, which Meyer himself admits was probably written from Rome. If, therefore, as we believe, the three Epistles were written *after* Philippians, it follows that they too are a product of the Roman imprisonment, and they would then fall about the year 62. This view of the place and date of their composition is that of by far the majority of critics and commentators. The more detailed examination of it belongs rather to the article on the EPISTLE TO THE PHILIPPIANS: see also EPHESIANS, EPISTLE TO THE.

4. *Persons addressed.*—A full account of Colossae and the Colossians has been given in the preceding article: what we have to consider here is, what special circumstances in the condition of the Colossian Church induced St. Paul to write to it this Epistle? The Church of Colossae had been founded by Epaphras, and Epaphras was now in the company of St. Paul at Rome. What brought him there we do not know, and the guesses that have been made on the subject are incapable of verification. The news that he brought of the state of his Church was on the whole good (Col. i. 3–8), but at the same time there was some reason for anxiety. A leaven of false teaching was at work which St. Paul was afraid might spread, and to guard against it he sends an earnest warning. In the character of this false teaching lies the main problem presented by the Epistle.

It was twofold in its nature, at once practical and speculative. (1) On the practical side its tendency was towards asceticism and punctilious observance of ceremonial rules. It involved abstinence from meats and drinks (ii. 16), and unsparing rigour in the treatment of the body (ii. 23). Along with this went a scrupulous attention to the sacred seasons—festivals, sabbaths, new moons (ii. 16). From the stress which St. Paul lays upon spiritual circumcision (ii. 11), we gather that literal circumcision was also practised. All these things St. Paul classes together as *στοιχεῖα τοῦ κόσμου* (ii. 8), *i.e.* not as a majority of the ancients and some moderns

have supposed, "the heavenly bodies" as regulating the seasons, but crude material rudimentary methods which have been superseded by the higher Christian law of "faith." (2) On the speculative side the most distinctive feature in the Colossian heresy was the prominence which it gave to *Angels*. Worship was offered to them (ii. 18); and as we may infer from the emphatic language in which St. Paul excludes any such notion, they were regarded as the principal agents in creation (i. 15), the prerogatives of Christ were claimed for them (i. 15; ii. 10, 15), the Divine pleroma, or sum of the attributes of Godhead, was supposed in some way to be diffused among them.

It is natural to ask, What is the heresy thus described? Is it possible to give it a single name, or are we to suppose that there were several distinct tendencies in the Colossian Church at the same time? The tenor of St. Paul's reply certainly favours the conclusion that there was but a single heresy. He treats of its different aspects in the same paragraph (ii. 16–23), and even in the same sentence: for what is kept distinct in *vv.* 16, 18 is combined under one view in *v.* 23. Nor is there anything incompatible in the union of ascetic ceremonialism with angelolatry: a similar union was common enough in the later Gnostic sects.

But if this is so, the inquiry may be still further narrowed. The observance of "sabbaths and new moons" could only be Jewish, so that for the other features which went with this we must also seek a Jewish origin. But if we are to look in the direction of Judaism, it is not unnatural that attention should have been drawn especially to the sect of the Essenes. In Essenism we find a combination of features which presents some marked similarities to that which existed at Colossae. The Essenes seem to have been vegetarians;[b] they avoided wine; they were scrupulous to an extreme in the keeping of the Sabbath; they had some esoteric teaching in regard to Angels. The parallel, however, does not perhaps extend so far as is sometimes assumed. Our knowledge of Essenism is in many respects very imperfect—too imperfect to allow us to feel sure of our ground in comparing it with the Colossian heresy. This heresy contained a large element of cosmogonic speculation: in ascribing a similar element to Essenism we are depending upon a single sentence in a disputed treatise of Philo (*Quod omnis probus liber*, § 12), and at best we have no means of knowing how far the two coincided. Much would turn upon the degree of probability that the key-word πλήρωμα had, as Bp. Lightfoot thinks (*Col.* p. 328), a Palestinian origin. If there is no instance of it in Philo, we may equally doubt whether there is any instance in the apocryphal or pseudepigraphic literature which had its birth in Palestine. Again, all we are told about the Essene angelology is that the members of the sect were not "to reveal the names of the Angels." This was probably connected with the magic which the Essenes seem to have practised, and hardly amounts to the θρησκεία τῶν ἀγγέλων prevalent at Colossae (Col. ii. 18). On the other hand, there are a number of essential features in Essenism for which there is no evidence of any counterpart in the Colossian Church. Perhaps we ought not to include among these the elaborate lustrations, as they might be taken to be covered by the straining which is apparent after ceremonial purity. But the reverence, if not worship, paid to the sun, was a point that St. Paul could hardly have failed to notice. There is an equal silence as to the quasi-monastic mode of life which the Essenes adopted, as to the formidable process of initiation which they had to go through, and the obligation of secrecy which they imposed upon their disciples. The doctrines current at Colossae would seem to have been rather matters of common notoriety. Add to this that, though the Essenes were certainly strict in the observance of the Sabbath, their tenets would not favour the observance of the other festivals, as they avoided the Temple and its rites. And there is besides the initial difficulty that Palestine was the proper home of the Essenes: their principal community was by the Dead Sea; and Syria was the utmost limit assigned to their distribution.

It is therefore by no means without cause that, while a majority of commentators find Essenic affinities in the false teaching at Colossae, the best among them (*e.g.* Lightfoot, p. 94 sq.; Klöpper, p. 92 sq.) are careful to define that, in speaking of "the Judaism in the Colossian Church as Essene," they "do not assume a precise identity of origin, but only an essential affinity of type with the Essenes of the mother country." In view of what has just been urged it may be questioned whether even this is not going too far. Points of contact there are certainly, but "an essential affinity of type" is something different. In any case there is no direct affiliation. The truth seems to be that like causes were producing like effects in many parts of the East, and through the East even in the West. We happen to know rather more about the Essenes, but there must have been many similar manifestations of which we have no such direct record. Not to lay stress on the Therapeutae, our sole account of whom is impugned, though it has not wanted strenuous defenders (*e.g.* Dr. Edersheim in *Dict. of Christ. Biog.* iv. p. 368 sq.), many phenomena akin to those of Essenism (libations, repudiation of sacrifice, prayers before meat, but not denial of the resurrection of the body) are found in Book iv. of the Sibylline Oracles, which is ascribed to Asia Minor and to a date *c.* 80 A.D.; vegetarianism is found even in Rome (Rom. xiv. 2, &c.); and it is well known what a prominent part is played by Angels in a number of apocryphal and pseudepigraphic writings and in Rabbinical literature. All these are not so much directly connected as distinct and independent products of a common tendency. In the first

[b] The vegetarianism and water-drinking of the Essenes are described by Lucius and Schürer (*Neutestamentliche Zeitgeschichte*, ii. p. 478, ed. 2); see, however, Bp. Lightfoot's note, *Col.* p. 86: the evidence is perhaps not quite conclusive, but the parallels seem to make it probable that the ἐν ἀγγείον ἐξ ἑνὸς ἐδέσματος of Josephus, *B. J.* ii. § viii. 5, meant vegetables. In this connexion it should be mentioned that the Philonic treatise *Quod omnis probus liber*, besides earlier attacks, has recently had regular siege laid against it by Ohle, *Die Essäer des Philo*, Leipzig, 1887, and by Ausfeld, *De libro περὶ τοῦ πάντα σπουδαῖον εἶναι ἐλεύθερον*, Göttingen, 1887; cp. Harnack in *Theol. Literaturzeitung*, 1887, col. 493 sq.

century of the Christian era men's minds were intent upon the coming revelation. They caught eagerly at the asceticism, at the ceremonial purifications, and at the theories of mediatorial agencies between God and man in which the East was so prolific. The ground was everywhere prepared; and just as within less than a generation Gnosticism itself was rife at one and the same time in Proconsular Asia, in Samaria, and in Syria, so now the germs of Gnostic Judaism were sprouting on the banks of the Lycus as well as by the Dead Sea.

5. *Character and Contents of the Epistle.*—St. Paul gives no uncertain answer to the problems which this insidious "philosophy" forced upon him. Its representatives as yet were few (τις, ii. 8, 16; μηδείς, ii. 4, 18), but they were no less dangerous. Alike their method and their doctrine were utterly wrong. In doctrine they gave to Angels what was due solely to Christ. The remedy was to be sought in truer views about Him. He alone was the incarnation of Divinity; He alone was the Agent in creation; He alone existed before the worlds; the Angels themselves were created by Him; He was their Head; over the powers of the Evil One He had triumphed in what seemed to be His humiliation. Let the Colossians be loyal to Him, and not be deluded by any specious pretensions of superior reverence; it was no true reverence (though it might seem so) to place inferior beings between man and God. Equally ill-judged were the means which they were being persuaded to adopt for moral reformation. Asceticism and ceremonialism belonged to a past state of things. They had been superseded by methods far more potent. In his Baptism the Christian threw himself unreservedly on Christ; he died with Christ to sin; he is quickened by Christ with a new life; his sins are forgiven; he looks up to that heavenly abode to which Christ is gone, and the thought of heaven inspires him while on earth; he is a member of one vast organism which lives and moves and has its being in Christ. Whichever way it is regarded, Christ is all in all; He is the sum of all speculation; He is at once the source and the goal of all Christian practice. To "hold the Head" was what the false teachers failed to do, and "holding the Head" the Colossians would need nothing more.

Such would seem to be the main lines of the argument of the Epistle to the Colossians. The following may be taken as an analysis of the Epistle.

I. Introductory.
- (1) Apostolic salutation (i. 1, 2).
- (2) Thanksgiving for the faith and love shown by the Colossians since their conversion by Epaphras (i. 3–8).
- (3) Prayer for their growth in knowledge, Christian activity, and constancy, as heirs of Christ's kingdom (i. 9–13).

II. Dogmatic (Positive).

Christ the Saviour and Head (i. 14–19), of Angels as well as of men (*vv.* 20–23).
- (1) Christ our Redeemer (i. 14).
- (2) Christ and Creation, prior to it and sovereign over it; its Cause at once efficient and final (i. 15–17).
- (3) Christ and the Church, its Head in virtue of His Resurrection and as embodying the Divine pleroma (i. 18, 19).
- (4) Christ, the Author of salvation as well for Angels as for men, by His reconciling death (i. 20–22 a), in which salvation the Colossians will share if they are true to the faith (i. 22 b, 23).

III. Pastoral.
- (1) The mystery (of Christ's revelation to the Gentiles) which St. Paul is commissioned to preach (i. 24–29).
- (2) His anxiety for the Churches which he has not visited (ii. 1–5).
- (3) Exhortation to the Colossians to continue as they had begun (ii. 6, 7).

IV. Dogmatic (Negative) or Polemical.
- (1) Warning against that false philosophy which sought salvation through mundane agencies and not through Christ (ii. 8).
- (2) Preliminary assertion of true doctrine and true method (ii. 9–15).
  - *a.* Christ the sole Incarnation of Deity (ii. 9), to Whom all the hierarchy of spirits is subordinate (ii. 10).
  - *b.* Union with Him begins in Baptism, the Christian's circumcision, in which he dies with Christ and is raised to a new life with Him (ii. 11–13). In it he receives that forgiveness which Christ won for him on the Cross, triumphing over all the powers of evil (ii. 13–15) [so that bad and good spirits alike are subject to Him].
- (3) Direct condemnation of false doctrine and false method (ii. 16–23).
  - *a.* Punctiliousness as to food and seasons belongs to a past dispensation, the mere shadow of Christianity (ii. 16, 17).
  - *b.* The domineering visionaries who would force upon the Colossians a submissive Angel-worship, cut themselves loose from Christ, Who alone gives to the organic structure strength and cohesion (ii. 18, 19).
  - *c.* All such things are a retrogression to one who has died with Christ, whether (*α*) rules of diet and ceremonial cleanness, or (*β*) that pretentious and affected humility which is no real check on self-indulgence (ii. 20–23).

V. Practical and Hortatory.
- (1) True elevation to be sought through union with the risen Christ (iii. 1–4).
- (2) The necrosis of all evil passions and practices implied in the change from heathenism to the Church Universal (iii. 5–11).
- (3) Exhortation to assume Christian virtues and graces (iii. 12–17).
- (4) Special duties (iii. 18—iv. 1):
  - *a.* Of wives and husbands (iii. 18, 19).

b. Of children and fathers (iii. 20, 21).
c. Of slaves and masters (iii. 22—iv. 1).
(5) Prayer (α) enjoined on all, (β) requested by St. Paul for himself (iv. 2–4).
(6) Christian conduct towards the outer world (iv. 5, 6).

VI. PERSONAL MATTER.
(1) The bearer Tychicus and his commission (iv. 7, 8); Onesimus (iv. 9).
(2) Salutations from Aristarchus, Mark, and Jesus Justus (iv. 10, 11), from Epaphras (iv. 12, 13), from Luke and Demas (iv. 14).
(3) Salutations and instructions to the Church at Laodicea (iv. 15, 16), with a special message for Archippus (iv. 17).
(4) Autograph valediction (iv. 18).

Style.—In looking back over the Epistle as a whole, without reference to critical controversy or statistics of verbal usage, the sense of unity in style with the rest of St. Paul's writings increases in force. The practical and personal parts are entirely in his manner, and so too are those in which he expresses his pastoral solicitude for the group of Churches to which he is writing. Little less characteristic is his trenchant polemic against a novel kind of false teaching. And if in the accumulative method of his own doctrinal exposition, in which clause is piled upon clause charged with weighty dogmatic meaning, we miss something of the old fervid outbursts and rapid changes of front, yet they show a masterly grip of first principles, and a firm enunciation of them which few indeed could imitate. We are apt to forget how much fervour and energy of style are a matter not merely of temperament, but of passing moods and of physical condition. A high-strung nature like St. Paul's, rich in emotional sensibility, and liable to extremes of elation and depression, must have been especially open to such influences. One simple cause seems enough to account for any difference between the group of Epistles written after the tumult at Ephesus and the so-called Epistles of the Imprisonment—a cause implied in the very name of the later group—the change from the free exciting varied life, stimulated to intensity by struggles without and anxieties within, to a state of monotonous and compulsory inaction. Allowing for this, we seem to have sufficient explanation of that small proportion of the facts which needs explaining.

Relation to Ephesians.—In regard to style the Epistle to the Colossians presents a close parallel to the contemporary Epistle to the Ephesians. But the resemblance between the two Epistles goes beyond any general features of this kind. In many places the identity both of thought and of language is such as to make the one Epistle almost a duplicate of the other. The fuller exhibition of this identity must be reserved for the article on EPHESIANS. For the present we must content ourselves with a few general remarks on the peculiar literary relation involved. The problem is not quite the same as that which is raised by the Synoptic Gospels and the two Epistles. 2 St. Peter and St. Jude: for we have here not two writers copying each other, but a single writer repeating himself. In the case of St. Paul, however, we are in a measure prepared for the relation which is found to exist by the marked resemblance, often amounting to verbal identity, between others of his Epistles, *e.g.* between Galatians and Romans, or Romans and Philippians. No doubt the resemblance is not there so sustained, but there was also not the same reason why it should be. The Epistles to the Ephesians and Colossians were written at the same time, despatched by the same messenger, and addressed to Churches of the same locality. Still, according to our modern notions, we have not reached an adequate explanation of the degree of resemblance by which we are confronted. The mistake lies in attempting to apply those notions to a state of things to which they are not applicable. The subsequent Christian literature shows how extremely common it was for one writer to transcribe bodily from another any passage that struck him as appropriate to the subject in hand. And if this was so as regards others, much more would a writer consider himself at liberty to borrow from compositions of his own. No fastidious literary canons stood in the way. On the contrary, there was the strongest inducement to adopt this course. The Apostles were none of them practised in the arts of composition. It was true that St. Paul had received as good an education as his time and country could offer. But it was characteristic of that education that it was essentially oral: writing was regarded as a thing to be avoided. Talmud and Targum had either not been set down in writing at all, or the little that had been written was kept secret, for private use rather than public. When therefore St. Paul found himself compelled to correspond with the Churches that he had founded, it must have been a matter of much difficulty and effort to him, which was only overcome by his intense earnestness and fulness of soul. "My heart was hot within me, and while I was thus musing the fire kindled; and at the last I spake with tongue," would well describe the process by which his thoughts found expression. Nor was it merely a common difficulty. The thoughts were new thoughts, for which a new language had to be provided. And this language again had to be shaped into sentences, and accommodated to the laws of grammar and rhetoric. It was at best a painful task. And we can well conceive how, having once succeeded in expressing his meaning, the Apostle would gladly fall back on this expression. It was not poverty of mind—far from it—but only a natural expedient to relieve an unwonted strain. No one can be more grandly eloquent than St. Paul, and when his eloquence is at the flood it sweeps away all dams and barriers; but just because it is so spontaneous, his eloquence does not always flow with equal volume, and then the restraints make themselves felt, and the stream is turned into easier channels.

Text.—As in all cases where the language of one book is parallel to that of another, the text of the Epistle to the Colossians has suffered much from assimilation. And it is a striking testimony to the excellence of Cod. B that it is singularly free from this influence. A good example may be seen in the parallel passages Ephes. v. 19, Col. iii. 16.

Ephes. v. 19. Received Text.	Col. iii. 16. Received Text.
λαλοῦντες ἑαυτοῖς ψαλμοῖς καὶ ὕμνοις καὶ ᾠδαῖς πνευματικαῖς ᾄδοντες καὶ ψάλλοντες ἐν τῇ καρδίᾳ ὑμῶν τῷ Κυρίῳ.	νουθετοῦντες ἑαυτοὺς ψαλμοῖς καὶ ὕμνοις καὶ ᾠδαῖς πνευματικαῖς, ἐν χάριτι ᾄδοντες ἐν τῇ καρδίᾳ ὑμῶν τῷ Κυρίῳ.
Probably correct Text as given in B.	Probably correct Text as given in B.
λαλοῦντες ἑαυτοῖς ἐν ψαλμοῖς καὶ ὕμνοις καὶ ᾠδαῖς ᾄδοντες καὶ ψάλλοντες τῇ καρδίᾳ ὑμῶν τῷ Κυρίῳ.	νουθετοῦντες ἑαυτοὺς ψαλμοῖς ὕμνοις ᾠδαῖς πνευματικαῖς ἐν τῇ χάριτι ᾄδοντες ἐν ταῖς καρδίαις ὑμῶν τῷ Θεῷ.

See Lightfoot, *Colossians*, p. 313 sq. Westcott and Hort rather unexpectedly omit ἐν before ψαλμοῖς (cp. 1 Cor. ii. 13), and insert πνευματικαῖς in the text of Ephesians.

This, however, is not the only cause of corruption. Dr. Hort goes so far as to say that the Epistle, "and more especially its second chapter, appears to have been ill-preserved in ancient times." Accordingly it has presented a favourite field for conjectural emendations. The most famous is perhaps Dr. C. Taylor's ἀέρα κενεμβατεύων for ἃ ἑόρακεν ἐμβατεύων. Others may be seen collected in Van Manen, *Conjecturaal-Kritiek toegepast op d. Tekst van de Schriften d. N. T.*, pp. 313–316, or in the similar work of Van de Sande Bakhuyzen, *Over de toepassing van de Conjecturaal-Kritiek op d. Tekst d. N. T.*, pp. 278–280.

The Epistle is found, generally speaking, in the same MSS. and Versions as the rest of St. Paul's Epistles. For the Latin Versions the evidence is scanty. No portion of the Epistle is contained in either the Wolfenbüttel (*gue*), Gottweig (r_3), or Freising (r, r_2) Fragments. But quotations from the Latin Fathers, especially for the dogmatic portions, are abundant.

6. *Literature.*—A full and carefully-prepared list of Commentaries on St. Paul's Epistles in general, and on the Epistle to Colossians in particular, is given in the English translation of Meyer's Commentary, *Romans*, pp. xviii.–xxix.; *Colossians*, pp. vii.–xi. Of the ancient commentaries (not reckoning fragments or portions preserved in catenae) the most important would be the following: in Greek, Chrysostom, *Homiliae in Epist. ad Coloss.* ed. Field, Oxon. 1855, trans. by Ashworth in the *Library of the Fathers*, vol. xiv., Oxford, 1843; Theodore of Mopsuestia, Commentary extant in a Latin translation, *Theodori Episc. Mopsuest. in Epist. B. Pauli Comment.* vol. i. ed. Swete, Cambridge, 1880; Theodoret, *Opera*, ed. Migne, *tom.* lxxx.–lxxxv.: in Latin, the commentator commonly called Ambrosiaster (whose identity is still an unsolved enigma: see Marold in *Zeitschrift f. wiss. Theol.* 1884, p. 415 sq.), whose works are bound up with those of Ambrose, ed. Ballerini, tom. iii., Milan, 1877; Pelagius, printed among the works of Jerome, ed. Vallarsi, tom. xi., ed. Migne, tom. xxx. From the Middle Ages we have the compilations of Oecumenius, ed. Migne, tom. cxviii., cxix., and of Theophylact, tom. cxxiii.–cxxvi.; to which must now be added Euthymius Zigabenus, ed. Kalogeras, Athens, 1887. In modern times, to select a few of the most prominent, we have in Germany, besides the well-known commentaries of De Wette, Ewald, Lange, Meyer, the elaborate critical work of Holtzmann mentioned above, and an able but rather prolix commentary by Klöpper, *Der Brief an die Colosser kritisch untersucht*, &c., Berlin, 1882. The last few years have seen several additions of importance to the literature on the Epistle. First came the elaborate articles by Von Soden of which an account has been given. Holtzmann in his *Einleitung* (Freiburg i. B., 1885) states fairly both sides of the problem, but appears to be conscious that his own theory has not been found very convincing. Weiss in his similar work (Berlin, 1886) rejects the interpolation-hypothesis altogether, and defends the genuineness of the Epistle. Weizsäcker, on the other hand, in his survey of the Apostolic age (Freiburg i. B., 1886), pronounces against this, but, able scholar as he is, he shows the weak place in his Teutonic armour, by the suggestion that the Epistle to Philemon is an allegory turning round the significance of the name Onesimus! Pfleiderer (*Urchristenthum*, p. 683; Berlin, 1887) is inclined to have recourse to the same piece of modern Alexandrianism: he leaves it an open question whether any part of the Epistle is genuine. The chief value of his treatment of the Epistle consists in his clear definition of the points of difference between it and the undoubted Epistles. The best and most complete of English commentaries is doubtless that by Bishop Lightfoot, which may, however, be usefully supplemented on the side of close grammatical exegesis by the Commentary of Bishop Ellicott. The editions in the *Speaker's Commentary* (Bishop of Derry), in Ellicott's *Commentary for English Readers* (Dr. Barry), and in Schaff's *Popular Commentary* (Prof. M. B. Riddle), all appeal to a wider public. [W. Sy.]

COME BY. "We had much work to come by the boat" (Acts xxvii. 16). The words περικρατοῖς γενέσθαι are rendered by R. V. "to secure." Lumby (*Glossary of Bibl. Words*, s. n.) quotes from Earle's *Microcosmog.*—"He is loth to come by promotion so dear." [F.]

COMFORTER. See SPIRIT, HOLY.

COMING OF CHRIST. In the prophecies of the Old Testament no distinction is indicated between a first coming of Christ in humility and a second coming in glory. This distinction, however, became from an early time one of the most familiar points of Christian doctrine, and the conflict of the early Church both with Judaism and Gnosticism must have served to emphasize it. Note the inclusion of "the comings" (plur.) in the enumeration of fundamental articles of Christian faith in Irenaeus (*Adv. Haer.* i. 2, Greek text). We of later days have our attention mainly occupied with the historical Christ, the Redemption already wrought, the preparation of the world for, and the fulfilment of prophecy in, His first Advent. The mind and heart of the Church of the first age, on the other hand, were turned almost more towards the future. In the New Testament the "Coming of Christ" commonly denotes the future coming, without the need for any epithet such as "second" (Matt. xxiv. 3, 27, 37, 39; 1 Cor. xv. 23; 1 Thess. ii. 19, iii. 13, iv. 15, v. 23; 2 Thess. ii. 1, 8; Jas. v. 7, 8; 2 Pet. i. 16 [probably], iii. 4, 12; 1 John ii. 28. The following passages may also be compared: 1 Cor. i. 7; 2 Thess. i. 7; 1 Pet. i. 7, iv. 13; 1 Tim. vi.

14; 2 Tim. iv. 1, 8; Tit. ii. 13); and, while the fact that the Christ has already come is of course constantly in mind, the phrase "the coming of Christ" is very rarely used of that first Advent. The following seem to be the only instances:—Acts vii. 52, xiii. 24 (where it is to be noted that the Greek words employed are ἔλευσις and εἴσοδος, and not one of those used for the Second Advent), 2 Tim. i. 10, which is especially interesting from the fact that the Apostle seems to intend to compare the two "appearings" (cp. *vv.* 10 and 12).

The manner of the return of Christ, as conceived among Christians universally from the first, was such as could properly belong only to a Divine Being. The descriptions of it in the Synoptic Gospels recall the imagery of Daniel vii. The title "the Son of man" is used, and He is to "come with the clouds of heaven" (Matt. xxiv. 30; xxvi. 64, &c.) The same title is not used in the Epistles, but we find it in the mouth of St. James the Just, as it is interesting to observe, in the account of his martyrdom given by Hegesippus (*Fragm. ap.* Euseb. *H. E.* ii. 23). The favourite terms for describing the Coming of Christ in the Epistles convey the idea of its mysteriousness and majesty. They are: παρουσία, translated *coming* (very general in the Epistles, and occurring also in St. Matthew); ἡ ἡμέρα Ἰ. Χ., τ. Κυρ. &c., *the day of J. C., of the Lord*, and even simply ἡ ἡμέρα, *the day* (1 Cor. iii. 13; and cp. Rom. xiii. 12); ἀποκάλυψις, *revelation*; ἐπιφάνεια, translated *appearing* (peculiar to the Pastoral Epistles, except 2 Thess. ii. 8, where it is combined with παρουσία); and lastly the verb φανεροῦσθαι, "to be made manifest" (Col. iii. 4; 1 Pet. v. 4; 1 John ii. 28, iii. 2, &c.).

The first generation or two of Christians looked for a very speedy return of Christ. Evidence of this faith is to be found in the New Testament (1 Cor. vii. 29, 31; xvi. 22 [Maranatha]; Phil. iv. 5; Heb. x. 25, 37; James v. 9; 1 Peter iv. 5, 7). With this expectation are to be contrasted many remarkable parables and sayings of our Lord Himself, in which He indicates a work to be done before His coming which could only be slow and gradual (*e.g.* Matt. xiii. 31–33; Acts i. 8). The disciples, especially in early days, desired signs like the Jews, by which they might know the approach of the end, and in part they were gratified (Matt. xxiv., Mark xiii., Luke xxi.).

For the Millennium, Judgment, and other points connected with the Coming of Christ, and the relation of Christian language on these subjects to that in the Old Testament and in Jewish Apocalyptic and Rabbinic literature, see ESCHATOLOGY. [V. H. S.]

COMMERCE. 1. סַחֲרָה, Gesen. p. 946; *ἐμπορία*; *negotiatio*; from סֹחֵר, *a merchant*, from סָחַר, *travel*, Ezek. xxvii. 15; A. V., *merchandise, traffic*. 2. רֵכֶלָה, Gesen. p. 1289; Ezek. xxvi. 12, *τὰ ὑπάρχοντα*; *negotiationes*; in xxviii. 5, 16, 18, *ἐμπορία*, *negotiatio*, from רָכַל, *travel*.

From the time that men began to live in cities, trade, in some shape, must have been carried on to supply the town-dwellers with necessaries (see Heeren, *Afr. Nat.* i. 462), but it is also clear that international trade must have existed and affected to some extent even the pastoral nomad races, for we find that Abraham was rich, not only in cattle, but in silver, gold, and gold and silver plate and ornaments (Gen. xiii. 2; xxiv. 22, 53); and further, that gold and silver in a manufactured state, and silver, not improbably in coin, were in use both among the settled inhabitants of Palestine and the pastoral tribes of Syria at that date (Gen. xx. 16, xxiii. 16, xxxviii. 18; Job xlii. 11), to whom those metals must in all probability have been imported from other countries (Hussey, *Anc. Weights*, c. xii. 3, p. 193; Kitto, *Phys. Hist. of Pal.*, pp. 109, 110; Herod. i. 215).

Among trading nations mentioned in Scripture, Egypt holds in very early times a prominent position, though her external trade was carried on, not by her own citizens, but by foreigners, chiefly of the nomad races (Heeren, *Afr. Nat.* i. 468, ii. 371, 372). It was an Ishmaelite caravan, laden with spices, which carried Joseph into Egypt, and the account shows that slaves formed sometimes a part of the merchandise imported (Gen. xxxvii. 25, xxxix. 1; Job vi. 19). From Egypt it is likely that at all times, but especially in times of general scarcity, corn would be exported, which was paid for by the non-exporting nations in silver, which was always weighed (Gen. xli. 57; xlii. 3, 25, 35; xliii. 11, 12, 21). These caravans also brought the precious stones as well as the spices of India into Egypt (Ex. xxv. 3, 7; Wilkinson, *Anc. Egypt.*, ii. 235, 237 [1878]). Intercourse with Tyre does not appear to have taken place till a later period, and thus, though it cannot be determined whether the purple in which the Egyptian woollen and linen cloths were dyed was brought by land from Phoenicia, it is certain that coloured cloths had long been made and dyed in Egypt; and the use, at least, of them adopted by the Hebrews for the Tabernacle as early as the time of Moses (Ex. xxv. 4, 5; Heeren, *Asiat. Nat.* i. 352; Herod. i. 1). The pasture-ground of Shechem appears from the story of Joseph to have lain in the way of these caravan journeys (Gen. xxxvii. 14, 25; Saalschütz, *Hebr. Arch.* 15, l. 159).

It is clear that at the same period trade was carried on between Babylon and the Syrian cities, and also that gold and silver ornaments were common among the Syrian and Arabian races; a trade which was obviously carried on by land-carriage (Num. xxxi. 50; Josh. vii. 21; Judg. v. 30, viii. 24; Job vi. 19).

Until the time of Solomon the Hebrew nation may be said to have had no foreign trade. Foreign trade was indeed contemplated by the Law, and strict rules for morality in commercial dealings were laid down by it (Deut. xxviii. 12, xxv. 13–16; Lev. xix. 35, 36), and the tribes near the sea and the Phoenician territory appear to have engaged to some extent in maritime affairs (Gen. xlix. 13; Deut. xxxiii. 18; Judg. v. 17), but the spirit of the Law was more in favour of agriculture and against foreign trade (Deut. xvii. 16, 17; Lev. xxv.; Joseph. *c. Apion.* i. 12). Solomon, however, organised an extensive trade with foreign countries, but chiefly, at least so far as the more distant nations were concerned, of an import character. He imported linen yarn,

horses, and chariots from Egypt. Of the horses some appear to have been resold to Syrian and Canaanite princes. For all these he paid in gold, which was imported by sea from India and Arabia by his fleets, built under his own orders, but manned chiefly by Phoenicians (Heeren, *As. Nat.* i. 334; 1 K. ix. 26, 27, x. 22–29; Ges. p. 1202). It was by Phoenicians also that the cedar and other timber for his great architectural works was brought by sea to Joppa, whilst Solomon found the provisions necessary for the workmen in Mount Lebanon (1 K. v. 6, 9; 2 Ch. ii. 16).

The fleets used to sail into the Indian Ocean every three years from Elath and Ezion-geber, ports on the Aelanitic gulf of the Red Sea, which David had probably gained from Edom, and brought back gold, silver, ivory, sandal-wood, ebony, precious stones, apes, and peacocks. Some of these may have come from India and Ceylon, and some from the coasts of the Persian Gulf and the E. coast of Africa (2 Sam. viii. 14; 1 K. ix. 26, x. 11, 22; 2 Ch. viii. 17; Herod. iii. 114; Livingstone, *Travels*, pp. 637, 662).

But the trade which Solomon took so much pains to encourage was not a maritime trade only. He built, or more probably fortified, Baalbec and Palmyra; the latter at least expressly as a caravan station for the land-commerce with Eastern and South-eastern Asia (1 K. ix. 18).

After his death the maritime trade declined, and an attempt made by Jehoshaphat to revive it proved unsuccessful (1 K. xxii. 48, 49). [TARSHISH; OPHIR.] We know, however, that Phoenicia was supplied from Judaea with wheat, honey, oil, and balm (1 K. v. 11; Ezek. xxvii. 17; Acts xii. 20; Joseph. *B. J.* ii. 21, § 2; *Vit.* 13), whilst Tyrian dealers brought fish and other merchandise to Jerusalem at the time of the return from the Captivity (Neh. xiii. 16), as well as timber for the rebuilding of the Temple, which then, as in Solomon's time, was brought by sea to Joppa (Ezra iii. 7). Oil was exported to Egypt (Hos. xii. 1), and fine linen and ornamental girdles of domestic manufacture were sold to the merchants (Prov. xxxi. 24).

The successive invasions to which Palestine was subjected, involving both large abstraction of treasure by invaders and heavy imposts on the inhabitants to purchase immunity or to satisfy demands for tribute, must have impoverished the country from time to time (under Rehoboam, 1 K. xiv. 26; Asa, xv. 18; Joash, 2 K. xii. 18; Amaziah, xiv. 13; Ahaz, xvi. 8; Hezekiah, xviii. 15, 16; Jehoahaz and Jehoiakim, xxiii. 33, 35; Jehoiachin, xxiv. 13), but it is also clear, as the denunciations of the Prophets bear witness, that much wealth must somewhere have existed in the country, and much foreign merchandise have been imported; so much so that, in the language of Ezekiel, Jerusalem appears as the rival of Tyre, and through its port, Joppa, to have carried on trade with foreign countries (Is. ii. 6, 16, iii. 11, 23; Hos. xii. 7; Ezek. xxvi. 2; Jonah i. 3; Heeren, *As. Nat.* i. p. 328).

Under the Maccabees Joppa was fortified (1 Macc. xiv. 34), and later still Caesarea was built and made a port by Herod (Joseph. *Ant.* xv. 9, § 6; Acts xii. 19, xviii. 22). Joppa became afterwards a haunt for pirates, and was taken by Cestius; afterwards by Vespasian, and destroyed by him (Strab. xvi. p. 759; Joseph. *B. J.* ii. 18, § 10, iii. 9, § 1). There can be no doubt that in former times the soil of Palestine yielded much more produce than is now the case, and so we find that during the 1st century A.D. Tyre and Sidon depended for supplies of provisions upon the kingdom of Herod Agrippa (Acts xii. 20).

The internal trade of the Jews, as well as the external, was much promoted, as was the case also in Egypt, by the festivals, which brought large numbers of persons to Jerusalem, and caused great outlay in victims for sacrifices and in incense (1 K. viii. 63; Heeren, *Afr. Nat.* ii. 363). The traders in later times were allowed to intrude into the Temple, in the outer courts of which victims were publicly sold for the sacrifices (Zech. xiv. 21; Matt. xxi. 12; John ii. 14).

The places of public market were then, as now, chiefly the open spaces near the gates, to which goods were brought for sale by those who came from the outside (Neh. xiii. 15, 16; Zeph. i. 10).

In the matter of buying and selling great stress is laid by the Law on fairness in dealing. Just weights and balances are stringently ordered (Lev. xix. 35, 36; Deut. xxv. 13–16). Kidnapping slaves is forbidden under the severest penalty (Ex. xxi. 16; Deut. xxiv. 7). Trade in swine was forbidden by the Jewish doctors (Surenhus. *Mischn. Seder Nezikin*, c. 7, vol. iv. 60; Lightfoot, *H. H. on Matt.* viii. 33; Winer, *Handel*; Saalschütz, *Arch. Hebr.* c. 15, 16). [H. W. P.]

COMPASS. The A. V. "fetch a compass" (2 Sam. v. 23; 2 K. iii. 9; Acts xxviii. 13) is rendered by R. V. "make a circuit," *i.e.* to go round about. [F.]

CONANI'AH (כְּוֹנַנְיָהוּ [*Keri*, ed. Baer], *Jehovah hath established*; BA*. Χωνενίας; A.² Χωχενίας; *Chonenias*), one of the chiefs (שָׂרִים) of the Levites in the time of Josiah (2 Ch. xxxv. 9). The same name as CONONIAH.

CONCISION, a word used by St. Paul (Philip. iii. 2, κατατομή) to describe the circumcision to which the Judaizers at Philippi would contemptuously compel the Gentile converts. "This circumcision which they vaunt, is in Christ only as the gashings and mutilations of the idolatrous heathen" (Lightfoot in loco). Such play of words (κατατομή, περιτομή) as is here implied is characteristic of St. Paul (see Lightfoot and *Speaker's Comm.* in loco). [F.]

CONCUBINE. פִּילֶגֶשׁ appears to have been included under the general conjugal sense of the word אִשָּׁה, which in its limited sense is rendered "wife." The positions of these two among the early Jews cannot be referred to the standard of our own age and country; that of concubine being less degraded, as that of wife was, especially owing to the sanction of polygamy, less honourable than among ourselves. The natural desire of offspring was, in the Jew, consecrated into a religious hope, which tended to redeem concubinage from the debasement into

which the grosser motives for its adoption might have brought it. The whole question must be viewed from the point which touches the interests of propagation, in virtue of which even a slave concubine who had many children would become a most important person in a family, especially where a wife was barren. Such was the true source of the concubinage of Nahor, Abraham, and Jacob, which indeed, in the two latter cases, lost the nature which it has in our eyes, through the process, analogous to adoption, by which the offspring was regarded as that of the wife herself. From all this it follows that, save in so far as the concubine was generally a slave, the difference between wife and concubine was less marked, owing to the absence of moral stigma, than among us. Keturah, spoken of in Gen. xxv. 1 as a "wife," appears in 1 Ch. i. 32 as a concubine (cp. Gen. xxv. 6). We must therefore beware of regarding as essential to the relation of concubinage, what really pertained to that of bondage.

The concubine's condition was a definite one, and quite independent of the fact of there being another woman or women having the rights of wife towards the same man. The difference probably lay in the absence of the right of the *libellus divortii*, without which the wife could not be repudiated, and in some particulars of treatment and consideration of which we are ignorant; also in her condition and rights on the death of her lord, rather than in the absence of nuptial ceremonies and dowry, which were non-essential; yet it is so probable that these last did *not* pertain to the concubine, that the assertion of the Gemara (Hierosol. *Chetuboth*, v.) to that effect, though controverted, may be received. The doctrine that a concubine also could not be dismissed without a formal divorce is of later origin—not that such dismissals were more frequent, probably, than those of wives—and negatived by the silence of Ex. xxi. and Deut. xxi. regarding it. From this it seems to follow that a concubine could not become a wife to the same man, nor *vice versâ*, unless in the improbable case of a wife divorced returning as a concubine, which, however, seems against the law of Deut. xxiv. 3, 4. With regard to the children of wife and those of concubine, there was no such difference as our illegitimacy implies; the latter were a supplementary family to the former, their names occur in the patriarchal genealogies (Gen. xxii. 24; 1 Ch. i. 32), and their position and provision, save in the case of defect of those former (in which case they might probably succeed to landed estate or other chief heritage), would depend on the father's will (Gen. xxv. 6). The state of concubinage is assumed and provided for by the Law of Moses. A concubine would generally be either (1) a Hebrew girl bought of her father, *i.e.* a slave, which alone the Rabbis regard as a lawful connexion (Maimon. *Halach-Melakim*, iv.), at least for a private person; (2), a Gentile captive taken in war; (3), a foreign slave bought, or (4) a Canaanitish woman, bond or free. The rights of (1) and (2) were protected by law (Ex. xxi. 7; Deut. xxi. 10), but (3) was unrecognised, although enjoying the authority of the precedent of Hagar, and (4) prohibited. Free Hebrew women also might become concubines. So Gideon's concubine seems to have been of a family of rank and influence in Shechem, and such was probably the state of the Levite's concubine (Judg. viii. 29; ix. 1–3; xx.). The ravages of war among the male sex, or the impoverishment of families, might often induce this condition. The case (1) was not a hard lot. The passage in Ex. xxi. is somewhat obscure, and seems to mean, in brief, as follows:—A man who bought a Hebrew girl as concubine for himself might not treat her as a mere Hebrew slave, to be sent "out" (*i.e.* in the seventh year, v. 2), but might, if she displeased him, dismiss her to her father on redemption, *i.e.* repayment probably of a part of what he paid for her. If he had taken her for a concubine for his son, and the son then married another woman, the concubine's position and rights were secured, or, if she were refused these, she became free without redemption. Further, from the provision in the case of such a concubine given by a man to his son, that she should be dealt with "after the manner of daughters," we see that the servile merged in the connubial relation, and that her children must have been free. Yet some degree of contempt attached to the "handmaid's son" (בֶּן־אָמָה), a term applied reproachfully to the son of a concubine merely in Judg. ix. 18; see also Ps. cxvi. 16. The provisions relating to (2) are merciful and considerate to a rare degree, but overlaid by the Rabbis with distorting comments. In *PSBA.* viii. p. 20 sq. is given in French a contract of marriage from a papyrus of the 27th year of King Psammetichus, on which M. Revillout, the translator, remarks:—"Il ne s'agit là que d'un *mariage servile analogue à celui qu'on connait les juifs*, et dont la minute par toutes ses formules rentre plutôt encore dans le titre légal de *l'esclavage* que dans celui de mariage."

In the Books of Samuel and Kings the concubines mentioned belong to the king, and their condition and number cease to be a guide to the general practice. In particular, royal concubines, from Saul's (Rizpah) inclusively, seem to have belonged to the class (4) above, although prohibited [ELIAM, RIZPAH]. A new king stepped into the rights of his predecessor, and by Solomon's time the custom had approximated to that of a Persian harem (2 Sam. xii. 8, xvi. 21; 1 K. ii. 22). To seize on royal concubines for his use was thus an usurper's first act. Such was probably the intent of Abner's act (2 Sam. iii. 7), and the request on behalf of Adonijah was similarly construed (1 K. ji. 21–24). For fuller information Selden's treatises *de Uxore Hebraeâ* and *de Jure Natur. et Gent.* v. 7, 8, and especially that *de Successionibus*, cap. iii., may with some caution (since he leans somewhat easily to rabbinical tradition) be consulted; also the treatises *Sotah*, *Kidushin*, and *Chetuboth* in the Gemara Hierosol., and that entitled *Sanhedrin* in the Gemara Babyl. The essential portions of all these are collected in Ugolini, vol. xxx. *de Uxore Hebraeâ*. [H. H.]

CONDUIT (תְּעָלָה; *ὑδραγωγός; aquaeductus;* a trench or watercourse, from עָלָה, *to ascend*, Gesen. p. 1022).

1. Although no notice is given either in Scripture or by Josephus of any connexion between the pools of Solomon beyond Bethlehem

and a supply of water for Jerusalem, it seems unlikely that so large a work as the pools would be constructed merely for irrigating his gardens (Eccles. ii. 6); and tradition, both oral and as represented by Talmudical writers, ascribes to Solomon the formation of the original aqueduct by which water was brought to Jerusalem (Maundrell, *Early Trav.* p. 458; Hasselquist, *Trav.* p. 146; Lightfoot, *Descr. Templ.* c. xxiii. vol. i. 612; Robinson, i. 265). As originally constructed, this aqueduct consisted of a well-shaped channel of masonry lined with cement on the sides and bottom; and, though much injured and not usually serviceable for water beyond Bethlehem, it still exists and conveys the water from the sources which supply the pools about two miles S. of Bethlehem. It then passes from the pools in a N.E. direction, and, winding round the hill of Bethlehem on the S. side, is carried sometimes above and sometimes below the surface of the ground, partly in earthen pipes and partly in a channel about one foot square of rough stones laid in cement, till it approaches Jerusalem. There it crosses the valley of Hinnom at the S.W. side of the city on a bridge of nine low arches, at a point above the pool called *Birket-es-Sultân;* then returns S.E. and E. along the side of the valley and under the wall, and, continuing its course along the east side and being carried over the causeway and arch called "Wilson's Arch," terminates in the reservoir beneath the Haram enclosure (*Recovery of Jerus.* pp. 23, 24). It was repaired by Sultan Mohammad Ibn-Kalaûn of Egypt about A.D. 1300 (Williams, *Holy City*, ii. 498; Räumer, *Pal.* p. 280; Robinson, i. 265–267, 345, 347, 476, iii. 247).

2. Pontius Pilate, to the great indignation of the Jews, applied the sacred treasure of the Corban to the work of bringing water by an aqueduct from a distance, which in one place Josephus states to have been 400, but in another 200, stadia from Jerusalem. This application of the treasure gave occasion to a serious disturbance (Joseph. *Ant.* xviii. 3, § 2; *B. J.* ii. 9, § 4). This aqueduct is probably the same as that still existing which takes its beginning in the *Wâdy Arrûb*, and, passing not far from Tekoa, finally delivers its water into the aqueduct of Solomon. Its total length will thus amount to not less than thirty miles, and not differ greatly from a mean between the two distances given by Josephus (*PEFQy. Stat.*, 1875, p. 71; *Recovery of Jerus.* p. 24). Dr. Barclay, however, thought that the aqueduct of Pilate was on the N. side of the city (*City of Great King*, p. 316).

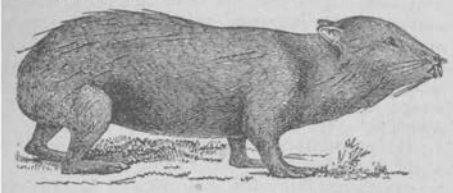
3. Another watercourse derives its supply from a place called the "well of steps," *Bir ed-Durrageé*, in the Wâdy el-Biyar, whence the water is conveyed by a tunnel between three and four miles in length, into which shafts are sunk at intervals from the surface above. Emerging from this tunnel, it follows the side of the hill for about 1800 feet, and is then carried by another tunnel 1700 feet in length, also connected with the ground above by shafts, of which one is 115 feet in depth. Receiving in its course a supply of water from the "sealed fountain," it reaches the Pools of Solomon, the uppermost of which it circumvents, but is then lost, having been probably destroyed by invaders; it reappears at a point above Rachel's tomb, and is carried across the valley by a syphon formed of perforated stone blocks set in rough masonry. Another portion is visible beyond Mar Elyas, near the plain of Rephaim; but though the place at which it entered Jerusalem is not known, it must have been at a point higher than No. 2, and may have been connected with the Tower of Hippicus, and also with the palaces on Mount Zion mentioned by Josephus. It may also have supplied the watercourse of which a portion exists near the Russian Convent, and others of which portions exist within the city. The whole work is one exhibiting in its remaining portions a very high degree of engineering skill (Joseph. *Ant.* xx. §§ 8, 11; *B. J.* ii. 17, § 9, v. 7, § 3; Robinson, iii. 273; Barclay, p. 319; Sir C. Wilson, *Water Supply of Jerus.* pp. 32, 33, 58, 62; *Recovery of Jerus.* pp. 23–52).

4. There is also a very remarkable watercourse conveying water from the so-called Virgin's Pool, *Birket Sitti Maryam*, almost the only natural spring near Jerusalem on the E. side of the city, by a tunnel cut in the rock 1708 feet in length, to the Pool of Siloam. An inscription in Phoenician characters, lately discovered, appears to carry back the construction of this work to a period not later than that of Solomon (*PEFQy. Stat.*, 1881, pp. 141, 154, 155, 157; Robinson, i. 337, 340) or Hezekiah (Driver, *Notes on the Heb. Text of the BB. of Sam.* Introd. pp. xv. xvi.).

5. Among the works of Hezekiah, he is said (1) to have "made a pool and a conduit, and brought water into the city"; (2) to have "stopped the upper watercourse of Gihon, and brought it straight down to the W. side of the city of David" (2 K. xx. 20; 2 Ch. xxxii. 4, 30; see also Is. xxii. 11, and Ecclus. xlviii. 16). It is perhaps this aqueduct of which a large portion was discovered in digging the foundations for the English Church at Jerusalem, running in a direction E. and W. (Robinson, i. 327, 346, iii. 243, 244; *PEFQy. Stat.*, 1875, p. 131). [GIHON; JERUSALEM.] [H. W. P.]

CONEY (שָׁפָן; δασύπους, χοιρογρύλλιος, *v. l.* λαγωόν; *Choerogryllus, hericinaceus, lepusculus*); a gregarious animal of the class Pachydermata, which is found in Palestine, living in the caves and clefts of the rocks, and which has been erroneously identified with the Rabbit or Coney. Its scientific name is *Hyrax syriacus.* The שָׁפָן is mentioned four times in the O. T. In Lev. xi. 5 and in Deut. xiv. 7 it is declared to be unclean, because it chews the cud, but does not divide the hoof. In Ps. civ. 18 we are told "the rocks are a refuge for the conies," and in Prov. xxx. 26 that "the conies are but a feeble folk, yet make they their houses in the rocks." The Hyrax satisfies exactly the expressions in the last two passages; and its being reckoned among the ruminating animals is no difficulty, the hare being also erroneously placed by the sacred writers in the same class, because the action of its jaws resembles that of the ruminating animals. The Arabs call the وبر, שָׁפָן, *wabr;* but among the Southern Arabs we find the term ثفن, *thofun* = *shâphân* (Fresnel in *Asiatic*

Journ. June 1838, p. 514). The Amharic name is *aschkôkô*, under which name the Hyrax is described by Bruce, who also gives a figure of it, and mentions the fact that the Arabs also called it غنم بنى اسرائيل, "sheep of the children of Israel." The derivation of שָׁפָן from the unused root, שָׁפַן, "to hide," chiefly in the earth, is obvious.



Hyrax syriacus. (From a specimen in the British Museum.)

The Hyrax or Coney is one of a group which stands isolated and peculiar among Mammalia. It is neither ruminant nor rodent, but is placed by systematists among the *Ungulata*, near the Rhinoceros; order *Pachydermata*; family *Hyracidæ*. It is a peculiarly African form, and is found throughout the Sinaitic Peninsula generally; it is not uncommon on the hills on both sides of the Dead Sea, and is scarcer throughout the rest of the country, but becomes rare in Galilee. I have seen it near the Ladder of Tyre, and in the gorge of the Leontes, as well as in the rocky wadys near the lake of Galilee. We have no authority for its present existence in Lebanon, though it was formerly recorded from thence, and probably still lingers there. In Galilee it is known by the peasants not as وبر, *wabr*, but as طبسن, *tubsun*, the name they also give to the ichneumon. It is represented by a closely allied species (*Hyrax abyssinicus*) in Abyssinia, and by another rather larger (*Hyrax capensis*) in South Africa. Several varieties of the former species are found in Eastern Africa; but the present species is the only one beyond Africa, nor is it known to extend further into Arabia or Western Asia.

In its timid, cautious habits and defenceless character, referred to in Scripture, it is very like the rabbit, but is scarcely so large. It has a round head, short round ears, and a tail so short that it can scarcely be detected at all. It is marked by a yellow dorsal spot on its otherwise uniformly tawny fur, out of which a few long black hairs stand out all over its body. Its incisor teeth are prominent, chisel-shaped, exactly like those of the hippopotamus. It has no claws, but the four toes of its fore feet and the three of its hind feet are furnished with nails or hoofs, like those of the river monster. Its diet is herbivorous, and it lives exclusively among the rocks in wadys, as Solomon describes it, not generally burrowing, but utilising fissures in the cliffs, where it has its inaccessible home, coming forth to feed only at sunset and dawn. It is not strictly gregarious, but there are generally several in close neighbourhood; and when feeding, a sentry is placed on some commanding outpost, who gives warning of approaching danger by a short squeaking bark, when the company instantly disappear. I have watched the coney in various parts of the country, but very rarely saw it out of its hole during the day, though occasionally I have detected it even at noon, sitting and working its jaws, as though chewing the cud. I have found a nest of dried grass and fur, in which four young were buried like those of a mouse. Though forbidden to the Jews, the coney's flesh is eaten by the Arabs. We found it somewhat like that of the hare, quite dark, but rather dry and hard.

The late Rev. F. W. Holland, the intrepid explorer of the Sinaitic desert, writes: "Though I several times saw single conies in Sinai, I only twice came upon any large number together. Once, when crossing a mountain pass, I was startled by a shrill scream near me, but could see nothing. On my return in the evening, I approached the place cautiously, and saw eight conies out, playing like rabbits. I watched them for some minutes before they saw me. At length one caught sight of me, and immediately uttered its scream, and all at once rushed to their holes. On another occasion I saw about twelve out feeding at a different spot, but on neither occasion did I see any appointed guard. They had runs like rabbits, leading some little distance from their holes." [H. B. T.]

CONFECTION ("after the art of the apothecary"), a compound (Lat. *confectio*) made up by an apothecary (see quotation from Lily's *Euphues* in Lumby's *Glossary of Bibl. Words*, in Eyre and Spottiswoode's *Teachers' Bible*). The word occurs in Ex. xxxv. 35, and is replaced in the R. V. by "perfume (after the art of the perfumer"). [F.]

CONFIRMATION.

I. *The Title*, p. 636.
II. *N. T. Records of Confirmation*, p. 636.
III. *The Gift of Confirmation*, p. 637.
IV. *Subsidiary References to Confirmation–Doctrine*, p. 640.
V. *Subsidiary References to the Administration of Confirmation*, p. 641.
VI. *Literature*, p. 642.

I. *The Title.*—The name Confirmation itself is not found in Holy Scripture, though it is suggested by 2 Cor. i. 21, where the expression ὁ βεβαιῶν ἡμᾶς, "He which stablisheth [or, confirms] us," may perhaps refer to the rite. In early Church literature there are traces of the word with some added qualification, as τὸ μύρον βεβαίωσις τῆς ὁμολογίας (*Apost. Const.* iii. 17); but as an absolute title, without any explanatory clause, it gained general currency somewhat late, and then only in the West. It is, however, a convenient name to use because of its familiarity to English ears, and the Bible itself provides no single word which can take its place.

II. *N. T. Records of Confirmation.*—There are only two express narratives of its actual administration. The first is among the early acts of the Christian Church. "When St. Philip had baptized the converts at Samaria, the Apostles "sent unto them Peter and John: who, when they were come down, prayed for them, that they might receive the Holy Ghost: (for as yet he was fallen upon none of them: only they were baptized in the name of the Lord Jesus.) Then laid they *their* hands on them, and they

received the Holy Ghost" (Acts viii. 14–17). The second occasion that is related was at Ephesus at a later period. The disciples there, having before received only the imperfect baptism of John, were baptized, under the direction of St. Paul, with the Baptism of the Lord. But, just as at Samaria, there was the need of the further gift of the Spirit. "And when Paul had laid *his* hands upon them, the Holy Ghost came on them" (Acts xix. 1–6).

Four things are clearly to be gathered from these two records.

1. They show that Confirmation is the proper sequel to Baptism, but at the same time something entirely distinct from it. The ministry of the Apostles at Samaria could have nothing to do with remedying defects inherent in Baptism by a Deacon. If St. Philip's Baptisms had not been perfectly valid, the Samaritans would have been baptized again. This they were not. But there was still another and separate gift of the Holy Ghost which they lacked, and this they received "through laying on of the Apostles' hands" (viii. 18). In the other instance no question can be raised as to any possible insufficiency in the Baptisms, since St. Paul was present himself. Therefore the laying on of hands was an additional rite, and not merely the completion of the baptismal ceremony.

2. It may be gathered that the ministration of Confirmation was regarded at first as an apostolic office. Various reasons have been suggested to account for St. Philip's not having performed the rite. The obvious one is that he had not the power. The Apostles might no doubt have bestowed upon others the authority to confirm, but they seem not to have done so. Similarly the administration in later days has usually been confined, directly or indirectly, to the episcopate.

3. The notice that the Apostles at Samaria "prayed *for*" the *people* "that they might receive the Holy Ghost," has sometimes been thought to indicate that prayer is essential to the validity of Confirmation. On another point of ceremonial the testimony is stronger. In both cases mentioned the laying on of hands is spoken of as the external rite which was used. Calvin maintained that this only signified a formal dedication to God for the purpose of receiving the Spirit; and, believing that the Spirit had ceased to come in the primitive manner, he thought the ceremony had grown useless (*Inst.* IV. ch. xix. 6). He was as mistaken about the purpose of the sign as about the cessation of the Holy Spirit's advents. It did not signify a dedication of one person to God by another's instrumentality, but a *gift* from God to man by an ordained administration. "The hands," says Jones, of Nayland, "are the instruments of action and power. If any gift is presented, any assistance offered, or any commission given from one man to another, the hands are the means of communication. The power of the human body is so eminently fixed to the hands, that *hand* and *power* are put for the same thing in the sacred language . . . so that if anything is visibly communicated from God through the ministration of man, no outward sign can express this so properly as the stretching out and laying on of the hands of those persons who act under Him and for Him in a ministerial capacity" (*Essay on Confirmation*). The imposition of hands in Confirmation has been regarded as adopted from our Lord's blessing of children (Matt. xix. 13; Mark x. 13); but the act is too ancient a form of benediction, and too significant in character, to be safely attributed to an isolated precedent. The narratives in the Acts formed the authority upon which the early Church based its adoption of the ceremony, and for a time the usage seems to have been universal. "Do you not know this to be the custom of the Churches," wrote St. Jerome to an adversary, "that after Baptism hands are imposed on the baptized persons, and that the Holy Spirit is invoked upon them? You ask where this is written? In the Acts of the Apostles. Nay, though there was no authority for this in Scripture, the consent of the whole world as to this matter would be a sufficient precept thereof" (*Contra Lucif.* 8).

4. The simple character of the narratives shows that the rite was a familiar one which needed neither apology nor explanation. Hence it may be inferred with certainty that Confirmation was instituted by our Lord Himself. It were incredible that the Apostles should have invented an ordinance, and should have proceeded to administer it as a matter of course, if they had had no warrant from their Master. Calvin himself was constrained to admit this, only rejecting any conclusion as to the permanent meaning or obligation of the rite (*Inst.* IV. ch. xix. 6). It was doubtless one of the "things pertaining to the kingdom of God," concerning which our Lord gave commandment to the Apostles in the interval between the Resurrection and the Ascension.

III. *The Gift of Confirmation.*—The passages in the Acts are explicit that those who were confirmed "received the Holy Ghost." The only questions that arise are in defining exactly what the reception of the Holy Ghost means, and in distinguishing precisely between the gift of the Holy Ghost in Confirmation and in Baptism. These questions must be answered by carefully studying the teaching of Holy Scripture as to the personal bestowal of the Holy Spirit's Presence.

1. Under the Old Covenant there was no pledged gift of the Holy Ghost to individuals. God led the Israelites by the cloud, and the Prophets interpreted this particularly as a leading by the "Spirit" (Is. lxiii. 10–14; Hag. ii. 5). He promised His Presence generally to the Church,—"I will dwell among the children of Israel" (Ex. xxix. 45),—and this was especially fulfilled in the Shechinah of the Temple. But these were gifts to the people in a mass. The outpouring of the Spirit upon separate persons was chiefly restricted to those who, like judges or prophets, were called to special and extraordinary works. Prophecy made it clear that under the Gospel something more was to be looked for. Not only was "the Spirit of the Lord" to rest upon the Messiah for His own office (Is. xi. 2, lxi. 1), but the same Spirit was to be poured upon His servants (xxxii. 15, xliv. 3). The result of His indwelling was to be the very power of resurrection (Ezek. xxxvii. 14). By Joel God said, "I will pour out My Spirit upon all flesh . . . Also upon the servants and upon the handmaids in those days will I

pour out My Spirit," a prophecy which St. Peter declared to be accomplished on the Day of Pentecost (Joel ii. 28, 29; Acts ii. 16–18).

2. The first step towards the fulfilment of these promises was in the descent of the Holy Spirit upon the Manhood of our Lord. After His baptism by St. John the heaven opened, and the Holy Ghost descended in a bodily shape, like a dove, and abode upon Him (Matt. iii. 16; Luke iii. 21, 22; John i. 32). This coming of the Spirit is often taken as if it belonged to the Baptism. However closely connected, the circumstances were evidently distinct. The Baptism was complete, and our Lord had come up out of the water and was in prayer, when the event occurred. Tertullian takes it as a pattern of our Confirmation (*De Bapt.* viii.); and so also do Athanasius (*Cont. Arian.* i. 46) and others of the Fathers (Theoph. *ad loc.*; Hil. can. 4). Optatus goes so far as to speak of the voice of the Father as representing the laying on of hands (*De Schis.* iv. 7). If some appear to connect the descent with the Baptism (*e.g.* Chrys. *In Joan.* Hom. xvii. 2; Jer. *Contra Lucif.*; Aug. *In Joan.* t. vi. 3), it is, generally at least, because Confirmation in their time formed part of the baptismal rite, and the two were spoken of as one.

In consequence of this outpouring of the Holy Spirit, it is said that our Lord was "full of the Holy Ghost" (Luke iv. 1), was "led" or "driven" of the Spirit (Matt. iv. 1; Mark i. 12), and went "in the power of the Spirit" (Luke iv. 14). If it is difficult to comprehend the precise meaning of such expressions as applied to the Incarnate Son of God, it may be remembered that as His Baptism was not for Himself but for us, so also was His Confirmation. St. Augustine, after saying that it is not to be supposed that He was without the Holy Ghost before, adds that "He deigned to prefigure His Body, that is, His Church, in which especially the baptized receive the Holy Spirit" (*De Trin.* xv. xxvi. 46). And so St. Athanasius says, "The Word was not anointed by the Spirit, but our flesh, which He had assumed, was; in order that the unction then received might flow from Him upon all ... Thence did we also begin to receive the unction and the seal" (*Cont. Arian.* i. 46, 47). The descent of the Holy Ghost was, therefore, not only the official consecration or anointing of Christ for the Incarnate ministry (Luke iv. 18), but it was also, for our sakes, the endowing of His Humanity with the peculiar Presence of the Spirit, that through Him it might become the heritage of His people.

3. Our Lord dwelt very emphatically in His last discourses on the promised coming of the Holy Ghost. Its characteristic note corresponded with a point which had attracted the Baptist's attention when the Holy Spirit descended upon Christ after His Baptism. He not only descended, but also abode upon Him (*καταβαῖνον καὶ μένον*, John i. 33). So our Lord says, "I will pray the Father, and he shall give you another Comforter, that He may abide with you for ever" (John xiv. 16). And if, as some critics maintain, ἦ should be read for *μένῃ*, the simpler word "be" gives practically the same sense. It was to be a permanent abiding as distinguished from fitful and transient inspirations. Our Lord proceeded to say of the Spirit, "Ye know Him; for He dwelleth with you, and shall be in you" (*ὅτι παρ' ὑμῖν μένει, καὶ ἐν ὑμῖν ἔσται*, xiv. 17). The Vulgate, without existing authority in Greek MSS., treats both verbs as future (*manebit, erit*), and hence St. Augustine understood the two phrases as equivalent: "He explained what 'He shall dwell with you' meant, when He added the words, 'He shall be in you'" (*In Joan.* t. lxxiv. 5). On the other hand there is considerable support for taking both in the present (*ἐστὶν* for *ἔσται*), but it weighs against this reading that it attributes a kind of Presence of the Spirit to the disciples which other evidence suggests to be reserved for the period after the Session of Christ. The A. V. reading has good MS. authority; and, giving a more intelligible sense, may probably be correct. If so, it affords an indication of the difference between the Holy Spirit's Presence by means of Baptism and by means of Confirmation. Supposing the disciples had already received the Baptism of our Lord [BAPTISM],—however much some of its effects were still in abeyance,—they were in a position between Baptism and Confirmation. What they had then was the personal presence of the Holy Ghost with them, but they were awaiting His individual indwelling. "The Spirit," says Theophylact, paraphrasing the verse, "abides with you; afterwards there shall be something greater, because He shall be in you. For the expression *παρ' ὑμῖν* signifies the external aid which comes from neighbourhood, but the expression *ἐν ὑμῖν* signifies the internal habitation and strengthening." While the reading of the text is doubtful, it would be rash to construct a theory of Confirmation upon it, but at any rate it indicates that the future reception of the Holy Ghost was to have the character of indwelling.

4. The gift of the Holy Ghost was consequent on the completion of Christ's redemptive acts. When our Lord was applying to the Gospel times some of the O. T. Scriptures, it is added, "But this spake He of the Spirit, which they that believe on Him should receive: for the Holy Ghost was not yet *given;* because that Jesus was not yet glorified" (John vii. 39; cp. xvi. 7). Immediately this glorification was accomplished the Holy Ghost came down on the Day of Pentecost and fulfilled completely the old promises of the gift of the Spirit. As the upper room was filled with "a rushing mighty wind," so the Church of Christ which it represented was filled with the indwelling Presence of the Holy Ghost, bringing to it new powers and a new relationship to God. And that which was true of the Church as a body had its counterpart in each individual. The Church was indwelt by the Spirit; so also were its members. As it had been with our Lord after the descent of the Holy Ghost, so according to their capacities was it with His disciples; they were now full of the Holy Ghost. Miraculous as was the character, and vast as was the range of the outpouring, it necessarily contained within it all that could afterwards be given by Confirmation. Some of the Fathers almost identify the two. "The Apostles," says St. Augustine, "laid on hands, and the Holy Ghost came; but when He came to them, who laid hands on them?" (*Serm.* cclxvi. 3). "A hundred and twenty persons were gathered together. No man upon earth laid hands on

them, but the Holy Ghost coming from heaven filled them" (*Cont. Parm.* ii. 34). The laying on of hands may perhaps even have some association with the resting of the visible tongues of fire on the heads of the disciples. The author of the *De Rebaptismate*, in common with many others, saw in this advent of the Spirit the fulfilment of St. John's prophecy of the Baptism "with the Holy Ghost and with fire." There is no reason to confine the Pentecostal gift to the Apostles. "They were all," *i.e.* the hundred and twenty, "with one accord, in one place . . . and it sat upon each of them" (Acts ii. 1, 3). The Apostles might receive special powers for their peculiar work. Possibly the gift of tongues was theirs alone, though there is no indication even of this. The various manifestations of the Spirit's power were but accidental circumstances in different persons. The gift itself was the gift of the Holy Ghost, and this was the common endowment of the Church.

5. It passed rapidly on to others. When St. Peter addressed the converts of the Day of Pentecost and bade them be baptized "for the remission of sins," he added, "And ye shall receive the gift of the Holy Ghost. For the promise is to you and to your children, and to all that are afar off, *even* as many as the Lord our God shall call" (Acts ii. 38, 39). The Baptism for the remission of sins and the gift of the Holy Ghost are two things. The "promise" no doubt refers to both, but very especially to the latter, since it was the promise of the Spirit by Joel that had formed the text of St. Peter's sermon, and the advent of the Spirit that had attracted the wonder of the people. They were now told that when they had been baptized they should themselves receive the gift which they had seen come to others. Whether it was bestowed by the rite of Confirmation, or whether, as perhaps is more likely, it came direct as a continuation of the Pentecostal outpouring, it was something distinct from the grace attributed to Baptism.

If not on this occasion, certainly once the Holy Ghost came, as on the original disciples, without human ritual. It was fitting that the gathering in of the first Gentiles should be marked by the extraordinary manifestations that had attended the Day of Pentecost. Therefore the Spirit descended upon Cornelius and his company without any visible instrumentality (Acts x. 44). St. Peter was there, but not as the administrator of Confirmation. For it was vastly more than Confirmation, though also, as at Pentecost, it must needs have included it. From this point of view it is remarkable that the Holy Ghost fell upon these converts while they were still unbaptized. The peculiar circumstances of the case no doubt account for so strange an inversion of the usual order of grace. But the very singularity of the fact emphasizes the distinction which it implies between the offices of Baptism and Confirmation.

6. Miraculous signs of speaking with tongues accompanied some at least of these first comings of the Holy Ghost, even when administered through the hands of the Apostles in Confirmation (Acts xix. 6). Hence it has been argued that these events are not proper parallels to the Confirmation of later days which can show no similar results. It is maintained by some that the only purpose of the original imposition of hands was to bestow these special powers (see Calvin, *Inst.* IV. ch. xix. 6; Daillé, *De Conf.* I. chs. ix., x.; Lightfoot, *Comm. on Acts*). This contention finds some warrant in early writers. St. Chrysostom, for instance, thought that the Samaritans simply lacked the signs, and that it was to give these that the Apostles laid on hands. But his opinion was inevitably influenced by the fact that, in his own time, imposition of hands had already lost its distinctive place in Confirmation. Holy Scripture itself does not support the view. The object of the apostolic mission to the Christian converts at Samaria is said to have been "that they might receive the Holy Ghost," not that they might prophesy or speak with tongues. These were peculiar manifestations to attest the new grace of the Holy Spirit's advent, but they were not even at first essential accompaniments of it; for St. Paul, appealing to the experiences of the Corinthians, says, "Do all speak with tongues?" (1 Cor. xii. 30). The Fathers in general held that the Apostles' rite was identical with the Confirmation of later days. St. Augustine, contesting the arguments drawn from the cessation of tongues, says that such sensible miracles were "the credentials of a rudimentary faith, and for the extension of the first beginnings of the Church" (*De Bapt.* III. ch. xvi. 21). The need for these ceased. What did not cease was the need for the personal gift of the Holy Ghost. "The ordinary, saving graces of the Spirit," says Charles Leslie, "which work silently, without observation or show, are much preferable and more desirable than the extraordinary gifts of miracles which for a time were necessary at the first propagation of the Gospel" (*Water Baptism*, xi.). "It is true," says Jeremy Taylor, "the gift of tongues doth not remain, but all the greater gifts of the Holy Spirit remain with the Church for ever" (*Discourse on Conf.* ii. 6). These were of permanent importance; the other were temporary proofs of the reality of the Spirit's presence.

7. The conclusion to which the Scriptural evidences lead appears to be that the characteristic grace of Confirmation is the indwelling by the Holy Spirit. Baptism of necessity brings vital relationship with each Person of the Blessed Trinity; and, therefore, one may not restrict the entire method of the Spirit's advent to Confirmation. But there are degrees and measures of union with God. Baptism, for instance, makes a person a member of Christ, and yet there is a different and enhanced measure of union through the reception of His Body and Blood in Holy Communion. So, while there is a true connexion with the Holy Ghost through Baptism, there is another and advanced degree of union through Confirmation. To take Theophylact's phrases, and apply them directly to the difference between the Holy Spirit's operation in Baptism and in Confirmation, the one seems to give "the external aid which comes from neighbourhood;" the other, "internal habitation and strengthening." This definition does adequate justice to the office of the Holy Ghost in both ordinances; it makes a clear connexion, and an equally clear distinction, between the two rites; it gives to Confirmation the importance which it held in

the apostolic system; and it precisely accords with the statement of Holy Scripture that those on whom hands were laid "received the Holy Ghost."

It is often difficult, in patristic literature as well as in the N. T., to disentangle the references to Baptism and Confirmation, because, throughout the whole early period, the two were constantly administered in close conjunction, and usually as portions of the same ceremony. For the most part, however, it may be said that the opinions of the Fathers are in favour of this manner of discriminating between the gifts. Some, when they had occasion to distinguish accurately, were very explicit indeed that the "reception" of the Holy Ghost was not in Baptism but in Confirmation (*e.g.* Tert. *De Bapt.* vi.; Cyp. *Epp.* lxix. 10, lxxii. 1, lxxiii. 6, lxxiv. 7; see at length Mason, *Relation of Confirmation to Baptism*). The teaching of later Western theologians was not so distinct. When Confirmation became severed from Baptism by a great interval of time, the graces which Holy Scripture and the Fathers attributed to the two ordinances together, came naturally to be attributed very much to Baptism alone; and thus there seemed to be left to Confirmation only a general additional gift of spiritual strengthening. The Confirmation grace was then naturally summed up especially in the seven-fold gifts of the Holy Ghost, which represent the fulness of His working within the human soul. Probably this view does not practically differ very materially from the former, since it is only another way of expressing the completeness of the Holy Spirit's Presence and power. But it would seem as though it were more scripturally accurate to regard the strengthening gifts as the result of the Spirit's indwelling, than as themselves covering the whole Confirmation ground. The East, in retaining infant Confirmation, has with it retained the teaching that the personal indwelling Presence of the Holy Spirit is to be distinctly associated with Confirmation (see Macaire, *Théol. Dog.* IV. ch. iii.).

The Scriptural examination, it may be added, gives no opening whatever for the popular subjective idea of Confirmation, which reduces it to little, if anything, more than a renewal of baptismal vows. This notion has simply been derived from a misunderstanding of the modern preface attached to the English Confirmation Service. The original connexion of Confirmation with Baptism, as its complement and immediate sequel, would of itself be sufficient to show that there could in early times have been no place for a renewal of vows which had been taken only a few moments before. But, besides this, Holy Scripture is plain that the essence of Confirmation is not an act of man towards God, but of God towards man. It is a gift which the Bible declares expressly to be the receiving of the Holy Ghost.

IV. *Subsidiary References to Confirmation-Doctrine.*—There are some minor texts in the N. T. which need to be examined, for their bearing on Confirmation, in the light of the passages which speak of it in more unmistakable terms.

1. In our Lord's teaching the first mention of the Holy Spirit's action was to Nicodemus, when He said, "Except a man be born of water and the Spirit, he cannot enter into the kingdom of God" (John iii. 5). Some have supposed that this birth of the Spirit is accomplished in Confirmation. St. Cyprian, under the pressure of controversy, interpreted the text as indicating a necessity of being born "of each sacrament;" that is, of both Baptism and Confirmation (*Ep.* lxxii. 1). St. Cyril of Jerusalem also distinguishes between the birth of water and of the Spirit, and associates the latter with an unction administered after Baptism (*Cat.* xxi. 1, 3). Among English divines Jeremy Taylor paraphrases the words thus, "Unless a man be baptized into Christ, and confirmed by the Spirit of Christ," taking the birth of the Spirit to be "a mystery distinct from Baptism" (*Confirmation*, i. 2). The anonymous author of the *De Rebaptismate*, while generally maintaining the same opinion, repudiated the logical deduction that a man could not obtain salvation by Baptism alone (2–6). And, if his view of the text is correct, it seems impossible not to follow him in this minimising of its force. But it must be questioned whether the interpretation can be sustained. The expression ἐξ ὕδατος καὶ Πνεύματος seems to indicate a single action, not two disjointed actions. If they are separated, nothing is apparently left to Baptism but the external rite of water; and the spiritual birth is divided into two parts, possibly taking place at a considerable interval from each other. This destroys the analogy of birth. It would appear, therefore, that a distinction ought to be made between being born of the Spirit and receiving the Spirit, and that the words can, at most, have only an indirect reference to Confirmation.

2. There are some passages in the Epistles which clearly point, in connexion with Baptism, to a second ordinance whereby the Holy Spirit is given, and this must be Confirmation.

In 1 Cor. xii. 13 St. Paul says, "By (ἐν) one Spirit were we *all* baptized into one body ... and were all made to drink ["into," A. V., but εἰς omitted by best MSS.; R. V. "of"] one Spirit." Some take the two clauses as synonymous; but to be baptized by the Spirit and to drink the Spirit are two very different ideas. St. Chrysostom mentions that the second had been interpreted of the Holy Eucharist, an explanation noticed with favour by Cornelius à Lapide, Luther, Calvin, Estius, Wordsworth, and others. "But to me," says St. Chrysostom, "he appears now to speak of that visitation of the Spirit which takes place in us after Baptism and before the mysteries" (*In 1 Cor.* Hom. xxx. 2).

In Tit. iii. 5, 6, St. Paul speaks of "the washing of regeneration, and renewing of the Holy Ghost; which He shed on us abundantly through Jesus Christ our Saviour." Many liturgies and commentators take the whole to refer to Baptism, but it would seem that this must be inclusively with Confirmation. Renewal is not a single act like Baptism, but progressive (Rom. xii. 2; 2 Cor. iv. 16) by the Holy Ghost's continued influence.

The typical Baptism of Israel "in the cloud and in the sea" (1 Cor. x. 2) points to a double operation. The sea evidently represents the sacrament of Baptism. The cloud is less appropriate to it. Since its purpose was to guide and protect the people, it was rather the type of

leading by the Holy Ghost (Rom. viii. 14). This would not be confined to Confirmation; but the application of the text being distinctly sacramental, it is reasonable to suppose that St. Paul's allusion is to that rite. The Fathers no doubt often refer the cloud to Baptism, in their comments on the verse, but probably they included Confirmation with it.

A similar distinction is perhaps to be recognised in Heb. vi. 4, where mention is made of enlightening, which early interpretations identified with Baptism, and then of being "made partakers of the Holy Ghost," an expression which corresponds with Confirmation, both in its character and in the place which it holds in the enumeration of the gifts.

3. There are several texts in the Epistles which speak of the indwelling of the Holy Ghost. These must apply very especially to Confirmation if the complete indwelling belongs only to the confirmed. St. Paul calls the Church "an Holy Temple in the Lord: in whom ye also are builded together for an habitation of God through (ἐν) the Spirit" (Ephes. ii. 21, 22). St. Cyprian, in one place, speaks of Baptism as constructing the Temple of God, and of Confirmation as pouring the Spirit upon the Temple (*Ep.* lxxiv. 7). Similar texts are: "Know ye not that ye are the Temple of God, and *that* the Spirit of God dwelleth in you?" "Know ye not that your body is the Temple of the Holy Ghost, *which is* in you, which ye have of God?" (1 Cor. iii. 16, vi. 19). "Ye are not in the flesh, but in the Spirit, if so be that the Spirit of God dwell in you. Now if any man have not the Spirit of Christ, He is none of his" (Rom. viii. 9: cp. *v.* 11; 2 Tim. i. 14).

4. There are other texts which speak of a special giving of the Holy Ghost in terms suggestive of some ordinance of bestowal. Such are Rom. v. 5; 1 Cor. ii. 12; Gal. iii. 2, 5; Jas. iv. 5; 1 John iii. 24. Although they cannot be restricted to Confirmation, they are useful to illustrate it. In the same way all those texts which refer to the gifts, graces, and strengthening forces of the Holy Ghost relate in part, at least, to Confirmation. When it is realised that Confirmation is the appointed method of conferring the fulness of the Spirit's Presence and power, the Epistles will be found replete with passages which bear more or less directly upon it.

V. *Subsidiary References to the Administration of Confirmation.*—The Epistles afford very few unquestionable references to the actual administration of Confirmation, or to its ritual.

1. Laying on of hands is spoken of in one passage where the chief allusion must be to Confirmation. For in Heb. vi. 1, 2, "the doctrine of Baptisms, and of laying on of hands" (*ἐπιθέσεώς τε χειρῶν*), is mentioned among "the principles of the doctrine of Christ." The close connexion of this "laying on of hands" with "Baptisms," and the fact that it is quoted as a foundation-doctrine, both point to Confirmation. There is a very large consensus of opinion, ancient as well as modern, for so interpreting it. At the same time it may be doubted whether it signifies Confirmation exclusively, seeing how largely imposition of hands was used as a sign of conferring all benedictory graces. An extended meaning in some measure helps the difficulty as to the plural *βαπτισμῶν*, by giving a larger range to the application of the passage. But *ἐπιθέσεως* is in the singular, not like *βαπτισμῶν* in the plural, and therefore seems to refer prominently to some single rite. Considering the close connexion with Baptism, this can only be Confirmation. This being so, it is important to remark that the two ordinances are treated as distinct from each other, but linked together as a single pair of foundation-doctrines.

2. Unction (*χρῖσμα*) is mentioned in the Epistles. St. Paul says, "Now He Which stablisheth us with you in Christ, and hath anointed (*χρίσας*) us, is God" (2 Cor. i. 21). St. Ambrose, St. Augustine, St. Cyril of Jerusalem, Primasius, Theodoret, St. Anselm, and others, interpret this of Confirmation. Even so cautious a critic as Bishop Westcott applies to Confirmation the texts of St. John: "Ye have an unction (*χρῖσμα*) from the Holy One;" "The anointing which ye received (*τὸ χρῖσμα ὃ ἐλάβετε*) of Him abideth in you" (1 John ii. 20, 27). Dr. Westcott, however, thinks that the ritual use of oil grew out of the expression in the Epistle, and not the expression out of the use. But the language must have been prompted by the symbolic connexion of oil with the Holy Ghost, a connexion founded on O. T. ritual. It is therefore highly probable that the Apostles borrowed the sign as well as the phraseology, and that they themselves employed oil in Confirmation. Hugo of St. Victor and Waldensis, followed by Roman Catholic commentators, assume that the chrism was used at the Samaritan Confirmation, but certainly the Acts give no hint of this. The essential ceremony was then the laying on of hands, and the anointing, when it can first be traced, was a subordinate rite. In itself it is highly significant. It not only expresses symbolically the actual gift of the Spirit, but it also suggests that by Confirmation a person is specially consecrated to the priestly office of a Christian. St. Ambrose likens the Confirmation unction of his day to the unction of consecration in the O. T., and alluding to Ps. cxxxiii. says, "It flows down to Aaron's beard that you may be made a chosen generation, sacerdotal, precious, for we are all anointed with spiritual grace unto the kingdom of God, and unto the priesthood" (*De Myst.* vi. 29, 30). This is a secondary aspect of Confirmation, but one of considerable importance (cp. 1 Pet. ii. 5; Rev. i. 6).

3. The "seal," often with some adjunct, as "of the Lord," or "of the Holy Ghost," became in later days a common title of Confirmation both in East and West. There are three texts which contain the terminology of sealing. St. Paul writes, "In Whom also after that ye believed, ye were sealed with the Holy Spirit of promise" (Ephes. i. 13); and in the same Epistle, "Grieve not the Holy Spirit of God, whereby ye were sealed (*ἐν ᾧ ἐσφραγίσθητε*) unto the day of redemption" (iv. 30). Also, in direct juxtaposition with one of the texts on unction, he says, "Who also sealed us, and gave *us* (*σφραγισάμενος ἡμᾶς καὶ δοὺς*) the earnest of the Spirit in our hearts" (2 Cor. i. 22). Dr. Pusey says, "It is unquestionable that the primary use of the word 'seal,' both among the Fathers and the liturgies, relates

to Baptism." He regards the application of it to Confirmation as an extension of the title, owing to the close connexion of the two rites (*Doct. of Bapt.* p. 153 n., and Note E). Several of the Fathers do, however, apply the term distinctly to Confirmation (Mason, *Relation of Confirmation to Baptism*). It signified the stamping of a person in relationship to God, and was equally applicable to both ordinances. Its particular appropriation to one or the other was a matter of usage. Probably in the Epistles both were included, for both would have been received together by most Christians of those days. It was much later that the expression became specially associated with the act of signing with the chrism. If it has any ritual signification in the N. T., which is doubtful, it must probably allude to the laying on of hands.

4. On the question of the subjects of Confirmation the evidence of the N. T. is only inferential. It may clearly be gathered that the gift holds a position in the spiritual life after Baptism, but in near relation to it. This is shown by the narratives in the Acts, which relate the laying on of hands as the immediate sequel of Baptism, and by the passages in the Epistles which couple Confirmation with Baptism in closely connected phrases. No doubt there are instances of Baptism, even by Apostles, where there is no reference at all to Confirmation, and where therefore it is uncertain whether or no it was conferred on the spot. But it is in favour of supposing that it was rarely postponed, that no exhortation to be confirmed is addressed to anyone in the Epistles. There is also no indication that Confirmation depended on age; and the universal usage of the Church, for some centuries, affords a strong presumption that from the first children were confirmed as the immediate corollary of their Baptism. It is perhaps difficult to know why Western Christendom abandoned the practice. The peculiar grace of Confirmation being a bestowal of the Holy Ghost, there does not seem to be any reason in the nature of things why infants should be incapable of receiving it. No such necessity, however, as that which our Lord attached to Baptism, compelled its early administration, as a Catholic rule. But the Biblical evidence, taken by itself, is certainly on the side of connecting Confirmation as nearly as may be with Baptism.

VI. *Literature.* — Patristic comments are mostly interspersed in the books on Baptism; see Migne's *Pat. Lat.*, Index No. xcvii. Among more special treatises are Cyprian's *Epistles*; Anon., *De Rebaptismate* (Trans. in Clark's Ante-Nic. Lib., *Writings of Cyprian*); Cyril. Hieros. *Catechesis*; Basil, *De Spiritu Sancto.* Later works on Confirmation, from the force of circumstances, usually deal with its ecclesiastical aspects at greater length than the Scriptural evidences. Treatises which minimise its grace are Calvin's *Institutes*, IV. ch. xix. 4–13, and to a less extent Dallaeus (Daillé), *De Confirmatione et Extrema Unctione*, answered by Hammond, *De Confirmatione.* Bellarmin *De Confirmatione* is largely a reply to Protestant essays. See also Trombelli, *Tractatus de Sacramentis*, tom. ix., x.; Macaire (Makary), *Théologie Dogmatique*, trans. from Russian. Among English treatises, Hooker, v. ch. lxvi.; Baxter, *Confirmation*, esp. Prop. 13; Jeremy Taylor's valuable Χρίσις Τελειωτική, *A Discourse of Confirmation*; Jones, of Nayland, *Essay on Confirmation*; Puller, *What is the distinctive grace of Confirmation?*; Grueber, *Rite of Confirmation, a Catechism*; and Mason's *Relation of Confirmation to Baptism.* [W. E.]

CONGREGATION (עֵדָה, קָהָל, from קָהַל, to call = *convocation*; συναγωγή; ἐκκλησία, in Deut. xviii. 16, xxiii. 1; *congregatio, ecclesia, coetus*). This term describes the Hebrew people in its collective capacity under its peculiar aspect as a holy community, held together by religious rather than political bonds. Sometimes it is used in a broad sense as inclusive of foreign settlers (Ex. xii. 19); but, more properly, as exclusively appropriate to the Hebrew element of the population (Num. xv. 15); in each case it expresses the idea of the Roman *civitas* or the Greek πολιτεία. Every circumcised Hebrew (אֶזְרָח; αὐτόχθων; *indigena*; A. V. "born in the land," the term specially descriptive of the Israelite, in opposition to the non-Israelite, Ex. xii. 19; Lev. xvi. 29; Num. ix. 14) was a member of the congregation, and took part in its proceedings, probably from the time that he bore arms. It is important, however, to observe that he acquired no political rights in his individual capacity, but only as a member of a *house*; for the basis of the Hebrew polity was the house, whence was formed in an ascending scale the *family* or collection of houses, the *tribe* or collection of families, and the *congregation* or collection of tribes. Strangers (גֵּרִים) settled in the land, if circumcised, were with certain exceptions (Deut. xxiii. 1 sq.) admitted to the privilege of citizenship, and are spoken of as members of the congregation in its more extended application (Ex. xii. 19; Num. ix. 14, xv. 15). It appears doubtful however whether they were represented in the congregation in its corporate capacity as a deliberative body, as they were not, strictly speaking, members of any house; their position probably resembled that of the πρόξενοι at Athens. The congregation occupied an important position under the Theocracy, as the *comitia* or national parliament, invested with legislative and judicial powers. In this capacity it acted through a system of patriarchal representation, each house, family, and tribe being represented by its head or father. These delegates were named זִקְנֵי הָעֵדָה (πρεσβύτεροι; *seniores*; "elders"); נְשִׂיאֵי עַ׳ (ἄρχοντες; *principes*; "princes"); and sometimes (הָעֵ׳ or) קְרִיאֵי מוֹעֵד (ἐπίκλητοι; *qui vocabantur*, Num. xvi. 2; A. V. "famous in the congregation;" R. V. "called to the assembly"). The number of these representatives being inconveniently large for ordinary business, a further selection was made by Moses of seventy, who formed a species of standing committee (Num. xi. 16). Occasionally indeed the whole body of the people was assembled, the mode of summoning being by the sound of the two silver trumpets, and the place of meeting the door of the Tabernacle, hence usually called the Tabernacle (*i.e.* tent) *of the congregation* (מוֹעֵד, lit. *place of meeting*, Num. x. 3); the occasions of such general assemblies were solemn religious services (Ex. xii. 47; Num. xxv. 6; Joel ii. 15), or to receive new commandments (Ex. xix. 7, 8;

Lev. viii. 4). The elders were summoned by the call of *one* trumpet (Num. x. 4), at the command of the supreme governor or the high priest; they represented the whole congregation on various occasions of public interest (Ex. iii. 16, xii. 21, xvii. 5, xxiv. 1); they acted as a court of judicature in capital offences (Num. xv. 32, xxxv. 12), and were charged with the execution of the sentence (Lev. xxiv. 14; Num. xv. 35); they joined in certain of the sacrifices (Lev. iv. 14, 15); and they exercised the usual rights of sovereignty, such as declaring war, making peace, and concluding treaties (Josh. ix. 15). The people were strictly bound by the acts of their representatives, even in cases where they disapproved of them (Josh. ix. 18). After the occupation of the land of Canaan, the congregation was assembled only on matters of the highest importance. The delegates were summoned by messengers (2 Ch. xxx. 6) to such places as might be appointed, most frequently to Mizpeh (Judg. x. 17, xi. 11, xx. 1; 1 Sam. vii. 5, x. 17; 1 Macc. iii. 46); they came attended each with his band of retainers, so that the number assembled was very considerable (Judg. xx. 2 sq.). On one occasion we hear of the congregation being assembled for judicial purposes (Judg. xx.); on other occasions for religious festivals (2 Ch. xxx. 5, xxxiv. 29); on others for the election of kings, as Saul (1 Sam. x. 17), David (2 Sam. v. 1), Jeroboam (1 K. xii. 20), Joash (2 K. xi. 19), Josiah (2 K. xxi. 24), Jehoahaz (2 K. xxiii. 30), and Uzziah (2 Ch. xxvi. 1). In the later periods of Jewish history the congregation was represented by the Sanhedrin; and the term *συναγώγη*, which in the LXX. is applied exclusively to the congregation itself (for the place of meeting, אֹהֶל מוֹעֵד, is invariably rendered *ἡ σκηνὴ τοῦ μαρτυρίου, tabernaculum testimonii*, the word מוֹעֵד being considered = עֵדוּת), was transferred to the places of worship established by the Jews, wherever a certain number of families were collected. [W. L. B.]

The word "congregation" ("in the wilderness") was used as the translation of *ἐκκλησία* (Acts vii. 38) in Tyndale's, Cranmer's, and the Genevan Versions, but the revisers of King James returned to Wycliffe's rendering, and placed "church" in the text (R. V. marg. or, *congregation*). Ecclesia fitly designated Israel *called out* of the heathen world and called together in solemn assembly to receive the Divine Law (see *Speaker's Comm.* on Acts *l. c.*). [F.]

CONI'AH. [JECONIAH.]

CONONI'AH (כּוֹנַנְיָהוּ [*Keri*, ed. Baer], *Jehovah hath established*; B. Χωνενίας [*v.* 13; Χωμενίας, *v.* 12]; A. Χωχενίας; *Chonenias*), a Levite, ruler (נָגִיד) of the offerings and tithes in the time of Hezekiah (2 Ch. xxxi. 12, 13). [CONANIAH.] [W. A. W.] [F.]

CONSECRATION. [PRIEST.]

CONVERSATION (from Lat. *conversor*, "to associate and live with") is never used in the A. V. in the sense in which the word is ordinarily understood to-day, such as "talking together," &c., but expresses *disposition* (Heb. xiii. 5, *ὁ τρόπος*; R. V. marg., *turn* of mind), *citizenship* (Phil. iii. 20, *τὸ πολίτευμα*; so R. V. in text; in marg. or, *commonwealth*), and *manner of life* (Gal. i. 13, *ἡ ἀναστροφή*; so R. V.). Lumby quotes, in illustration of the A. V., a passage from Walton's *Life of Herbert*, "The love of a court conversation drew him often from Cambridge" (*Gloss. of Bible Words*, s. n.). [F.]

CONVOCATION (מִקְרָא, from קָרָא, *vocare*; cp. Num. x. 2; Is. i. 13). This term is applied invariably to meetings of a *religious* character, in contradistinction to *congregation*, in which political and legal matters were occasionally settled. Hence it is connected with קֹדֶשׁ, *holy*, and is applied only to the Sabbath and the great annual Festivals of the Jews (Ex. xii. 16; Lev. xxiii. 2 sq.; Num. xxviii. 18 sq., xxix. 1 sq.). With one exception (Is. i. 13), the word is peculiar to the Pentateuch. The LXX. treats it as an adjective = *κλητός, ἐπίκλητος*; but there can be no doubt that the A. V. and R. V. are correct in their rendering. [W. L. B.]

COOKING. As meat did not form an article of ordinary diet among the Jews, the art of cooking was not carried to any perfection. The difficulty of preserving an animal from putrefaction necessitated its immediate consumption, and hence few were slaughtered except for purposes of hospitality or festivity. The proceedings on such occasions appear to have been as follow:—On the arrival of a guest the animal, either a kid, lamb, or calf, was killed (Gen. xviii. 7; Luke xv. 23), its throat being cut so that the blood might be poured out (Lev. vii. 26); it was then flayed, and was ready either for roasting (צָלָה) or boiling (בָּשַׁל): in the former case the animal was preserved entire (Ex. xii. 46), and roasted either over a fire (Ex. xii. 8) of wood (Is. xliv. 16), or perhaps, as the mention of fire implies another method, in an oven, consisting simply of a hole dug in the earth, well heated, and covered up (Burckhardt, *Notes on Bedouins*, i. 240); the Paschal lamb was roasted by the first of these methods (Ex. xii. 8, 9; 2 Ch. xxxv. 13). Boiling, however, was the more usual method of cooking, both in the case of sacrifices, other than the Paschal lamb (Lev. viii. 31), and for domestic use (Ex. xvi. 23), so much so that בָּשַׁל = *to cook* generally, including even *roasting* (Deut. xvi. 7). In this case the animal was cut up, the right shoulder being first taken off (hence the priest's joint, Lev. vii. 32), and the other joints in succession; the flesh was separated from the bones, and minced, and the bones themselves were broken up (Mic. iii. 3); the whole mass was then thrown into a caldron (Ezek. xxiv. 4, 5) filled with water (Ex. xii. 9), or, as we may infer from Ex. xxiii. 19, occasionally with milk, as is still usual among the Arabs (Burckhardt, *Notes*, i. 63), the prohibition "not to seethe a kid in his mother's milk" having reference apparently to some heathen practice connected with the offering of the first-fruits (Ex. *l. c.*; see a useful summary of opinions on this prohibition in Knobel-Dillmann; xxxiv. 26), which rendered the kid so prepared unclean food (Deut. xiv. 21). The caldron was boiled over a

wood fire (Ezek. xxiv. 10); the scum which rose to the surface was from time to time removed, otherwise the meat would have turned out loathsome (*v.* 6); salt or spices were thrown in to season it (*v.* 10); and when sufficiently boiled, the meat and the broth (מָרָק; ζωμός, LXX.; *jus*, Vulg.) were served up separately (Judg. vi. 19), the broth being used with unleavened bread, and butter (Gen. xviii. 8) as a sauce for dipping morsels of bread into (Burckhardt's *Notes*, i. 63). Sometimes the meat was so highly spiced that its flavour could hardly be distinguished; such dishes were called מַטְעַמִּים (Gen. xxvii. 4; Prov. xxiii. 3). There is a striking similarity in the culinary operations of the Hebrews and Egyptians (Wilkinson's *Anc. Egypt.* i. 174 sq. [smaller

Cooking geese and different joints of meat. (Tomb near the Pyramids.)

ed. 1878]). Vegetables were usually boiled, and served up as pottage (Gen. xxv. 29; 2 K. iv. 38). Fish was also cooked (*ἰχθύος ὀπτοῦ μέρος*; *piscis assi*; Luke xxiv. 42), probably broiled. The cooking was in early times performed by the mistress of the household (Gen. xviii. 6); professional cooks (טַבָּחִים) were afterwards employed (1 Sam. viii. 13, ix. 23). The utensils required were — בִּירִים (*χυτρόποδες*; *chytropodes*), a cooking range, having places for two or more pots, probably of earthenware (Lev. xi. 35); דָּיוֹר (λέβης, *lebes*), a caldron (1 Sam. ii. 14); מַזְלֵג (κρεάγρα; *fuscinula*), a large fork or flesh-hook; סִיר (λέβης; *olla*), a wide open, metal vessel, resembling a fish-kettle, adapted to be used as a wash-pot (Ps. lx. 8), or to eat from (Ex. xvi. 3); קְלָחַת, דּוּד, פָּרוּר, pots probably of earthenware and high, but how differing from each other does not appear; and, lastly, צַלָּחַת, or צְלוֹחִית, dishes (2 K. ii. 20, xxi. 13; Prov. xix. 24, A. V. "bosom," R. V. "dish"). [W. L. B.]

CO'OS (Rec. Text Κῶν; Westcott and Hort, Gebhardt, Κῶ), Acts xxi. 1. [Cos.]

COPPER (נְחֹשֶׁת). This word in the A. V. is always rendered "brass," except in Ezra viii. 27, where "fine copper" is represented in the margin by "yellow or shining brass." But since *brass* is an alloy of copper and *zinc*, and since *zinc* does not seem to have been known to the ancients, *bronze* would be a more accurate rendering in most passages. Beckmann (*Hist. of Inventions*, ii. 33, E. tr.) thinks that the ancient smelters may accidentally have discovered brass from the presence of zinc ore in their materials. If so, its brighter colour and lustre would have made it valuable: see Ezek. i. 4, 7, 27, viii. 2; Rev. i. 15, ii. 18. [See BRASS.] This metal is usually found as pyrites (sulphuret of copper and iron), malachite (carb. of copper), or in the state of oxide, and occasionally in a native state, principally in the New World. It was almost exclusively used by the ancients for common purposes; for which its hard, tough, malleable, elastic and ductile nature rendered it practically available. It is a question whether in the earliest times iron was known (*μέλας δ' οὐκ ἔσκε σίδηρος*, Hes. *Opp. et Dies*, 149; Lucr. v. 1285 sq.). In India, however, its manufacture has been practised from a very ancient date by a process exceedingly simple, and possibly a similar one was employed by the ancient Egyptians (Napier, *Anc. Workers in Metal*, 137). There is no certain mention of iron in the Scriptures; and, from the allusion to בַּרְזֶל as known to Tubal-cain (Gen. iv. 22), some have ventured to doubt whether in that place בַּרְזֶל means iron (Wilkinson, *Anc. Eg.* ii. 153 [smaller ed., 1878]. Layard, however, shows (*Nineveh*, ii. 415) that iron was known to the ancient Assyrians.

We read in the Bible of copper, possessed in countless abundance (2 Ch. iv. 18), and used for every kind of instrument; as chains (Judg. xvi. 21), pillars (1 K. vii. 15–21), lavers, the great one being called "the copper sea" (2 K. xxv. 13; 1 Ch. xviii. 8), and the other Temple-vessels. These were made in the foundry, with the assistance of Hiram, a semi-Phoenician (1 K. vii. 13), although the Jews were not ignorant of metallurgy (Ezek. xxii. 18; Deut. iv. 20, &c.), and appear to have worked their own mines (Deut. viii. 9; Is. li. 1). In Job xxviii. 2 we read "copper (A. V. and R. V. "brass") is molten out of the stone," or rather "man melteth stone (quartz, spar, &c.) into copper." We read also of copper mirrors (Ex. xxxviii. 8; Job xxxvii. 18), since the metal is sus-

ceptible of brilliant polish (2 Ch. iv. 16); and even of copper arms, as helmets, spears, &c. (1 Sam. xvii. 5, 6, 38; 2 Sam. xxi. 16). The expression "bow of steel" [R. V. "brass"], in Job xx. 24, Ps. xviii. 34, should be rendered "bow of copper," since the term for steel is פְּלֶדֶת (Nah. ii. 3; A.V. *torches*), or בַּרְזֶל מִצָּפוֹן (*northern* iron). They could hardly have applied copper to these purposes without possessing some judicious system of alloys, or perhaps some forgotten secret for rendering the metal harder and more elastic than we can make it.

It has been maintained that the cutting-tools of the Egyptians, with which they worked the granite and porphyry of their monuments, were made of bronze, in which copper was a chief ingredient. They might have been rendered effective by the use of emery, which was known to the ancients. The arguments on this point are found in Wilkinson, ii. 152, &c. [smaller ed. 1878], but they are not conclusive. There seems no reason why the art of making iron and excellent steel, which has been for ages practised in India, may not have been equally known to the Egyptians. The quickness with which iron decomposes will fully account for the non-discovery of any remains of steel or iron implements. For analyses of the bronze tools and articles found in Egypt and Assyria, see Napier, p. 88.

The only place in the A. V. where "copper" is mentioned is Ezra viii. 27, "two vessels of fine copper (R. V. "fine bright brass"), precious as gold" (*cp.* 1 Esd. viii. 57; *σκεύη χαλκοῦ στίλβοντος, διάφορα, ἐπιθυμητὰ ἐν χρυσίῳ; aeris fulgentis;* "vases of *Corinthian* brass," Syr.; "ex orichalco," Jun.), perhaps similar to those of "bright brass" in 1 K. vii. 45; Dan. x. 6. They may have been of orichalcum, like the Persian or Indian vases found among the treasures of Darius (Aristot. *de Mirab. Auscult.*). There were two kinds of this metal: one *natural* (Serv. *ad Aen.* xii. 87), which Pliny (*H. N.* xxxiv. 2, 2) says had long been extinct in his time, but which Chardin alludes to as found in Sumatra under the name Calmbac (Rosenm. *l. c.*); the other *artificial* (identified by some with *ἤλεκτρον*, whence the mistaken spelling *auri*chalcum), which Bochart (*Hieroz.* vi. ch. 16, p. 871 *sq.*) considers to be the Hebrew חַשְׁמַל, a word of uncertain sense, compared by Ebers with the Egyptian *asmal* (Email), and by Fried. Delitzsch with the Assyrian *ĕšmaru* (see MV.[11]. It occurs in Ezek. i. 4, 27, viii. 2; *ἤλεκτρον*, LXX.; *electrum*, Vulg.; A. V. and R. V. [text] "amber," R. V. marg. or, *electrum*; *ἀλλότυπον χρυσίον*, Hesych.; to which Suid. adds, *μεμιγμένον ὑάλῳ καὶ λιθίῳ*). On this substance see Pausan. v. 12; Pliny, xxxiii. 4, § 23. Gesenius considers the *χαλκολίβανον* of Rev. i. 15 to be *χαλκὸς λιπαρὸς* = חַשְׁמַל; he differs from Bochart, and argues that it means merely "smooth or polished brass."

In Jer. vi. 28 the words "they are brass and iron (A. V. and R. V.), they are all corrupters," refer to the comparatively valueless character of the inferior metals.

In Ezek. xxvii. 13 the importation of copper (A. V. and R. V. "brass") vessels to the markets of Tyre by merchants of Javan, Tubal, and Meshech is alluded to. Probably these were the Moschi, &c., who worked the copper-mines in the neighbourhood of Mount Caucasus.

In Ezek. xvi. 36, copper (R. V. marg. Heb. *brass*) is rendered in the A. V. and R. V. (text) by "filthiness," and perhaps, as in Jer. vi. 28, the word is used for what is worthless. The LXX. and the Vulgate, followed by Gesenius, render it "money" (*ἐξέχεας τὸν χαλκόν σου*, LXX.; "effusum est *acs* tuum," Vulg.); but there is no proof that copper money was ever used by the Hebrews.

In 2 Tim. iv. 14 *χαλκεὺς* is rendered "coppersmith," but the term is perfectly general, and is used even for workers in iron (*Od.* ix. 391); *χαλκεύς, πᾶς τεχνίτης, καὶ ὁ ἀργυροκόπος καὶ ὁ χρυσόχοος* (Hesych.).

In the N. T. (Matt. x. 9; Mark xii. 41) *χαλκὸς* is used for money (*χαλκοῦς, τοῦτο ἐπὶ χρυσοῦ καὶ τοῦ ἀργύρου ἔλεγον*, Hesych.).

The name "copper" is a corruption of "aes *Cyprium*," since the Romans first derived the elementary metal from Cyprus. [F. W. F.]

COPTIC VERSION. [VERSIONS, ANCIENT (EGYPTIAN)].

COR (כֹּר; *κόρος*; *corus*), the largest (about 8¼ bushels) of the dry measures, equivalent to the homer, and perhaps (etymologically) round in shape (1 K. iv. 22 [Hebr. v. 2]; Ezek. xlv. 14; 2 Ch. ii. 9, xxvii. 5). The passage, 1 K. v. 11 [Hebr. v. 25], gives the cor as a fluid—as well as dry—measure; but the text is, according to Thenius, possibly corrupt. [F.]

CORAL (רְאמוֹת, *râmôth*; *μετέωρα*; Symm. *ὑψηλά*; *Ῥαμόθ*; *sericum, excelsa*) occurs as the A. V. and R. V. rendering of the Hebrew *râmôth*, in Job xxviii. 18 only, "No mention shall be made of coral (*ramoth*, margin) or of pearls (R. V. "crystal"), for the price of wisdom is above rubies" (R. V. marg. or, *red coral*; or, *pearls*); and in Ezek. xxvii. 16, where coral is enumerated amongst the wares which Syria brought to the markets of Tyre. The old Versions fail to afford us any clue; the LXX. gives one etymological meaning of the Heb. term "lofty things," *i.e.* "that which grows high," or "like a tree;" the Vulg. in Ezek. (*l. c.*) reads "silk" (conjectures may be seen in Delitzsch and Dillmann *in loco*). "Coral" has decidedly a better claim than any other substances to represent the *râmôth*. The natural upward form of growth of the *Corallium rubrum* is well suited to the etymology of the word. The word rendered "price" in Job xxviii. 18 also denotes "a drawing out;" and there may be a reference to the manner in which coral and pearls were obtained from the sea, either by diving or dredging. At present, Mediterranean corals, which constitute an important article of commerce, are broken off from the rocks to which they adhere by long hooked poles, and thus "drawn out." With regard to the estimation in which coral was held by the Jews and other Orientals, it must be remembered that coral varies in price with us. Fine compact specimens of the best tints may be worth as much as 10*l.* per oz., while inferior ones are perhaps not worth much more than a shilling per lb. Pliny says (*N. H.* xxxii. 2) that the Indians valued coral as the Romans valued pearls. It is possible that the Syrian traders, who, as Jerome remarks (Rosen-

müller, *Schol. in* Ezek. xxvii. 16), would in his day run all over the world "lucri cupiditate," may have visited the Indian seas, and brought home thence rich coral treasures; though they would also readily procure coral either from the Red Sea or the Mediterranean, where it is abundantly found. The coral of the Red Sea and of the Persian Gulf is the finest and most valuable. Coral, as is now well known, is the massive skeleton composed of calcareous particles deposited by myriads of little microscopic polypes or zoophytes, taking various shapes in different species. Millions of these zoophytes unite, and generation after generation deposit their stony cells on the top of their predecessors, till some species have gradually formed vast oceanic islands. Coral, Mr. King informs us, often occurs in ancient Egyptian jewellery as beads and cut into charms. [H. B. T.]

CORBAN (קָרְבָּן; δῶρον; *oblatio;* in N. T. only in Mark vii. 11, κορβᾶν, expl. by δῶρον, and in Vulg. *donum:* used only in Lev. and Num., except in Ezek. xx. 28, xl. 43; in A. V. of O. T. "offering," in R. V. "oblation;" in N. T. [Mark vii. 11] A. V. and R. V. "Corban," *i.e.* "a *gift*" [A. V.], "given *to God*" [R. V.]), an offering to God of any sort, bloody or bloodless, but particularly in fulfilment of a vow. The Law laid down rules for vows, (1) affirmative; (2) negative. By the former, persons, animals, and property might be devoted to God; but, with certain limitations, they were redeemable by money payments. By the latter, persons interdicted themselves, or were interdicted by their parents, from the use of certain things lawful in themselves, as wine, either for a limited or an unlimited period (Lev. xxvii.; Num. xxx.; Judg. xiii. 7; Jer. xxxv.; Joseph. *Ant.* iv. 4, § 4; *B. J.* ii. 15, § 1; Acts xviii. 18, xxi. 23, 24). Upon these rules the traditionists enlarged, and laid down that a man might interdict himself by vow, not only from using for himself, but from giving to another, or receiving from him some particular object whether of food or any other kind whatsoever. The thing thus interdicted was considered as Corban, and the form of interdiction was virtually to this effect:—"I forbid myself to touch or be concerned in any way with the thing forbidden, as if it were devoted by Law;" *i.e.* "let it be Corban." To a certain extent the principle enunciated here was legitimate, and Levy (*Chald. Wörterb. üb. d. Targumim*, s.v. קוּרְבָּן) points out that Lightfoot's strictures (*Hor. Heb.* on Matt. xv. 5) must be received with caution. Nevertheless a person might, by abuse of this principle, exempt himself from assisting or receiving assistance from some particular person or persons, as parents in distress, and in short from any inconvenient obligation. It was with gross abuses of this sort that our Lord found fault (Matt. xv. 5; Mark vii. 11), as annulling the spirit of the Law.

Theophrastus, quoted by Josephus, speaking of foreign oaths, as forbidden by the laws of Tyre, gives Corban as a special instance of this kind; and thus, as Josephus remarks, implies, though he does not point out expressly, the Jewish origin of the word. Josephus calls the treasury in which offerings for the Temple or its services were deposited, κορβανᾶς, as in Matt. xxvii. 6. It was by an act of confiscation of the treasure thus deposited, κορβανᾶς, and applying it to the construction of an aqueduct, that Pilate provoked the indignation of the Jews, and gave occasion to a serious disturbance. Origen, on St. Matthew, quoted by Calmet, says that he had been informed by a Jew, that in order to lay greater pressure on debtors of whom they were suspicious, creditors sometimes transferred, as it were, their debts to the sacred treasury, or to the service of the poor, thus making these objects creditors instead of themselves (but probably, we may add, taking off the Corban thus created against offerings of their own); and further, that some persons excused themselves by a *similar* expedient from contributing to the support of their parents (Joseph. *B. J.* ii. 9, § 4; *Ap.* i. 22; Mishna, Surenhus. *de Votis*, i. 4, ii. 2; Calmet and Lightfoot, *Hor. Heb.* on Matt. xv. 6; Cappellus, who has a long dissertation on the subject, very full of information, in his note, and Grotius, both of these in *Crit. Sacr.* vol. vi.; Selden, *de Jur. Nat.* vii. 2; Otho, *Lex. Rabb.* p. 673). [ALMS; VOWS; OFFERINGS.] [H. W. P.]

COR'BE (Χορβέ; *Chorbe*), 1 Esd. v. 12. This name apparently takes the place of ZACCAI in the lists of Ezra (ii. 8) and Nehemiah (vii. 14). See *Speaker's Comm.* in loco. [F.]

CORD (עֲבֹת, מֵיתָר, יֶתֶר, חֶבֶל). Of the various purposes to which cord, including under that term rope and twisted thongs, was applied, the following are specially worthy of notice. (1.) For fastening a tent, in which sense מֵיתָר is more particularly used (*e.g.* Ex. xxxv. 18, xxxix. 40; Is. liv. 2). As the tent supplied a favourite image of the human body, the cords which held it in its place represented the principle of life (Job iv. 21 [R. V.], "Is not their tent-cord [A. V. and R. V. marg. "excellency"] plucked up?"; Eccles. xii. 6). (2.) For leading or binding animals, as a halter or rein (Ps. cxviii. 27; Hos. xi. 4), whence to "loosen the cord" (Job xxx. 11) = to free from authority. (3.) For yoking them either to a cart (Is. v. 18) or a plough (Job xxxix. 10). (4.) For binding prisoners, more particularly עֲבֹת (Judg. xv. 13; Ps. ii. 3, cxxix. 4; Ezek. iii. 25), whence the metaphorical expression "bands of love" (Hos. xi. 4). (5.) For bow-strings (Ps. xi. 2) made of catgut: such as are spoken of in Judg. xvi. 7 (יְתָרִים לֵחִים, A. V. and R. V. text "green withs;" *νευραὶ ὑγραί*, but more properly [R. V. marg.] *new* [or moist] *bow-strings*). (6.) For the ropes or "tacklings" of a vessel (Is. xxxiii. 23). (7.) For measuring ground, the full expression being חֶבֶל מִדָּה (2 Sam. viii. 2; Ps. lxxviii. 55; Amos vii. 17; Zech. ii. 1): hence to "cast a cord" = to assign a property (Mic. ii. 5), and cord or line became an expression for an inheritance (Josh. xvii. 14, xix. 9; Ps. xvi. 6; Ezek. xlvii. 13), and even for any defined district (*e.g.* the line, or "region," of Argob, Deut. iii. 4). [CHEBEL.] (8.) For fishing and snaring [FISHING, FOWLING, HUNTING]. (9.) For attaching articles of dress; as the *wreathen chains* (עֲבֹת), which were rather twisted cords, worn by the high-priests (Ex. xxviii. 14, 22, 24; xxxix. 15, 17). (10.) For fastening awnings (Esth. i. 6).

(11.) For attaching to a plummet. The line and plummet are emblematic of a regular rule (2 K. xxi. 13; Is. xxviii. 17); hence to destroy by line and plummet (Is. xxxiv. 11; Lam. ii. 8; Amos vii. 7) has been understood as = regular, systematic destruction (*ad normam et libellam*, Gesen. *Thesaur.* p. 125). It may however be referred to the carpenter's level, which can only be used on a flat surface (cp. Thenius, *Comm.* in 2 K. xxi. 13). (12.) For drawing water out of a well, or raising heavy weights (Josh. ii. 15; Jer. xxxviii. 6, 13). To place a rope on the head (1 K. xx. 31) in place of the ordinary head-dress was a sign of abject submission. The materials of which cord was made varied according to the strength required; the strongest rope was probably made of strips of camel hide as still used by the Bedouins for drawing water (Burckhardt's *Notes*, i. 46). The Egyptians twisted these strips together into thongs for sandals and other purposes (see the illustrations in Wilkinson, *Anc. Egypt.* ii. 331 [smaller ed. 1878]). The finer sorts were made of flax (Is. xix. 9). The fibre of the date-palm was also used (Wilkinson, i. 56); and probably reed and rushes of various kinds, as implied in the origin of the word σχοινίον (Plin. xix. 9), which is generally used by the LXX. as = חֶבֶל, and more particularly in the word אַגְמוֹן (Job xli. 2), which primarily means a reed; in the Talmud (*Erubhin*, fol. 58) bulrushes, osier, and flax are enumerated as the materials of which rope was made; in the Mishna (*Sotah*, i. § 6) the חבל מצרי is explained as *funis vimineus seu salignus*. In the N. T. the term σχοινία is applied to the whip which our Saviour made (John ii. 15), and to the ropes of a ship (Acts xxvii. 32). Alford understands it in the former passage of the rushes on which the cattle were littered; but the ordinary rendering *cords* seems more consistent with the use of the term elsewhere. [W. L. B.]

CORE (Κορέ, N. T. ὁ Κ.; *Core*), Ecclus. xlv. 18; Jude 11. [KORAH, 1.]

CORIANDER (גַּד; κόριον; *coriandrum*). The plant called *Coriandrum sativum* is found in Egypt, Persia, and India (Plin. xx. 82), and has a round tall stalk; it bears umbelliferous white or reddish flowers, from which arise globular, greyish, spicy seed-corns, marked with fine striae. It is much cultivated in the south of Europe, as its seeds are used by confectioners and druggists. The Carthaginians called it γολδ = גַּד (Dioscorid. iii. 64). The etymology is uncertain, though it is not impossible that the striated appearance of the seed-vessels may have suggested a name derived from גָּדַד, *to cut* (Ges.). It is mentioned twice in the Bible (Ex. xvi. 31; Num. xi. 7). In both passages the manna is likened to coriander-seed as to form, and in the former passage as to colour also. [W. D.] [H. B. T.]

CORINTH (Κόρινθος; *Corinthus*). This city is alike remarkable for its distinctive geographical position, its eminence in Greek and Roman history, and its close connexion with the early spread of Christianity.

Geographically its situation was so marked, that the name of its *Isthmus* has been given to every narrow neck of land between two seas. It was called "the bridge of the sea" (Pind. *Nem.* vi. 44 = 67, *Isthm.* iv. 20 = 35), and "the gate of the Peloponnesus" (Xen. *Ages.* 2). No invading army could enter the Morea by land except by this way, and without forcing some of the defences which have been raised from one sea to the other at various intervals between the great Persian war and the struggles of the Turks with the Venetians, or with the modern Greeks during the war of Independence.

But, besides this, the site of Corinth is distinguished by another conspicuous physical feature—viz. the *Acrocorinthus*, a vast citadel of rock, which rises abruptly to the height of 1886 feet above the level of the sea, and the summit of which is so extensive that it once contained a whole town. The view from this eminence is one of the most celebrated in the world. Besides the mountains of the Morea, it embraces those on the northern shore of the Corinthian gulf, with the snowy heights of Parnassus conspicuous above the rest. To the east is the Saronic gulf, with its islands, and the hills round Athens, the Acropolis itself being distinctly visible at a distance of 45 miles. Immediately below the Acrocorinthus, to the north, was the city of Corinth, on a table-land descending in terraces to the low plain, which lies between Cenchreae, the harbour on the Saronic, and Lechaeum, the harbour on the Corinthian gulf.

The situation of Corinth, and the possession of these eastern and western harbours, are the secrets of her history. The earliest impulse to her progress was probably given by the Phoenicians. But at the most remote period of which we have any sure record we find the Greeks established here in a position of wealth (Hom. *Il.* ii. 570; Pind. *Ol.* xiii. 4) and military strength (Thucyd. i. 13). Some of the earliest efforts of Greek ship-building are connected with Corinth; and her colonies to the westward were among the first and most flourishing sent out from Greece. So too in the latest passages of Greek history, in the struggles with Macedonia and Rome, Corinth held a conspicuous place. After the battle of Chaeronea (B.C. 338) the Macedonian kings placed a garrison on the Acrocorinthus. After the battle of Cynoscephalae (B.C. 197) it was occupied by a Roman garrison. Corinth, however, was constituted the head of the Achaean league. Here the Roman ambassadors were maltreated; and the consequence was the utter ruin and destruction of the city (B.C. 146).

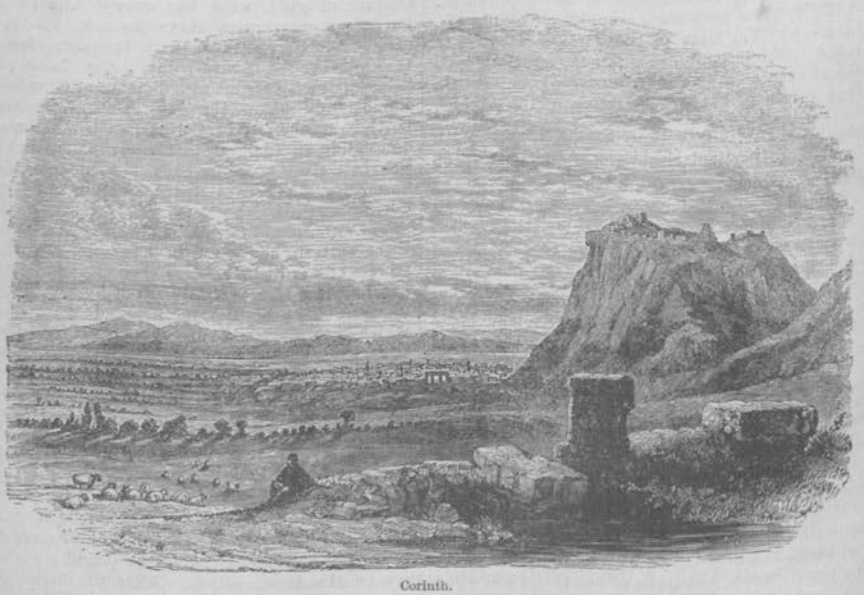
It is not the true Greek Corinth with which we have to do in the life of St. Paul, but the Corinth which was rebuilt and established as a Roman colony. The distinction between the two must be carefully remembered. A period of a hundred years intervened, during which the place was almost utterly desolate. The merchants of the Isthmus retired to Delos. The presidency of the Isthmian games was given to the people of Sicyon. Corinth seemed blotted from the map; till Julius Caesar, in B.C. 46, refounded the city, which thenceforth was called *Colonia Laus Julia Corinthus*. The new city was hardly less distinguished than the old, and it acquired a fresh importance as the metropolis of the Roman province of ACHAIA. We find

GALLIO, brother of the philosopher Seneca, exercising the functions of proconsul here (Achaia was a senatorial province) during St. Paul's first residence at Corinth, in the reign of Claudius.

This residence continued for a year and six months, and the circumstances which occurred during the course of it are related at some length (Acts xviii. 1–18). St. Paul had recently passed through Macedonia. He came to Corinth from Athens; shortly after his arrival Silas and Timotheus came from Macedonia and rejoined him; and about this time the two epistles to the Thessalonians were written (probably A.D. 52 or 53). It was at Corinth that the Apostle first became acquainted with Aquila and Priscilla; and shortly after his departure Apollos came to this city from Ephesus (Acts xviii. 27).

Corinth was a place of great mental activity, as well as of commercial and manufacturing enterprise. Its wealth was so celebrated as to be proverbial; so were the vice and profligacy of its inhabitants. The worship of Venus here was attended with shameful licentiousness. All these points are indirectly illustrated by passages in the two Epistles to the Corinthians, which were written (probably A.D. 57) the first from Ephesus, the second from Macedonia, shortly before the second visit to Corinth, which is briefly stated (Acts xx. 3) to have lasted three months. During this visit (probably A.D. 58) the Epistle to the Romans was written. From the three Epistles last mentioned, compared with Acts xxiv. 17, we gather that St. Paul was much occupied at this time with a collection for the poor Christians at Jerusalem.

There are good reasons for believing that when St. Paul was at Ephesus (A.D. 57) he wrote to the Corinthians an epistle which has not been preserved (see below, p. 654, *c*); and it is almost certain that about the same time a short visit was paid to Corinth, of which no account is given in the Acts.



Corinth.

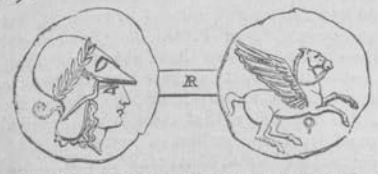
It has been well observed that the great number of Latin names of persons mentioned in the Epistle to the Romans is in harmony with what we know of the colonial origin of a large part of the population of Corinth. From Acts xviii. we may conclude that there were many Jewish converts in the Corinthian Church, though it would appear (1 Cor. xii. 2) that the Gentiles predominated. On the other hand, it is evident from the whole tenor of both Epistles that the Judaising element was very strong at Corinth. Party-spirit also was extremely prevalent, the names of Paul, Peter, and Apollos being used as the watchwords of restless factions. Among the eminent Christians who lived at Corinth were Stephanus (1 Cor. i. 16; xvi. 15, 17), Crispus (Acts xviii. 8; 1 Cor. i. 14), Caius (Rom. xvi. 23; 1 Cor. i. 14), and Erastus (Rom. xvi. 23; 2 Tim. iv. 20). The epistles of Clement to the Corinthians are among the most interesting of the post-apostolic writings.

According to Dion Chrysostom, who died about 117 A.D., Corinth was in his time the most important place in Greece; he also states that it possessed a public library (*Or.* xxxvii. 36, quoted in Bursian's *Geographie von Griechenland*, ii. 14). Another rhetorician, Aristides, who was born in the year of Dion's death, celebrates the fame of Corinth in his oration in praise of Poseidon (*Or.* iii. pp. 36–42, ed. Dindorf). Part of the passage is translated as follows in Stanley's Introduction to St. Paul's Epistles to the Corinthians, p. 6: "At Corinth, you would learn and hear even from inanimate objects; so great are the treasures of literature in every direction, wherever you do but glance, both in the streets themselves and in the colonnades; not to speak of the gymnasia and schools, and the general spirit of instruction and inquiry."

Corinth is still an episcopal see. The cathedral church of St. Nicolas, "a very mean place

for such an ecclesiastical dignity," used in Turkish times to be on the Acrocorinthus. The city has now shrunk to a wretched village, on the old site, and bearing the old name, which, however, is often corrupted into *Gortho*.

Pausanias, in describing the antiquities of Corinth as they existed in his day, distinguishes clearly between those which belonged to the old Greek city and those which were of Roman origin. Two relics of Roman work are still to be seen,—one a heap of brick-work which may have been part of the baths erected by Hadrian, the other the remains of an amphitheatre with subterranean arrangements for gladiators. Far more interesting are the ruins of the ancient Greek temple,—the "old columns, which have looked down on the rise, the prosperity, and the desolation of two [in fact, three] successive Corinths." At the time of Wheler's visit in 1676 twelve columns were standing: before 1795 they were reduced to seven; and further injury was inflicted by an earthquake in 1858. Next to the Heraeum at Olympia, this is the oldest Doric temple in Greece. In 1886 the whole plan of the temple was laid open by Dr. Dörpfeld, and found to have been built upon foundation lines cut in the rock. It is a double temple, with entrances and pronai both east and west (*Mittheilungen*, 1886, quoted, with plan, by Penrose in *Journal of Hellenic Studies*, viii. 274).



Silver Stater of Corinth (of the fine style of B.C. 400-338).

Obv., Head of Pallas, to right, wearing helmet bound with olive, and with "bearded serpent" beneath. Rev., Pegasus bridled, to right; below ♀. (*British Museum Catalogue of Coins of Corinth*, pl. iii. 13, 1889).

The fountain of Peirene, "full of sweet and clear water," as it is described by Strabo (viii. 21), is still to be seen on the Acrocorinthus, as well as the fountains in the lower city, of which it was supposed by him and Pausanias to be the source. The walls on the Acrocorinthus were in part erected by the Venetians, who held Corinth for twenty-five years in the 17th century. This city and its neighbourhood have been described by many travellers, but we must especially refer to Leake's *Morea*, iii. 229–304 (London, 1830), and his *Peloponnesiaca*, p. 392 (London, 1846); Curtius, *Peloponnesos*, ii. p. 514 (Gotha, 1851 – 1852); Clark, *Peloponnesus*, pp. 42–61 (London, 1858). There are four German monographs on the subject: Wilckens, *Rerum Corinthiacarum specimen ad illustrationem utriusque Epistolae Paulinae*, Bremen, 1747; Walch, *Antiquitates Corinthiacae*, Jena, 1761; Wagner, *Rerum Corinthiacarum specimen*, Darmstadt, 1824; Barth, *Corinthiorum Commercii et Mercaturae Historiae particula*, Berlin, 1844.

This article would be incomplete without some notice of the Posidonium, or sanctuary of Neptune, the scene of the Isthmian games, from which St. Paul borrows some of his most striking imagery in 1 Cor. and other epistles. This sanctuary was a short distance to the N.E. of Corinth, at the narrowest part of the Isthmus, near the harbour of Schoenus (now *Kalamáki*) on the Saronic gulf. The wall of the enclosure can still be traced. It is of an irregular shape, determined by the form of a natural platform at the edge of a ravine. The fortifications of the Isthmus followed this ravine and abutted at the east upon the enclosure of the sanctuary, which thus served a military as well as a religious purpose. The exact site of the temple is doubtful, and the objects of interest, which Pausanias describes as seen by him within the enclosure, have vanished: but to the south are the remains of the stadium, where the foot-races were run (1 Cor. ix. 24); to the east are those of the theatre, which was probably the scene of the pugilistic contests (*v.* 26); and abundant on the shore are the small green pine-trees (πεύκαι) which gave the fading wreath (*v.* 25) to the victors in the games. An inscription found here in 1676 (now removed to Verona) affords a valuable illustration of the interest taken in these games in Roman times (Boeckh, No. 1104). The French map of the Morea does not include the Isthmus; so that, till 1858, Col. Leake's sketch (reproduced by Curtius) was the only trustworthy representation of the scene of the Isthmian games. But the ground was more minutely examined by Mr. Clark, who in that year gave us a more exact plan. The sacred enclosure has recently become better known, owing to the excavations of the French School. In the immediate neighbourhood of this sanctuary are the traces of the canal, which was begun and discontinued by Nero shortly after the time of St. Paul's first visit to Corinth (*Dict. of Gr. and Rom. Geog.*, art. "Corinthus").

His first visit was towards the close of the reign of Claudius; his second, near the beginning of that of Nero. The coins of Corinth under Claudius (A.D. 41–54) include one representing a hexastyle temple on the Acrocorinthus, probably that of Aphrodite mentioned by Pausanias, ii. 5, 1 (*British Museum Catalogue of Coins of Corinth*, plate xvii. 2). One of those under Nero (A.D. 54–68) represents the head of Aphrodite over a galley inscribed with the name of the Corinthian port of Cenchreae, where there was also a temple of that goddess (Pausanias, ii. 2, 3; *Coins of Corinth*, plate xvii. 13); while another of the same reign shows a wreath of parsley surrounding the word ISTHMIA (*ib.* p. 70). The Isthmian games are also commemorated on Roman coins bearing two wrestlers or boxers, an unarmed runner, or a standing athlete holding a palm branch; and a building meant either for a stadium or a hippodrome (*Journal of Hellenic Studies*, vi. p. 64: "Numismatic Commentary on Pausanias," by Messrs. Imhoof-

Blumer and Percy Gardner). In the article just quoted, pp. 59–77 are devoted to the coins of Corinth, and it is observed on p. 59 that "the Roman colonists, entering on a wealth of Greek art and legend, adopted both with enthusiasm, and were very proud of both. There is no other Greek city whereof the coins give us so extensive information on the subject of temples and statues, legends and cults."

[J. S. H.] [J. E. S.]

CORINTHIANS, FIRST EPISTLE TO THE, occupies a position in the N. T. which is unique. It is the first chapter in Ecclesiastical History. Being earlier in date than the Acts and than any Book in the N. T. excepting 1 and 2 Thess., and being more varied in its contents than any other Epistle, it gives us *the first and fullest information that we possess as to the institutions, practices, and ideas of the Church in the apostolic age.* And as the authenticity of the Epistle is impregnable and all but unassailed (see below), the value of the information cannot be overrated. In modern phraseology we may say that this First Epistle consists of a series of *Tracts for the Times* written by a master-hand, while the Second is the *Apologia pro vitâ suâ* of the writer himself. In both Epistles the Apostle appears as the great "director of consciences," indicating the principles of spiritual pathology for all time.

In the following departments we find Church History beginning for us in the First Epistle. (1) In xv. 3, 4 the first germ of a formulated *Creed*, which, brief as it is, twice insists on the harmony between Christ's work of redemption and the Scriptures;—*κατὰ τὰς γραφάς*, as inserted into the Nicene Creed at Constantinople. (2) In xii. 4–27 the first apostolic exposition of the *Unity of the Church.* (3) In i. 13–17 the earliest notice of *Christian Baptism* as the mode of admission into the Church and (by implication) as being in the Divine Name. (4) In xi. 23–34 the first written account of the institution of the *Eucharist* and the earliest directions respecting it. In x. 15–22 the apostolic exposition of its significance, in which, as in the *Διδαχὴ τῶν δώδεκα ἀποστόλων* (ix.), the Cup precedes the Bread. (5) In xiv. much information about *Public Worship* in its various elements of prayer (14, 15), praise (15, 26), thanksgiving with the general "Amen" (16, 17), preaching and prophesying (24–33, 39). See also xi. 4, 5, 13, 17–20. (6) In xii. 28, 29 the earliest sketch of the *Christian Ministry*, where, as in Ephes. iv. 11 and the *Διδαχὴ* xi.–xv., the difference between itinerant "apostles" and "prophets" and resident "teachers" appears. In the *Διδαχὴ* we have also "Bishops" and "Deacons," but "Bishops" are not yet distinct from "presbyters." (7) In xvi. 2 the earliest notice of the *Observance of Sunday.* (8) In xvi. 20 one of the two earliest notices (1 Thess. v. 26: cp. 2 Cor. xiii. 12; Rom. xvi. 16) of the *Holy Kiss*, which still survives in the liturgies of Oriental churches. (9) In xv. 12–34 the first Christian argument for a *Future State*, preceded (xv. 4–7) by the earliest narrative of the *Resurrection of Christ*, and followed (xv. 35–58) by the earliest Christian description of "the life of the world to come." (10) In v. 3–5 the first form of *Excommunication.* (11) In i. 10–iv. 20 the earliest account of *Ecclesiastical Parties*, in which *σχίσμα* for the first time appears in a moral sense, but of a faction inside the Church, not of a separation from it. (12) In vi. 2–5 apostolic sanction for the first time given to *Christian Courts of Law.* (13) In iii. 1, 2 the principle of *Economy* or *Reserve* in teaching for the first time stated. (14) The Epistle as a whole lays the foundations of *Christian Casuistry*, by which small details and apparently conflicting duties are judged upon great and comprehensive principles.

I. The AUTHENTICITY of the four great Epistles of St. Paul—1 and 2 Corinthians, Galatians, and Romans — is more certain than that of any ancient writing. The criticism which assails it stultifies itself. Bruno Bauer in his *Kritik d. Paulinischen Briefe* (Berlin, 1850) was until lately almost alone in questioning it. But he has now been followed by the Dutch writer A. D. Loman both elsewhere and in his *Quaestiones Paulinae;* and a statement of the main evidence is rendered necessary. These Epistles are the front bulwarks of the faith, and their strength should be widely known. Even if the rest of the N. T. could be shown to be forgeries of the 2nd century, the evidence for the Crucifixion and Resurrection of Christ, and for miracles, would still remain ample in these four letters, written by one who was himself converted by the evidence, and addressed to those who had full opportunity of exposing it, had it been false. Even F. C. Baur asserts that "there has never been the slightest suspicion as to authenticity cast on these four Epistles; and they bear so incontestably the character of Pauline originality, that there is no conceivable ground for the assertion of critical doubts in their case" (*Paulus*, Stuttg. 1845, t. ii. *Einleit.*; Eng. tr. i. p. 246).

The *External Evidence for* 1 *Cor.* begins with the earliest Christian literature outside the N. T. Clement of Rome (*c.* A.D. 95) writes: "Take up the Epistle of the blessed Paul the Apostle. What wrote he first unto you in the beginning of the Gospel? Of a truth he charged you in the Spirit concerning himself and Cephas and Apollos, because that even then ye had made parties" (xlvii.),—earliest instance of the N. T. writer being quoted by name (cp. 2 Pet. iii. 15) and of the special use of "blessed" (cp. Rev. xiv. 13). If 1 Cor. was publicly read at Corinth, in spite of its strong condemnation of the Corinthians, they must have been convinced of its authority. Cp. xlviii. *sub fin.* with 1 Cor. x. 24, xxxviii. with 1 Cor. xii. 12–27, xlix. with 1 Cor. xiii., xxiv. with 1 Cor. xv., and the quotation in xxxiv. with that in 1 Cor. ii. 9. In the *Διδαχὴ τ. δώδεκα ἀποστ.* (A.D. 90–130) cp. iii. *sub fin.* with 1 Cor. xii. 6, 10, and ix. with 1 Cor. x. 16, xi. 27; also x. with 1 Cor. xvi. 22, and xvi. with 1 Cor. xv. 52. Ignatius (*c.* A.D. 112) in *Eph.* xviii. has echoes of 1 Cor. i. 18, 23, 24, and a rough citation from i. 20, and in *Rom.* v. an almost exact citation from 1 Cor. iv. 4. Cp. *Eph.* ii. *sub fin.* with 1 Cor. i. 10, which the interpolator of Ignatius inserts more fully. Polycarp (*c.* A.D. 95–155) in *Phil.* xi. quotes half 1 Cor. vi. 2 as *καθὼς Παῦλος διδάσκει*, and in ch. v. abbreviates 1 Cor. vi. 9, 10. Cp. ch. ii. with 1 Cor. vi. 14. Justin Martyr (*c.* A.D. 147) in *Trypho* xxxv. quotes from

1 Cor. xi. 19. Athenagoras (*c.* A.D. 177) in *de Res. Mort.* xviii. quotes part of 1 Cor. xv. 55 as *κατὰ τὸν ἀπόστολον*. Irenaeus (A.D. 140–202) quotes it upwards of 60 times, frequently naming St. Paul and sometimes the Corinthians. Where the allusion is quoted as from an "Elder" the evidence may be dated as A.D. 140 or earlier. These Elders were "disciples of the Apostles." *Haer.* IV. xxvii. 3 is the earliest passage in which the Epistle is named; in *ad Corinthios*, 12 verses of 1 Cor. x. are quoted (see Werner, *Der Paulinismus des Irenaeus*, Leipzig, 1889). Clement of Alexandria (fl. 180–211) quotes it nearly 150 times, sometimes by name, as *ἐν τῇ προτερᾷ πρὸς Κορ. ἐπιστ.* (*Paed.* i. 42). Tertullian (fl. 195–210) quotes it 400 or 500 times, and sometimes names it, as *Paulus in primâ ad Corinthios*. Among heretical writers Basilides (*c.* A.D. 125) certainly knew it, and Marcion (*c.* A.D. 140) admitted it (possibly in a garbled form) to his very limited Canon. The Muratorian Canon states that St. Paul "wrote twice to the Corinthians and Thessalonians for their correction;" and again, "he wrote first to the Corinthians to forbid heretical schism." This ample evidence is by no means all that might be cited from all parts of Christendom between A.D. 90 and 220.

Nor is the *Internal Evidence* less conclusive: whether we regard the characteristic energy of the language, which caused Tertullian to say that this letter was written with gall and not with ink, Jerome and Erasmus to compare St. Paul's words to thunder and lightning, and Luther to delare that they are "not dead words, but living creatures and have hands and feet;" or consider the numerous coincidences, most of which *must* be undesigned, between this Epistle and other parts of the N. T. (see Table below). Nothing so completely in harmony with all that we know from other sources respecting the character and life of St. Paul, and the condition of Corinth in his time, could have been invented.

Nor can the *Integrity* of the Epistle be impugned. No MS. or Version throws doubt on any chapter or even verse. The whole Epistle is contained in the Uncials ℵABD, and, excepting vii. 19–ix. 6 and xiii. 9–xv. 39, in the fragmentary C. Irenaeus quotes from every chapter excepting iv., xiv., and xvi. Tertullian (*adv. Marc.* v. v.–x.) goes through it chapter by chapter to the end of xv.

II. The PLACE and TIME are approximately given in xvi. 8: "I will tarry at *Ephesus* until *Pentecost*." It was written, therefore, in or near Ephesus and before Pentecost, in a year which cannot be determined with certainty, but which was probably A.D. 57 (see Table of different views in Farrar's *St. Paul*, ii. p. 624). The ancient foot-note, rightly omitted from R. V., states that it "was written from Philippi;" an error which probably arose from a misunderstanding of xvi. 5, as if *Μακεδονίαν γὰρ διέρχομαι* meant "For I am at this moment passing through Macedonia." How could "the churches of Asia" (xvi. 19) send a greeting from Philippi? From Ephesus, the chief Church, they would naturally do so. The exact time of year was probably Easter. The Passover seems to have suggested the imagery in v. 6, 7; xv. 20, 23; xvi. 15. Nowhere else in St. Paul does *πάσχα* occur, nor *ἀπαρχὴ* so frequently. Cp. the repeated appeals to Christ's Resurrection (xv. 4, 12, 15, 17, 20), of which at Easter the Apostle would be full. The period in St. Paul's life can be determined with some definiteness. He was twice in Ephesus: once at the close of his second missionary journey after his first and long visit of eighteen months at Corinth (Acts xviii. 19), and again for two and a half or three years (Acts xix. 1, 10; xx. 31) on his third missionary journey. The letter cannot have been written during the first stay at Ephesus. Apollos had not yet arrived there (Acts xviii. 25): and when the Epistle was written Apollos had reached Ephesus, had been instructed there by Aquila and Priscilla, whom St. Paul had brought *thither* from Corinth (Acts xviii. 19), had been *to* Corinth to water what Paul had planted (Acts xix. 1; 1 Cor. iii. 6), and had returned (1 Cor. xvi. 12). It was, therefore, during St. Paul's second and long stay at Ephesus, and probably near the end of it, that the letter was written. Timothy had already started for Macedonia on his way to Corinth (1 Cor. iv. 17); and his departure with Erastus took place shortly before the uproar of Demetrius, immediately after which Paul left Ephesus (Acts xx. 1). In the Acts the writing of the letter must be placed between xix. 22 and 23.

III. The PERSONS ADDRESSED are always a consideration of the utmost importance in studying St. Paul's writings. He commonly dictated his letters (xvi. 21; Rom. xvi. 22; Gal. vi. 11; Col. iv. 18; 2 Thess. iii. 17): and as he dictates he is "present in spirit" (v. 3) with those whom he addresses. They are before him, not as distant correspondents, but as a present audience. With his eyes closed to all around him, he sees them alone, with their difficulties and frailties, their claim upon his sympathy, and their need of his firmness. He hears their rejoinders to his rebukes and entreaties, and he replies to them again. He does not write, but speak. The result is a compound of oratory, conversation, and correspondence, which is unique in literature. No Epistles illustrate this result more completely than those to the Corinthians, and in studying them we must keep the persons addressed in them, paragraph by paragraph, steadily in view.

Although Athens still remained the chief representative of Greek intellect and culture, Corinth in a single century of existence had become the political and commercial capital of Greece, and as such was the seat of the Proconsul Gallio (Acts xviii. 12). Hence "the Church of God that is in Corinth" represents all Christians in the whole Roman province of Achaia (2 Cor. i. 1). The light of this brilliant *totius Graeciae lumen*, quenched by Mummius (B.C. 146), had been rekindled by Julius Caesar (B.C. 46) as *Colonia Julia* or *Laus Julia Corinthus*. Under the auspices of this reputed son of Venus it soon recovered its former prosperity and more than its former licentiousness. The worship of Aphrodite assumed enormous proportions; and her temple became a centre round which the abominations of Greece, of Rome, and of the East found a home and intensified one another. Contemporary literature abounds with passages which show that this new Corinth was a by-word for moral corruption. It was at Corinth

that the Apostle's ghastly catalogue of heathen vices (Rom. i. 21–32) was penned. It was of heathen society in Corinth that he declared that it was wholly made up of those to whom such vices were habitual (1 Cor. v. 10). It was from such vices that the Corinthian Christians had been rescued (vi. 10, 11). Their peril in this direction is the chief motive of the Epistle, the crisis of which breaks with a crash in v. 1, 2: "It is actually reported," &c.

The city had other characteristics besides its licentiousness. Its inhabitants consisted of (1) *Greeks*, attracted to the restored city by sentiment for an historic site and the love of something new. (2) *Italians*, descendants of the freedmen planted there by Caesar. Most of the Corinthian names in the N. T. (1 Cor. i. 14, 16; xvi. 17; Rom. xvi. 21, 23; Acts xviii. 8, 17) seem to be of servile origin. (3) *Adventurers* from all parts of the Mediterranean, including many *Jews* who had settled there for trading purposes. With almost all of these St. Paul, as an Hellenist, a Roman citizen, and a Hebrew of Hebrews, had some point of contact. The Greek element contributed intellectual and political activity of a debased kind; the restlessness without the earnestness of old Greek speculation; and that spirit of faction which had proved the ruin of Hellas (i. 10–17; iii. 1–9, 21, 22; xi. 18). Schools and other instruments of culture abounded, and the Corinthians prided themselves on their knowledge and acuteness. Hence the frequent mention of γνῶσις (i. 5; viii. 1–11; xii. 8; xiii. 2, 8; xiv. 6) and σοφία (i. 17–30; ii. 1–7, 13; iii. 19; xii. 8). Cp. 2 Cor. i. 12; ii. 14; iv. 6; vi. 6; viii. 7; x. 5; xi. 6. The settlers from other countries exhibited the characteristics of mixed emigrants, who commonly part with their own national virtues in exchange for the national vices of all the rest, and end in self-seeking godlessness. In morals the Jews were no doubt on a higher level. But with them religion had become so stereotyped, bigoted, and self-satisfied, that there was more hope of the dissolute heathen than of them.

Add to these facts three others. A city barely a century old could have no aristocracy. Its upper classes owed their elevation mainly to wealth, and the whole tone of the population was *democratic*. It was in such a society that congregations, in which each exhibited his spiritual gifts without order or respect of persons (xii.; xiv.), women set custom at defiance (xi. 5–15; xiv. 34, 35), and an indecent scramble took place at the public meals connected with the Eucharist (xi. 17–34), became possible. Again, the wealthy classes were not manufacturers, but *traders*. They lacked the education of the producer, and had only the shrewdness of the money-getter. The works of art for which old Corinth had been famous were dug up from ruins and tombs, not to be copied, but to be sold. They were a city of shopkeepers. Lastly, there were all the demoralising influences of a thriving *seaport*—a double seaport (*bimaris Corinthi*). In moral degradation it was Paris and Liverpool combined. To sum up:—Licentiousness of the grossest kind, great mental activity and intellectual pride, a democratic spirit devoid of reverence, commercial energy absorbed in money-getting;—such was the combination into which St. Paul had introduced the leaven of the Gospel (iii. 6; iv. 15); such were the elements out of which the first great Gentile Church was formed (vi. 11); and such were still the surroundings of that Church when this letter was written (v. 10). Certainly to speak of "the *Church of God* that is in *Corinth*" involved a startling and a glorious paradox (Bengel).

Almost certainly St. Paul was the first Christian who ever set foot in Corinth. Aquila was still a Jew when Paul took up his abode with him; and it was their common trade, not their common faith, which in the first instance drew them together (Acts xviii. 23). The planting of Christianity in this unpromising soil was absolutely the work of St. Paul (1 Cor. iii. 6, 10). The Corinthian Christians were his children in Christ (iv. 15): and while Aquila and Priscilla were probably the first Jewish converts, Stephanas and his household were the first Gentiles who accepted the Gospel in Achaia (xvi. 15; i. 16).

IV. The OCCASION of the Epistle would seem to have been threefold. (*a*) Members of the household of Chloe (i. 11) had brought reports of the factions and other evils. Whether Chloe was a Corinthian, whose relations or slaves were visiting Ephesus, or an Ephesian whose relations or slaves had been visiting Corinth, is uncertain. (*b*) Independently of her household, St. Paul seems to have heard of the monstrous case of incest; possibly from those mentioned in xvi. 17. This is the chief occasion of the letter: for Timothy had already been sent (iv. 17) to deal with the factions. From one or both of these sources Paul had also heard of litigation before heathen judges (vi. 1), disputes in public worship and even at the Eucharist (xi. 18–34), and erroneous doctrine touching the Resurrection (xv.). Besides this (*c*) the Corinthians themselves had written to consult the Apostle (vii. 1). This letter seems to have been self-satisfied in tone, containing no confession of the existing scandals. Quotations from it, some of them made sarcastically, may perhaps be traced in "All things are lawful" (vi. 12; x. 23); "It is good," &c. (vii. 1); I also (as well as you) "have the Spirit of God" (vii. 40); "We all have knowledge" (viii. 1); "Why is my liberty," &c. (x. 29); "Ye remember me in all things" (xi. 2); "Jesus is anathema; Jesus is Lord" (xii. 3); "The collection for the saints" (xvi. 1). In several cases the apparent quotation is followed by a "but," as much as to say, "What you state is very true, but there is much to be said on the other side."

V. The CONTENTS of the Epistle are as various as the evils reported and the questions asked. The strictures on the evils are somewhat mingled with the answers to the questions: but on the whole the evils are discussed first. The tender-hearted Apostle gets the most painful part of his duty done as quickly as may be, but not without kindly words first. After the usual *Salutation* and *Thanksgiving* (i. 1–9) he takes the two worst scandals, the *Factions* (i. 10–iv. 20) and *Impurity* (iv. 21–vi. 20). In discussing the latter he says they are not to judge the heathen as to this sin; and this leads him to condemn them for allowing the heathen to judge them as to much less important things (vi. 1–9).

Then (vii. 1–xiv. 20) he answers the Corinthians' questions respecting *Marriage* (vii.); *Heathen Feasts* (viii. 1–xi. 1), about which his decision is an advance on that of the Jerusalem Council (Acts xv. 20, 29); *Public Worship* and *Spiritual Gifts* (xi. 2–xiv. 40). Lastly (xv.) he expounds the doctrine of *the Resurrection*. The letter closes with personal *Charges* and *Salutations* (xvi.). Of the Sosthenes included in the opening address (i. 1) nothing is known. Eusebius (*H. E.* I. xii. 1) makes him one of the Seventy. That he was the ruler of the Corinthian synagogue, beaten by the Jews in Gallio's court (Acts xviii. 17), is improbable. The name was a common one.

The following table of coincidences between the Epistle and other Books of the N. T., especially the Acts, will illustrate its contents and also show the strength of this side of the internal evidence as to its authenticity.

The Acts.	1 *Corinthians.*
xvi. 6, 7, 9. [Paul is thrice preternaturally directed to visit Europe.]	ii. 1. When I came unto you, I came not with excellency of speech or of wisdom (as at Athens), proclaiming to you the mystery of God.
xviii. 1. He departed from Athens and came to Corinth.	
xviii. 11. He dwelt there a year and six months, teaching the word of God among them.	ix. 1. Are not ye my work in the Lord?
xviii. 19. They came to Ephesus, and he left them (Aquila and Priscilla) there.	xvi. 19. Aquila and Priscilla salute you.
xviii. 21. He set sail from Ephesus.	
xix. 1. While Apollos was at Corinth, Paul . . . came to Ephesus.	iii. 6. Apollos watered.
xix. 9. When some were hardened and disobedient, speaking evil of the Way.	xvi. 9. There are many adversaries.
	xv. 32. I fought with beasts at Ephesus.
xix. 20. So mightily grew the word of God and prevailed.	xvi. 9. A great door and effectual is opened unto me.
xix. 21. Paul purposed in the spirit, when he had passed through Macedonia and Achaia, &c.	xvi. 5. I will come unto you, when I shall have passed through Macedonia.
xix. 22. Having sent into Macedonia . . . Timothy and Erastus.	iv. 17. I sent unto you Timothy.
	xvi. 10. If Timothy come.
xx. 2. He came into Greece.	iv. 19. I will come to you shortly.
xx. 34. These hands ministered unto my necessities.	iv. 11, 12. Even unto this hour . . . we toil, working with our own hands.
xxi. 26. Purifying himself with them.	ix. 20. To the Jews I became as a Jew, that I might gain the Jews.
xvi. 1. Circumcised him because of the Jews.	
xxii. 14. See the Righteous One.	ix. 1. Have I not seen Jesus our Lord?
	xv. 9. He appeared to me also.
xxiii. 1. I have lived before God in all good conscience.	iv. 4. I know nothing against myself.
xxiv. 17. I came to bring alms to my nation and offerings.	xvi. 3. Them will I send to carry your bounty to Jerusalem; and if it be meet for me to go also, they shall go with me.
xviii. 8. Crispus, *the ruler of the synagogue*, believed.	i. 14. I baptized none of you save Crispus
Rom. xvi. 23. Gaius, *my host*.	and Gaius.
1 Cor. xvi. 15. The house of Stephanas . . . *the first-fruits of Achaia.*	i. 16. I baptized also the household of Stephanas.
1 Tim. iv. 12. Let no man despise *thy youth*.	xvi. 10. Let no man despise him.

The last four coincidences are specially interesting. They show in the most incidental way *why* St. Paul made an exception in favour of Crispus, Gaius, and Stephanas, and *why* he was afraid that the Corinthians might despise Timothy.

The Epistle contains some special *difficulties*. *a*. The number and character of the factions (i. 12). *b*. The meaning of iii. 12–15. *c*. ἔγραψα ὑμῖν ἐν τῇ ἐπιστολῇ (v. 9). *d*. μᾶλλον χρῆσαι (vii. 21). *e*. ἀκολουθούσης πέτρας (x. 4). *f*. ἐξουσίαν ἔχειν ἐπὶ τῆς κεφαλῆς διὰ τοὺς ἀγγέλους (xi. 10). *g*. γένη γλωσσῶν (xii. 10, 28; xiii. 1; xiv. 2, 4, 16, 19). *h*. οἱ βαπτιζόμενοι ὑπὲρ τῶν νεκρῶν (xv. 29). Of these eight only the first three can be noticed here. For the remainder see Commentaries, esp. Ellicott.

a. Considering the small amount of information given us respecting *the Factions*, the amount written about them is amazing. We must separate St. Paul's brief statements and slight hints from the masses of theory which have been spun out of them, especially regarding the party about which we know little more than the name, the so-called "Christ party." Six points may be considered as fairly certain. (1) *The whole Corinthian Church was involved.* Ἕκαστος ὑμῶν λέγει implies that there was hardly anyone who did not attach himself to one name or another. (2) The factions originated partly in the invariably occurring *differences between Jewish and Gentile Christians*, partly in the invariably *factious spirit of the Greek race*. There is no modern parallel. To gain an idea of the intensity of feeling, we must imagine Irish Romanists and Orangemen sharing in the same public worship. (3) *The factions are mentioned in chronological order.* At first all were disciples of *Paul*. When he left and *Apollos* came, some disparaged the simplicity of the Apostle (i. 17; ii. 1–5) in comparison with the learning and eloquence of the brilliant Alexandrian (Acts xviii. 24, 25, 28). Then certain other teachers arrived with letters of commendation (2 Cor. iii. 1), probably from Jerusalem, who cast a doubt upon the Apostleship of Paul (1 Cor. ix. 1–5; 2 Cor. xii. 12) and exalted *Cephas* and themselves in opposition to him (2 Cor. xi. 5; xii. 11). Finally, yet another party, dissenting from those who had elected human leaders, degraded the Name of *Christ* into a party cry. (4) *These parties received no sanction from the teachers with whose names they made free.* St. Paul condemns all parties alike. Apollos remains at St. Paul's side and declines to return to Corinth while this crisis continues. Paul, who once did not shrink from resisting Peter to the face (Gal. ii. 11), says not one word against him here: and this shows that Peter had no sympathy with those whom Paul here condemns for making Cephas a party name.

That Peter was ever in Corinth is very doubtful. Dionysius of Corinth (Eus. *H. E.* II. xxv. 8) may be drawing a baseless inference from 1 Cor. i. 12, or (if he is correct) must refer to a visit at some later period. (5) *The number of factions was four*, not three or two. That the last clause of i. 12 means "But I, Paul, am of Christ," is utterly improbable. And that it refers to neutrals, who protested against all divisions, is against the whole context. The Apostle would at once have commended such neutrals, had they existed. No such commendation lurks in iii. 22, 23: "Ye are Christ's" is addressed to the whole body, not to any one section. Indeed 2 Cor. x. 7 is conclusive. It is aimed against those who in some exclusive sense claimed to be "of Christ;" and 2 Cor. xi. 13 seems aimed against their leaders. And this may be the meaning of *μεμέρισται ὁ χριστὸς* in i. 13: "The Christ has been made a part." He who ought to be all in all has been degraded to a fraction (see *Speaker's Comm.*). The attractive theory of Schmidt and Baur that there were only two factions, that of Paul and Apollos on one side, and that of Cephas and Christ on the other, does not bear close inspection. Unlike John xix. 25, the grouping does not suggest two pairs. There was much more at work than the difference between the progress claimed by Paul in the interests of the Gentiles and the conversatism maintained by other Apostles in sympathy with the Jews. That Paul and Apollos were excellent friends (iii. 5; iv. 6; xvi. 12) is indubitable. But it is scarcely less so that real dissension existed between the admirers of Paul and the admirers of Apollos (i. 17–28; ii. 1–6; iii. 4). Clement of Rome (xlvii.) omits the "Christ party" because it would not suit his argument. But if there were virtually only two factions, he ought to have omitted the Apollos party as well; all the more so, as its omission would have improved his argument. His mention of it is strong evidence of its distinctness. Perhaps the strangest theory of all is that the only real parties were those of Paul and of Apollos; "that Cephas is introduced only to vary the illustration; and that Christ is added to crown the absurdity of such mischievous partisanship." (6) *St. Paul abstains from attributing particular doctrines to particular parties.* It will be our wisdom to do the same. He condemns on the one hand certain schismatical factions, on the other certain erroneous doctrines and practices. But he nowhere assigns any of the latter to any one of the former. It was unnecessary and perhaps impossible to do so. Some evils would be common to two, three, or all four of the parties. It is easy to see that some of the evils would be prevalent chiefly among Gentile converts, others chiefly among Jewish: and on the whole the First Epistle treats mainly of the former, the Second mainly of the latter. But we need not go beyond these broad facts. Ingenious speculations unsupported by evidence are not worth the time which the study of them consumes.

St. Paul's rebukes were effectual. These factions soon died out. Clement of Rome writes of them as past, and contrasts them with existing dissensions of quite another kind. Evidently they had never created a schism.

b. As to the difficult passage iii. 12–15, all that can be pointed out here is that its imagery is taken from Corinth as St. Paul knew it. Of the city destroyed by Mummius only what was solid had survived the conflagration. Foundations and "costly stones" remained, while everything which had been run up in "wood" and thatch of "hay" and "stubble" had been consumed.

c. There is no reasonable doubt that v. 9 refers to a *lost epistle* written before our 1 Cor. Excepting a possible misapprehension of the meaning of *νῦν* (v. 11), nothing but *à priori* dislike to admitting the loss of a letter from a leading Apostle to a leading Church, would make interpreters hesitate. This may be met by another *à priori* consideration. No two places equally far apart were in more constant communication than Ephesus and Corinth. Is it likely that a Church of such importance and so critically situated as Corinth would be left by St. Paul, while at Ephesus, without either a visit or a letter for three years? In point of fact he gave both (see next article). We know, even without John xx. 25, that thousands of our Lord's spoken words have not been preserved. Is it surprising that some of His Apostles' written words have perished? It is to the last degree improbable that the Apostles wrote nothing, either to Churches or individuals, but what has come down to us. See Lightfoot, *Philippians*, 2nd ed. p. 136; Jowett, *Epp. of St. Paul*, 2nd ed. p. 195. On the apocryphal epistle to the Corinthians see below.

VI. In STYLE 1 Cor. should possibly be ranked first among St. Paul's writings. Probably no such thought was in his mind: but the letter might convince the fastidious Greeks that in clearness of thought and power of language he was no way inferior to the eloquent Apollos. Chapters xiii. and xv. are among the most sublime passages, not only in the Bible, but in literature. Several other portions are of the noblest type of eloquence: *e.g.* the characteristics of heavenly wisdom (ii. 6–16; iii. 18–23); the limits of personal liberty (vi. 12–20); the impassioned appeal in ch. ix. The whole letter conveys a profound impression of lofty thoughts expressed in lofty language.

The following words and phrases are *peculiar to this Epistle in the N. T.*: *μωρία* (i. 18, 21, 23; ii. 14; iii. 19), *φημί* (vii. 29; x. 15, 19; xv. 50), *ἄγαμος* (vii. 8, 11, 32, 34), *καταχρᾶσθαι* (vii. 31; ix. 18), *σύμφορος* (vii. 35; x. 33), *ἀκατάλυπτος* (xi. 5, 13), *κομᾶν* (xi. 14, 15), *ἐνεργήματα* (xii. 6, 10), *ἑρμηνεία* (xii. 10; xiv. 26), *χοικός* (xv. 47, 48, 49), *λογία* (xvi. 1, 2), *οἱ ἄρχοντες τοῦ αἰῶνος τούτου* (ii. 6, 8), *ἡ σοφία τοῦ κόσμου τούτου* (i. 20; iii. 18). There is a large number of *ἅπαξ λεγόμενα*, of which those relating to the Eucharist are specially interesting: *τὸ ποτήριον τῆς εὐλογίας* (x. 16), *ποτήριον κυρίου* (x. 21), *τὸ ποτήριον τοῦ κυρίου* (xi. 27), *τράπεζα κυρίου* (x. 21), *κυριακὸν δεῖπνον* (xi. 20), *κοινωνία τοῦ αἵματος, τοῦ σώματος* (x. 16). Among others are *πρὸ τῶν αἰώνων* (ii. 7), *τὸ πνεῦμα τοῦ κόσμου* (ii. 12), *γυμνιτεύειν* (iv. 11), *περίψημα* (iv. 13), *ἐπισπᾶσθαι* (vii. 18), *εἰδωλεῖον* (viii. 10), *πυκτεύω* (ix. 26), *περιπερεύεσθαι* (xiii. 4), *ἔκτρωμα* (xv. 8), *βιπὴ ὀφθαλμοῦ* (xv. 52), *ἀνδρίζεσθαι* (xvi. 13), *Μαρὰν ἀθά* (xvi. 22).

There are *thirty quotations from the O. T.*, of which nineteen are given as such,—a number

exceeded by no Epistle, excepting Romans and Hebrews; and even in Hebrews the *range* of quotation is not so wide. Eleven books are quoted: Isaiah eight times, Psalms four or five, Deuteronomy four, Genesis four, Exodus two or three times, Numbers one or two, Zechariah one or two; Job, Jeremiah, Hosea, Malachi, each once. Nowhere else in the N. T. is Job explicitly quoted (iii. 19: cp. Phil. 19; 1 Thess. v. 22; 2 Thess. ii. 8; Luke i. 52). In some cases (x. 6 and xi. 25) we cannot be sure from which of two Books the quotation comes. In eight cases (vi. 16; ix. 9; x. 7, 20, 21, 26; xv. 32, 45) the quotation is in exact agreement with the LXX. In fourteen (i. 19, 31; ii. 16; v. 7, 13; x. 5, 6, 22; xi. 7, 25; xiii. 5; xv. 25, 27, 47) there is almost exact, or at least substantial agreement with the LXX. In four (i. 20; iii. 19; xiv. 25; xv. 54) the quotation follows the Hebrew. In three (ii. 9; xiv. 21; xv. 55) it differs considerably from both. In one (iii. 20) it agrees almost exactly with both. These facts show that, although St. Paul was familiar with both the Hebrew and the Greek of the O. T., yet as a rule he quotes from the LXX. In his writings, quotations which agree with the Hebrew against the Greek are comparatively rare.

The Epistle contains one of the three quotations from classical literature made by St. Paul (xv. 33; Tit. i. 12; Acts xvii. 28). That the parable of the body and its members (xii. 12–27) was suggested by that of Menenius Agrippa (Livy, ii. 32) is not likely.

In the following passages there are *various readings* of much interest:—ii. 1, *μυστήριον* and *μαρτύριον*: iii. 1, *σαρκίνοις* and *σαρκικοῖς*: v. 6, *οὐ καλὸν* and *καλόν*: vi. 20, insertion of *et portate* in some Latin authorities, and of *ἐν τῷ πνεύματι ὑμῶν ἅτινά ἐστιν τοῦ θεοῦ* in some Greek: vii. 3, 5, *τὴν ὀφειλὴν* and *τὴν ὀφειλομένην εὔνοιαν*, *σχολάσητε* and *σχολάζητε*, *ἦτε* and *συνέρχεσθε*, with the insertion of *καὶ νηστείᾳ καί*, seem to show the influence of ascetic views: vii. 33, 34, punctuation: viii. 7, *συνηθείᾳ* and *συνειδήσει*: ix. 1, transposition of clauses: xi. 10, *ἐξουσίαν* and *κάλυμμα, velamen*: xi. 24, insertion of *κλώμενον*: xi. 29, insertion of *ἀναξίως*: xiii. 3, *καυθήσωμαι* and *καυχήσωμαι*: xv. 5, *δώδεκα* and *ἕνδεκα*: xv. 47, insertion of *ὁ κύριος*: xv. 51, several important variations.

The Epistles to the Corinthians abound in *figures of language*, some of which are very characteristic of St. Paul's style. Some think that their frequency in his writings indicates that he had attended lectures in Greek rhetoric at Tarsus. (The references in this paragraph are not exhaustive: in some cases many other instances might be cited.) Accumulation of participles: 1 Cor. viii. 12; xv. 58; 2 Cor. iv. 8, 9, 10, 13, 14; of synonyms, 2 Cor. vi. 14–16. Alliteration: 2 Cor. vii. 4; viii. 22; ix. 5, 8, 10, 13. Anacoluthon: 1 Cor. iv. 2, 6, 7, 8; xii. 28; 2 Cor. i. 7; vii. 5; ix. 10–13; xi. 23–27. Antithesis: 1 Cor. i. 18, 21; iii. 2; iv. 10, 18; viii. 1; xiii. 2. Aposiopesis: 1 Cor. ix. 15; 2 Cor. vii. 12. Asyndeton: 1 Cor. xiii. 4–8; xiv. 26; xv. 43, 44; 2 Cor. viii. 23; x. 16; xi. 20; xii. 10; xiii. 11. Chiasmus: 1 Cor. iii. 17; viii. 13; xiii. 2; 2 Cor. ix. 6; x. 12; xii. 9, 20. Climax: 1 Cor. xiii. 1–3; 2 Cor. vii. 11; xi. 22, 23. Constructio ad sensum: 1 Cor. vii. 36. Constructio praegnans: 1 Cor. xi. 18; xv. 54; 2 Cor. x. 5; xi. 3. Contrast of prepositions: 1 Cor. xi. 12; xii. 8; 2 Cor. iv. 17; viii. 3; x. 3, 13. Epanaphora: 1 Cor. i. 26; v. 8; xii. 8–10; xiii. 7, 8; xvi. 19, 20; 2 Cor. vii. 2, 4, 11. Erotesis: 1 Cor. i. 13; ii. 11; iii. 16; iv. 7; v. 6, 12; vi. 9, 15, 16, 19; 2 Cor. xii. 17, 18; xiii. 5. Euphemism: 1 Cor. v. 1, 2; vii. 3; 2 Cor. vii. 11. Irony: 1 Cor. iv. 8; viii. 1; 2 Cor. xi. 16; xii. 13. Litotes: 1 Cor. xi. 17, 22. Oratio variata: 1 Cor. vii. 13; xiv. 1; 2 Cor. viii. 23; xi. 23–28. Oxymoron: 2 Cor. vi. 9, 10, 14; viii. 2; xii. 5, 9, 10. Parallelism: 1 Cor. vii. 16; x. 23; xi. 4, 5; xii. 4, 6, 15–17; xiii. 8–12; xv. 21, 42–49, 53, 54; 2 Cor. vii. 4, 5; xiii. 4. Parenthesis: 1 Cor. xvi. 15; 2 Cor. ii. 5; v. 7; vi. 2; ix. 4; xi. 21, 23; xii. 2, 3. Paronomasia: 1 Cor. ii. 13; iii. 17; vii. 31; xi. 29, 31, 32; xiv. 10; 2 Cor. iii. 2; iv. 8; v. 4; vi. 10; vii. 10; viii. 22; x. 12; xi. 2. Pronouns demonstrative inserted for emphasis before *ὅτι* and the like: 1 Cor. i. 12; vii. 26; xv. 50; 2 Cor. i. 12; ii. 1, 9; v. 14; viii. 20; x. 7, 11; xiii. 10. Pronouns personal (*ὑμῶν*) inserted between the article and the noun—peculiar to St. Paul: 1 Cor. vii. 35; ix. 12; xvi. 17; 2 Cor. i. 6; vii. 7, 15; viii. 13, 14; xii. 19; xiii. 9. Repetition of conjunctions: 1 Cor. ii. 3; iii. 22; v. 11; xiv. 6; 2 Cor. vii. 11; xii. 12, 21; of emphatic words: 1 Cor. ii. 6, 13; x. 1–4; xi. 3–5; xii. 4–6; xiii. 2, 9, 10, 11; xv. 21; 2 Cor. ii. 16; vi. 12; vii. 2, 4; x. 12; of prepositions: 1 Cor. i. 10; ii. 3; v. 8; xiv. 6; xv. 52; 2 Cor. vi. 4–8; xi. 23, 27; xii. 10; of the relative: 1 Cor. ii. 7. Transposition for emphasis: 1 Cor. ii. 6; iii. 2; vi. 4; ix. 10; x. 13; 2 Cor. ii. 4; ix. 7; x. 3; xii. 7. Zeugma: 1 Cor. iii. 2. *Τοῦ* with infin. to express design: 1 Cor. ix. 10; x. 13; xvi. 4; 2 Cor. i. 8; viii. 11. *Εἰς* or *πρὸς* to express design or result: 1 Cor. viii. 10; ix. 18; x. 6; xi. 22, 33; 2 Cor. i. 4; iii. 13; iv. 4; vii. 3; viii. 6.

VII. The BEARER OF THE LETTER is not known. From xvi. 12 it would seem as if the Apostle had wished that Apollos should undertake this office. The spurious foot-note assigns it to Stephanas, Fortunatus, Achaicus, and Timothy. This is impossible as regards Timothy, who had already started for Macedonia and Corinth (iv. 17; xvi. 10, 11; Acts xix. 22), but may be true of the rest (xvi. 17, 18). It is, however, more probable that the bearer was Titus (cp. 2 Cor. viii. 16–24 and xii. 18 with 1 Cor. xvi. 12). See Lightfoot in Camb. *Journal of Class. and Sacr. Philol.* ii. 201, 202, June 1855; Macknight, *Transl. of the Apost. Epp.* i. 451, 674; ii. 2, 7, 124; Stanley on 1 Cor. xvi. 12.

VIII. Two APOCRYPHAL EPISTLES connected with 1 Cor. are preserved in Armenian; one from the Corinthians to St. Paul, and one from him in reply. They are demonstrably spurious and are of little interest. Text published by Wilkins, 1715; by P. Masson with Latin version, 1715; by Whiston, 1719; by Whiston's sons with Greek and Latin versions, 1736. The English translation of Father Aucher and Lord Byron is given in Moore's *Life of Lord Byron*, vi. 274, and in Stanley; and a summary in *Dict. of Christ. Biog.* ii. 168. These Armenian forgeries do not represent the letters alluded to in 1 Cor. vii. 1 and v. 9. The Corinthian letter does not ask the questions answered by St. Paul in vii.–

xiv., and the reply gives no warning about associating with fornicators. Their chief value is as contrasts to genuine documents. Such clumsy imitations of apostolic writings indirectly attest the authenticity of the canonical Epistles (see Ullmann in *Heidelberg. Jahrb.*, 1823).

IX. BIBLIOGRAPHY.—Literature covering *both* 1 and 2 Cor. will be noticed at the close of the next article. Few have treated of 1 Cor. singly: of the Fathers none; of the Reformers only Peter Martyr [Vermigli], 1551, and Melanchthon, 1561: the latter includes some chapters of 2 Cor. Crell (Socinian), 1635; John Lightfoot, 1664; Sahl, 1778; F. A. W. Krause, 1791; Heydenreich, 1825–27. All these are in Latin: their full titles will be found in Meyer's Preface to 1 Cor. English: John Colet, tr. and ed. by J. H. Lupton, Bell and Daldy, 1874; T. T. Shore in Ellicott's *Comm.* ii., Cassells; T. S. Evans in *Speaker's Comm.* iii., Murray, 1881,—excellent; T. C. Edwards, Hamilton and Adams, 1885; C. J. Ellicott, Longmans, 1887. German: Maier (Romish), Freiburg, 1857. Dutch: Til, Amsterdam, 1731. French: F. Godet, Neuchatel, 1886–1887 (Eng. tr., T. and T. Clark). On special portions: Vitringa on difficult passages, Franeq. 1784; Gratama on cap. vii., Groning. 1846; Gurlitt on cap. xi., Hamb. 1817; Hengel on cap. xv., Silvae Ducis, 1851: all four in Latin. On the Factions: Pott, *De sectis Eccl. Cor.*, Gott. 1824; Baur, *Tüb. Zeitschr.*, 1831 (the opening chapter of the Tübingen theory), 1836; Jaeger, *Br. P. n. Kor. aus d. Gesichtsp. d. vier Parth.*, Tüb. 1838; Schenkel, *De Eccl. Cor. factionibus turbata*, Basil. 1838; Kniewel, *Eccl. Cor. dissensiones*, Gedan. 1841; Becker, *Parth. in d. Gem. z. Kor.*, Altona, 1842; Räbiger, *Untersuchungen über d. Br. an d. Kor.*, Breslau, 1847;—Beyschlag, *De Eccl. Cor. factione Christiana*, Hal. 1861; *Stud. u. Krit.*, 1865, p. 217; 1871, p. 635; *Zeitschr. f. wissensch. Theol.*, 1864, p. 155; 1865, p. 241; 1869, p. 398; 1871, p. 112; 1872, p. 200;—Schaff, *Hist. of Apost. Church*, Edinb. 1854, pp. 285–291. On the Tongues: Hilgenfeld, *Glossolalie in d. alt. Kirche*, Leipz. 1850; Reuss, *La Glossolalie, chapitre de psychologie évangélique* in *Strassb. Revue de Théol.* 1851; Rossteuscher (Irvingite), *Gabe d. Sprachen im apost. Zeit.*, Marburg, 1855; Maier, *Glossolalie des apost. Zeit.*, Freiburg, 1855;—Articles in *Stud. u. Krit.* by Bleek, 1829, 1830; by Kling, 1839; by Wieseler, 1838, 1860; in *Dict. of Bible*, 1st ed., by Plumptre;—Notes in Schaff, *Church Hist.* 2nd ed. i. 234–242. In the *Expositor*, 1st Series, i. 142, 237, are dissertations on 1 Cor. vi. 1–7, vii.; in iii. 355 on 1 Cor. v. 1–5, 13; in x. 321 on 1 Cor. vii. 14; in xi. 20 on 1 Cor. xi. 10: in 2nd Series, viii. 241, on 1 Cor. x. 21; in viii. 128 on 1 Cor. xv.: also Godet in 3rd Series, 1885. In W. Sewell's *Microscope of N. T.*, Rivingtons, 1878, are notes on 1 Cor. vi. 12, xv. 29, 30. In Field's *Otium Norvicense*, iii., Oxford, 1881, pp. 101–111, are valuable notes on ii. 2, 3, iii. 5, iv. 6, 11, v. 1, vi. 4, 7, 11, 15, vii. 16, ix. 27, x. 13, xi. 22, xiii. 5, 7, xiv. 8, xv. 8, xvi. 22. [A. P.]

CORINTHIANS, SECOND EPISTLE TO THE, is the first chapter in Ecclesiastical Biography, as 1 Cor. is the first in Ecclesiastical History. It is in part the Apostle's autobiography, the *Apologia pro vitâ suâ*. For many details of his life it is our only source of information; and in all respects is most important for giving insight into his character and mode of working. In no other letter are the traces of conflicting emotions more evident: on none is the strength of his character, both in its tenderness and its sternness, impressed more clearly. Love and thankfulness gain the upper hand in the first half; indignation and severity in the second. Of the three episodes in his conflict with Judaizing opponents we have here the first. In 2 Cor. x.–xii. 10 he asserts his full apostolic authority. In Galatians he declares that Gentiles have no need of circumcision. In Romans he shows that Jew and Gentile alike have need of faith to be saved.

I. The AUTHENTICITY of 2 Cor. is as impregnable as that of 1 Cor., which reflects much of its strength upon its companion. But the independent evidence is ample.

External.—The apparent reminiscences in Clement of Rome, Ignatius, and Hermas cannot be relied upon; and Polycarp vi. 1 may come direct from Prov. iii. 4 rather than through 2 Cor. viii. 21. But Irenaeus quotes 2 Cor. repeatedly, and several times by name: *Apostolus ait in epistola secunda ad Corinthios* (IV. xxviii. 3); *In secunda quae est ad Corinthios dicens* (v. iii. 1). Cp. IV. xxvi. 4, xxix. 1, xxxvi. 6; v. xiii. 4. See Werner, *Der Paulinismus des Irenaeus*, Leipzig, 1889. He quotes from chaps. ii., iii., iv., v., xiii. Athenagoras (*de Res. Mort.* xviii.) quotes part of v. 10. Theophilus of Antioch shows knowledge of it. Clement of Alexandria quotes it more than forty times, and from every chapter, excepting i. and ix. Tertullian (*adv. Marc.* xi. xii.) runs through it, and elsewhere quotes it over seventy times: see esp. *de Pud.* xiii. Cyprian quotes from every chapter excepting i. and x. Of heretical writers Basilides knew it, and Marcion admitted it to his mutilated Canon. It is contained in the Muratorian Fragment.

Internal Evidence is equally strong, whether we consider the characteristic energy and tenderness, or the harmonies with the Acts and the other Epistles, esp. 1 Cor. The following coincidences will repay study: 2 Cor. ii. 13 with 1 Cor. xvi. 5 and Acts xx. 1; 2 Cor. i. 8 with Acts xix. 30; 2 Cor. i. 19 with Acts xviii. 5; 2 Cor. xi. 25 with Acts xiv. 19.

The *Integrity* of the Epistle has been assailed, but on very insufficient grounds. All that is required to account for the difference of tone in different parts is the reasonable supposition that it was not all written at one sitting, and possibly not all at one place. It may have been composed in sections, as St. Paul journeyed towards Corinth. Fresh news may have influenced him and changed the affection of the first part (i.–viii.) into the sternness of the last (xi.–xiii.). Or he began by thinking of the Corinthians, who as a Church were dutiful to him, and passed on to address the Judaizing minority and their leaders, who slandered and resisted him. Those who deny the integrity are by no means agreed as to how the Epistle is to be dissected. Semler and Weisse divide it into three letters. Weber and Hausrath into two. Emmerling and Ewald regard vi. 14–vii. 1 as an after-insertion by St. Paul or some one else. See Reuss, *Hist. of the Sacred Scriptures of N. T.*, Eng. tr., p. 94. MSS.

and Versions lend no support to these disintegrating views. Irenaeus quotes from ix. 15, 16 and xiii. 7–9 as *secunda ad Corinthios* (IV. ch. xxviii. 3; v. ch. iii. 1). Tertullian and Clement make no distinction.

II. The PLACE and TIME can be fixed within narrow limits. St. Paul was in *Macedonia* (viii. 1; ix. 2); but that he was at Philippi, as stated in the ancient foot-note (B, Peshitto), cannot be determined. From viii. 1–5 we should infer that he was leaving Macedonia for Greece rather than entering it from Asia. He left Ephesus about Pentecost (1 Cor. xvi. 8), probably A.D. 57; went to Troas, where he hoped to meet Titus with news from Corinth; and after waiting in vain for him went on to Macedonia (ii. 12, 13), where Titus met him (vii. 5, 6). For all this we must allow several months, but not more; for the letter was evidently written soon after the meeting with Titus, and was sent to Corinth by him (viii. 6). Hence the latter part of a year, which is probably A.D. 57, is the date of this Epistle.

III. The OCCASION is the reception of news from Corinth, especially as to the way in which the former letter had been received. Did this news come exclusively from Titus? Probably Timothy, who left Ephesus before 1 Cor. was written (iv. 17), and is again with St. Paul when he writes 2 Cor. (i. 1), had brought some information. St. Paul expected that 1 Cor. would reach Corinth before Timothy (xvi. 10). Yet nothing is said in 2 Cor. about news brought by him. Hence four hypotheses. 1. Timothy may have returned to the Apostle without going to Corinth at all. This is very improbable. In that case St. Paul would have explained Timothy's non-appearance; all the more so as the hostile party at Corinth would have made capital out of it (i. 17). 2. Between our two Epistles St. Paul may have sent a letter of stern reproof, in which were contained his comments on the news brought by Timothy. This is gratuitous. Such passages as 1 Cor. iii. 1–3; iv. 7, 8, 18, 19; v. 1, 2; vi. 1, 8–10 are quite severe enough to explain St. Paul's anxiety about their effect; and his silence about Timothy's report can be better explained. 3. Timothy may have left Corinth *before* 1 Cor. arrived. 4. More probably it arrived before he left, and the news brought by him about his reception is not mentioned in 2 Cor. because (*α*) he is joint-writer of the letter (i. 1), and (*β*) the news brought by Titus was more pressing.

IV. The CONTENTS are not quite so varied as those of the longer Epistle, but the changes of subject are even more abrupt. After the usual *Salutation* and *Thanksgiving* (i. 1–11), he discusses the *News brought by Titus* (i. 12–vii. 16). Secondly, the *Collection for the Churches in Judaea* (viii. 1–ix. 15), about which he was most anxious, because (*a*) it was a means of uniting Jewish and Gentile Christians, and (*b*) it proved to the Jewish Christians how real was his union with them, in spite of his dissent from their views. Thirdly, *his Apostolical Authority* (x.–xii. 13), followed by farewell *Warning* and *Blessing* (xii. 14–xiii. 13). The benediction is more full than in any other letter, and from the earliest times has been used in the service of the Church (*Apost. Const.* VIII. chs. v. 5; xii. 3). There are various digressions, of which the most important is the comparison of *the Minister of the O. T. and the Minister of the N. T.* (iii.), and the most abrupt that on *Intercourse with Heathen* (vi. 14–vii. 1).

The key-note of the first part is "comfort in affliction:" παράκλησις occurs eleven times and θλῖψις nine times in i.–ix.; neither of them in x.–xiii. The key-note of the latter part is "boasting in weakness:" καυχᾶσθαι occurs seventeen times, ἀσθενεῖν seven and ἀσθένεια six times, in x.–xiii.; καυχᾶσθαι thrice, the others not at all, in i.–ix.

The Epistle contains some special *difficulties*. *a.* The translation and meaning of iii. 18: *b.* of v. 15: *c.* οἱ ὑπερλίαν ἀπόστολοι (xi. 5; xii. 11). *d.* The allusion in xi. 14. *e.* The "revelation" in xii. 2–4. *f.* The σκόλοψ τῇ σαρκί (xii. 7), for which see Lightfoot, *Galatians*, pp. 186–191. *g.* The number of St. Paul's visits to Corinth. Only the last can be noticed here. *g.* That St. Paul was *thrice* in Corinth, twice before writing 1 and 2 Cor. and once afterwards, is clear from the following passages. (1) τρίτον ἐλθεῖν in xii. 14 and τρίτον ἔρχομαι in xiii. 1. (2) ἐν λύπῃ ἐλθεῖν in ii. 1 cannot refer to his first visit, which was full of joy and success. There must have been a sad visit since then; and to this fact ταπεινώσῃ με in xii. 21 also points. (3) ὡς παρὼν τὸ δεύτερον in xiii. 2 means "as *I did* when I was present the second time." (4) 1 Cor. xvi. 7 seems to imply a previous *short* visit: "I do not wish to hurry away again at once, *as I did before*." If so, this cannot refer to the first visit, which lasted eighteen months (Acts xviii. 11). This second and sad and probably short visit would be made during the three years spent mainly at Ephesus. The silence of the Acts respecting this visit presents no difficulty when we remember how few of the events enumerated in 2 Cor. xi. 23–27 are recorded by St. Luke.

V. The STYLE of this Epistle has not been so universally admired as that of the First. The Greek is hard. Both narrative and sentences are often involved and broken. There is throughout a want of ease and smoothness. The thoughts, in the main as noble as in the earlier letter, are less beautifully expressed. There are no passages of such lofty eloquence as 1 Cor. xiii. and xv. The oratory is powerful, not because of the language, but in spite of it. The intensity of the conflicting feelings under which it was written has shattered rhythm and arrangement. But it leaves an impression of reality and authority which more studied diction might have weakened. One feels in every sentence that the writer is speaking straight from his heart, that heart on which "Corinth" is inscribed (iii. 2; vii. 3). In spite of the joy which pervades the first half, there are signs that the letter was written when he was suffering much from his chronic malady. He feels under "sentence of death" (i. 9; iv. 10–12, 16; v. 4), and is fighting against intense depression (i. 6; iv. 8, 9; v. 2; vii. 4).

The following words and phrases are *peculiar to this Epistle in the N. T.*: κάλυμμα (iii. 13, 14, 15, 16), ἀνακαλύπτειν (iii. 14, 18), φωτισμός (iv. 4, 6), σκῆνος (v. 1, 4), ἐπενδύεσθαι (v. 2, 4), ἐκδημεῖν and ἐνδημεῖν (v. 6, 8, 9), ἀγρυπνία (vi. 5; xi. 27), ἁγνότης (vi. 6 [xi. 3]), ἀπὸ πέρυσι (viii. 10; ix. 2), συμπέμπειν (viii. 18, 22),

προσαναπληροῦν (ix. 12; xi. 9), εἰς τὰ ἄμετρα (x. 13, 15), ὑπερλίαν (xi. 5; xii. 11), καταναρκᾶν (xi. 9; xii. 13, 14), προαμαρτάνειν (xii. 21; xiii. 2). The number of ἅπαξ λεγόμενα is large: among them are εὐχαριστεῖσθαι (i. 11), καπηλεύειν (ii. 17), συστατικός (iii. 1), παλαιὰ διαθήκη (iii. 14), κατοπτρίζεσθαι (iii. 18), ὁ θεὸς τοῦ αἰῶνος τούτου (iv. 4), ὁ ἔξω ἡμῶν ἄνθρωπος (iv. 16), βελίαρ (vi. 15), μολυσμός (vii. 1), κατὰ βάθους (viii. 2), προκαταρτίζειν (ix. 5), ὀχύρωμα (x. 4), ψευδαπόστολος (xi. 13), ἄγγελος φωτός (xi. 14), ἐθνάρχης (xi. 32), σαργάνη (xi. 33), τρίτος οὐρανός (xii. 2), σκόλοψ (xii. 7), ἄγγελος σατανᾶ (xii. 7).

There are *twenty or more quotations from the O. T.*, of which nine are given as such; and ten or twelve books are quoted: Genesis, Exodus, Leviticus, Deuteronomy, 2 Samuel, Psalms, Proverbs, Isaiah, Jeremiah, Ezekiel, Hosea, Amos; but the citations from the last three occur in places where the quotation is compound, or where the precise source is uncertain: iii. 3 from Ex. xxxi. 18, xxxiv. 1; Prov. iii. 3, vii. 3; Jer. xxxi. 33; Ezek. xi. 19, xxxvi. 26: vi. 16 from Lev. xxvi. 11; Ezek. xxvii. 27: vi. 17 from Is. lii. 11; Jer. li. 45; Ezek. xx. 41: vi. 18 from 2 Sam. vii. 8, 14; Hos. i. 10; Is. xliii. 6; Amos iv. 13: and ix. 10 from Is. lv. 10; Hos. x. 12. In six cases (iv. 13; vi. 2; viii. 15; ix. 9, 10; xi. 3) there is exact agreement with the LXX. In four (viii. 21; ix. 7; x. 17; xiii. 1) the agreement is close. Quotations which agree with the Hebrew against the LXX. are rare (vi. 17). Like most Hellenist Jews, St. Paul commonly used the LXX., though quite at home in the Hebrew text.

The following *various readings* are of special interest: i. 12, ἁγιότητι and ἁπλότητι: i. 18, ἔστιν and ἐγένετο: iii. 3, καρδίαις and καρδίας: iii. 13, τέλος and πρόσωπον: iii. 17, Westcott and Hort conjecture κύριον for Κυρίου: vii. 8, βλέπω, βλέπω γάρ, *videns* (βλέπων): x. 12, several: xi. 3, omission of καὶ τῆς ἁγνότητος: xi. 6, several: xii. 1, several, and punctuation: xii. 7, omission of διό, and punctuation.

For *figures of language* see the preceding article.

Two points of special interest are suggested by this Epistle. (1) The *personal appearance of the Apostle* is indicated as being so mean as to give a handle to his opponents (x. 10; cp. 1 Cor. ii. 3); and the "stake [thorn] in the flesh" (xii. 7) probably aggravated this. The descriptions of him in the *Acta Pauli et Theclae* (*c.* A.D. 200), the *Philopatris* of the Pseudo-Lucian (*c.* 350), John Malalas (*c.* 600), and Nicephorus Callisti (*c.* 1350), are quoted by Conybeare and Howson (chap. vii. *sub fin.*) and Farrar (ii. Excursus xi.). They all represent him as bald and with an aquiline nose, and most add that he stooped. (2) His *habit of teaching without payment* was evidently another handle for his enemies (xi. 7–12; cp. 1 Cor. ix. 18, x. 33). Gratuitous instruction was in accordance with the best Greek traditions (Plato, *Sophist*, 223, 224; Arist. *de Soph. El.* i.; Xen. *Mem.* I. vi. 13), which made it the mark of a Sophist to teach for pay. But just as the Sophists could retort that the philosophers did not dare to ask for money, because they knew that what they taught was worthless, so his opponents declared that St. Paul did not dare to take the wages of an Apostle (1 Thess. ii. 6; 2 Thess. iii. 8, 9), because he knew that he was not an Apostle.

VI. The BEARERS OF THE LETTER were Titus and two others, who may have been Trophimus and Tychicus. But "the brother whose praise in the Gospel is spread through all the churches" has also been conjectured to be Barnabas, Silas, Luke, Mark, or Erastus; and "our brother whom we have many times proved earnest in many things," to be Epaenetus, Apollos, Luke, Zenas, Sosthenes, or Timothy.

That the letter was in the main successful we infer (1) from the tranquil tone which pervades the letter to the Romans written from Corinth a few months later; (2) from the absence of information to the contrary. The Corinthian Church had its faults, but not outrageous ones, when Clement of Rome wrote to it *c.* A.D. 95. Hegesippus (*c.* 160) says that he found it continuing in the true faith, and was himself refreshed there in it (Eus. *H. E.* IV. xxii. 1, 2). And its Bishop Dionysius (*c.* 170) was so universally respected that heretics thought it worth while to garble his pastoral letters, in order to seem to have his sanction for their views (Eus. *H. E.* IV. xxiii. 12).

VII. BIBLIOGRAPHY.—Very few have treated 2 Cor. singly. Latin: Leun, Lemg. 1804; Emmerling, Lips. 1823; Scharling, Kopenh. 1840; Fritzsche, *De nonnullis locis*, Lips. 1824. English: Plumptre in Ellicott's *Comm.* ii., Cassells; Waite in *Speaker's Comm.* iii., Murray, 1881; F. W. Farrar in *Pulpit Comm.*, Kegan Paul, 1883. German: Burger, Erlang. 1860; Klöpper, *Untersuchungen*, Götting. 1869; *Commentar.*, Berl. 1874. Commentaries on 1 and 2 Cor. together abound. Latin: Major [Mayer], Viteb. 1558; Musculus [Meusslin], Basil. 1559; Melanchthon, Viteb. 1561 (2 Cor. unfinished); Rollock, Herborn. 1600; Stevart, Ingolst. 1608; Contzen (Jesuit), Colon. 1631; Sclater, Oxon. 1633; Cocceius [Koch], Amst. 1701; Semler, Hal. 1770–6; Storr (*Old* Tübingen School), Tub. 1788; Pott, Gotting. 1826. English: Hodge (Calvinist), New York, 1857–60; F. W. Robertson Smith, 5th ed. 1867; Stanley, Murray, 4th ed. 1876; Lias, Camb. 1879; D. Brown (Free Ch.) in Schaff's *Comm.* iii., Edinb. 1882; Beet, Hodder, 2nd ed. 1884. German: Baumgarten, Halle, 1761; Mosheim, Altona, 1762; Moldenhauer, Hamb. 1771–2; Schulze, Halle, 1784–5; Zachariae, Götting. 1784–5; Göpfert, Leipz. 1788; Morus, Leipz. 1794; J. Flatt (*Old* Tübingen School), Tüb. 1827; Billroth, Leipz. 1833, Eng. tr. Edinb. 1837–8; Rückert, Leipz. 1836–7; Jaeger, Tüb. 1838; Osiander, Stuttg. 1849–58; Neander, Berl. 1859; Kling, Bielefeld, 1861, Eng. tr. Edinb. and New York, 1869; Heinrici, Berl., 1 Cor. 1880, 2 Cor. 1887. French: Manoury, Paris, 1879. Still more abundant are commentaries on all St. Paul's Epistles. Patristic and scholastic—Greek: Chrysostom (the Homilies on 1 and 2 Cor. are "among the most perfect specimens of his mind and teaching"); Theodoret; Theophylact;—Latin: Ambrosiaster (important for textual criticism); Pelagius (in Jerome); Primasius; Cassiodorus; Bede (mainly a *catena* from Augustine); Sedulius Scotus; Rabanus Maurus; Haimo of Halberstadt; Remigius of Auxerre; Lanfranc; Anselm; Bruno (Founder of the Carthusians); Peter Lombard; Aquinas. Modern Latin: Faber Stapulensis

Belsham (Unitarian), Lond. 1822; Slade, Lond. 1824; Bp. Shuttleworth, Oxf. 1829; Burton, Oxf. 1831; T. W. Peile, Rivingtons, 1853; Alford, Rivingtons, 6th ed. 1871; Bp. C. Wordsworth, Rivingtons, 4th ed. 1866; Gloag, Edinb. 1874; J. H. Blunt, Rivingtons, 1882. German: Olshausen, Königsb. 1840, Eng. tr. Edinb. 1855, New York, 1858; De Wette, Leipz. 3rd ed. 1855; Ewald, Götting. 1857; H. A. W. Meyer, Götting. 5th ed. 1870, Eng. tr. Edinb. 1877, rewritten by Henrici, Götting. 1887; Besser, Halle, 1862–3; Hofmann, Nördling. 1874–7. French: Reuss. In Keble's *Studia Sacra*, Parker, 1877, full analyses of the Epp. In the *Expositor*, 1st Series, i. 267, are notes on 2 Cor. v. 10; in iii. 355 on 2 Cor. ii. 5–11 and vii. 8–13; in iii. 174 on 2 Cor. xii. 9; in x. 403 on 2 Cor. ii. 14: in 2nd Series, vii. 416, on 2 Cor. v. 5; in viii. 92 on 2 Cor. x. xi. In Field's *Otium Norvicense*, Oxf. 1881, pp. 111–115, are valuable notes on ii. 14, iii. 14, v. 1, xi. 28, xii. 7. [A. P.]

CORMORANT. The representative in the A. V. of the Hebrew words *kâath* (קָאַת) and *shâlâc* (שָׁלָךְ), and of the latter in the R. V. As to the former, see PELICAN.

Shâlâc (*καταράκτης*; *mergulus*; *nycticorax*?) occurs only as the name of an unclean bird in Lev. xi. 17; Deut. xiv. 17. The word has been variously rendered (see Bochart, *Hieroz.* iii. 24), but some sea-bird is generally understood to be denoted by it. There is some difficulty in identifying the *καταράκτης* of the LXX.; but we may dismiss the Solan goose (*Sula bassana*) advocated by Oedman, Michaelis, Rosenmüller, and others, as it exists neither in the Red Sea nor the Eastern Mediterranean. As little claim has the Caspian Tern (*Sterna Caspia*) suggested by Col. H. Smith, which is only a rare straggler on the Syrian coast in winter. Still more impossible is the *catarrhactes*, or skua of modern naturalists, a native of our far northern seas. Our translators (A. V. and R. V.) were probably not far wrong in thus rendering "cormorant" (so MV.[11]). The common cormorant (*Phalacrocorax carbo*) is very plentiful on the coast, on the Sea of Galilee, and all down the Jordan. It comes up all the streams on the coast, while on these latter, as on the Litany and the Kishon, another species, the pygmy cormorant (*Phalacrocorax pygmaeus*), is common. Vast colonies of the latter breed in the Lake of Antioch. The common cormorant and a third species are equally abundant in Egypt. These birds are too well known to require further description. [H. B. T.]

CORN (בָּר). The most common kinds were wheat, חִטָּה; barley, שְׂעֹרָה; spelt, כֻּסֶּמֶת (R. V.; wrongly rendered "rye" by A. V. in Ex. ix. 32 and Is. xxviii. 25, and in Ezek. iv. 9, "fitches," marg. or, *spelt*), or in plur. form כֻּסְּמִים; and millet, דֹּחַן: oats are mentioned only by rabbinical writers. The word שׁוֹרָה, rendered "principal," as an epithet of *wheat*, in the A. V. of Is. xxviii. 25, is now usually taken (with R. V.) to mean "in rows." [AGRICULTURE.] Corn crops are still reckoned at twentyfold what was sown, and were anciently much more. "Seven ears on one stalk" (Gen. xli. 22) is no unusual phenomenon in Egypt at this day. The many-eared stalk is also common in the wheat of Palestine, and it is of course of the bearded kind. The "heap of wheat set about with *lilies*" (which probably grew in the field together with it) may allude to a custom of so decorating the sheaves (Cant. vii. 2). Wheat (see 2 Sam. iv. 6) was stored in the house for domestic purposes—the "midst of the house" meaning the part more retired than the common chamber where the guests were accommodated. It is at present often kept in a dry well, and perhaps the "ground corn" of 2 Sam. xvii. 19 was meant to imply that the well was so used. From Solomon's time (2 Ch. ii. 10, 15), *i.e.* as agriculture became developed under a settled government, Palestine was a corn-exporting country, and her grain was largely taken by her commercial neighbour Tyre (Ezek. xxvii. 17; cp. Amos viii. 5); and continued to be so much later (Acts xii. 20). "Plenty of corn" was part of Jacob's blessing (Gen. xxvii. 28; cp. Ps. lxv. 13). The "storehouses" mentioned in 2 Ch. xxxii. 28 as built by Hezekiah, were, perhaps, built in consequence of the havoc made by the Assyrian armies (cp. 2 K. xix. 29); without such protection the country in its exhausted state would have been at the mercy of the desert marauders.

Grain crops were liable to יֵרָקוֹן, "mildew," and שִׁדָּפוֹן, "blasting" (see 1 K. viii. 37), as well as of course to fire by accident or malice (Ex. xxii. 6; Judg. xv. 5); see further under AGRICULTURE. Some good general remarks will be found in Saalschutz, *Archäol. der Hebr.* c. 10, §§ 6, 11, 12. [H. H.]

CORNELIUS (*Κορνήλιος*; *Cornelius*), a centurion stationed at Caesarea, and belonging

[a] This seems the general word for corn as it grows. An ear is שִׁבֹּלֶת; standing corn is קָמָה; the word for grain in its final state as fit for food is בָּר, apparently from the same word, בֹּר, *pure*: comp. the Arab. بُرّ, *wheat*, and بَرّ, *pure*, i.e. as sifted. שֶׁבֶר (from שָׁבַר, *to break*) means "grist." "Parched corn," useful for provisions, as not needing cookery, is קָלִי and קָלִיא; cp. the Arab. قَلْي, *to fry*. "Pounded wheat," רִיפוֹת, 2 Sam. xvii. 19; Prov. xxvii. 22.

to the Italian cohort [ARMY: II. ROMAN]. Cornelius is an important character, as being one of the first to receive Christian Baptism without circumcision, and apparently the first uncircumcised convert who was received (with his household) into full Christian fellowship. It is noticeable in this regard that the accusation against St. Peter (Acts xi. 3) was not for baptizing Cornelius, but for eating with him. And it is probable that the eunuch already baptized by Philip was uncircumcised (De Wette in loco). However, the coincident Divine visions granted to Cornelius and St. Peter, the prominence given to the story, the employment of St. Peter in the matter, and his reference to it (Acts xv. 7, 8), all show that the event was an epoch in the history of the Church. But although Cornelius was certainly uncircumcised, and therefore not a full proselyte, he is nevertheless represented as in a near and friendly relation to Judaism ("well reported of by all the nation of the Jews," Acts x. 22). Besides the circumcised proselytes (such as Nicolas of Antioch, Acts vi. 5), there was another class of proselytes described as "fearers" or "worshippers of God" (*φοβούμενοι* or *σεβόμενοι τὸν Θεόν*. See Schürer, *Jewish People*, § 31, who in his second edition controverts his own previous view that these "fearers of God" correspond to the "sojourner proselytes" [תּוֹשָׁב, Lev. xxv. 35], or in later Rabbinical language to the "proselytes of the gate." See, however, Hamburger, *RE. Talmud.*, art. *Proselyten*). Authorities differ as to the requirements made of these persons. But they were liberally dealt with, and the result of this liberality was the attachment to Judaism in a loose way of vast multitudes of "half Jews." On their numbers, importance, and belief, see Hausrath, *Zeit. der Apost. I. Die Proselyten*, and Schürer, *Jewish People*, § 31. To the strictest section of these half-proselytes Cornelius belonged. It was from their ranks that the Christian Church was mainly recruited, and the importance of Cornelius is that he leads the way. The terms in which he is described (Acts x. 2) resemble those applied to his class throughout the Book of the Acts. No distinction can safely be drawn between "one that feared God" (Acts x. 2) and "one that worshipped God" (Acts xviii. 7), for in Acts xiii. the persons addressed by St. Paul as "Ye that fear God" (*v.* 16) are (in *v.* 43) described as devout proselytes. For the action of St. Peter in the matter of Cornelius, see PETER. The centurion's personal character appears in the narrative as marked by devotion (Acts x. 2, 22), zeal for the welfare of others (x. 24), humility (x. 25), and teachableness (x. 33). The gift of the Holy Ghost in the case of Cornelius and his friends preceded Baptism and the laying on of hands, and formed St. Peter's justification for baptizing uncircumcised persons. Their hearts were cleansed by faith (Acts xv. 9), and they received the Spirit by their faith, not by circumcision (cp. Gal. iii. 2: "Received ye the Spirit by the works of the law or by the hearing of faith?").

According to Jerome (*adv. Jovin.* i. p. 301) Cornelius built a church at Caesarea. A later legend (*Menol. Graec.* i. 129) makes him Bishop of Scamandros, where he miraculously caused a temple to fall on his persecutors, and then delivered and converted them. [E. R. B.]

CORNER. The פֵּאָה, or "corner," *i.e.* of the field, was not allowed (Lev. xix. 9) to be wholly reaped. It was a right of the poor to carry off what was so left, and this was a part of the maintenance from the soil to which that class was entitled. Similarly the gleaning of fields and fruit trees [GLEANING], and the sheaf accidentally left on the ground, were secured to the poor and the stranger by the Law (xxiii. 22; Deut. xxiv. 19–21); so too the spontaneous produce of the Sabbatical year was left for the poor, and, so far as observed, would make it for them a year of plenty (Ex. xxiii. 11). To these provisions the words of Ps. lxviii. 10, 11, "Thou hast prepared of Thy goodness for the poor," in connexion with the words the "gracious rain upon Thine inheritance," just before, may perhaps refer. These seem to us, amidst the sharply-defined legal rights of which alone civilization is cognizant, loose and inadequate provisions for the relief of the poor. But custom and common law had probably ensured their observance (Job xxiv. 10) previously to the Mosaic enactment, and continued for a long but indefinite time to give practical force to the statute. Nor were the "poor," to whom appertained the right, the vague class of sufferers whom we understand by the term. On the principles of the Mosaic polity every Hebrew family had a hold on a certain fixed estate, and could by no ordinary and casual calamity be wholly beggared. Hence its indigent members had the claims of kindred on the "corners," &c., of the field which their landed brethren reaped. Similarly the "stranger" was a recognised dependant; "within thy gates" being the description expressive of his sharing, though not by any tie of blood, the domestic claim; but unable to hold any land which formed part of the heritage of Israel. There was thus a further security for the maintenance of the right in its definite and ascertainable character. Neither do we, in the earlier period of the Hebrew polity, closely detailed as its social features are, discover any general traces of agrarian distress and the unsafe condition of the country which results from it—such, for instance, as is proved by the banditti of the Herodian period. David, a popular leader (1 Sam. xviii. 30; xxi. 11), could only muster from four to six hundred men out of all Judah, though "every one that was in distress, in debt, and every one that was discontented," came unto him (1 Sam. xxii. 2; xxv. 13). Further, the position of the Levites, who had themselves a similar claim on the produce of the land, but no possession in its soil, would secure their influence as expounders, teachers, and in part administrators of the Law, in favour of such a claim. In the later period of the Prophets their constant complaints concerning the defrauding of the poor (Is. x. 2; Ezek. xviii. 12, 22, 29; Amos ii. 6, v. 11, viii. 6[a])

[a] The two latter passages, speaking of "taking exactions of wheat" from the poor, and of selling "the refuse (מֻפָּל) of the wheat," *i.e.* perhaps the gleaning, seem to point to some special evasion of the harvest laws.

seem to show that such laws had lost their practical force. Still later, under the Scribes, minute legislation fixed one-sixtieth as the portion of a field which was to be left for the legal "corner"; but provided also (which seems hardly consistent) that two fields should not be so joined as to leave one corner only where two should fairly be reckoned. The proportion being thus fixed, all the grain might be reaped, and enough to satisfy the regulation was subsequently separated from the whole crop. This "corner" was, like the gleaning, tithe-free. Certain fruit trees—*e.g.* nuts, pomegranates, vines, and olives—were deemed liable to the law of "the corner." Maimonides indeed lays down the principle (*Constitutiones de donis pauperum*, cap. ii. 1) that whatever crop or growth is fit for food, is kept, gathered all at once, and carried into store, is liable to that law. A Gentile holding land in Palestine was not deemed liable to the obligation. As regards Jews an evasion seems to have been sanctioned as follows:—Whatever field was consecrated to the Temple and its services, was held exempt from the claim of the poor: an owner might thus consecrate it while the crop was on it, and then redeem it, when in the sheaf, to his own use. Thus the poor would lose the right to the "corner." This reminds us of the "Corban" (Mark vii. 11). For further information, see under AGRICULTURE.

The treatise *Peah*, in the Mishna, may likewise be consulted, especially ch. i. 2–6, ii. 4, 7, the above-quoted treatise of Maimonides, and a paper "On the Poor Laws of the Hebrews" by Dr. S. Louis, *PSBA.* 1883, p. 95. [H. H.]

CORNER-STONE (אֶבֶן פִּנָּה; λίθος γωνιαῖος, or ἀκρογωνιαῖος; *lapis angularis*; also רֹאשׁ פִּנָּה, Ps. cxviii. 22; κεφαλὴ γωνίας; *caput anguli*), a quoin or corner-stone, of great importance in binding together the sides of a building. Some of the corner-stones in the ancient work of the Temple-foundations are 17 or 19 feet long, and 7½ feet thick (Robinson, i. 286). Corner-stones are usually laid sideways and endways alternately, so that the end of one appears above or below the side-face of the next. At Nineveh the corners are sometimes formed of one angular stone (Layard, *Nin.* ii. 254). The expression in Ps. cxviii. 22 is by some understood to mean the coping or ridge, "coign of vantage," of a building; but as in any part a corner-stone must of necessity be of great importance, the phrase "corner-stone" is sometimes used to denote any principal person, as the princes of Egypt (Is. xix. 13), and is thus applied to our Lord, Who, having been once rejected, was afterwards set in the place of the highest honour (Is. xxviii. 16; Matt. xxi. 42; 1 Pet. ii. 6, 7; Grotius on Ps. cxviii. and Ephes. ii. 20; Harmer, *Obs.* ii. 356). [H. W. P.]

CORNET occurs in the A. V. of the Bible for the first time in Exod. xix. 13, where it is given in the margin as the equivalent of *Yobel* (יובל). In 2 Sam. vi. 5 it is used as the translation of *Mena'ane'im* (מנענים) [CYMBALS]. It is found four times in the text of that Version as the equivalent of *Shophar* (שופר)—viz. 1 Ch. xv. 28, 2 Ch. xv. 14, Ps. xcviii. 6, and Hos. v. 8. It also stands four times for *Qarno* (קרנא) in Dan. iii. 5, 7, 10, and 15.

Cornet is closely related, as is known, to the Greek κέρας, but springs immediately from the Latin *cornu*. Both the Greek and Latin are, no doubt, derived from the Hebrew *Qeren* (קרן). This (*Qeren*) is the *genus*, *Yobel* and *Shophar* being two *species* of it; so that while every *Yobel* and *Shophar* are a *Qeren*, a *Qeren* is not necessarily a *Yobel* or a *Shophar*.

Cornet, as a mere musical instrument, has in the course of its development undergone so many changes (the material is now in most cases not even horn, but wood or metal) that, in the ordinary sense of the word, at present, its legitimate place is a *Dictionary of Music*, rather than a *Dictionary of the Bible*. In this article, however, the cornet will be treated in a politico-religious sense, *i.e.* as the equivalent of the practically synonymous terms *Yobel* and *Shophar*. As such, the cornet is the representative of the historical past of the Jewish people, of their religious present, and of their anxiously looked-for glorious future—the glorious future mediately of the whole human race.

I. *The historical past of the Jewish people.*

According to tradition, the horns of the ram which was caught in the thicket and offered by Abraham as a burnt offering instead of the intended human victim (Isaac; Gen. xxii. 13) were a distinct prefiguration of the part which the cornet, or ram's horn (*Shophar*), would later on play in the religious and political destinies of the children of Israel (Jacob), who sprang from Isaac and Abraham.

(1.) The *Shophar* sounded at the giving of the Law on Sinai (Ex. xix. 16, &c.), which was the consummation of the nation's deliverance from the material bondage in Egypt. The Law was to be to them the means of freeing themselves from the worst of all servitudes—sin (Ex. xx. 2, 3, 20, and elsewhere). There is no freedom except in the Law, and nobody is free except one who engages in the study and execution of the Law (*Qinyan Hattorah*, 2).*

(2.) The *Shophar* resounded every fifty years (in the year of Jubilee), when property sold "for ever" returned to its original owner or family, and every servant sold "for ever" to his master became absolutely free (Lev. xxv. 9, 10, 41).

(3.) The *Shophar* resounded and Jericho fell at its blast; the first city of the Holy Land which the Israelites had attacked and taken (Josh. vi. 20).

(4.) When Ehud had slain Eglon, Israel's ruthless oppressor for eighteen years, the defeat of Moab, which secured to Israel a peace of eighty years, was brought about by the sounding of the *Shophar* (Judg. iii. 12–30).

(5.) The *Shophar* played a most important part in the battle between Gideon and the Midianites (*do.*, vii. 19, 22).

(6.) When, after the death of the first king of Israel, the servants of the two rival houses threatened to annihilate one another, Joab at the solicitation of Abner stayed the internecine war by the blowing of the *Shophar* (2 Sam. ii. 28).

* See Taylor, *Sayings of the Jewish Fathers* (Cambridge, 1877, p. 114).

(7.) When the Two Tables of the Covenant were being removed to Zion, David and all the house of Israel brought up the Ark of the Lord containing them, with shouting and the sound of the *Shophar* (2 Sam. vi. 15; 1 Ch. xv. 28).

(8.) When, after the unsuccessful rebellion of Absalom, which was to be inaugurated by the *Shophar* (2 Sam. xv. 10), there arose a more formidable enemy against David—Sheba ben Bichri—both the rebel's temporary success and his final defeat were proclaimed by the *Shophar* (*do.*, xx. 1, 22).

(9.) When David's divinely-appointed successor—Solomon—ascended the throne, in opposition to his usurping brother Adonijah, all the people shouted, "May King Solomon live!" amidst the sounding of the *Shophar* (1 Kings i. 39).

(10.) When great and public calamities (defeat by the enemy, want of rain, famine, pestilence, &c.) befell the inhabitants of any part of Palestine, a fast and an assembly were proclaimed, and in the ceremonies connected therewith a solemn part was the sounding of the *Shophar* (Joel ii. 1–17; Amos iii. 6; Mishnah *Ta'anith*, ii. iii.).

(11.) When the overthrow of the Jewish polity is described, the catastrophe is given by Zephaniah (i. 16) in the words, "A day of *Shophar* and alarm;" and by Jeremiah (iv. 19) as, "Thou hast heard, O my soul, the sound of the *Shophar*, the alarm of war."

(12.) The rebuilding of the feeble walls of Jerusalem (destined one day to become mighty fortifications), at which every one worked with one hand whilst holding a weapon with the other, was only successfully protected by Nehemiah's sentinel calling together, when necessary, the separated workmen by the sound of the *Shophar* (Neh. iv. 11–14, A. V. 17–20).

II. *The religious present of the Jews.*

(1.) The Rabbanites (in contradistinction to the so-called Scriptural Jews) sound the cornet on the first and second days of the seventh month. It is true that in the whole of the Hebrew Scriptures is not found the distinct mention of a *Shophar* for the purpose of celebrating that day (or those days) as day (or days) of sounding the alarm. On the contrary, from Num. x. 10 it would appear that the alarm was to be sounded on the first day of the seventh month, even as on other solemn occasions, by the trumpets of silver mentioned (v. 2). Yet not only is there a sure and absolutely trustworthy tradition that in the second Temple there was a *Shophar* sounded (Mishnah *Rosh Hasshanah*, iii. 3) besides the silver trumpets (חֲצֹצְרוֹת), which stood in connexion with the offerings of the sacrifices on new moons, &c., but there can be little doubt that this practice was observed in the first Temple also. It is certainly a mistake to think that Joel (ii. 15) refers to blowing the *Shophar* on New Year,[b] that the fast spoken of there alluded to the Day of Atonement, and that the solemn assembly referred to the Festival mentioned in Lev. xxiii. 36. It is impossible that this should be the meaning of the verse. In the first instance the absence of the definite article (*Shophar*) precludes the possibility of such an interpretation, and, more than this, the whole context shows that it refers to the calamity of the locusts. The Prophet, however, could not have used the figure he employs if the *Shophar* had not sounded on such days. But we have absolute proofs that the first day of the seventh month was not treated as an ordinary new moon. We find that this day is one of the Seven Holy Convocations, &c., the name of which (New Year) people, totally and absolutely ignorant of the spirit of the Bible, say is a later invention. A few words will suffice. It is true that Moses commanded *Nisan* or *Abib* to be observed as the first month of the religious year. But there must have been a New Year apart from that observed in his days as a religious one. This New Year in the times of Moses coincided with the beginning of the natural year. For what else does he mean by the expressions בצאת השנה (Ex. xxiii. 16) and תקופת השנה (*do.*, xxxiv. 22)? What else did and could he mean by appointing the first of the seventh month as a Day of Memorial and Sounding the Alarm, the tenth day of that month as the Day of Atonement, the fifteenth, &c., as the Feast of Tabernacles, and the twenty-second thereof as the Day of Solemn Assembly?

(2.) The *Shophar* is also sounded at the going out of the Day of Atonement. This is not prescribed by the letter of the Bible; but if not by the letter, it is certainly prescribed by the spirit. For it is the proclamation of freedom from the yoke of sin, the wages of which is death! (cp. I. (2) above.)

(3.) The same is the case as regards the Seventh Day of Tabernacles, which day was already observed with special solemnity, cabbalistic rites, and mystic invocations in the times of the second Temple (Mishnah, *Sukkah*, iv. 5). There can be no doubt whatever that these ceremonies were accompanied by the sounding of the *Shophar*. The Sepharadic Jews preserve this practice still, although they do not sound the *Shophar* on that day as Sepharadic, but as cabbalistic, Jews, since they, if not necessarily cabbalists themselves, are the disciples and followers of cabbalistic teachers.

(4.) All Jews, however, Sepharadic or Ashkenazic, cabbalistic or non-cabbalistic, sound the *Shophar* every morning of the week-days of the month of *Elul* (the month preceding New Year); and all the Sepharadim, and some of the Ashkenazim, as disciples of cabbalists, sound it in the evening too. This custom is not very old; it is not even known to the Talmuds and Midrashim.

(5.) The sounding of the *Shophar* on occasions of full and extreme Excommunication is to heighten the solemnity (*Pireqe* of Rabbi Eli'ezer, cap. xxxviii.).

(6.) It is customary among the Sepharadic Jews to sound the *Shophar* on occasion of the burial of a *Chakham* (Chief Rabbi or Rabbi).

[b] It is commonly held that Rab Se'adyah Gaon in his *Siddur* gave ten reasons for sounding the *Shophar* on New Year; but this is a mistake. The writer of these lines inspected the Bodleian MS. (Uri 261), and found no traces of this treatise. Cp. *Encycl. Brit.*[9] xxi. 121, note 4. That such a little treatise was known and ascribed in the 14th century to a famous Rab Se'adyah is certainly true; but this must have been another Rab Se'adyah (probably the commentator on Daniel).

III. *The anxiously looked-for glorious future of the Jews, and mediately the glorious future of the whole human race.*

These promises are twofold: to the living and to the dead.

(1.) The Prophets do not merely promise an ingathering of the dispersed of Israel from any of the nations whither they had been driven, but, along with it, a regeneration of the whole human race. This glorious future is closely connected with the sounding of the *Shophar*. The Prophet whose prophecies are all consolation, Isaiah of the first Temple, says (xxvii. 13), "On that day a great *Shophar* shall be sounded," &c. The same says the prophet who is all Messianic, Zechariah of the second[c] Temple (ix. 14), "And the eternal God will blow in the *Shophar*."

(2.) But the day of the resurrection of the dead, the day of judgment, the day of awarding salvation or condemnation, will be marked by the sounding of the *Shophar*. This idea is not only an old tradition current among the Jews (Josephus, *Hades*, 5); but is distinctly embodied in the Greek Scriptures, which fact in itself would be sufficient evidence that it was Jewish. For Paul, the Apostle to the Gentiles, a "Hebrew of the Hebrews," speaks in his First Epistle to the Corinthians (xv. 52) of the "last trump," by which he, of course, means the last sound of the *Shophar*. But the Hebrew Scriptures themselves, as far as they teach resurrection, intimate thus much, though only by hints (Is. xviii. 3[d]). Cp. the Targum (*do.*, xlii. 11), and the two sublime poetical pieces[e] attached to the "*Shopharoth*" in the Ashkenazic Ritual. [S. M. S.-S.]

COS (Κῶς, now *Stanchio* or *Stanko*). This small island has several interesting points of connexion with the Jews. It is specified, in the edict which resulted from the communications of Simon Maccabaeus with Rome, as one of the places which contained Jewish residents (1 Macc. xv. 23). Josephus, quoting Strabo, mentions that the Jews had a great amount of treasure stored there during the Mithridatic war (Joseph. *Ant.* xiv. 7, § 2). From the same source we learn that Julius Caesar issued an edict in favour of the Jews of Cos (*ibid.* 10, § 15). Herod the Great conferred many favours on the island (Joseph. *B. J.* i. 21, § 11); and an inscription in Böckh (No. 2502) associates it with Herod the tetrarch. St. Paul, on the return from his third Missionary Journey, passed the night here, after sailing from MILETUS. The next day he went on to RHODES (Acts xxi. 1). The proximity of Cos to these two important places, and to CNIDUS, and its position at the entrance to the Archipelago from the east, made it an island of considerable consequence. It was celebrated for its light woven fabrics and for its wines,—also for a temple of Aesculapius, to which a school of physicians was attached, and which was virtually, from its votive models, a museum of anatomy and pathology. The Emperor Claudius bestowed upon Cos the privilege of a free state (Tac. *Ann.* xii. 61). The chief town (of the same name) was on the N.E., near a promontory called Scandarium; and perhaps it is to the town that reference is made in the Acts (*l. c.*). There is a monograph on Cos by Küster (*De Co Insula*, Halle, 1833), and a very useful paper on the subject by Col. Leake (in the *Trans. of the Royal Soc. of Literature*, vol. i., second series). An account of the island will be found in Clarke's *Travels*, vol. ii. pt. i. pp. 196–213, and vol. ii. pt. ii. pp. 321–333; but the best description is in Ross, *Reisen nach Kos, Halicarnassus, u. s. w.* (Halle, 1852), with which his *Reisen auf den Griech. Inseln* should be compared, vol. ii. (1843), pp. 86–92, vol. iii. (1845), pp. 126–139. Cp. also Rayet, *Mém. sur l'île de Kos*, Arch. des Miss. III. iii. p. 37 sq. (1876). [J. S. H.] [J. E. S.]

Tetradrachm of Cos (Phoenician ? talent). Obv., Head of young Hercules to right. Rev., KΩIoN / MoΣXIΩN, crab and bow in case, all within dotted square.

CO'SAM (Κωσάμ; *Cosan*, a name that occurs nowhere else either in the O. T. or N. T., and is of doubtful etymology), son of Elmodam, and fifth before Zorobabel, in the line of Joseph the husband of Mary, Luke iii. 28. [GENEALOGIES OF CHRIST.] [A. C. H.]

COTTON (כַּרְפַּס; κάρπασος, τὰ καρπάσινα, Esth. i. 6, where the Vulg. has *carbasini coloris*, as if a colour[a] [A. V. and R. V. text "green"],

[c] It is quite true that some modern critics, being led by the mention of Ephraim and other terms in it, assign this and several other chapters to an earlier Zechariah of the First Temple. But a single-minded and real critic will soon discover that the corruption is not in the text, but in the over-estimated and shallow criticisms upon the text, and that the mention of Ephraim and Philistine cities, &c., is no more out of place in a prophet of the early times of the Second Temple (Zechariah) than in a prophet of the Exile (Ezekiel). Moreover, the mention of Yavan, on the principle of the critics, would rather point to the Syro-Grecian times than to those of the First Temple.

[d] The verse before us was evidently translated by tradition: "All ye inmates of corruption (תבל = "putrefaction," from בלה, to fade, to rot; cp. *ibidem*, li. 6, where this verb is specially applied to the perishableness of the earth), and ye that dwell in the earth (*i.e.* the dead; cp. *ibidem*, xxvi. 19, where the very noun שכני occurs) will see it when a banner is lifted up on the mountains, and ye will hear it when a *Shophar* is sounded."

[e] It will have been seen from note [b], that it was a mistake to ascribe the Ten Reasons for sounding the *Shophar* on New Year to Rab Se'adyah, the Gaon (10th century), and that the author of these interesting paragraphs was a much later Rab Se'adyah (13th century). But the poetical pieces just mentioned, in which these Ten Reasons are embodied, are hundreds of years older than the Gaon.

[a] So חוּר, "white" in A. V., is probably not a colour, but a stuff, possibly silk: cp. Arab حرير, *hareer*, "silk." The סְדִינִין, "sheets," marg. *shirts*,

and not a material [R. V. marg. *cotton*], were intended). There is a doubt whether under שֵׁשׁ, *Shesh*, in the earlier, and בּוּץ, *Bûtz*, in the later books of the O. T., rendered in the A. V. by "white linen," "fine linen," &c., cotton may have been included as well. Both *Shesh* and *Bûtz* are said by Gesen. (*s. v.*) to be from roots signifying originally mere whiteness; a sense said also to inhere in the word בַּד (perhaps Arab. *abyad*, ابيد, "white"), used sometimes instead of and sometimes together with *Shesh* to mean the fabric. In Ezek. xxvii. 7, 16, שֵׁשׁ, *Shesh*, is mentioned as imported into Tyre from Egypt, and *Bûtz* as from Syria. Each is found in turn coupled with אַרְגָּמָן (*purpura*), in the sense of "purple and fine linen," *i.e.* the most showy and costly apparel (cp. Prov. xxxi. 22 with Esth. viii. 15). The dress of the Egyptian priests, at any rate in their ministrations, was without doubt of linen (Herod. ii. 37), in spite of Pliny's assertion (xix. 1, 2) that they preferred cotton. Yet cotton garments for the worship of the temples is said to be mentioned in the Rosetta Stone (Wilkinson, *A. E.* ii. 74 [1878]). Linen was the material of the Jewish ephod and other priestly attire, in which we cannot suppose any carelessness to have prevailed. If, however, a Jew happened to have a piece of cotton cloth, he probably would not be deterred by any scruple about the *heterogenea* of Deut. xxii. 11 from wearing that and linen together. There is, however, no word for the cotton *plant* (like פִּשְׁתָּה for flax) in the Hebrew, nor any reason to suppose that there was any early knowledge of the fabric.

The Egyptian mummy swathings also, many of which are said to remain as good as when fresh from the loom, are decided, after much controversy and minute analysis, to have been of linen, and not cotton. The very difficulty of deciding, however, shows how easily even scientific observers may mistake, and, much more, how impossible it would have been for ancient popular writers to avoid confusion. Even Greek naturalists sometimes clearly include "cotton" under λίνον. The same appears to be true of ὀθόνη, ὀθονίον, and the whole class of words signifying white textile vegetable fabrics. The proper Oriental name for the article כַּרְפַּס (said to occur with slight variation in Sansk. and other Oriental languages[b]) is Grecised in the LXX. by καρπάσινα. From the same word, with which either their Alexandrian or Parthian intercourse might familiarize them, the Latins borrowed *carbasus*, completely current in poetical use in the golden and silver period of Latinity, for sails, awnings, &c. Varro knew of tree-wool on the authority of Ctesias, contemporary with Xenophon. The Greeks, through the commercial consequences of Alexander's conquests, must have known of cotton cloth, and more or less of the plant. Amasis indeed (about B.C. 540) sent as a present from Egypt a corslet κεκοσμημένον χρυσῷ καὶ ἐρίοισι ἀπὸ ξύλου (Herod. iii. 47), which Pliny says was still existing in his time in a temple at Rhodes, and that the minuteness of its fibre had provoked the experiments of the curious.[c] Cotton was manufactured and worn extensively in Egypt, but extant monuments give no proof of its growth, as in the case of flax, in that country (Wilkinson, *A. E.* ii. pp. 50, 88 [1878]); indeed, had it been a general product, we could scarcely have missed finding some trace of it on the monumental details of ancient Egyptian arts, trades, &c.; but, especially, when Pliny (A.D. 75) asserts that cotton was then grown in Egypt, a statement confirmed by Julius Pollux (a century later), we can hardly resist the inference that, at least as a curiosity and as an experiment, some plantations existed there. This is the more likely since we find the cotton-*tree* (*Gossypium arboreum*, less usual than, and distinct from, the cotton *plant*, *Goss. herbac.*) is mentioned still by Pliny as the *only remarkable* tree of the adjacent Ethiopia; and since Arabia, on its other side, appears to have known cotton[d] from time immemorial, to grow it in abundance, and in parts to be highly favourable to that product. In India, however, we have the earliest records of the use of cotton for dress; of which, including the starching of it, some curious traces are found as early as 800 B.C., in the Institutes of Manu; also (it is said, on the authority of Prof. Wilson) in the Rig Veda, 105, v. 8. For these and some other curious antiquities of the subject, see Royle's *Culture and Commerce of Cotton in India*, pp. 117–122.

Cotton is *now* both grown and manufactured in various parts of Syria and Palestine, and, owing probably to its being less conductive of heat, seems preferred for turbans and shirts to linen; but there is no proof that, till they came in contact with Persia, the Hebrews generally knew of it as a distinct fabric from linen, whilst the negative proof of language and the probabilities of fact offer a strong presumption that, if they obtained it at all in commerce, they confounded it with linen under the terms *Shesh* or *Bûtz*. The greater cleanliness and durability of linen probably established its superiority over cotton for sepulchral purposes in the N. T. period, by which time the latter must have been commonly known, and thus there is no reason for assigning cotton as the material of the ὀθόνια and ἐντάφια of which we read. For the whole subject, see Yates's *Textrinum Antiquorum*, pt. i. chap. vi. and App. D. [H. H.]

COUCH. [BED.]

COUNCIL. **1.** (*συνέδριον*) the great council of the Sanhedrin, which sat at Jerusalem. [SAN-

of A. V., R. V. "linen garments," Judg. xiv. 12, 13, and "fine linen" (A. V. and R. V.), Is. iii. 23, is perhaps a form of the same word as σινδών, "linen cloth," Mark xiv. 51.

[b] *Kurpasa* or *kurpasum* is the Sansk. *Kupas* in Hindoo means the cotton rose or pod with seed, which in the Bengalee is *kapasee*, and in the Bombay dialect, *kapoos*.

[c] So Burckhardt (*Trav. Nub.* App. iii. p. 515, note) mentions "a species of cuirass made of quilted cotton" as still worn by certain tribes adjacent to the Nile.

[d] Arab. *Coton*, قطن, means: 1, any annual; 2, anything between two leaves; 3, the well-known "cotton" plant. This evolving of the special from the general sense seems to indicate that the name "cotton" is originally Arabic; though it may be true that the plant is indigenous in India.

HEDRIN.] **2.** (*συνέδρια*, Matt. v. 22, x. 17; Mark xiii. 9) the lesser courts, appointed by the Great Sanhedrin, of which there were two at Jerusalem, and one in each town of Palestine. The constitution of these courts varied; according to Talmudical writers, the number of judges was twenty-three in places where there was a population of 120, though three could act under special circumstances. Evidently the number varied according to the size of the town (Mishn. *Sanhedr.* 1 § 6. Cp. Riehm, *HWB.* s. n. "Gerichtswesen;" Ginsburg in Kitto's *Cyclop. of Bibl. Liter.* s. n. "Sanhedrin"). Josephus, however, mentions probably the usual practice, that the court, as constituted by Moses (Deut. xvi. 18; cp. *Ant.* iv. 8, § 14; *B. J.* ii. 20, § 5), consisted of seven judges, each of whom had two Levites as assessors; and in the reform which Josephus carried out in Galilee, he appointed seven judges for the trial of minor offences (*B. J.* ii. 20, § 5). These courts of justice met twice a week (Mondays and Thursdays), usually in a room adjoining the synagogue, and dealt not only with civil offences, but such capital cases as did not come within the jurisdiction of the Great Sanhedrin. To this latter body the judges referred any decision disputed among themselves (cp. Hamburger, *RE.* Abth. ii. s.n. "Synhedrion"). **3.** *συμβούλιον* (Acts xxv. 12), a kind of jury or privy council, consisting of assessors (*consiliarii*, Suet. *Tib.* 33, 55), who assisted Roman governors in the administration of justice and other public matters. [W. L. B.] [F.]

COURT, an open enclosure, applied in the A. V. most commonly to the enclosure of the Tabernacle and the Temple. The Hebrew word invariably used for the former is *Chatzer*, חָצֵר, from a root, חָצַר, to surround (Ges. p. 512. See, amongst others, Ex. xxvii. 9 to xl. 33; Lev. vi. 16; Num. iii. 26, &c.). The same word is also most frequently used for the "courts" of the Temple, as 1 K. vi. 36, vii. 8; 2 K. xxiii. 12; 2 Ch. xxxiii. 5; Ps. xcii. 13, &c. In 2 Ch. iv. 9 and vi. 13, however, a different word is employed, apparently, for the same places—*Azârah*, עֲזָרָה, from a root of similar meaning to the above (cp. the Arab. and Assyr. equivalents given in MV.[11]). This word also occurs in Ezek. xliii. 14, 17, 20; xlv. 19 (A. V. and R. V. "settle"), but perhaps with a different force. *Chatzer* also designates the court of a prison (Neh. iii. 25; Jer. xxxii. 2, &c.), of a private house (2 Sam. xvii. 18), and of a palace (2 K. xx. 4; Esth. i. 5, &c.). In Amos vii. 13, where the Hebrew word is *Beth* = a "house" (so R. V.), the A. V., perhaps desirous of using a term applicable specially to a king's residence, reads "court." [HOUSE; TABERNACLE; TEMPLE.]

The word *Chatzer* is very often employed for the enclosures of the villages of Palestine (see the list in MV.[11]), and under the form of Hazer or Hazor frequently occurs in the names of places in the A. V. [HAZER; VILLAGE.]

In Matt. xxvi. 69 (*v.* 58 may be doubtful), Mark xiv. 66 (perhaps also *v.* 54) and xv. 16, John xviii. 15, *αὐλή* should be rendered, as in R. V. "court," *i.e.* the quadrangle around which the house or palace of the high-priest was built, and not "palace" or "hall" (A. V.). Peter himself was not in the room of the palace where the Saviour was on trial, as the English reader would be led to suppose, but was in the court outside. [PETER.] Cp. *B. D.* American edition. [G.] [W.]

COU'THA (Κουθά; *Phusa*), 1 Esd. v. 32. There is no name corresponding with this in the lists (printed in parallel columns in *Speaker's Comm.* l. c.) of Ezra and Nehemiah. [F.]

COVENANT. There can be no doubt that the English word "covenant," by which it is almost invariably rendered in A. V., conveys an accurate idea of the Hebrew word בְּרִית in the O. T. The two words, however, are not proper equivalents. A covenant (*convenire*, *conventus*) is a coming together or agreement. "A covenant is a mutual consent and agreement entered into between persons, whereby they stand bound each to other to perform the conditions contracted and indented for. And thus a covenant is the very same thing with a contract or bargain" (Bp. Hopkins, ii. 302). "Sunt item pacta, quae sine legibus observantur ex conventu" (Cic. *ad Heren.* 2 *b*). But בְּרִית, whichever we accept of the derivations of it which have been suggested, describes properly some accessory of the covenant, rather than the covenant itself. It is derived by Gesenius from the unused root בָּרַת, *i. q.* בָּרָה, "to cut," and taken to mean primarily "a cutting," with reference to the custom of cutting or dividing animals in two, and passing between the parts in ratifying a covenant (Gen. xv.; Jer. xxxiv. 18, 19). Hence the expression "to cut a covenant" (כָּרַת בְּרִית, Gen. xv. 18, or simply כָּרַת, with בְּרִית understood, 1 Sam. xi. 2) is of frequent occurrence (cp. *ὅρκια τέμνειν*, *τέμνειν σπονδάς*, *icere*, *ferire*, *percutere foedus*). Buxtorf derives it from בָּרָה in the sense of "to choose," or "select:" "quia eliguntur personae inter quas, et res ac conditiones propter quas foedus initur" (cp. Assyr. in MV.[11]). Professor Lee suggests (*Heb. Lex.* s. v. בְּרִית) that the proper signification of the word is *an eating together*, or *banquet*, from the meaning "to eat," which the root בָּרָה sometimes bears, because among the Orientals to eat together amounts almost to a covenant of friendship. This view is supported by Gen. xxxi. 46, where Jacob and Laban eat together on the heap of stones which they have set up in ratifying the covenant between them. It affords also a satisfactory explanation of the expression "a covenant of salt" (בְּרִית מֶלַח, *διαθήκη ἁλός*, Num. xviii. 19; 2 Ch. xiii. 5), when the Eastern idea of eating salt together is remembered. If, however, any other derivation of בְּרִית be adopted, this expression may be explained by supposing salt to have been eaten or offered with accompanying sacrifices on occasion of very solemn covenants, or it may be regarded as figurative, denoting, either, from the use of salt in sacrifice (Lev. ii. 13; Mark ix. 49), the sacredness, or, from the preserving qualities of salt, the perpetuity of, the covenant. But, whatever be its derivation, the usage of the word clearly shows, as has been said, that it means a covenant or compact.

When, however, we pass to the N. T., a difficulty arises from the fact that *διαθήκη*, which was chosen by the LXX. to represent בְּרִית (*συνθήκη* is used in Wisd. i. 16; 1 Macc. x. 26;
